TVSC board approves \$3.92 rate

A school budget that includes the maximum increase allowable without appeal and sets a rate of \$3.92 per \$100 of assessed valuation was unanimously approved Thursday night by members of the Tippecanoe Valley school board. No protestors were present. If approved by county and state tax boards, the rate will be an increase of 27 cents from last year and will include a \$3.10 general fund rate and an 82 cent cumulative building fund.

The increase will be used to offset recent teacher and principal salary boosts and price increases in supplies.

The board approved hiring Pam Walters as audio-visual aide and voted 4-1 to have building trades classes construct a house at Mentone on land already owned by TVSC. Dr. John

McKee cast the dissenting vote. Superintendent of Schools Robert Forbes said six boys from each high school had enrolled and that the course would be offered on a half-day basis with the instructor, Charles Fellers, teaching other vocational subjects the other half day. Richard Goshert suggested having the boys remodel an existing structure since enrollment was light. His suggestion received little encouragement from Forbes or from fellow board members.

Board members authorized payment of \$9,703.60 to Bahney Chevrolet

Sales for a new bus and approved reducing Robt. Igney's contract by \$250 and increasing Dennis Hoff's by \$250 because of a change in assistant coaching assignments.

Oliver England was appointed school lunch coordinator for the entire corporation following a vote to join the federal school lunch program.

TVSC sets hot lunch policy

Tippecanoe Valley School Corporation this week announced a free meal policy for school children unable to pay the full price of meals served in schools under the National School Lunch Programs.

Local school officials have adopted the following family size-income criteria for use in determining eligibility:

Family Size	Income
1	\$ 2,740
2	3,600
3	4,460
4	5,310
5	6,100
6	6,890
7	7,600
8	8,310
9	8,960
10	9,600
11	10,240
12	10,880

Each additional family member should add \$640.

Children from families whose income is at or below those shown are eligible for free meals. In addition, families not meeting this criteria but with other unusual expenses due to unusually high medical expenses, shelter costs in excess of 30% of income, special education expenses due to the mental or physical condition of a child, and disaster or casualty losses are urged to apply. They may do so by filling in the application forms sent home in a letter to parents. Additional copies are available at the principal's office in each school. The information provided on the application will be confidential and will be used only for the purpose of determining eligibility. Applications may be submitted any time during the school year.

In certain cases foster children are also eligible for these benefits. If a family has such children living with them and wishes to apply for such meals for them, they should contact the school.

In the operation of child feeding programs, no child will be discriminated against because of his race, sex, color, or national origin.

Under the provision of the policy the school principal will review applications and determine eligibility. If a parent is dissatisfied with the ruling of the official he may make a request either orally or in writing to Robert Forbes, Mentone, for a hearing to appeal the decision.

Hearing procedures are outlined in the policy, a complete copy of which is on file in each school and in the office of the superintendent where it may be reviewed by any interest person.

The most valuable gift you can give another is a good example.

Preparation Meeting Conducted at Mentone

Another enthusiastic Tippecanoe Valley Crusade Spiritual Preparation meeting was conducted at the Mentone United Methodist Church Monday night with the Rev. J.D. Thomason in charge. He was assisted by the Rev. Donald Poyser, Clarence Mark, Jerry Kindig and the Rev. Lowell Burris. The next executive and prep meeting will be conducted at 6:30 and 7:30 p.m. respectively at the Mentone United Methodist Church on Monday, September 10.

Choir practice and preparation of ushers will be at the Akron Church of God, Sunday afternoon, September 9, from 2:30 to 3:30. The choir is directed by the Rev. Ray Bradway. Ushers will be instructed by Wayne Baker.

Grass Fire

Akron and Mentone fire departments were summoned Monday afternoon to extinguish a grass fire near Barr Lake in Newcastle township. The fire was on the former Gaston Coplen farm, now owned by Charles Runkle. The latter declined assistance, according to firemen.

Burglars Strike Franger Gas

Burglars gained entry at Franger Gas Co., two miles west of Akron, early Friday morning by prying open a front door. They ransacked offices, desks and file cabinets and opened a floor safe by peeling the door. Approximately \$250 in cash and checks was reported missing.

Investigating were Akron, state and county police officers.

AHS and MHS students begin sales

For a two week period beginning today, students at Akron and Mentone high schools will participate in a magazine subscription program to benefit students, community and school. The program is organized and sponsored by various school organizations.

In announcing the activity, the school principals, John Hurst and Forst Dunnuck, said, "We are pleased to be associating with QSP. This plan represents the same high degree of skill, knowledge and integrity manifested by its parent company, Readers Digest Association, Inc."

School magazine sales programs have been in existence for some 45 years. They offer students a chance to help

their school, their communities and themselves. The profits, representing a good percentage of the subscription prices, are retained by the school to use in the purchase of items not usually provided by the school budget.

The QSP program has the added effect of teaching students to work as a team, develop initiative, and gain business experience. In offering over 200 publications found in the home, it helps the community develop better reading habits, say the officials. Magazines listed are Reader's Digest, Sports Illustrated, McCall's and other quality women's magazines and many special interest publications.

Hurst and Dunnuck expressed hopes for a suc-

cessful campaign and asked the community to remember when a student "approaches you during these next days, please realize that you are not contributing but are assisting in a service to that student, his school and the community membership. Most likely, we would purchase these magazines anyway, so we feel it is better to do it from one of our students."

Reception to Honor Mrs. Broady Saturday

A reception honoring the appointment of Mrs. Nancy Terrell Broady as Grand Adah for the Order of the Eastern Star in Indiana will be Saturday afternoon, Sept. 8, from 3:30 to 4:30 p.m. in the Akron school gym. A social hour will precede a program.

At 7:10 p.m., the Worlthy Grand Matron will make her official visit to Akron, Rochester and Gilead chapters Order of Eastern Star.

Today you may shirk your responsibilities--tomorrow you will meet the results.

BIG MUSKMELONS: Melissa Rager, daughter of Mr. Mrs. Eldon Rager, Akron, shows off some giant banana muskmelons raised by Mr. and Mrs. Jesse Henderson, also of Akron.

ARE YOU WILLING?

To close your book of complaints and to open the book of praise?

To believe other men are as sincere as you and to treat them with respect?

To ignore what life owes you and think about what you owe life?

To stop looking for friendship and to start being friendly?

To be content with such things as you have and stop whining for the things you do not have?

To enjoy the simplest things of life and to cease striving for the artificial pleasure of the day?

To forget what you have accomplished and to meditate on what others have done for you?

Pie plant is another name for rhubarb, because it makes such delicious pies! (And delicious cobbles, too, and they're even quicker and easier.) Over chunks of fresh rhubarb in a pan, pour a thickened, sweet sauce of apple juice. Add a crunchy butterscotch topping containing quick or old fashioned oats, then drizzle with melted butter and bake. While still warm serve with scoops of creamy ice cream and you have royal fare - that the royalty in your household will applaud!

RHUBARB APPLE COBBLER

Makes 9 servings

- | | |
|---|---|
| 4 cups fresh rhubarb, cut in 1-inch pieces | $\frac{1}{2}$ cup firmly packed brown sugar |
| $\frac{3}{4}$ cup granulated sugar | $\frac{1}{4}$ teaspoon baking powder |
| 2 tablespoons cornstarch | $\frac{1}{4}$ teaspoon salt |
| 1 cup unsweetened apple juice | 1 egg, beaten |
| $\frac{2}{3}$ cup sifted all-purpose flour | $\frac{1}{2}$ cup butter or margarine, melted |
| $\frac{3}{4}$ cup quick or old fashioned oats, uncooked | |

Heat oven to moderate (375°F.). Place rhubarb in 9-inch square baking pan. Combine granulated sugar and cornstarch in saucepan; slowly stir in apple juice. Cook, stirring constantly, until thickened and clear. Pour over rhubarb, tossing to mix well.

Combine flour, oats, brown sugar, baking powder and salt. Stir in egg until mixture resembles coarse crumbs. Crumble evenly over rhubarb base. Drizzle with melted butter. Bake in preheated oven (375°F.) about 35 minutes. Serve with vanilla ice cream.

ODDS and ENDS

BY ANN SHEETZ

It's awfully hard to read a newspaper or a magazine without sneaking at least a tiny peek at the horoscope column, that purveyor of such interesting information as the fact that people born under my sign (Libra) are extravagant and lazy, given to self-indulgence and a lot of other bad traits but not all bad since we would make excellent judges because we can see both sides to every situation.

For a long time I've been convinced those columns are too negative, too damaging to the frail human spirit that needs something more substantial to cling to than a veiled threat to "beware a person bearing gifts or who gives advice; he has ulterior motives" or "drive with extreme caution; if possible, stay home." We try to ignore them, but let a person offer us a fresh pie and we find ourselves giving it and the giver a second look before we accept, and driving with caution has to be a way of life to survive the crowded roads.

Negative, bad, possibly even the work of Satan himself, some people say, the columns continue to gain readers, probably because, like me, they can't resist a possibility the next day will be much, much better than the one before.

I've considered many ways to uncover the

sinister persons who write these columns, but they are faster than I am. For instance, would you believe? my prediction for Tuesday was that I would feel better than usual and my job performance would reflect this. Now that's not bad. A day like that is one anyone could use.

Reading the prediction Monday night keyed me up and gave me an imagined feeling of so much well being that I allowed myself to be talked into an eight-mile bike hike with the boys. Eight miles! My previous record had been four. Not only did we ride eight miles, we made it in less than an hour, a feat made possible by a lot of blood-thirsty dogs chasing us, their gnashing teeth and growls adding impetus to make good time. Surprisingly, I felt wonderful. Wow! was I going to be ready for that good day. To show how alert I now was, I read until midnight.

On Tuesday, the rains came and their soothing sound on the roof lulled me into a sleep that threatened to last until noon and might have if I hadn't suddenly awakened with a funny feeling across my back that would not go away. In fact, all day, my back ached and ached. Now, I didn't ride that bike on my back, I can tell you, but it seems to have taken the toll for the whole eight-mile ride. What with favoring it all day, the rest of my activities were slowed considerably and my performance reflected this. Somehow, this was not what I had hoped for.

All of which, I decided, only went to further prove that horoscopes were pretty dumb. But then I found another one for the same day, and while it may be Libra's ability to see both sides, I felt I had deserved the veiled warning: "You stand to profit handsomely from your labors the next few days." At that rate, it'll be the end of the week before my back quits hurting.

If I had time, I'd indulge in something extravagant like staying in bed but won't for fear of being considered lazy by my sons who are again clamoring for another speedy eight-mile bike hike to see if we can break our record.

I cheated Tuesday and peeked at my horoscope for Wednesday. Again, it was wonderful! Really

good. It was so good I don't intend to ever read another one. I may have a lot of those crazy Libran traits, but I'm also stubborn enough to quit while I'm still ahead.

Why Worry?

There are only two reasons for worry: Either you are successful or you are not successful. If you are successful, there is nothing to worry about. If you are not successful, there are only two things to worry about: Your health is good or you are sick. If your health is good, there is nothing to worry about. If you are sick, there are only two things to worry about: You are either going to get well or you are going to die. If you are going to get well, there is nothing to worry about. If you are going to die, there are only two things to worry about: You are either going to heaven or you are not going to heaven. And if you are going to heaven, there is nothing to worry about. If you are going to the other place, you will be so busy shaking hands with your friends that you won't have time to worry. So why worry?

How to ruin a town

Seldom does a week go by but what this editor hears some type of criticism about the our area towns. Often the remarks are made by those who do nothing--except complain.

We do not recommend that the following rules be adopted but if there are any individuals who want to ruin their town, this platform should get results. On the contrary, if you want to help your town, maybe these are some pitfalls you will want to avoid.

1. Don't pay taxes. Let the other fellow pay his. Vote against taxes then fuss because the streets are not kept up and the police protection is lax.

2. Never attend any meetings called for the good of the town. If you do, don't have anything to say. Wait until you get outside and then degrade those who made the suggestions. Find fault with everything that was done.

3. Get all the town will give you, and don't give anything in return. Write unsigned letters to the editor demanding more for your tax money.

4. Talk cooperation, but don't do any work for the town unless they make you chairman or pay you for your efforts.

5. Never accept any office. It's easier to criticize than to do things. Accuse anybody who serves in an elected office of being a publicity seeker.

6. Don't do any more than you have to. When others willingly and unselfishly give their time to make a better town, howl because the town is run by a clique.

7. Don't back your fire or police department. If the firemen work to bring the

insurance rates down, tell everybody that it is what they are supposed to do. Don't thank them or the policemen for endangering their lives so that you might have a safer town in which to live. Demand special treatment; raise Cain if anybody expects you to obey traffic and parking laws.

8. Look at every proposition in a selfish way. If you are not the one that gets the most out of it, vote against it. Never consider what it will do for the good of the town as a whole.

9. Don't do anything for the youth of the town. Criticize them as potential delinquents. Keep your feet on them. Encourage them to move away when they grow up.

10. If you have good town leaders, don't follow them. Take a jealous attitude and talk down everything they do.

11. Don't work on any committee. Tell them, "I'm too busy."

12. Don't say anything good about your town. Be the first to point up its shortcomings. Pretend that if trouble comes your way, it will be residents of some other town who will visit you while you are ill, bring in the fire department if your home is burning, comfort you if you lose a dear one, stand back of you in disaster.

13. And don't support your local retail stores and industries. Claim the prices and services at stores in other towns are better. Claim industry and its payroll hurts the town. But if you need a donation, ask your local stores and industries for it. Expect them to back you, but don't back them.

If these 13 points don't ruin your town, it's not your fault. You did your best!

Twelve buildings in the business district of Liberty Mills burned clean Tuesday morning of last week, just 22 years and one day after Akron had its chief fire and in which the AKRON NEWS lost its all and the shooting stick. The loss in the Liberty Mills fire amounted to \$15,000 to \$25,000. Some of the losses will never re-build. Some of the buildings belonged to widowed ladies who lived from the rental their only income and they have not the means with which to rebuild. And for these reasons Liberty Mills will probably never again be as prominent in the trade of that locality as it has been in the past. In the early life of that part of Wabash country, Liberty Mills was an important factor, but North Manchester with its commercial activity and two railroads pulled the business away from the little town.

It is filled by Mrs. Neel's brother, Prof. Knight, of Brownstown, Jackson county, who has accepted of the place. It is a strange coincidence that our school superintendent has not been exactly taken out of the family, and yet it was not brought on by any effort on the part of anyone interested directly, so far as we see it.

News Of Interest To Homemakers

BY ANN HANCOCK
Area Extension Agent, Kosciusko County

Since recent discoveries of cans of contaminated food have caused nationwide concern, you might want to try the following hints for do-it-yourself canners.

Remember that in almost all cases of food spoilage, contamination is the result of inadequate heating in the canning process that fails to kill the infecting agent. Despite the recent finds of botulism in commercially-canned products, more often than not, instances of food poisoning have resulted through improper home canning procedures.

Vegetables, meat, and poultry should be canned properly in a pressure canner. Be sure, however, that it is in proper working order and that each step of the canning process, including time and temperature directions is followed rigorously.

It is unsafe to can these foods in a boiling water bath, an oven, a steamer with out pressure, or an open kettle. None of these methods according to the United States Dept. of Agriculture will heat these foods enough to kill dangerous bacteria within a reasonable time.

There are some exceptions. Tomatoes, pickled vegetables and fruit can be processed safely in a boiling water bath because they are more acid than other vegetables.

Generally, all home-canned vegetables should be brought to a rolling

boil, then covered and boiled for at least 10 minutes. Spinach and corn should be boiled for 20 minutes. If the food looks spoiled or gives off an unusual odor, discard it.

If you would like more information on home canning visit the County Extension Office for the U.S.D.A. publication "Home Canning of Fruits and Vegetables".

Men can live without air for a few minutes, without water for about two weeks, without food for about two months--and without a new thought for years on end.

If you get lonesome, don't try to advertise for a wife. You will get thousands of replies saying, "You can have mine."

Take your problems to Church this week —

GOOD FOR THE WHOLE FAMILY

Bible stories are interesting and fascinating reading. Children like to read them or have the stories read to them. They could well be substituted in many homes for some of the "so called comics," without objection on the part of the children. Then too, they serve a useful purpose in helping spiritual growth of the child advance along with body growth.

Provide recommended books of Bible stories for the children and take them to Sunday School and Church with the rest of the family. They'll soon learn to enjoy the services.

Tree Care Urged In Second Of Evaluation Series

The second of a series of articles aimed at helping Akron residents improve their trees has been prepared by Pike Lumber Co., Inc. and is published as a public service. The series is a part of an evaluation program undertaken by the town this summer with the assistance of Pike foresters and Purdue extension specialists.

Trees being the most permanent investment in a landscape plan will be more pleasing if properly pruned and cared for. A tree usually does not need pruning until two years after planting and then only in late winter, except for Maples, which should be pruned in the summer.

Always prune trees to increase their health and aesthetic value. Allow the tree to attain a typical form for the species. Never attempt to make a shrub out of a young tree.

Generally, removing branches that have narrow V-shaped angles with

the main trunk and all rubbing branches is a good practice. However, some small ornamental trees are exceptions. Paint all tree wounds larger than 3/4 of an inch in diameter with pine tar or a suitable substitute.

If the top of a tree must be cut for electrical wires, make sure the limbs are removed to the junction of other limbs and the wounds treated. Never "top" a tree unless absolutely necessary, for this greatly weakens the tree.

To assist homeowners in ornamental and shade tree selection, future articles will indicate the location of various types of trees properly cared for in the community.

Signs of the times

These signs are signs of the times at the site of the new Tippecanoe Valley High School. A lot of dirt has been rearranged with many crews working feverishly toward the September 1, 1974, target date.

Sowder to address preparation rally

Jimmy Sowder, director of crusades for the Bowdoin-Sowder Crusade team, will be present at the next spiritual preparation rally of the Tippecanoe Valley Crusade. He will instruct and encourage local people working towards the rally.

Mr. Sowder has direct-

ed crusades across America as well as overseas. Cities in which he has directed city and area-wide crusades include Ft. Wayne, Ind., Muskegon, Mich., Louisville, Ky., Stockton, Calif., and Kinshasha, Africa.

Mr. Sowder specializes in preparation before the crusade, counseling during a crusade and follow-up after a crusade. A speaker much in demand in churches, conferences, etc., he has recently been invited to lecture on evangelism at one of the leading theological seminaries.

The next spiritual preparation meeting will be at the Mentone United Methodist Church at 7:30 p.m. September 17. It will be preceded by an executive meeting at 6:30 p.m.

Area pastors will meet Friday, September 14, at the Mentone United Meth-

odist Church at 7 a.m. for a devotional hour and will then have breakfast at Teel's restaurant.

Operation Doorstop, to be conducted by individual churches in their own communities, will be Sunday, September 16. Final choir practice and ushers rehearsal will be at the Mentone gym Saturday, Sept. 22, at 8 p.m.

Akron Streets Being Surfaced

Streets in Akron that were damaged during the sewer construction project are being repaired by Joe Gooch, Rochester. Each is given five coats of material, the first four being paid for by Woodruff and Sons as part of their agreement to return the streets to their original condition and the fifth is done at town expense.

Sonoco marks 20th year of Akron operation

The Akron plant of Sonoco Products Co. celebrated its 20th birthday Monday afternoon, also noting the employees have worked over one million man hours without a lost time injury.

Attending an informal open house in the afternoon were representatives from the community. Also present were former Akron resident Herbert Byrd, vice president-General Products Division, and C. W. Coker, Sr., chairman of the board.

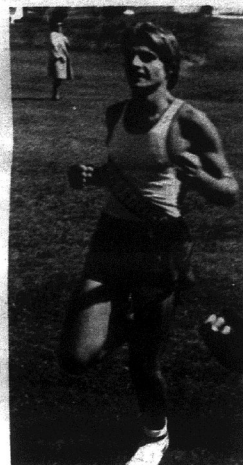

Mentone Girls To Play Army Team Sunday

Letters To The Editor

The NEWS welcomes letters for publication but prefers that they be kept under 200 words. The letters need not express the views of this paper; however, they should not be libelous or in poor taste. Anonymous letters will not be published. The name of the writer must appear with his letter.

Dear Mr. Sheetz:

Since antique cars, cans and candlesticks are so much in demand at the present time, I believe some of your readers might enjoy the enclosed snapshot.

The "Tin Lizzie" belonged to my grandfather, John F. Imhoof. The picture was taken at the Imhoof home about three miles south of Akron, which was occupied by the Darl Harsh family more recently. I'm not sure who lives there now but it might be one of the Schippers.

The man on the fender is Charles (Chuck) Imhoof, deceased, a timber buyer from Denver and first cousin of London and Fred Imhoof, both former Akron residents.

The little girl on the hood is my sister Kathleen Murphy Hill, now Mrs. Jim Hill of rural North Manchester.

The little car was a Saxon, belonging to my uncle Fred. It had a "rumble seat" which the younger generation wouldn't know much about.

I remember quite well a Sunday when Grandad was to have his first driving lesson from Fred. Everyone wanted to ride in the new Ford so I went along. Everything went fine until we hit some fresh gravel and went into a ditch someplace near the old Highland Church. That was my first traffic accident. The car was purchased about the end of World War I. I'm not sure, it could have been a year later. All I'm sure of, it was Grandad's and I loved it.

Sincerely,
Esther Perry

Some stretch pants, it has been noted, have no other choice.

These are not really doughnuts at all but they taste much like them -- and they're treasures indeed! Best of all, even a non-pastry cook can whip them up. Spread slices of white bread with preserves, as though you were making sandwiches. Slice these in fourths, dip into a pancake mix batter, and then fry till golden brown. Like doughnuts, they're delicious, they're delightful. And just great for late summer, fall (or any time) get-togethers!

"DOUGHNUT" TREASURES

Makes 16 doughnuts

8 slices thin-sliced white bread
¾ cup pancake mix
¼ cup preserves or marmalade
½ cup milk
1 egg

Trim crusts from bread. Spread each of 4 slices with 1 tablespoon jam; top with remaining 4 slices. Cut each sandwich into quarters.

Combine pancake mix, milk and egg in bowl. Stir lightly until batter is fairly smooth. Dip sandwich quarters in batter; drain. Fry in hot deep fat (375° F.) about 2 minutes or until golden brown. Drain on absorbent paper. Sprinkle with confectioners sugar before serving.

Getting out the newspaper

Getting out this newspaper is no picnic. If we print jokes, people say we are silly. If we don't, they say we are too serious. If we stick close to the office all day: We ought to be around out hunting material.

If we go out and try to hustle. We ought to be on the job in the office.

If we don't print contributions. We don't appreciate genius; And if we do print them, the paper is filled with junk!

If we edit the other fellow's writeup, we're too critical. If we don't we are asleep.

If we clip from other papers. We are too lazy to write them ourselves. If we don't. We are stuck with our own stuff.

Now, like as not some guy will say we swiped this from some newspaper*

Over in the peaceful little town of bootleggers known as Kokomo, the Methodist Sunday School had 250 hymn books printed for their own use. To help defray the expense of getting out these hymnals, a liberal amount of advertising space was sold to the merchants. When the books were delivered, a page advertisement was found in the book for the owner of a bottling plant. In large letters, the ad set forth that the man was engaged in bottling Madison XXX Ale. The Sunday school people were thunderstruck, but the brewer came to their rescue and allowed them to tear the offending page from the hymnals. This was done, and again quiet reigns in the peaceful little burg along the Wildcat.

Barney and Opal Nellans create beautiful

By Ann Sheetz

THIS ONE IS MINE. Opal Nellans says as she and Barney sort the pre-cut stones they have just taken from their tumbler. She is holding pieces that will become pins and earrings.

Since 1971, Barney Nellans, retired Mentone rural mail carrier, and his wife Opal have not only been enthusiastic rock hounds, they have created incredibly beautiful jewelry in the basement workshop of their home.

Their quest for materials has taken them to quarries near Wabash, to North Carolina in search for rubies and garnets and through Nebraska, South Dakota, Wyoming and Montana.

They take the stones to their workshop where they are sorted for possible projects. The stones are then cut and pre-shaped according to the design intended for them. The Nellans each have marked preferences in the type of stones they use, and each usually has several projects in the works.

After the stones are pre-cut, the smaller pieces are tumbled, a five-week process. Repeated tumbings are often required to get desired effects. Larger pieces are polished on grinders, a job that can take four to five hours

of work. Where the tumbler can be left relatively unattended except for weekly changes of grit, the grinder requires the person's undivided attention the entire time. Their advice: "If things start going badly, get out, get away from it." The importance of proper grinding cannot be emphasized too much, because if it doesn't go right, the stone's polish will not be right, either.

The Nellans have not only learned to create jewelry, they have become students of rocks and minerals. For instance, they demonstrated the difference between agate and jasper by holding different stones to a light. The light will show through agate but jasper is solid. However, some stones, such as beautiful Mexican crazy lace, are both jasper and agate, jaspagate. Different minerals and formations give the stone its effect and its name. The couple also works with petrified wood, noting this is very splintery, the chips acting like little daggers.

Stones that are ground are held with a "dop stick", a stick of wood

with a bit of substance that resembles clay on the end. The dop and the stone are heated to the same temperature, joined and then allowed to cool. The stone then sticks to the dop stick, giving the person operating the polisher more flexibility and a greater degree of safety. When the stone has been polished, it and the dop are again reheated to permit separation.

Proper equipment is an important part of their craft, and, in addition to the tumbler and grinder, they have two saws, each with diamond blades. One of these can be set to automatically move the stone through, a time-saving device for the hobbyist. Unlike the grinder, which can instantly remove skin from a thumb or finger, the saw will not cut skin, a fact that seems incredible since it easily cuts the hardest stone.

Births

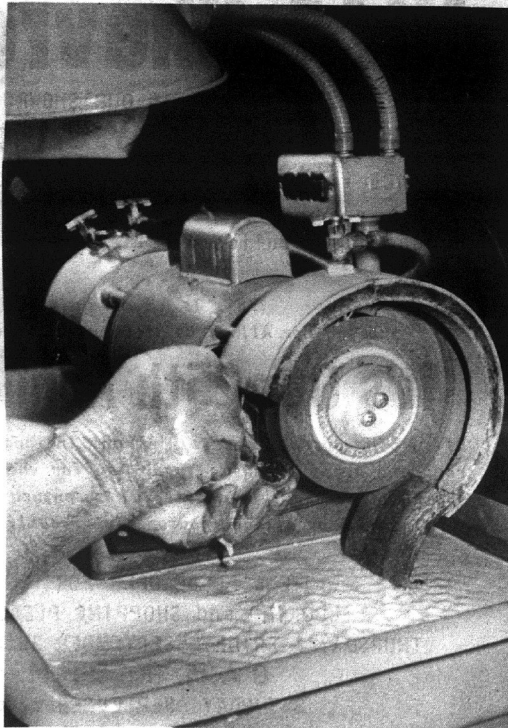

Pvt. and Mrs. Steven Heller are parents of a seven pound, nine and one-half ounce son, Steven Allen, born August 15 in a Neurenburg, Germany, hospital. Grandparents are Mr. and Mrs. Earl Bundy of Indianapolis and Mr. and Mrs. Lee Murphy, Akron. Roy E. Smith, Akron, is the maternal great-grandfather.

Mr. and Mrs. Jeffery Worsham, Warsaw, are parents of an eight pound, 11 ounce son, Sean Michael, born Sept. 5 at Murphy Medical Center. Grandparents are Mr. and Mrs. Keith Sill, Tippecanoe, Mr. and Mrs. E. Eugene Worsham, Warsaw, and Mrs. Carla Hoover, Huntington. Great-grandparents are Mrs. Fostie Sill, Tippecanoe, Mr. and Mrs. Graham Grossman, Bourbon, and Mrs. Ada Worsham, Columbia City.

Mr. and Mrs. David Stults, Tippecanoe, are parents of a seven pound 14½ ounce daughter, Gayla Renea, born September 5 at Parkview Hospital, Plymouth. Grandparents are Mr. and Mrs. Wm. Blackford, Tippecanoe, and Bill Stults, R. 1, Argos.

CAREFUL POLISHING is extremely important. Barney holds a stone that is mounted on a dop stick against a carborundum polishing wheel that could tear the skin from his fingers if he got too close. Soluble oil and water are used to cool the stone and wheel.

Small stones are imbedded in plaster of Paris so that no bit of stone is lost in cutting. The plaster of Paris can be removed later; the important thing is not to lose any of the stone. Each piece can make interesting jewelry, and often the stones will show several excellent possibilities, some of them actually seeming to show landscapes, such as mountains or even satellites.

Barney Nellans' advice to beginners is, "Never throw away anything from the saw and on field trips, pick up everything that has color. He practices what he preaches, buying only foreign stones, finding the rest himself. He also recommends having six to eight pieces in various steps at the same time. "This way," he says, "you've not tied to one piece and you can follow through in sort of a chain process."

The couple has created many interesting pieces of jewelry, none of which is sold. They prefer giving it to family and friends as lasting gifts that reflect any eye for color, beauty, ingenuity and detail.

OPAL AND BARNEY NELLANS look at some of the many pieces of jewelry they have created since becoming rockhounds two years ago. Note the tie slide in the shape of Indiana and the beautiful necklaces and brooches.

MESA, ARIZ., TRIBUNE: "See where a bit of squeeze is developing in the matter of go-juice for chariots, clear across the nation. It'd be a good idea to start thinking in terms of saving gas whenever possible. Combine shopping trips; try walking if you're next door to a grocery; keep your car tuned up to get the best gas mileage possible, establish gas-saving driving habits by avoiding jackrabbit starts and the like. Drive with the traffic flow on arterial streets where signals are synchronized. Might even try a bike sometimes."

GARNETT, KANS., REVIEW: "We read about a man who owns a new big car who pulled into a gas station for gas and left his motor running.

The attendant finally told him he would have to shut off his engine because the car was using gas faster than he could put it in the tank."

Of Men and Nations

Historically, great civilizations have thrived for 200 years. Note their patterns... and heed. From bondage to spiritual faith; from spiritual faith to great courage; from courage to liberty; from liberty to abundance; from abundance to selfishness; from selfishness to complacency; from complacency to apathy; from apathy to dependency; and from dependency to bondage.

Fudgie Scotch Ring

You Can Make This Chocolate-Walnut Candy Even Though You've Never Made Candy Before

Candy making time is any time, but homemade candy is especially welcome at holiday time. Sweeten up your holidays this year by making this Fudgie Scotch Ring. Just four ingredients — semi-sweet chocolate morsels and butterscotch morsels, sweetened condensed milk (the sugar and milk are already blended for you) and walnuts, do the trick.

Ring in the holiday season by making Fudgie Scotch Ring for gifts. Wrap in gay wrapping and place the recipe atop the package. Here's the recipe:

(Makes about 36 slices)

1 cup (one 6-oz pkg.) semi-sweet chocolate morsels	1 cup coarsely chopped walnuts
1 cup (one 6-oz pkg.) butterscotch morsels	1/2 teaspoon vanilla extract
1 can sweetened condensed milk (not evaporated)	1 cup walnut halves

Melt chocolate and butterscotch morsels with sweetened condensed milk in top of double boiler over hot (not boiling) water. Stir till morsels melt and mixture begins to thicken. Remove from heat. Add chopped walnuts and vanilla. Blend well. Chill for 1 hour until mixture thickens. Line bottom of 9" pie pan with a 12" square of foil. Place 1/4 cup walnut halves in pan bottom to form a 2" wide flat ring. Spoon chocolate mixture in small mounds atop walnuts to form ring. Decorate with remaining walnut halves. Chill in refrigerator until firm enough to slice into 1/2 inch slices.

Chapman-Young Vows Repeated

Debbie Young. Tina Vigar was flower girl.

News Of Interest To Homemakers

BY ANN HANCOCK
Area Extension Agent, Kosciusko County

The children are all back in school now and the Extension Homemaker program is in full swing. During the summer months there are few activities other than the fair.

The first lesson of the year was scheduled for September 6. "No Fault Insurance" was discussed by Miss Anna K. Williams, Extension Home Economist and Mr. Thames Mauzy, a member of the Indiana General Assembly. This current topic started the year with some interesting discussions.

Fall is just around the corner but its not too late for Homemakers Camp. Kosciusko and Elkhart County Extension Homemakers are planning a two-day camp at Camp Mack in Milford. Activities at camp include crafts, educational programs, and fun. Camp gives "mom" an opportunity for a two-day vacation of her own.

Mrs. Herschel Albert, Leesburg, is chairman.

A series of knitting classes for beginners is planned. Mrs. Ernest Hauth, Warsaw, will be the instructor for the classes. Knitting is a favorite winter pastime for many women. The beginners class will learn the basics and knit a pair of slippers. Class is sched-

uled for Sept. 6, 13, 20, and 27, at 7:00 p.m.

Thanks to Mrs. Joe F. Frantz of the Southern Belles Club for sharing her Brown Sugar Angel Cake recipe. It won a first place ribbon at the county fair.

BROWN SUGAR ANGEL CAKE

1½ cups egg whites
2 tsp. vanilla
1½ tsp. cream tartar
1 tsp. salt
2 cups brown sugar
1½ cups flour

Beat egg whites with vanilla, cream of tartar and salt till soft peaks form. Gradually sieve 1 cup brown sugar over egg whites and beat till stiff peaks form. Sift remaining cup of brown sugar with flour; fold into egg white. Turn into ungreased 10" tube pan. Bake at 350° for 45-50 minutes.

It Happened In Mentone

Taken from the Sept. 13, 1944 issue of the Northern Indiana Co-Op News:

Mrs. Tessie Newton received some gifts and German relics from her son, T-5 Howard Newton, who was in Italy at the time the gifts were sent. They were wrapped in the Co-Op paper of May 10. This is the issue with the story about the "dive bomber" owls attacking Mrs. Claude Barkman. Mrs. Newton hasn't heard from Howard for three months so she doesn't know whether he is in Italy or not.

Tommy Stanford, native of Warsaw and son of Mrs. A. H. Stanford of Mentone, is home on a fifteen-day leave before returning to a hospital in Oakland, Calif., where he will receive a medical survey. He was injured in landing operations at Tarawa.

S/Sgt. Philip Lash was home over the weekend.

Dale Kelley and Ora McKinley were in Wabash Tuesday evening where Mr. Kelley spoke before the Wabash Lions Club. He spoke on historical facts and interesting data of New Orleans.

Mr. and Mrs. Fred Lem-

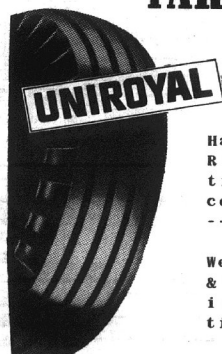

ler and daughters, Rev. and Mrs. Silas Hill and Miss Grace Rans spent Sunday at Winona Lake.

Mr. and Mrs. Burr Workman and family and Miss Gladys Workman of Warsaw have moved into the Ray Dillingham property.

Mr. and Mrs. Orbe Miller of New Paris visited at the John Latham home Sunday.

TVSC Tax Rate Okayed By County Board

The Kosciusko Co. Tax Adjustment Board approved Tippecanoe Valley School Corporation's \$3.92 tax rate Monday. This marks an increase of 27 cents from last year's \$3.65.

Members of the tax adjustment board include Joe Boggs, Mentone, chairman; Mrs. Ruth McCleary, Graham Kreicker, Everett Rookstool, Leo Mort, Leonard Barnhart, and Marshall Estep.

During the hearings, the county board lobbied \$18,000 from a county council approved \$1,461, 221 county general budget, reducing the rate to 87 cents per \$100 of assessed valuation.

All budgets will be reviewed by the State Board of Tax Commissioners in October. At this time, any budget may be further trimmed and public hearings will be granted offices whose budgets were cut by the county tax board.

Months of preparation and study will be culminated September 23-30 with the Tippecanoe Valley Crusade, an evangelistic thrust involving many area churches. The nightly meetings will begin at 7:30 p.m. in the Mentone gym.

Nursery services will be provided.

Featured speaker will be Dr. Herbert L. Bowdoin of "Methodist Hour."

Bowdoin originated and organized "The Story," America's first color TV religious series. The Emmy award series featured Dr. Ford Philpot.

Bowdoin and his wife, Polly, and their three

Director of the Crusade is Jimmy Sowder, also of Orlando where he and his wife, June, and two sons moved in July to be at the international headquarters of "The Methodist Hour."

Sowder for 13 years directed crusades across

America and overseas for the Ford Philpot Evangelistic Association. He has helped on Holy Land tours and has been in charge of seminars related to evangelism in depth on these tours. Both men are accomplished speakers.

Every person in the area has been extended an invitation to participate in this crusade.

School Board hears reports, hires personnel

Listening to reports from school superintendent Robert Forbes and hiring new employees occupied most of the Tippecanoe Valley school board member's attention Monday night.

A financial report by Forbes showed \$1,690,382.96 invested of the corporation's \$1,796,392.62 total funds. He also gave a report of contracts and payments made to date for the new school, indicating \$1.4 million of corporation funds is left to be spent. Board members voted to receive a similar report each month from the holding company, which the latter promised to do, starting with next month.

Claims and payroll totaling \$89,344.15 were approved.

Also approved was the hiring of Eleanor Hoover for \$500 per month as bookkeeper in the superintendent's office. She was hired to fill what Forbes described as a terrific work load occasioned by both the school construction and the addition of local option taxes and the time required to compute the payroll. She will check and compute claims and payroll.

Eldon Senff was hired at \$4.75 per hour for general maintenance work. He will replace Charles Fellers, who is now building trades teacher. The latter's

hourly rate was set at \$5.25 per hour.

An offer by Standard Oil to continue to supply TVSC fuel needs at 21.6 cents per gallon was accepted. This is a five-cent increase from last year Forbes said, noting the offer includes agreement to furnish 100 per cent of 1972's use, based on quarters.

Also approved was a lease agreement with Cardinal Learning Center for \$6,775 that Forbes said would cost the corporation nothing unless it used the center's facilities. He said TVSC currently has no students enrolled there because no parents de-

be honored at the meeting, including one who will receive a 20-year plaque, four who will get 10 year awards and four more who will be recognized for five years' service.

Funds will be distributed in the following manner: Red Cross \$900; Mental Health \$500; Girl Scouts \$200; USO \$100; Boy Scouts \$600; Salvation Army \$550; Fulton Co. Retarded Children \$500; Heart Detection Center at Woodlawn hospital \$300; Akron Little League \$500; Fulton Co. Crippled Children \$500, and Henry Twp. 4-H Boys and Girls \$200.

Long-time workers will

sire it. He reiterated a previous stand that retarded children are better off in classrooms than in being segregated into special schools. He said some of the children previously sent to Cardinal are now attending TVSC's special education classes at Mentone. The agreement with Cardinal is part of a five-school special education agreement that includes four other area schools.

"We were 60 days late when we started work on the new school and we are still 60 days late," Forbes said in giving a progress report to board members. He said they

Sonoco honors 20th year in Akron

Sonoco Products Company's Akron plant marked 20 years of operation at its local facility recently with 300 employees, wives and guests, many from the local business community, attending the informal open house and birthday celebration.

During the program, employees were commended for achieving over one million man hours without a lost time injury. Robert A. Gregg, So. Bend engineer for American Mutual Liability Insurance Co., presented an engraved plaque for the million man hour record that in turn was presented by Wm. E. Gray, assistant plant manager, to Richard D. Moyer, who accepted the plaque on behalf of the employees. Moyer is a

spiral saw man and a member of the Employee Safety Committee. The safety record was an accomplishment of over three and one half years by the plant's employees, truck drivers, office workers and account representatives.

Highlighting the ceremonies was the attendance of H.M. Byrd, vice president, General Products Division, who came to Akron in 1953 as plant manager, remaining until 1957 when he became manager of the company's Mexico City, Mexico, subsidiary. He returned to Akron in 1962 as Midwest manager, serving that position until he was reassigned to the corporate headquarters in Hartsville, S. C. in 1968.

Mr. Byrd read a mess-

age to employees from C. W. Coker, chairman of the board, which also explained his inability to attend. Byrd presented 20-year service emblems to nine employees who complete 20 years in 1973 and who were hired by him in 1953. They were Lonzo D. Meredith, machinist-maintenance; Earl R. Kuhn, plant engineer; F. Ernest Smith, office manager; Richard E. Meredith, over the road driver; W. Edward Gray, assistant plant manager; Fred M. Keesey, shipping Towmotor operator; F. Dale McFarland, spiral shift supervisor; Verl W. Rager, production timekeeper, and Iva W. Nelson, secretary.

To The Editor

The NEWS welcomes letters for publication but prefers that they be kept under 200 words. The letters need not express the views of this paper; however, they should not be libelous or in poor taste. Anonymous letters will not be published. The name of the writer must appear with his letter.

Dear Editor:

Consider these points from The Keys by S. G. Norris. In these troubled times they offer our only hope:

The Church was first established and the door of salvation opened in the Book of Acts of the Apostles. This fact no one can truthfully deny. The New Testament Church was founded on the day of Pentecost. Acts 2. We follow that original plan of salvation, therefore we are called Pentecostal. Please remember that the New Testament Church was not founded in the four Gospels. Important as they are, yet we must go to the Book of Acts to locate the door into the Kingdom of God. Neither can you fund the beginning of one single church in the Epistles. These are letters written to churches or individuals who had already experienced the Pentecostal "born again" salvation. If this simple truth will be remembered, no one need ever be confused as the correct plan of salvation.

If you are interested in the ministry of Jesus and his wonderful work in laying the foundation for the New Testament Church which was established on the day of Pentecost, then please read the Gospels. Please remember that "the Holy Ghost was not yet given; because that Jesus was not yet glorified." The calling of the Gospel writers is found here, and their individual manner in presenting Christ. Some method or form of baptism is suggested by Matthew, Mark, Luke and John, and all carry the same weight of authority, but none were ever used, because the Church was not established until after Jesus was crucified, rose from the dead, ascended on high and baptized his followers with the Holy Ghost. Acts 2:4. Don't forget that neither the Gospels nor the Epistles opened the door of salvation. If you are hungry for God's way you will find it in the book of Acts.

Matthew, Mark, Luke and John were all present on the day of Pentecost when the Holy Ghost was given. Acts 2. They were all witnesses to Peter's marvelous sermon as he opened the

door of salvation. He alone could do this, as Christ had given him the "keys," Matt. 16:19. None disputed his plan or authority, as their understanding was then opened to the identity of Jesus, i.e., that He was the Mighty God manifest in the flesh. They then realized that He alone was the embodiment of the Holy Spirit which he called his Father. Therefore, there was no argument when Peter demanded that water baptism should be administered in the Name of Jesus Christ. Acts 2:38. Peter also opened the same door of salvation to the Gentiles in Acts 10. The city of Samaria received the plan of salvation by being baptized in the Name of the Lord Jesus, and Paul re-baptized the disciples of John the Baptist in that wonderful Name. Acts 19. If you are hungry for God's plan of salvation you will find it in the Book of Acts.

If you wish to read the instructions given to various churches, such as Corinthians and Ephesians, and also to individuals such as Timothy and Titus, then please turn to the Epistles. These were written after they had entered the door of salvation.

The churches had been founded in the Book of Acts. Opposers of this Pentecostal truth will attempt to lead their followers astray by referring them to the Epistles instead of holding steadfast to Acts, where the door of salvation is found. Clever clergy, knowing the limited Bible knowledge of the average lay member, can easily keep him from the Pentecostal experiences, especially if there is only a lukewarm interest on the part of the enquirer. Such scriptures as "We know we have passed from death unto life because we love the Brethren," "Whosoever believeth that Jesus is the Christ is born of God" are substituted for Acts 2:38.

The gift of tongues mentioned in Paul's Epistle to the Corinthian Church (saints) is one of the nine gifts that a saint (not a sinner) already possessing the Holy Spirit, may or may never receive. No one could possibly receive the gift of tongues or any of the nine gifts who had not previously received the Holy Ghost, speaking in other tongues as the Spirit gave utterance. Acts 2:4.

The conclusion of the matter is this: The Gospels point to the way of salvation and the Epistles confirm it, but the door of salvation is found in the Book of Acts. This "born again" plan of salvation, consisting of water baptism by immersion in the Name of Jesus Christ and the infilling of the Holy Ghost as evidence by the heavenly witness of speaking in other tongues (Acts 2:4, 38) has never been changed since the day of Pentecost. No man dare change it, no, not even an angel from Heaven. The gates of Hell shall not prevail against it. This experience is imperative if you are to be ready for the soon coming of the Lord.

Sincerely,
Arthur Golden

would receive reports twice a month. Board members agreed to swimming pool specifications and set a meeting in October to discuss colors with a member of the architect's firm.

Board members voted to attend a meeting at Plymouth that will deal with teacher contract negotiations.

Forbes reported ten per cent of all building contracts totaling more than \$10,000 was being held in escrow with corporation treasurer Judith Hively acting as treasurer of the escrow account. This money will be invested, he said, with accrued interest being paid the contractor on completion of the job.

Board members also agreed to transfer \$4,000 to an account to start construction of a new house by TVSC building trades students and approved having all state lunch distribution money paid to the Burket school which in turn is to make proper distribution to the other schools. The latter is in line with a policy adopted at the last meeting that named Oliver England, Burket school principal, as hot lunch co-ordinator.

Discussion of a recent board policy requiring teachers to remain in their schools until 4 p.m. each day resulted in no change being made. Dr. John McKee and Maurice Coplen suggested possibly this rule could be waived in the event a teacher were enrolled in graduate school. Philip Lash disagreed, saying teachers were hired to abide by rules and should be expected to do so, just as they would be in another type of business. Dr. Wymond Wilson and Richard Goshert said they felt it would be difficult to hold the line if exceptions were given.

It was noted a teacher has been leaving school at 2:30 each day, and this was described by Forbes as "insubordination and willful disobedience." Also questioned was who was in charge of making certain teachers remained at school until 4 p.m. Most agreed it should be the building principals.

Dr. McKee, who said he had heard a reading comprehension report for the Chicago schools, wondered if a similar report had been made in TVSC, and, if so, how local students ranked. Forbes said he did not have statistics available but he would guess local averages were one grade level above the national norm. He said the TVSC level improves at the same rate as the

national norm and cited innovations being used by local teachers as being a factor that could increase the local level.

McKee also questioned a story in an area newspaper that reported Forbes as having said TVSC students did not require measles shots that are currently being offered Fulton Co. students. Forbes denied having made the statement, saying he was frequently misquoted but in this instance he had not been asked. McKee asked what his reply would be if he were asked, and Forbes said he would have to study and analyze the situation.

Football insurance was also discussed. Forbes said parents of boys participating in the sport had been asked to either purchase special insurance since the regular school insurances does not cover football or to sign a statement saying they had adequate insurance.

DIGITALIS, the plant from which heart medicine by the same name comes, grows in Shewman's garden. In its first year, it should produce a riot of color next summer. Its common name is foxglove. In the inset is a pale yellow selosia, a type of cockscomb, one of nine or ten varieties of the plant he raises. Its flower is like tufted velvet.

Within days, Ralph Shewman should have 3,000 chrysanthemums in bloom, their colors combining with Jack Frost's palette for a delightful melange of hues signifying the arrival of fall. Flower growing is nothing new for Shewman, Akron's Ford dealer.

His home and garden reflect a keen interest in flowers and plants.

Flowers seem to bloom there almost year-round. Spring is heralded by the arrival of his magnificent myacinths and tulips. Summer brings a riot of other color; sometimes from cannas,

THIS TERRARIUM is featured in the Ralph Shewman living room. The plants are potted in soil and are kept healthy with moisture that forms within the jar.

sometimes from any of the host of other flowers he cultivates in his lawn and garden. Of particular note in recent weeks have been his nine or ten varieties of selosia, a type of cockscomb. Some of the flowers are vivid red, others pale yellow; all resemble thick tufted velvet.

Equally at home with bulbs and plants, Shewman likes to try new varieties of flowers. He is proud of a vigorous patch of foxglove in his garden. This plant's formal name is digitalis, and it is from it that the heart medicine by the same name comes. His plants are in their first year and should not bloom until next summer.

The Shewmans' home, too, reflects his interest in plants with a variety of hoyia plants vying for attention with beautifully striped calladiums. Temperature and humidity are carefully controlled to insure proper growth. Of special note is a terrarium, a glass container with glass top, that contains other healthy plants, all growing with moisture generated within the jar.

Why raise so many flowers? "Relaxation," Shewman says, noting he frequently rises at dawn to work in his flower beds before reporting for a day of work at the garage.

Most visitors would

agree his form of relaxation is one that gives much pleasure to others.

RALPH SHEWMAN, Akron Ford dealer, pauses in his garden to pick a bouquet of asters. A grower of plants and flowers for many years, he says his hobby is his form of relaxation.

News Of Interest To Homemakers

BY ANN HANCOCK
Area Extension Agent, Kosciusko County

With the advent of television, we became a nation of "snackers". As we visit or watch television we are apt to nibble on popcorn, potato chips or any one of the various snack foods. Snacks should have a place in the daily intake of the Basic Four food groups. Our snacks should be more of a choice than a chance.

The right kind of snacks can help your health and well-being. The weight watcher needs to choose his snacks even more carefully. Rather than having sweets or carbohydrates for snacks, they should supplement our daily intake of meat, milk, fruits or vegetables.

Since most of us do not get enough fruits and vegetables each day these would be good snacks. Fresh fruits such as an apple, orange, or banana provide needed nutrients and also are easy to snack on. Fresh vegetables can be cleaned and kept in the refrigerator for a quick snack. If you do not like to drink milk, ice cream or cheese would serve as a

worthwhile snack. If your children drink kool-aid, add a vitamin C product to it. This will not change the flavor but will increase the nutrients. "Fruit Fresh" is one synthetic vitamin C product that is sold in most supermarkets.

Carbonated beverages, candy, cakes and pastries all belong to the carbohydrate group. They provide energy but do not supply any vitamins, minerals, or protein. And they are expensive.

Whether you are an

occasional snacker or a frequent nibbler, remember you can make every morsel count toward a balanced diet.

1974 Chevrolet A better-than-ever way.

When the wheel belongs to you, the road goes anywhere you say. And it's so much better with a '74 Chevrolet.

Caprice Classic. Introducing an elegant motor car, just asking to be enjoyed. Outside: an imposing new grille, and on the Coupe, a distinctive new roof line. Inside: peace, quiet and convenience. With standard power steering to do most of the turning, standard power front disc brakes to do most of the stopping, and a standard Turbo Hydra-matic transmission to do the shifting. If you want the luxury and comfort of a car that leaves little else for you to do but enjoy the ride, you don't have to look beyond the '71 Caprice Classic. However, the freedom of the open road begins with the freedom of choice:

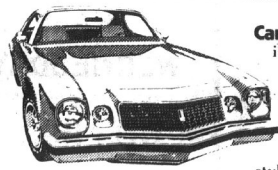

Vega GT. This year's version of last year's Motor Trend Economy Car of the Year. (And Car and Driver Readers' Choice as Best Economy Sedan for the last three years.) With a reshaped nose, bigger bumpers, nicer carpeting, new stripes and new colors. Plus more good things to make it better. See what it's like to drive a winner.

Malibu Classic. A luxury Chevelle, new this year. With full foam seats. A fold-down front armrest. Wood-grained vinyl accents. Elegant inner door panels. Extremely tasteful upholstery and cut-pile nylon carpeting.

That's just inside. The exterior is just as classic, in character and in detail, as the interior. Yet, it remains mid-size. And, it remains all Chevelle. With Chevelle handling and at a Chevelle price. Now that you've looked, come and see the new Malibu Classic—and all the 1974 Chevrolets. The ones shown here, plus Impala, Monte Carlo, Nova, Corvette, pickups, vans and all our new cars and trucks.

Camaro. The way it looks is the way it goes. Quick, sleek and nimble. With a low, wide stance, responsive steering. And comfort that's rare in a car that handles so well. Plus classic new styling, and plushness from the cut-pile carpeting up.

It's very difficult to support the government in the style to which it has become accustomed.

One thing wrong with the younger generation is that many of us don't belong to it anymore.

The tragedy of today is not so much the noisiness of bad people, but the silence of the good people.

SHOPLIFTERS DESERVE MORE RECOGNITION

A LOT MORE!

When shoplifters steal from a store they also steal from you. Eventually, you the honest customer, will have to pay higher prices to make up for what they steal.

Next time you spot a shoplifter in action, notify the store manager. You'll be protecting your own interests.

Most shoplifters are small time operators, but if enough people give them the recognition they deserve, they won't operate at all.

Athens is subject of special newspaper feature

The village of Athens was featured in a recent issue of the Muncie Star by columnist Dick Greene who described a visit there:

"The country of Greece has just the one 'Athens,' but we can do better than that in the U. S. A.

A dozen or more cities, towns, villages, hamlets or stops along a railroad have the name and some count of population in thousands...like Athens,

Ca., 45,300...Ohio, 24,000...Alabama, 14,360...Texas, 9,582...and so on until as few as 84.

Right here in Indiana we have a community of the name...in Fulton county, about five miles east of Rochester (and about five miles west of Akron). The 1973 issue of Rand McNally atlas gives the figure as 100.

Being in that part of Indiana in recent days, my wife and I stopped

for a look around, our interest whetted by the fact that we had been in the ancient and populous city in Greece a few weeks before.

We learned that a gentleman across the street from the post-office, Russell Shipley, had lived there quite a while and knew much about the village. At the Shipley home we were received so cordially that in the matter of minutes we felt as if

we had known these folks for a dozen years instead of being drop-in acquaintances.

Neither Mr. Shipley nor his wife, Verna, residents of Athens since 1919, knew why the community had been so named. They rustled up a copy of a booklet, 'Athens, West Henry Township History,' written by Helen Bryant Nichols

Frank Manwaring reported Jackie Gobble had consented to be buyer for the fair next year and suggested two additional persons be named to assist her.

Directors noted payment of 20 percent of the fair stand note each

year for five years will retire the debt.

Nominated for directors were Bill Westerman, Joe Boggs, Richard Dickerhoff, Roger Goodman, Raymond Lewis and John Bowerman. Three of these men will be elected at a later date.

Attending the director's meeting were Jerry Secrist, Kenneth Romine, Frank Manwaring, Tom Fugate, Dave Cooper and Bob Hill.

On Dean's List

Students named to the Dean's List for the summer quarter at Tri-State College, having achieved a B average or better, include Robert E. Bryant, son of Mr. and Mrs. David L. Bryant, R. 2, Akron. A graduate of Akron High School, he is majoring in mechanical engineering.

FOOTBALL has come to Tippecanoe Valley and with it has come a lot of enthusiasm, both from spectators and players. Shown in their first encounter of the season, eighth grade teams from Akron and Talma square off at each other. The Mentone and Akron freshman teams have also met each other, each grade playing once at Akron and once at Mentone. From these youthful players, a team will be formed when the new Tippecanoe Valley High School, now under construction, is completed.

Marilyn (Mrs. Harley) Sellers, So. Bend, a worker in the Lung Association School Education program and the Interagency Council on smoking and health, has been appointed Director of Public Information for the American Lung Association of North Central Indiana. She will coordinate the Lung Association's public relations and public health education programs via newspapers, radio and television in Elkhart, Kosciusko, St. Joseph and Marshall counties and will coordinate a speakers bureau offering programs to clubs and organizations. Persons interested in the program, "Emphysema--The Facts," may schedule it through the Lung Association, 319 So. Main St. So. Bend.

Jack Summe of Warsaw has been appointed director of Indiana's school traffic safety department, replacing Francis Kaufman, who resigned. Summe is a former Silver Lake resident.

Charles Zunkel, pastor of the Church of the Brethren, Akron, will participate in the annual church leaders' conference at Manchester College October 8-9-10, joining religious leaders from Indiana, Ohio and Illinois and from the college faculty and staff.

Starting Monday, Kosciusko County residents will have to make appointments to dump any trash in the three landfills. The decision was prompted after landfill operators Harvey Anglin, Bus Likens and Stanley Scott requested persons with loads of bulky refuse call them prior to bring objects to the sites so that they might prepare to adequately bury the objects in accord with state health laws. This applies to loads of logs, tires, large appliances and stoves and other bulky objects.

Jeff Shoemaker, Mentone, a freshman at Ball State University, finished 11th Saturday at Bowling Green, Ohio, in a three-way meet, his team defeating hosts Bowling Green 21-38, but losing to Eastern Michigan 23-32. Coach Jerry Rushton said Jeff ran a real steady race. The

GRASSROOTS OPINION

BARNESVILLE, MINN., RECORD-REVIEW: "We have been told that the government is going to put a lot of money into a new rocket and...rumor has it that it will be named the 'Civil Servant'...you can't fire it...it won't work...and it'll cost the taxpayers a fortune."

RED BLUFF, CALIF., NEWS: "Politicians, editorial writers and others unblushingly refer to our country as 'this great nation.' No doubt it is a great nation, and we have every reason to be proud of it. But couldn't we be just quietly proud, as we are of our own personal achievements, without bragging about it so much? And work just a little harder to make the description true, even if we don't shout it so loud and so often?"

MOVILLE, IOWA, RECORD: "It isn't the people who want something for nothing causing all the trouble...it's the ones that have succeeded in getting it."

ELLIS, KANS., REVIEW: "Newspapers have three major responsibilities

to their readers. They should exist to inform, to interest and to involve as honestly as possible...the letters to the editor prove one thing, at least and that is that people are reading this newspaper. It also proves that the paper is involving people and that is one of the criteria by which newspapers are judged. Each reader has a right to his own opinion. Each person who takes the time to write a letter or verbalize an opinion either in contradiction or in agreement is adding to the success of the newspaper, which after all is tied up in whether or not it is read."

Capitol Commentary

Governor Otis R. Bowen

The term "ratable reduction" is much in the news but few people really have a firm grasp of its meaning.

Ratable reduction is a plan conceived by the State Welfare Department to increase the benefits to hardship cases by redistributing our welfare dollars within the aid to dependent children category.

Indiana is in a curious position in regard to welfare. In only one other state — Alaska — is it easier to qualify for welfare. But while we qualify large numbers of people for welfare benefits, our payments are small.

The situation has become more complicated because of the federal government's welfare rules which don't let us count a certain percentage of a working welfare recipient's income and also grants unlimited exemptions for work-related expenses. Statistics show that a family of four can get ADC payments, plus medicaid, and still earn as much as \$700-\$800 a month besides.

Ratable reduction would change the formula by which we determine who qualifies for welfare. It would remove from the welfare rolls a small percentage of recipients who have other sources of earned income. It would reduce payments to certain other recipients.

The money saved through that program would be applied to those on welfare who are most in need

and who receive the smallest checks.

The State Welfare Board has recommended a ratable reduction of 25 per cent. Some opponents of the plan are twisting the argument by saying that the board wants to reduce welfare payments by 25 per cent. That isn't true. It would reduce the standard of need formula by 25 per cent — which in the case of many recipients would involve only a fractional drop in payments.

The proposed rule has generated a great deal of controversy and I recently said that I will postpone signing the regulation until a special committee completes a detailed study of the plan's impact. While I believe the concept of ratable reduction may be sound, I'm concerned that we aren't fully sure what effect this proposal would have on those welfare recipients who have no earned incomes at all. If the calculations should turn out to be wrong, the result could be very harmful to some needy people.

Some people suggest that we should not try to bring about welfare savings through this plan and, instead, budget more dollars for welfare to solve the problem.

My personal view — and I think it's shared by a majority of Hoosiers — is that we must bring welfare expenses under control. I don't think additional millions of dollars is the answer.

How To Be A Leader

A charming housewife in Alton, Illinois, has managed to become a national figure, in addition to being a devoted housewife and mother of six. She recently ran for the U.S. Congress. She served as First Vice-president of the National Republican Women. She wrote several best-selling books on politics and national defense. How has she managed to do so much?

She has spelled out the 10 steps to leadership. We would do well to put them into practice:

L for Loyalty. A leader must be loyal to God and Country. A leader must also be loyal to his followers, inspire them and show gratitude.

E for Enthusiasm. A leader's enthusiasm must be contagious; it must make people want to work with the leader.

A for Accepting Responsibility. The leader must accept the responsibility for seeing a project through from beginning to end.

D for Detail. Careful attention to every detail is the mark of any successful leader.

E for Efficient use of time. Build an orderly life; make an agenda for the day and see that it is completed; carry reading material at all times, e.g., on trips to the dentist, to read in cabs or on airplanes.

R for Resolute. Have a fixed and firm purpose in all that you do. Be prepared to suffer for your convictions. Don't run away from the battle.

S for Sense of humor. Learn to disagree without being disagreeable. Accept the fact that no two people are going to agree on every subject.

H for Hard work. Remember St. Thomas Aquinas' statement: "To live well is to work well." Many opportunities are disguised as hard work.

I for Itemizing what needs to be done, and delegating it. A leader makes lists of jobs that need to be done, then finds the right people to do them. Don't put round pegs in square holes. Assign jobs that your followers will enjoy doing. Remember the three magic words: please, sorry, and thanks. Use them often.

P for Perseverance. A leader gears himself for a long haul. Life is not like a movie where the curtain goes down on a happy (or sad) ending every day. Set long-range and short-range goals.

W. W. Stauffer, residing west of town, completed the distilling of his peppermint crop and marketed the oil last Friday. This year Mr. Stauffer raised mint on close to twenty acres of ground and the crop averaged thirty pounds to the acre. Oil from this year's crop sold for \$3.10 per pound and was a good quality.

Mr. E. L. Scott closed up a contract Tuesday morning with L. R. Dukes for a lot on Gilead avenue, opposite the Case furniture store. Mr. Scott will proceed at once to erect a commodious building that he is pleased to call "a home for the Ford automobiles." The building will be quite nearly fire proof built of cement blocks or brick and will make a valuable convenience to his Ford customers and improve that part of town. And above all, Ford drivers will find a loyal up-to-date home for their machines and where everything will be done to further the good name of that car.

Jacob Weller, who owns and lives on the old Nathaniel Perry place on Rock Lake, was in this office with some fine peaches the other day and he left us a luscious sample of some that brought him two dollars per bushel in the Akron market. They are beauties specially assorted. Glen Buck came down from No. Dakota, to enter high school here last week. He is paying part of his expenses by working morning and evening at the Corner Grocery.

We are extremely thankful that our annual income is below \$500,000 as in that case the income tax would be 7 percent. That mark will not touch man in this whole county is our guess. And we are extremely thankful that our annual income is below the lowest notch \$4,000 when a tax attaches. We won't have that tax to pay. But there are others.

FROGS come in all shapes and styles and colors. On the top shelf are a fish, pair of clowns and a turtle in addition to more traditional shapes and a few frog figurines. Second shelf has birds, fish and star fish and one frog. The third shelf contains a mixture that includes frog, swan and a beautiful owl that fits on an amber bowl. Frogs on bottom shelf are in a variety of glass. On either side is a wise looking frog figurine.

Bonnie Whittenberger collects

By Ann Sheetz

Bonnie Whittenberger likes frogs so well she collects them. They cover transoms, shelves and window sills of her home, not offering much trouble, because they are not real live frogs but flower frogs.

Flower frogs may sometimes look like real live frogs, complete with holes for flowers, but they hardly ever look like the stereotyped notion of flower frogs as simple glass objects with holes meant to be anchored in the bottom of vases to support favorite blossoms, although they do look like this, too. Confusing? Not so when you see Mrs. Whittenberger's large collection.

Although she has lost count of her frogs, she knows there are more than 100, and they are in every size and shape. Collecting only five or six years, she says the price of frogs has skyrocketed in that time. The most expensive frog she ever saw was priced

at \$600. Soapstone or Roseville or Weller frogs now command \$18 to \$25.

Although Mrs. Whittenberger, who collects frogs simply because she likes them and is fascinated by them, does not own any \$600 ones, she has collected some interesting pieces, including some in the shape of nude dancers, birds, frogs, fish and many others. The material varies from art glass to pottery and brass. Several of her frogs are identical in design but range from yaseline, black amethyst or satin, carnival, cobalt or green glasses.

The dancing nudes, shown in the adjoining pictures, are in white porcelain and were made in Germany. Although they resemble figurines, each is actually a frog, holes around the bases proving their purpose.

Mrs. Whittenberger is not certain how long flower frogs have been

DANCING NUDES are not figurines but are really frogs, all from Germany.

They're Spotting Flies From The Skies

Spotting a tiny fly from an altitude of 10,000 feet may sound even more absurd than looking for the proverbial needle in a haystack.

But that's what entomologists are doing successfully in Texas, and their high-altitude sleuthing could insure an abundance of citrus fruits on consumer tables.

The insect the entomolo-

gists are looking for is the citrus blackfly. It's an oriental pest that has taken up permanent residence in Mexico and is now attempting to invade the lush citrus groves in this country.

While the insect—which is only 1/12th of an inch long—can't actually be seen from the air, his whereabouts can be accurately determined

from color-infrared photographs taken from the air.

Citrus infested by the blackflies develop a sooty black fungus mold as the result of a honeydew secreted by the insects as they feed. The mold shows up with a distinctive color in the aerial photos.

This new method of detection is faster and less expensive than ground surveys. Its ability to pinpoint small infestations in large groves allows growers to spray only affected areas rather than blanketing the whole grove. Besides cutting down spray costs, this reduces the amount of pesticides in the environment and causes less disruption of beneficial insect populations.

Entomologists in Texas, Florida, and California are always on the alert for citrus blackfly invasions because of the severe damage they inflict. Short-term infestations can cut crop production in half, and those lasting more than a year can completely wipe out a crop.

The current infestation has been declared a major emergency by the U.S. Department of Agriculture. If it should spread, the nation's citrus production would decline in both quantity and quality and send consumer prices sky-rocketing.

Observers are hopeful that the new weapon provided them by high-altitude photography will help check the insects' spread.

Meanwhile, this same technique is being applied to other areas of agriculture as well. The National Cotton Council reports it's being used to spot insect and fungus damage in Western cotton fields. It's also proving effective in determining areas in the fields that are deficient in minerals.

In Maine, aerial photography is being tested for a two-fold purpose. One is to give potato growers early warning of crop blight, and the other is to safeguard honeybees.

Since the photography allows precise spraying on pinpointed targets, it's hoped that blanket spraying which endangers honeybees can be eliminated.

Why the concern for honeybees? Crops worth about \$1 billion still depend on bees for pollination.

The scope of color infrared photography is expected to be greatly widened in the future as the result of earth-orbiting satellites. New knowledge about crops and forests already is being transmitted back to earth from the satellite launched by NASA last July. And scientists are busily translating data from 550 miles up for down-to-earth applications.

We have two ears and one tongue—which means we should listen more and talk less.

It is estimated our population increases by one every 10.5 seconds. We can't control the population explosion, but at least we have timed it.

Deaf Man Designs Tiny Hearing Aid

OFFERS FREE MODEL

A remarkable tiny hearing aid has been perfected by a man who has been hard of hearing for nearly ten years.

This small device has no dangling cords or separate transmitting units and is worn completely in your ear.

It was developed especially for those persons who can hear but can't understand. This new hearing instrument provides "ear-level" hearing with the wearer picking up speech, sounds, television, and radio at his ear. Due to the use of transistors, the user cost is extremely low.

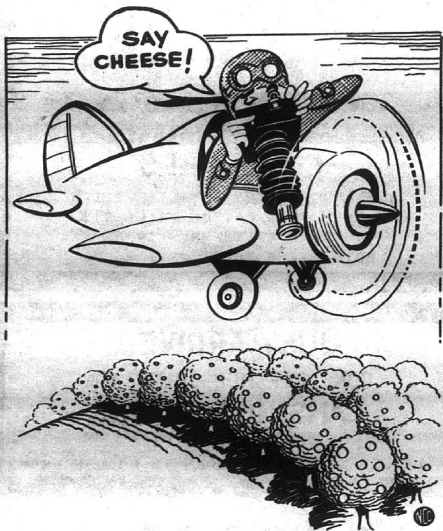

A true life actual size replica of one of the smallest all-in-the-ear hearing aid ever made will be given absolutely free to anyone sending in this advertisement while supply lasts. So we suggest you write for yours now. No obligation whatsoever. Write to A. J. Wilder, 809 Steuben St., Wausau, Wis. 54401.

Can anyone do what you do any better?

You're pretty darn good at your job. But today, we all have to consider how we can do our work a little better. That's how each of us can help keep our jobs here in America. For now and for the future.

America. It only works as well as we do.

This Mack Truck is half a century old, yet it runs like a top. It is one of the animated exhibits that boys and fathers, uncles and grandfathers love to see at the Circus World Museum in Baraboo, Wisconsin.

Built in the early 1920's, this chain-drive bulldog model Mack Truck is the kind used by all the big circuses for two or three decades. It brings back fond memories of watching the circus unload in the early dawn hours.

In Defense of the Farmer

Once again the American farmer is being made the villain in a period of rising costs. It's easy to blame the farmer for higher food prices and overlook the complexity of factors that have combined to boost the grocery bill.

One group which defends the farmer is the organization of local, independent community banks throughout the nation, the Independent Bankers Association of America (of which we are a member). We know the farmer's prob-

lems. We know his income still seriously lags behind national growth. We know he is being made a whipping boy. Because we know this, we say so: Here, at home, where we share his problems, and through the IBAA, in Washington.

For generations the American independent bank and the farmer have worked together for a common prosperity, a common effort to serve the nation. Let's keep it that way... after all, the farmer is an important part of us.

Anthony Nigo Chapter, DAR Opens Fall Season

The first meeting of Anthony Nigo Chapter DAR for the fall season was at the home of Mrs. Glenn Clauss, near Bremen.

Mrs. James Bitting, regent, opened the meeting in the usual manner. Eighteen members answered roll call.

Mrs. Thomas Fugate read the message from

the President General relative to the education of American Youth in which she stated, "Never in the history of the country has education been of such prime importance. The rugged frontier of the land is gone; but left is the wider and more challenging frontier of the mind. Only by honing intelligence to its finest sharpness will today's youth be able to find solutions to tomorrow's problems, and thereby maintain life and heritage as we know it...the National Society has never neglected to concept that boys, and girls, may be growing up with no adequate idea of what it means to be an American youth, claiming a heritage of American principles. Our committees leave no stone unturned to help the youth of our country develop as much potential as possible--for their own sake and for the sake of America."

Mrs. Charles Tucker, national defense chairman, read two articles, one on gold coins, saying coin collectors not only have collections of historical value but a profitable hobby offering far greater financial return than most conventional investments.

Mrs. Ernest Igo presented a program titled "Constitution and Constitutional Freedoms." The meeting closed with members repeating the American's Creed.

Assisted by Mrs. Carl Metheny, the hostess served refreshments.

POUND CAKE ANSWERS ALL

Think of a dessert that goes well after any meal, that club members will enjoy at a meeting this fall, that's equally as good with morning coffee or a bedtime snack. The answer is Old-Fashioned Pound Cake.

When great-great-grandmother made her old-time version, her recipe might have called for a pound of butter, a pound of flour, a pound of sugar, and a pound of eggs. The name "pound" still stands today, but for convenience the measurements have been exacted and are given in cups.

For a flavorful beginning to any number of dessert combinations, top your cake with ice cream or fresh berries, add a sauce, or serve a creamy pudding in a chilled dish.

Customarily, pound cake is not iced, but many modern-day cooks drizzle the cooled cake with a glaze.

News Of Interest To Homemakers

BY ANN HANCOCK

Area Extension Agent, Kosciusko County

As anyone who has sampled its aroma knows--and that means most of us--there are few things more delightful than the smell of freshly baked homemade bread. Its rich smell fills the house and adds another dimension to holiday cookery. Homemade breads also make nice Christmas gifts especially when you include the recipe.

For successful yeast breads, good quality ingredients are a must. The yeast plays an important part in the quality of the finished product. Two types of yeast are available. Cake yeast is perishable and must be kept under refrigeration. It should be used within one week for best results. Packaged dry yeast will keep for several weeks on the shelf or indefinitely under refrigeration. It can be bought by the pound at health food stores at a considerable savings or ask your grocer for larger quantities. One tablespoon of dry yeast equals one cake of compressed yeast or 1 package of dry yeast. When you wish to use dry yeast in a recipe calling for compressed yeast, remove one-fourth cup of liquid from the ingredients to dissolve the dry yeast in.

Milk, water, or potato water may be used in making bread. Each one gives a different result. Water provides a crisper crust and more of a down to earth flavor. Bread made with milk is more nutritious, has a browner crust and will keep longer. Potato water produces a coarser bread and a slightly larger loaf.

Working with yeast breads offers an excellent way to show your creativity and ability in the kitchen. Many homemakers say that frustrations can be worked out during the kneading process! Surprise your family with fresh baked bread tonight. You'll enjoy

Miss U.S. Teen Competitors Are Needed

Area girls between the ages of 13 and 19 are being invited to enter the annual Indiana state Miss U.S. Teen pageant to be staged Friday-Sunday, Nov. 9-10-11, in the Civic Auditorium in Muncie. Director will be Nellie Thompson of Springfield, reigning Miss U.S. Teen, who won her title at the fourth annual national finals in Lake Charles, La., last July.

Brochures and official entry forms will be available to all girls who write to Miss U.S. Teen, Box 1304, Muncie, 47302.

There will be no talent or swimsuit competition involved, and girls will be judged in three separate age divisions with the winners and runnersup to become finalists for the 1974 state title. The winner and runnerup at the Muncie pageant will become eligible to represent Indiana at the fifth annual national finals in Lake Charles, La., in late July, 1974.

Judging will be on the basis of scholastic achievement, service to church, school and community; personality, poise, grooming and similar factors. While good looks are an asset, the Miss U.S. Teen pageants are more than mere beauty contests, according to Miss Thompsons.

Contestants will be housed in a leading Muncie motor hotel.

Miss U.S. Teen was originated four years ago in Lake Charles, La., where national finals are staged each year. Past titleholders have hailed from Mississippi, Arkansas and Indiana. The Muncie event will be the first such pageant ever staged in Indiana. In the past, girls have gone to "national" on an at-large basis, three having qualified from Indiana last year.

THE GRASSROOTS OPINION

NEW LONDON, IOWA, JOURNAL: "About the high cost of living--cigarettes sell for about \$2.89 a pound and I don't recall anyone complaining about them being high--yet to pay \$1.89 a pound for beef steak drives some shoppers right up the wall. It's a funny thing, but I know people who'll pay 90 cents or \$1.25 for a drink and never say a word about the 'high cost of drinking' but to pay over \$1.00 a pound for hamburger..is a different story!"

Athens

Cont. from page 1

for the Fulton County Historical Society.

From that we learned that Henry Hoover, who had come from Ohio, purchased on Dec. 1, 1836, 105 acres of land that would include the present community of Athens. The settlement of dwellings, general store, post office and a church was named "Hoover's Station." So it continued until it was voted in 1897 to change the name of "Athens," but why is not shown in the records. The community in early days was near the line separating the land of the Miami Indians from the Potawatomi.

Today, Indiana's Athens is largely a residential community, with postoffice, an Oliver farm implement store, fertilizer factory, a garage and United Methodist Church. In bygone years when transportation and communication were not what they are now there was much more. Floyd Deardorff, 84, probably is the longest-time resident.

Postmaster is Mrs. Rita Utter. Mr. Shipley assists in the office and at one time was the postmaster, an office he held as well as teaching school and working in the general store he and Mrs. Shipley conducted 39 years.

We were even more interested in the Shipleys than in Athens and during our visit learned he is a native of Disko,

a hamlet somewhat to the east, and she is a native of Roann, Wabash Co.

They were married Nov. 27, 1915.

"We went to St. Joe, Mich., for the ceremony," she related.

With that they both smiled.

"Were you eloping?" I asked.

"Oh! no," Mr. Shipley answered. "I was 21 and she was 20. It seems it was the fashion then for lots of people to go to Michigan for their wedding...ours was performed by a minister, too."

They went to house-keeping in Disko--curious name, that--and for 34½ years Mr. Shipley taught school--30½ years in Henry township and four years in Macy. All was in the elementary grades. Two sons were born to them: Billy, now a teacher in Kokomo, and Dale, a Civil Service employe at Ft. Harrison.

Mrs. Shipley tended the store with the assistance of her teacher-husband and their sons.

"It was a great deal of work running a general store," she assured us.

For 30 years she also taught Sunday School in the Methodist Church. Both keep their membership in the church, which is almost at their back door. Currently, Mr. Shipley is president of the board of trustees.

"This house," commented Mr. Shipley, "is probably the oldest in Athens." Whatever its age, the

dwelling is in good condition and as we visited with these folks we thoroughly enjoyed the central air conditioning on a hot humid day. At 79, Mr. Shipley is a tall, spare man and a good health; Mrs. Shipley at 77--"I'll soon be 78"--is a small woman, of somewhat heavier build than her husband, and has a hearty laugh that is good to hear.

From the kitchen we could catch the odor of beets being cooked, products of the vegetable and flower garden at the rear of the house."
