MANKIND ONLY CAN BENEFIT FROM A CHURCH SERVICE

Through the science of crossing bloodlines mankind has been able to produce milk cows that release an amazing flow of milk as compared to that of their ancestors. But science has never produced a cow that can thank her master for the food or the care she has

Improved though she be, the modern milk cow could never appreciate attending a service at her master's church or know the inner peace and joy that is the owner's just for the attending. Preceeding the services, in the quiet sanctuary of his church man can discard his worries, frustrations and worldly cares and have the space they occupied in the mind filled with the peace that passes all understanding. Then from the service proper he may experience a renewal of spiritual guidance, of courage and the will to serve.
