A Newspaper For All The People

Vol. 2, No. 6

MENTONE, INDIANA, AUGUST 6, 1930

\$1.50 Per Year

Entered as second-class matter July 3, 1929, at the post office at Mentone, Indiana, under the Act of March 3, 1879

A Hurry Call

The Law of Supply and Demand

Requires no officers to see that it is enforced, and Congress backed by the resources of the United States cannot repeal, or even retard its enforcement. The \$60,000,000.00 already spent by the farm Board in its attempt to nullify this law has been money thrown away which will eventually find its way into the pocket of the speculator---not a cent of it will ever reach the producer. If the Government really wants to assist the farmer let it arrange to take care of the tax load--the farmer will take care of the balance.

Is It Right To live in a community and depend upon the patronage of its business men and citizens for you living—then trade out of town? **Think it Over.**

JUST THINKIN'

by Charles S. Kinnison.

The Winding Road

Here today and gone tomorrow—
Life is such a transient thing,
With its days of joy and sorrow,
Things that thrill and things that sting!
Changes, changes, never ending,
Days of turmoil, days of rest—
Yet, the never-ending blending
Gives to life its charm and zest!

Life's a road that's twisting, winding,
Over which, with loads, we tread.
Every turn of it is blinding,
Hiding that which lies ahead.
Every day we rise, or stumble—
Up and up we aim to climb,
Strong and valiant, weak and humble,
Reaching up to heights sublime!

Pawns of Fate? Ah, no—we're masters
Of our destiny, I know!
Let us, then, be fighters, lasters—
Let us onward, upward go!
May we prize each day, and give it
Something helpful, something fine—
Let us use our life, and live it
With the best that's yours and mine!

(©, 1930, Western Newspaper Union.)

THE MENTZER COMPANY WINS \$10.00 PRIZE.

Each month the advertising department of the I. G. A. stores organization award a cash prize of \$10.00 to the member store submitting the best trade booster in the advertising line used and submitted that department during the preceding month.

The latter part of last week the Mentzer Co., received a letter informing them that they had been awarded the prize and enclosed a check for \$10.00. The trade booster that was entered in the contest was the hand bill "California Fruits," which was distributed recently in this locality. The author of this bill

was Mahlon Mentzer and the printer was the Country Print Shop. That it was a good bill is shown by the fact that this bit of advertising sold about four times as much canned goods for fall delivery as the Mentzer Co., had anticipated.

Moral:—Have something that the people want, place a reasonable price upon it, then advertise the fact and results are sure to follow.

A VISIT TO CLARK'S STORE WILL SURPRISE YOU.

The last finishing touches have been done in the re-modeling of the Clark store. That they have made a great improvement does not express it strong enough, and when in town you should not fail to make this store a visit.

All goods in every department can be examined at your pleasure and in most cases the articles are marked in plain figures; and as it is now arranged they can handle a great many more customers with no added help, as it is possible for the patrons to serve themselves if they so choose.

WORLD CAN DO WITHOUT WAR

By REV. DR. MINOT SIMONS, New York (Unitarian).

If new wars come a grateful people will honor their saviors, but new wars need not come. War is not necessary to human nature. All the primitive human passions that expressed themselves in blood vengeance and blood feuds, in dueling and in slavery still remain, but these institutions are gone. The human impulses which have led to war are likewise permanent, but they can express themselves in better ways. War can be discarded as a method and human nature can go right along as before.

This message of the social psychologist ought to be proclaimed from the housetops in order that all fatalism about war may be banished from the earth.

LAWYERS MUST "CLEAN HOUSE"

By CHIEF JUSTICE CHARLES EVANS HUGHES

Attempts by lawyers to thwart the administration of justice by delays, sharp practice and chicanery should be unsparingly condemned. They have no place in a profession where skill and honor should go hand in hand.

Even when purged, as it should be, of its delinquents, the bar is only at the threshold of its opportunity to devote its technical knowledge to the effort to adjust the mechanism of justice to the demands of a complex society to which old methods in many respects are unsuited.

While improvement in this direction is necessarily slow, bar associations may immediately perform a great service in strongly insisting on the selection of capable prosecutors, magistrates and judges.

HIGHER QUALITY IN LAMBS NEEDED

Campaign Being Launched in Ohio for Improvement.

With prospects of lower prices for fat lambs this summer, quality in the lambs marketed will become increasingly important, says L. A. Kauffman, extension specialist in sheep husbandry for the Ohio State university. "Many lambs are now being contracted for on a basis of 8 or 9 cents a pound for fall delivery," says Kauffman. "The best lambs will be none too high from the producer's standpoint."

In the effort to improve the quality of the lamb crop, by reducing the number of bucky and undocked lambs marketed for from \$1 to \$3 below the top of the market, a statewide native lamb improvement campaign is being launched in Ohio, backed by the Institute of American Meat Packers, the National Live Stock and Meat board, the agricultural departments of the railroads, the United States Department of Agriculture and the National Live Stock Producers' association.

Prizes are offered by these agencies for the counties which show the greatest improvement in the quality of their lambs. The extension agricultural agents in each of the 88 counties of the state are being asked by Kauffman to enroll their counties in the lamb improvement project.

Importance of the sheep industry in Ohio is indicated by the fact which Kauffman cites, that this state has more sheep than any other state east of the Mississippi river.

Get Spring Lambs to Market Early in Year

The secret of lamb profits (and it really isn't a secret) is this: Get spring lambs to market early in summer. This requires docking and castrating, liberal feeding, control of parasites.

Liberal feeding helps the lambs to withstand stomach-worm infestation. It cannot be relied on as a preventive, however. The same observation is true in connection with roundworms of swine. Liberal feeding should be the rule always, and if the animals don't put on weight as a result, it's time to suspect worms and to get rid of them.

Lambs are inclined to be independent about eating grain when they have milk from the ewes. For that reason, the feed placed in the creep must be a palatable, complete ration. Grain alone won't coax all the lambs into the creep.

Some of the western sheepmen use a canvas strip instead of a trough for

feeding sheep. The strip of canvas is about fifty feet long and has eyelets and rope at the end so it can be staked down. There is an iron rib every few feet to keep the canvas spread full width. The canvas can be taken up and shaken when dirty.

Let Pigs Harvest Corn and Different Pastures

"Pigs will be pigs and might as well be hogs; so turn them loose in the pasture," says R. B. Hinman of the New York State College of Agriculture. An acre of pasture may be worth 50 bushels of corn—to a pig. Another good thing about turning pigs into pasture is that they do the harvesting themselves.

Rape is the best annual crop for pigs, and on good ground will suffice for more than twenty to the acre. On alfalfa and clover pastures, which fit well into crop rotations and tend to improve the soil, about seventeen pigs can be fed. In early spring and late fall sows with suckling pigs can pasture on blue grass.

A combination of clover and timothy also serves as a good pasture for pigs and if farmers use a mixture of clover and timothy in their annual crop rotations, hogs may be pastured on this crop without the necessity of planting special pastures.

Corn Gluten Feed Good as Protein Supplement

Corn gluten feed is a good protein supplement for fattening steers. If it is mixed with some other protein feed such as linseed or cottonseed meal. It is not advisable to use corn gluten feed alone to supplement corn grain. Mix the corn gluten feed in equal parts with linseed or cottonseed meal or both and you will have a good supplement whether you are feeding shell corn or ground barley. Yearling steers need about two pounds of this supplement per head daily when on full feed.

Feed Grain in Creeps

Early spring lambs to be fattened for market should be given grain when three or four weeks old. A creep should be built where the lambs may go to get their grain at any time. If the ewes are giving plenty of milk, the lambs will not eat much grain at first, but as they become larger they will eat enough grain to make considerable difference in their gains and finish. By following the plan of creep feeding, lambs may be marketed earlier at a higher price.

Hours for Sleep

The time of day appears to have little importance in influencing sleep, except that persons trying to sleep in the day are more frequently upset by noise and light. Professors of psychology who have conducted tests pertaining to sleep have found that persons sleep more soundly when they first go to sleep than they do in the latter part of sleep.

HOW TO LIVE LONGER

By John Clarence Funk, A.M., Sc.D.

Director of Public Health Education,
State of Pennsylvania

Vacationing for Health

THE amount of interest that in recent years has been developed in parents for their children's physical welfare speaks admirably for official and unofficial medicine. The time has long since passed when the young people are largely left in the hands of chance regarding this all important phase of life.

Directed play, dental hygiene, pure milk, toxin antitoxin and physical examinations have been so emphasized that these matters are now mostly routine.

And to his worthy solicitation is annually added the benefits of a safe and healthful vacation. Consequently, each season millions of youngsters are to be found in organized camps where the outdoors, plus intelligently supervised work and play, are most advantageously utilized.

Strange as it may seem many parents consider the vacation problem completely solved when they have seen their children safely in camp. What they forget is that they themselves need a healthy change quite as much, and in many cases more so, than do the children.

Contrary to a popular notion one is not required to go deep into the woods and live a monk-like life to derive health from a two weeks sojourn. But on the other hand, one emphatically does need to limit excitement chasing and fatiguing practices, if the body is to store up energy and health for the winter's work.

This great world with its fresh air and sunshine and mountains and seas can do as good a health building job for you as it can for the children, if you will permit it to do so.

Therefore, have all the fun you want. Mix a bit of excitement with it if you are inclined that way, but give health more than a sporting chance on that next vacation of yours.

(© 1929, Western Newspaper Union.)

ALL WORK GUARANTEED

I do all kinds of well drilling and repairing and guarantee that you will be pleased with my service. Homer Saner, Phone 8 on 198, Akron. Sep. 10.

THEY SHOULD NO BETTER.

We note that there are a number of our village boys who make a practice of using Main St., on Thursday and Saturday evenings for a parade ground for bicycle riding. At these periods the street is congested with motor cars and there is great danger that someone will

get injured, and the injured one is very liable to be the bicycle rider, and while there is no law that we know of to compel bicycle riders to keep off the street a little intelligent reasoning should convince them that they are out of their place and in case of injury they could blame no one but themselves.

CALLS ON OLD TIME FRIENDS.

J. W. Nichols of Claypool visited with L. L. Latimer at this place Thursday of last week. Mr. Nichols will be remembered as a clerk for Mr. Latimer when interested in the hardware store in this place some years ago. While in town Mr. Nichols ordered the Farm News sent to his address for the next year.

LOST SUIT CASE.

On Sunday July 27th, a suit case containing all of the earthly possessions of an eleven year old boy was lost from the running board of an automobile somewhere between Warsaw and Mentone. This boy can ill afford to lose the clothing contained in the case, and the finder of same is asked to report same to Miss Mildred Clark, 2624 College Ave., Indianapolis, Indiana.

LIFE INSURANCE FOR PEOPLE PAST SIXTY YEARS.

We take applications for life insurance on men and women up to 70 years, providing that the applicant is in good health. The cost is approximately one dollar a month for a policy paying from \$500.00 to \$1000.00 according to your age when application is made. If you are too old to get insurance in another company and desire more insurance here is your chance. No medical examination required, but you must be in good health and not crippled.

For full particulars inquire at Farm News Office.

Civil War Necessity

Shinplasters, or fractional currency, were issued during the Civil war because of the disappearance of coin from circulation and the shortage of small coin. The first issue of fractional money was made on August 1, 1862. The last and fifth issue was made from February 26, 1874, to February 15, 1876.

Bearded Indians

Most Indians would have a slight to moderate growth of beard and mustache if they allowed the hair to grow. Beards are not wholly unknown among them. Some of the Mexican Indians have full beards. The Guarayas of Bolivia wear long straight beards and Cashibas of the upper Ucayli are bearded.

Says WILL ROGERS

BEVERLY HILLS.—Well all I know is just what I read in the papers, and what I hear over the Radio during the various tooth paste hours. I tell you it's a lucky thing for us that people's teeth are in such bad shape or we never would get any amusement at all. In the old days when we did nothing with our teeth till we died off, why we had no amusement at all. We couldn't turn a dial and get our favorites Amos and Andy. Tooth paste has been responsible for more good laughs than Barnums Circus has, and you can use the wrong kind too. According to the announcers, there is various kinds that cause decay, while their kind brings on added growth, so you got to be mighty careful.

Course the best thing in the world in the old days was to chew on a tough piece of steak, or kinder gnaw on and around a bone. But nowadays on account of having to buy so much tooth paste why it dont leave enough to get the steak to whiten and toughen the teeth. A good old rump steak would give your teeth more exercise and build up a foundation than a steel tooth brush would.

But these lettuce sandwiches just dont offer much resistance to the old Molars and they dont get much exercise on them. Malted Milk over a soda fountain just might as well be inhaled as far as the teeth is concerned. This Caviar assisted by Cocktails is another National dish that dont offer much physical resistance to the eye teeth. In fact as far as the old Tusks are concerned there is really no reason for owning them.

An old toothless man or woman is not in-convenienced in the least with our modern type of food. There is nothing that comes in cans that we cant bulldog with ease and comfort. Our more rough type of food nowadays is a ham sandwich, and the Boys that slice it fix it so that the teeth have no function to perform in its digestion.

Most of our up to date food is by absorbtion. It melts in your mouth, so when the old Tooth brush gets a crack at the teeth its about the only thing they have encountered since babyhood. You have to brush em for they have had nothing rub up against em lately.

A Wolf has the best looking teeth in the world. They are always white.

Even the announcer wont tell you that there is film forms over them. But on the other hand look what the

old Coyote misses. He never did hear about Madam Queen, he dont know the King fish from a Setter Pup. He has nothing to console his lonely hours only chewing on some competitor. He has the whitest teeth, but he is not informed on how many times a day the little Baby Wolves should grab a tube of "Never Tarnish" and scrape the wisdom teeth.

If this Country had static for a solid month, there is no telling what would become of people's teeth. But everything is sorter drifting to the sanitary anyhow. In the old days when we wasent so sanitary, why we were strong enough to withstand all the germs. But nowadays we have to be careful of the Microbes for if they get a hold on us we are gone. We are not physically able to withstand em. In the old days as many as wanted to could drink out of one cup, and the last one would just shake his head and swallow down Mike-Robies just as fast as they would accumulate. But now the old individual cup wont go for over one sitting, or it will knock the second individual right into the infested class. The old fashioned Gourd that the whole family drank out of from birth till death, would kill off more of the modern population than a war. We just aint built to stand the assaults and batteries of an unwrapped-in-paper containers.

But while we have lost in strength and endurance we have gained in amusement and instruction. For there is not an hour of any day that some one on the Air dont keep us warned of what lies in wait for us in case we dont use their remedy. There is just more different things that can happen to us than there used to be.

If you think there is not unemployment just look at these E flat golf courses and see the amount of people out of work.

Its wonderful exercise. You stand on your feet for hours watching somebody else putt. Its just the old-fashioned pool hall moved outdoors but with no chairs around the wall.

You dont hear so much of prohibition lately. Just drinking for the novelty of the thing has about wore off, and the ones that really like it and decided to adopt it seriously have just settled down to steady drinking and are keeping pretty quiet about it.

Nothing Else But

If old Nebuchadnezzar were here to take up his blue grass and alfalfa diet in this modern age, we bet he'd have to eat it with mayonnaise or french dressing.—Ohio State Journal.

Gave Name to Tree

The magnolia tree was named for Pierre Magnol, a French botanist of the early Seventeenth century.

The COOK STOVE by A.J. Dunlap

The old cook stove had a mended leg,
And a lid that was cracked half through;
The oven door had a broken hinge,
The damper was tinkered too.
But how it laughed in the winter time,
And blushed with a home-like glow.
When frost was thick on the window panes
And fields were all white with snow.

We seven gathered about the stove,
With father and mother too,
And laughed and played as the popcorn snapped
At night, and the cold wind blew.
The kitten purred on the old cob box,
The teakettle hurried a tune—
While tales were told of the timber wolves,
The bears and the old raccoon.

Its fire still burns in my land of dreams,
And down through the years that fly
Still drifts the fragrance of ham and eggs,
Fried chicken and apple pie.
I've traveled far and I've dined de luxe
But, somehow, wherever I rove
The pangs of hunger recall the things
They cooked on the old cook stove.

Prudence Is Courage

Prudence does not consist in evasion or in flight, but in courage. He who wishes to walk in the most peaceful parts of life with any serenity must screw himself up to resolution. Let him front the object of his worst apprehension, and his stoutness will commonly make his fear groundless.—Ralph Waldo Emerson.

Broadening the Mind

Nothing has such power to broaden the mind as the ability to investigate systematically and truly all that comes under thy observation in life.—Aurelius.

Wise Man

"He who thinks before he speaks," said Hi Ho, the sage of Chinatown, "takes a lesson from the careful marksman who studies his aim."—Washington Star.

POULTRY

GROWING CHICKENS NEED GREEN FEED

Giving Them Free Range on Alfalfa Is Favored.

The ideal conditions under which to raise a flock of growing chicks is to allow them free range on a field of alfalfa.

"Not every poultryman can do this," says C. F. Parrish, extension poultryman, at the North Carolina State college. "Where it is impossible, the poultryman should see to it that his chicks get some green feed each day. Green feed is essential. Where the chicks are confined to small yards, it is a good plan to supply one to one and a half pounds of lawn clippings, oats, alfalfa, rape, rye, or short pieces of any kind of green grain crop to each 100 chicks, while they are from eight to ten weeks old. The amount must be increased as the chicks get older. One hundred hens usually require from six to seven pounds of green feed a day. Next year's profits will depend on how well the growing stock is developed."

One of the strict requirements for a profitable poultry business is to furnish a sufficient quantity of the right kind of feed to make flesh, muscle and bone and to supply energy for the growing chicks. In addition, they need clean, dry quarters, fresh water and shade. The green feed is also important, though it is oftentimes overlooked, says Mr. Parrish. He then suggests that the brooder house be kept clean and all droppings removed at least twice each week.

Mr. Parrish says that the poultry business of North Carolina is growing rapidly. About 90 per cent of the farms in the state now have poultry on them, and the new interest in blood testing is assuring growers of healthy chicks from the hatcheries and breeding flocks. More than 150,000 hens will be blood tested next fall and winter, according to applications which have been received for this work during the past few weeks. All of this shows a more intelligent interest in the poultry business, says Mr. Parrish.

Early Roosting Should Be Taught to Chicks

Early roosting should be encouraged. The sooner the chicks are on the roost the sooner the poultryman's troubles are over. Roosts should be placed on the two sides and rear of the brooder house. The roost elevated one foot from the floor. The roosts may be hinged at the rear of the house. Two by two inch material is very satisfactory providing the edges are rounded off. The roosts should be 10 inches apart. One-half inch mesh chick netting should be placed underneath the

roosts in order to force the chicks up on the roosts and to prevent them from crowding in the corners under the roosts.

Table Scraps Are Good for All Poultry Flocks

Table scraps and waste food products make more or less of a balanced ration for a small flock of farm hens when combined with scratch grain. But be careful about feeding the hens any spoiled canned goods or moldy feed. Such materials may cause some of the losses that are blamed on disease. And it pays best to use a laying mash even if the hens have plenty of table scraps. They will usually eat the scraps first but the balanced mash will be there when the other materials are lacking. Hens seem to have few digestible troubles when they have the dry mash containing bran and easily digested ground grains.

Poultry Notes

Artificial hatching is practiced almost exclusively where turkey raising is engaged in on a large scale.

Sanitation can and will keep chick mortality well below 10 per cent in the flock, although 15 to 20 per cent has been accepted as about the usual thing in many sections.

Keep eggs infertile and you can keep them longer. Kill or sell cockerels after the hatching season is over.

Are the hens moulting now? Sell them while the price is still good. The kind of feed to give your flock furnishes much food for thought.

Now is the time to determine if you are to need new cockerels in the breeding pens next year. You will have a larger group from which to select and usually lower prices in the fall.

All brooder houses should be cleaned before placing chicks in them and cleaned at least once each week thereafter.

Eggs may be preserved in water glass while they are cheap and used when prices go up or hens stop laying.

Before the pullets begin production they should be fully matured and well fleshed. It is advisable to feed a liberal amount of grain now in order to build up a surplus of flesh.

Human Memorials

Those only deserve a monument who do not need one; that is, who have raised themselves a monument in the minds and memories of men.—William Hazlitt.

Hindu Ecclesiastic

A "hotar" is a Hindu priest—one of the sixteen season priests who offer intercessory prayers.

Breeding Peafowl for Ornament and Profit

On a farm peafowl may be kept without much trouble. They are very ornamental birds, and always arrest attention. It is perhaps expensive to start off with a pen of these birds, which would require to consist of four hens and one cock, but doubtless they would return a profit in hatching eggs and in young birds for sale.

When birds are first installed it is necessary to watch that they do not wander too far away, which they might be inclined to do, before they get settled down to a new place, which they will do in two or three weeks' time. The owner should endeavor to encourage them to roost in an open-fronted shed. Like the turkey the peahen likes to select a hedge to hatch out her young. As a rule she will sit when she has laid from 8 to 10 eggs. The incubation period is one of 28 days, and the youngsters are, as a rule, very active and bright. The mother hen broods them for a long time.

Rotate Chick Ranges to Avoid Coccidiosis

Rotate chick ranges as you would crops. They should not be allowed to range on the same ground oftener than once in three years. Rotating the range will avoid coccidiosis and intestinal parasites that live on the ground for several years after the chicks have been taken off.

Any range with plenty of grass is desirable for sanitation and economy. A green range is more sanitary than one with only bare ground. The growing grass hides and utilizes most of the organic waste.

Feed bills are cut materially if ample range with good grass is available. It will supply a tender, juicy feed, along with all the necessary minerals and vitamins.

Time to Fight Mite

Summer is the time when lice and mites do their most deadly work in the poultry flock. Lice live on the birds, while the mites hide in cracks and crevices in the nests, roosts and dropping boards in the day time and get on the birds at night and suck the blood. Both of these pests sap the birds' vitality and lower egg production. The birds should be treated for lice and the houses cleaned and disinfected, the droppings boards, roosts and nests being painted.

Fattening Turkeys

Begin on the first of October by gradually increasing the feeds morning and evening. If the birds are fed enough they will not move about very much. There is no advantage in shutting them up. The more milk fed the better the bird; so feed as much buttermilk as possible during this time.

Keep all hoppers and troughs clean at all times. Provide the birds with deep wooden troughs for wet mash, made from 10-inch or 12-inch boards or planks.

MENTONE NEWS ITEMS.

The Mentzer Co.

"Make sure,"

said MRS. MOLLA PROPP,

**"that the gasoline flows freely
through the distributor."**

I DO love antiques, although Henry detests them. So it seems that every time I pick up something rare and cracked and old, Henry has to console himself by buying something that can be used. He's so practical, you know, so unitarian!

Yesterday, when we passed an old farm and I saw a pair of lovely old kerosene lamps, didn't Henry have to buy himself a smoking stand and also a glass humidor?

I drove and had my lamps in the seat beside, and Henry sat in the rear with his precious articles. It was raining, my dear, and you know how slickery the streets get.

And Henry was a regular back seat driver and you know there is nothing flusters one like back seat driving. I'm glad that I am not that way.

"Go this way." "Now turn right and for heck's sake be care-

ful on these streets," he would say, and sure enough I WOULD skid this way and that a little. I tried to keep my temper but when Henry leaned over my shoulder to help me drive, it was too much. I stepped on the thing that makes you go fast and the car just jumped and Henry fell back into the seat right on top of his humidor and smashed it all up.

He was wild, my dear, and his language was terrible, but it was his own fault, and when we got home he got right out of the car, never stopping to help me with my lamps, and he had no more than put his foot outside when he slipped and fell, breaking his smoking stand, while I followed with my two frail lamps as safe as could be.

Well, as I was saying, I am glad I am not one of those back-seat drivers. They always get into trouble! don't they, my dear?

Copyright, 1930—John Jensen.

BEAVER DAM ITEMS.

Maribel Tucker is attending school at North Manchester for a few weeks.

Lois Fife and Jeanette Cinninger spent Sunday with Floyd Study and family.

Albert Carpenter and wife of Akron spent Monday at the Homer Clark home.

Lena Swick is spending several weeks at Bethany Lodge at Winona Lake Indiana.

Jonas Rickel, Mrs. Etta Clark and family attended the Rickel reunion Warsaw Sunday.

Lillian Igo, Maribel Tucker and Jeanette Cinninger were Warsaw callers Saturday afternoon.

Clyde OHara and family, Claude and Garwin Haupt were entertained Sunday at Homer Clark.

The Summee reunion was held Sunday at the Yellow Creek Lake Camp Ground.

John Carter had the misfortune of running the prong of a pitch fork in his leg while threshing. He is recovering nicely.

The big barn of Ray Swick burned Sunday night about midnight. It had just been filled with oats which were destroyed also many farm implements. The heroic efforts of the neighbors saved the adjoining buildings. Spontaneous combustion is thought to be the cause.

TALMA NEWS ITEMS.

Mrs. George Bryant is still improving.

Mr. and Mrs. Verdie Brockey and Mr. and Mrs. Abe Brockey attended the Coplen-Severns reunion Sunday at the Rochester tourist camp.

Mr. and Mrs. Emanuel Kinsey and Mrs. George Irwin of Mentone were callers Sunday evening at the Peter Horn home.

Mr. and Mrs. Peter Horn and daughter Dorothy and Von Kochenderfer attended the Horn reunion on Sunday at Fair Lake Park in Warsaw.

The Misses Mary Barkman, Dorothy Horn and Messrs Edward Miller and Von Kochenderfer attended the concert at Akron on Thursday evening of last week.

About one hundred people of New-castle Twp., attended the reception for Mr. and Mrs. Leon Kotterman and family Given by the Ladies Auxiliary of the Farm Bureau, on last Wednesday evening at their home in Talma. The evening was spent socially and refreshments of ice cream and cake were served. The affair was given as a fairwell party for the Kotterman family as they are soon moving to Culver. Mr. Kotterman has been principal of the Talma school for the past four years.

PURDUE EXTENSION MAN

ADVISES YARDING POULTRY.

Purdue News Service

"Yarding the poultry will eliminate many problems" says Stephen M. Walford, extension poultryman for Purdue University, "and double-yarding will render this practise safe, from a sanitary viewpoint."

Keeping the adult birds in a limited area, he points out, will give a more absolute control of the feed to which the birds have access, will simplify the matter of feeding, watering, and gathering eggs, will prevent the huge number of good hens killed or crippled every year by passing automobiles, and will help keep the rest of the farm free from poultry droppings, thus increasing the area of ground on which young stock may be safely brooded.

By having two yards available for rotation yearly or half-yearly, the adult birds can be kept on relatively clean ground all the time, and the sunshine and weather allowed to kill off any infection which may have accumulated in the yard thus vacated.

Since poultry diseases, particularly the kind which live over from year to year in the ground, can do more than anything else to reduce the efficiency of laying flocks, Mr. Walford concludes, every effort made toward maintaining sanitary ground conditions, is going to increase the efficiency of the layers, and so reduce the cost of producing eggs.

DAIRY

SUMMER MINERALS NEEDED BY COWS

Calcium, Phosphorus Store Up Energy for Winter.

To insure healthy, robust animals, able to produce the milk needed this coming winter, Dr. L. A. Maynard of the Cornell university agricultural experiment station says that cows must have plenty of calcium and phosphorus during the summer. The usual summer ration of pasture and grain, he says, does not contain enough of these elements. Further, experiments show that cows will make better use of mineral supplements during the pasture season than at other times. The liberal feeding of minerals now will not only provide for current needs but will also enable the animal to store up reserves for the period when their assimilation of food is more difficult.

A mixture of equal parts of steam bone meal, finely ground limestone and salt, or a mixture of two parts of the bone meal and one part of salt makes a good mineral supplement. The simplest way is to place one of these mixtures in a box in the barnyard where the cows can eat it at will. Some sort of a cover should be built over the box to protect it from rain. It is a good thing to give the cows access to one of these mixtures even when the grain mixture contains minerals, because the grain fed during the summer may not contain enough. A better way to feed the minerals, but one that takes more time, is to mix three to four ounces of the mixture with one of the grain feedings each day. All animals, whether dry or milking, should be fed the extra minerals.

Aside from common salt, calcium and phosphorus are the only minerals that are needed as a mineral supplement. The purchase of a complex mineral mixture containing laxatives and tonics is a waste of money, says Doctor Maynard.

Water Materially Helps Maintain Flow of Milk

Water is as necessary to life as food, but how rarely is it given adequate attention, particularly in the summer. To maintain the summer milk flow at the highest pitch a liberal supply of pure water is needed. No matter how good the pastures, the cows cannot produce well if they are deprived of water. For both digestion and assimilation of food, water is necessary. It regulates the temperature of the body, and provides for the water content of the milk, which is more than 80 per cent by weight of its volume.

Experience has proved that cows in milk need approximately three pounds of water for every pound of milk produced. Very heavy producers then may need from ten to fifteen gallons in 24 hours. During summer many herds are not supplied with enough water to meet this need. If the water is not before the cows all the time, they should have access to it at least twice a day, preferably three times during the hot weather. If this is done there will not be a falling off in the milk supply.

Poor Market for Dairy Products Is Advantage

It is generally conceded that a poor market for dairy products works to the advantage of the efficient dairy farmer because many of those producing at a margin are bound to go under in the crash of butterfat prices. Therefore the efficiency with which a farmer feeds determines whether he will remain among those producing at a profit. Herein lies the one great hope of the producer of dairy products, for in the narrowing of his field of competition, low prices at the same time provide for under-production and a subsequent rise in prices.

Dairy Hints

A good pasture increases the "content" in contented cows.

Soy beans are an excellent feed for dairy cows. They take the place of linseed meal or cottonseed meal.

So long as the heifer is on excellent white clover and blue grass pasture it will not be necessary to feed her grain.

About 87 per cent of milk is water. For plenty of milk, don't forget to give the cow all the water she cares to drink.

Cows should be kept in well lighted, well ventilated, clean barns. Flies can be kept out by hanging burlap over the windows and doors.

Feed which would taint the milk should not be given immediately before or during the process of milking.

The partly covered top pail, in some form, is preferable to the open top. Pails and other dairy utensils should be of the seamless type, or flushed with tin to cover up the seams.

IF YOU MET WITH A SEVERE ACCIDENT.

Was Laid up in a Hospital or
Home Could You Pay Your
Expenses for One
Cent a Day?

IT CAN BE DONE.

Pay us \$3.65 or at the rate of a penny a day for a whole year, and in return should you at any hour of the day or night during the year be riding as a passenger on a railroad train, steam boat, street car, elevated or subway car and by the wrecking of that vehicle you become injured, we will pay you at the rate of \$100 per month for one day of more for a period of a year's time. Should you be killed we will pay to your estate \$5,000.00 and in event you are permanently disabled by the loss of one or more limbs or the sight of an eye or eyes, we will pay you from \$1,500.00 to \$5,000.00 depending upon the extent of your disability.

Suppose you should become injured from the wrecking of your automobile, or while riding in your friend's car. Suppose you are riding in a taxi cab, motor bus, or elevator, and through the wrecking of that vehicle if you should be injured we would pay you at the rate of \$100.00 a month, and if killed your estate would receive \$1,000.00; also for loss of sight, or limbs from \$500.00 to \$1,000.00.

That's Not All—This same indemnity would come to you for injuries received as a result of being struck by lightning, injured in a tornado, by being burned or suffocated by smoke in the burning of a church, school building, theater, store office building or lodge room. Should you drown while bathing at a bathing beach your estate would receive \$1,000.00.

Furthermore—Suppose you were struck, knocked down or run over while walking or standing on a public highway. Suppose you were injured while driving a truck, wagon or buggy, and if you are a farmer, suppose you were injured while operating a threshing, mowing or heading machine, a binder, harrow, plow or tractor, we would pay you for one day or more of disability at the rate of \$50.00 a month; and if killed your estate would draw \$500.00.

This 1c Day Will Also—entitle you to a \$10.00 medical or surgical attention for any of the fore-going injuries that does not totally disable you, and if you are injured in any accident, any place, any time and are laid up for a month you will receive \$25.00.

A real honest to goodness accident

policy that covers the pedestrian as well as the traveler. Just think, all this for only 1c a day.

AMERICAN BENEFIT LIFE ASSOCIATION

Applications taken at Farm News Office.

DO NOT TAKE ANY CHANCES

Cleaning clothing with naphtha, gasoline etc., is very dangerous, regardless of the fact of whether you may have any fire around or not. The rubbing of the cloth can ignite the fluid, and the result is a bad burn or possibly death. Play safe use "Spot Fyter" which is non-explosive. It will clean most anything in a jiffy. Costs only 50c per bottle at Clark's Store.

NOT OUR POLICY.

But When People Become Too
Brazen With Their Scandalous
Relations The Farm News
Must Make Mention.

It is not the policy of this paper to pay any attention to rumors of a scandalous nature that are occasionally whispered around town but when people become so brazen with their illicit relations as to cause an old fashioned fight at noon time on our main street, we cannot pass it by unnoticed.

In this case it seems that one married man has been paying altogether too much attention to another man's wife, and the irate husband proceeded to give the offender a good beating. If half is true that is reported about the action of this man and woman, the beating administered was justifiable and in face was not severe enough. The woman in the case should also be shown that her place is at home with her small children and that unless they refrain from their past relations they will have to look for another community in which to live.

ENTERTAIN AT DINNER

A family dinner was served at the Carlin Myers home Sunday. The guests were J. B. Underhill and wife, Geo. Myers, wife, and daughter Mary Ellen, S. Carl Myers, wife and daughter, Pattie Jean of Jamestown N. Y. and H. C. Graffe and wife of Willmette Ill., who were on their road home from an auto trip to Toronto, Quebec, Boston, New York and intervening towns.

Life's Darkest Moment

The real zero hour is when the gasoline indicator is at 0 and you are five miles from a filling station.—Des Moines Tribune-Capital.

DIES AT HOSPITAL

Frank Lyon Prominent Farmer of
Mentone Expires at Rochester
Hospital.

People of this village were surprised and shocked to learn of the death of Frank Lyon of this place which occurred at an early hour Wednesday morning of last week at the Rochester hospital. Mr. Lyon was taken with acute indigestion the first of the week and taken to the hospital where it was decided that an operation was necessary, and a turn for the worse immediately following the operation brought death in a few hours.

Deceased was very prominent in the affairs of this community and his quick passing will be deeply felt by his many friends and fellow workers. Besides the widow he leaves to mourn his loss eight children: Mrs. Ross Smith of Florida; Mrs. Robert Reed of this village; John Lyon of Fulton Ind.; Scenora Lyon of Nappanee, Donald and Betty Lyon at home; Virginia Lyon who is attending training school at Indianapolis and Mrs. Louise Evans of Attica Indiana.

Funeral was held Friday afternoon at 2:00 o'clock at the home. Rev. Squibb officiating. Burial was made in the Mentone cemetery.

LARGE BARN BURNED

Lyman Swick suffered a \$3,000 loss when the barn on his farm south of Burket and directly south of Beaver Dam Lake, burned to the ground at about 1 o'clock Monday morning. The fire started just before the wind storm and was almost completely destroyed before the wind blew the flames dangerously near the Swick home. Several hundred dollars worth of machinery and wheat were burned. All the cattle and live stock were saved. Damage done was two-thirds covered by insurance. Cause of the fire is not known.

RUNS INTO STOP SIGN

AT FORTY MILE CLIP.

About dusk on last Sunday evening, one of those motorists who is always in a great rush came tearing down East Main street at an excessive speed and ran into the base of the stop sign at the intersection of Main and Broadway. The base of the sign being concrete and round, caused the car to vere off to the right and landed it on the Mentzer corner with a badly bent axle and other minor breaks.

When the car struck the base the impact was so great that it could be heard for blocks indicating to some

degree the speed at which the car was being driven. Luckily none of the occupants were injured and after a short stop at a garage for repairs the party was on its way, but at a lower rate of speed.

We think that it is about time for our authorities to adopt some means to make all cars come to a stop at this corner. It is a dangerous crossing especially to pedestrians—besides if all cars are made to come to a complete stop at this corner it will put a stop to the practice of some drivers using our main street for a speedway.

W. C. T. U. MEETING

The W. C. T. U. will meet Tuesday evening August 12th, at the Baptist Church. Meeting to begin at 7:30.

ICE CREAM SOCIAL

On Saturday evening Aug., 9th, there will be a social on the M. E. Church lawn. Ice cream and home made cake will be served.

This is sponsored by the local Home Economics Club and the proceeds will be used to promote the "4H" Club work. The public is cordially invited.

Becoming Venerable

The British museum was opened to the public on January 15, 1759.

Vital Difference

Of all men perhaps the book-lover needs most to be reminded that man's business here is to know for the sake of living, not live for the sake of knowing.—Frederick Harrison.

Retort With a Kick

Vacillating in his selection of a vocation, between one involving brain and the other brawn, a Detroit graduate asks the Press: "Which has the better chance for a long, healthy life—a blacksmith or a college professor?" "A professor," informs the editor. "He doesn't have to shoe mules—he only teaches them."

Trick of the Tongue

Tongue-tied is defined as impeded motion of the tongue due to shortness of the fraenum, or its adhesion to the gums. When a child is said to be tongue-tied, recourse must be then had to division of the fraenum. The expression is often used in a figurative sense. A person is said to be tongue-tied when he is speechless from embarrassment or fright.

Ancient Bells

There are 22 bells in Lancashire, England, that can, with certainty, be assigned to a date earlier than 1550. The oldest bell exists at Cloughton, and dates to 1290. Five or six bells can be assigned to the Fourteenth century, and a like number to the Fifteenth century. Six dated bells belong to the period 1550-1600.

FAMILY REUNIONS.

The Eckert-Goodman reunion will be held at the City Park Warsaw, Indiana, on Sunday, August 17th. Raymond Lash, Secretary.

The Jones-Miller reunion will be held on the school grounds at Bladensburg, Ohio, August 31st. C. O. Eiler, Secretary.

ASK FOR A DIVISION OF THE MAUDE ELEY PROPERTY.

Heirs to the Maude Eley property on North Broadway have asked the court for a division of the property. There being a number of claimants, owning from one-twelfth to one-seventh interest, the court will probably order it sold in the near future.

MENTONE HAS A REAL BALL TEAM.

Mentone defeated the strong South Bend L. O. X. base ball team Sunday with a score of 9 to 3. Tim Blue was on the mound and held the hard South Bend hitters down to seven hits while his team mates collected 13 safties.

Next Sunday the Warsaw Merchants play the final of a three game series, at the Mentone ball diamond. These two teams have played two games, Mentone winning the first with a score of 7 to 6; and Warsaw winning second with a score of 16 to 14. Our boys are going out with blood in their eye in an effort to win this final game and if you wish to witness a real game of base ball you should not fail to be present. There is no admission charge.

COTTON GAIN IN 1930 AND PURDUE SPECIALIST TELLS WAYS OF USING.

Purdue News Service

The year 1930 is a year for cottons. The Cotton Textile Institute states that 65 percent more cotton dresses are being made this year than were made in 1929. The acceptance of cottons for every occasion has brought out a big range of weaves; many are being welcomed back after a long absence. Simplicity is the key note of the fashions as far as cottons are concerned according to Miss Frieda Stoll, clothing specialist in the extension staff of Purdue University. It is the fabric chosen that furnishes the key to individuality. There are the crisp, refreshing materials on the one hand and the soft finish cloths on the other, each expressing a different mood.

The revival of the sheer cottons

for informal wear for hot summer days is an interesting note. Here are found some old friends such as or gandy, voile, dimity, dotted swiss, lawns, batiste and nainsook. They have changed as the years have gone by and are adapted to meet the new fashions. The sheer crisp fabrics express the youthful feminine mood while the soft fabrics tend to give dignity as well as charm. These materials offer a very wide choice in coloring and variations of weaves and prints. The pastel colorings are very good this year and may be found in plain and printed materials. Prints may be had in the large, all-over and more formal designs in interesting color combinations. For those who prefer a more conservative pattern small floral and dot prints are available. Those materials are economical. The original cost is low and the upkeep is comparatively small for the woman who takes care of the laundering. Frequent tubbings revive the freshness of these fabrics.

The charm of the sheer cotton fabrics is making a strong appeal to the consumers; however, it is the freshness and practicability of these fabrics that is making them favorites this summer.

LOOGOOTE CLUB BOY HAS OUTSTANDING MARK.

Purdue News Service.

One boy who will enter the school of Agriculture at Purdue University this fall has a record of achievement in agricultural lines that is seldom equalled. John Van Hoy, of Loogootee has been a member of 4H clubs for five years, and has as evidence of his accomplishments in this work a four-year scholarship to Purdue, a trip to the 4H Club Congress at Chicago, another trip to Washington, D. C.; a pen of Rhode Island Red chickens, two medals, 50 ribbons, and \$185 in cash premiums. John's story is told by himself in the July issue of the Baltimore and Ohio Magazine, issued by the railroad for its employees.

John entered 4H Club work five years ago as a member of a potato club, sponsored by the B. & O. railroad. His potato projects have placed him in the money at the State Fair and at the state potato show every year, and resulted in his receiving a four year scholarship to Purdue, as well as a trip to the Club Congress at Chicago.

He has won honors and prizes in the poultry club of his county. He has been a member of the 4H corn club at Martin county, for two years, and last year he entered the Five Acre Corn Club, and won a gold medal, with a yield of 117 bushels

But the work which interests John most, he says, is that of baby beef production. He entered the Baby Beef Calf Club in 1928, and that year and the next his entries won first prize in their classes at the State Fair. Last year, on the strength of his calf club work he was awarded a trip to Washington, D. C. and other eastern cities by the railroad.

This summer, John is carrying club projects in poultry, corn, potatoes, and baby beef, and he hopes to complete these in time to enter Purdue in the first week of September.

Mr. and Mrs. Arlo Frisner and Mr. and Mrs. Lee Blue entertained at the Frisner home last Thursday evening to ice cream and cake the boys belonging to the Mentone Base Ball Team. Those present were, Edgar Igo, Ellery Nellans, John Allen Teel, Clayton Holloway, Ray Smith, "Shinny" Blackburn, and Donald VanGilder. Other guests present were Vance Johns, Fremont Fisher and Mr. and Mrs. James Blue and son Tommy.

Analyzing ...YOU... With the New Science of Syllabics By C. J. COFFMAN Dean of All the Enumerators

Leola

Your name takes us right back to school days. Somehow you fit right into high school, and ought to be the editor of the school paper.

Leola's Adaptation Faculty.

The roundness of your head above the ears makes a splendid room for the development of your faculty of adaptation. Among the ancients, your first syllable, LE, had a general meaning of "at" or "for." Back of this was a designation of adaptation, quite powerful in its nature.

You can make a real career for yourself if you don't try too hard to be original. You must learn what Solomon found "there is nothing new under the sun," and a career does not always mean originality. It can mean clever adaptation, which might be just as useful and pay just as well.

Your love of speed and movement, especially of changes and new scenes, can be gratified to the full if you will study your peculiar adapting ability. For instance, you could be a society editor and even become nationally famous, like Leola Allard. That Leola used to be society editor on a western paper, but now works for a great syndicate, and travels everywhere.

In this position she renders a valuable service, which admits of much extra compensation, besides her very liberal income. A syndicate, you know, is a great company which can distribute your writings to large numbers of newspapers or magazines. It is through one of the world's greatest syndicates that I am analyzing your name.

But with all this, Leola, I must give you a real, solid warning. There was an ancient syllable of your name, formed by using your first and last letters, L A, that indicated a sort of faint-heartedness. You might give up too easily. But possibly I have warned you in time.

Your most important words to keep in mind are persistence, determination, force of will. By exercising these powers, you will save yourself a great deal of grief, for the major portion of your trouble will arise from the things you have failed to keep on with.

(© 1930, Western Newspaper Union.)

Farmers Who Are Interested in Better Eggs and Who Are Interested Enough to Help Themselves as Well as Us.

It goes without saying, that we have done more for the farmers in the way of egg price than any other buyer in Indiana, and have done more hard work to try to get a "Mark" on Indiana eggs than any other firm in New York City. We are working our heads off now trying to help you get more for eggs. Now, won't you please listen and try to follow our advice, 'We are not hoggish and don't ask all of this simply for our own benefit, but what helps us, sure will help you.

Now please try and adhere to the following advice for one year and see the results:

Get a good strain of straight blood poultry that lays a good sized egg (either white or deep brown) there is no difference in price now, and the general average price is about the same for equal quality eggs (size and cleanliness considered.)

Pick up your eggs every morning and evening, and carry a damp cloth with you, cleaning all traces of dirt off before it hardens and sticks to the shell.

DON'T WASH THEM,

But simply wipe them with a damp cloth and don't leave them streaked with dirt but clean them. Keep them in the coolest place about the house never allowing rain nor sun to touch them.

Use all ill-shaped eggs at home because they are broken in shipping. Market your eggs at equal intervals twice each week—that is, we would like to have them each Monday and Thursday or each Tuesday and Friday, rain or shine.

Keep every egg that you are not sure of being strictly fresh at home or ship them separately, as we don't want to spoil a case of nice eggs with a few of doubtful character, and you can't afford to sell such eggs, as it hurts you as bad as it does us, for we have to buy eggs on a basis of what we get for them, and if you slip in a few bad eggs on us, it only hurts our sales, and causes us to have to lower our price, so you see the fresher we get the eggs the more we get, and the more we can pay you. Never keep roosters with your hens after June 1.

Watch the size of your eggs and when they begin to run small, then feed them some good laying mash with a little Cod-liver oil in it or some soaked oats with a little Cod-liver oil in it or anything to keep the egg size up to not less than 23 ounces per dozen or over.

Now please try and follow this advice and let's work together and put our eggs in a class with California, Washington and Utah. The Pacific coast states ship eggs to New York City, and get from 3 to 10 cents more than your eggs bring, and it is because they ship fresh, clean, good-sized eggs graded up to a standard, which you can do if you will work as they work. Now if you will work as hard as we are, trying to put good eggs on the map, then we will show the market that Indiana has just as good eggs as any state in the union. We will do our best and now it's up to you who sell us eggs, to work as hard as we do.

Yours for Better Eggs.

Quality Butter & Egg Company

FARM POULTRY

FATTEN BROILERS BY USE OF PENS

Confine Fowls Two Weeks Before Marketing.

Many New Jersey poultrymen find that cockerels to be marketed as broilers can be pen fattened to advantage. Two weeks before they are marketed the broilers are confined to pens and fed a special fattening ration. The following ration has given good results in the state: One hundred pounds of corn meal; 50 pounds of wheat middlings; 50 pounds of ground heavy oats or ground oatmeal; 30 pounds of meat scrap.

This mash is mixed with water and fed to the broilers three times a day, all they will clean up in 15 to 20 minutes. When milk is available for mixing, the meat scrap should be omitted from the mash, advises the poultry department of the New Jersey agricultural experiment station. If semisolid buttermilk is used, dilute one part of it with three parts of water and then mix with mash. When powdered milk is used, substitute 30 pounds of it and omit the meat scrap. Water should be kept available for the birds.

It is not advisable to market the broilers until they weigh two to two and a half pounds, says the poultry department.

Preventing Instead of Curing Poultry Ills

A "cured" fowl is a menace to the poultry owner because, as a rule, the bird goes back into the laying flock and loses its identity. It continues to produce eggs or is mated to hens that are laying eggs to be hatched. The chicks from these eggs will inherit the constitutional weakness that made the ancestor or ancestors susceptible to the disease.

For this reason, if no other, prevention is far better than cure. Birds which do not have the opportunity to become sick will produce greater returns than those that are kept under insanitary conditions and under improper methods of feeding and management.

Early Maturing Pullets Usually Best Layers

In every flock of growing chickens there are always some that grow faster than the others. Observations and experiments have shown that it is these early developing pullets that are the best ones to select for the laying flock. They will start laying sooner than the others and will keep it up longer, provided they are fed a good

laying ration and are fed in such a way as to maintain body weight.

Occasionally some will develop sexually, that is, their combs will redden up and become large, and these birds will lay eggs. They may make this development at the expense of their body growth. Such birds should be given a little longer time to put on more growth and weight before expecting them to continue laying. This is done by cutting down the protein in the growing ration, cutting down the meat scrap to about 5 to 10 per cent, and feeding heavily of grain. Follow this procedure for about two weeks

Poultry Notes

Nests should be easy to remove to facilitate cleaning.

Provide clean feed, clean quarters, clean ground, and start with clean chicks.

Geese are naturally grazing fowls. They have been grown for many generations on pasture.

Washed eggs have proved unsafe for storage. Therefore nests, houses, and the place in front of the door should be kept clean and as dry as possible.

If the pullets are laying heavy and getting a little thin in flesh, they may need a little more grain.

Hatch heavy and medium breeds between February 20 and March 20; light breeds, March 20 to April 20. Do not hatch chicks after May 1.

Speltz is not much used in poultry feeding. The reason for this is that it is hard to thresh clean and it has sharp points and the hull is very tough and difficult for the hens to digest.

More than half the ability of a hen to lay a large number of eggs depends upon the breeding of her immediate male ancestors.

No matter how carefully the culs have been rejected, the good pullets will not lay profitably in poorly constructed houses.

During the past ten years poultry has been of increasing importance as a source of meat. The relative price of chickens has increased more than the price of eggs during this period.

Dream Lore

Dream oracles say that nothing can be more favorable than to dream of a rose, as this means long life and prosperity, and to a lover that he will wed his true love.

Title's Humble Origin

Just why so humble a word as "marshal" should come to be a title of such dignity, nobody knows. It is an English rendering of the French word "marechal," which originally meant a shoer of horses.

MORE EVIDENCE OF RARE MERIT OF NEW KONJOLA

Young Chicago Man Gained Health and Ten Pounds in Ten Weeks.

MR. JOHN S. ERICKSON

"Two years ago indigestion developed, and after meals my stomach filled with gas," said Mr. John S. Erickson, 4925 Wrightwood avenue, Chicago. "The pain was so severe that at times I doubled up in agony. I lost weight, and though I found no relief until I used Konjola. My stomach is in splendid condition now and I can eat whatever I like. I took ten bottles of Konjola in as many weeks, and in that time gained ten pounds."

Though Konjola loses no time in giving relief when pitted against the stubborn ills of the stomach, liver, kidneys and bowels, and rheumatism, neuritis and nervousness, it is recommended that a complete treatment of from six to eight bottles be taken for best results. Quit experimenting—put your faith in Konjola feeling that you will be rewarded.

Konjola is sold in Mentone Ind., at the Shafer & Goodwin drug store, and by all the best druggists in all towns throughout this entire section.

Homesick Kids

Homesickness is due to lack of mental ability to make quick mental adjustments to new conditions. Such inability is a misfortune.—Country Home.

Most Powerful Force

There is something on earth greater than arbitrary power. The thunder, the lightning, and the earthquake are terrific, but the judgment of the people is more.—Daniel Webster.

Sapsucker's "Spre"

The sapsucker, or yellow-bellied woodpecker, drills a row of downward sloping holes through the bark of a tree, forming cups in which the sap gathers. He will then stay at these cups all day long drinking until he becomes quite stupefied.

The Reason

We get so many eggs from Mentone Producers is because we are in a position to pay the most for Quality Eggs. And then Our Quick Returns is

Another Factor

That makes friends among the shippers and causes so many to ship their Finest Eggs to us.

JUST THINKIN'

by Charles S. Kinnison

Quitting-Time

Quitting-time—and out the door
To the street, the workers pour.
Some look happy, some do not;
Some with troubles all forgot—
While some other faces show
That their troubles with them go.
Homeward bound to house or room—
Homeward bound, to joy or gloom!

Quitting-time—and down the street
Go the light and heavy feet.
Some folks young and bright with hope,
Others shuffling down the slope,
Merely floating with the stream,
Too old, now, to plan and dream.
Quitting-time—and may it bring
Hours in which your heart may sing!

(©, 1930, Western Newspaper Union.)

THE APPALLING CRIME CONDITION IN THIS STATE.

The issue of the Indiana Farmers Guide of August 9th, contains an article upon the crime situation of the state that is quite startling, and if every-thing is true that this article intimates we think there should be another commission appointed to investigate the commission that is just finishing its labors.

It seems that much of the evidence uncovered by Gov. Leslie's crime probers was of such startling nature that a great deal of this evidence has been suppressed by said commission—possibly because it placed too dark a cloud over some of our leading

politicians and office holders.

We consider the suppression of evidence of this kind to be as great a crime as can be committed against the state, and we hope that the article in the Farmers Guide will start something that will force to the open ALL of the evidence, both documentary and oral, collected by this commission. The peoples money paid for the collection of this data—now let us have it. There were no funds appropriated for "white wash" and the people are not going to stand for anything except the whole facts.

Now Governor Leslie, you started this investigation, be a real sport and finish the job—hew to the line and let the chips fall where they may—facts and all the facts are what the people paid for and what they want—not white wash.

WORKING FOR CHILD HEALTH

By R. L. WILBUR, Secretary of the Interior.

There are two general methods of working for the care of the child. One visualizes a great national organization reaching out, spreading its tentacles into every part of the country and telling people what to do. The other visualizes the local forces coming together in a united effort and doing a job in accordance with local possibilities.

I say quite frankly that I belong to what may be called the county seat group—the local crowd—not the national crowd. I have a feeling that we will never develop a real democracy unless we develop it with a local significance and interest.

RELIGION UNDERGOING CHANGE

By CHARLES FRANCIS POTTER, Humanist.

Many of those who deplore the present persecution of religion alleged to exist in Russia do not seem to be aware of the fact that the anti-God agitation in that country is only one part of a world-wide revolution in religion. In the Philippines many people have left their former faith—Roman Catholicism—and have formed a new independent church which has adopted a faith similar to Unitarianism. This independent Philippine church already has a membership of 2,000,000 persons.

In Czechoslovakia there has been a similar movement of large proportions, and President Masaryk is accused by his enemies of being a Humanist. In Japan and in south India similar movements are starting, while Mohammedanism now is being rent by a great religious division. A leader of the reform movement in Islam recently told me that the religious reformation in Mohammedan countries is jumping over the step of Protestantism and is leaping from the authoritarian old Islamic religion straight into Humanism.

Religion is not disappearing; it is merely changing form to fit the new age. Monarchic religion is passing; democratic religion is coming.

Her Work Was *A.J. Dunlap* NEVER Done

The old farm had an awful lot
For women-folks to do;
No matter how Ma managed things,
Her work was never through.
Three times each day the hungry ate;
Three times each day they dined,
And spoiled the labor of her hands,
And left a wreck behind.

A baby with a throbbing tooth,
Would always fuss and fret,
When springtime came with rugs to beat,
And clucking hens to set;
And weekly wash-day rolled around,
And days of ironing, too,
And if she paused to rest at all,
She'd patch a shirt or two.

The birds too long have paused to place
The chaplet on the brow,
And sung the praises of the man
Behind the sturdy plow.
The time has come to recognize
The value and the charm
Of her who fed the hungry men
And chickens on the farm.

LIGHTNING BURNS TWO BARN.

Electrical Storm on Tuesday Evening
of Last Week Worst of Season.

Our prolonged drought in this vicinity was broken on Tuesday night of last week when we were visited by a copious rain for about two hours duration. While there was no wind, the rain was accompanied by considerable lightning and thunder which resulted in the burning of two barns.

A very fine barn belonging to Ernest Williamson near Burket together with a large amount of hay and grain was destroyed. The valuation is said to be about \$6,000.00 with about \$3,000.00 insurance. The Mentone fire truck was called, but when it arrived the barn was a mass of flames, and as there was a heavy downpour of rain at that time the balance of the buildings were in no danger, so their services were not needed.

The other barn was that of C. M. Tucker's on his farm three miles south of town. This was an old

structure and contained only a small amount of sheaf oats. The neighbors rendered assistance to keep the fire from reaching the house.

STAND BY YOUR GUNS

Demand Free Telephone Service
With Neighboring Exchanges
Before Ordering Phone
Installed.

The advertisement of the telephone company in our last issue is very good evidence that the officials of this company are beginning to realize that rate boosting is a losing proposition, and we have no doubt that if our people will stand pat and make the demand that the company will restore free service as they should with neighboring exchanges.

They seem very anxious to regain their lost subscribers and now is the time to demand and get what you are entitled to—do not install your phone and then ask for free service—get the free service first. A letter along this line to W. J. Smith, Gen.

Fossil Classification

According to Zittel, "all remains or traces of plants and animals which have lived before the beginning of the present period and have been preserved in the rocks" are termed fossils.

"Soul Pictures"

Maeterlinck says that we write letters at times when our bodies are separated, in order that we may give each other pictures of our souls, and these soul pictures are frequently better portraits, because of the absence of the body.

HORN FAMILY REUNION.

The twentieth annual reunion of the Horn family was held at the city park in Warsaw on August 3. A picnic dinner was served at noon after which a meeting was called to order by the president, Issac Horn, and new officers for the coming year were elected. O. G. Fields was selected as president, and Simon Snyder vice president, and Mrs. Elmer Sarber, secretary and treasurer. Readings and stunts with refreshments of ice cream were features of the afternoon. There were 80 relatives in attendance. The next reunion will be held at the Elmer Herald home in Burket.

TWO NEGROES LYNCHED.

A Mob of One Thousand Irate Citizens Storm Jail at Marion and Deal Out Swift Justice.

Two negroes, 18 and 19 year of age were taken from the jail at Marion, Indiana, Thursday night by a mob estimated at more than a thousand citizens and after rough handling were hanged in the court house yard. A third negro was spirited away by the officers and taken to Huntington for safe keeping.

The cause of the lynching was the murder of Claude Deeter, 23, of Fairmount, and an attack upon his fiancée, Mary Ball, 18 upon a public highway just outside of Marion on Wednesday evening. One of the negroes confessed to the crime and consequently there was not the slightest doubt as to their guilt.

To be sure it is a bad policy for a mob of people to take the law in their hands and administer the penalty, and there will probably be every effort possible made to prosecute and punish the leader of this lynching bee.

However in this case right down in our own heart, we cannot help but think that the lynching was justifiable. It was a horrible crime—not a shadow of a doubt as to the guilt of the culprits, and the punishment dealt out by the mob, while it may seem brutal, was no more than the negroes deserved, and its quick administration will probably have a wholesome effect upon young bloods of a criminal nature.

People residing in communities where there is no negro population to contend with will be the loudest in their demands that the leaders of the mob be punished to the full extent of the law—they will be sincere in their convictions—simply because they have never had the negro problem to contend with. They are not aware of the fact that fully ninety per cent of the colored race in communities where they predominate or are considerably in number, are of a vicious nature, held within the bounds of decency wholly by their fear of the law and its consequences, and not good citizens from their own desire to do right. In other words what good there is in the average negro is forced in from without and does not emanate from within.

People who live or have lived in a community where this race constitutes any great portion of the population will tell you that swift punishment is the only thing that will have any effect upon the colored people, and in fact lynchings, as in this case are absolutely necessary for the protection of the white race, especially the women and children.

DORAN STATION ITEMS

(Leave Items at Black's Store)

O. F. Miller made a business trip to South Bend Wednesday.

Miss Ethyl Borton spent a few days with Miss Wanda Heighway.

Mrs. Julia Meredith is spending the week with Mrs. Harry Meredith.

Surplus and Profits \$56,000.00

Farmers State Bank,

Mentone, Indiana.

Says WILL ROGERS

BEVERLY HILLS.—Well all I know is just what little I read in the papers. Somebody just sent me a clipping I see here and it says who has been left off and who added to the Social Register. Now that is a laugh aint it? (I would be dropped if I ever got on for saying "Aint"). Of all the undemocratic things you can think of just off hand, that is the prize "Hokey," a book to tell you who is a good Parlor Hound and who is a sort of a Mongrel around the tea table.

I see just off hand here that Polly Lauder, (a niece of Harry Lauders) who married Gene

Tunney has been dropped from the "Register." If she had married a Society Bootlegger she would have made the grade but when she married Gene, a man who had been a pretty fare type of Gentleman who's only fault in his profession was that he shook hands with you before knocking you Cuckoo, why they right away said that Polly didnt grade up to par. She had been negligent in picking a Mayflower weed, Tunneys name never had been in "Baloney sheet." But it had to tell in there who she had "promised to Love honor and break clean in the clinches with," so in that way it had to name Gene. So in a kind of a back alley way his name was in there, not intentionally but in there. So I guess that why they had to drop Pollys. They left her in there for one year to see if she wouldnt repent and come back to Cocktail cavalcade, but as she didnt why they just got themselves a great big eraser and she dropped in Social oblivion. And I bet that just about broke that girls heart. For here she had spent a lifetime picking out parents who were eligible, and now she had gone and flopped after working hard to make the grade, and here at the last minute flunk. Now what can she do, where can she go? Decent people wont have anything to do with her. Everybody will look at her and say, "Why thats Polly Lauder. She used to be somebody and was fine and social, but they dropped her right off the Book and here she is practically Destitute of all the other members of the great Fraternity of those who are somebody by grace of proper propagation, (and ordering enough books).

All of which gets us back to "What is Society and what is a Gentleman?" Well of course its easy to define a Gentleman, a gentleman is to my way of

thinking a man that can play golf and dont say so. But as there is so few in fact it has been discussed whether there is any at all.

Now as to "What is Society," Society is any band of folks that kinder throw in with each other, and mess around together for each others discomfort. Any little or big group of folks that sorter flock together are "Society" in some form or other. The ones with the more money have more to eat and drink at their affairs, and their clothes cost more, and so thats called "High Society." Now the morals or personal behavior of its Members have nothing to do with it. The oftener they crash the front page the solidier they are in their fraternity. And its sorter hereditary. No matter who you raise up in your family Zoo why they naturally inherit your space in the "Social Register." Your personal accomplishments have nothing to do with it.

So for downright amusement in reading matter that Register will compete with the Congressional Register and College Humor.

Kinder thought Mr. Coolidge would have to get round to criticism.

Its fine to just keep saying everything is great, but about the only way to prove it to people is for things to be great.

Even our old family doctor cant fool us. We are the one thats got the stomach ach and we know whether its hurting or not.

So Calvin hopped on the Farm Board in his "Sermonette." The poor farmer cant get a break. Just when it looked like he would be able to sell his land for real golf courses somebody invents golf that you can play in the kitchen sink.

Oklahoma and Texas have an original primary system.

They have so many seeking office that the first primary is only to find out how many are desirous of living off the State.

The second primary is to eliminate 50 per cent of these.

The third is to get rid of half of what is left.

The fourth is to eliminate any good man that might have crept in by mistake.

Now, you have just politicians, so the fifth one is to have in the two worst ones, and they run it off.

I do all kinds of well drilling and repairing and guarantee that you will be pleased with my service. Homer Saper, Phone 8 on 198, Akron. Sep. 10.

WORTH CONSIDERING.

In this issue will be found an advertisement of Golda Babcock's beauty shop. You will note that all instruments, combs, brushes, scissors, etc are thoroughly sterilized before using at this establishment which is a great safeguard when having work done of this nature. This beauty shop is fast building up a reputation for good work in ladies hair cutting, waving and facial treatments.

\$20,000 FIRE AT BOURBON.

Fire caused by defective wiring in an automobile destroyed a large garage at Bourbon at an early hour Thursday morning. Fire fighting equipment and men were sent over from Warsaw to aid the local department, but all that could be done was to save the adjoining buildings. All of the cars were safely removed except two that were not of much value. The loss is only partly covered by insurance.

WHEAT REPLACES CORN IN DAIRY RATION.

Purdue News Service

When the selling price of wheat drops to a low figure many inquiries are made concerning the relative feeding values of wheat and corn in the grain ration of dairy cows. Feeding trials conducted in the dairy herd at Purdue University have proven conclusively that wheat can replace corn, pound for pound, in the grain ration. In these trials 10 cows were fed for a period of 189 days by double reversal methods of feeding. Figures obtained show that cows fed a grain ration of 400 pounds ground corn, 200 pounds ground oats and 100 pounds oilmeal, produced 20,005.6 pounds of milk and 644.63 pounds of fat while cows fed a grain ration of 400 pounds ground wheat, 200 pounds ground oats and 100 pounds linseed oilmeal produced 19,938.9 pounds of milk and 653.38 pounds of fat.

Accurate records were kept of feed consumed and the body weights of the cows. It required 16.5 pounds of grain in addition to alfalfa, hay and silage to produce 100 pounds of milk when corn was included in the grain ration, and 16.8 pounds of grain to produce 100 pounds of milk when wheat was fed. With wheat and corn both selling at 70 cents per bushel the grain cost per 100 pounds of milk would be 33 cents when corn is fed and 31 cents when wheat is fed. The amount of milk produced per 100 pounds of dry matter in the entire ration was 119.6 pounds when corn was fed and 118.2 pounds when wheat was fed. This is due to the fact that the wheat rations contained approximately two percent more moisture than the corn ration.

When the price of wheat is low, wheat can replace corn in the grain ration. The feeding value of these two grains is practically the same when the grain ration is supplemented with legume hay and corn silage. Both wheat and corn should be ground to a medium degree of fineness, preferably slightly finer than cracked grain.

CELEBRATES BIRTHDAY.

Mrs. James A. Clark of near Burket celebrated her 74th, birthday Sunday. The following guests were: Mr. and Mrs. LeRoy Laudwing, Mr. Carl Taylor and Miss Evalyn Truex of Elkhart, Mr. and Mrs. Harland Railsback and daughter Murial of Plymouth, Mr. and Mrs. Joe Huffman and two daughters Wilma and Donabelle of Atwood, Mr. and Mrs. William Truex, Mr. and Mrs. Algia Truex and family all of Clunette and Mr. and Mrs. S. Ivester Clark and family.

Mr. and Mrs. Leon Kotterman and family will move Friday of this week to Culver.

Mrs. Henry Baugher spent Saturday night with Manley Dallas at Rochester.

Miss Winifred Swick spent Saturday night at the Harry Cooper home the guest of Blanche Yeazel.

Mr. and Mrs. Paul Myers and Mr. and Mrs. Verdie Brockey spent Sunday with friends in South Bend.

Mr. and Mrs. Charles Chambers of South Bend spent Saturday night with Mr. and Mrs. Verdie Brockey.

Mr. and Mrs. Oliver Davis and son Dale of Hammond spent Friday evening with Mr. and Mrs. Philip Bryant.

Mr. and Mrs. Leon Kotterman and family spent Monday and Tuesday with her parents, Mr. and Mrs. C. D. Clingaman, near Gilead.

The Misses Geraldine Haimbaugh, Dorothy Horn, and Messrs., Delbert Hunter and Von Kochenderfer spent Sunday evening at Plymouth.

Mr. and Mrs. Oliver Davis and son Dale of Hammond were Thursday and Friday guests of Mr. and Mrs. Peter Horn and family.

Mrs. Della Glover and daughter Winifred of Van Wert Ohio were Wednesday night and Thursday visitors of Mr. and Mrs. Peter Horn.

The class of '30 of Talma High School will hold a picnic August 24th at the East side of the Colonial Hotel Lake Manitou. All members are urged to be present with dinner which will be served at the noon hour.

The members of the cooking class of the girls 4H Club with their leader, Mrs. Paul Myers met at the Talma School building and held an all day meeting. Chicken dinner was prepared and served by the girls after which they joined the Sewing club in the regular meeting. After the lessons games were enjoyed and refreshments served.

In honor of the eighteenth birthday of John McGowen, several of his school mates gathered at the home of his parents, Mr. and Mrs. Melbourne McGowen, Wednesday evening and surprised him. Games were enjoyed and refreshments of ice cream and cake were served.

The monthly meeting of the New-castle Twp., Farm Bureau will be held Wednesday evening August 20, at the Talma School building. The committee in charge of the program is Mrs. Elmer Rathfon, Chairman, Mrs. Silas Meredith and Mrs. Earl Zent.

Dorothy Horn entertained at her home Saturday evening the following guests: Misses Geraldine Haimbaugh, Beulah Busenburg, Mary Barkman, Winifred Swick, Blanche Yeazel, Doris Adamson, and Messrs. Delbert Hunter, Howard Horn, Edward Miller, Homer Graff, Von Kochenderfer. Games were played and light refreshments were served.

—WANTED— Second Hand Range Cook Stove. Good baker.

Frank Laird.

A GOOD ATTENDANCE

In spite of the storm early last Saturday evening a goodly number of people attended the ice cream social served by the 4H Club Girls and sponsored by the Home Economics Club.

The M. E. Church lawn being too wet for comfortable quarters, the basement of the church was used instead.

The committee in charge wishes to thank everyone who so kindly helped in carrying out the plans for the evening, and particularly the M. E. Church trustees and congregation for the use of their church basement and its furnishings.

Fine Days Predominate

If you count up the sunny and cloudy days in a complete year, you will find that the fine day has come more often.—Ovid.

"Then,"

said MRS. MOLLA PROPP,

"Henry put a new gear ratio on the engine."

DRIVING through rail fences and things, my dear, is so very upsetting. For once I took Henry for a ride, as the saying goes, and to grace the occasion, I put posies in the glass bowl that hangs to one side and wore my best hat.

Henry never noticed the posies nor my new hat. Men are THAT way, and I was waiting for him to say something, but instead of even asking where I got the hat and how much I paid, Henry twiddled his thumbs a bit and went to sleep.

Was I mad? Anyway, the road was one of those smooth roads built by McAdam . . . I think that's his name. And I got to

looking this way and that, and then I looked into the mirror that you look into to see if any officers were chasing you. Well, there we were, sitting out in somebody's pasture with fourteen rods of rail fence wrapped around the car. It all happened so suddenly that after we stopped I was still looking into the mirror and wondering if my hat was on straight. It wasn't, my dear. It was hanging over one ear, and Henry hit the ceiling and let out a yell you could hear a mile and there was a pig hanging onto the front and squealing as if he were DEAD.

"Well," I said to Henry, "That's what you get for going to sleep!"

Copyright, 1930—John Jensen.

Poultry oints..

Readers interested in poultry raising will find much of interest and value in the poultry material printed in these columns. It is all from authoritative sources, much of it from the United States Department of Agriculture, and can be relied upon as practical information. You can safely quote it when discussing any phase of poultry raising with your friends and neighbors.

Be Your Age

All of us realize that we can be forty in years but only thirty in health. Likewise we can be forty in years and only thirty in money.—Woman's Home Companion.

IF YOU MET WITH A SEVERE ACCIDENT.

Was Laid up in a Hospital or Home Could You Pay Your Expenses for One Cent a Day?

IT CAN BE DONE.

Pay us \$3.65 or at the rate of a penny a day for a whole year, and in return should you at any hour of the day or night during the year be riding as a passenger on a railroad train, steam boat, street car, elevated or subway car and by the wrecking of that vehicle you become injured, we will pay you at the rate of \$100 per month for one day of more for a period of a year's time. Should you be killed we will pay to your estate \$5,000.00 and in event you are permanently disabled by the loss of one or more limbs or the sight of an eye or eyes, we will pay you from \$1,500.00 to \$5,000.00 depending upon the extent of your disability.

Suppose you should become injured from the wrecking of your automobile, or while riding in your friend's car. Suppose you are riding in a taxi cab, motor bus, or elevator, and through the wrecking of that vehicle if you should be injured we would pay you at the rate of \$100.00 a month, and if killed your estate would receive \$1,000.00; also for loss of sight, or limbs from \$500.00 to \$1,000.00.

That's Not All—This same indemnity would come to you for injuries received as a result of being struck by lightning, injured in a tornado, by being burned or suffocated by smoke in the burning of a church, school building, theater, store office building or lodge room. Should you drown while bathing at a bathing beach your estate would receive \$1,000.00.

Furthermore—Suppose you were struck, knocked down or run over while walking or standing on a public highway. Suppose you were injured while driving a truck, wagon or buggy, and if you are a farmer, suppose you were injured while operating a threshing, mowing or heading machine, a binder, harrow, plow or tractor, we would pay you for one day or more of disability at the rate of \$50.00 a month; and if killed your estate would draw \$500.00.

This 1c Day Will Also—entitle you to a \$10.00 medical or surgical attention for any of the fore-going injuries that does not totally disable you, and if you are injured in any accident, any place, any time and are laid up for a month you will receive \$25.00.

A real honest to goodness accident

policy that covers the pedestrian as well as the traveler. Just think, all this for only 1c a day.

AMERICAN BENEFIT LIFE ASSOCIATION

Applications taken at Farm News Office.

DO NOT TAKE ANY CHANCES

Cleaning clothing with naphtha, gasoline etc., is very dangerous, regardless of the fact of whether you may have any fire around or not. The rubbing of the cloth can ignite the fluid, and the result is a bad burn or possibly death. Play safe use "Spot Fyter" which is non-explosive. It will clean most anything in a jiffy. Costs only 50c per bottle at Clark's Store.

HOW TO LIVE LONGER

By John Clarence Funk, A.M., Sc.D.

Director of Public Health Education,
State of Pennsylvania

Procrastination

PROCRASTINATION is not only the thief of time but it is also frequently the thief of health. In living one always has more time, but it often happens that with health gone there is no more of that to be obtained. Which makes matters bad, indeed.

Consider, for instance, that old and powerful scourge tuberculosis. It is the physician's usual experience that the majority of those who seek his advice upon the suspicion that they may have lung trouble are suffering with an advanced condition when they first turn up.

Tuberculosis is an enemy seriously to be reckoned with no matter what the stage may be. Nevertheless if promptly discovered and subjected to proper treatment it often can be readily controlled permanently arrested and in many other cases absolutely cured. The fact remains however that this great devitalizer of human life is still among the leading killers. And delayed discovery is to blame.

Like other slayers tuberculosis can be, and unfortunately is, most stealthy in its approach. On the other hand, there are always warning signs apparently unimportant though they may appear to be. Here they are:

1. Easy tiring.
2. A persistent cough.
3. Continued loss of weight.

The presence of any one of these, singly or in combination, is ample reason to seek medical counsel at once. True, any or all of these conditions may be present and there will yet be a negative diagnosis for tuberculosis. But such a serious possibility should not be dallied with even for a day. Procrastination may be suicide. So, up and doing! Save a life—especially your own.

COTTONSEED MEAL FATTENING FEED

May Be Used to Good Advantage to Finish Pigs.

While too much cottonseed meal is injurious when fed to hogs, recent experiments have shown that it may be used to advantage in fattening pigs. "The pigs in these experiments were fed in dry lots for periods ranging from 55 to 84 days with an average daily consumption of from one-third to one-half pound of cottonseed meal," says E. H. Hostetler, chief of swine investigations at North Carolina State college, "with none of them showing any evidence of cottonseed meal poisoning. In another trial with soy-bean pasture added to the ration of cottonseed meal, shelled corn and mineral, the pigs were fed three-fourths of a pound daily for a period of 90 days without any injurious effects."

Greater gains at less cost were also made when cottonseed meal was added to the ration, states Mr. Hostetler. Equal parts of fish meal and cotton seed meal were mixed and fed free choice with shelled corn and mineral. In the five trials conducted in this experiment the pigs made more rapid gain at less cost than where fish meal alone was used as the protein supplement.

"The relatively low price of cottonseed meal as compared with other high protein feeds is of much importance to hog raisers in the state," says Mr. Hostetler, "and farmers can safely add this supplement to the fattening ration."

Similar experiments have been conducted at the experiment station in Texas and have shown the same results, states Mr. Hostetler.

Young Lambs Suffering With Sore Eyes Aided

Sometimes young lambs suffer with sore eyes. If the trouble is caused by the eyelashes being turned in, a stitch or two with a needle and white thread will hold the eyelids open, and in a day or two the trouble will be over. If the sore eyes are caused by infection, a few drops of one per cent solution of silver nitrate, administered with a medicine dropper in the eye, will usually clear up the difficulty.

Beginners are frequently over-anxious to assist a ewe in lambing. It is better to let the ewe take her time in a natural way. If the ewe has labored unsuccessfully for an hour, an examination should be made, and if the lamb is not in a normal position with nose and front feet foremost, the lamb should be straightened out.

Have Everything Ready Before Lambs Arrive

It is a good plan to have everything in readiness several days before the ewes are expected to start lambing, for, while the average gestation period for ewes is about 148 days, frequently the lambs arrive three or four days earlier. First of all, have the ewes in readiness by being thoroughly tagged out, both between the hind legs and also the wool around the teats. This will enable the young lamb to find its first meal much more readily, and, furthermore, if the tagging is done before the lamb comes, the wool is clean and dry, whereas it is wet and soiled after lambing.

Live Stock Items

Cattle given free access to corn silage and alfalfa will balance their own rations.

A hog that is "off feed" will not make first class pork if butchered in that condition.

Death losses amount to larger proportions in pigs than in any other young stock on the farm.

Don't allow your breeding animals to become so thin that you have to apologize for their condition.

Horses and mules on farms in the United States have declined steadily from a total of over 25,000,000 in 1920 to 19,000,000 on January 1, 1930, or 24 per cent.

The number of dead and weak pigs can be largely eliminated by giving the sows suitable quarters and feeding them a well balanced ration during gestation. Exercise, too, is an important part of the management of pregnant sows.

Pigs running on pasture make greater gains from the same amount of feed than they do in the dry lot.

Pigs on pasture are healthier, and the risk of loss from disease is lessened. Worm infestation may be controlled much easier on pasture than in the dry lot.

Pasture for hogs furnishes about one-half the amount of protein necessary to balance the grain ration, hence less tankage or skim milk is needed when hogs are on pasture.

Yellow Songsters

Both male and female canaries sing. The male bird has, perhaps, the sweetest song.

THE TELEPHONE COMPANY REPAIRS THEIR BUILDING.

During the past week a workman has been repairing the \$14,000.00 telephone building on East Main St., by removing and rebuilding the facings on the supporting columns that had fallen out and were about to fall out. We are not positive whether their repairs will strengthen the structure or not; but it is our opinion that they have just veneered over the real danger signals.

DAIRY FACTS

COWS ON PASTURE NEED GRAIN ALSO

Cornell Station Advocates Liberal Ration for Herd.

E. S. Harrison, who is supervising the protein feeding experiment at the Cornell university agricultural experiment station, says that cows on pasture demand liberal grain feeding.

He assumes that if the pasture were ideal and the cow could get and eat all the grass she wanted she could not produce up to capacity on the nutrients she could digest from the pasture. In other words, he says, even under ideal conditions of pasture it is necessary to feed grain to heavy producing animals.

But on the typical dairy farm, he says, pastures are not ideal, particularly in a dry season, and a cow can gather only a relatively small part of the grass she needs. On many of the short, side-hill pastures in New York it takes a lot of real work on the part of a cow to collect what grass is there. This uses up energy which otherwise could go into milk production. In addition, hot weather and the annoyance of flies add to the cow's troubles and subtract from her power to make milk, and this means that dairymen should feed grain during the summer at about the same rate as in winter.

Summer silage, or a silage crop will make up for the loss of succulence in dried pasture, or even hay should be added to the ration; but the main point, Mr. Harrison says, is to feed grain during the short pasture season, and it will actually pay more profit than any grain fed at any time of the year. Not only does it help to maintain the milk flow during the summer, but it will prevent the loss of flesh by the cows, and they will go into the barn in the fall able to respond to good feeding and fully capable of giving their best returns in money to their owners.

Plan for Keeping Flies Out of Dairy Stables

Windows in the University of Nebraska dairy barn have been painted blue. This is not to please the cows' sense of beauty but to help fill the milk pails. Covering the glass openings with blue alabastine keeps the barn darker, thus making it cooler and freer from flies.

Shutting out part of the light from barns, stalls, and sheds has been satisfactory in relieving farm animals from some of the worry caused by flies, farmers declare. Openings can also be covered with burlap to a considerable advantage. Windows in the

university dairy barn are so arranged as to open for ventilation without admitting direct sunlight. The blue paint with which they have been coated is easily removed and will be taken off after the summer is over.

Soy Bean Hay Excellent Feed for All Milk Cows

Soy bean hay makes very excellent feed for milk cows when properly grown and cured. The best quality of hay will be made if the beans are sown in rows about thirty or thirty-six inches apart. It will require two or three pecks of seed per acre. The beans should be one or two inches apart in the row. When sown in this way, enough cultivation must be given to keep the weeds down.

They should be cut for hay when the first leaves begin to turn yellow. The hay may be cut with the mower and the crop handled the same as alfalfa would be handled. It is best to put it in small windrows with a side-delivery rake as soon as the plants are slightly wilted. From these they may go into small cocks for further curing and from that point on handled as alfalfa hay would be handled.

Dairy Facts

Calves do best when confined fairly closely.

Calves must be kept comfortable, have plenty of sleep, and full feeding of whole milk to make rapid growth.

It is important to select a sire from a great dam if possible. No great sire has been produced by a mediocre cow.

Cows usually test highest in butter fat content of milk shortly after freshening. The test normally drops for six or eight months with a considerable rise towards the close of the lactation period.

HOME ECONOMICS CLUB MEETING.

A very pleasant Home Economics Club meeting was enjoyed with Mrs. Kenneth Riner as hostess at her home on West Main St., Tues., p. m. August 5th.

Some interesting garden hints and dog-day beliefs and truths were discussed. After adjournment the Club visited some of the gardens entered in the "yard and garden" contest, and found them in fine shape considering the unfavorable growing weather of the past few weeks.

The next meeting will be held on Sept., 2nd.

Courage That Sticks

The most difficult courage of all is not the two o'clock in the morning courage we have heard so much about; it is the courage that will see a thing through.—David Lloyd George

MENTONE NEWS ITEMS.

The Bybee reunion will be held at Warsaw City Park, August 17th.

Miss Thelma Harris of Warsaw spent the past week in Mentone.

Mrs. Dove Kercher and family spent Wednesday afternoon with Mrs. Byron Linn.

Mr. L. M. Fife and Floyd Halterman made a business trip to Oswego last Wednesday.

The McCleary reunion will be held at the Warsaw City Park at Warsaw August 17th, 1930.

Ethel Borton and Wanda Heighyay are spending a few days with Mrs. Lucinda Black, their grandmother,

Mrs. Adam Aumsbaugh of Cromwell Indiana, spent Saturday with her granddaughter, Mrs. L. M. Fife.

Mr. and Mrs. Harley Bunner and daughter of Toledo Ohio spent last week with Mr. and Mrs. D. L. Bunner and son Don.

Mrs. Kyler and Mrs. Cyrus Shobe of Rochester and Mrs. Alice Perschbacher called on Mrs. Lucinda Black last Tuesday afternoon.

Mr. McKee, Florence Crain and John Crain of Ashley, Indiana spent the past week with Mr. and Mrs. Charles Emmons and family.

Mr. and Mrs. L. L. Latimer entertained at a six o'clock supper Thursday Mr. and Mrs. M. M. Latimer, Miss Greta Latimer and Mrs. Roy Smith and son Stanley of Warsaw.

Mrs. Alice Perschbacher entertained the following guests on last Tuesday, Mrs. Anna Kiler and daughter Maleta and Mrs. C. D. Shobe of Rochester and grand-daughter, Miss Artella Kesler.

Mrs. O. N. Igo and daughter Lillian, Mrs. Lena Igo and sons, Mrs. Nellie Heighuay and daughters, Ethel Borton and Mrs. Icie Taylor and family called on Lucinda Black Wednesday afternoon.

Mr. and Mrs. Miner Mollenhour, Mrs. Emma Blue and son William were at Payne Ohio, Tuesday attending the funeral of Mrs. Ethel Baughman. She was formerly Miss Ethel Mollenhour, daughter of Mr. and Mrs. Marion Mollenhour of Mentone.

Mr. and Mrs. Charles Emmons, Miss Clara Bell Brugh, Mr. and Mrs. Philip Whetstone and family, Mr. Kee Miss Florence Crain, and John Crain of Ashley Indian, were entertained last Wednesday evening to an ice cream supper at the home of Mr. and Mrs. Clyde Brugh.

Task, Task!

The greatest labor-saving device yet invented is the fishpore.—Pathfinder Magazine.

FATAL AUTO ACCIDENT.

Two Young Men Lose Their Lives in Accident Near Oswego—Excessive Speed Probably the Cause.

Robert Walburn, 20 of Muncie, and Paul Easton, of Chicago, met death as a result of an auto accident which occurred east of Oswego about ten o'clock Wednesday night of last week when the Ford which they were driving at a very high speed turned turtle. Both men were rushed to a hospital at Warsaw where they died a few hours later. A 16 year old sister of Walburn who was also in the car escaped with a few bruises.

ALWAYS NEAT AND ATTRACTIVE.

The large window at the Jefferies furniture store is one of the best dressed show windows in town. Its mammoth size and the fact that Mr. Snyder is a crank on show window dressing, makes it one window in the village that people never get tired looking at. Perhaps the fact that this firm handles a very exceptionally fine line of furniture also has something to do with the attractiveness of the window.

FIRE FIGHTERS CALLED TO THE MARS TUCKER FARM.

Early Thursday morning of last week the fire truck was called to the Mars Tucker farm south of town on account of the burning of a straw stack. It is supposed that lightning set the stack afire during the early morning hours and that it had been burning for some time when discovered. Aside from the loss of the straw no other damage was done.

LIGHTNING STRIKES LARGE BARN.

The large barn on the Fribley farm North East of Etna Green was struck by lightning Wednesday night and completely destroyed by the fire that ensued. There was but little grain in the barn at the time and no live stock. The property was covered by insurance.

A VERY BUSY PLACE.

The extremely hot weather during the past two weeks has caused the people to flock to the soda fountains, and Shafer Goodwin at the Big Drug Store have been the busiest people in town. With their modern equipment to serve the people, they surely have built up a big trade in this line.

Farmers Who Are Interested in Better Eggs and Who Are Interested Enough to Help Themselves as Well as Us.

It goes without saying, that we have done more for the farmers in the way of egg price than any other buyer in Indiana, and have done more hard work to try to get a "Mark" on Indiana eggs than any other firm in New York City. We are working our heads off now trying to help you get more for eggs. Now, won't you please listen and try to follow our advice. We are not hoggish and don't ask all of this simply for our own benefit, but what helps us, sure will help you.

Now please try and adhere to the following advice for one year and see the results:

Get a good strain of straight blood poultry that lays a good sized egg (either white or deep brown) there is no difference in price now, and the general average price is about the same for equal quality eggs (size and cleanliness considered.)

Pick up your eggs every morning and evening, and carry a damp cloth with you, cleaning all traces of dirt off before it hardens and sticks to the shell.

DON'T WASH THEM,

But simply wipe them with a damp cloth and don't leave them streaked with dirt but clean them. Keep them in the coolest place about the house never allowing rain nor sun to touch them.

Use all ill-shaped eggs at home because they are broken in shipping. Market your eggs at equal intervals twice each week—that is, we would like to have them each Monday and Thursday or each Tuesday and Friday, rain or shine.

Keep every egg that you are not sure of being strictly fresh at home or ship them separately, as we don't want to spoil a case of nice eggs with a few of doubtful character, and you can't afford to sell such eggs, as it hurts you as bad as it does us, for we have to buy eggs on a basis of what we get for them, and if you slip in a few bad eggs on us, it only hurts our sales, and causes us to have to lower our price, so you see the fresher we get the eggs the more we get, and the more we can pay you. Never keep roosters with your hens after June 1.

Watch the size of your eggs and when they begin to run small, then feed them some good laying mash with a little Cod-liver oil in it or some soaked oats with a little Cod-liver oil in it or anything to keep the egg size up to not less than 23 ounces per dozen or over.

Now please try and follow this advice and let's work together and put our eggs in a class with California, Washington and Utah. The Pacific coast states ship eggs to New York City, and get from 3 to 10 cents more than your eggs bring, and it is because they ship fresh, clean, good-sized eggs graded up to a standard, which you can do if you will work as they work. Now if you will work as hard as we are, trying to put good eggs on the map, then we will show the market that Indiana has just as good eggs as any state in the union. We will do our best and now it's up to you who sell us eggs, to work as hard as we do.

Yours for Better Eggs.

Quality Butter & Egg Company

LIGHTNING STRIKES AERIAL.

During the electrical storm on Tuesday evening of last week four people were knocked unconscious for a few minutes when lightning struck the radio aerial at the home of Mr. and Mrs. Everett Maggart at Silver Lake. They together with two neighbors were sitting in the living room listening to the radio, when the bolt came in on the wire, knocking the plug from the set, splintering the cabinet and tearing off the wall paper. Aside from a shock and severe scare no one was injured.

Analyzing ...YOU...

With the New Science of Syllables
By C. J. COFFMAN
Dean of All the Enumerators

Lydia

"Lydia, a woman of Scripture.
A seller of purple, they say,
Will still live in you. For things that
you do
Will help you wear purple today."

Lydia may not always be famous,
nor always "wear purple." But she
has a very good
chance of it. Bear
in mind, however,
that your name
alone will never do
this for you.

The Wide Eyes
of Lydia.

The thing that
will raise you to
higher levels is the USE of the powers
in you that are indicated by the
word Lydia.

With the ancient scholars the LYD
of your name signified the ability to
conquer time. It indicated meditation
and thoughtfulness. These are shown
in your wide-set eyes and gentle face.

The LA of your name really has two
meanings. It indicates Jehovah, and
it also indicates a beautiful island covered
with timber. It is possible that
it was used to designate the blessing
of Jehovah upon such a fruitful land.

Most of the Lydias who have become
famous have been serious people
whose fame did not depend so
much upon art as it did study and application.

Among these was Lydia Bates, a
one-time famous writer of old religious
songs. One of the first of the women
physicians was Lydia Fowler.

Still earlier in our history we have
Lydia Darrow, that courageous woman
who slipped out of Philadelphia to
warn Washington of an impending attack
by General Howe of the British forces.

Probably the first recorded use of
your name as designating a person is
that concerning Lydia, the seller of
purple, converted by St. Paul the missionary.

Your name carries with it the possibility
of wealth, luxury and music.
Let these be your blessing.

POULTRY

WATCH AMOUNT OF FEED PULLETS EAT

Drop in Mash and Grain
Used May Bring Slump.

A coming slump in egg laying of
early hatched pullets can be detected
by watching the amount of feed consumed,
warns the poultry department
at Cornell university.

A flock of 100 leghorn pullets laying
50 per cent must eat from 24 to 25
pounds of grain and mash daily. A
decline of only two pounds of feed
from the necessary amount that
should be eaten by one hundred birds
is enough to cause a falling off of egg
production.

The feeder's problem is to have the
flock eat the required amount daily.
For various reasons, some difficult to
determine, the birds may refuse to
eat what they should. At the same
time they become increasingly inactive.
If the slump continues, a partial
molt may result. Such conditions
may start as the result of changes in
feeds and feeding and general management,
outbreaks of disease, poor ventilation,
or poor breeding, but probably most
frequently from violent changes in the weather.

It is best to try to check the slump
before it has progressed far. If, however,
the birds have dropped off in production,
the next best thing is to bring them
out of it as quickly as possible. In either
case there are several practices that may
prove helpful at this season.

Increase the hours of artificial illumination,
if necessary, so that the birds have a
14-hour day. Feed cod liver oil, mixing
a pint in each 100 pounds of dry mash
or 1 ounce daily in the scratch grain or in
the wet mash for 50 hens. Feed a wet mash
composed of the regular dry mash
moistened with skim milk or water,
preferably just before the night feeding
of grain. Continue to keep the dry mash
before the birds. Liquid skim milk is
advised even though there is powdered milk
in the mash. The revised Cornell mash
formula calls for 50 pounds of dried skimmed
milk or buttermilk in every 500 pounds of
the mixture.

Art More Than a Luxury

If you regard art as a luxury, what
a queer, drab world you are building
up for yourselves and posterity!—
Lawrence Haward.

POULTRY FACTS

POULTRY REQUIRE MINERALS IN FEED

Ohio Specialist Says They Serve Only One Function.

Minerals are as essential in the poultry ration as proteins, or carbohydrates, or any of the vitamins, but they will only serve the functions for which nature intended them and will not take the place of any of the other necessary parts of the ration, Dr. R. W. Bethke of the Ohio agricultural experiment station told a farm and home week audience at Cornell university.

Doctor Bethke said that mineral feeding may be overdone, and that the poultrymen should use discretion and common sense in making up their poultry ration. He warned poultry men not to take stock in the claims of salesmen that minerals would take the place of such things as vitamins or meat scrap in their ration.

Although the different minerals showed different degrees of availability in the chemistry laboratory they did not show differences in the growth of the chicks, Doctor Bethke said. Egg shell formation seems to be best when the minerals are fed in the carbonate form, he stated.

Doctor Bethke seriously questioned whether there is any difference in the results produced from feeding so-called "organic" or "inorganic" minerals. He says that the question of whether they are "organic" or "inorganic" depends on the individual point of view.

Too little mineral matter in the ration results in leg weakness or rickets in the growing chick which cannot be overcome by cod liver oil or sunlight.

Meat scrap and milk contain large quantities of calcium and phosphorus so when these are included in the ration the supply of minerals from other sources need not be as great as when most of the ration is made up of grains. Doctor Bethke said that grain and protein supplements contain enough of the essential mineral elements, except calcium and phosphorus, so that they need not be provided for separately in the hen's ration.

Red Mites Lower Egg Output During Summer

Get after the red mites in the hen-house now before they cause a drop in egg production. Before the poultry mites become too numerous is the time to treat the roosts and other parts of the house, advises Miss Cora Cooke, extension poultry specialist, University farm, St. Paul, Minn.

Hot weather is most favorable to the reproduction of the mites and they multiply very rapidly, soon causing a falling off in egg production, Miss Cooke says.

These mites are much more harmful than the lice which live on the body of the hen all the time. The mite is a small spider-like creature which lives during the day in cracks and crevices about the perches and nests and comes out at night to feed on the blood of the fowls.

Geese Should Be Mated in Fall if Possible

From one to four geese to one gander is the range in mating geese. Some ganders refuse to take more than one mate and will remain so mated for life; others will accept two or more if they have no other mates. Two ganders might or might not be enough for eight geese, depending on the temperament of the individuals selected.

Geese should be mated in the fall if possible. Often they will refuse to accept new mates for months after being introduced. Rather than chance that buy eggs for hatching and thus get the pure-bred birds at one stroke. If you do not care to hatch goslings before April or May, buying ganders at this time might prove satisfactory. It all depends on how the birds take to their new surroundings.

Danger in Green Corn

Feeding green corn to chickens may cause trouble and the farmer will do well to proceed with caution in introducing green corn in the ration. To overdo, the green corn may set up digestive disorders, and diarrhea always results in a setback. This does not mean that new corn should not be used.

It will be advisable to start in gradually and increase the amount fed as long as the hens appear to be free from digestive disorders.

Separate Cockerels

It will pay to separate young cockerels from the pullets when eight to ten weeks of age. It will give the pullets a chance for better development, one can force the cockerels for market, and save time and labor if the chicks are hopper fed after five weeks old. Put the grain and mash hoppers out on the range to induce a maximum of exercise. This keeps the chicks out in the sunshine which will promote vigor and vitality essential to the young stock.

Childish Fears

Children are born afraid of only two things—loud sounds and falling.

Human Teeth

There are no bicuspids in the first set of teeth. The first temporary molars—premolars as they are usually called—generally appear by the end of the first year. The second premolars appear about the third year. There are 20 deciduous or baby teeth.

BENEFITS THAT KONJOLA BRINGS COME TO STAY

Indianapolis Lady Who Took
Master Medicine Three Years
Ago Is Still Enjoying
Good Health

MRS. NINA CARTER

"Failing health had almost deprived me of my opportunities as a Sales-lady," said Mrs. Nina Carter, 18 North Highland avenue, Indianapolis. "For a number of years I was troubled with indigestion, kidney trouble and nervousness. I also had terrible pains of neuritis in my shoulders and arms. Food fermented in my stomach causing gas and pains. Kidney weakness forced me to get up several times during the night, (and many nights I could not sleep at all because I was so nervous. My complexion was bad, and I had headache and dizzy spells.

"That was my condition three years ago before I found Konjola. I took a full treatment and it surely worked wonders. It conquered all my ills. My appetite increased, digestion improved, and then neuritis pains vanished. I have not taken Konjola nor any other medicine during the past three years, and I am still blessed with perfect health."

Konjola is not designed for mere temporary relief. It goes to the source of the ailment and six or eight bottles brings amazing results.

Konjola is sold in Mentone Ind., at the Shafer & Goodwin drug store and by all the best druggists in all towns throughout this entire section.

JUST THINKIN'

by Charles S. Kinnison.

Youthful Heart

As years move on, and bit by bit,
I near the day when I must quit,
The soft, relentless hand of Time,
At last will steal away my prime.

My legs and arms, now quick and spry,
Will shrink and wither bye and bye—
My eyes that now are bright and clear
The fog of years will slowly blear.

The gentle sounds, once clear and sweet,
Upon my ears, unheard will beat.
Thus, bit by bit, my life will fade,
But let it be—I'm not afraid!

And tho my body older grows,
As earthly portals slowly close,
And youth and strength at last depart,
I'll still, I hope, be young at heart!

(© 1930, Western Newspaper Union.)

THE INDIANAPOLIS WHEAT MEETING.

(The following editorial taken from the Indiana Farmers Guide expresses the exact views of the Farm News.)

Farmers, agricultural representatives and other interested grain men who came to Indianapolis, August 1, to hear Alexander Legge, of the Federal Farm Board, explain his wheat reduction program were disappointed and peeved because they were barred from the meeting. And indeed they had a right to be. For days and weeks prior to the meeting, the event was heralded through the daily press giving the impression that here would be an opportunity for the farmers of the Central States to learn what the federal board wants them to do to assist in

raising wheat prices. Certainly, if the speakers were to plan a campaign for acreage reduction, the farmers should have the privilege of sitting in on a conference of such importance to them. As a matter of fact, only government employees were admitted to the meeting. It appeared to be a case where the hired men gave the bosses the gate.

To date there has been a widespread loyalty to the farm board and an almost universal desire upon the part of the farmers to co-operate with all the attempts to better prices and perfect marketing methods, and even to adjust production to the needs of demand. But when farmers travel from 10 to 300 miles to learn how they can co-operate in a more effective way and then are turned away from the meeting, you can hardly expect them to give their entire confidence and support in the future.

It is said that the whole affair was due to a misunderstanding. Mr. Legge says that he had nothing to do with the arrangements for the meeting but was present solely to explain the board's plan. In any case, it was an ill-advised procedure on the part of those who sponsored the affair. Probably few things have been done so far that have injured the board's farm relief efforts more than this public meeting behind closed doors. It certainly did not add confidence or support upon the part of the farmers.

As might be expected, the farm and newspaper representatives soon learned what was going on inside. In fact, Mr. Legge later appeared and talked to a few newspaper men and farmers, and a prepared statement was given out to the press. The meeting was called by the United State Department of Agriculture and those attending were extension workers, economists and such like from the surrounding states. Delegates were present from Indiana, Ohio, Michigan, Kentucky, Illinois and Missouri.

Figures were given showing the wheat surpluses in the world and the campaign for acreage reduction was explained. No formal program was outlined and the matter was left in the hands of the extension workers and farm organizations of the different states. It is possible, though not likely, that an aggressive campaign will be put on in Indiana to get the farmers of the state to sow less wheat this fall.

The wheat situation in Indiana and the general feeling of the farmers are not difficult to analyze. Our state wheat reduction program seems to have been in progress for the last 25 years. Figures to show this were presented at the meeting by Purdue authorities. It is hard for Indiana farmers to make much money out of wheat at the average prices paid, and the price outlook for the future is not encouraging. Under the circumstances, individual farmers may be depended upon to use common sense in their wheat seedings this fall, considering rotation, prices and personal matters of farm management. The figures and facts will be presented to them, but it is probable that there will not be a "drive" to secure pledges for a universal reduction program.

As a suggestion from "One Who Was Barred," we can not resist mentioning that one of the best ways to get the farmers to cut down their wheat acreage is to point out a more profitable crop that can be grown instead.

JOHNE'S DISEASE IN CATTLE HERDS

Infection Exists to Some Degree in Every State

(Prepared by the United States Department of Agriculture.)

The presence of Johne's disease in cattle herds in many sections of the United States, as determined by state and federal veterinarians, gives rise to the belief that the infection exists to some degree in virtually every state. This disease (pronounced "jonez," accent on first syllable, a long "o" and short "e"), also known as paratuberculosis, is an incurable, infectious, bacterial dysentery which affects cattle principally, but may also affect horses, sheep, deer, and goats. Its seriousness, whenever it occurs among cattle, is such that reactors to the Johnin test are slaughtered and indemnities paid. The infection, which is thought to have been introduced into the United States originally in shipments of cattle from Europe, is more fully described in Circular 104-C, "Johne's Disease (Paratuberculosis) of Livestock," just issued by the bureau of animal industry, United States Department of Agriculture.

The first symptoms of Johne's disease are a temporary loss of appetite, and, in cows, a radical diminution of the milk flow. Intermittent diarrhea which fails to respond to medicinal treatment usually follows. The coat becomes rough and the animal looks unthrifty. The appetite may be regained after the first few days and may remain normal. Affected animals may drink large quantities of water. In the last stages of the disease the animal becomes greatly emaciated and dies as a result of exhaustion.

The disease is spread from herd to herd by the introduction of diseased animals, by allowing healthy stock to graze with diseased stock on community pastures, and by permitting animals to drink from contaminated brooks. It is spread within a herd by bacteria which are expelled from a diseased animal and contaminate feed or water.

Although there is no satisfactory treatment known for Johne's disease, temporary relief is sometimes obtained by restricting the feed and placing the animal on a dry ration. Isolate suspected animals until a diagnosis can be made. Cures are not to be expected. The diagnostic test consists of an injection, into the jugular vein, of a biological product known as Johnin.

Indemnity funds have been available since July 1, 1927, when Congress granted to the bureau of animal industry authority to pay indemnities to cattle owners for animals slaughtered

because of reaction to the Johnin test. These payments are made on the same basis as are indemnities paid on tuberculous cattle. Further details concerning the payment of indemnity may be obtained by writing to state livestock officials, or to the bureau of animal industry, United States Department of Agriculture, Washington, D. C.

Easy Access to Water Beneficial to Swine

It has been demonstrated many times by experiment stations as well as by thousands of producers that hogs do better and make larger gains from a given amount of feed when they have constant access to water. Normally a hog drinks only small quantities at a time, but it likes to drink often. It will drink several times during one feeding period when it can run to a self-feeder at will. When the feed is thrown on the ground or on a feeding floor where the individual hog must eat in competition with a large group it is not likely to stop for water so long as there is grain to eat. But when it can run to a self-feeder it soon learns that there will be plenty of feed left when it returns. Then it begins to eat more deliberately and to drink several times before it has satisfied its hunger.

Weed Eradication Plan Being Helped by Sheep

Sheep and sweet clover are being used by Cass county (North Dakota) farmers in a weed eradication campaign. Sweet clover is used to smother sow thistles and sheep are turned on the land to pasture both weeds and sweet clover. The sheep seem to like sow thistles in preference to clover.

Last year farmers imported 3,000 ewes to be used in the campaign and seeded 25,000 acres of sweet clover and 20,000 acres of alfalfa. The lamb crop was about 90 per cent which with the wool about paid for the ewes.

Plenty of Shade

Hogs need plenty of shade in warm weather. If hog houses are dry and have plenty of ventilation they may be used. If not, hogs should be locked out. A hog will find shade if he can, but if the shade is not cool he does not seem to realize it, and will stay and die from overheating. If trees are not available, artificial shade should be provided by covering a cheap framework with brush, hay or straw. It is cooler than if covered with boards or sheet iron.

Water in the Diet

About 60 per cent of the average diet is water. The body itself is made up of about three-fourths water and one-fourth solid matter.

"Do It Now"

Bethink thee of something thou oughtest to do, and go and do it, if it be but the sweeping of a room, or the preparation of a meal, or a visit to a friend.—George MacDonald.

You Are Not Saving Money

By using cheap paint. While the cost per gallon is somewhat higher the cheap brands do not require thinning with linseed oil and will not cover nearly as much surface as the Sherwin-Williams paint, and when the job is finished you have purchased fewer gallons of the better paint and have a better job in appearance and one that will last longer.

PICKLE SPICES

Such as Mustard Seed, Celery Seed, Cinnamon Bark, Cloves, Tumeric, Curry Powder, Dill Seed, Saccharin, Alum and all other ingredients used in preparing pickles. These spices are of the best quality.

The Vernet family reunion will be held at the home of Mr. and Mrs. John F. Laird, two miles south and one-half mile west of Mentone, Aug. 31. Mrs. Earl F. Sarber, Secy.

PSI IOTA XI BRIDGE BENEFIT.

The Beta Epsilon Chapter of Psi Iota Xi held a benefit bridge party at the home of Eunice Reed Wednesday afternoon August 13th. There were eight tables of bridge, with guests present from Warsaw, Rochester, Akron and Mentone. Basket s of early fall flowers were used in decorating. Mrs. Fred McKnown of Warsaw was awarded first prize and Mrs. Lucille Shultz of Rochester, second. Small hand-painted plaques, one of which was slightly different from the others, were given to the guests as favors. Mrs. Warner of Mentone, who drew the odd favor received the consolation prize. Light refreshments were served.

Farmall Price Reduced!

We have just recived a big piece of power farming news—the McCormick-Deering FARMALL price has been cut \$50, and we are at once passing the information on to our customers.

"Recently, by the same process, we lowered the price on the 19-20 McCormick-Deering tractor \$40, and cut the 15-30 tractor price \$75.

"Now, to complete our program of reductions, we announce a \$50 cut in the price of the FARMALL.

"These price reductions, made during recent months, mean a saving to farmers of millions of dollars.

"As the original all-purpose tractor the McCormick-Deering FARMALL has won tremendous popularity. More than 100,000 FARMALLS have been built. Already this tractor has created a real revolution in farming. It is the best investment a farmer can make.

"The new price, \$825, f. o. b. Chicago, is the lowest ever placed on the FARMALL."

You have probably seen the FARMALL Tractor at work. If not, we will demonstrate it at any time, on any job. The FARMALL replaces 6 to 10 horses and 2 to 3 men. It plows 7 to 9 acres a day—double disks 18 to 25 acres—drills up to 45 acres—plants 24 to 46 acres—cultivates 33 to 50 acres and, in later cultivatings, 50 to 65 acres. It handles every farm power job, including row-crop operations. Put the best tractor power to work now—at the new FARMALL price. If it isn't a McCORMICK-DEERING, it isn't a FARMALL.

Weldon Reed

MENTONE, INDIANA

"I asked him,"
said MRS. MOLLA PROPP,
"to tighten the torque carefully."

MY DEAR, how could I possibly know that there would be a fire in that particular neighborhood and at the very moment when my car was parked in front of a fire plug?

I came just in time to see two policemen pushing the car to one side so that the firewagon could get near the plug.

Of course anyone knows that under very embarrassing circumstances one is to appear non-plussed, as they say, and smoke a cigarette. But I don't smoke, my dear. And besides, THERE was a policeman standing with one foot on the side walk of my car.

Well, I thought maybe he wasn't waiting for me... maybe he was just standing there resting and thinking about the weather. But he wasn't... I

mean he WAS waiting for me. For when I tried to slide under the steering wheel as quietly as possible, he took out his book and asked my name.

"Oh, did I park in front of a fireplug?" I asked. "You did," he said. "Which one?" "That one back there." "Is THAT a fireplug?" "Yes ma'am. What did you think that it was—an aquarium?"

And so he gave me a ticket and Henry had to pay the fine for me, and was he mad? And the fire didn't amount to anything anyway, so I don't see why all that fuss was made about it. But next time I see a fire plug, my dear, I'm going to park three blocks away from it. They can keep their old fireplugs for all of me.

Copyright, 1929—John Jensen.

UNUSUAL WEATHER

MAY SPOIL POTATOES.

Purdue News Service.

Serious damage is being reported from early potatoes rotting in the ground and late potatoes sprouting. This damage has been caused by the excessive hot, dry weather and the intermittent rains. This condition has more or less cooked the potatoes near the surface and rotting has started. Early potatoes such as Cobblers and Ohios should be dug and carefully sorted and graded for storage or for market, according to W. B. Ward of the horticultural staff of Purdue University.

Late potatoes such as Russet and White Rurals are in danger of sprouting, especially those planted early. The dry weather caused these tubers to mature early and when growth was at a standstill the potatoes were more or less dormant. The rain during the past two or three

weeks has revived the growth. The result has caused hollow potatoes, knobby potatoes and sprouts. These sprouts arise from the terminal bud and form either stolons or underground stems which in turn give rise to numerous small potatoes or send up new growth. This condition is serious, yet unavoidable. Growers should examine their potatoes now to see whether or not this condition prevails, and if so, dig their potatoes at the earliest possible date although the vines are still green. Later planted potatoes were greatly benefited by the late rains, and with cooler weather should make a normal growth and development.

Pullets And Heifers For Sale.

Two hundred good White Leghorn pullets hatched April 1, one 2-year old heifer fresh, and one 2-year old heifer coming in. Phone 1½ on 173 Mentone, or see Lloyd Zent, Tippecanoe, Indiana.

Obe Haimbaugh and family, Mack Haimbaugh and family, Mr. and Mrs. Blanche Darr, Mr. and Mrs. Lon Haimbaugh, Mr. and Mrs. Ora Horn Mrs. Lulu Blue and Willard Zoleman and family attended the Haimbaugh-King reunion at Rochester tourist camp last Sunday.

LAIRD-BRADDOCK REUNION.

The annual reunion of the Laird and Braddock clans was held at the City Park at Warsaw Indiana on Thursday August 14th, 1930.

Fifty-three names were written on the register as present for the day and everyone enjoyed the meeting of friends and kindred.

Relatives from Bourbon, Mentone, Burket, Akron, Rochester, Tippecanoe, Milford, Columbia City, Auburn, Argos, Indianapolis Ind., Eaton Rapids, Charlotte and Pontiac Mich., and Cleveland Ohio were present. It was a beautiful summer day and the park an ideal place for the meeting.

The usual sumptuous dinner spread at the noontime was appreciated by all.

A committee on general arrangements for the next meeting consisting of Clarence Braddock, Floyd Schuder and Ernest Anderson was appointed. The next meeting to be held on the second Thursday of Aug. 1931, at the Warsaw City Park.

The assembly was dismissed by A. M. Laird and each one expressed themselves thus—"Glad I was here."

RAID GAMBLING JOINT

Find \$1,040.00 on Tables and Confiscate Equipment Valued at \$5,000.00.

Proprietors and Over Forty Patrons Surprised by Officers of the Law Who Swooped Down on Hotel at Wawasee Sunday Night.

Constable Bert O. Mabie, Marshal William Bushong, of Milford, Marshal Vern Hazen, of Bourbon, Prosecutor Bowser, of Warsaw, Justice of the Peace Norman Groves, Milford, Officer Frank Lucas, of Warsaw, and Lawrence Bible of Warsaw, Sunday night conducted a raid on the gambling rooms of the Wawasee hotel at Wawasee lake, confiscating six complete roulette wheels, chuck-luck games and other gambling paraphernalia, valued at \$5,000 to \$5,000. When the raiders appeared at the gambling room about 50 persons were present.

More than 40 persons were playing the roulette wheels and other games, half of whom were men and half were women when the raid was made. Officers found \$1,040, much of it in bright silver dollars, on the tables. The gambling room is located in a wing of the hotel, just off the lobby.

Officers first took in custody Eston McClintic of Syracuse, alleged doorman, who was doing sentry duty in a hallway. Officers claim that the place is in charge of Robert Alexander, of Detroit, and his three operators, Henry W. Cannon, Carl M. Smith, Fred Brecke and one man who escaped by a concealed door.

Officers knew of two doors to the gambling room and guarded these doors, but a third door was concealed and officers are confident that one man escaped.

The officers met at the home of Justice Norman Groves at Milford Sunday night and made the final plans for carrying out the raid.

When questioned, Mrs. Cuniff, one of the owners of the hotel refused to inform Prosecutor Bowser whether Alexander is an employee of the hotel. Attorneys for the hotel were busy at 3 o'clock Monday morning investigating the search warrant.

BURNED WITH EXCELSIOR.

While moving a box containing excelsior on last Thursday Corliss Paulus was badly burned on his hands, arms and face. It seems that for some reason there was an explosion which blew the burning excelsior all over the victim. The young man, is able to be around but looks as though he had passed through a cyclone.

Mr. and Mrs. O. N. Igo and Miles and Ned Igo were Sunday dinner guests of Mr. and Mrs. Floyd Tucker. Mrs. Marion Taylor and children were evening callers.

Mr. and Mrs. Curtis Riner, Mr. and Mrs. George Black, Mr. and Mrs. Bernard Black and Mr. and Mrs. Gerald Ballenger of Rochester enjoyed an outing at Crystal Lake Sunday.

Mr. and Mrs. Chas. Black entertained at Sunday dinner Mr. and Mrs. Lindus Latimer of Burket, Mrs. Lucinda Black of Mentone and Miss Ethyl Borton of Legionier. Mr. and Mrs. Chas. Borton and daughter Evelyn were afternoon callers.

The Theta Mu Club met at the home of Mrs. Faye Long Thursday afternoon. Those present were Hazel Taylor, Faye Emmons, Ruth Petry, Fern Petry, Isabel Peterson, Lena Eaton, Pearl Lacky, and Esther Fenstermaker. Guests were Mrs. Boyd Peterson of Rochester, and Mrs. Frank Peterson of California. Bunco was the feature of the afternoon with Miss Ruth Petry winning first prize. Dainty refreshments of ice cream and cake was served by the hostess.

SOYBEANS NEED UNUSUAL CARE THIS SEASON.

As a result of the drought much of the soybean acreage of Indiana intended for seed purposes this year will be needed for hay because of the impending shortage of roughage, says K. E. Beeson of the Agronomy Department of Purdue University. In the southern part of the state, dry weather has reduced the growth, and where the leaves are yellowing and dropping, the soybeans should be cut at once. A few days of curing will suffice for this short growth.

In many fields recently inspected soybeans are demonstrating their drought resistance and are continuing to grow inspite of scant moisture supply. While the pods may not fill completely as in a normal season, yet for hay purposes, the plants should be permitted to grow until the soy beans in the pods are well formed or leaves are dropping. This stage will give the maximum tonnage of hay, and excellent feeding value. Growers who would like to give their fields a chance to produce seed, if possible, can permit their fields to stand to even later stages and still make hay in case the seed prospect becomes less favorable. Due to the general shortage of hay, the hay crop may be more valuable than the seed crop.

Growers intending to harvest seed crops are watching their soybeans closely. Many report normal padding and seed prospects although in some cases more blossoms are dropping than usual. The demand for soybean seed will undoubtedly be great next spring because of the need for a hay crop to replace clover killed by the drought.

MISSIONARY AT

BAPTIST CHURCH.

On next Monday evening, August 25th, Rev. and Mrs. Roy L. Shaffer, home on furlough from Africa, will be present to speak at the Baptist Church. This young couple have had most interesting experiences and their stereopticon slides which they will present are unusual in the portrayal of African life. These folks have spoken in many large churches of our land and have been enthusiastically received, so let us have your presence on that evening and you are sure to enjoy the service. There will be no offering taken; but any who care to be prepared to hand them a personal contribution are free to do so.

The services will begin at 7:30.

The regular August Missionary meeting will be held this Wednesday afternoon at 2 o'clock at the home of Minnie Busenburg.

Services as usual on next Sunday.

V. E. Spuihb, Pastor.

Welcome, Stuart Valle Nelson.

Born, to Mr. and Mrs. A. I. Nelson at the Woodlawn hospital, Rochester, Friday of last week, a son, named Stuart Valle. Both mother and infant are doing nicely and are expected home in a few days.

W. C. T. U. Meeting.

The Mentone W. C. T. U. met at the Baptist Church Tuesday evening August 12th. Opening song, Stand Up, Stand Up For Jesus.

Prayer by Mrs. Baker and Mrs. Norris. Devotion by Rev. Squibb. Loren Manwaring of California gave a very interesting talk on facts as he had met them. Song My soul be on thy guard, Prayer by Mrs. Creviston.

DEATH OF MRS. COLBERT.

Mrs. Rebecca Colbert, aged 91 years, sister of H. D. Pontius of this place, died at her home two miles south of Silver Lake, on Sunday at 1 p. m. Funeral was held at the U. B. Church at Silver Lake, Tuesday. Burial in the Silver Lake cemetery. With the exception of Mr. Pontius the deceased was the last of a family of ten children.

DORAN STATION.

The station on the Interurban just south of Mentone is certainly a lively community. Most every week we receive a nice string of news items from that point, besides "Trade With Black and Save Your Jack" usually carries a quarter page advertisement in the Farm News. If it were not for our advertising patronage from Doran and New York this paper would be getting very poor support.

BEAVER DAM ITEMS.

Miss Jeanette Cinninger spent the week end with Miss Margaret Linn at Mentone.

Quite a number from this vicinity are attending the services at the Yellow Lake camp ground.

Jonas Rickel accompanied by his sister, Mrs. Etta Clark and family motored to Bourbon Sunday.

Mrs. Ala Aumsbaugh is spending the week at the home of her daughter, Mrs. Chas. Cinninger and family.

Alvin O'Hara and Gerald Maloy of Pierceton, Clyde O'Hara and family of Laketon took Sunday dinner at the Homer Clark home.

CLARK'S

Analyzing ...YOU...

With the New Science of Syllabics

By C. J. COFFMAN
Dean of All the Enumerators

Lillian

"Lillies and roses, small roses." This is the impression that your name gives to the mystical nature of the poet.

How many famous names are yours, Lillian! How the hearts of our grandfathers will still stir at the remembrance of Lillian Russell and Lillian Langtry, "The Jersey Lily."

Even princes and potentates of world-wide importance have sought their Lillians.

Your name, Lillian, suggests lily-white hands, with concealed but surprising strength.

But with all these possibilities your greatest asset will probably lay in your voice. This may be either in singing, or a speaking voice. In either case it is likely to have a very considerable charm.

If you feel a talent for singing you should begin developing that at once, at any cost. Remember that every genius has developed in spite of the opposition of those around. You will always find that any attempt to develop talent will be opposed by somebody.

This opposition is usually aroused by what we call the inferiority complex. It is based upon the fact that the person opposing did not suggest the plan in the first place. Therefore, the plan can have no merit.

Of course, all such opposition to you will be accompanied by good and sufficient reason, in the opinion of the opposer. But whether the reason is lack of funds, fearfulness of letting go of you, aversion to the thing you want to do, because they cannot do it, or any other reason, you will arrive only if you hang on and keep on going.

The consoling thing in all of this is the last syllable of your name, IAN, which carries a strong suggestion of healing. It gives you strength to not only heal your body in case of illness but to heal your finances and your social abilities.

Go on, Lillian, success lies always onward.

(© 1930, Western Newspaper Union.)

Educational Indictment

It is a simple fact that an appalling amount of time is spent in childhood in learning things which don't matter, remembering things which will never be needed, and doing silly tricks which an intelligent man need never waste his time upon.—Donald Rose.

Synagogue Long in Use
Touro synagogue in Newport, R. I., is the oldest in the United States. It was built in 1702, and is still in use.

Favored Shares

The term "preference shares" is used in England as the equivalent of the American preferred stock. These rank ahead of the ordinary shares, besides very often being entitled to a cumulative dividend.

Right!

After listening to the man across the court sing in his bathtub every morning for six months we have arrived at the conclusion it is better to forget all of a popular song the morning after you hear it than just half of it.

PSI IOTA XI.

The Misses Mildred Anderson and Thais Greulach delightfully entertained the Psi Iota Xi Sorority at a garden party at the Greulach home, Friday evening August 15th. The abundance of flowers enhanced by the glow of many Japanese lanterns lent a festive air to the garden and lawn. Games were played at small tables which were beautifully decorated in a Japanese manner. An unusual flower hunt was one of the entertaining features of the evening. Prizes were won by Eunice Reed and Louise Black.

Members and guests present were: Mary Jane Borton, Annabel and Rosalind Mentzer, Francis Rush, Ellen Mollenhour, Marjorie Baker, Isobel Johns, Louise Black, Eunice Reed, Frances Clark, Helen Jontz, and Thelma Harris of Warsaw, and Miss Herendeen and Bernice Bowen of Akron.

RYE MAKES LATE FALL,

EARLY SPRING PASTURE.

Purdue News Service

"I look upon rye as the best chance for late fall and spring pasture" says Director J. H. Skinner, Purdue Experiment Station, in discussing pasture crops that may be seeded this fall by farmers in the drought stricken areas of the state.

"Rye makes an excellent pasture for all classes of livestock and is especially good for hogs as late fall and early spring pasture" is the comment of livestock specialists at Purdue.

Rye is the hardest of our cereals and easiest to grow. Although it will grow on the thinnest and most acid soils it responds well to good treatment.

It may be pastured later in the fall and earlier in the spring than most other crops. Used in this way it will cut down on the hay requirement, which is an important item on

Little Elf Corn Starch, Box	8c

many farms this year.

The seed bed prepared and methods of seeding are the same as for wheat. Since rye is not subject to injury from Hessian fly, the crop may be seeded any time now that the soil can be plowed and fitted.

Discing followed by the cultipacker and harrow should put the soil in shape for drilling. The usual rate of seeding is about 1½ bushels per acre. Better growth and greater livestock carrying capacity will result from the use of 150 to 250 pounds per acre of a good grade of commercial fertilizer, such as an 0-14-6 or 2-12-6 analysis.

The use of 6 to 8 pounds of timothy or a mixture of 4 pounds timothy and 4 pounds meadow fescue seeded with the rye will furnish good pasture during the next summer after the rye matures.

One of the best varieties for Indiana is Mammoth White Winter, but any variety should be satisfactory for seeding if it is of good quality and free of noxious weeds.

Where rye is not readily obtained or high in price, wheat may be substituted. Wheat is more subject to Hessian fly injury than rye, if sown before the fly date, and is not as winter hardy as rye.

Says WILL ROGERS

BEVERLY HILLS. — Well all I know is just what I read in the papers.

And outside of the thermometer reports, there just aint much in the newsprint now-a-days. This heat thing accompanied by drouth has had everybody pretty had scared up. Course there is not much a man can do when its heat thats bothering us. We can advise everybody to sit in the shade, and avoid the sun as much as possible. Then if its rain they need why advise them to raise crops that dont need much rain.

There has been a good deal of trouble out in the Dakotas about the history that Mr. Coolidge was supposed to write on a rock. It was to run 500 words and give the history of America and still not go into details. Well 500 words dont allow you much history. Course we never had much history, but like all Nations we think we have.

Well the Sculptor didnt like the history that our Ex President had cooked up so he made as we say in the eighth art (the Movies), why he made some re-takes on the manuscript. It seems that Mr. Coolidge had with an eye to future Campaigns given our History from a Republican standpoint. There had been Democrats engaged in our history but only in the capacity of Villains.

Well poor Dakota didnt know what it was all about, all the interest they had in the matter was to furnish the Mountain. They just wanted something that a Tourist could read, or have read to him. In fact the more controversy the more would come to read. What constituted our early history didnt mean a thing to my old Friend Beulow and his co-horts. The Dakotas just said "we got the rock. Print an Aimee McPherson sermon on it, just so somebody will burn out his break bands to come and see it." If they leave the Coolidge version on there, they should advertise it, "Come and see the Republican history of America in 500 words."

See where one of these young boy tree sitters has just passed his 500 hours sitting in a treetop. There is a good deal of discussion as to what to do with a civilisation that produces prodigies like that. Why wouldn't it be a good idea to take their ladder away from them and leave 'em up there?

Pretty near all of us out here in California during these hard times are selling our homes and they tear

'em down and put in these premature golf courses. You can't sell for much, but they give you a free ticket to play. The jalls are putting 'em in now to get the prisoners' minds off mutiny.

Say, that little jacking up I gave Mr. Hoover about the weather did some good. You know these Republicans just get careless that way. They are so used to running everything for so long they just think it will go without them.

China is having a new war, and we are having trouble getting into it. We always have gunboats there, so if there is any shooting why one of our boats will be shot at and that gives us the usual alibi.

But this time it seems we only had one gunboat and it had to manoeuvre around for days before it could get in the line of fire.

Now Mr. Hoover being a business man, I bet you he takes that Senate and House of Representative space in the Capitol building and turns it into miniature golf courses.

Would you believe it, there is 3,500 of 'em in the city of Los Angeles. Then people ask what's the matter with this country. Nothing, only there is millions got a "putter" in their hand when they ought to have a shovel.

Half of America is bent over. In two more generations our children will grow upwards as far as the h...s, then they will turn off at right angles and, with their arms hanging down, we will be right back where we started from.

Darwin was right.

I thought the California papers were exaggerating, as usual, the heat in the East, but I guess the rascals were right at that.

What has the poor farmer done against the Republican administration that he should deserve all this?

If it's not the heat, it's the deep snow.

If it's not the drought, it's the floods.

If it's not the boll weevil, it's the tariff.

If it's not the cinch bugs, it's the Federal Reserve.

If it's not relief he needs, why, it's rain.

But there is one pest that he is always free from; that's the income tax.

The PLOW and the CANNON

By A. J. Dunlap.

Up with the sun in the morning,
Out where the stubble fields lie;
Stripped of the green robes of June
Seared by the heat of July;
Over the hills and the valleys,
Patiently, day after day,
Farm boys have followed our plows,
Turning the rich loam and clay;
Learning the lesson of life,
Taught by the sturdy old plow:
All furrows come to an end,
If you keep going, somehow.

Up at the blaze of the bugle,
Out where the battle fields lie;
Stripped by the scourge of the shrapnel,
Seared by the planes in the sky;
Over the shell holes and trenches,
Doggedly, day after day,
Farm boys have followed our cannon,
Hub-deep in alien clay,
True to the lesson of life,
Taught by the sturdy old plow:
All battles come to an end,
If you keep fighting, somehow.

THE OLD FARM SERIES

TALMA NEWS ITEMS

Mrs. George Bryant is still improving.

Mr. and Mrs. Oliver Davis and son Dale spent Thursday night with Mr. and Mrs. Peter Horn and family.

Mr. and Mrs. Cleo Teeter and family of Warsaw spent Sunday afternoon with Mr. and Mrs. Vincen Teeter and family.

The Misses Dorothy Horn and Geraldine Haimbaugh and Messrs Von Kockenderfer and Delbert Hunter spent Sunday at the Boyer reunion near Packerton.

Mr. and Mrs. Ernest Bryant and daughter Mary Joan of Lafayette spent Sunday with Mr. and Mrs. Verdine Brockey. Mary Joan remained with them for a week's visit.

A large number of people from the Talma vicinity attended the Athens picnic Saturday afternoon. Features of the program from Newcastle Twp. were given by the Bethlehem Sunday School, the Methodist Church in Talma, and the Four Cylinder Sod Busters Quartett.

The Ladies Auxiliary of the New Castle Twp., Farm Bureau will be held Thursday August 28 at the home of Mrs. Clarence Graffis with Mrs. Lloyd Zent, Mrs. Peter Horn and Mrs. Philly's Bryant in charge of the program.

MENTONE NEWS ITEMS.

DAIRY TALK DAIRY

POOR FEED PLANS CUT HERD PROFIT

Milk Yield Decreases if Cows Don't Get Right Ration.

Indifferent feeding methods for the dairy herd are sometimes largely responsible for a drop in milk production during the summer, and an uneven production which has a bad effect upon the profits of the dairyman. It is pointed out by C. L. Blackman of the animal husbandry department of the Ohio State university.

"The time to plan the summer management program is while the cattle are enjoying good pasture," says Blackman. "The big flow of milk usually comes in May and June while cattle are enjoying nearly ideal feeding conditions. Later, when flies, hot weather and dried up pastures come along, there comes a big slump in milk production and the spring freshening cows never come back to the high level of production."

Blackman asserts that when the undesirable pasture conditions come on it may be profitable to keep the cattle up during the day, and to feed some extra roughage, such as silage. Sometimes more grain may also be added profitably.

In addition to the careful management during the summer, a good breeding system which will bring the cows into milk at the times when the supply of milk is generally low and prices good, will help the dairyman solve the problem of uneven production and consequent loss.

Grain Feeding of Cows on Pasture Necessary

Green, succulent pasture is naturally high in protein but is low in total digestible nutrients. A cow milking over twenty pounds of milk a day cannot eat enough pasture to provide the necessary carbohydrates to maintain that production. Grain feeding of this cow on pasture is absolutely necessary, says J. C. Nisbet, extension dairyman, Kansas State Agricultural college. Her grain ration need not be high in protein—home-grown feeds will balance the pasture. A mixture of 400 pounds of corn and 200 pounds of oats should be fed at the rate of one pound of grain to every four and one-half pounds of milk from the Ayrshire, Jersey and Guernsey, and one pound of grain to five pounds of milk from the Holstein.

Dry pasture contains about one-third as much protein as the green, succulent grass. An understanding of this fact makes the successful dairyman begin to add a high protein feed to his grain ration as soon as pasture

starts to dry. The grain mix then is composed of 400 pounds corn, 200 pounds oats, and 100 pounds of cottonseed meal. The rate of feeding is changed to one pound of grain daily to every pound of fat produced a week.

Plan Abundant Supply of Roughages for Winter

The shortage of good roughage during the past winter should insure an abundant supply of this type of dairy feed during the future. Sometimes we need a real shortage in order to impress upon us the value of roughage as an essential part of the dairy cow's ration. As a matter of fact, roughage should form the basic part of the ration, with enough concentrated feeds being used to supplement the roughage from the standpoint of total nutrients and protein needed.

If sufficient alfalfa and clover hay is not in sight to meet the needs of the cattle during the coming winter, we would suggest that soy beans be given consideration. Soy beans are an annual. They may be cut for hay or they may be threshed and used as a protein supplement. They will grow on land that is more acid than will clover or alfalfa. However, they will respond well to lime. The seed should be inoculated to give the best results in most cases.

Physical Condition of Cow at Time of Calving

The physical condition of the cow at the time of freshening has a direct relation to the milk production for the entire lactation period, according to Doctor Eckles. Experience shows that if a cow freshens in poor physical condition as a result of having been fed poor rations for a period preceding, she starts considerably below her normal level of milk production and no amount of care in feeding and management will later bring her up to the level she should have reached had she been in proper condition.

Pasture Food Value

More food value per acre is obtained from pastures when they are not grazed too early or too closely. Early pastures, even though they are bulky, supply an abundance of protein. For dairy cows such pastures should be supplemented by highly carbonaceous concentrates such as corn, kafir or barley. Grain should be fed at the rate of one pound to each five or six pounds of milk produced when the cows are on good pasture.

Constructive Wanting

Want a few things—hard. Near things. Three houses, a hundred dollars in the bank. Be patient. And before you die they'll be asking you how you did it.—American Magazine.

Farmers Who Are Interested in Better Eggs and Who Are Interested Enough to Help Themselves as Well as Us.

It goes without saying, that we have done more for the farmers in the way of egg price than any other buyer in Indiana, and have done more hard work to try to get a "Mark" on Indiana eggs than any other firm in New York City. We are working our heads off now trying to help you get more for eggs. Now, won't you please listen and try to follow our advice, We are not hoggish and don't ask all of this simply for our own benefit, but what helps us, sure will help you.

Now please try and adhere to the following advice for one year and see the results:

Get a good strain of straight blood poultry that lays a good sized egg (either white or deep brown) there is no difference in price now, and the general average price is about the same for equal quality eggs (size and cleanliness considered.)

Pick up your eggs every morning and evening, and carry a damp cloth with you, cleaning all traces of dirt off before it hardens and sticks to the shell.

DON'T WASH THEM,

But simply wipe them with a damp cloth and don't leave them streaked with dirt but clean them. Keep them in the coolest place about the house never allowing rain nor sun to touch them.

Use all ill-shaped eggs at home because they are broken in shipping. Market your eggs at equal intervals twice each week—that is, we would like to have them each Monday and Thursday or each Tuesday and Friday, rain or shine.

Keep every egg that you are not sure of being strictly fresh at home or ship them separately, as we don't want to spoil a case of nice eggs with a few of doubtful character, and you can't afford to sell such eggs, as it hurts you as bad as it does us, for we have to buy eggs on a basis of what we get for them, and if you slip in a few bad eggs on us, it only hurts our sales, and causes us to have to lower our price, so you see the fresher we get the eggs the more we get, and the more we can pay you. Never keep roosters with your hens after June 1.

Watch the size of your eggs and when they begin to run small, then feed them some good laying mash with a little Cod-liver oil in it or some soaked oats with a little Cod-liver oil in it or anything to keep the egg size up to not less than 23 ounces per dozen or over.

Now please try and follow this advice and let's work together and put our eggs in a class with California, Washington and Utah. The Pacific coast states ship eggs to New York City, and get from 3 to 10 cents more than your eggs bring, and it is because they ship fresh, clean, good-sized eggs graded up to a standard, which you can do if you will work as they work. Now if you will work as hard as we are, trying to put good eggs on the map, then we will show the market that Indiana has just as good eggs as any state in the union. We will do our best and now it's up to you who sell us eggs, to work as hard as we do.

Yours for Better Eggs.

Quality Butter & Egg Company

POULTRY

IMPROVED HOUSES MEET MUCH FAVOR

Not Necessary to Build Expensive Buildings for Hens.

There is nothing that will have a greater influence on the poultryman's success or failure than the way in which he houses his birds, declares O. C. Ufford, extension poultryman for the Colorado Agricultural college.

The shed-type poultry house built deep is the safest and most satisfactory for Colorado conditions because it is economical, warm, dry and comfortable when properly built. Mr. Ufford says in a recent well illustrated bulletin, "An Improved Poultry House for Colorado Flocks," copies of which may be obtained by writing to the college.

It is not necessary to build an expensive laying house, the bulletin states. The cost need not exceed \$2 per hen when the best materials are used, and it is possible to put up a satisfactory building in some localities at a much lower cost.

Poultry houses should be constructed to make use of the abundance of sunshine, especially during the winter months when it is most needed. A concrete floor built at least six inches above the highest point of ground nearby to eliminate moisture is recommended.

The shed-type of laying house is the most comfortable and economical when built 20, 22 or 24 feet deep, with not over a 9-foot front wall and a rear wall 5½ feet high, it is stated. Windows along the back under the dropping boards.

Openings 3½ to 4 feet square placed across the front of the house will provide ample sunshine when and where it is most needed.

Muslin is warm and cheap and is preferred over glass in the front of laying houses, the bulletin states. Numerous details of construction are explained and illustrated for the benefit of men and women interested in improved poultry houses.

Too Much Mineral for Chickens Is Mistake

Tests made by L. E. Card of the University of Illinois indicate that it is a mistake to feed too much mineral mixtures to chickens. One lot of chicks was fed on a ration of 60 parts yellow corn meal, 20 parts soy bean oil meal, 13 parts wheat middlings, 1 part salt, 2 parts cod liver oil, 2 parts steamed bonemeal and 2 parts ground limestone. These chicks averaged 253 grams in weight at six weeks. A similar lot receiving the same ration; except 4 parts steamed bonemeal instead of 2 parts, weighed only 212 grams at

the same age. Another lot receiving the same ration, but 4 parts ground limestone. Instead of 2 parts, weighed only 187 grams at six weeks of age.

Dependable Source of Income in Choice Hens

During the past few years every section of the country has suffered from the sudden and severe decline in the price level of most farm products. For this reason, it is rather significant that in the Middle West where the agricultural depression has been the most acute, poultry, and egg prices have remained firm. This, more than any other factor, has caused farmers to realize that a standard bred, high producing flock of chickens properly handled, is a dependable source of income and that poultry keeping compares favorably with any other farm activity.

Poultry Facts

In the United States last year 46,500 eggs were laid for every minute.

Dead chicks pay no bills. Use of clean practices means more live chicks and better profits. Sanitation will save one more chick in five than will live under dirty conditions.

Exposure to cold, damp or drafts, aids materially in bringing on roup among the chickens.

Don't wash eggs. Keep them from becoming dirty by having plenty of nests, keeping the hen house clean and gathering the eggs often.

Lice are more numerous and active in hot weather. To curb their activities—apply nicotine sulphate in full strength to the top of the perches before the birds go to roost.

A chicken sent to the Kentucky experiment station for post-mortem was found to have 2,511 internal parasites. No wonder the chicken died.

Drugs are useless in the control of coccidiosis among chickens. At the first symptoms of the disease the birds should be placed on a heavy milk diet.

The late maturing turkeys that would not dress out as number ones at Thanksgiving because of lack of size may be confined and fed heavily on corn for the coming holidays.

"Spot Fyter" for grease and dirt spots. A few drops, a little rubbing, and they are gone. For sale at Clark's Store.

The "Old Army Game"

At Bergen, Norway, among other relics of the old Hanseatic league, are the scales used for buying and selling fish, with two sorts of weights used, one considerably heavier than the other. The heavier were used for buying and the lighter for selling.

RHEUMATISM IS SOON BANISHED BY NEW KONJOLA

This man Finds New Medicine
First Help In Stubborn
and Painful Case.

MR. JOHN BUETTNER

"After suffering for two years with rheumatism and kidney trouble I began taking Konjola," said Mr. Buettner, 919 Hackley street Muncie. "I had tried many medicines and treatments without benefit up to this time. I took Konjola for six weeks and the sharp pains in my arms, shoulders and back were no longer present. Instead of getting up frequently at night, I now get a real nights rest. My appetite has increased and I certainly feel grateful toward Konjola. I am fully convinced that it is a worthwhile treatment for kidney trouble and rheumatism. I also found that Konjola Laxatives, taken with the medicine, rid me of a severe and stubborn case of constipation. Konjola certainly was the right medicine for me."

Konjola works quickly and a complete treatment of from six to eight bottles will bring relief that will surprise those with the most stubborn cases of stomach, liver, kidney and bowel troubles, and rheumatism, neuritis and nervousness.

Konjola is sold in Mentone Ind., at the Shafer & Goodwin drug store, and by all the best druggists in all towns throughout this entire section.

No News to Editor

A medical expert now comes forward with the statement that settling-up exercises are not beneficial and may even be harmful, a discovery we made these many years ago by standing too near a radiator while doing them.—New York Evening Post.

JUST THINKIN'

by Charles S. Kinnison

Just as I Am

Lord knows that I have lots of flaws—
Yes, many imperfections.
I violate the Bible Laws,
In several directions.

But yet despite these flaws in me,
Despite each sinful fetter,
I pray that some will try to see
In me, the thing that's better.

But I'd not ask that ALL would seek
To find my armor spotless,
And see not ways in which I'm weak,
And to my faults be thoughtless—

I'll be content if just a few,
Unto my faults are blinded,
And see in me the side that's true.
If just a few are minded,

To stand by me for what I am,
For all I may be masking—
And see the good, and not the sham,
That's all I would be asking.

(© 1939, Western Newspaper Union.)

LOSS BY POOR DISTRIBUTION

By DR. STEPHEN L. MILLER, Credit Men's Association.

INEFFICIENT distribution has cost the people of the United States enough since the war to pay off the national debt. Bankruptcies have caused a loss of over five billions of dollars in the last decade, and that represents only part of the waste of inefficient distribution. Retail stores have multiplied by thousands, and the average life of these stores has been short. There has been a constant stream of men

bringing their small savings to the altar of merchandising ambition. Without a knowledge of accounts, buying, advertising, mark-up, turnover, credits, collections and service to customers, they have cut down the average volume of business per store, thereby increasing costs of distribution and prices to consumers. Handicapped by the lack of business understanding and strangled by competition they have constituted an unbroken business death march.

Into this scene of merchandising desolation and chaos has come the chain store, quickening competition, hastening elimination. The competition of chain stores has undoubtedly hurried many a retailer into bankruptcy. On the other hand, the chains have introduced far-reaching economics, stimulated adaptation and brought about greater co-operation between wholesaler and retailer.

Retailing is essentially a service. The merchant is a host, the customer a guest. Success in a store depends upon consideration of detail and a human equation closely bound up with ownership. The large scale farmer has never put the small farmer out of business. I predict a profitable future for both the farmer and the independent retailer who observe the economies of the day.

COMMUNISM MENACE TO WORLD

By BISHOP NUELSEN, Zurich, Switzerland (Methodist).

COMMUNISM and nationalism, the two aggressive forces which are continuing to inflame the imaginations of peoples in many nations of Europe and Asia, will seriously aggravate world problems unless they are purified and uplifted by the spirit of Christian love.

As long as Communism was only an economic theory, it was harmless enough. But now that it has become an active force, seething in many nations and rampant in Russia, from which it extends an alien hand into China, it is a world menace.

Communism is opposed to all religions, would destroy Buddhist and Confucian temples as well as Christian churches, prohibits religious instruction in schools and is training whole nations in materialistic concepts.

Nationalism also is opposed to religion. If it is to benefit the world, it must be sublimated by the love of God who knows no boundary lines and no distinctions.

A historian has said that there are three ways of solving world problems—by force, by reason and by love. Force has been tried in vain. Reason also has failed because masses of people are ruled too strongly by primitive instincts. Love, he added, probably would work if it were ever tried.

Bucking Fate

A man can still be master of his fate. But he should not try too hard to be that. The unwise man never should be and the wise man seldom wishes to be.—Woman's Home Companion.

Favorite Meat

Mary Lou, a five-year-old guest in a home where the hostess is on a diet, was making a survey of the food to be served for dinner and said, "I see we are going to have calories for dinner. It's my favorite meat."

DORAN STATION ITEMS

(Leave Items at Black's Store)

Mr. Earl Barr made a business trip to Chicago Tuesday.

Nellans and sons, Leigh Bright, Mr. and Mrs. Floyd Tucker and daughter, Mrs. Faye Mickey of Warsaw, Mr. and Mrs. Mars Tucker and children, Mr. and Mrs. Ora Tucker and children, Mrs. Dean Kizer and son of Chicago, Mrs. Max Smith and son Bobby, of Mentone, Mr. and Mrs. Ora Smith and family, Mr. and Mrs. Clyde Brugh and Mr. and Mrs. Fred Halterman.

ASSAULTED AND ROBBED.

While bumming his way on a Nickel Plate train Tuesday night, Jesse Piper, of Pittsburg, Pa., was slugged, robbed of his watch and grip and thrown from the moving train by a new found companion who was traveling with him.

Piper managed to get to the White City Poultry Farm for assistance, and Dr. Yocum was called who took four stitches in the mans head to close up the wound. He was taken to Warsaw and rested in the county jail for the balance of the night, and Wednesday morning left for Fort Wayne and Cleveland in an effort to locate his assailant and turn him over to the police.

Piper had a considerable sum of money in his pocket which was overlooked by his new found friend.

UNJUST DISCRIMINATION ASKED TO BE REMOVED.

A greatly increased cash market for corn every year may be anticipated if a favorable decision is rendered by Secretary of Agriculture Hyde on a proposal now before him to modify a ruling governing the use of corn sugar in certain food products.

So claim the proponents of the change who appeared recently at hearings before the Department of Agriculture at Washington.

Under existing definitions, refined corn sugar may be used in confectionery, ice cream and bakery products without special label mention, and enormous amounts are being used every year by these food manufacturers. But the definitions of certain food products such as sweet pickles, catsup, canned fruits and vegetables and preserved fruit, and also carbonated beverages such ginger ale, will not permit the use of refined corn sugar in their preparation without so mentioning on the label, and Secretary Hyde has been asked to modify this.

Advocates of the proposal at the hearings claimed that the public will not purchase food products freely which mention the use of refined corn sugar on the label, because it has been taught to believe that mention of a particular ingredient implies that the foods are inferior or adulterated. They cited as proof that over 130,000,000 pounds of refined corn sugar was used last year by manufacturers of confectionery, ice cream and bakery products which require no label mention, while practically none was used in the preparation of other foods in which the noting of refined corn sugar is required. This, they said, means that the present definitions, by preventing food manufacturers from exercising a choice, are standing in the way of a greatly increased use of refined corn sugar, and hence the consumption of corn.

The manufacturers of corn products are now using \$6,000,000 bushels of corn a year or about a third of the corn coming to the markets, and it was estimated at the hearings that consumption would be increased anywhere from 20,000,000 to 40,000,000 bushels a year if these discriminatory restrictions were removed.

Words

Each word in a book is a magic finger that sets a fiber of our brain vibrating like a harpstring and so evokes a note from the sounding board of our soul.—Anatole France.

POULTRY RAISERS TO MEET OCT., 1-5.

Purdue News Service

The annual fall meeting of the State Poultry Association of Indiana will be held at Purdue University on October 1, 2, and 3 according to word received yesterday from association officials. "Every Hoosier poultry raiser is invited to attend this meeting and benefit from the lectures and other educational features being planned," stated Leon Todd, secretary of the association, when discussing the program.

One of the chief topics to be discussed will be the economic aspects of the poultry business. Several phases of this subject will be discussed by prominent poultrymen and agricultural economists. Poultry raisers are realizing that certain basic economic information is essential to success, and have requested that a part of the program be devoted to a discussion of the economic phases of the poultry industry.

A thorough discussion of certain diseases such as Pullorum disease or Bacillary White Diarrhea in chicks and infectious Bronchitis will be discussed by leading disease experts in the middle west. Pullorum disease in chicks will be discussed in considerable detail.

Besides the economics and disease discussions, other topics such as equipment and general production will receive a place on the program to make this the outstanding poultry meeting of the year in Indiana.

A copy of the program and other details will be distributed by Leon Todd, Purdue University, Lafayette, and are available to everyone interested.

HOG PRICES HIGHEST SINCE ONE YEAR AGO.

The Chicago hog market reached \$11.25 on Wednesday of last week, and the indications are that this price will go still higher. It surely seems good to note that there will be a good price for at least one item that the farmer has to sell.

BURKET ELECTS OFFICERS.

The newly incorporated town of Burket held their first village election on Tuesday of last week, with the following result: councilmen, first ward, John Slife; second ward, George Dreitzler; third ward, William Shaffer; clerk-treasurer, G. M. Doran.

Somebody Cares

by A. J. Dunlap

The old plow hit a snag one day,
And in an angry fit
Exclaimed, "Oh! What a life I lead!
It's time for me to quit,
They drag me through the stubble fields
Until I'm nearly dead,
And no one cares how hard I work,"
The old plow sadly said.

An autumn zephyr heard the plow,
And cried, "Oh! What a pity
You cannot follow me about
Through countryside and city.
Why, everywhere, the children sing
About your patient toil,
And everybody praises you,
And how you turn the soil."

The zephyr said, "I must be gone,
But I am sure somehow,
The old world knows and cares a lot
About your work, friend Plow."
The old plow heaved a happy sigh,
For plows are just like men.
They like to feel that someone cares
About them now and then.

THE OLD FARM SERIES 2

BILL BOOSTER SAYS:

3 AM GETTING UP A "TOWN AND COUNTRY" PICNIC, TO BE HELD IN SOME SHADY SPOT OUTSIDE OF TOWN AND EVERYBODY WILL BE INVITED FROM TOWN AND MILES 'ROUND TO COME AND BRING THEIR LUNCH; ICE CREAM, LEMONADE AND COFFEE WILL BE FURNISHED BY OUR MERCHANTS - THE AFTERNOON WILL BE SPENT IN SOCIABILITY, WITH GAMES AND VARIOUS AMUSEMENTS - IF THIS SOUNDS GOOD TO YOU, TELL THE EDITOR SO

Hen Has Monopoly

Eggs cannot be made artificially. Scientists have made concoctions which contain most of the constituents of eggs, but they have never succeeded in preparing a substance which contains all of these materials in the same combinations.

Claims High Distinction

The National University of Mexico was reorganized in 1910, but claims the distinction of being merely the re-establishment of the University of Mexico, which was founded in 1551, and is the oldest university in the Americas.

Army Emoluments

"Fogey" is a name given to a particular form of bonus or increase in army pay based on length of service. The Fogey act gives a 10 per cent increase in pay every five years to officers and enlisted men, until a 40 per cent increase has been reached.

Explains Sea's Color

The deep blue color of the Mediterranean sea is due to the salt water constantly pouring into it from the Atlantic ocean, and to the fact that few large streams carrying sediment empty into it.

Says WILL ROGERS

BEVERLY HILLS.—Speaking of Politics, I was up at a Rodeo at Salinas California the other day, and their

great specialty there is riding Bucking Bulls. Well, the Governor was there and as he was up for re-election he spoke and casually reminded the people that a vote for him would not be unappreciated, well just as he would reach an important part of his address why out would come a bucking bull and maby throw a Cow-puncher higher than a Republican Tarriff bill, and the crowd would roar and applaud, the Governor would start again, "As I was saying, I have done more for Monterey County and—" "Ba ba," "Ride him Cowboy" "hook him Cow!" "Monterey County has been my special pet in handing out appropriations", and "Here comes another one, watch that Baby buck! What a Bull! You are riding him pretty Boy!" "If I am re-elected, I will give—" "Set in the middle of that Animal odd hand!"

Well all this went on for quite a spell, and we never could find out what the Governor had done for old Monterey County. From the looks of the Bulls there didnt seem much that he could do for old Monterey County. What the County needed politically was noiseless bulls. Well they finally wanted me to go over and deliver a Theme song on the Merits of Herbert and Calvin, or "What the Republican Party has done to us." But not me, I wouldnt go over there and compete with those Bovines. "Bull" is all right but not when you are competing with the original. I could have told em in a minute what was the matter with Old Monterey County, Cal. old Rogers County, Okla., or Brown County, Indiana.

We are just stepping too fast. In the old days we figured the world owed us a living, now we figure he owes us an Automobile, a Player Piano, and Radio, Frigid Air, and Clara Bow.

But its all coming under the heading of higher Civilization. Till now its a case of what is Civilization. Was our old folks dumb and didnt know nothing? Say, dont you kid yourself, those old Boys in their youth could take a big silver Dollar and go out and corral more "Hot times" than we ever thought of. There is many a Bar-bimore hid behind long whiskers. Say they did a lot of prowling in their time. A horse and Buggy could take you so far that it wasnt impossible to walk home, but it was inconvenient. Even back in my time, when I was going

good, I have come dragging in from a dance horseback, by daylight. We wasent making payments on as many things. But we was making some mighty nifty "Whooppee." Your Mother gets mighty shocked at you Girls nowadays, but in her day her Mother was just on the verge of sending her to a reformatory, so we just got to live and let live and laugh the thing off. The Republicans got the Country and what can you expect?

Mr. Hoover wasn't able to look over the National Parks, so I am pinch-hitting for him. When you get into this wonderful Yosemite valley you haven't got any time to be reading the papers to see what foolishness Herbert, or Calvin, or Ford, or Lindbergh, is doing. It's all right to go to New York and see what Chrysler and Al Smith have built, but the old boy that laid out this place must have died and took the plans with him. There ought to be a law against anybody going to Europe till they had seen the things we have in this country. The fish all expressed their regrets that Mr. Hoover wasn't coming.

Coming through that Yosemite Park we passed those giant redwood trees. Fred Stone proposed that there is where these tree sitters ought to be located.

And say, you talk about a mountain just composed of one solid rock. Why, it's right in there. Coddige's 500 words of Republican history of America would get lost on this boulder. Why, this rock is big enough to reproduce a Hiram anti-treaty speech.

John W. Davis is in the park somewhere and the rangers are looking for him. They don't allow dogs or Democratic candidates in there.

If you want to read the most beautiful thing that's been written in years, it's not a lie, it's not an editorial, it's a will. You wouldn't think that so much love for all mankind could be so practically expressed as it is in the will of ex-Senator Phelan of Frisco. Most of you will only read that he left Helen Willis \$20,000, but get a paper with a copy of the entire will, and you will say "why there is a man that wanted to do some good." For pure charity and tolerance toward all races and creeds it's a masterpiece. It makes me feel ashamed that I ever knocked a Senator.

(© 1930 McNaught Syndicate, Inc.)

Tea Drinking in England

Tea was not brought to England until 1657 and was introduced into the English court by Katherine of Braganza. From the first it was patronized by royalty. When the custom originated, tea was drunk much weaker and in smaller cups than prevailed later. In the second half of the Eighteenth century, afternoon tea became a smart social function.

Analyzing ...YOU...

With the New Science of Syllabics

By C. J. COFFMAN
Dean of All the Enumerators

Laura

"Laura of the laurel-wreath,
Laura of the fame,
All the world her feet beneath,
Makes herself a name."

To the ancients LA meant "not,"
though the L itself meant "of," or
"the."

If you will practice keeping your eyes well opened, tilting your head slightly forward, regarding others with a sweet innocence, you will carry out the second two letters of your name, UR.

Her Royal
Innocence.

For this UR, the ancients say, means to stir up, to awaken. The experiment should be especially successful when practiced upon a mere man.

You have probably learned by now, Laura, that a good many girls of your acquaintance make too strenuous effort trying to win a man.

You don't need to do it. The smartest man of your acquaintance, the best catch in your set, will just naturally melt if you will simply do nothing but gasp with surprise when he says anything, and use babylike eyes when he does anything.

Choose as well as you can, but choose.

Now here's a little formula, "we love most those for whom we do most, and they love most those for whom they do most." So let him do things for you. He will love you if he can express his love to you.

One of the powers you have of which you may not become aware by yourself is the power of radiation of the subtle nature within you. This is called the "power of the aura." You can see that the word "aura" is your own name with the L removed. All you need then is to arise and shine.
(© 1930, Western Newspaper Union.)

ON THEIR VACATION

Mr. and Mrs. M. Mentzer left the first of the week by auto for a few days vacation. Mahlon informed us that their destination was undetermined, and that their plan was to follow the front end of the car and let it take them where it will.

HOME ECONOMICS CLUB.

The Home Economics Club will hold its September meeting at the home of Mrs. Ella Stanford on North Broadway.

The season for yard and garden work is drawing to a close and the

study of the last literature received from Purdue will be taken up at this meeting.

Mrs. Bessie Hudson will tell about "The Origin and use of the Almanac"

Members please be prepared to respond to roll call with suggestions for a local achievement day to be held somewhere in the community sometime during the autumn months. Meet at 2 p. m. Sept. 2nd.

ARRIVES HOME SAFE

In a letter from Mrs. Cornelia Melton of Guide Rock, Nebraska, she states that she and her niece arrived home safely from their trip visiting friends and relatives in Mentone and Ohio, last Sunday. She also says that her address for the ensuing school year will be Culbertson Neb.

ATTRACTION COMING.

Window cards are out announcing the coming to the Mentone Theatre, Saturday August 30, of Bob Hanson and Loring Campbell, in impersonation and magic. These are the people who were here last winter for a couple of nights and gave entertainments with which our people were so highly pleased. However they are billed for one night only this time, and we bespeak for them a packed house. Show at 8 p. m. Popular prices will be charged.

BROWN REUNION.

The fifteenth annual reunion of the Brown families was held Sunday Aug. 24 1930 at Harrison Community School building.

A basket dinner was served at the noon hour to which all did justice.

After dinner the business meeting was held, officers elected were President Adam Bowen; Secretary and Treasurer Lizzie Smith; Assistant Sec'y Cora Bowen. After the business meeting a fine program was enjoyed by all.

The next reunion will be held at Harrison Community School Building the fourth Sunday in August, 1931.

Their were 86 members of the family present, with eleven visitors.

Those from a distance who attended were Mr. and Mrs. J. L. Haney of Smyrna, Florida.

National Parks

Yellowstone is the largest of the national parks. It has an area of 3,346 square miles, while Glacier is second (in continental United States) with 1,534 square miles, and Yosemite third, with 1,125.

Good Man's Reward

To a good man nothing is evil, neither while living nor when dead; nor are his concerns neglected by the gods.

The entertainment to be given at the Mentone Theatre on next Saturday evening is by the same people who played 'Smiling Through' at this place last winter. Everyone who attended that entertainment said that it was the best that had ever been presented in Mentone, so if you want to enjoy something clean and good do not fail to attend the show advertised for Saturday night.

ENROLLMENT NEXT MONDAY.

As far as the Farm News has been able to learn the Mentone public schools will open Monday of next week with enrollment day on Monday.

For some reason it seems to be a difficult task for this paper to obtain news pertaining to the public schools. Whether those in authority are under the impression that we do not care for items of this nature or whether they consider school matters of no concern to the public we are unable to say. However this paper is always anxious to publish any school news of interest to the public, and we believe that the people who pay the taxes to support the schools are entitled to know what is going on at our temple of learning. The secretiveness that has been manifest in the past does not set well with a great many of the tax payers and patrons of the school, and we believe that a little more publicity on school affairs by those in charge would create a more harmonious feeling among all concerned and be of great benefit. Remember that the Farm News will gladly publish anything of a news nature.

A BIG TIME IN AKRON.

Elsewhere in this issue will be found an advertisement of the Akron Free Street Fair, to be held on Monday Tuesday and Wednesday of next week.

The business men of Akron are a live bunch, and have the reputation of doing everthing right which they attempt, and as they are making special efforts to please their guests at their coming street fair, all who attend may expect to have a good time and see a real show.

4H CLUB MEETING

The regular meeting of the four H Club of Mentone was held in the Public Library Tuesday p. m. Aug 17. After the regular business meeting plans were made for the picnic to be held Sept., 1st, at Warsaw City Park. The remainder of the p. m. was devoted to completing their health posters.

IF YOU MET WITH A SEVERE ACCIDENT.

Was Laid up in a Hospital or Home Could You Pay Your Expenses for One Cent a Day?

Pay us \$3.65 or at the rate of a penny a day for a whole year, and in return should you at any hour of the day or night during the year be riding as a passenger on a railroad

train, steam boat, street car, elevated or subway car and by the wrecking of that vehicle you become injured, we will pay you at the rate of \$100 per month for one day of more for a period of a year's time. Should you be killed we will pay to your estate \$5,000.00 and in event you are permanently disabled by the loss of one or more limbs or the sight of an eye or eyes, we will pay you from \$1,500.00 to \$5,000.00 depending upon the extent of your disability.

Suppose you should become injured from the wrecking of your automobile, or while riding in your friend's car. Suppose you are riding in a taxi cab, motor bus, or elevator, and through the wrecking of that vehicle if you should be injured we would pay you at the rate of \$100.00 a month, and if killed your estate would receive \$1,000.00; also for loss of sight, or limbs from \$500.00 to \$1,000.00.

That's Not All—This same indemnity would come to you for injuries received as a result of being struck by lightning, injured in a tornado, by being burned or suffocated by smoke in the burning of a church, school building, theater, store office building or lodge room. Should you drown while bathing at a bathing beach your estate would receive \$1,000.00.

Furthermore—Suppose you were struck, knocked down or run over while walking or standing on a public highway. Suppose you were injured while driving a truck, wagon or buggy, and if you are a farmer suppose you were injured while operating a threshing, mowing or heading machine, a binder, harrow, plow or tractor, we would pay you for one day or more of disability at the rate of \$50.00 a month; and if killed your estate would draw \$500.00.

This 1c Day Will Also—entitle you to a \$10.00 medical or surgical attention for any of the fore-going injuries that does not totally disable you, and if you are injured in any accident, any place, any time and are laid up for a month you will receive \$25.00.

A real honest to goodness accident policy that covers the pedestrian as well as the traveler. Just think, all this for only 1c a day.

AMERICAN BENEFIT LIFE ASSOCIATION

Applications taken at Farm News Office.

Why It Hurts You

Generally the person who is bitter and remains bitter is really preserving bitterness that originated with some one else. Thus he is dominated, not living his own life.—Woman's Home Companion.

M. E. CHURCH NOTES.

The W. F. M. S. will meet at the church Friday afternoon Aug. 29. This is the last meeting of the year and officers will be elected for the ensuing year. Also Mite Boxes will be opened with an appropriate service. Each person is asked to bring a covered dish and their own table service.

The Standard Bearers will meet at the church Wednesday afternoon August 27. Mrs. Geo. Thomas district president will be present. All Standard Bearers are urged to be present.

Regular Services are as follows:

Sunday School 9:30 a. m.
Morning Worship 10:30 a. m.
Evening Worship 7:30 p. m.

Prayer Meeting Thursday evening at 7:30. W. O. Power, Pastor.

TALMA NEWS ITEMS

Mr. Howard Horn has accepted a position in a School at Fowler Ind., for the coming year.

Mrs. Omer Horn and daughters of Elkhart spent the past week with Mr. and Mrs. Peter Horn and family.

Mr. and Mrs. Verdie Brockey and Mr. and Mrs. Paul Myers spent Sunday with Ernest Bryant at Lafayette

Ray Alderfer of Kalamazoo Michigan spent the week end with his parents, Mr. and Mrs. Vincen Teeter

Mr. and Mrs. Erwine Truex and family of North Liberty were Sunday dinner guests of Mr. and Mrs. Melbern McGowen and family.

Dorothy Alderfer of Kalamazoo Michigan is taking several weeks vacation at the home of her parents, Mr. and Mrs. Vincen Teeter and family.

Irene Harrington of Benton Harbor Michigan and Everet Fisher of Rochester spent Sunday evening with Dorothy and Ray Alderfer at the Vincen Teeter home.

Mr. and Mrs. Milo Horn and family of Hammond spent Saturday night and Sunday with his parents, Mr. and Mrs. Peter Horn. Their son Keith will stay for a few weeks visit.

The Misses Dorothy Horn and Geraldine Haimbaugh and Messrs Von Kockenderfer and Delbert Hunter spent Thursday afternoon at the Old Settler's Picnic in Columbia City.

Harold Tucker and John McGowen of Plymouth motored to Detroit Michigan last Wednesday and had the pleasure of viewing Henry Ford's automobile plant and his home. They also crossed into Canada and then was ferried across the river. Returning home Friday noon. Reporting a very good time.

Miss Evelyn Hartman of Plymouth, Miss Charolette Emmons of Lapaz and Mr. Norman Becker and John McGowen of Plymouth were dinner guests Sunday of Mel McGowen and family.

The reunion of the '30 class of the Talma H. S. was held Sunday Aug 24 at the Colonial Hotel, Lake Manitou, Rochester Ind. About thirty-five members were present, among the guests were their principal, Mr. Leon Kotterman and family of Culver.

Mr. Howard Horn entertained Saturday evening at the home of his parents, Mr. and Mrs. Peter Horn. Guests were Messrs Eugene Eilman, J. C. Henry and Oscar Valentine of Knox Indiana. Mr. Henry is principal of the school at that place. Mr. Valentine and Mr. Horn were very intimate college friends.

The regular meeting of the Newcastle Twp. Farm Bureau was held Wednesday evening August 20, with a large crowd in attendance. Talks were given by County Agent Harry Rosenburg, Wm. Gray and Artie Miller. An announcement was made by Mrs. Ora Horn of the County picnic to be held September 14, at Adams Grove. Songs were given by the Four Cylinder Sod Busters quartet, a reading by Virginia Adamson, a piano solo by Dorothy Deamer and a violin solo by Herman Barkman. The program for the next meeting which will be held on Sept. 17th, will be furnished by the 4H Club of Newcastle Twp.

GOOD READING

Yiddish is a composite language the basis of which is German.

The barnacle, belonging to the family of crabs and lobsters, uses its legs to kick food into its mouth.

Forty-eight per cent of the electrical power used in France is produced by water power, 50 by steam and the remainder imported.

More than 1,000 feet long and 42 inches wide, the world's largest power belt has been built in California from rubber and cotton fabric.

When a fire-resisting linoleum of English invention is heated it emits a heavy gas that lies close to the floor and smothers all flames.

CLARK'S

"I jumped a foot,"

said MRS. MOLLA PROPP,

"when the transmission backfired."

THE radio is a wonderful invention, my dear, and I never really appreciated what a wonderful comfort it is to have one in the car until last week.

Henry and I went out for a lovely evening drive and it was rather late when we started back home. All at once, "Bang!" went a tire and Henry said, "...well, you might know what HE would say under the circumstances.

Of course, we both piled out and Henry looked into the tool box under the seats. Then he looked under the floor covering. Next he lifted the lid in front over the engine and looked all around. Finally he went back and looked in the tool box again.

It may have been woman's intuition, but I rather suspected that Henry was looking for

something he couldn't find, and I asked him what it was and he said it was the handle for the jack or Jill, or some such person's name. "Do you mean that long, flat piece of iron?" I asked. "Yes," he said, "where the hek is it?" "Oh, I used it to poke the fire with," I admitted.

Then I turned on the radio for what Henry said wasn't fit for a lady to hear. And while Henry raved and looked around for the plank and things one lifts wheels with, I listened to the grandest music.

Of course, deep down in his heart Henry knew it was all his fault for not getting a new poker after we lost the other one. But when one is listening to the Tor-reador Song from Bohemian Girl, one just hasn't the heart to rub it in, my dear.

Copyright, 1930—John Jensen.

Welcome Disappearance

A writer in a business magazine says the "go-getter" type of salesman and business man is falling into disrepute. And rightly. It was too hard on the type to which the majority of us belong—the weak, defenseless, victimized Come-Takers.—Detroit News.

"Bug's House" Always Full

That "Bug's House" has never wanted for a tenant, and never has been investigated by the sanitary authorities, was stated by its owner during a recent census in England of places with peculiar names. How the "Bug's House," which is in Surrey, got its name years ago, is a mystery.

Radium Production

A chemical plant which takes eight years to make one ounce of its most valuable product is to be found in Czechoslovakia. That product is radium, the annual output of which is 3.5 grammes, equivalent to one-eighth of an ounce, worth about \$2,500,000. Three hundred workers are employed and thousands of tons of raw material are consumed each year.

Insecticides in Safe Place Best

Never Keep Poison Where It May Be Mistaken for Harmless Article.

(Prepared by the United States Department of Agriculture.)

A clerk's error in selling a sulphur-arsenic insecticide instead of sulphur resulted in the death of a number of hogs and caused the dangerous illness of two persons on a farm in New York, an investigation by an official of the food and drug administration, United States Department of Agriculture, has revealed.

The supposed sulphur was used in preparing a sulphur and molasses mixture as a home remedy for a cold. This resulted in the critical illness of one person. Then the drug was burned and the fumes were inhaled by another, also as an attempted treatment for a cold. This person became unconscious and for some days was severely ill.

Used to Cure Hogs.

Investigation by a federal food official revealed that this same sulphur had been used last fall in an attempt to cure hogs thought to be suffering from cholera. The preparation was mixed with the feed of 60 hogs, and a majority died. It was thought at the time that the deaths were due to cholera.

The sulphur used in the three cases was analyzed by the food and drug administration and was found to contain arsenic. Fearing that others would buy this same product and use it as sulphur, the food officials traced it to its source.

Investigation showed that the mixture supposed to be sulphur had been bought at an implement store. This store had a bag of sulphur and also a bag of sulphur-arsenic insecticide. Both were in a dark attic. A clerk had sold the poisonous mixture thinking it was sulphur.

Three Errors Made.

Officials of the food and drug administration point out three errors in the situation. A poison should never be kept where it may be mistaken for a nonpoisonous product. Sulphur is not recognized by the modern veterinary science as a cure for hog cholera. Modern medical science does not consider sulphur effective in the treatment in colds either as a mixture of sulphur and molasses or as sulphur fumes.

Hessian Fly Has Cost Country \$100,000,000

Of all the insects working at cross purposes with man, few have such records for destructiveness as the Hessian fly whose activities have cost the country as much as \$100,000,000 in a single year, the United States Department of Agriculture's records show.

In 1927, according to estimates, Kansas alone lost 20,000,000 bushels of wheat to the Hessian fly. Serious out-

breaks of Hessian fly activity occurred in 1914 and again in 1919 and 1920. At least eight serious outbreaks have occurred over the northeastern one-third of the country within the last 45 years. Local activity is evident almost every year somewhere in that large territory or in limited areas on the Pacific coast.

To assist the farmer in combating this pest, the United States Department of Agriculture has recently published Farmers' Bulletin 1627-F, "The Hessian Fly and How Losses from It Can Be Avoided." It is free to anyone requesting it.

Irregular Soy Stands Not Considered Good

The best yields of soy beans cannot be obtained from stands that are very irregular as is common in most fields. Beans put in with a grain drill at the University of Illinois, and which produced what was considered a good stand, were found to vary all the way from one bean plant in a foot of drill row to fifteen plants. Such irregularity is largely due to variation in flow of seed through the drill as modified by the jarring or lack of jarring of drill. Irregular physical condition of the soil caused by clods and ridges and holes make for irregular distribution of the seed and consequent irregular stands and lower yield.

Farm Hints

Manure with superphosphate makes a combination that is hard to beat as a pasture fertilizer.

Early threshing helps to control the angoumois grain moth. To save wheat from the insect the grain should be threshed not later than September 1.

Anemia in pigs is caused by the gradual decrease of blood-forming elements in the blood, as the sows milk is low in iron and copper, which have restorative properties.

According to the thirty-fifth annual report on fertilizer inspection work in Wisconsin, farmers in that state used 40,671 tons of fertilizer of various kinds in 1929. In 1919 the tonnage used was only 10,000 tons.

When through with the plow, grease it well and slip an old gunny sack over the lay and moldboards and tie it at the top. This keeps the grease from being rubbed off and prevents difficulty in scouring next time the plow is to be used.

Would Be a Respite

NEW SCHOOL HOUSE TO COST \$66,000.00

F. L. Peck, of Topeka, Lowest Bidder, With \$52,009.00 on General Contract.

WORK TO BE RUSHED.

Contracts for the new \$66,000 Men tone and Harrison township high school were awarded late Wednesday by Willard East, township trustee. The contracts, were signed Thursday in the office of Brubaker & Rockhill, Warsaw and work is to commence on the building not later than September 1. The building is to be rushed to completion as soon as possible.

The estimated cost of the building was \$72,000 and the entire contract let is \$6,000 below the estimate. Out of 24 bidders on the general contract F. E. Peck, of Topeka, Ind., was the successful bidder. His bid was \$52,009. The plumbing and heating contract was awarded to H. W. Canvin, of Huntington, for \$13,192.45.

The electrical work was awarded the Henry Electric Co., of Fort Wayne for \$1,263.

The new school will be fire proof and will be built of brick. It will be two stories in height, plus a large basement. The building will be located just east of the interurban tracks, near the community building.

In the new building will be found a modern community building with stage, and kitchens. The kitchens while available for community gatherings are to be used in the domestic science work.

Henkel & Hanson, of Connersville, are the architects in charge of the construction.

MAKES A DISTRIBUTION

OF TWENTY PER CENT.

Judge Royce has approved a twenty per cent distribution by the receiver of the defunct Piercetown Bank to the depositors and has approved the petition of the receiver to assess the stockholders of the former State Bank 100 per cent to pay the depositors and other creditors.

ONE HUNDRED

CARS OF ONIONS.

That seems like a lot of onions for one farm to produce. However that is the estimate that is placed on the crop at the Fribly farm, east of Bourbon. There are now over fifty people engaged on this farm taking care of the crop and it is estimated that in some places the yield will go 1000 bushels to the acre.

AGAIN ON THE FRONT PAGE.

Aimee S. McPherson, Evangelist!
Again Breaks Into the
Limelight.

This time she is accused of breaking her mother's nose. Aimee explains the case by saying "we had a slight argument, but mother received her broken nose when she threw herself on the floor in a tantrum." Aimee is sure a good actor and she may be able to fool some of the people and make dupes out of them on this earth but when she arrives before St. Peter, we are afraid that she will find tough sledding.

USE LIME FOR LEGUMES, PURDUE LEAFLET URGES.

"The main purpose in using lime materials on Indiana farms is to neutralize soil acidity and supply enough lime so that legumes may be grown regularly and successfully," states a publication recently issued by the Purdue University Department of Agricultural Extension. The six page leaflet, number 152, entitled "Liming Indiana Soils," was prepared by the Agronomy Department of Purdue.

The leaflet states that one-half of the soils in Indiana have become so acid that clover fails regularly. results of experiments conducted by the Agronomy Department in several parts of the state on different types of soil are cited to indicate the importance of using lime in some form, particularly in the production of legume crops.

Before applying lime, it is advisable to make some sort of a test for acidity of the soil, to learn the approximate amount of lime that will be needed; the leaflet recommends. The cost of material will determine the kind of lime that should be used. Theoretically 100 pounds of finely ground limestone, 56 pounds of freshly burned lime, 74 pounds of hydrated lime and about 90 pounds of air-slaked lime have equal neutralizing power. From these figures, the comparative costs may be calculated.

Lime may be applied at any time during the year, and should be spread evenly over the ground. If the soil needs lime at all, it is usually wise to apply at least a ton to the acre. Lime will not take the place of fertilizer, nor will fertilizer take the place of lime, the authors of the leaflet point out.

HAS TONSIL OPERATION

Doris Shafer of this place underwent an operation at the McDonald hospital, Warsaw, Wednesday of last week for the removal of tonsils and adenoids.

Farmers Who Are Interested in Better Eggs and Who Are Interested Enough to Help Themselves as Well as Us.

It goes without saying, that we have done more for the farmers in the way of egg price than any other buyer in Indiana, and have done more hard work to try to get a "Mark" on Indiana eggs than any other firm in New York City. We are working our heads off now trying to help you get more for eggs. Now, won't you please listen and try to follow our advice. We are not hoggish and don't ask all of this simply for our own benefit, but what helps us, sure will help you.

Now please try and adhere to the following advice for one year and see the results:

Get a good strain of straight blood poultry that lays a good sized egg (either white or deep brown) there is no difference in price now, and the general average price is about the same for equal quality eggs (size and cleanliness considered.)

Pick up your eggs every morning and evening, and carry a damp cloth with you, cleaning all traces of dirt off before it hardens and sticks to the shell.

DON'T WASH THEM,

But simply wipe them with a damp cloth and don't leave them streaked with dirt but clean them. Keep them in the coolest place about the house never allowing rain nor sun to touch them.

Use all ill-shaped eggs at home because they are broken in shipping. Market your eggs at equal intervals twice each week—that is, we would like to have them each Monday and Thursday or each Tuesday and Friday, rain or shine.

Keep every egg that you are not sure of being strictly fresh at home or ship them separately, as we don't want to spoil a case of nice eggs with a few of doubtful character, and you can't afford to sell such eggs, as it hurts you as bad as it does us, for we have to buy eggs on a basis of what we get for them, and if you slip in a few bad eggs on us, it only hurts our sales, and causes us to have to lower our price, so you see the fresher we get the eggs the more we get, and the more we can pay you. Never keep roosters with your hens after June 1.

Watch the size of your eggs and when they begin to run small, then feed them some good laying mash with a little Cod-liver oil in it or some soaked oats with a little Cod-liver oil in it or anything to keep the egg size up to not less than 23 ounces per dozen or over.

Now please try and follow this advice and let's work together and put our eggs in a class with California, Washington and Utah. The Pacific coast states ship eggs to New York City, and get from 3 to 10 cents more than your eggs bring, and it is because they ship fresh, clean, good-sized eggs graded up to a standard, which you can do if you will work as they work. Now if you will work as hard as we are, trying to put good eggs on the map, then we will show the market that Indiana has just as good eggs as any state in the union. We will do our best and now it's up to you who sell us eggs, to work as hard as we do.

Yours for Better Eggs.

Quality Butter & Egg Company

FARM POULTRY

POULTRY KEEPERS SHOULD CULL NOW

Low-Producing Hen or Undersized Pullet Must Go.

Poultry keepers should cull out all the "boarder" or nonproducing hens together with those pullets that are weak and do not show desirable qualities.

"In this way," says A. G. Oliver, poultry specialist at the North Carolina state college, "the producer gets a much higher price for his stock than is possible later on in the year when the market is glutted, and in addition, a large amount of feed is saved."

By going through the flock every week or two after the first of June, the owner can easily pick out the cull hens and market them in an orderly way. This process should be followed from the first of June until the first of October.

Mr. Oliver states that the culling done through the summer months is different from that done in October and November. The first is to remove the poor individuals, while that done in the fall is to select the best hens for flock improvement.

As long as a flock is giving 50 per cent production, it is a waste of time to go over the birds but as soon as the production drops to 20 or 30 per cent, culling should begin. The farmer will know how many well developed and desirable early-hatched pullets he has. The low-producing hen or the undersized pullet should be taken from the flock and sold.

Those hens that lay only four to six months should be disposed of first and the others gradually culled out until only those that lay eight or nine months are left, he states.

Encourage Chicks to Roost at Early Age

Chicks should be encouraged to roost as soon as well feathered, according to Stephen M. Walford, Purdue university.

Early roosting will do much to prevent smothering and crowding in the corners of the house, which also stunts the growth of birds that do not die in the huddle.

If heavy breeds of chicks do not take quickly to the new custom they may be compelled to use roosts by putting in slanting roosts which have chicken letting, preventing their getting on the floor of the corners.

After chicks have become accustomed to roosting they can be raised to the customary height or a couple of feet above the floor.

Confining Hens Found to Be Most Profitable

Farmers who have changed their flocks of hens from ranging on the farm at large to a smaller area that can be fenced against other poultry and animals have found that their hens laid more eggs and had less disease, as the ground was free from worms and disease in the beginning.

The reason for this is that generally hens in smaller yards are fed more carefully than when running at large. Then, too, a new lot can be provided each year or each six months, which keeps the hens away from worms and diseases to a great extent. Baby chicks should be handled in similar manner.

Poultry Hints

While some men overfeed, the common mistake is to feed too little.

Feed to 40 pounds of dried skim milk to 100 pounds of mash if coccidiosis appears.

Intelligent marketing is doing much toward making turkey growing more profitable and successful.

To buy more than four chicks for every square foot of brooder house space is a risky investment.

All mature poultry should be confined to a limited area and not allowed to range with the young stock.

It is better to make a reasonable profit on 100 chickens than it is to lose money, or break even, on 200 or 300.

All Leghorns lay white eggs. The appearance of a few light-brown eggs in Leghorn flocks means the outcropping of other blood which may have come from an accidental mating several generations before.

There is a tendency to creamy white shells in some Leghorns, which can be largely eliminated by setting only pure white eggs.

Cod liver oil should be omitted from the ration fed broilers for two weeks before marketing as otherwise the flesh will have a fishy taste.

Dust wallows are a source of much pleasure to the hens during the summer months. Spade up the fresh, moist earth in the shade, and the hens will do the rest.

According to Age

Young folks talk about last night. Old folks talk about thirty years ago. —Atchison Globe.

Uncle Eben

"De banjo," said Uncle Eben, "is kind o' like a human bein' dat needs expert management to keep it makin' de right kind of a noise." —Washington Star.

REMARKABLE IS THIS CASE WON BY KONJOLA

Rheumatism and Other Ailments of Six Years Standing Are Conquered by Modern Medicine.

MRS. LILLY A. WARD

"Six years ago my health began to fail," said Mrs. Lilly A. Ward, Y. W. C. A., 329 North Pennsylvania street, Indianapolis. "First my stomach became disordered and I suffered terribly with pains of indigestion. Formation of gas caused my heart to palpitate. My kidneys became weakened and steadily grew worse until I had to rise several times every night. Then I began to suffer with rheumatism. My limbs swelled; the muscles and joints became stiff and sore, and I suffered agony with this dread ailment.

"Finally a dear friend recommended Konjola and insisted that I take it I took this medicine with strict adherence to directions until I had used about ten bottles, and all my dreaded ailments have vanished completely. My stomach never bothers me, and my sleep is undisturbed. The swelling, aches and pains are all gone from my limbs, and I feel fine in every way. I get a lot of pleasure out of telling people what Konjola did for me."

Konjola has become the most talked of medicine in America because it makes good. And Konjola makes good in the most stubborn cases when given a fair trial. Six to eight bottles are suggested as a fair test.

Konjola is sold in Mentone Ind., at the Shafer & Goodwin drug store, and by all the best druggists in all towns throughout this entire section.

Measuring the Job

A Job may be good to different people because it is quiet or because it's exciting. Because it offers routine or adventure. Fame or anonymity. Incentive or forgetfulness. Diversion or a life-work.—Woman's Home Companion.

The Reason

We get so many eggs from Mentone Producers is because we are in a position to pay the most for Quality Eggs. And then Our Quick Returns is

Another Factor

That makes friends among the shippers and causes so many to ship their Finest Eggs to us.
