JUST THINKIN'

by Charles S. Kinnison

The Old Slate

Say, what has become of the little old slate
That we used at school, back in—say '98?
The little old slate that was bound with red felt—
And don't you remember how musty it smelt?
Or, maybe, that smell that I'm thinking about,
Belonged to the sponge that we used to rub out
The words and the numbers we'd awkwardly writ.
(Rpt. some little rascals—my goodness!—used spit!)

And then, as they dried it—it's hard to believe—
They used nothing less than their hand, or their sleeve!
That seems like a terrible thing to be told—
But things are so different, before you are old.
And don't you remember that sharp little sound
The slate pencil made, as we scratched it around?
And oh, what a SCREECH, now and then we would make—
I'll bet teacher thought that her ear-drums would break!

What wouldn't you give to be back in that seat
With your little slate, when all life was so sweet?
And wouldn't you like to take back with you, too,
That same little happy-eyed gang that you knew?
But I don't believe we would be different men
If we COULD go back, and start over again.
But oh, if we could, it would surely be great
To start out a lot more with a new and clear slate!

THE \$100.00 FARM NEWS CONTEST

ENDS JULY 12, AT NINE P. M.

There are only ten days more in which to get votes in our contest and a person who puts forth the greatest effort during these few days will stand a good show of winning the first prize. The number of people who have entered this contest have not been as great as we had anticipated and for some reason there has been a lack of interest in the affair. However the entries are sufficient to take care of all the prizes and as there are several who have a large number of votes to their credit we expect that the finishing days will see some hustling and as each renewal or new subscription secured means 2000

more votes to the contestant it should not be a difficult matter for most any one to get one of the prizes.

As there are a great many subscriptions that have expired among the top-notchers.

WORLD SWAYED BY EMOTIONS

By RT. REV. FRANK E. WILSON, War Chaplain.

We hear a lot today about modern civilization being founded on merciless selfishness. My own experience tells me such is not true. We think we are hard, but as a matter of fact we are painfully soft. Popular magazines are pouring forth sentimental mush because it is what the public wants.

The moving pictures present prolonged appeals to your most watery emotions. The air is filled with speeches consisting of flowery rhetoric which doesn't attempt to say anything but only to make you feel good.

Public sentiment vaporizes over anything that touches its softer sensibilities. One of the scandals of our day is the way juries render verdicts in accord with their emotions rather than the dictates of justice.

I would guarantee that if all the newspapers of Chicago collaborated in presenting some wholly unworthy cause embroidered with quantities of sob stories the public would forsake its judgment and pour in thousands of dollars for something which ought never to be done. Our great danger lies not in a settled spirit of cold indifference, but in unreliable outbursts of emotional insincerity.

"ADS" AS BUSINESS TONIC

By LOUIS WILEY, Business Manager New York Times.

There is an unfailing tonic that will sustain business in the continuous progress which makes prosperity. The tonic is intelligent advertising. Business "turned a corner" in 1929, and as a result the machine of prosperity has slowed down temporarily. Since advertising is a fundamental part of this machine, it must contribute to the restoration of normal conditions.

Advertising has new worlds to conquer. We do not yet know all of the profitable possibilities of this amazing aid of business, so successful in the two-line classified advertisement in a single daily newspaper, or in a schedule which may embrace full pages in hundreds of newspapers, double trucks in color in magazines, and appropriations of millions of dollars to keep a thousand-million-dollar company operating profitably.

The lesson of advertising to business in 1930 is work. Do not advertise if you are not ready to work, to accept the business rewards which good advertising brings. Do not advertise if you want to let your business remain stationary or grow smaller.

If you are ready to go ahead to achieve that rate of progress which is prosperity, well-planned advertising is the tonic.

SHERWIN-WILLIAMS PAINT HEADQUARTERS

**Buy your paint on the job basis
... and save**

S-W Paint Products are sold the world over under this famous trade-mark

SWP—the world's best house paint—costs less on your house than cheaper paint. This is because its wonderful body thoroughly covers more square feet of surface per gallon. Therefore its slightly higher price per gallon is more than made up by the fewer gallons needed for the job. That is why you should buy by the job—not by the gallon.

The beautiful, weatherproof SWP colors and its tough film last twice as long as cheaper paints. That means that you save from 50% to 60% on repainting when you use SWP. It is the world's greatest house paint bargain. Note the many Friday and Saturday Suggestions we offer this week.

FRIDAY AND SATURDAY SUGGESTIONS

SWP House Paint

The world's standard of house paint quality. SWP is made in one quality only and that the very best. Famous for long life and the permanency of its many beautiful colors. Covers more square feet of surface per gallon. Costs less on the house than cheaper paints at a lower price per gallon. Regular colors, per gallon..... **\$3.50**

S-W Flat-Tone

A washable flat wall paint for interior decorations. Produces beautiful velvet finish on plaster or wallboard. Per quart **90c**

S-W Semi-Lustre

An interior paint with the hard-drying and washable qualities of enamel. Dries with half-enamel gloss. Per quart..... **\$1.00**

*Specify SWP
and engage a
good painter*

Gloss White, per gallon **\$3.75**

AUTO ACCIDENT.

While enroute to Warsaw on Thursday forenoon of last week, Mrs. Fleck, accompanied by her granddaughter, Loa Jeanne, and Mrs. Bessie Halderman, met with an unusual accident. When about two and one-half miles south-east of Warsaw one of the tires blew out

with sufficient force to turn the car completely around, throwing it against a telephone pole and upsetting it in the ditch. The automobile was badly damaged but luckily the occupants escaped serious injury. Mrs. Fleck only receiving minor bruises and scratches.

W. C. T. U. MEETING

The W. C. T. U. will meet Tuesday at the home of Mrs. Alva Creviston in an all day meeting. A picnic dinner will be served at the noon hour. County officers will be present. All desiring to go will meet at 10:00 o'clock at Mentzers corner, conveyance for all will be furnished. Come and bring a friend.

GET COLD FEET

AND DROP THEIR LOOT.

One night last week some parties attempted to pilfer some tools from our town painter, Orville Sarber. It seems that they were loading his tools in their machine and had just got one of his ladder brackets in the car when they were frightened away. Not having any use for the one bracket they dumped it out a few blocks down street. Mr. Sarber says that he has a good idea as to who the parties were.

TRUSTEE WILLARD EAST

IN AUTOMOBILE CRASH.

Willard East, trustee of Harrison township, was painfully injured Wednesday evening at 5 o'clock when his car crashed into a machine driven by W. J. Beville, of Oil City Pa., when Beville stopped his car without warning, ahead of East. The accident happened about half a mile east of Mentone in front of the farm home of Wallace Hibschan.

East was driving a Chevrolet sedan and Beville was driving a Ford coupe. Both cars were considerably damaged and Mr. East sustained cuts about the face and slight bruises about the body.

The Pennsylvania man was badly shaken up but was otherwise uninjured.

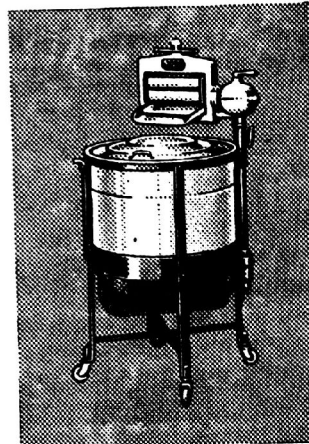

Mr. East said he was driving about 35 miles an hour and that he had followed the car all the way from Warsaw. Without warning Beville stopped suddenly and the Chevrolet crashed into him before East could get his machine under control.

Beville refused to pay for the damaged car and is said to have gone to South Bend.—Warsaw Times.

The Dividing Line

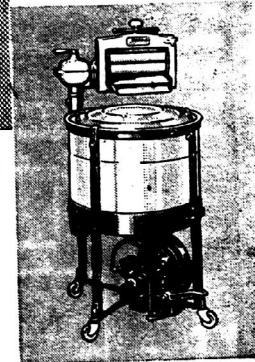

When you begin to get too much satisfaction out of your own altruism, watch out; that's not altruism: it's vanity.—American Magazine.

HORTON—A GOOD NAME FOR 59 YEARS

At left, the EMERALD ELECTRIC Model for standard current or farm power \$99

Below, gasoline engine model with the famous Johnson Utilimotor \$140

Never Before Such Washing Machine VALUE

NOTE carefully these features:—porcelain tub, inside and out—sealed mechanism insuring dependable service—Lovell pressure cleanser with big, semi-soft rollers to complete the cleaning and remove water without harming a fastener.

Try to match the Horton value—at the price. You'll realize then the value of Horton experience—59 years of fine manufacture.

Let the Emerald do your next washing—free and without obligation. We'll gladly arrange it—come in or phone.

Mr. and Mrs. Ford Meredith and children and Miss Thelma Horn of Elkhart spent Sunday at the Henry Meredith and Granville Horn homes.

Mr. and Mrs. Frank Warren entertained at dinner Sunday, Mr. and Mrs. Stanley Wise of Fort Wayne and Mr. and Mrs. Fred Garrison and son. Mr. and Mrs. George Emmons and family of South Bend were callers in the afternoon

Mr. and Mrs. Frank Laird and Mr. and Mrs. Leslie Laird and Mr. Walter Barkman returned home last Tuesday after a weeks visit at Kansas City, Missouri. They report a nice trip, fine crops and threshing in Kansas.

SODALES CLUB MEETING

The members of the Sodales Club were very pleasantly entertained Thursday p. m. at the home of Mrs. Dean Nellans.

During the business session plans were made for the annual clubpicnic the time and place for which will be decided later.

Goldie Mollenhour had the subject of "House Keeping Thirty Years ago and House Keeping to-day" which she handled in a very capable and interesting manner.

The social time was spent in cheerful conversation and playing rook, in this Golda Warner won the prize for high score.

The Nellans home was decorated with garden flowers. The hostess was assisted by Mrs. F. B. Davison and served delicious refreshments.

This was the last meeting of the Club until next September and all present agreed it to be one of the best meetings.

Mrs. Warner Gill of Chicago and Miss Penelope Shoup of Warsaw were guests of the club.

SAYS WILL ROGERS

BEVERLY HILLS, Cal.—Well, all I know is just what I read in the papers and what I run into as I prowled hither and thither. You know I have often said in answer to inquiries as to how I got away with kidding some of our public men, that it was because I liked all of them personally, and that if there was no malice in your heart there could be none in your "gags," and I have always said I never met a man I didn't like.

Even out in Chicago last week, why there is just an awful lot of fine things about the old town besides bullet holes. It's one of the most progressive cities in the world. Shooting is only a side line. It's a great place. You only have to meet it to know it good. Well, that's the way it is with humans, you read a lot of other people and kinder form a certain opinion.

Now there has been a whole lot in the papers lately about the much discussed prize fight between Jack Sharkey and this young fellow Schmeling, and the sport writers have had a carnival for a year or so writing about the "gabby Gob," and a million and one titles that denoted that he was nothing but a big breeze. Well, I was up in Boston a week or so ago and through a mutual friend I happened to meet this fellow Sharkey. Had a long chat with him and he drove me out to his home and met his wife and three great kids. I had always kinder admired him in spite of what was said, for he had always had the reputation of being a very clean living family man and well liked by his neighbors. Now when your neighbors don't get wise to you you must be pretty straight laced.

Well, he told me a lot about the fight, and he told it in a very straightforward way. He didn't have any crying to do, or any Alabias. He says he knows that he hit the fellow right on the belt, but he don't think it was below it. He said he never seemed like he was having an easier fight. He said he had trained hard and expected much more opposition out of the fellow, and when this thing come and was standing over in the corner with his hands on the ropes just waiting for them to declare him the winner, when they held up the other fellow's hand here are his words, "Well, my chin dropped and it hit me on the chest (low down on the chest), and it almost

knocked me out. My heart went down and down out of one leg then hopped across into the other and come up a ways and stopped dead. Here I was with the Championship in my lap and blowed it again."

Well, it was really pathetic to hear the fellow explain it.

He has a lovely home out in the fashionable section of Boston. It's built and furnished all in good taste. (That is as far as I am able to judge.)

Round June 22, 1930, here is what will be headlined in the planet Mars morning papers:

"A young man from a place called Earth flew in here yesterday. He had been in the air continuously for two months. He had some letters of introduction from the Chamber of Commerce in a place called Englewood, New Jersey. He asked to have his ship refueled as he is taking off for Venus in the morning."

What can we do for this Bobby Jones that keeps monotonously winning all these golf championships? I would propose him for President, but I haven't got it in for him that bad. On the golf course it's just your opponents that are shooting at you, but it looks like in the White House your friends are the ones you got to watch.

Just been to see Charles Dawes, right from London with an accent longer than his pipe handle. He is a real guy, this Dawes. He can make good at anything. They want to use him in the Chicago racketeer warfare. Both sides are making him offers.

That sweeping victory of Dwight Morrow is going to give many a wet candidate false encouragement. He was running on something besides a platform. He could have run as a Bolshevik and won.

The only thing will keep other States from following New Jersey's example will be there just ain't any more Morrows.

I said Daniel Webster wrote the dictionary. Well, these Harvardites have been calling me up before daylight telling me it was Noah Webster and not Daniel. How was I to know? I never read the book. I never could get interested in the thing.

Well, anyhow, the mistake will only be noticed in Boston.

Horticultural News

TRY GIRDLING TO MAKE TREES BEAR

Heroic Measures Are Sometimes Found Necessary.

What might be called heroic measures are sometimes necessary to bring obstinate apple trees into bearing, says W. H. Alderman, chief of the division of horticulture, University of Minnesota. Plum as well as apple trees may make vigorous growth for a series of years but bring forth no blossoms or fruit.

Unproductive trees that are staunch and vigorous, that have the constitution to withstand a major operation, can be forced to form fruit buds by girdling, said Professor Alderman in a talk before the short course in horticulture at University farm. On non-bearing trees that are making good growth a half-inch girdle of the bark only, cut about the first of June, will not injure the trees and will bring them into bearing the following year.

A fine wire tightly bound about such trees, while not quite so effective, will cause them to produce. The wire will cut into the bark and should be removed in August or there is danger that the tree will be killed.

Girdling should not be practiced on weak, unproductive trees, for it would make a bad matter worse, said the university horticulturist. Lack of nitrogen may be responsible for poor growth and under development. In which case nitrogen in the form of barnyard manure, or sulphate of ammonia or nitrate of soda should be applied to the soil. Combine this fertilization with rather heavy pruning and the chances are such trees will respond with regular crops of fruit.

Important That Sprays Be Continued in Summer

Since it is important that we control other diseases, particularly apple blotch, as well as apple scab and also attacks of codling moth, curculio, and other insects. It is important that the fungicidal and insecticidal sprays be continued from the calyx period up until within about five or six weeks of harvest time, making in all from six to seven to as many as eight or nine spring and summer spray applications. The exact number of sprays will depend, of course, upon the severity of the attack to be controlled and the length of the growing season.

The spraying chemicals to use may consist of either lime sulphur or bordeaux. Lime sulphur at a strength of from one to one-fourth gallons to fifty gallons of water plus one pound of arsenate of lead is preferred, particu-

larly for the early applications, as it is less likely to do injury by russeting or burning the young fruits than bordeaux and arsenate of lead.

Moreover, the first cover spray following the calyx period, if made within 10 or 12 days, should consist of lime sulphur and arsenate of lead, on account of the danger of russeting or burning the young fruits at this time. Where apple blotch is serious, all later sprays should consist of bordeaux 2-4-50 and one pound arsenate of lead, because bordeaux gives better control of apple blotch than lime sulphur and arsenate of lead.

Horticultural Facts

The most important essentials in spraying or dusting are thoroughness, timeliness, and the use of the proper mixture.

Gooseberries and currants add much to the food value. These are easily grown, require little care and give big returns.

For the strawberry bed select most fertile soil and one as clean of weeds as possible. Clover sod or heavily manured sandy soil are best.

Grapes should be pruned severely every year and it is a tremendous job to prune and cut away the surplus wood and remove it from a woven wire trellis.

Discontinue cultivation in the apple orchards the latter part of June or early in July. Better color to the fruit will result and cultivation costs are kept low.

It would seem that as the small fruit plantings are constantly growing less and less, that it is the duty of every one to encourage the proper planting and care of small fruit patches, so that we may again point with pride to the fruit produced on all home grounds.

When the fruit trees become rather thick and brushy, so as to create a dense shade, then it will be well to thin out the smaller branches.

Fertilize grape vines in the spring just as the buds are bursting. One-half to one pound of a nitrogenous fertilizer will be sufficient.

The apple scab fungus is present in all apple growing regions. It is generally, however, more serious in the northern apple growing district than in the southern.

First Formation of Coal

Peat is usually found in bogs or marshes and is practically the first transitory stage of coal. It is very dark and resembles dry moss.

Don't Fail to Attend Clark's Sale

SALE WELL PATRONIZED

The Community-Wide Sale now being held at the Clark Store is proving to be the largest and best patronized sale that has been held in Mentone in years. The unusual bargains in seasonable and up-to-date goods have attracted large crowds of buyers and from the bundles carried away from the store daily it is very evident that they are offering even greater bargains than were advertised. This sale is being made in order to reduce their large stock preparatory to re-modeling the store, and will continue for a number of days. However we would advise that it will be to your interest to call at once while the stock is yet complete. See advertisement on back cover page.

Cultivate a Hobby

Doctors are advising hobbies, especially those requiring outdoor exercise, for the "successful business man" as the best way to combat the physical and mental decline which usually follows a strenuous life.

HOW TO LIVE LONGER

By John Clarence Funk, A.M., Sc.D.

Director of Public Health Education,
State of Pennsylvania

A Terrible Sacrifice

SYMPATHY is one of the most beautiful of life's attributes. And it usually is electrically responsive to any situation demanding it. But there somehow seems to be an unfortunate exception to the rule.

Last year in the United States 16,000 women lost their lives through one cause alone. And this great calamity never for a moment attained the importance of a front-page headline in the newspapers. In the main, it was not even noticed except by those in the family who were left behind. Nevertheless, such was the awful price American women paid during the last 365 days that new lives might come into the world.

True, there was nothing spectacular about their deaths, happening quietly, day by day, all over the nation; an occasional obituary notice would be read followed by an impersonal sigh that ended the matter. But it in no wise lessened the terrible toll of life.

Somehow, prospective parents must be made to realize that the expectant mother not only needs a physician's care at the time of the event but requires constant supervision during the entire nine months' period. Essential as this is, the fact remains that thousands of families never consult a physician until the crisis occurs—which is oftentimes too late.

A physician in charge from the beginning means that complete physical examinations and regular tests will be made. In this manner forewarnings of serious conditions can be promptly and effectively acted upon.

Health departments can preach and preach upon this subject, but there is no law which compels those approaching maternity to seek the care of physicians during the months of waiting.

It is perfectly accurate to say that with the expectant mothers under the personal guidance of a capable physician during the entire period, a tremendous reduction in the maternal mortality rate would result.

Prenatal care is little enough to ask for the brave women who go down into the valley of the shadow of death that the race may be perpetuated. Stop the frightful sacrifice. Let the women who bear us live!

Molecules Face About

In the course of a recent lecture at the California Technical it was stated that the molecules of any mass may occupy any position under ordinary circumstances, but the instant that the mass is subjected to the influence of magnetism the molecules alertly turn and face in the same direction. If it happens that the molecules are oblong this action will cause an imperceptible lengthening of the bar.

Russian Progress

History tells us that Russian rulers recognized the value of western science, and took advantage of it whenever they could. Ivan III, back in the latter part of the Fifteenth century, imported a Venetian who taught the Russians how to build churches and palaces and to cast cannon and other things. His grandson, Ivan the Terrible, attempted to bring in artisans from Germany, but was thwarted in his scheme.

Hawaiian Island

Although far to the south of the Hawaiian Islands, Palmyra Island belongs to that group. It is six miles long and one and one-half miles wide.

China and Porcelain

Not much china was imported into England until about 1650, when it began to be brought in by the East Indian Trading company. Porcelain was not made in England until almost the middle of the Eighteenth century. Earthenware was manufactured earlier than the Eighteenth century. Potters were at work at Staffordshire in the Seventeenth century.

Be Joyous

I look on solemnity as a disease; I had rather a thousand times be feeble and feverish than think lugubriously.—Voltaire.

John Rickel and family attended a reunion at Bruce Lake last Sunday

Miss Pauline Rickel of South Bend spent the week end with her parents John Rickel and family.

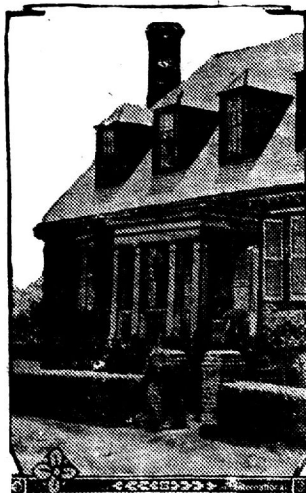

Mr. and Mrs. Raymond King and son of Elkhart spent the week end with the formers parents, John King and family.

Annabelle Lee, and Donna Joan Zolman of Rochester are spending a few days with their grandparents Mr. and Mrs. Ora Horn.

Dow Haimbaugh and family of Rochester and Herschel Lehman and family of Warsaw spent Sunday with Obe Haimbaugh and family.

WENT ON A FISHING TRIP

The Following men spent part of last week at Taverse City fishing, Charles Urshel, Tippecanoe; John Harmon, Atwood; Chester and Frank Manwaring; Eddie Menafee and Dr. T. J. Clutter.

Doorway of General Nelson's home, which was Lord Cornwallis' headquarters during the siege of Yorktown in the war of 1776. The home has been purchased by a wealthy Chicagoan, who intends to thoroughly restore the buildings, servants' quarters and other relics of the period as perfectly as possible.

Where Revolution Came to Its Glorious Finish

If Germain had done that; if Burgoyne had done this, if Clinton had done something else, and Cornwallis had been left free to do what he deemed wise in the circumstances, there would, in truth, be no reason for the pilgrim to historic shrines to tarry in Yorktown, because the McClellan siege of April, 1865, was inconsequential.

But Germain ran true to form; Burgoyne followed instructions at Sara-

toga; Clinton vacillated and issued and countermanded orders, and harried Cornwallis did the best he could. But it wasn't good enough, and so that quaint hamlet on the York river bulks large to those who tour the tidewater country of Virginia.

The community had its inception in 1691, when Benjamin Reade, who inherited the land from his grandfather, was ordered to sell 50 acres for a town site. In 1698, Yorktown became the county seat, and the oldest house there, according to local chronicles, was built one year later, and still is standing.

There also is the oldest customs house in the United States, built in 1715, the Moore house, where Cornwallis signed the surrender, October 18, 1781, and the Nelson house with Revolutionary cannon balls still sticking in its walls.

But outside the village and on the way to Hampton, just a bit off the main road and alongside of the National cemetery, is that which imparts a thrill to him who pays his first visit to the spot.

Here, in a field perhaps a mile from the inner fortifications of the British, and after a seven days' siege, Cornwallis, by the hand of General O'Hara, delivered his sword as a token of surrender to General Lincoln, whom Washington had designated to accept it. Perhaps it was a coincidence, perhaps not, but at the surrender of Charleston, Lincoln had handed his sword to this same British earl.

HELPED PATRIOTS

Cordorus furnace, York, Pa., built in 1755, cast cannon and balls for Washington's army.

Oceans' Levels

The mean level of the Pacific at the Isthmus of Panama has been found to be about eight inches higher than the mean level of the Atlantic. In the month of February the levels are the same, but throughout the rest of the year, on account of current, tidal and wind influences, the mean level of the Pacific ranges above that of the Atlantic. It is as much as one foot higher in October.

Analyzing ...YOU...

With the New Science of Syllabics

By C. J. COFFMAN

Dean of All the Enumerators

Georgia

"Arise and shine and be proud among your people." This might be said to be close to the meaning among the ancients, of the first four letters of your name, divided into two syllables, GE and OR.

The Georgia Forehead.

You must be subject quite a lot, Georgia, to the old idea, "Let George do it." Among the Greeks, GEORGOS means farmer, and he did about everything. He produced the food, and generally for very tiny pay, that the argumentative and philosophical Athenians ate.

Laughter and amusement go well with you, but what people do not suspect is the wonderful capacity of your mind for law. Even when you have never taken any interest in the legal profession, all of your friends have discovered your well-balanced and decisive mind, indicated by your fine forehead.

One of the Georgias who has exemplified this tendency toward law is Georgia Bullock, domestic court judge of Los Angeles, who is really doing a great deal more good in the world than will probably ever be known. The nature of her work is naturally very confidential and her wisdom must approach that of Solomon.

You could do things like that. Or, you could take up another form of law, the law of health, for you would make quite a wonderful doctor. In this way, you could bring happiness and help to people, and your light would shine out beautifully. You might even emulate the example of another Georgia that I know, so much beloved by all her friends.

This is Georgia Bernard Brown of Sioux City, Iowa, counselor and friend to all who come to her, promoter of the good among women and helpfulness to girls, she is almost the mother of two states.

AT YORKTOWN

One of the most inspiring of our national monuments.

Pulaski's Name and Fame Never to Be Forgotten

Brig. Gen. Casimir Pulaski, whose services to the Revolutionary cause in America can never be forgotten, was a Polish patriot and a great Revolutionary soldier. He strove as a citizen and a soldier to free his own country from its oppressors and when exiled offered his life in behalf of American liberty.

Pulaski was born in Podolia, Poland, March 4, 1743. He served in the guard of Duke Charles of Courland before he was twenty years old. In that period of history Poland was under the domination of the feudal lords and the king was in the control of one or another of the powerful neighboring monarchs. Pulaski and his father joined a group of Polish patriots who protested against these conditions and sought to bring about reforms.

The head of the family lost his life and the young Pulaski had to flee to Turkey to escape the wrath of the crown against which he had been plotting. He fought in one battle with the Turks against Russia, which then had the Poles in its grasp; then made his way to Paris, where he met Benjamin Franklin. By Franklin he was given funds to reach America and a letter of introduction to General Washington.

He arrived in 1777. At Washington's request congress gave Pulaski a commission in the cavalry. He first bore arms for the revolting colonists at the battle of Brandywine. There he managed his men so well that Washington recommended his promotion; he was made a brigadier general and assigned to command the cavalry.

He fought in the battle of Germantown, served with Anthony Wayne in some of his desperate operations, helped to defeat the British in an engagement at Haddonfield, N. J., and was subsequently given a detail at Valley Forge. At Washington's suggestion congress authorized the formation of a special corps of lancers and light infantry to be commanded by Pulaski. This corps, recruited largely in and about the city of Baltimore, later became famous as

Count Casimir Pulaski, who was buried at sea off the Georgia coast October 11, 1779.

Pulaski's legion, or the Maryland legion.

The winter of 1787-79 he found tedious, from petty operations and commands. Dissatisfied with his situation, he thought of resigning his office, but General Washington dissuaded him from such an action. Soon after he was sent with a small force to Charleston, S. C. Three days after his arrival the British, under General Provost, attacked the town but Pulaski held the city until reinforcements arrived.

In the battle of Savannah, some time later, Pulaski commanded the entire cavalry force, both American and French. He was mortally wounded and was taken from the battlefield to a ship in the harbor, where he died, and was buried at sea.

When the northern part of Indiana was being organized into counties, almost a hundred years ago, Pulaski's name was perpetuated by naming one of the counties for him. Winamac, on the Tippecanoe river, is the county seat. Other states have also named counties for this Polish soldier of the American Revolution.

"Tea Party" Spoiled

On October 18, 1773, almost two months before the famous Boston tea party, Philadelphia patriots had laid plans for a tea party of their own with the sending of a notice to the Delaware river pilots not to pilot the British tea ship Polly on its arrival.

On December 27, the Polly with its cargo was turned back, the British captain not being willing to take chances of being tarred and feathered as indicated in the handbills that had reached him. Eight thousand persons were waiting the Polly's arrival on the Walnut street wharf.—Detroit News.

Cleaning Granite

To clean a granite tombstone wash the surface with a mixture of finely powdered pumice stone and vinegar and leave it for several hours. Then brush it hard and wash clean.

Word for Red Flannel

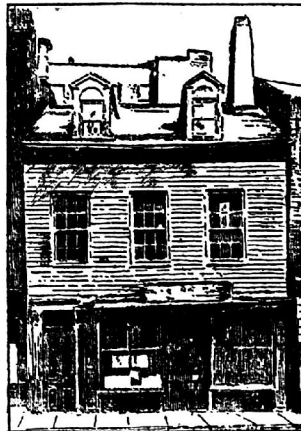

Rayon has advantages, but we must not forget that America was built by men in red flannel undershirts.—San Francisco Chronicle.

Where Paine, Great Lover

of Liberty, Passed Away

An old frame building at 300 Bleecker street in New York city, which is reputed to have stood there for more than 125 years, once was the rooming house of Mme. Bonneville, where Thomas Paine spent his last days.

When clergymen visited Paine and sought to convince him of the error of his beliefs, Mme. Bonneville is reputed to have met them at the door and refused to admit them. Another story is to the effect that while Mme.

Where Tom Paine spent his last days.

Bonneville was liberal in her views, she still was influenced by pressure brought to bear upon her by the church for harboring Paine in her household, and she took another house. This version contends that Paine moved voluntarily to 50 Grove street, her new location, in order to spare his landlady from further annoyance on the part of well-meaning clergymen. At any rate, Paine died a month later in his new quarters at the age of seventy-two.

Cavalry Had Its Part in Revolutionary War

One of the latest discoveries concerning the War of the Revolution is that imposing cavalry forces were among the factors that won independence for the Colonies. The general belief was that ragged, uniformed infantry waged the struggle.

Robert W. Chambers, preparing historical data for a fiction serial in Woman's Home Companion, found that four regiments of cavalry were actively engaged. The light horsemen were gorgeously arrayed, with leather or steel helmets heavily ridged with fur or feathers or profusely plumed with red, white or black horsehair. At Cowpens and Eutaw there were pitched cavalry battles, wherein the troops operated with such success that many military observers believe that more use of the cavalry would have shortened the war by many months, if not years.

Among Chambers' other discoveries were the facts that the colors buff and blue, usually supposed to have been those of the Continentals, were seldom seen except in the uniforms of certain officers. The Colonial soldiers

were uniformed according to the designs of their governments but it was seldom that they fought in homespun.

Nation Slow to Honor

Memory of Doctor Craik

After more than 100 years a fitting tribute to the services to his country was paid Dr. James Craik of Port Tobacco, Md., by the erection of an imposing granite monument over the grave of this famous patriot of the Continental army. In the burying

Dr. James Craik, chief physician and surgeon of the American army in the Revolutionary war.

ground of the old Presbyterian Meeting house in Alexandria, Va.

Doctor Craik was appointed chief physician and surgeon of the Continental army and is the man who attended George Washington on his deathbed. Doctor Craik's grave was forgotten and unmarked for many years in the weed-grown burying ground of the quaint old church in Alexandria. Finally a small brass tablet was provided by the Alexandria Chamber of Commerce, but through an error it was placed in the wrong location. Now the grave has been suitably marked by a monument by a committee of his descendants, headed by Mrs. John D. Patten of Washington, D. C.

Keep Independence Day

Citizens of Mecklenburg county, North Carolina, of which Charlotte is the seat, celebrated Independence day May 20.

On May 20, 1775, so North Carolina historians affirm, farmers of Mecklenburg county signed a declaration of independence from British rule. Local historians contend this was the first such declaration to be made in America.

THE HORTON

WASHING MACHINE.

One of the Best Machines on the Market, Fully guaranteed Sold by Local Dealer.

Why take chances on buying a washing machine from some irresponsible agent or some out-of-town, dealer, who will promise you anything and everything and with no intention of living up to them, when you can get a Horton, made in Fort Wayne by a firm that has made nothing but washing machines for the past 59 years, a firm that is responsible and gives a written guarantee with every machine sold.

The Ketrow Variety Store of this place are agents for the Horton Washer and will be pleased to give you a demonstration of this wonderful machine either in their store or at your home, and if you are not more than pleased with the results of the demonstration you are under no obligations to buy.

When you buy of Mr. Ketrow you will find that he will make it his business to see that your machine is giving you the service that you have a right to expect and should anything go wrong he is right here to see that it is made right—this is worth considering when buying equipment of this kind.

DO NOT TAKE ANY CHANCES

Cleaning clothing with naphtha, gasoline etc., is very dangerous, regardless of the fact of whether you may have any fire around or not. The rubbing of the cloth can ignite the fluid, and the result is a bad burn or possibly death. Play safe use "Spot Fyter" which is non-explosive. It will clean most anything in a jiffy. Costs only 50c per bottle at Clark's Store.

—Wanted—Odd jobs for a girl of 13 years. Lova Bush 408 Monroe St. Mentone. 2w.

OBITUARY

Holmes L. Tipton, son of Joshua and Elizabeth Tipton was born Nov. 15, 1854 and departed this life June 19, 1930, aged 75 years, 7 months, and 4 days.

On Dec. 1 1875 he was united in marriage to Nancy A Ashton and to this union six children were born. The wife, 4 children, 17 grandchildren two brothers, J. C. Tipton of Fort Wayne and Thomas Tipton of Newton, Kansas and a host of nieces and nephews are left to mourn their loss.

Two children passed to the great beyond in infancy and the remaining four daughters are: Mrs. Charles Darr of Rochester, Mrs. A. L. Tucker of Mentone, Mrs. O. E. Nelson of Logansport, and Mrs. Jacob Gross of Mentone.

Mr. Tipton had lived, in the vicinity of Mentone, his entire life and was widely known by his many friends and as a man of sterling character, a true friend and neighbor and one of whose loss will be greatly felt in the community.

While in early life Mr. Tipton realized the importance of a full surrender to Jesus, accepted the teaching of Christ and spent much time in the reading of the Bible. Later in life he moved to Mentone and placed his membership with the Church of Christ there, and remained in the Faith to the end.

CARD OF THANKS

We wish to extend our heartfelt thanks to the many neighbors and friends, also the ministers and singer, so kindly assisted and sympathized with us during the illness and burial of our husband and father.

Mrs. H. L. Tipton and daughters

MEETING OF 4 H GIRLS CLUB

The second meeting of the 4 H Club was held June 24 at the Public Library under supervision of the leaders Mrs. Cora VanGilder and Mrs. K. A. Riner.

Nineteen members were present. Officers elected were Mary Mollenhour president, Eloise Kesler, vice president, and Virginia Babcock, secretary and treasurer. A majority vote was taken and determined that this years project would be on health Mrs. Oliver Teel, county Red Cross Nurse, explained 4 H Club Work.

"Club work is an organized system of extension teaching for young people through demonstration in the field and home. It contemplates the organization of young people into groups called clubs for the purpose of definite work under carefully prepared projects and with adequate

local leadership. Its motto, "To Make The Best Better," and its 4 H emblem representing the Head, Hand, Heart and Health signify the lines of effort for better industrial, social and recreational opportunities in Community Life."

POULTRY FACTS

SWAT FLIES AND SAVE THE CHICK

Use of Traps and Destruction of Breeding Places Urged.

By G. T. KLEIN, Extension Poultryman,
Kansas State Agricultural College.

Chickens may be of the opinion that flies are good to eat, but when the truth is known, flies are their worst enemies. For flies carry to them that most dreaded of chicken diseases—the tapeworm.

To prevent chicks from eating flies is not easy. Sour milk feeding during the summer months is one of the greatest hazards. If it is fed, the milk should not be too sour, and a small amount of milk fed at a time. The vessels should be washed once a day and kept clean and sanitary. Wet mash should be fed in very small quantities during hot weather. It should not be allowed to sour. Keeping the house clean and sanitary and dark much of the time makes it unattractive to flies.

The use of fly traps and the destruction of breeding places will help to reduce the trouble from tapeworms.

Tapeworm remedies should be used on most flocks. A combination of kamala and nicotine sulphate is the best remedy to use, although it should not be used unless the birds are infested with worms and then the flocks should be wormed during the late summer or early fall.

Keeping Mash Sanitary Will Prevent Disease

Often small contrivances will do a great deal of good in helping to prevent the spread of disease. One of the most important is to put a revolving board or stick above open mash hoppers. This can be arranged so that if a bird hops upon it, it will turn around. This will prevent the chickens from getting into the hopper and thereby avoid much trouble from droppings.

Self-feeders are usually built with projecting roofs that answer the same purpose. If droppings are kept from the mash hoppers there will be less wasted feed and at the same time there will be less trouble from both disease and parasites.

Desirable Weights for Many Chicken Breeds

Leghorn cockerels should weigh one pound at six to seven weeks, one and a half pounds at nine weeks, and close to two pounds at twelve weeks. Pullets should weigh two pounds at fifteen weeks, and three and one-third

pounds at twenty-four weeks.

Heavy breeds such as Rocks, Rhode Islands, Wyandottes and Orpingtons should weigh one pound each at seven weeks, a pound and a half at nine weeks, and over two pounds at twelve weeks. Pullets should average two and a half pounds at fifteen weeks, and over four pounds at twenty-four weeks.

These figures were obtained after many experiments at the New Jersey state college of agriculture.

Poultry Hints

Clean, dry litter in the hen house adds greatly to the hen's comfort.

Chickens are kept on about 90 per cent of the farms of the United States.

A pullet that eats two bites while her sister is eating one is worth just twice as much.

If the cleanings from the poultry house are left where the chicks can scratch in them the droppings from one diseased chick may cause the death of dozens of others.

A good ration for geese would be equal parts of yellow corn meal, wheat bran, wheat middlings ground oats to which add 15 per cent of meat scraps, one-half per cent of fine table salt.

Get new blood of a high-producing flock every year. See that they are not related.

Duck eggs are incubated at the same temperature as chickens, rather lower than higher if anything. The difference is that they require more moisture.

There is a difference of opinion in regard to rape pasture for hens. It is generally agreed that it darkens the egg yolk. Rape pasture is usually intended for young stock only.

Duck eggs are generally hatched in machines that have moisture carrying trays. Some go so far as to sprinkle them daily.

Poultry flocks are culled in the summer to remove the slacker hens, and in the fall to select the best individuals as future breeders.

Do not forget the old saying, "A stitch in time saves nine." If you are losing an abnormal number of pullets from disease or other causes, find out immediately what is the cause of it.

Spirit of What?

Crush, if you will, the dandelion, but do it with respect. It has the spirit which has made our land what it is. —Omaha World-Herald.

Inking

In an Indiana rural school a lad was asked to use the word "inking" in a sentence, and he said: "The inking is full of red ink."

Konjola Ends Long Illness For This Man

Mechanic, Ill For Ten Years,
Finds Speedy Relief In
Famed New
Compound.

MR. JAMES WOODARD

"For the past ten years I suffered with stomach trouble," said Mr. James Woodard, Lawrence, Ind., near Indianapolis. "Gas formed after meals and I continually belched sour liquid. I had severe pains around my heart and back pains were so severe that I was forced to take treatments for them. It was often necessary for me to arise frequently at night. My liver was sluggish and I had a bad color. I was subject to frequent attacks of dizziness and was badly constipated. "Through a very dear friend, I was induced to try Konjola. After the second bottle I could see a great improvement so I kept right on with the medicine. Today my stomach trouble has practically cleared up, and I am feeling very much better. My kidneys are about normal again and my bowels have been regulated. All this has taken place since I began taking Konjola and after I had spent hundreds of dollars on other medicines and treatments."

The experience of Mr. Woodard has many parallels in the records of Konjola. Given a real trial, usually from four to eight weeks, this great medicine has made a record that would challenge belief were the actual facts not known and verified.

Konjola is sold in Mentone, Ind., at Shafer & Goodwin drug store, and by all the best druggists in all towns throughout this entire section.

"Spot Fyter" for grease and dirt spots. A few drops, a little rubbing, and they are gone. For sale at Clark's Store.

Cleaning Leather

Never use gasoline or any "drying" liquid to clean or preserve leather upholstery. The dirt can be removed by applying a sponge wet in soap and water. A leather or harness dressing of approved reputation or neats-foot oil with a little of the required color in it can be used as a preserving and softening agent.

The Reason

We get so many eggs from Mentone Producers is because we are in a position to pay the most for Quality Eggs. And then Our Quick Returns is

Another Factor

That makes friends among the shippers and causes so many to ship their Finest Eggs to us.

Thanks a Lot and We Mean It!

In over 45 years of retailing of General Merchandise we have adhered to a policy of "you be good to the public"—and the public will be good to you.

Many times we have been encouraged to go astray from our strict and stringent policy of fair dealing and honest advertising but we have never swerved an inch from our original policy.

Our announcement and heralding of a Gigantic Community wide sale, has brought from you, the public, a generous and wholehearted response which has been way above our expectations, which is most gratifying indeed to this store. Therefore, we say "Thanks a lot," and we mean it.

When You Buy Lumber

It is usually the cheapest to pay a few dollars more and get a better grade of material than is really necessary. Good lumber can be worked to a better advantage by the carpenter and in the end it will be found that the cost of the repair or building job will be much better and the price will be very little more. It does not pay to use inferior lumber at the small difference there is in the price.

Mentone Lumber Co.

Is It Right To live in a community and depend upon the patronage of its business men and citizens for you living—then trade out of town? **Think it Over.**

JUST THINKIN'

by Charles S. Kinnison

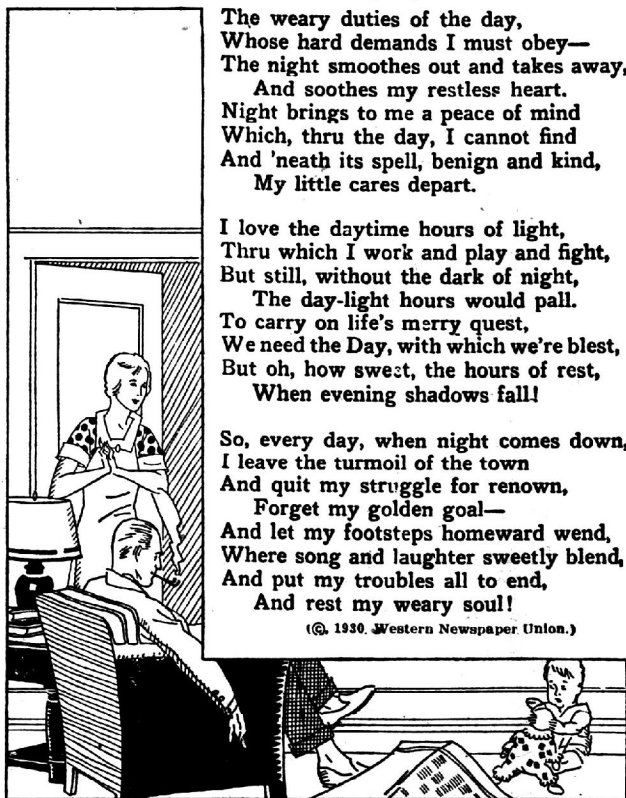

Night, for Rest

The weary duties of the day,
Whose hard demands I must obey—
The night smoothes out and takes away,
And soothes my restless heart.
Night brings to me a peace of mind
Which, thru the day, I cannot find
And 'neath its spell, benign and kind,
My little cares depart.

I love the daytime hours of light,
Thru which I work and play and fight,
But still, without the dark of night,
The day-light hours would pall.
To carry on life's merry quest,
We need the Day, with which we're blest,
But oh, how sweet, the hours of rest,
When evening shadows fall!

So, every day, when night comes down,
I leave the turmoil of the town
And quit my struggle for renown,
Forget my golden goal—
And let my footsteps homeward wend,
Where song and laughter sweetly blend,
And put my troubles all to end,
And rest my weary soul!

REAL FARM NEWS IS VALUABLE.

Writers Who Can Handle This Class of News Matter Are In Great Demand at a Good Salary.

The worth of farm news is appreciated today by the best papers more than ever before. In a large industrial city in Minnesota one of the highest paid contributors is a former country boy who writes farm news exclusively. His only investment in machinery is a typewriter, yet his cash return every Saturday is in excess of that of many a man with presses,

type and equipment running up to several thousands dollars.

The farm writer is in demand and his work is appreciated and paid for better than almost any other line of newspaper work. The ranks of those capable of doing such work are not crowded and the supply is not equal to the demand.

The place to practice farm writing is right on the farm among practical farmers. Get the facts from the farmer himself. The farmer may have no ability nor training as a writer. Probably he would break down if he would try to make a speech before any neighborhood gathering, but he is able and willing to tell you of his successful experience as a stock feeder, as a hog raiser, a poultryman or any line in which he is engaged and with the aid of pencil you can send that really valuable first-hand information to thousands of readers.

It is really great work and worthy of anyones best efforts. You can gain valuable experience as a country correspondent for the Farm News. Let this paper be your primary school, serve your apprenticeship with us. To be a good farm news writer it is not necessary to go to the farmer and tell him how to run his farm—let the real dirt farmer tell you his experience and what he has gained from it, then tell our readers about it. That is the kind of farm news that the average farmer is interested in, and the kind that is really valuable.

It does not require a college graduate to be a good writer of farm news, and there are probably many boys and girls on the farms in this vicinity who with a little practice and study would become first-class writers on this subject, and as there is no better place to start than on a country paper the Farm News will welcome items and articles from any boy, girl man or woman in any neighborhood in which this paper circulates.

Do not be afraid to make a start, get all the facts, names, dates, location, etc., then write the article the best that you know how and anything that needs correction or changing will be taken care of at this office.

Just a few of the subjects that are always of interest to readers: marriages, births, deaths, illness, fires, anything pertaining to schools or churches, visitors from a distance buying of improved farm machinery, leasing or sale of land, condition of crops, new buildings, etc.

Any one contemplating trying their hand as a correspondent had best call at this office and we will furnish them with stamped envelopes, paper, and give them a few pointers that may be of value to them. As soon as we get a number of reporters we will begin giving a worth-while prize for the best bunch of news items each week.

DO NOT FORGET

That our contest closes Saturday night at 9 o'clock. All votes must be dedosited in this office at that time.

SHERWIN-WILLIAMS PAINT HEADQUARTERS

Buy your paint on the job basis
... and save

S-W Paint Products are sold the world over under this famous trade-mark

SWP—the world's best house paint—costs less on your house than cheaper paint. This is because its wonderful body thoroughly covers more square feet of surface per gallon. Therefore its slightly higher price per gallon is more than made up by the fewer gallons needed for the job. That is why you should buy by the job—not by the gallon.

The beautiful, weatherproof SWP colors and its tough film last twice as long as cheaper paints. That means that you save from 50% to 60% on repainting when you use SWP. It is the world's greatest house paint bargain. Note the many Friday and Saturday Suggestions we offer this week.

FRIDAY AND SATURDAY SUGGESTIONS

SWP House Paint

The world's standard of house paint quality. SWP is made in one quality only and that the very best. Famous for long life and the permanency of its many beautiful colors. Covers more square feet of surface per gallon. Costs less on the house than cheaper paints at a lower price per gallon. Regular colors, per gallon..... **\$3.50**

S-W Flat-Tone

A washable flat wall paint for interior decorations. Produces beautiful velvet finish on plaster or wallboard. Per quart **90c**

S-W Semi-Lustre

An interior paint with the hard-drying and washable qualities of enamel. Dries with half-enamel gloss. Per quart..... **\$1.00**

Specify SWP and engage a good painter

Gloss White, per gallon **\$3.75**

S-W Enameloid

The world's finest rapid-drying decorative enamel. Ideal for woodwork, furniture, toys, etc. Wide range of charming colors. Per quart..... **\$1.80**

S-W Floor Enamel

A beautiful enamel finish for wood, concrete or linoleum floors. Withstands daily scrubbing and tramping heels. Per quart..... **\$1.00**

Shafer & Goodwin

"I waved my arms,"
said MRS. MOLLA PROPP,
"like one of those railway sophomores."

THIS morning when I took Henry downtown I had the most embarrassing experience, my dear.

There I was, at the busiest corner and an officer was over to one side giving us the red and green lights. Just as I was crossing, the red light turned on and then I didn't know whether to go on or stay. So I stayed... right in the middle of the traffic, too, and cars were honking behind me and on all sides. Seems to me they MIGHT have waited until I got through.

I must have been flustered, but I tried to keep my head cool and to help the officer out of the jam that he caused by turning on a red light right in front of me. So I started motioning to the cars to go this way and that and the more I motioned the worse the mess got. But I did my best.

Copyright, 1930—John Jensen.

I leaned WAY out and waved my arms pointing in different directions. And the horns blew and a man in a coal truck said the awfulest things.

Then the officer came crawling over cars and things to where I was. He didn't seem the least bit appreciative of what I was trying to do, in fact he was all purple in the face.

"Listen, lady," he yelled at me although goodness knows one doesn't need to yell like that, "If you don't get that CAN (imagine!) out of here I'll give you a ticket. Who do you think you are anyway—one of those railway SOPHOMORE things!"

That, my dear, made me good and mad and I just shouted right back, "No, I'm not a sophomore, but I think you're a freshman," which I still think was clever.

DEATH OF ISAAC ULERY.

Expires at Home of His Daughter,
Mrs. Brown, at Elkhart.

Isaac D. Ulery, 64, a former resident of Kosciusko county and for many years a farmer of northwest of Claypool, passed away at one o'clock Tuesday afternoon at the home of his daughter, Mrs. Ella Brown, in Elkhart. Death followed a long illness.

He is survived by his widow and five children, Mrs. Ella Brown of Elkhart; Mrs. Arthur Drudge of Albion; Mrs. Harriet Craig of Pierceton; Mrs. P. R. Drudge, of Elkhart; Mrs. Edward Baker of Claypool; his mother, Mrs. Elizabeth Ulery of near North Manchester; and two sisters, Mrs. George Leckrone of Michigan, and Mrs. Chester Deafinbaugh, of North Manchester, also survive.

Funeral services were held at the El River church south of Packerton at 1:30 o'clock Friday afternoon

with Rev. George Deaton in charge. Burial was made in the I. O. O. F. cemetery at Claypool.

ALL WORK GUARANTEED

I do all kinds of well drilling and repairing and guarantee that you will be pleased with my service. Homer Saner, Phone 8 on 198, Akron. Sep. 10.

Better Than Knowing All

It is well that there is so much in life that we cannot explain. It gives a sense of the reality of the Unseen. All that we see perishes.—American Magazine.

Important European River

The Danube river with its more than 300 tributaries, drains one-tenth of the area of Europe in its course of 1,750 miles.

Dress to Match Menu

According to Percy Cudlipp, dictator of London fashions, milady hereafter must dress to match the menu. A woman in blue should not serve strawberry ice.

SELL THEIR FARM

Mr. and Mrs. Albert Eherenman of Fort Wayne, have sold their farm near this place to Wm. Guy. The transfer was made on Wednesday of last week. We did not learn the consideration.

FOURTH PASSES QUIETLY

The fourth passed very quietly in this village. A large number of our people took in the circus at Warsaw and a few of our people spent the day at near by lakes.

ORDERS OF BOARD IGNORED.

Some time ago the town board issued orders that all alleys in the village should be cleaned of the rubbish therein by the owners of the property abutting same. A few of our people immediately complied with the request, thinking that it was going to be a real clean up. However our attention has been called to the fact that some of the alleys in the village are in a very unsanitary and unsightly condition and in fact in some instances there are real fire hazards. It seems to us that in-as-much as some of the property owners have gone to the expense to clean up their portion of the alleys that it is now up to the town board to see their order is obeyed by those who are delinquent in the matter. We were somewhat surprised to note in our check-up on alley conditions that about the largest pile of rubbish and ashes was in the rear of our \$14,000.00 Telephone building.

MENTONE NEWS ITEMS

Mr. and Mrs. Luther Fife spent Wednesday afternoon in Warsaw on business.

Mrs. J. N. O'Neil, of Oak Park, Illinois, spent a few days last week at the Krathwohl home.

Mr. and Mrs. George Nellans spent the 4th, with Mr. and Mrs. Grover Tinkey and family.

Mr. and Mrs. Oscar Baker of Cleveland, Ohio spent over the 4th with Mr. and Mrs. Joseph Baker.

Mr. and Mrs. Joshua Garwood, Mr. and Mrs. Wm Cattell and Wm Forst attended the Florida picnic at Elkhart Sunday

The Misses Mary Ellsworth and Mary Enstlinger who are employed at Fort Wayne were guests of their parents over the 4th.

Mr. and Mrs. H. C. Thompson returned last Wednesday from a short visit with Mr. and Mrs. H. D. Heenderson at Paw Paw Michigan

Mr. and Mrs. Ralph Severns spent their vacation last week visiting Lewis Fore at Kendallville and Lee Severns and wife at South Bend.

Mr. and Mrs. Allen Milburn and daughters, Opal and Dorothy of South Bend and Mr. and Mrs. George Stockberger were Sunday dinner guests of Mr. and Mrs. George Lyon.

W. C. T. U. MEETING.

The Mentone W. C. T. U. will hold a picnic and basket dinner at the home of Mr. and Mrs. Alva Creveston on July 15. All members and families come, bring a guest, and enjoy a good time together.

**Analyzing
...YOU...**
With the New Science of Syllabics
By C. J. COFFMAN
Dean of All the Enumerators

Joan

Of course all Joans are not Joans of Arc. They don't all get famous. nor do things noticeable to the world at large.

Your first syllable, if I may call it so, is JO. It means a kindly face and generally accompanies a soft and gentle heart.

But back of this kind of face, even when accompanied by the gentle heart, is a firmness often unsuspected. This firmness is necessary to bring forth the ideas that you are so capable of.

A liberal translation of the ancient words that make up the word Joan might be "the egg of an idea." And you are full of eggs.

I shouldn't be surprised if, when you were a tiny miss, you were considered quite a bad little egg. I can almost see the twinkle in your eye when you exercised that unusual ability of yours to raise one eyebrow.

Sometimes, too, the quizzical look caused by this trick eyebrow, upset the risibles of your elders so much that you went unpunished.

Perhaps even today you should be spanked occasionally, but about all I can do with you is to scold a little.

Seriously, though, your ideas might produce something dramatic. Even Joan of Arc attained the heights of drama, though she never went on the stage. I think you can make a good deal of use of your egglike ability to hatch things out of what you read and see.

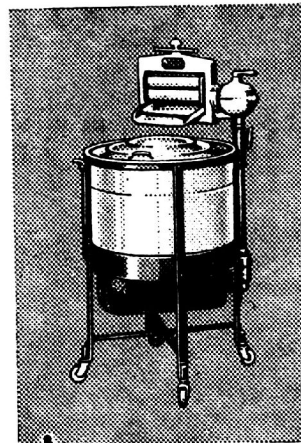

Anyway, while some call you cute and others call you mischievous, I must insist upon calling you talented.

(© 1930, Western Newspaper Union.)

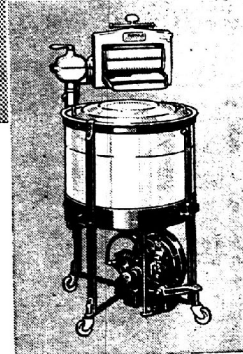

Joan's Mischievous Eyebrow.

HORTON—A GOOD NAME FOR 59 YEARS

At left, the EMERALD Electric Model for standard current or farm power \$99

Below, gasoline engine model with the famous Johnson Utilimotor \$140

**Never Before
Such
Washing
Machine
VALUE**

NOTE carefully these features:—porcelain tub, inside and out—sealed mechanism insuring dependable service—Lovell pressure cleanser with big, semi-soft rollers to complete the cleaning and remove water without harming a fastener.

Try to match the Horton value—at the price. You'll realize then the value of Horton experience—59 years of fine manufacture.

Let the Emerald do your next washing—free and without obligation. We'll gladly arrange it—come in or phone.

Pliny's Immortal Work

The most ancient encyclopedia is Pliny's Natural History, which comprised 2,493 chapters.

Long Christian Symbol

Among the very earliest Christian graves which have been discovered the cross was used as a symbol.

Must Maintain Production

Recalling that the forest is a production plant just as truly as is a textile mill or an automobile factory, says the American Tree association, it is obvious the first step toward maintaining it in continuous and profitable operation is to see that its capacity for production remains unimpaired.

Valuable New Metal

The new metal, beryllium, comes from the beryl, which is a hard gem stone, of which emerald and aquamarine are variations. Beryl contains about 14 per cent beryllium oxide and occurs in feldspar, especially in New Hampshire and North Carolina. Beryllium is the world's lightest metal, being only about twice as heavy as water.

FARM NEWS CONTEST CLOSES SATURDAY NIGHT

The Winners Will Be Announced At 10:00 O'clock And The Prizes Paid In Cash.

Valuable Prizes to Be Given Away At Clark's Store The Same Evening At 9:30.

Our contest closes Saturday evening at 9 o'clock Sharp, and in order that we may check up the votes and award the prizes at ten o'clock the same evening, we urge all contestants to tie up their vote coupons securely and plainly write their names and addresses together with the number of votes the package contains upon the outside wrapper, and be sure and deposit same in the Farm News office on or before nine o'clock that evening—Positively no votes will be accepted after that hour. This office will be locked at that time and the judges of the contest will be the only persons permitted to enter.

Promptly at ten o'clock the doors will be opened, the winners announced and the prizes paid in cash. First prize \$50.00; second prize \$25.00; third prize; \$15.00; fourth prize \$10.00

On the same evening promptly at 9:30 o'clock, Clark's Store will give away absolutely free a beautiful 34 piece dinner set and a very nice Auto blanket.

We doubt if there is another town in this part of the state where the business men are doing as much to merit your trade as Mentone—better get in the habit of trading in Mentone, the merchants want your trade and will give you greater bargains than you can get elsewhere.

HOME ECONOMICS

CLUB MEETING.

On Tuesday p. m. July 1st, Mrs. Latimer was hostess to the local Home Economics Club at her home on North Tucker Street There was a good attendance of members and several guests.

"Garden Worries"—bugs, worms, blight, weeds etc were discussed.

The 4 H Club committee reported the girls' 4 H. Club organized with twenty-five members, and "Health" their project this year.

After adjournment several of the ladies accepted Mrs. Krathwol's invitation to inspect the editor's garden growing through mulch paper. All were agreed that it solved the weed problem.

On Thursday p. m. July 3rd a joint meeting of the Mentone and Franklin tp. clubs was held at the home of Mrs. Nora Tucker. A large crowd was entertained with music, songs, two short playlets, stunts and refreshments such as only those Franklin township ladies know how to prepare and serve. The Tucker home is an ideal place for such a gathering. and everyone thoroughly enjoyed the afternoon.

Mr. and Mrs. Wm. Maxwell of Peru, Mr. and Mrs. Charlie Ames and daughter Margaret and Mr. Ames of Fort Wayne spent Sunday afternoon with Lloyd Zent and family.

Pretension

There need never be any doubt concerning the respective ability of human beings. Pretension may sit still, but it cannot act. Pretension never feigned an act of real greatness. Pretension never wrote an Iliad, nor drove back Xerxes, nor Christianized the world, nor abolished slavery.—Ralph Waldo Emerson.

Women Only

Experts agree that women's sense of intuition is a sex-gift conferred by nature, probably to balance physical disabilities, in the same way that nature gives a greatly increased sense of touch to the blind.

Expressions Explained

"That's the cheese" is a pungent expression which originated in the Anglo-Indian expression, "that's the chiz." Chiz in Hindustani means "thing." Therefore, "that's the thing." "High-falutin'" is a fantastic American variation of high-flown or high-floating.

Double Standards

The terms single standard and double standard are used both in ethics and in money. In the first case, they refer to what is known as the double standard of morals, whereby certain privileges are allowed to men that are not permitted to women. In money the double standard is a monetary standard based on both gold and silver as the material of the circulating medium, distinct from the single standard based upon either gold or silver.

HOW TO LIVE LONGER

By John Clarence Funk, A.M., Sc.D.

Director of Public Health Education,
State of Pennsylvania

Fly, Fly Away!

FLYING is justly popular these days. The public is intensely interested in the remarkable strides that are almost daily being made in this connection. Would that the public were even a little bit interested in flies!

However, it is the sad, old story of familiarity breeding contempt. Flies we have had with us always. True, noticeable progress has been made against this universal enemy of man. For instance, older people have but to recall the "good old days" when the fly brush was a necessary adjunct to the rural dining table.

Nevertheless, 40,000 lives annually lost to the teeth dealing power of this ever present, warm weather insect, is sufficiently serious to justify a discussion concerning it. And that is exactly the number of lives of infants and older people which the fly in its unrestrained blood thirstiness, slaughtered last year, mainly by causing infantile diarrhoea and spreading tuberculosis.

In cities much headway has been gained against this disease breeder. Screens, the development of a sanitary consciousness, the swat-the-fly campaigns and spraying lotions have noticeably curbed the fly's dastardliness. Even so, one has but to step out of doors in the populated districts fully to realize that the fly is yet with us.

Filth in general, and exposed garbage in particular, represent the fly's most popular congregating and breeding spots. There is no excuse whatever for people to permit the existence of these conditions, regardless of locality. Moreover, concrete floors in stables and fly proof manure pits will decidedly minimize the fly menace on the farm.

Kill flies, destroy their breeding conditions and save an army of people annually. A worthwhile objective isn't it? Very well then, do your part. Fly, fly away!

(©, 1929, Western Newspaper Union.)

Made Standard by Chaucer

When Chaucer used the Midland dialect for his "Canterbury Tales" he made it the standard for modern English.

Distinctive China

The name willow ware is given to several reproductions of the Canton china of the Eighteenth century, decorated with a landscape and willow trees. It was first reproduced by Thomas Turner of Caughley, England, in 1780, and later by several other English potters. One distinguishing mark which is found on much of the early willow ware is three small dots in the clay itself in pyramidal form.

GOV. GEN. DAVIS DEFENDS PURITY OF COCOANUT OIL

Dwight Davis, Governor General of Philippines.

Washington, D. C.—Charges that Philippine coconut oil and copra exported to the United States are insanitary and therefore unsuitable for consumption are branded as entirely without foundation by Gov. Gen. Dwight Davis in a radiogram just made public here by the bureau of Insular Affairs of the War department.

"Vegetable oils produced in the Philippine Islands are prepared in a thoroughly sanitary way and are entirely fit for human use," the radiogram states. "Oil mills operating in Manila were specifically inspected by Governor General Wood's request in 1924 and found in good sanitary condition, and a careful review of them shows they are in like situation today.

"Coconut oil is produced from dried and ground copra by automatic machinery without touch of human hands. The process of making it includes direct exposure to steam for approximately forty-five minutes and the residue is again treated in the same way for second pressing to secure remaining oil. The process completely sterilizes coconut oil and renders it free from germs or any other pathogenic organism."

In addition to this sterilization of the product, coconut oil to be used with milk and other edible vegetable oils and animal fats in the manufacture of margarine in the United States, must be again raised to high temperature. The oil goes from storage tanks into the ships without being exposed to the air and is sealed by the American Bureau of Shipping Surveyor, representative of the underwriters.

CITES INJUSTICE OF SUGGESTED FOOD TAX

Washington.—A trade war between agricultural and industrial states might be the result if the recent suggestion of Governor Shafer of North Dakota that food commodities manufactured in industrial states be taxed in the agricultural states in which they are consumed were adopted, according to a bulletin issued here by Dr. J. S. Abbott, secretary of the Institute of Margarine Manufacturers.

Governor Shafer, the bulletin points out, recently proposed that since dairy farmers are heavy taxpayers in North Dakota, whereas manufacturers of

margarine pay no direct taxes in the state, a tax be placed on the sale of margarine to make that industry share in the cost of the state government.

"Such a scheme, carried to its conclusion," says the bulletin, "might eventually include taxes on shoes, clothing, prepared foods, textiles, furniture, and manufactured products made in Illinois, Ohio, New York, and the New England states, which are purchased by the inhabitants of North Dakota. But it is logical to assume that the states against whose products North Dakota levied taxes might retaliate by taxing the commodities produced in North Dakota that are sold in these states.

"The theory that one section of the country has the right to levy a protective tariff against domestic commodities manufactured in another section of the country is economically false. The whole scheme seems like an effort to solve the problem of depressed butter-fat prices, by discriminating against margarine which is a wholesome domestic food commodity depending for its ingredients on products from American farms. The solution lies not in working a hardship on one domestic industry to promote the interest of another, but to correct the conditions in the dairying industry which have resulted in overproduction and surplus stocks in storage."

INDIAN BATTLE SITE NOW TOURISTS' MECCA

Howe Caverns, N. Y.—One hundred and fifty-second anniversary of the Cherry Valley massacre, bloodiest Indian outbreak in the annals of North America, will be observed in this locality this year.

Twenty-five miles northwest of Howe Caverns at Cobleskill, which is drawing thousands of tourists to its subterranean wonderlands, lies the town of Cherry Valley, scene of this barbaric slaughter. Today the town is a somnolent rural community, with several thousand inhabitants, in the heart of a thrifty dairying center.

Into Cherry Valley, on November 11, 1778, swooped 800 Indians like wolves on a fold, led by Joseph Brant, the Mohawk scourge. The savages killed 50 defenseless men, women and children, sacked the town, burned its houses and carried off 70 prisoners. The aboriginal cruelty of this massacre roused the soldiers of George Washington to greater fury against the Redcoats and their Indian allies.

The rage for Americana is luring tourists into this area in increasing numbers. Many are combining a visit to Howe Caverns with a dip into the romantic past of its environs.

Cream Faucet

Dick, a city lad, was watching, for the first time, a farmer milk a cow. "Mr. D—, which faucet do you pull for the cream?" inquired the curious lad.

"What an old-fashioned country this is. Haven't you camels with lifts?"—Lustige Blaetter. Berlin.

Old Cowboy Showoff

The Prescott (Ariz.) rodeo is the oldest cowboy contest in the world, having been held annually, since 1888.

EXPERT SAYS BEAUTY IS 80 PER CENT ART

New York.—Beauty is 80 per cent art, 20 per cent nature. In this ratio, Mme. Helena Rubinstein of London, Paris, and New York, rates the two contributing factors to woman's looks.

"There is no answer today to the question of who is the most beautiful woman alive," Mme. Rubinstein maintains. "With cosmetics once worth a queen's ransom, placed by modern methods of distribution within the reach of all, old barriers are broken. Women who would have been hopelessly ugly in another age make up in this one into striking beauties."

SCIENCE FINDS WAY TO CHECK FIRE TOLL

New York.—Since science has perfected a process for rendering lumber flame proof and fire resistant, wood is coming back into its own in American offices for interior finish and furniture, according to a bulletin issued here by the Henry Klein Research Laboratory.

"Just as other materials took the place of ordinary wood in construction and office furnishing with notable results in fire prevention," says the bulletin, "so this specially treated flame proof wood now promises to supplant these materials."

"American business adopted building materials other than wood in the belief that they were the only means of preventing the spread of costly fires and safeguarding valuable records and data. Now it has been found that wood properly treated under the new flame proof process is much more effective in resisting fire, smoke, and poison gases. The new process does not impair the wood's natural characteristics and enables it to be finished and stained in handsome and beautiful colors."

CALORY COUNT NOW EXTENDS TO CAR FUEL

Chicago.—Since America discovered calories, the average citizen's habit of checking up the foods that go into his stomach has been extended to scrutinizing the gasoline and oil he feeds the family automobile, according to the American Research Foundation.

"The calory is a measure of heat value, whether you are considering food or fuel, because one of the most important functions of both is to provide heat or energy," says a bulletin issued by the Foundation. "The greater the caloric value, the more benefit the food will derive, provided the body can assimilate it. Similarly, the greater the caloric value of gasoline the more power it will deliver, provided the engine can burn it efficiently."

"The motorist has found by experimentation that certain types of gasoline and oils agree best with the engine of his car, the same as certain

foods agree best with his body. As a result, American motorists in increasing numbers satisfy themselves by actual experience which one is best suited to the particular needs of their automobiles. Some motors. It is found, operate with perfect efficiency on regular gasoline, while others perform best if fed aircraft gasoline, and still others may knock ominously unless given a steady diet of high compression gasoline."

SANE EATING HABITS BEST HEALTH GUIDE

Washington, D. C.—First commandment of the dinner table should be eat at leisure what you know you can digest. There's too much conversation about the caloric value and the mineral and vitamin content of food, according to Dr. H. E. Barnard, famous food authority and pioneer worker for pure food laws.

"Most of us do best on the ancient staple foods, animal and vegetable cereals and fruits, on which our race has grown strong since the glacial period," said Doctor Barnard. "Modern science, however, has built of age-old materials many new and delightful foods, rich in energy and body-building qualities, foods that are cheap to produce, inexpensive to buy, and easy and good to use. Such a food is margarine, made from milk and animal and vegetable fats and oils in great sanitary plants which build into rich raw material's all the skill modern science can provide. It is just such a development as that which made the margarine industry so important to the farmer who produces the basic materials, and to the mother who spreads it on her children's bread, which justify our complete faith in the quality and character of our food."

CANDY SWEETENS WAY FOR MOTOR TOURISTS

Chicago.—Sweetening the trail of motor tourists will require more than 18,000,000 pounds of candy this summer.

"Getting the most miles per hour out of his human engine is as important to the tourist on a motor trip as the mileage from his car," said F. A. Bunte, of Bunte Brothers, Chicago candy manufacturers. "When a motorist is tired, even the most intriguing scenery will not revive him. Seasoned tourists have solved this problem by including a ration of candy in their supplies. They regard sweets as indispensable a part of their equipment as spare tires or tools."

No Trouble at All

In this uncalled age it's still possible for a lady to get a seat almost anywhere if she has \$257,000.

Chime Combinations

With chimes of 12 bells it is estimated that it would require 91 years to ring all the possible changes or sequences, at the rate of two strokes per second.

1930 FIRE BILL WILL TOTAL HALF BILLION DOLLARS

New York.—Approximately 10,000 lives will be lost in fires in the United States during 1930, it was estimated today by the Henry Klein Research Laboratory. In the same period property loss to the amount of nearly \$500,000,000 will result from the same cause.

"Despite constant tightening of the fire laws and numerous technical improvements in building construction such as flame proof wood, the present trend of the nation's annual fire loss is upward, the laboratory announced after an exhaustive survey of the subject."

Hope that this upward trend will soon be checked, however, was contained in the announcement, which pointed to such appalling disasters as the recent prison fire at Columbus, Ohio, as costly lessons to the public on the necessity for even greater fire prevention measures.

"Too much emphasis has been placed since the war on building materials other than wood because wood was considered ineffective in preventing fires," the statement pointed out. "There has been a willingness to accept these so-called fire proof materials as the only necessary precaution against fire, whereas it is just becoming evident that they are not even as fire-resistant as wood is when properly treated under new flame proof processes. The wood then becomes a better safeguard against poison gases, smoke, and flames than any other product known to science."

Thirty per cent of all fires that will occur this year could be prevented by a little more care and 25 per cent of them could be curbed from reaching serious proportions, the report estimated.

FOOD MAKER CALLED BEST AID TO MOTHERS

Chicago.—Problems of the housewife have been cut in half in the last 60 years, it is disclosed by Dr. H. E. Barnard, famous food authority and counselor of the American Research Foundation, in an address here in which he pictured the food manufacturer as the emancipator of modern women.

"Three-score years ago the manufacturing of foods was in its infancy," declared Doctor Barnard. "Today the food manufacturer has freed women

from these onerous tasks which bound them to the kitchen half again as long as is necessary nowadays."

"Margarine was the most important food discovery of the Nineteenth century, providing as it did a means of utilizing the wholesome and edible animal fats, which in large measure had previously gone to waste. For his margarine recipe Hippolyte Mege-Mouries, a French chemist, won the acclaim of all Europe—which, with America eats this nutritious food product in huge quantities to this day—and a substantial monetary reward from Napoleon III. Each succeeding decade since then has seen new products come from the factory to take the place of kitchen-made foods."

REVEALS SECRET OF PERFECT CUP OF TEA

New York.—Making good tea is a secret many American housewives have never solved, although the beverage is one of the oldest known to mankind, says a bulletin made public by the Tea Association of the United States.

"Brewing good tea is as exact an operation as concocting an angel food cake or lemon meringue pie," the bulletin says.

"First, an earthen pot should always be used in making the beverage. Have it scalding hot by rinsing with hot water. Put dry leaves into the

hot pot. Have a measure for your water and have this measure scalding hot. Pour out carefully as many cups of water as you desire to make of tea and pour the water instantly while it is boiling, bubbling hot, on the dry tea. Let the tea steep from three to five minutes, according to whether you wish it weak or strong. Stir before pouring. Keep the pot hot but do not allow the tea to boil. A teaspoonful of tea for each cup and one for the pot makes a delicious beverage of medium strength."

"Pure" and "Sterling" Silver

Pure silver is 1,000/1,000 parts fine; coin silver is 900/1,000 parts fine; and sterling silver is 925/1,000 parts fine.

Avoid Effusiveness

Be brief: for it is with words as with sunbeams—the more they are condensed, the deeper they burn.—Southey.

NEW YORK CITY

Quick Sales

Daily Returns

Farmers Who Are Interested in Better Eggs and Who Are Interested Enough to Help Themselves as Well as Us.

It goes without saying, that we have done more for the farmers in the way of egg price than any other buyer in Indiana, and have done more hard work to try to get a "Mark" on Indiana eggs than any other firm in New York City. We are working our heads off now trying to help you get more for eggs. Now, won't you please listen and try to follow our advice. We are not hoggish and don't ask all of this simply for our own benefit, but what helps us, sure will help you.

Now please try and adhere to the following advice for one year and see the results:

Get a good strain of straight blood poultry that lays a good sized egg (either white or deep brown) there is no difference in price now, and the general average price is about the same for equal quality eggs (size and cleanliness considered.)

Pick up your eggs every morning and evening, and carry a damp cloth with you, cleaning all traces of dirt off before it hardens and sticks to the shell.

DON'T WASH THEM,

But simply wipe them with a damp cloth and don't leave them streaked with dirt but clean them. Keep them in the coolest place about the house never allowing rain nor sun to touch them.

Use all ill-shaped eggs at home because they are broken in shipping. Market your eggs at equal intervals twice each week—that is, we would like to have them each Monday and Thursday or each Tuesday and Friday, rain or shine.

Keep every egg that you are not sure of being strictly fresh at home or ship them separately, as we don't want to spoil a case of nice eggs with a few of doubtful character, and you can't afford to sell such eggs, as it hurts you as bad as it does us, for we have to buy eggs on a basis of what we get for them, and if you slip in a few bad eggs on us, it only hurts our sales, and causes us to have to lower our price, so you see the fresher we get the eggs the more we get, and the more we can pay you. Never keep roosters with your hens after June 1.

Watch the size of your eggs and when they begin to run small, then feed them some good laying mash with a little Cod-liver oil in it or some soaked oats with a little Cod-liver oil in it or anything to keep the egg size up to not less than 23 ounces per dozen or over.

Now please try and follow this advice and let's work together and put our eggs in a class with California, Washington and Utah. The Pacific coast states ship eggs to New York City, and get from 3 to 10 cents more than your eggs bring, and it is because they ship fresh, clean, good-sized eggs graded up to a standard, which you can do if you will work as they work. Now if you will work as hard as we are, trying to put good eggs on the map, then we will show the market that Indiana has just as good eggs as any state in the union. We will do our best and now it's up to you who sell us eggs, to work as hard as we do.

Yours for Better Eggs.

Quality Butter & Egg Company

The Song of the Reaper

BY A. J. DUNLAP

The greasy old reaper was rusty
And stood in the tumbled-down shed,
Through most of the year it was silent—
A thing without purpose, and dead.
But harvest-time waked the old reaper,
When summer winds laughed through the grain;
Then day after day as it labored
The old reaper sang this refrain:
"I'm only a battered old reaper,
Ramshackle and covered with rust,
And I toil in the wheat fields of summer
Through the shimmering heat and the dust;
I love to be out in the open,
My spirit in action, set free
As I gather the golden-ripe harvest—
God's gift to humanity."

THE OLD FARM SERIES

SWARMING BEES

LIGHT ON DOG.

A dog at the home of Henry Bigger in the east part of town was stung unmercifully by bees which were swarming at the Bigger home Monday about the noon hour. The family were away from home.

The dog was fastened in the barn by a long chain. The door was opened far enough for the dog to go in and out.

When the bees began to swarm, unfortunately the canine happened to be near the hive.

This nettled the bees and they got after the dog and it made a "bee line" for the barn in an attempt to elude the hostile insects. But not so.

The bees literally covered the dog's back and were boring in for dear life. The dog's yelping brought out the whole neighborhood.

Presently the dog ran into some old iron and the chain got so badly tangled up that the dog was held a prisoner and could not move.

Every time some person would go in to release the dog the bees would

attack them and drive them out.

Marshal Reed was called. When he got there the dog was foaming at the mouth and its eyes had turned green. He shot the animal and put it out of its misery.

The dog had lumps all over its body as big as walnuts.—Edgerton Ohio Earth.

POULTRY

REMOVE ROOSTERS FROM HEN FLOCK

Poor Eggs Result From Laziness and Neglect.

With the coming of warmer weather, there will be the usual rapid increase in the flow of poor quality eggs on the markets unless flock owners adopt control measures.

"As first produced, eggs are about as nearly a perfect food product as one can find," says C. F. Parrish, extension poultry specialist at the North Carolina State college. "If the hen is properly fed, the nest clean and the eggs gathered twice each day in hot weather and stored in a cool, clean place until delivery to the consumer, the market will pay the top price gladly. But, on the other hand, if roosters are allowed to run with the flock after the hatching season is over, if the hens are not well fed, if the nests are dirty and the eggs gathered occasionally and kept in a poorly ventilated, warm room, the consumer feels like ordering a gas mask along with his eggs."

Mr. Parrish insists that bad eggs are not accidents—they result from laziness, neglect, and poor management. It is just as easy, he says, to produce high quality, infertile eggs as it is to offend the customers with stale, fertile, low quality eggs. Farmers of the state lose about \$500,000 each season because of bad methods in producing and handling this product. At least one-third of this is due to the partial hatching of fertile eggs which have become warm enough to incubate. Hot days have the same effect on fertile eggs as the hen or incubator and the first step is to remove the male birds from the flock as soon as hatching is over. He has nothing to do with egg production.

Five good rules to observe are given by Mr. Parrish, as follows: Keep nest clean and provide one nest for every four hens; gather eggs twice each day; market the eggs twice each week; store them in a cool, dry place, such as the cellar; and pen or dispose of all roosters after the breeding season. To follow these five suggestions is to improve the quality of the product.

Feed Baby Chicks Sour Milk in Liberal Doses

Sour or clabbered milk as a feed for chicks is one of the surest preventatives of white diarrhea available. So says H. A. Rittenbender, head of the poultry husbandry department at Iowa State college. Where plenty of milk is available it is a profitable practice to give no water to the chicks during the first

six weeks, sour milk to constitute the only drink.

Care should be practiced in feeding sour milk, for sharp changes in the acid content from day to day almost always cause bowel trouble. A safe rule to follow is to feed today's milk tomorrow. Then the acid content will remain very nearly the same.

It is best to feed the milk in earthen or enameled vessels, for they are much easier to clean than other types of containers, and cleanliness is a big factor in the success of baby chick feeding.

Chicken Culling Most Important in Summer

Chicken culling is not something that should be done only in the late summer or early fall when the hens are molting. Culling should start at the time the chicks are hatched, and should be continued throughout the growing season. All chicks that are weak or crippled when the hatch is taken off should be killed. Chicks lacking in vitality are a constant menace to the flock because they are more susceptible to disease than are the stronger ones. Furthermore, the extra care and attention which must be given the weak chicks increases the cost of rearing the flock. Also those chicks that are weak at hatching time will be slower in starting to grow and will mature more slowly than the strong vigorous birds.

Succeed With Turkeys

The kind of feed and the manner of feeding poult make a vast difference in results. The difficulty in handling turkeys in domestic fashion has been realized for years, more so as farms became closer together and wide, open ranges became harder to provide for flocks of turkeys. Unwholesome feeds and bad ways of feeding have worked much harm to this industry. Growing poults will not require so much attention as to feed when the range is ample.

Mistaken for Cold

Chickenpox is often mistaken for a cold, but it is a specific disease. Unless care is taken colds may appear with the pox and many chickens will die. The mouth form of chickenpox is not ordinarily serious if the occurrence of colds can be prevented. The temperature of the pens should be raised, the birds given special care and the litter changed often to keep moisture at a low level. The removal of diseased birds in the early stages will help.

Storks in Use Up to 1803

The storks were in actual use in Salem as late as 1801 and in Boston up to 1803, and at that we can boast that we got rid of these semibarbarous instruments earlier than the English from whom we took them, who did not abolish them until about 1830 in practice and in 1837 officially, when parliament passed a law forbidding their use.—Boston Herald.

UNUSUAL CASE WHERE KONJOLA PROVES POWERS.

Young Muncie Lady Freed of Stomach Trouble, Rheumatism and Neuritis—IS Enthusiastic.

MISS MABEL PETERSON

"I had a very bad case of stomach trouble," said Miss Mabel Peterson, 506 Hoyt avenue, Muncie. "My mother and sisters worried constantly about my condition. Konjola had helped mother so much that she began urging me to try it. Two bottles of this wonderful medicine relieved me of stomach trouble. Rheumatism bothered me at times and this medicine drove both this ailment and neuritis, from which I had also suffered, entirely from my system. I have added weight and my color is much better than it has been for a long time. I no longer feel tired but am stronger in every way and have more energy. I do not wonder that Konjola is the most talked of medicine in America for it did for my mother and myself just what all other medicines and treatments had failed to do. I am glad to endorse it to anyone who is suffering."

Konjola has become the most talked of medicines in America because it makes good. And this great compound makes good in the most stubborn cases when given a real trial. From five to eight bottles are recommended for stubborn cases.

Konjola is sold in Mentone Ind., at Shafer & Goodwin drug store, and by all the best druggists in all towns throughout this entire section.

Think It Over

I pack my troubles in as little compass as I can for myself, and never let them annoy others.

JUST THINKIN'

by Charles S. Kinnison

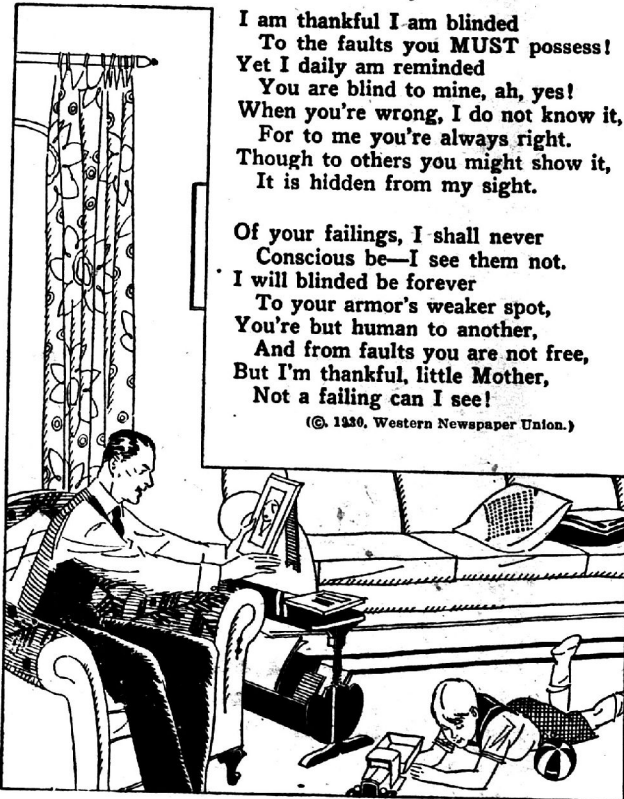

To My Mother

I am thankful I am blinded
To the faults you MUST possess!
Yet I daily am reminded
You are blind to mine, ah, yes!
When you're wrong, I do not know it,
For to me you're always right.
Though to others you might show it,
It is hidden from my sight.

Of your failings, I shall never
Conscious be—I see them not.
I will blinded be forever
To your armor's weaker spot,
You're but human to another,
And from faults you are not free,
But I'm thankful, little Mother,
Not a failing can I see!

(© 1930, Western Newspaper Union.)

ARE WE FAIR WITH OUR STEAM AND ELECTRIC TRANSPORTATION COMPANIES?

There is a question in our mind whether we are taking the proper attitude toward our railroads when most all of our merchants and business men have nearly all of their goods shipped in by motor truck.

It is almost unthinkable to vision our fine little town with no freight or passenger trains stopping at this point, with the depot closed and no agent, and the Winona electric abandoned and junked. However the present trend of our people toward having everything shipped by motor is fast leading to the above

condition. It is only necessary to stop and review the past five years and note the inroads that the truck has made upon local freight shipments in this one locality and you will readily see that the railroads cannot continue to give service long if this decrease in business keeps up. During these few years the Winona has been compelled to cut their service in half, with a big drop in local passenger service on the Nickel Plate.

To be sure it may be a little more convenient to have the goods delivered right to your door by motor truck, yet we believe that you will find that you are paying just as much for the service as it would cost you to have them shipped by rail and delivered by the drayman. In following the practice of getting goods by truck we are playing into the hands of our strongest competitors, the neighboring cities, who would be would practically insure them a monopoly of the trade from only too glad to see our rail connections discontinued, which this locality and would eliminate their competition with the larger cities at a distance.

There are many angles to this question to be considered—the taxes paid into our county by the railroads, where as the trucks pay practically nothing—the certainty of continuous service by the railroads, when at certain times of the year the motor trucks cannot get through, etc.

After giving this matter considerable thought and watching the trend of local shipping to the motor truck we have come to the conclusion that the small towns along the railroads are making a foolish move, one that in time will cause the abandonment of most of the electric roads, and a discontinuance of all local service to small towns on steam roads. Think this over—Would you like to see our town entirely dependent upon the automobile and the motor truck?

ERA OF PROSPERITY LOOMING

By LORD ROTHERMERE, English Newspaper Publisher.

The United States is due for another march along the road of sustained industrial development and progressive prosperity. It has triumphantly survived last fall's stock market crash.

The nation as a whole has, and is entitled to have, unshakable confidence in its enduring prosperity. That prosperity is based upon an abundant supply of the principal raw materials within America's own borders. The development of these is carried on by a fortunate alliance of extremely high executive capacity with the most intelligent, hard working, and ambitious labor in the world. The United States possesses every asset that makes a nation rich. In equally abundant measure, she has the men, the money, the materials, and the markets.

During my recent stay in New York I heard the personal views of a half dozen great industrial leaders of the United States, and found each of those men completely confident that the next two years will see the United States once more establishing new peaks in every branch of national activity.

MY TRIP TO NEW YORK.

(By Billy Eherenman)

The following is a descriptive account of a trip written by Billy of Milford, to his grandparents, Mr. and Mrs. Albert Eherenman. The lad is only 13 years old and is the son of principal Eherenman of the Milford schools.

"Wednesday Night, July 2, Bancroft Hall, N. Y.—Dear grandpa and grandma—How is everybody at Fort Wayne and LaPorte? I suppose you are all right.

Today Betty and I walked around and went to the Ferry landing and to Grant's Tomb. The top of his memorial is about as high as the county seat building at Warsaw. Lincoln's memorial at Washington is larger than the county seat building. We sure had a great time in Washington—we went through the Capitol building, the Treasury building, the Smithsonian Institute and two national museums. We went through part of the White House, too.

In the treasury building there is a vault that has more money in it than any other in the world; it has 14 billions of dollars in it. We went clear to the top of the Capitol. It sure is nice to go all through. Dad and I heard the Senate for about an hour, too. We saw vice president Curtis, he was presiding over the Senate; didn't get to see Hoover. We saw the Congressional Library, it is supposed to be the most beautiful building in the world. In the old National museum we saw Lindy's plane "The spirit of St. Louis" and we saw the Wright Brother's plane too.

We went to the top of Washington's monument, it is 555ft., high. In Philadelphia we saw the Liberty Bell and Ben Franklin's printing press. When we were in Richmond, Va., we were in the church Patrick Henry made his famous speech in which he said "as for me, give me Liberty or give me death." We saw Mt. Vernon and Washington's tomb, too. When in Norfolk we swam in the Atlantic Ocean, our first test of salt water. Uncle Sam took us aboard a 10,000 ton cruiser, the U. S. S. Houston, and we saw all her big guns.

We stopped at Atlanta, Georgia, and saw Stone Mountain, where Lee's figure is being sculptured. At Chattanooga, we saw the Chickamauga battle ground, the Missionary Ridge battle ground and Lookout Mountain which is 1,700 feet in altitude. At Nashville, Tenn., we went through the Hermitage, Andrew Jackson's home, it is nicer than Mt. Vernon.

Tell Uncle Adam his tent leaks like a sieve; when we camped at

Peru, Ind., we had a rain storm and Dad and I got all wet. We sleep in the tent and the same thing happened when we camped at Richmond, Va and at Philadelphia, Pa.

The most mileage we covered in one day was 195 miles, from Peru to Louisville, Ky. From Milford to New York we have made over 2,160 miles. The Ford and trailer works fine—have had three flat tires.

"Love, Bill."

BURKET TO BE INCORPORATED.

Our thriving little village to the east has presented a petition to the board of county commissioners asking to be incorporated. The last census gave the town a population of 288, and while some people may think that the place is rather small to have a local government, the patriotic spirit manifested by its citizens and their loyalty to their home town, makes it quite a large little place, and for enterprise and hustle they are fully abreast of most of their neighbors. Well here is hoping that our neighbor's request will be granted and that a local town government will be of benefit to all of her inhabitants.

KILLED BY POWER LINE

Ervin Bellman 45, single, was instantly killed at 9 o'clock Wednesday morning of last week, when he touched a high power wire on a farm three miles southeast of Bremen.

A subsequent investigation revealed that Bellman had come in contact with a wire charged with 23,000 volts of electricity and which had fallen upon a wire fence.

Mrs. Chester Hoff had been attracted to the vicinity of the fence where she saw a number of chickens lying dead. She called Bellman, who warned her to remain away from the wires and he then conducted an investigation, cautiously approaching the fence and power wire. In some way, however, he came in contact with the circuit and was killed by the electric shock. His hand and arm were badly burned.

Swiss Cheese

To make the holes in Swiss cheese the cheeses are immersed in brine in a room with a temperature of 70 degrees Fahrenheit, in which the typical fermentation produces gas holes or eyes.

Lovers Separated

A peculiar custom in the Canary Islands is that a young man may not enter the house of the girl he is courting. The girl may sit at the window to receive his attentions, but he must stand outside.

"Trade With Black and Save Your Jack"

OUR VOTE CONTEST

When we put up a hundred dollar cash purse in our contest just closed we expected that the four prizes would be of sufficient value to cause at least twenty-five real live hustlers to enter the race. In this we were greatly disappointed, for in reality there were only five people who made any attempt to speak of to secure the prizes—and of this five there were only four people who put any time into securing votes.

This of course made the contest a financial failure so far as the Farm News was concerned, and the small number of enterants gathering votes among our advertisers had little effect upon their sales and in return did not increase our advertising to any noticeable extent.

In one way however it was a great success, as it brought out the hustling qualities of the winners of the first and second prizes; Mrs. C. R. Beidleman and Mrs. Fred Busenburg, who sure did some real work piling up votes during the past few weeks, and had both of these ladies started at the beginning it sure would have been a close race. As it was Mrs. Beidleman had about 18,000 votes before Mrs. Busenburg got started and as a result the latter was greatly handicapped.

It was a good friendly fight during the entire contest as to who should walk off with first honors, and both of these ladies are to be admired for the real friendly sportsmanship displayed at all times.

Carl Gross, while but a mere boy and winner of the third prize, fully demonstrated that age has nothing to do with getting out and making a try and as a result he is ahead \$15.00. His success should be a lesson to other boys and teach them that if they ever expect to get anywhere they must be on their toes and make an attempt.

With Mrs. Geo. Norris, winner of the fourth prize, it was different and we doubt if she had any idea of winning a prize when she entered the race and consequently she did not make much of an effort. The large number of votes that she received was largely due to the fact that friends of hers in renewing their subscriptions gave their votes to her.

Special mention is due to little Louise Long, just a little girl, who with no one to aid her except her father run up her vote count to 34,075, only a couple thousand votes outside of the money. This little girl sure made a great showing and our regret is that there is no fifth prize to be awarded her.

In conclusion we wish to thank

our advertisers for the manner in which they lived up to the rules of the contest, and while there may have been some mistakes in handing out votes, we believe they were unintentional, and that there was no favoritism shown to any one. It was our aim when we started this contest to have it strictly on the square and we have every reason to believe that we have succeeded.

Our thanks are due Mr. Chet Herendeen for acting as judge and assisting us in checking over the votes. Our other judges were unable to be present.

MISSIONARY MEETING.

The Woman's Missionary Society of the Baptist Church will meet with Mrs. Mahlon Mentzer Wednesday 16th, at two o'clock.

WIN PRIZES AT CLARK'S.

Saturday night of last week the prizes at the Clark Store were awarded as follows: Set of dishes, Mr. Chas. Warren of Burket, and the Auto robe went to Mrs. Nora Gochen hour of Tippecanoe.

CHURCH OF CHRIST.

I will not fill the pulpit next Lord's Day at Mentone, as arrangements have been made for me to speak at the Annual Basket meeting at Mud Lake Chapel on that date. However the church will hold its regular services. The Bible Study at 9:30 and Worship at 10:30. All are invited. J. S. Johns.

W. C. T. U. MEETING.

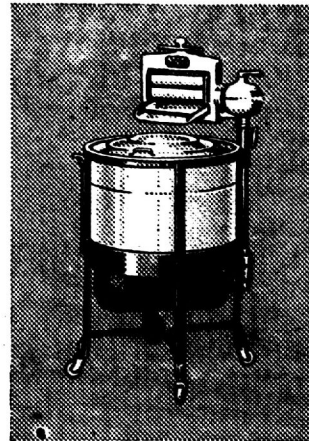

The Mentone W. C. T. U. met in an all day meeting July 8th, at the home of Mrs. Alvi Creviston and enjoyed a picnic dinner at the noon hour.

The afternoon session was called to order by the president, Mrs. Russel Norris, and opened by singing, America The Beautiful, prayer by Rev. Power. After singing the Crusade song the devotional conducted by Mrs. Russel Norris, reading 7th, chapter Luke, and Isa 62:10 and prayer.

The story of the Soul according to the Bible, given by Mrs. Bess Manwaring and assisted by different ones present. Address by Rev. Power, Theme Patriotism. Reading given by Miss Ortha Davis. Mrs. Patton of Warsaw, gave a talk on citizenship.

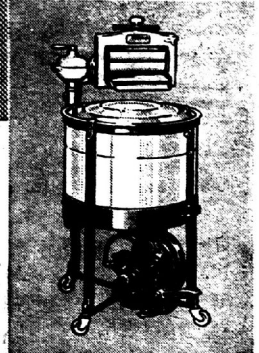

After singing A Charge To Keep I Have and prayer we adjourned, feeling we had a day well spent.

HORTON—A GOOD NAME FOR 59 YEARS

At left, the EMERALD ELECTRIC Model for standard current or farm power \$99

Below, gasoline engine model with the famous Johnson Outboard \$140

Never Before Such Washing Machine VALUE

NOTE carefully these features:—porcelain tub, inside and out—sealed mechanism insuring dependable service—Lovell pressure cleanser with big, semi-soft rollers to complete the cleaning and remove water without harming a fastener.

Try to match the Horton value—at the price. You'll realize then the value of Horton experience—59 years of fine manufacture.

Let the Emerald do your next washing—free and without obligation. We'll gladly arrange it—come in or phone.

Mentone, Indiana

MASONIC CORNER

STONE LAYING.

Members of the Masonic fraternity and the citizens of Silver Lake are making extensive arrangements for the laying of the corner stone in the new school building now under construction at that place.

The event will take place Thurs. July 24th, at 2:30 p. m. standard time, the Official Masonic Ceremony will be used. Deming Lodge No. 88 of North Manchester having charge under the direction of the Grand

Lodge Officers of Indiana, several of whom are expected to be present.

The local Lodge has been invited to participate in the ceremony, and no doubt many will attend. This will be a banner day for Silver Lake, and they are to be congratulated in providing this fine up-to-date school for the pupils of Lake Township.

Parliament Sat Long

Charles I of England summoned a parliament in 1640 which, because it lasted until 1660, has been called the Long parliament.

The Old Curry-Comb

by A. J. Dunlap

The tapping of the curry-comb
Foretold another day
Of labor in the fields of corn,
Or meadows rich with hay,
It told of tangled manes made straight,
Of sweaty coats made clean,
Of breakfast for the sorrel colts,
Old Dolly, Pet and Queen.

It was an unassuming thing
About the dear old home,
But still it served the old farm well—
The old bent curry-comb.
It sang a song of cheerfulness
To horses and to men;
I would my jaded soul could hear
Its music once again.

THE OLD FARM SERIES

Swimming Under Water

The distance which a person may swim under water varies as to conditions. Probably an average swimmer in a pool can swim 30 feet under water. M. Pauliquen, in Paris, France, on November 3, 1912, remained under water 6 minutes 29 4/5 seconds. Jack Trivilla of Avalon, Calif., swam under water 126.41 yards in 2 minutes 13 3/5 seconds at the Salt Water natatorium in Seattle, Wash., July 25, 1912.

Rockefeller Origin

The Rockefeller family association says that the name Rockefeller is originally from the French Roquefeuille, meaning literally rock leaf. The ancestral home of the family is the Chateau Roquefeuille, in France, in the town of Creysseils. It was so named because the rocks in that vicinity show a peculiar leaf formation which is the result of petrification. A branch of the family comes from the Palatinate.

Safety in Suburbs

If you live in the average city or suburban home with houses of at least equal height around you, lightning is apt to make you a victim only once in every thousand years or so.—Country Home.

Better Than Natural Light

Tests have shown that the traditional north skylight favored by artists for color matching is not always dependable, for daylight from the northern sky varies each hour of the day. The bluish-white light of artificial daylight electrically produced is claimed by illuminating engineers to be superior to the natural light, for it never varies and is available at all hours.

Keeping Flowers Fresh

The bureau of plant industry says that in so far as they retard fermentation aspirin tablets in the water will revive cut flowers which have begun to fade. Salt or sugar acts in the same way. But the treatment recommended is the daily changing of water and cutting of the stems, as this is the best method known for keeping flowers fresh. A low temperature is also helpful.

Make Our Own Dark Days

The dark days of life are not all of the world's making. Disappointments are not all born of our associates, or our environment, or other outside influences. Too many of life's shadows are caused by us standing in our own light.—Grit.

ORCHARD GLEANINGS

CHERRY SLUG MAY DO MUCH DAMAGE

Pests Also Attack Foliage of Pear and Plum Trees.

Injury to the leaves of cherry trees by the cherry slug sometimes results in a great deal of damage to the trees. The first brood appears in June and a second in August.

The cherry slug, commonly known as the cherry sawfly, in the adult stage, begins laying eggs on cherry leaves about June 1, says Dr. C. P. Gillette, the Colorado state entomologist. The eggs are thrust just beneath the epidermis of the leaf, one in a place. Little slimy slugs hatch from the eggs. They feed on the upper surface of the leaves, skeletonizing them and causing them to turn brown and die. The second brood comes on about August 1.

The slugs injure the trees and sometimes the market quality of the fruit when abundant. The second brood may so defoliate cherry trees as to cause them to die, August being about the worst time in the year to remove the foliage from a tree. The slug also attacks the foliage of pear and plum trees to some extent.

The slugs are easily killed by spraying the foliage with any one of several mixtures, Doctor Gillette advises. The fruit grower may spray with arsenate of lead, one pound to 50 gallons of water, or with black leaf 40, one part in 1,000 parts of water; or white heliothene may be used at the rate of one ounce to three gallons of water.

Arsenic Substitute in Spraying and Dusting

Fruit growers and truckers who are looking for a substitute for arsenic in sprays and dusts will be glad to learn that the Tennessee station has experimented with cryolite and barium fluosilicate and found them quite promising. A summary of experimental results with these two materials is about as follows:

These materials have a comparatively low solubility and are therefore reasonably safe on foliage. They can now be obtained in commercial quantities at about the same price as lead arsenate.

Cryolite and barium fluosilicate are both highly toxic to insects. In small quantities, such as might occur on plants, fluorine compounds, so far as known, are not dangerously poisonous to man.

For adult insects, barium fluosilicate is more toxic than cryolite. Both materials gave excellent control of the

Mexican bean beetle when used as a spray at the rate of one pound to 50 gallons of water.

At the rate of six pounds to the acre, neither cryolite nor barium fluosilicate used as a dust caused foliage injury on beans. Thirty pounds or more to the acre produced moderate burning. Five weekly dustings on tobacco produced no foliage injury with either material, and controlled the hornworms and flea beetles.

Both cryolite and barium fluosilicate, used in the dust form at the rate of six pounds to the acre, gave very good control of the bean beetle. These materials were also used successfully when mixed with two parts of lime.

Fertilizing Material

Needed by Fruit Trees

Fruit trees should receive the fertilizing material every spring. Spread it under the outer branches, away from the trunk, where the fine feeding roots are. If a nitrogenous fertilizer such as nitrate of soda or sulphate of ammonia is used, it should be applied at the rate of about one-quarter pound for each year of the tree's age. Thus a four-year-old apple tree would receive one pound, and a twenty-four-year-old tree would receive six pounds. Old peach trees will rarely need more than three pounds. Spread the fertilizer on top of the ground and let the rain wash it in.

Self Sterile Cherries

The fact that cherry trees drop their fruit when it attains about the size of shot indicates that they are self sterile. The only way to overcome this trouble permanently is to plant trees of other varieties which will bloom at the same time as those already growing, so that the pollen may fertilize the flowers. You can remedy this trouble temporarily by cutting branches loaded with blooms and placing them in pails of water near your trees when your own trees are in bloom.

Trees Deserve Care

Tree lovers often have to face the question of deciding whether or not a particular tree is worth the expense of treatment. Tree specialists of the United States Department of Agriculture say that most shade and ornamental trees with only a few dead limbs are unquestionably worth attention. Others that have many dead limbs or decayed areas may not be worth the expense involved, particularly if they are rapid-growing short-lived trees.

World's Many Languages

Dr. Frank H. Vizetelly, managing editor of the Standard dictionary, gave the number of spoken languages and dialects in the world as 3,424. These are distributed as follows: America, 1,624; Asia, 937; Europe, 587; Africa, 276. Officers of the French academy recently computed the actual number of languages, and placed the figure at 2,796.

WILL BE STRICTLY UP-TO-DATE.

When the contemplated changes are completed at the Clark store, Mentone will have a modern store that is right up to the minute and one of which we all can point to with pride.

This enterprising firm is one of our oldest and best known business houses, having always enjoyed a very large patronage in this territory, and our people should show their appreciation for their progressiveness by giving them a good share of their patronage.

MENTONE NEWS ITEMS

Mrs. J. R. Hatfield and children of Ohio spent over Sunday with Mr. and Mrs. Ira Borton and family.

Mrs. Bonwitz and daughter Beulah are spending a few days this week camping at Cold Water Michigan.

Mr. and Mrs. Virgil Nelson and family of South Bend are spending several days at the L. L. Mollenhour home.

Mrs. Holmes Tipton, while visiting at the home of Mr. and Mrs. Jake last week suffered a stroke of paralysis but is slowly improving at this writing.

Mr. and Mrs. Riley Nelson who have been spending the past week here with his children and other relatives returned to their home in South Bend Sunday.

Mr. and Mrs. John Minear came last Wednesday to the P. W. Busenburg home at the noon hour with a well filled basket containing a chicken dinner and everything that goes with it. The kind act was very much appreciated and such friends will not be forgotten.

Mr. and Mrs. L. P. Jefferies who have been spending the past week with their grandson and granddaughter, Mr. and Mrs. Sheridan Snyder, at Grand Rapids Michigan, returned home Saturday, accompanied by Mr. and Mrs. S. L. Snyder, who spent over Sunday at the Jefferies and Snyder homes.

Versatile Southwest

If blockaded, Texas and Oklahoma, with adjacent territory, could come nearer to supporting themselves than any other region of the United States. —American Magazine.

Betsy Ross Flag

It is difficult to get positive evidence of the first flag made by Betsy Ross and some historians regard it as purely traditional. The flag she made is not preserved in any museum. It is true that she was a flagmaker in Philadelphia at the time the flag was officially adopted and that she was commissioned at various times to make flags for the government.

Horticultural News

CURCULIO SERIOUS PEST IN ORCHARD

Combined With Brown Rot Does Immense Damage.

Curculio, an insect, and brown rot, a fungous disease, make a combination that is responsible for tremendous losses every year in crops of peaches, plums, and cherries.

Brown rot often enters one of these fruits through a puncture made by a curculio. It is important, therefore, to kill the insect if the disease is to be controlled, announces Arthur J. Farley, extension pomologist of the New Jersey agricultural experiment station. Furthermore, he points out, curculio causes many of the young fruits to become wormy and fall to the ground before they are mature. In order to control the insect, growers should spray peaches as soon as the husks split enough to expose the small fruits; cherries and plums should be sprayed when the petals fall, and again when the fruits develop to the size of a small green pea. In order to control brown rot, growers should follow these applications with others.

The material recommended by the experiment station for the control of this destructive combination of insect and disease is New Jersey Dry Mix, twelve and one-half pounds, and powdered lead arsenate, one pound to fifty gallons of water. The amount of lead arsenate may be increased to one and one-half pounds for plums and cherries, but should not be increased on peaches. It is also recommended that four pounds of high calcium lime be added to every twelve and one-half pounds of dry-mix used on peaches in combination with lead arsenate.

Set Strawberry Plants at Suitable Depth

It is important that strawberry plants be set at the right depth. If set too deep the crown may be exposed. Set them the same depth as they stood in the nursery and be sure to firm the soil around them, so as to leave no hollow spots or air spaces around the roots. Plant only young plants with light-colored roots. Plants with black or dark-brown roots are usually worthless for planting. If the roots are heavy prune them back somewhat and leave about two healthy young leaves on the top. Keep all fruit stems and blossoms removed during the first season except that everbearing varieties can be allowed to blossom after the third month. A cloudy day following a shower is a good time to plant strawberries.

BIRTHDAY SURPRISE

Several friends and relatives gathered at the country home of Mr. and Mrs. Clyde Brugh last Friday evening, July 11, and gave Mr. Brugh quite a surprise on his 45th birthday. The evening was spent in visiting and eating home made ice cream. Those present were: Mr. and Mrs. Charles Emmons, Mrs. John Emmons and sons, Mr. Henry Emmons, Mr. and Mrs. Philip Whetstone and two daughters, Carl Hatfield and Miss Clara Belle Brugh.

BRIDGE PARTY

Mr. and Mrs. Robert Reed entertained four tables of bridge last Wednesday evening July 9th, at their home on North Tucker St., in honor of Mr. and Mrs. Ross Smith of Lakeland Florida.

The other guests were Mr and Mrs. Curtis Riner, Mr. and Mrs. Don Ernsberger, Mr. and Mrs. E. J. Carter, Mr and Mrs. Dean Nellans, Mr. and Mrs. Eldon Barringer, Miss Eunice Reed and Miss Louise Black.

Mrs. Nellans won the prize for high score, Mrs. Carter second, E. J. Carter first men's prize and Eldon Barringer second.

Dainty refreshments were served on small tables decorated with baskets of beautiful garden flowers.

All present agreed that the evening was most enjoyable.

Enemies of Society

Society has just two mortal enemies—the man who will not speak his mind and the man who tries to close the mouths of those who do not think as he does.—T. L. McCreedy.

IF YOU MET WITH A SEVERE ACCIDENT.

Was Laid up in a Hospital or Home Could You Pay Your Expenses for One Cent a Day?

IT CAN BE DONE.

Pay us \$3.65 or at the rate of a penny a day for a whole year, and in return should you at any hour of the day or night during the year be riding as a passenger on a railroad train, steam boat, street car, elevated or subway car and by the wrecking of that vehicle you become injured, we will pay you at the rate of \$100 per month for one day of more for a period of a year's time. Should you be killed we will pay to your estate \$5,000.00 and in event you are permanently disabled by the loss of one or more limbs or the sight of an eye or eyes, we will pay you from

\$1,500.00 to \$5,000.00 depending upon the extent of your disability.

Suppose you should become injured from the wrecking of your automobile, or while riding in your friend's car. Suppose you are riding in a taxi cab, motor bus, or elevator, and through the wrecking of that vehicle if you should be injured we would pay you at the rate of \$100.00 a month, and if killed your estate would receive \$1,000.00; also for loss of sight, or limbs from \$500.00 to \$1,000.00

That's Not All—This same indemnity would come to you for injuries received as a result of being struck by lightning, injured in a tornado, by being burned or suffocated by smoke in the burning of a church, school building, theater, store office building or lodge room. Should you drown while bathing at a bathing beach your estate would receive \$1,000.00.

Furthermore—Suppose you were struck, knocked down or run over while walking or standing on a public highway. Suppose you were injured while driving a truck, wagon or buggy, and if you are a farmer, suppose you were injured while operating a threshing, mowing or heading machine, a binder, harrow, plow or tractor, we would pay you for one day or more of disability at the rate of \$50.00 a month; and if killed your estate would draw \$500.00.

This 1c Day Will Also—entitle you to a \$10.00 medical or surgical attention for any of the fore-going injuries that does not totally disable you, and if you are injured in any accident, any place, any time and are laid up for a month you will receive \$25.00.

A real honest to goodness accident policy that covers the pedestrian as well as the traveler. Just think, all this for only 1c a day.

AMERICAN BENEFIT LIFE ASSOCIATION

Applications taken at Farm News Office.

"Spot Fyter" for grease and dirt spots. A few drops, a little rubbing, and they are gone. For sale at Clark's Store.

DO NOT TAKE ANY CHANCES

Cleaning clothing with naptha, gasoline etc., is very dangerous, regardless of the fact of whether you may have any fire around or not. The rubbing of the cloth can ignite the fluid, and the result is a bad burn or possibly death. Play safe use "Spot Fyter" which is non-explosive. It will clean most anything in a jiffy. Costs only 50c per bottle at Clark's Store.

"And then,"

said MRS. MOLLA PROPP,

"I held the watch, while Henry timed the gears."

MY DEAR, would you believe it, Henry had an argument with an officer yesterday. I was driving... such a LOVELY day, you know, and Henry had just been explaining to me for the fifth time—or was it the sixth—just what makes an engine go round and round.

It seems that when one puts gasoline in the tank it runs from one thing to another until it reaches the combustion room—and that's what makes the engine go so fast. REALLY, my dear, it's just TOO simple!

As I was saying, this officer—and he was such a nice-looking man, too—came up to us in one of these motor-cycle things. He made us pull to the curb and took out his book. "Well," he said, "where do you think you are going?"

Henry was trying to tell him we weren't going very fast because he was watching the motorometer and besides the car wasn't running as it should. Honestly, my dear, I THOUGHT that officer would explode. He got all red in the face and yelled, "Fast, did you say! Who said anything about speeding! If you don't step on the gas, I'm going to arrest you for obstructing the tariff!"

After the policeman had gone, Henry looked at me sort of meeklike. "Guess I shouldn't..." he began. "Shouldn't what?" I shouted. Henry—you know how MECHANICAL he is—had been changing the wiring on my carburetor and it took the garage man two hours to put in a new compression. Oh, that man!

Copyright, 1930—John Jensen.

SAYS WILL ROGERS

BEVERLY HILLS. -- Well, all I know is just what I read in the papers, and what I see as I prowl hither and thither. You know I just had a fine week up among our Nordic Brothers in Minneapolis. You know they live and prosper and get along better than any other distinct bunch of folks we have in this Country. They are about the best Farmers we have in this Country. But the great part about it is they all get along fine together. Any rivalry is good natured.

Well, sir, I was up there one night and who do you think dropped in on me but Doctor Mayo, The old Country Doctor of Rochester, Minn. Mrs. Mayo was with him, and another accomplice from down in Nashville, Tenn. They say he has in addition to dosing out calumel and assaifititi to the ailing Norwegians, he has put in a branch line or "Operation" while you wait. Somebody give him a knife, and he and a Brother of his will have your frame into kindling wood before you know it. He has been over in Italy, and it was reported that he was going to slice into Mussolini and cut out his French Complex.

He is full of stories, and is a great little fellow. Gosh when you think of what those fellows have done! That's what you call being a real Benefactor to mankind.

You know to me the greatest thing they have done, and that is the system of charging everyone in proportion to what they can pay. Course some let a yell out of them like a hoot Owl, and claim that they paid more than so and so, but it's the greatest system ever invented. All Doctors should make enough out of those who are well able to pay, to be able to do all work for the poor free. That is one thing that a poor person should never be even expected to pay for is medical attention, and not from an organized Charity, but from our best Doctors. But your Doctor bill should be paid like your income tax, according to what you have. There is nothing that keeps poor people poor as much as paying Doctor bills. It always wipes out their savings, and it's that fear of not being able to pay is what makes it ten times worse on them. It ought to be a law, not a custom.

Flew over the Rockies recently with the air mail. Passed over Reno at 3 A. M. They were sleeping off one marriage and dreaming of another.

It requires nerve when you are not a subscriber to a paper to ask that publication to publish free notices week after week—Yet the Farm News has had that experience.

Lots of 'em just keep the same houses from year to year. And they arrive the same time every year, unless some new husband becomes stingy particularly early. Then they drop in sooner than that year.

I had a fine visit in Des Moines with "Ding," the great political cartoonist. He knows, and he says the country is not going into the hands of receivers.

We decided that Coolidge going to work shows that the unemployment situation is picking up.

Mr. Coolidge's sermonettes are running more to the spiritual than the political. He has layed off the tariff and Uncle Joe Grundy in favor of faith, and passed up the disarmament treaty and Hiram, in favor of divine guidance, and he sets more store by eternal things than he does the United States Senate. He wants us to get back to the old early New England tradition, where if you wasn't praying, you was burning somebody that was.

So it looks like I am left single-handed to cope with Borah, Smoot and all material and temporal matters.

Mr. Hoover has done lots of things, but he never trained circus animals before.

Up to now, the animals have had him hemmed up doing the tricks instead of them.

Now, he is a man that is quick to learn anything new, and the minute he finds out they are cowardly, why he will grab that sharp pole and pistol, and he will have Congressional lions, and Senatorial hyenas jumping through more fire hoops and rolling more barrels than you ever heard of, and the audience will applaud and eat it up.

We sure had a great Fourth, especially after we picked up our morning papers and found that Congress had adjourned the night of the third.

That gave us a cause for having a fourth, but our enthusiasm was immediately dampened, for the Senate are to meet again, so that means that prosperity will pick up only fifty per cent.

This country has come to feel the same when Congress is in session as we do when the baby gets hold of a hammer. It's just a question of how much damage he can do with it before you can take it away from him. Well, in eighteen months these babies have left a record of devastation.

DAIRY FACTS

KEEP BULL UNTIL
QUALITY PROVEN

Sire Should Be Kept 'ntil Daughters' Work Shown.

The value of a dairy bull cannot be determined until the production of his daughters has been tested. Then it often happens that the bull has been slaughtered for some reason and his valuable influence lost to the herd.

John A. Arey, dairy extension specialist at the North Carolina State college, says the bureau of dairying at Washington had proven the value of 834 bulls up until September, 1929, through records kept by dairy herd improvement associations, yet when the bureau began to search for these bulls, only 126 were living. The remainder were dead or no authentic information was available. For that reason, says Mr. Arey, the herd sire should not be disposed of until his value has become known through the production of his daughters. After the bull has had a chance to prove his value, he should be kept as long as he is fit for service, provided he is a good one. If a poor one, he should be slaughtered immediately.

Many bulls are sold to the butcher when quite young because they have developed a vicious disposition. Viciousness is not a characteristic on which to condemn the animal, thinks Mr. Arey. Frequently such animal is one of the most valuable that the dairymen could own and there are ways in which a dangerous bull may be easily handled.

One of the best is the method used by a group of farmers in Caldwell county. These men have an eleven-year-old animal owned jointly. They have constructed a pen with shelter and with a breeding pen adjoining. This equipment was built at small cost to each individual and yet it provides ample facilities for handling the bull and at the same time insures his safe handling. Such equipment is recommended by Mr. Arey to other farmers who may wish to keep a herd sire that has grown dangerous with age.

Good Pasture Essential to Keep Up Milk Flow

To keep up the milk flow in summer it is essential to have good pasture. Grass probably provides the cheapest feed that is available for dairy cows. Because of its succulent character it produces a larger flow of milk than an equal amount of feed furnished in some other form. Cattle showing a mineral deficiency on many other types of feed will generally show no mineral deficiency when they are on

good pasture

Overstocking is probably as great a cause as any other for damage to pastures. They should be top-dressed with manure or a complete fertilizer to give them the proper amount of nitrogen and minerals. Lime and phosphorus also have been found helpful.

New York State College Favors Early Cut Hay

Plan to cut hay early and feed some of it. Feed well on grain. For Holsteins and Ayrshires, New York State college recommends one pound of grain to five pounds of milk produced during the early summer, and one to four as soon as pastures show any drought. Jerseys and Guernseys need more. The college recommends one to four of milk early and one to three later in the season.

The grain mixture the college suggests is 300 pounds wheat bran, 400 pounds hominy, 200 pounds gluten feed and 100 pounds cottonseed meal. Feeding in summer boosts the yearly average of cows; and all records show that the higher the yearly average of a cow the greater the profit from her.

Dairy Notes

Calves should have all the milk they will take without causing digestive trouble.

Finish in calves is highly important, and it can only be produced by the liberal feeding of whole milk.

Breed cows in December and January and try to avoid breeding in March, April, May and June.

The bull that is failing to give service may be too fat. It is also possible that he is not getting sufficient exercise to keep him in good condition.

The barn should be whitewashed at least once a year. Proper gutters should be constructed, so the cows can be kept clean.

The milk pail should be so constructed that the minimum amount of dirt can get into it during the process of milking.

After the milk has been washed from the surface with warm water, boiling water or steam should be used to sterilize all dairy utensils.

Giant Pythons

The reticulated pythons found in the Philippine Islands are the largest snakes known. They measure 30 feet in length and 15 inches in diameter.—Rocky Mountain News.

First Use of Coke

The bureau of mines says that the first bituminous coal was coked in the United States in 1816 and was probably used for smelting iron.

FARM STOCK

KIDNEY WORM IS VERY EXPENSIVE

Infestation Prevented Somewhat by Clean Pens.

(Prepared by the United States Department of Agriculture.)

Hog producers, especially in the South, lose millions of dollars each year from the depredations of the swine kidney worm, an internal parasite. The kidney worm causes abcess conditions and scar tissue in the kidney, kidney fat, lungs, liver, pancreas, and parts of the muscular tissue of swine. The injuries not only interfere with growth and development of pigs, but result also in extensive condemnations of these parts of the carcass on post-mortem examination in federally inspected meat-packing establishments. The pest lives for a part of its life cycle in the soil, so infestation may be prevented to a considerable degree by having the pigs farrowed in clean pens and raising them on clean soil.

Scientists of the bureau of animal industry, United States Department of Agriculture, say the parasite may affect swine of all ages and is spread by eggs voided by infected animals. The eggs hatch in the soil and the young worms are picked up by young pigs or by mature hogs. Control measures, therefore, in part consist of sanitary methods of management, such as keeping new pigs in clean fields which are high and well drained and have not been pastured by swine for at least a year, or in fields which have been plowed and are growing a cultivated crop.

Another aid in controlling the pest is the use of sanitary watering equipment and self-feeders in creep pens during the suckling period. These practical devices enable the pigs to escape much of the infection that may be spread by infected sows. Properly balanced rations which include a mineral mixture of tankage, salt, and ground limestone promote rapid growth and early maturity. Control measures strike at the weak points of the life cycle of the parasite and are the most effective methods known of preventing losses from kidney worms.

Not Difficult to Rid Sheep of Stomach Worms

It is not a very difficult matter to rid adult sheep of stomach worms and the treatment is also fairly successful for expulsion of tapeworms, although they are much more difficult to kill. The treatment consists in administering a one per cent solution of blue

stone and tobacco. It is made by dissolving four ounces of pure bluestone in one-half gallon of boiling water in an earthenware vessel, steeping four ounces of tobacco snuff overnight in one-half gallon of boiling water and in the morning mixing the two solutions and adding two gallons of cold water. The mixture should then be strained and given to the sheep, after withholding feed for 24 hours.

The dose for an adult sheep is $3\frac{1}{4}$ to 4 ounces. A lamb under one year should be given 1 $\frac{1}{2}$ ounces and lambs older than that appropriate doses, according to age and size. The sheep should stand on all fours when being given the solution slowly and carefully by means of a two-ounce dose syringe, or a rubber tube, nozzle and funnel, or a bottle having a piece of rubber tubing attached to its neck. Where lung worms are found present the veterinarian may inject directly into each nostril in turn, by means of a medicine dropper, about 20 drops of chloroform.

Live Stock Facts

Don't withhold feed from young, growing animals when they want it.

Young suckling pigs have their real start in life long before they are born.

Don't use pastures too early in the spring and don't graze pastures too closely.

The total pig crop of the corn belt was slightly larger in 1929 than in 1928, according to reports of the United States Department of Agriculture.

The high mortality rate among young pigs represents a loss of possible profits in hog raising. It is not expected that one can save 100 per cent of the pig crop, but it is possible to save more than 50 per cent.

Pound for pound, potatoes have about the same feeding value as ordinary silage.

Hogs suffer in hot weather if they lack shade and are not kept supplied with water. Hogs become overheated very easily and many die from this cause alone.

The greatest loss of pigs occurs at farrowing time and during the few days after farrowing. By giving necessary attention then profits can be materially increased.

Gold for U. S. Mints

Gold is redeemable in money at United States mints and assay offices in quantities of \$100 or more, which is equivalent to 5 ounces of pure gold.

Fish Can "Stock Up"

The deep-sea pouch fish is provided with an elastic stomach, for food is scarce in the places where he dwells, and he has to make one meal last a long time.

Quality Butter & Egg Co., Inc.,

159 CHAMBERS ST.,

NEW YORK CITY

Quick Sales

Daily Returns

Farmers Who Are Interested in Better Eggs and Who Are Interested Enough to Help Themselves as Well as Us.

It goes without saying, that we have done more for the farmers in the way of egg price than any other buyer in Indiana, and have done more hard work to try to get a "Mark" on Indiana eggs than any other firm in New York City. We are working our heads off now trying to help you get more for eggs. Now, won't you please listen and try to follow our advice. We are not hoggish and don't ask all of this simply for our own benefit, but what helps us, sure will help you.

Now please try and adhere to the following advice for one year and see the results:

Get a good strain of straight blood poultry that lays a good sized egg (either white or deep brown) there is no difference in price now, and the general average price is about the same for equal quality eggs (size and cleanliness considered.)

Pick up your eggs every morning and evening, and carry a damp cloth with you, cleaning all traces of dirt off before it hardens and sticks to the shell.

DON'T WASH THEM,

But simply wipe them with a damp cloth and don't leave them streaked with dirt but clean them. Keep them in the coolest place about the house never allowing rain nor sun to touch them.

Use all ill-shaped eggs at home because they are broken in shipping. Market your eggs at equal intervals twice each week—that is, we would like to have them each Monday and Thursday or each Tuesday and Friday, rain or shine.

Keep every egg that you are not sure of being strictly fresh at home or ship them separately, as we don't want to spoil a case of nice eggs with a few of doubtful character, and you can't afford to sell such eggs, as it hurts you as bad as it does us, for we have to buy eggs on a basis of what we get for them, and if you slip in a few bad eggs on us, it only hurts our sales, and causes us to have to lower our price, so you see the fresher we get the eggs the more we get, and the more we can pay you. Never keep roosters with your hens after June 1.

Watch the size of your eggs and when they begin to run small, then feed them some good laying mash with a little Cod-liver oil in it or some soaked oats with a little Cod-liver oil in it or anything to keep the egg size up to not less than 23 ounces per dozen or over.

Now please try and follow this advice and let's work together and put our eggs in a class with California, Washington and Utah. The Pacific coast states ship eggs to New York City, and get from 3 to 10 cents more than your eggs bring, and it is because they ship fresh, clean, good-sized eggs graded up to a standard, which you can do if you will work as they work. Now if you will work as hard as we are, trying to put good eggs on the map, then we will show the market that Indiana has just as good eggs as any state in the union. We will do our best and now it's up to you who sell us eggs, to work as hard as we do.

Yours for Better Eggs.

Quality Butter & Egg Company

TALMA NEWS ITEMS

Mrs. George Bryant has been quite poorly for several days.

Mr. and Mrs. Leon Kotterman and family spent Friday at Gilead.

Charlene and Albert Safford, Mary Barkman and Edward Miller spent Friday at Gary.

Miss Mary Barkman and Edward Miller spent Friday evening with Miss Dorothy Horn.

BAKED GOODS SALE

The ladies of the M. E. Church of Tippecanoe will hold a baked sale at Borton's Cream Station, Saturday, July 19th, commencing at 9 a. m.

M. E. CHURCH ANNOUNCEMENT

The North Indiana Conference Camp Meeting is being held during this week July 14-20 at Epworth Forest on Lake Webster. The preachers are Rev. T. C. Henderson, of Oberlin, Ohio, Rev. Turberville of Kokomo, Indiana and Bishop T. B. Fisher. There are three services each day and each day a good program.

The Epworth League Institute will be held at Epworth Forest next week July 21-28. All young people are welcome to attend with our group.

Rev. Wm. Danner will preach at the morning service July 27. He has lived in the west for a number of years but formerly lived south of Mentone. He is here visiting relatives and friends.

A church supper will be served at the church Saturday evening July 19 from 5 to 7 o'clock. Tickets are being sold at 35c each. It is necessary to purchase your ticket by Friday evening as the Winona Association is co-operating and we must notify them of the number to be served. They will provide a short program at 6:15 and those who can do so are asked to remain for the program.

Rev. W. O. Power, Pastor.

Not in the Bible

The phrase "The Lord tempers the wind to the shorn lamb" does not appear in the Bible, despite general belief. It is taken from an old book, entitled "A Sentimental Journey," written by Laurence Sterne, an English writer in the Seventeenth century.

Sailors' Knot Old

A sailor makes a knot in a way of his own. Yet all his knots are shown in carvings on tombs on the banks of the Nile that date back thousands of years.

Appropriate Tag

Ice cream has been shipped successfully by parcel post. It should be tagged, "If not delivered in five days, never mind!"

HOW TO LIVE LONGER

By John Clarence Funk, A.M., Sc.D.

Director of Public Health Education, State of Pennsylvania

You Are You

A HIGHLY educated man of fifty two years of age while reading his morning newspaper crumpled up in a heap and promptly expired. The obituary columns were exceedingly flattering and mentioned his many notable and scientific achievements. What they did not say, however, was that in spite of all his book learning he was far from being a wise man.

As a keen observer he was very definitely trained. But for some in explicable reason he did not apply this gift to his own body. Yet he would have been almost insulted had any one intimated to him that he was not living a sensibly healthy life. As a matter of fact, this unfortunate gentleman lived by rule. He ate, slept, bathed and exercised according to the book. His body was magnificently disciplined. But the point he failed to see was that it was the other fellow's discipline.

If human bodies were made in factories and could therefore be tested for standardized stresses and strains, then perhaps it would be all right to set up rigid rules governing health activities to be strictly followed by one and all alike. However nature is not made that way at all.

It seems scarcely necessary to indicate that there are thousands of things people can do which every one well knows are harmful. But then again there seem to be many other things that some people can do harm lessly which naturally damage others. Inhaled tobacco, cold baths, coffee and even sleep and exercise develop different reactions in different people. It therefore behooves every one carefully to study the bodily response to one's living habits. And this, without over emphasized reference to the effect upon others.

Within a limited extent, every individual is a law unto himself. That is the one thing to remember in connection with this fascinating game of living. Get acquainted with yourself and govern yourself accordingly. You are you!

Land Yielded by Mexico

By the treaty of Guadalupe Hidalgo, which ended the Mexican war, the United States acquired possession of the territories of New Mexico, Arizona and California—some 800,000 square miles.

Medieval Armor

The complete suits of armor worn by knights during the Middle ages ranged in weight from 45 to 100 pounds. Chain mail was lighter. Henry VIII of England wore a suit of armor weighing 94 pounds.

MENTONE NEWS ITEMS.

Vern Blue was reported to be on the sick list last week.

Miss Eva Robbins of Fort Wayne spent last week in Mentone visiting her relatives

Dawson Bunner of Indianapolis was a guest of Mr. and Mrs. D. L. Bunner last week.

Dorothy Deamer of Talma spent last week with her aunt, Mrs. Broda Clark and family.

Clara Bell Carey spent part of last week in Warsaw the guest of her sister, Mrs. Pearl Joyce.

Catherine and Frances Morrison of Pierceton spent last week with Mr. and Mrs. Byron Linn and family.

Mr. and Mrs. Elmer McConkey and Doris Fife of South Bend were week end guests of Mr. and Mrs. L. M. Fife.

Mrs. Byron Burgener and son of Bourbon spent part of last week with her parents, Mr. and Mrs. John Coplen.

Elmer Maxwell, wife and daughter Margaret of Frankfort spent the week end with Mr. and Mrs. Roy Maxwell.

Mr. and Mrs. Adrain Little of Fred Swick enjoyed a trip to Banquo, Indiana Mr. and Mrs. Niagara Falls over the week end.

Mr. and Mrs. Max Dunlap and daughter Mary Lucille of Hastings, Minnesota are spending several weeks with Mr. and Mrs. Henry Mills and other relatives.

WARSAW TO GET A NEW POST OFFICE BUILDING.

The bill carrying an appropriation of \$95,000.00 for a new post office building at Warsaw has been passed by both houses and is sure to be signed by the President, and now our county seat is assured of a fine building. Just when work will start in the building is not definitely known.

BARN AND CONTENTS DESTROYED BY FIRE.

A large barn on the farm of Walter E. Haines, located one and one-half miles west of Claypool, burned to the ground at 7 o'clock Wednesday morning of last week. The fire was discovered by Mrs. Haines who happened to look in the direction of the barn as she was eating her breakfast.

Mrs. Sarah L. Garvin, a neighbor, also noticed the blaze and turned in a neighborhood alarm. When the neighbors arrived, the fire had gained such headway that it was im-

possible to save the barn from complete destruction.

Harness and a large quantity of hay, placed in the barn only a few days before, were burned. The livestock was saved. Those helping to extinguish the fire had to put forth every effort to keep the flames from spreading in a wheat field near the barn.

Although the cause of the fire is not known, it is believed that a tramp slept in the barn over night and left a burning cigarette butt on the floor. Damage done was practically covered by insurance.

Analyzing...YOU...

With the New Science of Syllabics
By C. J. COFFMAN
Dean of All the Enumerators

Ethel

"Keeping time, time, time, in a sort of runic rhyme," as Poe says, describes a good deal of your activities, Ethel.

Ethel's Strong Mouth.

There is no doubt that a great deal of happiness can result to you from this if you find the right one to keep

time to. After all, it is better to be a happy time keeper, than an unhappy time driven leaf in the wind.

Two of your middle letters, HE, indicate a window or light, through which we may behold an inspiration. This inspiration might be some glory directly from God, as shown by the last letters of your name, EL.

So we see that one of your strongest bents would be the ministry. Speaking of the God-Inspiration, it may be noted that Ethel Barrymore made one of the best impressions of her career in her play called "The Kingdom of God."

You do have a convincing way about you, helped by the strong, fine lines of your mouth.

This strong mouth enhances the value of the outstanding honesty shown in your face. Even though you might be keeping time for some one else, you do it honestly, but the thing I want to impress you with is your ability to do more for yourself.

Always remember that you are worth from two to four times more to yourself than anyone can pay you. Of course it depends upon your ability to apply your talent.

Your chief talent lays in anything that requires rhythm, or regular time. This might be music or dancing, more likely the latter. But whatever your ambition, don't sit and dream over it. Get up and go after it today. Go and see the person who can help you and ask them outright for a chance.

SAYS WILL ROGERS

BEVERLY HILLS.—Well, all I know is just what I read in the papers, and what I see as I prow the hinterlands. Now lets get this Chicago thing straightened out. I was out there for a whole week right here lately, and talked with everybody that I thought might know something of the real condition as it is out there. Course it was kinder like Politics, you have to discount about 90 per cent of what each side says. But the main thing we did find out, and that was that as far as crime in proportion to its population, why it has less than anybodys town. There has been lots of men killed, but they have been Gangsters, and 90 per cent of them have been killed by their own Gang, not by a rival Gang, its been by their own, for some double crossing and holding out on their bosses.

You see they have very elaborate systems of checking up on you, the same as any big business has of checking up on their clerks or employees, and the minute they discover that you are not handing over all the "loot" or that you might be dealing with some rival enterprise, w h y they what is called, "Put you on the spot," that means you are sentenced, and if your last insurance is not paid, it would be well to look into it, for you are "not going to be with us long."

You see lots of people think that all this Racketeering and Bootlegging and corruption is just a fly by night affair, run on a slipshod haphazard way. Well you never were more wrong in your life. You know as a matter of fact there is nothing as old as crookedness. It started away back when Eve used some political and Sex influence on poor old Dumb Adam to get him to gnaw on a forbidden Apple. Old Cain slew Abel, or visa versa, I dont know which. But anyhow it was argument over the Spoils. Meanness has always been better organized and conducted than righteousness. So these Lads here are really of an old and ancient (and sometimes) honorable profession.

There is no such thing as a little Bootlegger, no more than there is a little Banker. The day of the little Banker in a small town is past. He is a Member of a chain. He is a subsidiary of some big Concern. Well thats what this is. Then look at an expenditure that none of the other basic commodities have to meet, and that is Protection. Talk about a Tariff wall! Why the tariff is only collected by one party and thats at the port of entry.

But with this there is no end of the collectors who are there to levy tribute. What percent of the cost of a bottle, do you think goes to Protection? Why say there is more collecting than there is selling.

Another thing its not so much that Chicago is such a terrible drinking place, but it is the clearing house the same as they are in the Wheat or Cattle Market. It comes in here from Canada, by every known conveyance. Then its made here lots of it, and its cut here. Then it goes out to the various branch places for delivery. Well thats a tremendous business, when you supply America thirst, why you have been to a supplying. So this gang thing is bigger than most people realize.

Now whats going to be done to stop em? Well its as I have said off hand I cant think of anything unless the "Towns best people" quit drinking. These boys couldnt get far if nobody was buying. The demand must be there to create the market. So thats all we got to do to stop the whole thing. It dont seem much does it? Maby by next week everybody will have turned decent.

The Senate just sits and waits till they find out what the President wants so they know how to vote against him.

Be a good joke on 'em if he didn't let 'em know. For instance, if he had announced that he was going to let the Wickersham committee go and didn't want any more money voted for 'em, why they would have voted them a million dollars.

Thats the way Mr. Coolidge used to do. He would keep 'em guessing so long that they voted his way accidentally part of the time.

We are a good-natured bunch of saps in this country.

When the President is wrong we charge it to inexperience.

When the tariff is wrong we laugh it off.

When Congress is wrong we charge it to habit.

When the Senate is right we declare a national holiday.

When a bank fails we let the guy go start another one.

When enforcement officers cant capture it fast enough to fill orders, thats good business.

Everything is cockeyed, so whats the use kidding ourselves.

(© 1930, McNaught Syndicate, Inc.)

IN TWO WEEKS KONJOLA GAVE FINE RELIEF.

Indianapolis Man, Freed Of
Stomach Trouble After All
Else Failed, Enthusiastic-
ally Praises New
Medicine.

MR. CHARLES LEWIS

"I had stomach trouble so badly that I had no appetite," said Mr. Charles Lewis, Box 561, Route 4, Indianapolis. "Meals were followed by bloating and belching spells. I had a burning sensation from my throat to the pit of my stomach. I rolled and tossed at night and was nervous during the day. My liver was sluggish and my kidneys were weak. Back pains were frequent and severe. Night rising were necessary and I was going from bad to worse.

"I improved in health before I had completed the first bottle of Konjola. My appetite improved and the bloating began to disappear. I took two bottles of Konjola and now my stomach is in excellent condition. I sleep well at night, nervousness has gone, and my liver and kidneys are functioning as they should. I am still taking Konjola and will never fail to keep it on hand for it certainly solved all my health problems. Konjola contains no alcohol-no nerve deadening drugs, no heart depressing chemicals. It is all pure, powerful medicines and every drop works.

Konjola is sold in Mentone Ind., at Shafer & Goodwin drug store, and by all the best druggists in all towns throughout this entire section.

Advice Not Needed

JUST THINKIN'

by Charles S. Kinnison

Morning Song

'Twas a morning drab and dreary,
Dawn of day was soon to break—
Dulled by sleep, my eyes were bleary,
I was up, but half awake!
At the house, I vain would tarry,
For the day looked hard and long.
Then—the little old canary
Warbled forth his morning song!

Did I say that I was gloomy,
That the world looked drab and gray,
And was unattractive to me?
Yes, it's true—I'm 'shamed to say!
But the little glad canary
As he sang, to greet the dawn,
Filled my heart with music merry
And my shadows soon were gone.

I was eager for the duty
Of the day that lay ahead—
It would be a day of beauty,
On which God his smile would shed!
I had not a cause for grieving,
I was doubly blest, I knew—
And, as I the house was leaving,
I'd a song of gladness, too!

(©, 1930, Western Newspaper Union.)

THE COUNTY COMMISSIONERS' ALLOWANCES

WILL FURNISH FOOD FOR THOUGHT.

The report of county expenditures as published in the Warsaw Times on July 14th, contains some figures that surely should make the tax-ridden public set up and take notice.

We have not the space to go into detail in this matter, and will only call your attention to a couple of items that in our opinion are way out of proportion, and indicate that someone is not paying the attention to his duties that he should.

The portion of the report that deserves special attention is

the allowances in the gravel road repairs. Under this heading there was paid out approximately \$6,289.58, which in itself does not make a bad appearance. But when you stop to analyze the allowances you will find that garage, repairs, oil and gas bills included with the above amount was \$1,928.82, or a little over thirty per cent. And while the report does not state just what the money was paid for, yet we feel that we are safe in assuming that the money paid the five oil companies was for oil and gas. And the amount paid these five oil companies amounted to \$1,342.21 which looks to us as more gas and oil than should be needed for the amount of repairing done.

We are not inferring that there has been any crooked work done in the payment of these bills, but we do believe that if our commissioners would examine these bills more closely and use the same care in the payment of the same as they do with their private bills they would only be doing what they are being paid for and much of the tax payers money would be saved.

We think that it would be wise for the public in general to read over these reports carefully and when something appears in same that does not look right ask your commissioner for an explanation. When it is found that these reports are read there will be greater care used in the allowance of bills and much of the public money will be saved.

FARMERS AFFECTED BY WAR

By GEORGE E. ROBERTS, President N. Y. National City Bank.

Instead of attempting to provide relief to farmers who cannot produce wheat and cotton as cheaply as can farmers in other states making use of machinery especially adapted to that region, the cheaper production costs should be accepted as a development on the whole contributing to the general welfare and the necessary adjustments should be made elsewhere.

The farm problem as existing today had its origin in the World war. The war caused derangement of production and trade which are factors of disturbance today. Western Europe had been accustomed to rely upon Russia for large supplies of foodstuffs, and the cutting off of these supplies, together with the devastation of much of Europe by the armies, gave a great stimulus to farm production outside of Europe. Now Europe is back in full production and an overproduction of farm products exists in the world, and a problem of farm relief exists in every country. Moreover, along with the expansion of agriculture in other countries came the discovery that wheat and cotton can be grown in the region which in my school days was marked in the geographies as the Great American desert, and that by the use of machinery especially adapted to that region they can be grown more cheaply than in the older wheat and cotton states. That discovery has had serious consequences to the farmers of these older states.

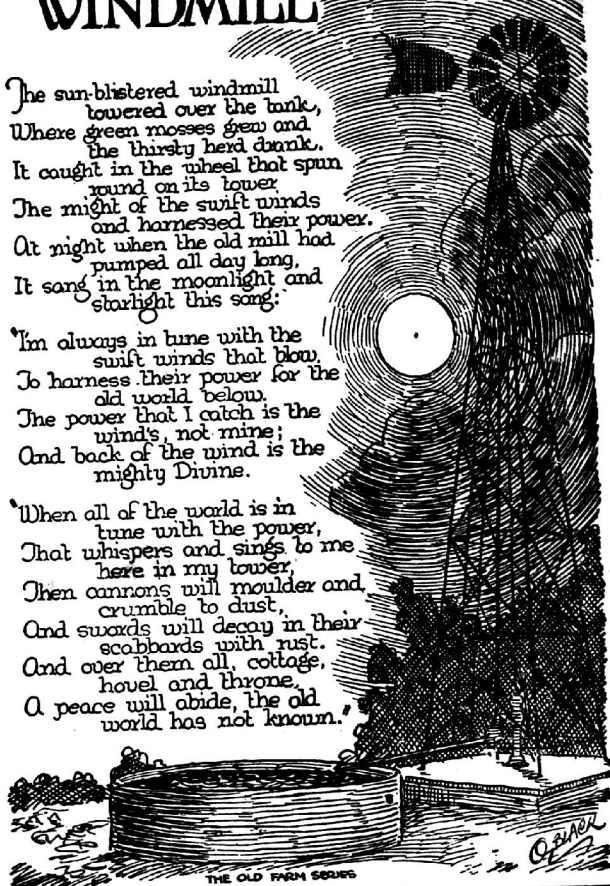

The SONG of the WINDMILL

by
A. J.
DUNLAP

The sun-blistered windmill
towered over the tank,
Where green mosses grew and
the thirsty herd drank.
It caught in the wheel that spun
round on its tower
The might of the swift winds
and harnessed their power.
At night when the old mill had
pumped all day long,
It sang in the moonlight and
starlight this song:

"I'm always in tune with the
swift winds that blow,
To harness their power for the
old world below.
The power that I catch is the
wind's, not mine;
And back of the wind is the
mighty Divine.

"When all of the world is in
tune with the power,
That whispers and sings to me
here in my tower,
Then cannons will moulder and
crumble to dust,
And swords will decay in their
scabbards with rust.
And over them all, cottage,
hovel and throne,
A peace will abide, the old
world has not known."

For nearly 40 years this bank has conducted a sound, conservative, successful banking institution.

This is why we enjoy the confidence and patronage of a large circle of friends who have found it profitable to be connected with a bank rich in experience and offering a distinctive service.

Capital \$75,000.00.

Surplus and Profits \$56,000.00

Farmers State Bank,
Mentone, Indiana.

"One must look out,"

said MRS. MOLLA PROPP,

"for those leaky radius things.

WHAT is that thing, my dear, that you twist when you step on the agitator to start the car? Isn't it the choke? Well, whatever it is, one should never leave it on when the car isn't running, for Henry says that takes all the electricity out of the intake.

I came home about four yesterday and put the car in the garage. I must have been going through the door too fast... or maybe it was because I was reading the headline on the paper at the time... anyway, I bumped the wall and that stopped the car as neatly as you please.

When I wanted the car this morning I stepped on the thing you start it with... right by the boards that you push with your foot when you're not driving and want to stop. But there wasn't a sound. I tried several times, but a mouse couldn't have been more silent, my dear.

I asked the man next door to

come over and he looked into the positive and negative and all those things one looks into and he said that the condenser was as dead as a doornail.

Well, there I was... and there was Henry's car standing. So I took it and while I was gone Henry came back and wanted his car. When he saw it was gone he tried mine. The thing wouldn't buzz, so he got out the handle and it seems that the car was in reserve gear all the time and when the engine started the car backed out of the garage and hit a tree on the vacant lot.

What I told Henry when I saw what he'd done to my car... MY car, mind you... was plenty and it cost him twenty-nine dollars for new lights and a fender and things like that. But Henry's a dear anyway, for he didn't say a word when he saw that I'd dented one of his fenders on the side of a street car.

John Jensen.

Proposition in Euclid

"Pons asinorum" is Latin, and means "asses' bridge." It is the name given to the fifth proposition of the first Book of Euclid, in which it is required to prove that the angles at the base of an isosceles triangle are equal to one another.

Shark By-Products

After a shark has been skinned, something like twenty by-products are obtained from the carcass, including glue, pigments, polishing materials, animal fodder and fertilizers.

Invested Money

The money invested in machinery is called fixed or permanent capital, while that called working capital is the money required to meet current expenses of industry—salaries, wages, marketing costs, rent, light, heat and raw materials.

Early Advertising

All advertising in early newspapers was in the form of "readers," like the present-day classified ad. These appeared in the early English newspapers and the first copy of the Boston News Letter, printed in 1704, regarded by many as the first newspaper in the present meaning of the term, included ads under classified heads.

Flies Good and Bad

There are more than 30,000 kinds of flies. Their conduct toward man is both good and bad. Some flies destroy injurious plants and some destroy harmful insects. Indians, at one time, lived off the young of a certain fly.

No Area to North Pole

The North magnetic pole has no area. It is merely a point upon the earth's surface.

THE PHONE COMPANY

RATE INCREASE REFUSED.

Public Service Commission Finally Hands Down Decision.

According to the Bourbon News-Mirror, the petition of the Northern Indiana Telephone Co., for an increase in phone rates has been denied by the Utilities Commission and at the present there will be no increase in telephone rentals.

It has always appeared to the Farm News that this petition was filed more for a "smoke screen" than for the purpose of getting a raise in rates, and undoubtedly the officials of the company are now elated over the way in which they "pulled the wool" over the eyes of their patrons.

In order that our readers may have a better understanding of their apparant "victory?" it will be necessary for us to turn back to the time that the Farm News first entered this fight.

Our first article on the telephone situation appeared in our issue of Oct. 9, 1929, and was a protest against the cutting off of the free service of the subscribers to neighboring exchanges, which at that time had stirred up the farm patrons to such an extent that a large number of phones were being ordered removed. After the publication of this protest, under date of Nov. 6, we received a letter from Mr. Carl Mote president of the company, containing veiled threats for the attitude that we had taken, and concluding with the statement that his company were about to ask the commission for another raise in rates, and a few weeks later the petition asking for a raise in rates was filed.

Whether the filing of this petition was done primarily to allay the feeling that had been engendered by the cutting off of the neighboring exchanges we are not positive, but it is a well known fact that the asked for increase in rates did cause the patrons to forget all about the loss of adjoining exchanges, and from that time on the whole fight centered about the proposed rate increase.

We mentioned sometime ago that the petition for an increase in rates might be a "smoke screen," and the final out-come of the controversy convinces us that our suspicions were well founded. We have never had any doubt but what the rate would be allowed if the company really wanted it—the Utility commission had already established the valuation? on their properties, and they were not receiving the returns on the valuation that the law provides, and unless the commission rescinded their appraisal valuation they were

in duty bound to grant the increase asked.

It looks very much to us that for the present Mr. Mote and his associates have accomplished just what they set out to do—hush up the howl caused by cutting off free service with neighboring exchanges—and so far as the company is concerned everything is rosy.

Whether or not the phone patrons will now lay down in the matter we do not know, but it seems to us that in-as-much as the phone patron of today has access to only about one third as many people as he could get without extra charge one year ago, that it is now up to the company to either restore the cut off exchanges to the free list or reduce the rental fee, to the value of the service rendered.

ASK TWO-YEAR SEPARATION

Mrs. Jesse Kuhn, of North Webster, Makes Charge of Cruelty.

A separation for a period of two years is asked by Cora Kuhn from Jesse Kuhn in a limited divorce proceeding filed with the clerk July 16th. The parties of the complaint reside in North Webster.

In the complaint the plaintiff charges that her husband has been habitually cruel to herself and his five children and that for more than six months past he has failed to provide for them. Mrs. Kuhn asks the custody of their five children, Henry 19, Mabel, 18, Glen 17, Blanche 14, and Opal 11.

The plaintiff also asks the court to allow her maintenance for herself and children during the separation.

This is one of the first cases of its kind to be filed in court here under the new law providing for a limited divorce.—Warsaw Times.

A QUICK SALE.

One of the most complete kitchen sets of furniture that we have ever seen was on display for a few days last week at the Jefferies furniture store. Aside from being a very convenient outfit it was a real beauty both in finish and design. It was not in the show window long before Oliver Teel came along and became its owner.

A BELIEVER IN ADVERTISING.

Regardless of the fact that his store is located in the country, George Black often carries an advertisement in the Farm News. "Trade with Black and save your jack" carries quite a complete stock at his store at Doran crossing as his advertisement in this issue will show. He has the goods and is not afraid to let the people know it.

SAYS WILL ROGERS

BEVERLY HILLS.—Well, all I know is just what I read in the papers. With Mr. Coolidge writing for the papers why we got a lot of new reading to do now.

He had one in the other day that kinder jarred all of us, and made us wonder if he wasn't having a Ghost Writer Jo some of his stuff. It advised the working man to spend his money, and buy everything that he could possibly afford, and in that way help out the whole economic thing, so that it would put more money into circulation, and make more jobs for those that had none.

Now that is absolutely going against all the laws we have been brought up to; we have always been taught to save and put by every dollar that we could, and not buy anything unless we absolutely needed it, and to spend no money for things that we could do without. Now all at once we are advised by everybody to start spending, so it will help somebody else. Imagine telling the working man to spend, that if he dont put his money into circulation why he wont have a job very long. That is what Mr. Coolidge said. Now that sounds so unlike him. Here is a man that the whole basis of his popularity is based on his economy and thrift, and all at once to help out a situation, why he says "Spend." So its hard to tell what to believe nowadays.

Speaking of Prosperity, which about all we are doing is speaking of it, wh: I read with great interest recently the celebrating of the ninety some birthday of our genial benefactor Mr. Rockefeller Sr., and it brought back many happy thoughts of my meeting with him every winter when I would play my little "talk dates" at Daytona Beach, Florida, he would always come to the Auditorium and bring all the people from his winter household, servants and all. The three years I did that, he was right there an' he would not miss a single "Gag." He was as keen and alert as anyone in the audience, and was always well versed on Topics, as on Oil Gravity. He knew as much about the disarmament Conference as he did what the "Dutch Shell" were doing. I always had a few local jokes about him and would go down off the "Rostrum" and shake hands with him, and he would quietly ask me to come to his home on the following morning and have breakfast with him, at eight o'clock. Then after a fine breakfast,

when he would give us all a dime each as he come down in the morning, we would go nearby to the Golf Course, and he would play eight holes. It took a pretty tough day, that kept him away. The reason for the eight holes only was that the eighth hole was over by a back road where he could have his car meet him, and go direct home from that hole. I dont play the game. (Not even at three at night for money.) But he made lots of the holes in what you call Par. He was always straight down the course, not so terribly far, but ON IT.

The old fellow looks like he is extremely happy and satisfied, and I think feels that he has been of some service to his Country as well as to the passing Motorist. He has not only filled the Countrys tanks, but has filled many a diseased man with hope of a cure.

Just about a week ago the Prince of Wales made almost a prayer over the Radio that England might develop some one in their country comparable to Rockefeller in philanthropy.

Thats about the biggest single praise that has come his way. When the future ruler of a great Kingdom asks for a similar man in their Country, you must have accomplished something.

The Lindberghs have always known they would call the baby Charles Augustus, but what has held them up all this time was whether to use the Jr on the end or not. So they finally decided to use it.

The pictures show him sleeping with his eyes shut and his mouth open, so he don't take after his father. He slept with his eyes open and his mouth shut.

Us ignorant people laugh at spiritualists, but when they die they go mighty peaceful and happy. After all, about all there is to living is to go away satisfied. Maybe they have got "an ace in the hole" at that.

We got an epidemic of crazy women parachute jumpers—going just for the jump. Shooting your husband has got so it don't land you on the front page. So, they have traded their guns for parachutes and are trying to jump and land on it.

Its never a real aviator that makes an exhibition jump. They know they were made to save useful lives in an emergency and not to put on a show with. We are all against having any more laws, but one against women parachute jumpers we would go for.

(© 1930, McNaught Syndicate, Inc.)

Is it using the wife right to have her slave over a wash tub every week when you can buy a Horton power washer on the easy payment plan? What would be Will Rogers' answer.

(ADVERTISEMENT.)

ANNOUNCEMENT.

To The Patrons of the Northern Indiana Telephone Company.

The Public Service Commission has denied the petition of the Northern Indiana Telephone Company to increase certain rates which would have yielded about \$4,000.00 increased revenue annually.

That the Company is entitled to the increased rates sought, as a matter of law, there is not the slightest doubt even in the minds of the members of the Public Service Commission who denied the petition. That the Company by resort to the Courts could obtain greatly increased rates, there is also no doubt whatever.

The Company's petition, however, was filed more than six months ago. In the meantime, the whole country, and especially the agricultural communities, have felt the pinch of the worst depression in a generation. With full knowledge of this condition, the Northern Indiana Telephone Company has decided not to seek relief from the courts, but to accept the Commission's order gracefully and to continue with its usual good cheer to give the very best service humanly possible to its subscribers.

Arrangements have been made, for a short period of time, to install telephones FREE. In other words, all that is necessary is for payment to be made in advance on the rental.

Respectfully,

Carl H. Mote

Pres. Northern Indiana Telephone Company.

NOTE—The above advertisement was received after the opposite page had been printed, consequently the phone articles on that page made no mention of this announcement. We are pleased to note that the phone officials are again getting down to earth, and now if they will grant us free service with neighboring exchanges, as formerly was the custom, everything will be satisfactory to the patrons, and the company will find that all of their old patrons will return and many new ones. Come now Mr. Mote be a real sport and play the game fair.

INSTALLING NEW FIXTURES.

As we go to press Clark's are installing their new fixtures and expect to have everything in ship shape in a day or so. When this is completed they will have one of the neatest and most modern general stores in this part of the state, and Mentone will have a business house that will be a credit to the entire community.

BIRTHDAY SURPRISE

The 4th birthday gathering was held for Mrs. John Coplen at her home Sunday July 13th. Everybody bringing well filled baskets. Those present were: Mr. and Mrs. Lee Hickman and children from Attica, Mr. and Mrs. Arden Miles and children of Windgate, Mr. and Mrs. Merl Craft and John Shamp of Williamsport, Mr. and Mrs. Sam Shamp and children of Bingsburg, Mr. and Mrs. Harry Davis of North Manchester, Mr. and Mrs. Sam Shamp of Decatur, Mr. and Mrs. Carl Mayes and grandson of Marion, Mr. and Mrs. Byron Bergener and son of Bourbon, Mr. and Mrs. Ray Coplen and children, Willard Coplen of Akron, Mr. and Mrs. Chester Coplen, Mr. and Mrs. Dearl Coplen and son and Mr. and Mrs. Austin Borton and family.

COMES TO OLD HOME TOWN IN AIRPLANE.

Lawrence Bell, an old time Mentone boy, riding in his own plane, piloted by Wm. Wheatlet, visited some of his old chums in this place Sunday. Mr. Bell is one of Mentone's early youngsters who has gone out in the world and made good by his own efforts. He is now vice president of the Consolidated Aircraft Corporation, of Buffalo, N. Y., and operates air lines from Buffalo to distant cities. He plans to fly one of his eight passenger planes here in August but will have to make the landing at the Zimmer field at Warsaw as it is necessary to land those machines at a speed of about 75 miles an hour.

IF YOU OWE US WE WANT OUR MONEY.

All persons who owe us accounts that are now due or past due are requested to call and settle same at once as we must have what is due-us in order that we may meet our obligations.

Please attend to this at once and save us the trouble of sending personal requests.

Mentone Lumber Co.

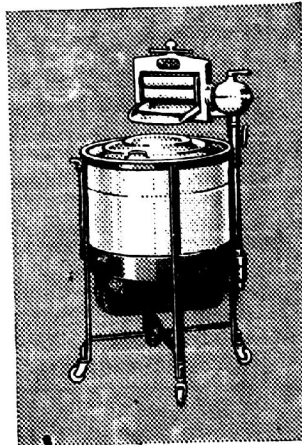

From the Spanish

The word "fillbuster" is an English adaptation of the Spanish fillbustero, meaning a freebooter or buccaneer. The term was applied to a buccaneer, especially one of those infesting the West Indian and Spanish-American coasts in the Seventeenth century.

The Expected Happens

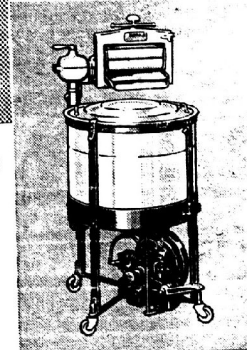

It is a saying among explorers that only amateurs have adventures. What explorers have in the field is experience. The unexpected is always expected; inconvenience and hazard are occupational risks.—Country Home.

HORTON—A GOOD NAME FOR 59 YEARS

At left, the EMERALD ELECTRIC Model for standard current or farm power \$99

Below, gasoline engine model with the famous Johnson \$140 Utilimotor

Never Before Such Washing Machine VALUE

NOTE carefully these features:—porcelain tub, inside and out—sealed mechanism insuring dependable service—Lovell pressure cleanser with big, semi-soft rollers to complete the cleaning and remove water without harming a fastener.

Try to match the Horton value—at the price. You'll realize then the value of Horton experience—59 years of fine manufacture.

Let the Emerald do your next washing—free and without obligation. We'll gladly arrange it—come in or phone.

The Mentzer Co.

MANY CANADA THISTLE DEMONSTRATIONS HELD.

Purdue News Service

Lafayette, Ind. July 22—During the spring and summer months, extensive efforts have been put forth by O. C. Lee, of the division of botany of the Purdue University Agricultural Extension Department in a campaign to eradicate Canada thistle. Mr. Lee closed his season of demonstrations July 19, and at that time had conducted 51 demonstrations in more than 30 counties, ranging from Whitley county south to Shelby county.

According to the Purdue weed specialist, the state is divided into three sections of infestation by Canada thistles, the northern part being mostly heavily infested, the middle having patches of the weeds, and the south fairly free. Most of Lee's work has been done in the middle portion, in an effort to head off further spread of the weeds.

In the demonstrations, which have been held in cooperation with the county agents, the Purdue man has used sodium chlorate and a mixture of sodium chlorate and calcium chloride. The latter has an advantage in that it is less inflammable, but requires stronger solution to be effective. Both of these materials have been found to be thoroughly effective in killing Canada thistle and most other noxious weeds, and recommended as control.

Sodium chlorate is sprayed on the plants and causes death when it is absorbed by the leaves and carried to the roots. Nothing will grow on a plot of ground that has been sprayed with one of the weed killing solutions for a few months, but the toxic effect usually does not last more than a year.

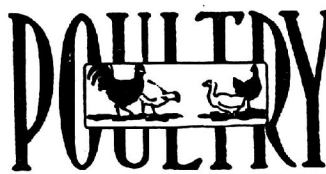

The sodium chlorate solution is used at a strength of one pound to a gallon of water, and the sodium chlorate-calcium chloride one and one-half pounds to a gallon of water. Two or three gallons of the solution will cover about a square rod of ground.

All containers for the material should be of metal, as the solution may cause wood or other organic material to ignite. Livestock should not be pastured on ground which has been sprayed, until after a heavy rain.

In using chlorates or even in having them around, there is great danger of fire, Lee points out. Cans should be kept tightly sealed and never opened in or around buildings. Men spraying should wear rubber boots, and if their clothing becomes wet with the solution, it should be washed before the material dries in

the cloth.

Mr. Lee recommends that farmers interested in killing weeds by means of chlorates may write to the Agricultural Experiment Station for a leaflet on the subject, or get in touch with the county agents.

EXTRA COCKERELS MAY BE CAPONIZED

Males Not Otherwise Needed Are Easier to Keep.

Caponis fatten easier and at less cost, says the New York state college of agriculture. Male birds not sold as broilers, or otherwise used, may be caponized if they are to be held over. Market quotations on capons usually begin in November and are several cents more a pound than those for cockerels, especially for the holiday trade.

When successfully caponized the bird does not have the appearance of a cockerel. The comb and wattles do not develop and the saddle and hack feathers grow long. Caponizing a bird makes him more quiet and peaceful, and causes the flesh to retain the fine flavor and texture of broiler meat. Capons will stand closer confinement than cockerels.

Breeds used for capons depend on the market demands. For the production of large capons, Orpington's, Light Brahmas and Jersey Black Giants are satisfactory; for smaller capons any of the American breeds, such as Plymouth Rocks, Wyandottes, and Rhode Island Reds are adaptable. Leghorns make such small capons that it is doubtful whether it pays to caponize them.

Cockerels selected for caponizing should be about 8 to 10 weeks old and weigh about 1½ to 2 pounds.

Caponizing demands skill, and it is advisable to watch an experienced operator. Cornell has an illustrated bulletin, E-143, on capon production, which may be obtained by applying to the Office of Publication, New York State College of Agriculture, Ithaca, New York.

Keep Waterers Clean During Summer Season

During the summer months it is very easy to neglect the waterers and feeders. As the chicks approach maturity, it becomes constantly easier for them to step in and roost upon the waterers and feeders. This increases danger of contamination. Disease also is spread by the working in of dirt and filth from the floor or ground,

into the waterers and feeders. This danger can be lessened considerably by keeping clean feed and water before the chicks at all times and by placing the feeders and waterers so that chicks will not mix in the dirt.

Dry Henhouse Floor

E. L. Dakan, head poultryman at Ohio state penitentiary, is practical. Last year when it became necessary to put up a new poultry house at the university, Dakan decided to make the floor just like most farmers would do it. In other words, they leveled off the soil as best they could, first making sure that the floor was higher than the outside surface. Then they put down a layer of tar paper to keep the water from rising from below, then put down a two-inch layer of concrete. And all last winter this proved to be one of the driest of the poultry house floors.

Kill Red Mites

Red mites can be controlled more easily by starting early than if hot weather comes before we start, says R. L. Cochran, Iowa State college poultryman. In warm weather the mites multiply very rapidly and are hard to get rid of. They can live for months without food and live by sucking blood. It is certain they will stunt or kill young chickens and stop hens from laying. Four days after the female mite lays her egg it hatches and the young mite starts his career.

Lime for Hen Yard

If it has not already been done, every bare poultry yard should be limed and plowed or spaded at once—and kept under cultivation for several weeks if possible. There is some difference of opinion as to the value of air-slaked lime as a soil disinfectant, but it is pretty sure to prove an advantage to any crops that may be planted. Frequent stirring of the soil helps greatly in preventing or reducing disease contamination, so crops that can be cultivated are best.

HOTEL GETS NEW DRESS.

The hotel building at the corner of Main and Broadway has received a coat of paint which adds greatly to the appearance of that portion of the business section.

Perfect Excuse

There is a club devoted to the laziest men in the world. Any attempt by a member to hurry is punishable by a fine. One day a member was summoned for driving a car at a high rate of speed. Excuse—He was too lazy to take his foot off the accelerator!

When Snake Sheds Skin

Every time a snake sheds its skin its vision is slightly dimmed due to separation of the outer layer of the epidermis from the inner part of the outer coat of the eyeballs. This happens any time a snake sheds its skin. This may be several times a year.

TALMA NEWS ITEMS

Mrs. George Bryant remains in a serious condition.

Miss Blanche Yeazel spent Sunday with Miss Winifred Swick.

Mr. and Mrs. Edwin Meredith are both on the sick list this week.

Mr. and Mrs. Ed Severns of Warsaw spent Sunday evening with Mr. and Mrs. Earl Zent.

Mr. and Mrs. Lloyd Zent spent Sunday evening with the former's parents near Palestine.

Arthur Hutchison and family of Warsaw were Sunday guests of Obe Haimbaugh and family.

Mr. and Mrs. John Leavel and daughter of Fulton spent Friday with Mr. and Mrs. W. H. Cooper.

Mr. and Mrs. Vincen Teeter and family spent Sunday in Warsaw the guests of Mr and Mrs. Clee Teeter.

Roy Dewitt and family of Fort Wayne were Sunday afternoon callers of Mr. and Mrs. Edwin Meredith.

Esco Busenburg and family of Elkhart spent Sunday with the former's parents, Bert Busenburg and family.

Annabel Lee and Donna Joan Zolman of Rochester spent a few days with thir grandparents, Mr. and Mrs. Ora Horn.

Lloyd Kesler and family and Miss Nadine Arnsberger of Warsaw spent Sunday evening with Obe Haimbaugh and family.

Mr. and Mrs. Clarence Adamson and Richard Felder of Detroit and Mr. and Mrs. Adamson of Rochester were Sunday guests of Roy Adamson and family.

Every member and his family of the Newcastle Twp. Farm Bureau and Ladies Auxilliary are invited to attend a reception in honor of Mr. and Mrs. Leon Kotterman and family to be given Wednesday evening July 30, at their home in Talma. Each lady is requested to bring a cake and table service for her family

IT SURE IS SOME LAW

We were not aware of the fact, but according to an article taken from the Warsaw Times and published in another column that the recent session of the state legislature passed a law making it possible to secure a divorce for any period asked by the litigant. It seems to us that in keeping with this law our law makers should also have passed a law making it possible to get married for any period that the contracting parties might desire. Nothing like having accommodating laws they are easier to live up too.

ALL WORK GUARANTEED

I do all kinds of well drilling and repairing and guarantee that you will be pleased with my service. Homer Saner, Phone 8 on -198, Akron. Sep. 10.

Water Buffalo's Habits

Although it is true that the water buffalo is very fond of water and remains near it as much as possible, it can live quite easily without being in water. It must have water to drink, like all other animals, but lying in water is a matter of comfort and not of sustaining life.

Mr. Lawrence Bell, Mr. Morrison Rockhill and son Alvin ate breakfast Sunday with Mr. and Mrs. Austin Blue.

Mrs. Flossie Coplen, Mrs. Austin Borton and Mrs. John Coplen called on Mrs. Manda Swartzlander at Akron last Wednesday afternoon.

Mrs. Dobbs Miller and son John Austin of Minneapolis, Minnesota are spending a months vacation with her parents, Mr. and Mrs. Austin Blue.

Betty and Emma Doran who live with thir aunt, Mrs. Nora Teel are spending the week with their grandparents, Mr. and Mrs. Riley Nelson at South Bend.

Ray Coplen, Mr. and Mrs. John Coplen spent last Wednesday evening with Frank Swartzlander. Mr. Swartzlander suffered a stroke of paralysis a few weeks ago.

A new awning now graces the front of the Reeds Hardware.

Grafton Barber and wife of Fort Wayne came to visit their uncle, P. W. Busenburg one day last week.

Miss Mollie Shaw of North Broadway is spending the week at the Clem Teel home south west of town.

Mr. and Mrs. Charles Personett of Warsaw spent Monday with Mr. and Mrs. Lee Blue. Miss Avonell Blue returned home with them for a weeks visit.

Leonard Eiler, who is employed at the Hobart Creighton Chicken Farm at Atwood is at the home of his parents, Mr. and Mrs. Clarence Eiler sick with tonsillitis.

Mr. and Mrs. Ray Coplen and family and Mr. Willard Coplen spent last Sunday at North Manchester where they attended a birthday party for Mrs. Harry Davis.

Mr. and Mrs. James Burket and daughter of Culver called on P. W. Busenburg last Sunday. They were going to spend the day with his brother and wife at their country home south of Burket.

Mrs. L. M. Fife and daughter Lois and Jeanette Cinninger spent Tuesday and Wednesday in South Bend with Mr. and Mrs. Elmer McConkey and attended the Annual Children's Parade at Playland Park.

Mr. and Mrs. Isaac Sarber entertained at Sunday dinner, Mr. and Mrs. Morrison Rockhill and family, Mrs. Stella Rockhill of Warsaw, Mr. Lawrence Bell and Mr. William Wheatley of Buffalo New York, and Mrs. Julia Whetstone.

Our job department is doing some printing for Geo. Buchtel of the Mentone Feeder Shop. The "Hen-ry-etta" chicken feeders manufactured by this concern are meeting with a wide sale and it keeps Buchtel busy keeping up with the orders.

FAMILY REUNION.

The annual reunion of the Laird-Braddock families will be held at the city park at Warsaw, Ind., Thursday, August 14th.

Earth's Weight

There is nothing to indicate that there has been an actual change in weight in the earth. The experiment of Dr. Paul Heyl in reweighing the earth merely gave a more exact result.

Washington Great Center

Headquarters of about 400 associations and organizations are in the National Capital. Commercial, industrial, civic, patriotic, religious and political organizations find Washington a logical location for central offices.

ANSWER TWO FIRE CALLS.

The Community Fire Truck answered two calls to the country Monday. The first call came from the Igo farm south of town, where a newly threshed straw stack located very close to the farm buildings was on fire; and had it not been for the timely arrival of the fire equipment and fighters all of the farm buildings including the residence very probably would have burned. As it was several of the building caught fire but the flames were in each case extinguished with no loss to speak of.

It is said that the fire originated by a little son of Mr. Igo's attempting to burn some chaff off the back yard.

In this case alone the new truck probably saved enough property value to more than pay the cost of the outfit.

In the evening the fire fighters were called west of town, where there was a grass fire along the railroad track, but when the boys arrived on the scene the fire had burned itself out and there was nothing to be done but return to the fire station.

MUCH NEEDED RAIN BRINGS RELIEF.

The intense heat wave and drought that has been holding this section of the country in its grip for the past few weeks was broken Monday night with a very nice all night rain. The rain fall received a real welcome by the farmers as the crops were all burning up. While the drought did a great deal of damage to growing crops, yet the rain will do much good and prevent a complete failure in this locality.

IF YOU MET WITH A SEVERE ACCIDENT.

Was Laid up in a Hospital or Home Could You Pay Your Expenses for One Cent a Day?

IT CAN BE DONE.

Pay us \$3.65 or at the rate of a penny a day for a whole year, and in return should you at any hour of the day or night during the year be riding as a passenger on a railroad train, steam boat, street car, elevated or subway car and by the wrecking of that vehicle you become injured, we will pay you at the rate of \$100 per month for one day of more for a period of a year's time. Should you be killed we will pay to your estate \$5,000.00 and in event you are permanently disabled by the loss of one or more limbs or the sight of an eye or eyes, we will pay you from

\$1,500.00 to \$5,000.00 depending upon the extent of your disability.

Suppose you should become injured from the wrecking of your automobile, or while riding in your friend's car. Suppose you are riding in a taxi cab, motor bus, or elevator, and through the wrecking of that vehicle if you should be injured we would pay you at the rate of \$100.00 a month, and if killed your estate would receive \$1,000.00; also for loss of sight, or limbs from \$500.00 to \$1,000.00

That's Not All—This same indemnity would come to you for injuries received as a result of being struck by lightning, injured in a tornado, by being burned or suffocated by smoke in the burning of a church, school building, theater, store office building or lodge room. Should you drown while bathing at a bathing beach your estate would receive \$1,000.00.

Furthermore—Suppose you were struck, knocked down or run over while walking or standing on a public highway. Suppose you were injured while driving a truck, wagon or buggy, and if you are a farmer, suppose you were injured while operating a threshing, mowing or heading machine, a binder, harrow, plow or tractor, we would pay you for one day or more of disability at the rate of \$50.00 a month; and if killed your estate would draw \$500.00.

This 1c Day Will Also—entitle you to a \$10.00 medical or surgical attention for any of the fore-going injuries that does not totally disable you, and if you are injured in any accident, any place, any time and are laid up for a month you will receive \$25.00.

A real honest to goodness accident policy that covers the pedestrian as well as the traveler. Just think, all this for only 1c a day.

AMERICAN BENEFIT LIFE ASSOCIATION

Applications taken at Farm News Office.

"Spot Fyter" for grease and dirt spots. A few drops, a little rubbing, and they are gone. For sale at Clark's Store.

DO NOT TAKE ANY CHANCES

Cleaning clothing with naphtha, gasoline etc., is very dangerous, regardless of the fact of whether you may have any fire around or not. The rubbing of the cloth can ignite the fluid, and the result is a bad burn or possibly death. Play safe use "Spot Fyter" which is non-explosive. It will clean most anything in a jiffy. Costs only 50c per bottle at Clark's Store.

DORAN STATION ITEMS

(Leave Items at Black's Store)

Robert Heighway is reported on sick list.

Edson Sarber spent Monday afternoon in Warsaw.

Floyd Tucker attended the Circus at Warsaw Thursday.

Mrs. Ivan Miller spent Wednesday with Mrs. Lloyd Creakbaum.

Mrs. Edson Sarber spent Monday afternoon with Mrs. Chas. Black.

Miss Ethel Borton is spending several days with Mr. and Mrs. Chas. Black.

Mrs. Philip Whetstone spent Friday afternoon with Miss Pauline Marshall.

Miss Johanna Leininger of Akron spent a few days with Miss Wanda Heighway.

Mr. and Mrs. Horace Rickel were shoppers in Plymouth Thursday afternoon.

Mr. and Mrs. Bernard Black spent Sunday evening with Mr. and Mrs. Clarence Tinkey.

Don Sanders of Chicago is spending the week with Mr. and Mrs. Lloyd Creakbaum.

Mrs. Marion Taylor and children were guests of Mr. and Mrs. O. N. Igo Tuesday evening.

Mr. and Mrs. Wm. Creakbaum of Akron spent Friday evening with Mr. and Mrs. Lloyd Creakbaum.

Mrs. John Creakbaum spent Thursday afternoon at the home of Mr. and Mrs. Clarence Eiler.

Russel Eber of Fort Wayne is spending the week end with his parents Mr. and Mrs. John Eber.

Mr. and Mrs. Curtis Riner were callers at the home of Mr. and Mrs. George Black Wednesday evening.

Mr. and Mrs. George Black and Mr. and Mrs. Bernard Black attended the Circus at Warsaw Thursday evening.

Mr. and Mrs. Mars Tucker and daughter spent Sunday evening with Mr. and Mrs. Frank McGee at Warsaw.

Mr. and Mrs. Gus Mollenhour entertained at Sunday dinner, Mr. and Mrs. Lloyd Summe and children of Burket.

Mr. and Mrs. Mars Tucker and Mr. and Mrs. H. V. Nellans were callers at the home of Mrs. Nellie Tucker at Silver Lake Sunday afternoon.

Mr. and Mrs. Gus Mollenhour and daughter and Gene Marshall were guests of Mr. and Mrs. Walter Creiger at Yellow Creek Lake Friday evening.

Miss Lillian Igo spent Thursday night with Miss Leah Parks.

Mr. and Mrs. Dwight Mason and son and Mr. and Mrs. Luther Rickel of Wadsworth, Ohio were guests of Mr. and Mrs. Chas. Black over the week end.

Mr. and Mrs. Mose Newall and Mr. and Mrs. Gene Newall and son of Gary spent Saturday and Sunday with Mrs. Harry Meredith. Mrs. Mose Newall remained for a weeks visit.

BAPTIST CHURCH NOTES.

Bible School ----- 9:30 a. m.
Morning Worship ----- 11:00 a. m.
Evening Service ----- 7:30 p. m.

We have been "carrying on" at all regular services as usual.

On Thursday evening of this week instead of the prayer service there will be a message brought by Rev. Frank J. Nles, and a colored quartet will sing. The Methodist church is uniting with us in this service. The general public is invited. Thursday evening at 7:30 at the Baptist church V. E. Squibb, Pastor.

INCREASE POSTAGE RATES TO BE ASKED.

Postmaster General Brown Sees Two And One-Half Cent Rates As Only Solution.

Convinced that an increase in postage rates is the only feasible way of lifting the world's biggest public utility "out of the red," postal officials are preparing to press their advocacy of a higher charge for carrying first class mail.

When Postmaster General Brown submits his annual report to congress in December, the enactment of legislation authorizing the increase is to be his most urgent recommendation. The postmaster believes a rate of 2½ cents an ounce on first class mail should balance the department's budget for the present.

Assistant Postmaster General Tilton, generally regarded as the financial expert of the department, said today an increase in the rate on letter mail is the only solution of the deficit problem. "We see no other way out," Tilton said. "If the public or congress see one, we shall be glad to have them point it out."

Last year's deficit amounted to \$50,000,000. Tilton estimates it will run over \$60,000,000 this year. The present loss in handling the mails is now a charge against the general funds of the treasury. Brown and Tilton are of the opinion the post office department as a public utility should be self-supporting the cost of operation to be borne by those it serves rather than the tax paying public.

NOTIONS

"Trade With Black and Save Your Jack"

Poultry oints..

Readers interested in poultry raising will find much of interest and value in the poultry material printed in these columns. It is all from authoritative sources, much of it from the United States Department of Agriculture, and can be relied upon as practical information. You can safely quote it when discussing any phase of poultry raising with your friends and neighbors.

Savages Have Eye Troubles

When savages or other illiterates are observed, it is found that they have the same eye troubles found among people who use their eyes for study and close work.

Two Great Scotsmen

When Robert Burns was born the Scottish nation was poor, remote, almost unknown beyond its own borders. Burns introduced Scotland and the Scots to the world, and he was followed by another singer and novelist, Scott, who continued the process.

Uncle Eben

"Education," said Uncle Eben, "makes life easier for dem dat knows how to use it. A trick mule don't have to do no regular work whatever."—Washington Star.

Substitute for Wool

Wood wool is the designation given to the finer grades of excelsior and is sometimes used as a substitute for absorbent lint in surgery, for filtration purposes, and for other uses where fine stock is desirable.

Scholastic Raiment

The wearing of caps and gowns in American schools was comparatively rare until the last quarter of the Nineteenth century. A movement toward a general adoption of a uniform system resulted in the calling of an intercollegiate commission, which met in 1894 at Columbia university under the chairmanship of President Low. Yale, Princeton and New York university being also represented.

"Founder's" Advice

Forget not, I pray you, the right of personal freedom. Self-government is the foundation of our political and social institutions. Seek not to enforce upon your brother by legislative enactment the virtue that he can possess only by the dictates of his own conscience and the energy of his will.—John Quincy Adams.

POULTRY

NOT NECESSARY TO VARY CHICKS' DIET

Feed Same Mash From 36-Hour Age Until Maturity.

The Cornell mash mixture for baby chicks eliminates the old practice of changing the feed every few days. The same mash is fed from the first feeding at 36 to 48 hours to maturity, and at eight weeks a grain mixture is added, says Prof. L. M. Hurd at Cornell university.

The chicks are allowed constant access to the mash, but it is best to feed so that fresh mash can be added twice a day. There should be enough hopper space so that all the chicks may eat at the same time. Fine grit may be given from the start and oyster shell when the chicks are about four months old. Charcoal is unnecessary, he says.

Cod liver oil should be fed at the rate of one-half pint to every 100 pounds of mash during the period when mash is fed, especially if the chicks are indoors most of the time. When grain and mash are fed, one pint is used with each 100 pounds of mash. If the chicks run outdoors daily, no oil is needed after eight weeks.

The Cornell mash contains 45 pounds of yellow corn meal, 10 of wheat bran, 15 of flour wheat middlings, 10 of fine ground heavy oats, 10 of 50 to 55 per cent protein meat scrap, 10 of dried skim milk or dried buttermilk, 2 of steamed bone meal, and one-half pound of salt. The grain mixture is 60 pounds of cracked yellow corn and 40 pounds of wheat.

The grain mixture should be in hoppers, always accessible to the chicks. They should not eat more grain by weight than mash until they are three months old. It is sometimes necessary to restrict the grain to get proper mash consumption, says Professor Hurd.

Two of Most Effective Destroyers of Vermin

Two of the most effective louse destroyers are blue ointment applied to the skin beneath the vent in about the amount of a bit the size of a grain of corn, and the powder sodium fluoride, applied in pinches well worked down to the skin of a half dozen parts of the hen's body.

A more recent application is to the perches instead of to the birds. This consists of the poisonous liquid Blackleaf 40, a very concentrated tobacco preparation. A ribbon of this is spread from an oil can or other convenient container along the top of each perch shortly before the fowls

go to roost. The fumes arising kill the lice, according to various authorities who have tried the method.

Open Shed Shelter Is Favored for Turkeys

A form of shelter for turkeys which has proven very satisfactory when it is necessary to construct shelter, is the open shed of the machinery shed type. One end can be closed at the front and the roosts placed in that end, so that they will always be protected from wind and storm. This type of structure affords excellent ventilation, ample room for exercise, and all the protection that is necessary. Another advantage of this type is the fact that the shed can be used for sheltering small machinery in the summer.

Rat Poison Discovered Is Harmless to Humans

Don't throw up the sponge when a rat runs off with a chicken, and beware "bad luck." Science says, "Let's get the rat," and starts out to do it. As a matter of fact, and this may be news, too, there grows off the coast of Italy, in the Mediterranean sea, a big bulb, called squill. Scientists with the United States Department of Agriculture found that the essence of that bulb would kill rats. It will not kill and is not poisonous to hen, dog or man.

Lice Deterrent

Thick cream on the head of a poult as a deterrent of head lice is better than grease for grouse will also kill. Camphorated oil applied very lightly between the quill feathers with a fine paint brush will do the work, but it must be used economically. Poult must not be confined at night in a newly painted coop, painted either with paint or lice killer.

Another essential "must not," if one would have thrifty poult— they must not run on chicken range.

Broiler Feeding Tests

Broiler raising tests were conducted with Single Comb Rhode Island Reds at the North Carolina State college. It required seven pounds of feed to raise and fatten a two-pound broiler for market. This includes both mash and grain. The feed cost amounted to 20 cents. The chick at 20 cents and other costs at 10 cents will make the two-pound broiler stand you 50 cents when ready to sell. Fall is a good time to raise a few hundred broilers.

Opera Won Its Way

Puccini's opera, "Madame Butterfly," was produced at La Scala February 17, 1904, and seemed an utter failure. Three months later it was given at Brescia, and Milan's disapproval was not upheld. It started on a career of world-wide production, and is one of the most popular operas known.

Analyzing ...YOU...

With the New Science of Syllabics

By C. J. COFFMAN

Dean of All the Enumerators

Jennie

Your name reminds me of an old song I used to hear, of the days of long ago, "Wait till the clouds roll by, Jennie, wait till the clouds roll by."

You do a lot of that, don't you? So many people like you, nearly everybody who meets you, I think. You fit in so well to all of the little schemes going on around you. You are popular.

Not many suspect you of being a matchmaker, but one of your chief delights is to draw people together. Does your heart ache just a little, Jennie, when you draw two friends together, and then discover that you wanted the man, just a little, yourself?

And yet, if you knew the result fully every time, I don't think you could resist the ability to be a matchmaker. It's just part of you.

Your sharp little nose will go pushing itself into human entanglements, as you bend over your sewing. I do hope you sew, a little anyway, as that would be so natural to this name.

If you do sew you are probably one of the best seamstresses in your town, for you do anything that comes to your hand exceptionally well.

Don't think I regard you as of small importance, Jennie, I know the possibilities pretty well. I may not be old enough to have heard the great Jenny Lind, the Swedish Nightingale, but she serves as an example to show you what Jennie can do.

You must have a lot of fun through it all. Even if you are called upon to help in the sad times in life of those around you, there is a sort of sweet joy in the service you render. And if some people think that you pry into things a little too easily, there must be others who think that you have a marvelous intuition. At least, you do seem to solve problems for people, without their having to confess all the painful details to you. (© 1930, Western Newspaper Union.)

Would Stir Things Up

If the timber supply ever gets so low that it endangers the supply of golf and baseball bats, it will then be possible to arouse interest in forestry. —Richmond Register

Introduced by Queen

The Hawaiian guitar was introduced into this country and first became popular at the time of the first visit of Queen Liliuokalani, ex-queen of Hawaii, in 1890-95.

HOW TO LIVE LONGER

By John Clarence Funk, A.M., Sc.D.

Director of Public Health Education, State of Pennsylvania

Shoo Bad Shoes

SOME months ago the statement was made that many pupils in the schools throughout the country were suffering from foot ailments. The fact was based upon an examination of thousands of children in several of the largest cities in the United States. Ill fitting shoes that cramped the toes and squeezed the feet were, in most instances, blamed for this very unfortunate situation.

The young children can scarcely be held accountable for wearing improper footwear. They do not know any better. (On the other hand, shoe merchants could undoubtedly prevent much of it, and parents could eliminate practically all of it.

To foist ill fitting shoes upon the young people is nothing short of criminal. Feet permanently injured with bunions and misshapen toes can, and do, cause a great deal of suffering in later life. This in itself is bad enough. But when backache, headache, neuritis and even that old happiness wrecker rheumatism, can often be traced to improper foot gear, the question becomes an exceedingly important one.

Fortunately, the older people in the main are sensible about this matter so far as they themselves are concerned, but many of them seem to lack interest in the juvenile shoe problem.

Present-day competition is sufficiently exhausting without placing the burden of painful feet, or pain from feet, upon the young people. Shoo bad shoes away from them and keep them "shoed" properly.

P. S. Short stockings also, continually worn, are almost as bad as short shoes. And ultra high heels are as bad as stockings.

(© 1929 Western Newspaper Union.)

Britishers Well Fed

Specifications as to supplies brought to this country for the British army in the Revolution required sound "beef, pork, bread, flour, rice, salt, pease, oatmeal." To these were added cheese, bacon, suet, fish, raisins and molasses. Don Seltz, in writing on the subject, adds: "Potatoes, parsnips, carrots, turnips and cabbages were provided when possible. Nor was there lack of liquid refreshment. Port claret and spruce beer were forwarded in quantities."

Simple Cooking Device

A "Dutch oven" is made of tin, is about two feet in length, inclosed except on one long side. Standing on strong feet, it is to be placed before an open fire, so that the heat can cook meat which is carried on a horizontal spit, which runs through the middle of the device.

Farmers Who Are Interested in Better Eggs and Who Are Interested Enough to Help Themselves as Well as Us.

It goes without saying, that we have done more for the farmers in the way of egg price than any other buyer in Indiana, and have done more hard work to try to get a "Mark" on Indiana eggs than any other firm in New York City. We are working our heads off now trying to help you get more for eggs. Now, won't you please listen and try to follow our advice. We are not hoggish and don't ask all of this simply for our own benefit, but what helps us, sure will help you.

Now please try and adhere to the following advice for one year and see the results:

Get a good strain of straight blood poultry that lays a good sized egg (either white or deep brown) there is no difference in price now, and the general average price is about the same for equal quality eggs (size and cleanliness considered.)

Pick up your eggs every morning and evening, and carry a damp cloth with you, cleaning all traces of dirt off before it hardens and sticks to the shell.

DON'T WASH THEM,

But simply wipe them with a damp cloth and don't leave them streaked with dirt but clean them. Keep them in the coolest place about the house never allowing rain nor sun to touch them.

Use all ill-shaped eggs at home because they are broken in shipping. Market your eggs at equal intervals twice each week—that is, we would like to have them each Monday and Thursday or each Tuesday and Friday, rain or shine.

Keep every egg that you are not sure of being strictly fresh at home or ship them separately, as we don't want to spoil a case of nice eggs with a few of doubtful character, and you can't afford to sell such eggs, as it hurts you as bad as it does us, for we have to buy eggs on a basis of what we get for them, and if you slip in a few bad eggs on us, it only hurts our sales, and causes us to have to lower our price, so you see the fresher we get the eggs the more we get, and the more we can pay you. Never keep roosters with your hens after June 1.

Watch the size of your eggs and when they begin to run small, then feed them some good laying mash with a little Cod-liver oil in it or some soaked oats with a little Cod-liver oil in it or anything to keep the egg size up to not less than 23 ounces per dozen or over.

Now please try and follow this advice and let's work together and put our eggs in a class with California, Washington and Utah. The Pacific coast states ship eggs to New York City, and get from 3 to 10 cents more than your eggs bring, and it is because they ship fresh, clean, good-sized eggs graded up to a standard, which you can do if you will work as they work. Now if you will work as hard as we are, trying to put good eggs on the map, then we will show the market that Indiana has just as good eggs as any state in the union. We will do our best and now it's up to you who sell us eggs, to work as hard as we do.

Yours for Better Eggs.

Quality Butter & Egg Company

POULTRY

FEED LESS GRAIN DURING SUMMER

Keep Fowls Confined and Increase Their Mash.

Summer feeding schedule for laying hens calls for reduction in the amount of grain and increase in the amount of mash, poultry specialists at the Ohio State university have notified Ohio poultrymen who are keeping records in co-operation with the county and state extension service.

"Gradually reduce the amount of grain feed and increase the mash consumption in order to maintain summer production," says one of the specialists, P. B. Zumbro. "It is wise to feed all the grain in the evening in order to make the birds hungrier for mash during the day."

"Another good plan is to keep the birds confined to the house until afternoon, if the house can be properly ventilated. This will stimulate mash consumption and at the same time allow ample opportunity for green feed."

"Another way is to put mash hoppers where you find the birds during the day—under a tree, in a shed, or wherever they congregate. Mix enough milk with the ordinary mash to make it crumbly wet, and feed such quantities as the hens will consume in a half-hour."

Avian Tuberculosis Is Widespread in the West

Avian or bird tuberculosis is widespread. The first case was discovered in a prairie chicken by Dr. L. Van Es when he was pathologist for the North Dakota agricultural college. The latest surveys of the United States bureau of animal industry indicate that 6 per cent of the flocks on physical examination in 28 states showed tuberculosis. The disease affects a greater percentage of the flocks in some of the middlewestern states.

Avian tuberculosis must be eradicated before tuberculosis is entirely eliminated from hogs. Campaigns are under way in the middlewestern states, where avian tuberculosis is the greatest, to stamp out the disease.

Clean Feed Essential to Complete Success

Clean feed is essential to the complete success of a sanitation program. It is not sufficient to mix or buy clean feed. The entire ration must be kept clean until the chickens have an opportunity to eat it. No feed of any kind should be scattered in the litter or on the floor for the growing chicks. Nor should it be scattered on the ground unless care is taken to throw

it in a fresh place each day in order, as some one has said, to give the chickens a clean tablecloth. Grain, as well as mash, can be hopper fed with very good results, especially after the chickens are partly grown.

After the chickens are ranging out-of-doors move the feed hoppers to a new location once a week. If possible, they should be in the shade at least a part of the day in order to encourage the chickens to eat freely. The water fountains should be so arranged that there will be no permanent puddles of water or mud as these make the finest kind of place in which worm eggs can rest while waiting for some chicken to pick them up.

Poultry Facts

Goose eggs require 30 to 35 days in which to hatch.

Eggs are rich in valuable minerals and are a great source of vitamins.

Grit in some form is essential to ducks, and should be kept before them at all times.

Now that practically all chicks are hatched the male birds should be sold or used on the home table. Practically no male birds on the average farm should be kept more than one year.

It is important that the hens be provided with some source of green feed constantly.

A good way to feed hay to poultry is to cut it into inch lengths and then put it into a wire netting basket feeder and keep it before the hens at all times.

Turkey hens like to find their own nests. Some time in advance of the laying season, make nests where it is convenient for them to lay, in a secluded place.

The size of eggs is almost, if not quite, as important as their number. Set eggs from hens which lay standard-sized eggs.

Early chicks are the only type of chicks that will mature soon enough so that they will be matured and start laying at the best season of the year.

Dust wallows are a source of much pleasure to the hens during the summer months. Spade up the fresh, moist earth in the shade, and the hens will do the rest.

Gave Name to Glass

Henry William Stiegel was born in Germany in 1729, and emigrated to the New world in 1750. At his glass factory at Mannheim, Lancaster county, Pa., it is said that the most beautiful glass ever blown in America was produced. The name Stiegel as applied to American glass has become almost generic. Quantities of glass, old and new, native and foreign, good and bad, are thoughtlessly so called.

KONJOLA ENDS RHEUMATISM AND OTHER AILMENTS

Muncie Lady And Daughters
Have Wonderful Experience
With New Medicine—
Eager To Tell
Others

MRS. LAURA SUNDQUIST

"I suffered terribly in my legs and arms with rheumatism," said Mrs. Laura Sundquist, 327 East Jackson street, Muncie. "The pains kept me awake at night. I tried liniments, massages and many other medicines and treatments but nothing did me any good. I had come to the point where I did not think there was any relief for me. After much persuasion by a friend, I decided to try Konjola."

"After two weeks I knew that Konjola was different for it went right to the source of my ailments. After taking three bottles the pains of rheumatism left me entirely. Stomach trouble caused me to suffer from souring of my food, gas and headaches. I was badly constipated and forced to take laxatives. These ailments, along with nervousness and inability to sleep, have all been corrected by Konjola. I have induced my two daughters to take Konjola and they are obtaining the same excellent results."

And so it goes—the same glad story whenever this great medicine is given an opportunity to make good. From five to eight bottles is recommended as the treatment in stubborn cases.

Konjola is sold in Mentone, Ind. at Shafer & Goodwin drug store, and by all the best druggists in all towns throughout this entire section.

NOW WILL THEY MAKE REPAIRS?

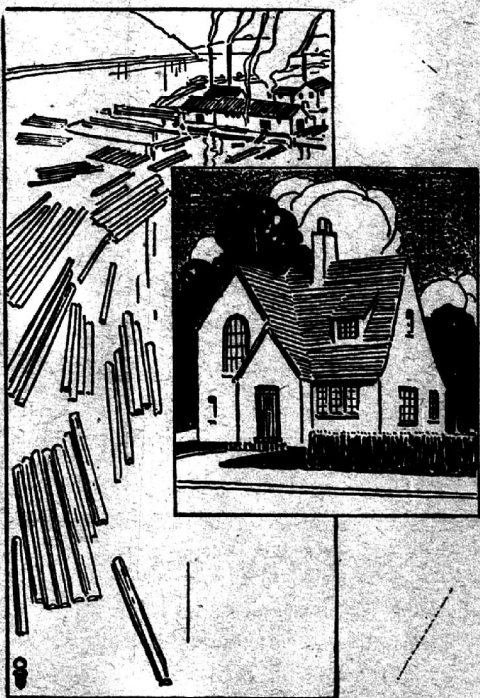

A few weeks ago the Farm News called attention to the fact that our \$14,000.00 telephone building was in a dangerous condition and about ready to collapse. After a scientific inspection by one of the heads of the company he declared that the editor was only spoofing and that the building was all right. It now happens that the actual tumbling down of the structure has begun—and as in all other matters in relation to this company and its affairs the Farm News is proven to be in the right. More particulars inside.

JUST THINKIN'

by Charles S. Kinnison

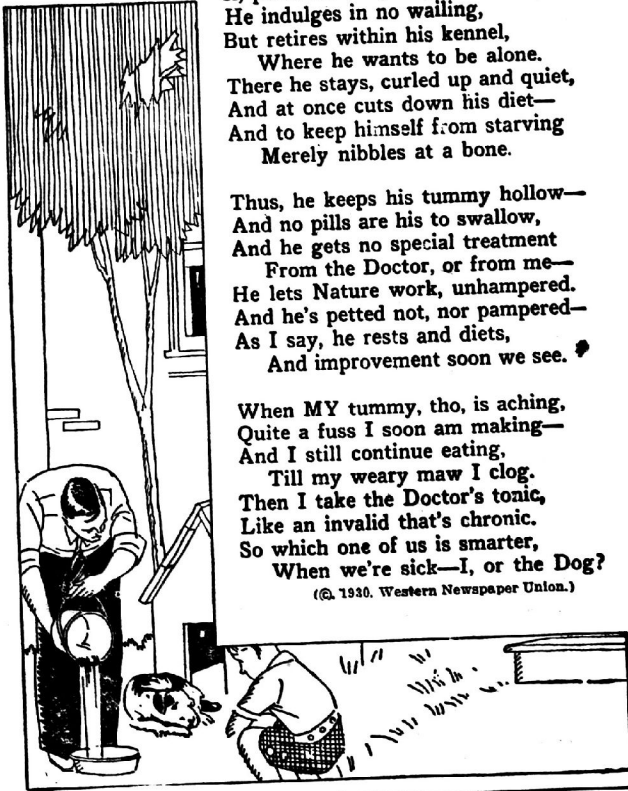

Dog Sense

If, perchance, my dog is ailing,
He indulges in no wailing,
But retires within his kennel,
Where he wants to be alone.
There he stays, curled up and quiet,
And at once cuts down his diet—
And to keep himself from starving
Merely nibbles at a bone.

Thus, he keeps his tummy hollow—
And no pills are his to swallow,
And he gets no special treatment
From the Doctor, or from me—
He lets Nature work, unhampered.
And he's petted not, nor pampered—
As I say, he rests and diets,
And improvement soon we see.

When MY tummy, tho, is aching,
Quite a fuss I soon am making—
And I still continue eating,
Till my weary maw I clog.
Then I take the Doctor's tonic,
Like an invalid that's chronic.
So which one of us is smarter,
When we're sick—I, or the Dog?

(© 1930, Western Newspaper Union.)

A SENSIBLE SOLUTION TO THE LOW PRICE OF WHEAT.

With the Federal Farm Board attempting to bolster up the price of wheat and spending millions of dollars in their attempt to change the laws of supply and demand it sure is a relief to pick up a paper and note a suggestion for the solution of this question that offers a reasonable chance for reducing the surplus wheat supply by using it in other channels that will show a profit to the producer. We take the following from the Nawaygo (Mich.) Republican, and give it to our readers for their consideration.

One way of obtaining a profit from this year's crop of

15,000,000 bushels of wheat in Michigan is to use it as a feed for livestock in place of corn and other relatively high priced feed stuffs, according to the heads of the crops and livestock department of Michigan State College.

Dairy cattle, hogs, and poultry furnish a paying market for wheat as long as the present market conditions exist. As a feed for cows, wheat can be used as 25 per cent of the concentrate ration. It can be used as the sole feed for hogs weighing 75 pounds or over, and it may be used for from 65 to 70 per cent of the laying mash.

Farmers can save 27 cents a hundredweight in producing milk or 7 cents a pound on butterfat by substituting wheat for an equal amount of corn in the dairy cow's ration, is the opinion of the professor of dairy husbandry at Michigan State College. He suggests a ration made up of three parts wheat, two parts corn, three parts oats, and one-half part of cottonseed meal.

Hogs which sell for \$8.50 a hundredweight will pay \$1.05 a bushel for the wheat fed to them. This estimate was made by the head of the animal husbandry division who advises the feeding of wheat as long as its present low price persists.

Michigan farmers each year purchase 5,000 cars of corn, 1,000 cars of barley, 1,000 cars of oats, and as many or more cars of mixed feeds. Much of this feed bill can be avoided if wheat is substituted in the ways recommended.

MODERN PARENT TOO MECHANICAL

By MRS. HUGH BRADFORD, President Parent-Teacher Congress.

Education begins in the home and the training most important to a nation or civilization depends upon the proper technique of parenthood.

Parenthood brings with it much responsibility and as much importance as business. The father must realize this and lend his co-operation to the spirit of home and life.

The whole family, in my opinion, should plan together, play together and progress together. The result would be much less crime and unhappiness.

We find ourselves forgetful of the finer human touches, human sympathies and human interests, while the objective world of action and achievement lures us on.

Really, the telegram and mail can wait until our children have received and welcomed us. They are material things which will not change after a little time.

But these children, these human personalities, have interests and feelings which normally are at their height when we come home.

Coldly met, these urges and emotions wane, and, as they weaken, they are not so likely to return so vigorously. The child enthusiasm cannot grow nor can it even live without some human warmth from us to keep it aglow.

It goes without saying, that we have done more for the farmers in the way of egg price than any other buyer in Indiana, and have done more hard work to try to get a "Mark" on Indiana eggs than any other firm in New York City. We are working our heads off now trying to help you get more for eggs. Now, won't you please listen and try to follow our advice. We are not hoggish and don't ask all of this simply for our own benefit, but what helps us, sure will help you.

Now please try and adhere to the following advice for one year and see the results:

Get a good strain of straight blood poultry that lays a good sized egg (either white or deep brown) there is no difference in price now, and the general average price is about the same for equal quality eggs (size and cleanliness considered.)

Pick up your eggs every morning and evening, and carry a damp cloth with you, cleaning all traces of dirt off before it hardens and sticks to the shell.

DON'T WASH THEM,

But simply wipe them with a damp cloth and don't leave them streaked with dirt but clean them. Keep them in the coolest place about the house never allowing rain nor sun to touch them.

Use all ill-shaped eggs at home because they are broken in shipping. Market your eggs at equal intervals twice each week—that is, we would like to have them each Monday and Thursday or each Tuesday and Friday, rain or shine.

Keep every egg that you are not sure of being strictly fresh at home or ship them separately, as we don't want to spoil a case of nice eggs with a few of doubtful character, and you can't afford to sell such eggs, as it hurts you as bad as it does us, for we have to buy eggs on a basis of what we get for them, and if you slip in a few bad eggs on us, it only hurts our sales, and causes us to have to lower our price, so you see the fresher we get the eggs the more we get, and the more we can pay you. Never keep roosters with your hens after June 1.

Watch the size of your eggs and when they begin to run small, then feed them some good laying mash with a little Cod-liver oil in it or some soaked oats with a little Cod-liver oil in it or anything to keep the egg size up to not less than 23 ounces per dozen or over.

Now please try and follow this advice and let's work together and put our eggs in a class with California, Washington and Utah. The Pacific coast states ship eggs to New York City, and get from 3 to 10 cents more than your eggs bring, and it is because they ship fresh, clean, good-sized eggs graded up to a standard, which you can do if you will work as they work. Now if you will work as hard as we are, trying to put good eggs on the map, then we will show the market that Indiana has just as good eggs as any state in the union. We will do our best and now it's up to you who sell us eggs, to work as hard as we do.

Yours for Better Eggs.

Quality Butter & Egg Company

DORAN STATION ITEMS

(Leave Items at Black's Store)

Mr. O. A. Heighway has been on the sick list this week.

Miss Lois Blue of Rockford, Ill., spent a few days with Miss Geraldine Tucker.

Miss Ethyl Borton of Ligioner is spending the week with Miss Francis Tucker.

Mr. and Mrs. Chas. Black spent Tuesday evening with Mr. and Mrs. Lindus Latimer

Mr. and Mrs. Floyd Tucker and daughter spent the week end with and Mrs. O. N. Igo.

Mrs. Elmer Huffman and Mrs. Marion Taylor made a business trip to Elkhart Thursday.

Mrs. John Srivier is spending the week in South Bend the guest of Mr. and Mrs. Cloyde Srivier.

Miss Lillian Igo and Edna Pitman spent last week in Bourbon the guests of relatives and friends.

Mr. and Mrs. Frank McGee of Warsaw were callers at the home of Mars Tucker Tuesday afternoon.

Mr. and Mrs. John Parker of near Silver Lake were guests of Mr. and Mrs. John Creakbaum Wednesday.

Mr. and Mrs. Ivan Miller and sons attended the reunion Sunday held at the home of Adam Tully near Sidney

Mr. and Mrs. Carl Rickel and daughter of South Bend spent the week end with his parents, Mr. and Mrs. Horace Rickel.

Mr. and Mrs. H. V. Nellans enjoyed a three day Poultry tour through Central Indiana last Tuesday, Wednesday and Thursday.

Mr. and Mrs. Bernard Black Mr. and Mrs. Gerald Ballenger and Mr. and Mrs. George Black enjoyed a picnic at the river Sunday.

Mr. and Mrs. Wm Arter and Mr. and Mrs. Dewey Merley and children of Akron spent Thursday evening with Mr. and Mrs. George Black.

Mr. and Mrs. Ralph Tucker of Akron and Mrs. Max Smith and son of Mentone spent Thursday at the home of Mr. and Mrs. Ora Tucker.

Mr. and Mrs. Gene Newall and son of Gary spent the week end with Mrs. Harry Meredith. Mr. and Mrs. Mose Newall who has been spending a few days here returned home with them.

Mr. and Mrs. Devon Eaton entertained at a Chop Suey dinner Tuesday evening. Mr. and Mrs. Curtis Riner, Mr. and Mrs. Ernest Igo and sons and Mr. and Mrs. Dean Nellans and children.

Mr. and Mrs. Gus Mollenhour and daughter were Sunday evening guests of Mr. and Mrs. George Black

Mr. and Mrs. O. F. Miller entertained at Sunday dinner Mr. and Mrs. John Miller of Bourbon, Mr. and Mrs. Ed Miller near Rochester, Mr. and Mrs. Walter Overhaltz, Mr. Lloyd Creakbaum and son Paul and Mr. Don Sanders of Chicago.

ALL WORK GUARANTEED

I do all kinds of well drilling and repairing and guarantee that you will be pleased with my service. Homer Saner, Phone 8 on 198, Akron. Sep. 10.

UNDERGOES OPERATION

Betty Ann, little daughter of Postmaster and Mrs. Shinn, submitted to an operation at the McDonald hospital Thursday morning for the removal of tonsils and adenoids.

W. F. M. S. PARTY.

The W. F. M. S. of the M. E. Church, will entertain the Little Light Bearers, the King's Heralds, and the Standard Bearers at the church Friday afternoon, August 1. A nice program is being prepared, refreshments will be served, and all friends are invited.

INDIANA TAKES HONORS

IN JERSEY CALF WORK.

Purdue News Service

Indiana led all other states in the amount of money awarded to Jersey Calf Club members by the American Jersey Cattle Club in 1929, according to information received today by Harry F. Ainsworth, assistant state club leader. A total of \$1,060 was received by boys and girls over the state who were members of Jersey Calf clubs. A total of 410 members qualified for the awards in Indiana.

The American Jersey Cattle Club gives a sum equal to \$3 per member for competition at county fairs or similar shows. No award is made where there are less than five Jersey members, and not more than \$50 is awarded in one county.

Indiana was closely pressed for first honors by Kentucky club members, who received \$1,025; Ohio club members received only half this amount for third place, and Alabama and Michigan were next in order.

Restoring the Old

Some people never exhibit any ingenuity when they try to make over old clothes, but give them an old rocking chair, a few tools and a pot of paint and they can fashion a garden chair that would grace the White House. Country Home.

Analyzing

...YOU...

With the New Science of Syllabics

By C. J. COFFMAN

Dean of All the Enumerators

Jane

"Although her people named her Jane Which some say stands for mourning She lives beyond this earthly plane A higher realm adorning."

The key-word of your name is indicated by its first letter, J. That word is Justice. People soon learn to know the frank outspokenness of you and thereby learn to trust you.

Some day you will find, when you have searched the greater part of life, that most unhappiness of mind is caused by greed and strife.

No doubt rhymsters in your childhood days tensed you by rhyming Jane with "plain." But you may take it now as an asset that you are plain and simple, direct and honest in your attitude toward life.

It is going to attract to you things that you will always be glad of. It may even attract the great around you.

Whoever is attracted to you will be so through the plain honesty that shows out of you.

But with all this you are not too solemn. For one thing you are a very acceptable dancer. You are fond of music, though I do not think you would become an artist in music. At least it is not likely.

A few of the Janes who have done big things are Jane Addams and Jane Austin, a novelist of former days.

Your library can furnish you a very inspiring history of Jane Addams and her work, and I am sure that you can readily believe, "what Jane has done, Jane can do."

Perhaps, though, if John shall seek his Jane, and the path of life shall change a bit, it will not be a less happy one.

(©, 1930, Western Newspaper Union.)

Have Had Many Owners

The bronze horses surmounting San Marco cathedral in Venice were made in Corinth nearly 20 centuries ago. They were taken from Corinth to Rome by Nero, to Constantinople by Constantine, thence to Venice, and then to Paris by Napoleon, being restored to Venice after his fall.

Anglo-Saxon Place Names

The Anglo-Saxons gave names to many localities from their supposed resemblance to parts of the human body, as headland, a neck of land, the mouth of a river, the brow of a hill, the foot of a hill, an arm of the sea, and so on.

Apple Scab Is Serious on Certain Varieties

Like all fungous diseases, apple scab is more serious on some varieties than upon others. All varieties of apples, however, are subject to the disease and may be damaged materially. Certain varieties, however, are notorious for their susceptibility and these should be grown by the growers, as it is necessary to give such sorts more particular attention as regards to spraying than the more or less resistant varieties. Moreover, there are unaccountable variations or differences in the susceptibility of different varieties of apples in different parts of the country.

Horticultural Hints

The ground for berry bushes should be well fertilized with manure, to be plowed or spaded under before the plants are set.

No fruit is more generally liked than the strawberry. Yet how few really grow nearly enough of this luscious fruit even for the home table.

Fall planting is often successful with some fruits but it is more risky than spring planting. Plant early in the spring is especially important with cherry trees.

Gooseberries generally are stripped from the bush, leaves and all, the pickers wearing leather gloves to protect their hands. The leaves may be removed by running the fruit through a small fanning mill.

In pruning currant bushes, cut out oldest wood and thin out the weak, young canes. Leave a few strong, one-year-old shoots every year and try and cut out all of the wood which is more than four years old.

One of the most important essentials in spraying is thoroughness of application.

A spray application of lime sulphur and lead arsenate should be applied to cherry trees when the blossoms shatter or as soon thereafter as the weather permits.

Storage scald on apples can be practically eliminated by using one and a half pounds of shredded oil paper, containing 18 per cent by weight of mineral oil, for each barrel.

Girls Hardier Than Boys

That "boys are harder to rear than girls" was recently given support by statistics issued from the children's bureau of the Department of Labor. These data reveal that, although more boys are born in the United States than girls, the latter have 30 per cent more chance of living. During the first year, 130 boy babies died for every 100 girls who fail to survive.

"So,"

said MRS. MOLLA PROPP,

"we put oil in the clutch to make it slip better."

IT WAS almost forty miles to the place where we were to take dinner, my dear, and we only had an hour to make the trip in, so, when we got out into the open country, Henry made the car just whizz.

The motometer was showing forty-five when, all of a sudden Henry looked into the rear-view mirror. "Hek," he said, "There's a policeman chasing us on his motorcycle!"

"Dear me, hadn't you better slow down?" I asked. But Henry said no because the county line was only two miles further on and he didn't want to be late for the dinner and the idea of getting a ticket bored him, he said.

So he stepped on the agitator and the micro-meter went up to sixty. Still the motorcycle person was behind us and gaining, too. Henry gritted his teeth.

Copyright, 1930—John Jensen.

"Might as well be fined for running seventy as sixty," and, sure enough, the clock thing showed seventy.

But it didn't help, for only two blocks behind us we could see the motorcycle coming. "Well, we're in for it," said Henry. Tough luck, too. Then he slowed up and—do you know, my dear—that was no motorcycle policeman at all, but just some delivery person and he went by us like a streak.

Henry looked at me and I looked at him. Then we turned into the street where the Freds live, and who should step out but a policeman who made us pull to the curb and asked Henry his name and everything. "What's the trouble now?" Henry asked. "I'm arresting you," said the officer, "for making a left-hand turn on a no-turn street." I thought I'D DIE.

Standard Time Varies

Sixty-three kinds of standard time are being used in the world. The majority of the world's population uses one of the 24 scientific systems. India, New Zealand and several South American countries use a half-hour separation, while some small countries use strictly local time.

Opportunity for "Seers"

If a man had the art of the second sight for seeing lies, as they have in Scotland for seeing spirits, how admirably he might entertain himself in this town by observing the different shapes, sizes and colors of those swarms of lies which buzz about the heads of some people.—Dean Swift (1607-1745). "The Examiner."

Calamity

If tomorrow I should be informed of the bankruptcy of my principal debtors, the loss of my property would be a great inconvenience to me, perhaps for many years; but it would leave me as it found me—neither better nor worse. So it is with calamity; it does not touch me.—Ralph Waldo Emerson.

Power of Ridicule

Ridicule has ever been the most powerful enemy of enthusiasm, and, properly, the only antagonist that can be opposed to it with success.—Oliver Goldsmith.

Mexican Sentimental Song

The song known as the "Home, Sweet Home" of Mexico is "La Golondrina," by Sarradell. The translation of this is "The Swallow." It has been sung for many years, and it is referred to as the "Home, Sweet Home" of Mexico, as it is generally played as the concluding number of a dance or other festivity.

Great Violin Maker

Vincenzo Trusiano Panormo of Paris and London was born in Monreale del Palermo, 1734, and died in London, 1813. Like Lupot and Aldric, Panormo was one of the cleverest imitators of Stradivarius violins. Of a wandering disposition, he often changed his residence and worked in London, Paris, and also in Ireland. Some of his instruments have a marvelous finish and his red varnish is of exceptional quality. His instruments are scarce and sometimes branded.

TELEPHONE BUILDING IN DANGEROUS CONDITION

Their Overhead Wires—Continuously Breaking Bring Another Hazard That Is a Menace to Life—and Need Attention.

The collapse of one of the brick pillars in the front of the telephone building on last Saturday afternoon came very near putting Mr. Burros in the hospital as the falling column of brick and mortar missed him by less than a foot.

The falling out of this pillar, which with four others of like construction, supporting the entire forty foot front of the second story wall discloses just what a dangerous affair this building is to life. The balance of the brick work exposed in the column that buckled shows that aside from the outside facing these pillars are made up of soft brick batts with no steel or iron column to help stiffen or assist in supporting the huge load that rests upon it, and it is a wonder that these supports have withstood the load as long as they have.

The excessive strain upon the east wall has caused the brick in that part of the structure to crumble and crack, and as there are no tie rods in the building there is nothing to prevent it from spreading, and should this happen there would be great damage done to the building in which the Farm News is located, aside from endangering the lives of many people. In view of the above we consider that this building in its present state is a real menace, and needs the attention of the proper authorities immediately.

The condition of the building has been called to the attention of the Fire Chief Greulich, who stated that he would immediately take the matter up with the proper authorities with the view of having the structure put in a safe condition and we are in hopes of getting some action from that source.

Wires Need Replacing.

A citizen has also called our attention to the fact that the overhead wires of the phone company are in a very bad condition and are in need of immediate attention.

We find that many of these wires have been exposed to the elements so long that they are rusted to such an extent they will no longer withstand their own weight, and as a result the breaking and falling of wires over the village is a common affair. These wires as a rule fall in alleys and public driveways and create a new danger should they rest at any point up-

on a high voltage electric wire—people being electrocuted in this manner being quite common.

It is the usual practice where telegraph or telephone wires cross over or under high voltage electric wires to place guard wires at all such points so that these wires cannot come in contact with each other, and many states have laws compelling this to be done.

We have looked over considerable of the wiring in this village and as far as we can determine there is not a single point where wires have been guarded where they cross each other.

Just a short time ago one of our citizens had his car stalled in an alley one evening and when he investigated the cause found that one of the rear wheels of his car had become entangled in a fallen telephone wire which had wound around the wheel to such an extent that he had quite a time extricating the machine—suppose that this wire had been in contact at some point with a high voltage wire what would have been the result?

It seems to us that this would be a matter for our town board to investigate and compel the phone company to either put their lines in a safe condition, guarding them so that they cannot come in contact with high voltage wires, or put them under ground where they really belong.

The DAIRY

FEEDING AND CARE OF DAIRY CATTLE

Pays to Feed Good Cow Liberally and Individually.

"Feeding and Care of Dairy Cattle" is the subject of a new bulletin just published for distribution to interested dairymen and farmers by the Colorado Agricultural College Extension service.

The bulletin was written by B. W. Fairbanks, associate professor of animal husbandry, and C. A. Smith, extension dairyman at the college.

Under the heading, "Feeding for Milk Production," it is emphasized in the pamphlet that it pays to feed a good dairy cow liberally, to feed cows individually, to make good use of roughages, to feed succulent feeds, to feed feeds that are palatable, to feed a variety of feeds and supply plenty of fresh, pure water.

Other main divisions of the bulletin include such phases of feeding and care of dairy cattle as principles of dairy-cow nutrition, feeds for dairy cows, nitrogenous concentrates, nitrogenous roughages, carbonaceous roughages, succulent feeds, pastures, ready-mixed commercial feeds, summer feeding of dairy cows, feeding and management of cows on official test, raising the dairy calf on skim milk and on skim milk substitutes, growing out the dairy heifer, care and management of the dairy bull and selecting the grain ration for the dairy cow.

Several different grain rations are outlined. Vitamine content of various feeds is shown, together with a table showing the cost of 100 pounds of digestible protein. Anyone desiring a free copy of this bulletin may obtain it by writing to the extension service of the college.

Contamination of Milk Quite Easy to Prevent

From the act of milking, as well as from any subsequent handling, milk may become contaminated. If the udder and flanks of the cow are covered with dirt from yard or stable, the process of milking will dislodge a greater or less amount of this filth, causing it to fall into the milk pail. Everything that comes into contact with the milk, such as pails, strainers, cans, etc., may be a source of trouble if not kept clean and dry. Milking with wet hands always results in contamination of the milk and should not be practiced. The flanks and udders of the cows should be carefully wiped with a damp cloth before milking in order to remove dust and dirt which would otherwise fall into the milk. The cows should not be groomed, bedded or fed just prior to milking,

because by so doing the air becomes laden with dust, which gets into the milk.

Shade Is Important for Dairy Cows on Hot Days

Dairy cows may suffer during the hot summer days if no shade is provided.

When pasture is abundant, it is the nature of cattle to feed during the cool part of the day or at night and to lie in the shade during the hot part of the day, therefore every permanent pasture should have enough shade to accommodate its cattle.

Various trees may be planted for this purpose. They must be protected at all times so that live stock cannot tramp closer than five to six feet from the trees or they may be killed. Four posts should be set and a fence built about each tree. They should be planted on land which has good surface drainage so that mudholes will not be found during rainy weather. Cows should not be salted under such trees.

Shade trees on too high land or close to a wire fence may invite loss from lightning.

Producing Cow in Need of a Grain Supplement

Should grain be fed to dairy cows on pasture? Since spring and summer grass is relatively low in nutrients, a cow producing 25 to 30 pounds of milk per day must eat about 150 to 300 pounds of grass to get enough feed for her daily requirements. Since this is practically impossible, a grain supplement must be given. For cows producing 30 to 35 pounds of milk per day, a mixture of the ordinary farm grains, such as oats, corn, wheat bran, and barley fed at the rate of 1 pound of grain to 4 to 6 pounds of milk produced per day will be sufficient. For cows producing more than 35 pounds of milk per day, the ration should contain one high protein concentrate.

Digestibility of Food

Experiments with dairy cows which have been conducted by the Ohio experiment station indicates that most of the dairy rations are not as digestible as generally considered. Rations which were low in protein seemed to depress the digestibility more than rations which had a higher protein content. However, there was considerable variation in rations that had similar amounts of protein. Low digestibility did not always indicate reduced efficiency in the ration.

Prison Changed Name

Sing Sing prison, when first built, in 1825, was known as Mount Pleasant prison at Sing Sing. Later it took the name of the town. Then the town changed its name. Now it is Sing Sing prison at Ossining.

But He May Guess Wrong

When the doctor gets sick, the people think it won't amount to much, for he will know exactly what to do.—Terre Haute Tribune.

DEATH OF MRS.

JACOB GREULACH.

Mr. and Mrs. Richard Greulach were called to Convoy, Ohio, Saturday by the death of Mr. Greulach's mother who died at that place Thursday. Funeral was held Sunday, with burial at VanWert Ohio.

WEDDING ANNIVERSARY

Friday evening the 25th, 125 relatives and friends of John B. Underhill and wife, staged at their home an old time chivoree and belling, as the fiftieth anniversary of their marriage. After the guests had extended their congratulations and good wishes, they had a new wedding ceremony with wedding march brides maids. The marriage was for another fifty years.

The preacher who performed the ceremony not being properly compensated we withhold his name. After a treat of amber fluid and cakes and having had a good time the party dispersed at 11 p. m.

The only cloud was the presence of four local undertakers, who not finding any business in their line, joined in the festivities and had a good time too.—One Who Was There.

PLANS ANNOUNCED FOR 4H BOYS' CLUB STATE FAIR CAMP.

Purdue News Service

Plans are already well underway for the annual Boys' Club camp which will be held in connection with the 1930 Indiana State Fair, August 30 to September 5, it was announced today by W. Robert Amick, assistant state club leader of Purdue University, who will again serve as camp director. Added equipment will add to the comfort of the enjoyable camp, and several changes in the program are in view. Roscoe Fraser former county agent of White county, will assist in the direction of the camp and Miss Ruby Clark, assistant in the home economics department of Purdue, will have charge of the meals.

The camp will officially open on Friday evening, August 20, before the fair starts Saturday, and the first meal will be served at that time. Boys between the ages of 14 and 20 who are exhibitors at the fair or members of judging teams will be accommodated at the camp.

The program includes many interesting trips to points of interest in Indianapolis and vicinity, as well as an opportunity to see all of the fair itself. Plans are also underway for a joint picnic supper with the girls who will be attending the State Fair

Girls' School.

The cost of the camp for the entire period is \$10.00 and enrollment must be sent to the Secretary of the State Fair by August 13. Enrollment may be made through any county agent. The boys will be required to bring only their own bed clothes, as beds and straw ticks will be furnished.

Two scholarships to Purdue University, one with an approximate value of \$250.00 and the other of \$50.00, as well as two \$30.00 trips to the Boys' and Girls' Club Congress in Chicago in November will be awarded to outstanding boys attending the camp.

COTTON AGAIN IN FAVOR WITH FEMININE BUYERS.

"When a woman has purchased or selected the spring wardrobes for the members of her family her thoughts turn to the in-between dresses. She now plans the garments for the hot summer days. This year has seen distinctly a revival of cottons," said Miss Freida Stoll, clothing specialist of the home economics extension staff, Purdue University.

"Cottons are being used for every occasion and are appearing in the world of fashion with a new air of smartness. It is a distinctly new trend to find cottons being used for the tailored and street type of garments for summer wear," said Miss Stoll. "Cotton tweeds and cotton shantungs are being tailored the same as the woolens. They have the smartness of the woolen suit, yet the comfort and crispness of the cottons. Tailored frocks of pique, waffle pique broad cloth, linen, cotton mesh, Indian head, and gabardine are favorites this year. Pique and waffle pique bring back memories of heavy materials—hot and heavy for summer wear and difficult to launder. However, this year the pique seems only distantly related to the older pique family. The new fabrics are light in weight, crisp, cool easy to tailor and easy to launder. A variety may be found in wide and narrow wales of the pique which permits an adaptation to many types of garments and individuals."

The new cotton materials present an endless variety of plain and figured materials from which to choose in interesting street dresses and ensembles of long or short jacket and dress. Plain or figured materials may be used for the jacket with the dress of either the plain or the figured to contrast or harmonize with the coat. The consumer welcomes the new cottons because they have the points essential to an adequate wardrobe. The new cottons are smart, practical and economical.

Mr. and Mrs. John Sutton of Warsaw, Mr. and Mrs. Emmett Carter and Mr. and Mrs. Don Ernsberger spent Friday in Elkhart with Mr. and Mrs. F. C. Wiltrout.

Mr. and Mrs. Robert E. Snyder after spending the past week with Mr. and Mrs. I. F. Snyder and Mr. L. P. Jefferies left Sunday afternoon for their home in Evansville Indiana.

Mr. and Mrs. Quincy Homberg of Logansport visited at the L. M. Fife home Sunday evening. They reported a lot of damage done by wind and lightning in the vicinity of Logansport Saturday forenoon.

Mrs. Cynthia Meredith is reported on the sick list this week.

Mr. and Mrs. Isaac Jefferies and son Deveral Mr. and Mrs. Floyd Halterman and daughter Betty Lue, and Bert Neuell spent Sunday evening with Mr. and Mrs. Gerald Ballenger at Rochester.

Mrs. Cornelia Melton and niece, Miss Alice Fowler of Guide Rock, Nebraska have been spending the past several weeks in Mentone visiting old friends. Mrs. Melton was formerly of Mentone.

BEAVER DAM ITEMS.

Simon Crawl and family attended services at Akron Sunday evening.

Alph Study of Silver Lake visited with old neighbors and friends in this vicinity last week.

Floyd Study and family entertained the former's parents of Fort Wayne over the week end.

Vera Warren and friend of Huntington spent Sunday with her parents Mr. and Mrs. Ivan Warren.

The farmers of this community are all wearing a smile since the long drought was broken. The condition of the crops is much improved.

Peter Kesler and wife, Floyd Study and family, Homer Clark and family and Mrs. L. M. Fife and daughter of Mentone called at the Chas. Cinninger home Sunday evening.

Mr. and Mrs. Howard Conley, Mr. and Mrs. Byford Smith and son, Mrs. Diana Shuemaker, Lois Fife and Jeanette Cinninger, were visitors at the Homer Clark home Sunday afternoon.

HOME ECONOMICS CLUB.

The Home Economics Club, which is temporarily the "Yard and Garden Club," will hold its August meeting at the home of Mrs. Kenneth Riner on Tues., p. m. August 5th.

The program will consist of response to roll call with "Dog-Days Belief" and "Garden Hints; the truth about an old superstition" by Mrs. Lash; and the business session.

After the program members will make a tour of the yards and gardens entered in the Better Yards and Garden contest.

Members who can conveniently bring and use their cars for the trip are asked to do so.

Once Great Metropolis

"The Glorious City," as Bagdad was called, had a population of 2,000,000 during the height of its prosperity in the Eighth century.

H. V. JOHNS,

FUNERAL DIRECTOR

Lady Attendant.

Calls answered Day or Night

PHONE 103, MENTONE.

DO NOT TAKE ANY CHANCES

Cleaning clothing with naphtha, gasoline etc., is very dangerous, regardless of the fact of whether you may have any fire around or not. The rubbing of the cloth can ignite the fluid, and the result is a bad burn or possibly death. Play safe use "Spot Fyter" which is non-explosive. It will clean most anything in a jiffy. Costs only 50c per bottle at Clark's Store.

Frenchman First Aeronaut

The world's first aeronaut was a Frenchman, Francois Pilatre de Rozier, who ascended 84 feet in a balloon on October 15, 1783.

Hindu Spring Festival

Sarojini Naidu, in a footnote in her volume of poetry, "The Sceptred Flute," says that the Vasant Panchami is the spring festival when Hindu girls and married women carry gifts of lighted lamps and new-grown corn as offerings to the goddess of the spring and set them afloat on the face of the waters.

Rattlesnake's Rings

The biological survey says that a rattlesnake adds from two to four rings a year, usually one each time the skin is shed. The snake seldom has more than 10 rings, because the terminal rings are worn down or broken off.

Around Orchard

BEES MAKE MONEY FOR ORCHARDIST

In Gathering Honey They Increase Fruit Yield.

Without making a nickel's worth of honey, bees can earn astonishingly large profits for their owner, if the owner is also an orchardist. This was demonstrated during the past year by two demonstrations in orchard pollination by bees, carried on under the supervision of Virgil N. Argo, extension specialist in beekeeping for the Ohio State university.

One of the demonstrations was made in the W. W. Farnsworth orchard at Waterville. The owner rented 104 colonies of bees and established them in the orchard at the rate of one colony to each acre of bearing trees. Pollination by the bees was held responsible for increasing the yield of a four-acre plot of self-sterile damson plums by 200 bushels over its best previous yield. In spite of a poor season. The extra 200 bushels of plums sold at \$2 a bushel.

The Ohio Orchard company at Milford Center rented 20 colonies of bees which were placed in two blocks of Minkler apple trees, notoriously "poor setting." A check was obtained by placing the bees at one end of a very long, narrow strip of the trees. The results showed that 47 trees accessible to the bees yielded a total of 261.5 bushels of apples, or 5.58 bushels to the tree, while 35 trees which the bees did not reach, produced only 126.5 bushels or 3.61 bushels to the tree.

In both orchards bouquets of the other varieties of the fruit from which pollen was to be taken were placed near the hives. The bees distributed pollen from these bouquets as they worked on the growing trees. Research into the possibilities of the system is to be carried further this year.

Lap Graft Is Simplest Form of Orchard Work

The lap graft is perhaps the simplest form of this sort of work. The sprouts used are generally a little smaller than a lead pencil, and scions about the same size must be found. Both scion and stock must be cut at a long slant, and then put together in such a way that the inner bark of both will coincide in at least some places so that sap may flow from the stock to the scion.

After the stock and scion are shaved to fit they are put together and wool yarn wound around, after which a suitable piece of grafting wax is wrapped around the whole thing. Dur-

ing the season when it is found for sure that growth has started vigorously the wool yarn may be cut with a sharp knife so that it will not unduly bind the growing wood. This of course should be done in the middle or latter part of the year. This is the common lap graft but some people cut an additional tongue in both parts of the stock and scion, thinking it makes a firmer hold. This may be done, but the other method mentioned is adequate if properly done.

Clearing Out Brambles Quite Difficult Task

Blackberries make great root growth and send up a multitude of shoots, especially in the corner of a deep soil garden where they have been let go for sometime. A good spading fork, leather gloves, such as iron workers use, and considerable backbone, will handle this job. Put the fork down deeply under a plant, loosen it and with a pull on the top while prying with the fork, most of the roots will come out. It is not easy, but does the work. Some roots will be left in the soil, but these shoots can be hoed off during the season. Quack grass in a garden corner can be handled in the same way.

European Gooseberries Quite Vigorous Growers

There are two groups of gooseberries; the European and the American types. The European varieties are vigorous growers and produce large attractive berries. They are no better in quality than the American varieties and are much inferior in yield. Consequently, they are not recommended for commercial culture though they may have a place in the home garden where something a little out of the ordinary is desired. Columbus is one of the most satisfactory European varieties. Oregon Champion is a cross between the European and American types that has made many friends.

Dehorn Peach Trees

It is seldom desirable to dehorn peach trees. It is usually much better to give annual pruning of the right amount and keep the trees in a desirable fruitful condition from year to year by such pruning. Dehorning causes a profusion of rank sprout growths below the cuts. Many of these branches cannot be used; some break off and most of them grow too rapidly to be easily trained. The crop also suffers for two years or more following dehorning.

Wonder of Science

Scientists have worked out tables by which the height of a historical person can be estimated by measuring one or two bones.

Cathedral's Meaning

Cathedral designates a church which has a bishop's chair, or is the headquarters of the see of a bishop. In other words the cathedral is the mother church of a diocese.

SHROCKS DRY CLEANERS.

Take Steps to Meet All Competition
W. W. Whetstone Their Local Representative.

In another column of this paper you will find an advertisement of the Shrock Dry Cleaners of Warsaw. They have made their prices as low as any of the other concerns that have been soliciting business in this locality, and when you give your work to Shrock's or their authorized agent you may rest assured that you will get the high-class work and service for which the Shrock Dry Cleaners are noted.

Many people of this town have at times given work to solicitors thinking that they were dealing with Shrock's and found later when the work was returned that it was unsatisfactory and that in fact it was done by some other concern. A good way to be certain that you will get Shrock quality is to call up their agent Wade Whetstone, and see that the wagon that calls for the goods has the Shrock name on it.

COLLEGE REUNION

The Second Annual Rochester College Reunion will be held at Colonial Hotel Grounds, Lake Manitau, Rochester, Indiana. August 10th, 1930. Make your plans to attend. Committee.

TALMA NEWS ITEMS.

Mrs. A. J. Riddle spent last week with Mr. and Mrs. Harry Cooper.

Miss Ruth Wagoner and Wayne Bernard spent Monday in Gary and Hessville.

Miss Mary Barkman and Edward Miller spent Sunday evening with Blanche Yeazel.

Mr. and Mrs. Harry Wagoner and son Dale spent Sunday in Gilead with relatives.

Joan and Mary Cree Riddle of Warsaw are spending this week with Mr. and Mrs. Harry Cooper.

Mr. and Mrs. S. Y. Lowe of Peru were dinner guests Sunday of Mr. and Mrs. Leon Kotterman and family.

Miss Dorothy Horn spent Sunday at the Pleasant Valley Community Club, the guest of Von Kochenderfer.

Mrs. Joe Kochenderfer and Mrs. Wendell Duzenburg were Thursday afternoon callers of Mrs. Peter Horn and daughter Dorothy.

The Newcastle Twp., Farm Bureau meeting was held on last Wednesday evening, with a large crowd in attendance. Talks were given by Wm. Gray, Harry Rosenburg and Mrs. Ora Horn. Readings were given by Mrs.

Vance Johns of Mentone, songs by Albert Safford, Gene Walburn and Dorothy Horn. Committee in charge of the August meeting are Mrs. Elmer Rathfon, Mrs. Earl Zent and Mrs. Silas Meredith.

Members of the Girl's 4 H Club held their fifth meeting last Tuesday at the Talma school building with nearly every member present. After the lessons, they enjoyed games and refreshments. The next meeting will be held on August 5th.

A NEW CORRESPONDENT.

We have a new reporter at Beaver Dam, with the first of her items appearing in this issue. We are very glad to add this live community to our weekly news reports, and hope to be able to add many more localities with good live reporters in the near future. If your community is not represented please help us get a good correspondent to report your activities.

SODALES CLUB PICNIC

Thursday July 24 occurred the annual picnic of the Sodales Club.

Club members, their children and guests to the number of forty-two motored to Beaver Dam lake early in the forenoon. Cheerful greetings and conversation filled the air until the noon hour. Needless to say there was plenty to eat and it seems that each one had made a special effort to prepare something unusual and delicious for the meal.

The entertainment provided was to please the individual and consisted of swimming and games.

The guests were Francis Clark, Nellie Baccus of Greely Col., Isabelle Johns, Edith Dunlap of Hastings, Minnesota, Lois Fenstermaker, Irene Clutter, Lucile Myers and daughter, Pattie Jean of Jamestown, N. Y. Elma Cattel, Ernie Cole, Marie Busenbarg and daughter Julia Ann, Elizabeth Simcoe and son Kenneth and Virginia Babcock.

The committee in charge of securing the place and transportation was Gladys Carter, Ernie Cole and Ruth Ernsberger, for the menu, Ruby Smith, Yoland Riner and Ellen Stanford. All present feel deeply grateful to these committees for their efficient and interesting efforts.

Wood Appropriately Named

The Ghosts' wood is in Mecklenburg, near Heiligendamm, and is so called because the trees are spectral and white, as if they had been bleached.

Belgium's National Flower

The azalea is the national flower of Belgium, being developed from the wild shrubs of this species native to the hilly regions of Japan and China.

Threshing Time

by A. J. Dunlap

The biggest day back on the farm
Was when the threshing crew
Along the hillside, down the road
Swung boldly into view.
The sturdy horse-power led the way,
With grease-smeared cog and gear;
The separator rocked along,
With wagons in the rear.

With shout and sledge they staked 'er down—
The boss called, "let 'er rip."
The driver waked the drowsy team
And cracked the long lashed whip.
The tumbling rod began to roll,
The separator whined.
And from its worn spout poured the grain,
And piled the straw behind.

At dinner time we laughed and joked
In wholesome, friendly style,
When Pansy passed the pie to Pete
With shy and winning smile.
But when the jolly crew was gone
To thresh the next month's grain,
Somehow we felt a loneliness
We couldn't quite explain.

THE OLD FARM SERIES

Silence Is Golden

A good word is an easy obligation; but not to speak ill requires only our silence, which costs us nothing.—Tillotson.

First Thermos Flask

Sir James Dewar, an eminent British chemist and physicist, who designed vacuum-jacketed vessels for the storage of gases after he had liquefied them, discovered the principle of the thermos flask about 1892, says Pathfinder Magazine. These flasks, known at first as Dewar bulbs, proved very effective in preserving liquid gas by preventing the influx of external heat.

"Buddy Poppies"

The practice of selling Buddy poppies made by disabled veterans was inaugurated in 1922 by the Veterans of Foreign Wars. "Buddy" is registered as the trade-mark of the organization and the label "V. F. W. Buddy Poppy" is a guarantee to the public that the symbolic flowers sold by the organization are the genuine product of disabled men. In 1923 the first Buddy poppy factory was established at Pittsburgh. Pathfinder Magazine.

Name for Form of Ice

Slob ice is ice that stops ordinary navigation. It usually refers to the surface ice brought down by the Labrador current to the coasts of Labrador and Newfoundland.

Not General Knowledge

We know well enough that we should scarcely ever speak of our wives, but we do not well know that we should speak still less of ourselves.—La Rochefoucauld.

Austria's Proud Boast

The five vowels, A, E, I, O, U, inscribed on the public buildings of Austria during the reign of Frederick III in the Fifteenth century, were understood to mean, Austria est imperatrix orbi universo (the whole world is subject to Austria).

"Nature's Sweet Restorer"

Blessings on him who invented sleep, the mantle that covers all human thoughts, the food that appeases hunger, the drink that quenches thirst, the fire that warms cold, the cold that moderates heat, and, lastly, the general coin that purchases all things, the balance and weight that equals the shepherd with the king, and the simple with the wise.—Miguel de Cervantes (1547-1616). "Don Quixote."

Says WILL ROGERS

BEVERLY HILLS.—Well all I know is just what I read in the papers, and what I know when I am there to know it. Now dont let them tell you it hasent been hot here in California the past few weeks. Brother its been roasting, and we havent got the usual Alabi, "Its the humidity." We havent even got any of that. Course its been cool in the nights. (That is fairly cool.) I am not going to be too big a liar just for the sake of the State. Its just been hot, thats all.

Say you know what we got out here besides the heat. Well its a Fish they call it Grunion (Not Grundy) Grunion.

At a certain time of the day and year why it washes right up on the bank or beach rather. You can tell where I did all my early swimming. Its just a few inches long and pretty small even in a story. Well people go to the Beaches by the Fords full and after a big wave come in when they make a dive and tackle these things with their hands, and the funny part of it is, they know when its going to happen just like an eclipse. The papers all announce it, "Grunion will appear on such and such a Beach at 9:43 Tuesday night. And by golly sure enough at 9:43 on said night, a wave come in and sure enough riding it in was old man Grundy (I mean Grunion). Well everybody was a Tackle or a halfback, they made a flying tackle at em, and when their heads were pried out of the sand, it was found that each hand held two and three ounces of Grunion. So you see California again will get the reputation of being the biggest liars on earth by saying they can catch fish right out on the dry land, and the Rascals wont be lying, they will be telling the truth for the first time in years.

Humor is still rampant in the Senate. Here is the two latest amendments to the treaty:

"Freedom of the seas for all neutrals." That was originally suggested at the same time that other famous amendment was: "If your enemy strike you, turn the other cheek." Wars are won by starvation. How you going to starve anybody if everybody else feeds em?

The other gem of forlorn hope was: "England must give up five of her naval bases." I dont know how Senator McKellar overlooked Buckingham Palace in that demand.

If you think the Senate aint funny, get this Norris resolution:

"If there has been any trickery about this London Treaty, and we find it out, no matter how old we are, we want to recall our signatures and call the treaty null and void.

"Now, we dont know that there has been any trickery (thats what's worrying us) but if there has, we (the Senate) want an alibi in case the whole thing dont turn out so good, but in case it is found that we have tricked the other nations and that the treaty is a fine thing, why this clause dont hold."

Well we have no monopoly on kicking on the Treaty. England says we got the best of it, that shows they have a sense of humor, and in Japan they are hollering their heads off, they say their Delogation didnt bring home enough ships. So if there is that much dissatisfaction, its like I have always preached, why hold these things? There is always more hatreds formed at any meeting than there is friendships, no matter what they agree too they know they should have done better. The Nations in this world that get along and never have any trouble are the ones that never meet in conference at all.

I got a great scheme for universal peace: This United States of Europe that Briand is forming in Europe, with twenty nations in it, to be run like our forty-eight States are. Well, here is the scheme: have them adopt prohibition, and that will start em all arguing over it so much that it will get their minds off war. You cant fight, and argue prohibition. You are useless for anything else on earth.

Been having a lot of trouble here lately getting some alfalfa to grow on my little patch of ground.

One span of gray mules dont look as well as they ought to, according to what they are eating. I never missed a polo ball as much in my life as I did in my game last Sunday. Seen a couple of mighty poor movies here lately.

But, as soon as the market picks up, you watch these mules go, and this grass grow and pictures improve.

I tell you, its the stock market crash last Fall that did it.

(© 1930, McNaught Syndicate, Inc.)

"Spot Fyter" for grease and dirt spots. A few drops, a little rubbing, and they are gone. For sale at Clark's Store.

Made Famous by Byron

The last inmate of the dungeon of Chillon was Bonivard, prior of St. Victor at Geneva, held captive by the duke of Savoy in 1530. He is the hero of Byron's "Prisoner of Chillon."

FAMILY REUNIONS.

The twelfth annual reunion of the Kesler family will be held August 10th, at Centennial Park, Plymouth, Indiana. Mrs. Fred Busenburg, Sec'y

The fifth annual reunion of the Cupp family will be held at the home of Mr. and Mrs. W. L. Yantis, one and one-half mile south and one-half miles east of Tippecanoe, on August 17th. Mrs. W. L. Yantis, Sec'y.

The seventeenth annual Harsh-Teeter reunion will be held at Beach wood Park, Huffman Lake, Sunday, August 3rd. L. E. Boganwright, Sec-Treas.

MENTONE STUDENTS

ATTEND SUMMER SCHOOL.

The second term of the Indiana University Extension summer school opened this week at Winona Lake. Nearly 200 were enrolled for the first term of five weeks, which ended last Friday, and many of these are remaining for the second term, which will be in session three weeks. The registrar's office was busy on Monday and Tuesday enrolling new students, who have come for the second term.

The list of enrollments includes Mildred Anderson and Annabel Mentzer from Mentone.

Students who are attending the Indiana University summer school here are taking advantage of the opportunity of enjoying a delightful outing while pursuing their studies. Winona Lake offers recreation of all sorts—bathing, - fishing, golf, miniature golf, shuffle boards, tennis and other outdoor pastimes. In addition the students are privileged to enjoy daily concerts by the Winona band Orchestra and all splendid entertainments offered on the six week's chautauqua program.

DEATH OF ENOS MEREDITH.

Vincent Meredith has received word of the death of his brother Enos, who died at a hospital in Denver, Colo., July 23. Deceased was 62 years old and was buried at Greeley Colo., where he has resided for many years. Mr. Meredith was formerly a resident of this vicinity.

BUS BURNS NEAR ATWOOD.

A twenty thousand dollar Grey Hound bus was destroyed by fire near Atwood on Tuesday of last week. It carried 32 passengers who by quick action were able to emerge from the flaming car without accident or burn. The baggage also was also saved.

FAIR DATES ANNOUNCED.

Clyde U. Lowe, secretary of the Kosciusko Fair Association has announced Sept. 22 to 27 as the dates for this year's show. Premium lists will be mailed out in August.

MENTONE NEWS ITEMS.

Leslie Laird of Indianapolis spent the week end with Mr. and Mrs. Frank Laird.

Wilma Haimbaugh of Detroit was the guest of her grandparents, Mr. and Mrs. Obe Haimbaugh last week.

Mr. and Mrs. Billy Williams attended the Golden Wedding of Mr. and Mrs. Ira Dick at Claypool Sunday.

John Freisner of White Pigeon, Michigan and daughter, Mrs. W. R. Finch of Lowell Michigan, spent the past week with Mr. and Mrs. Arlo Freisner and Mrs. Emma Blue.

Mr. and Mrs. W. A. Warner entertained at a six o'clock dinner last Wednesday evening, Mrs. Lucille Myers and daughter Patty Jean, Mrs. Cora VanGilder and sons, Donald and Jack.

The Chevrolet touring car of Mr. Vernon Jones burned up last Wednesday afternoon, while Mr. Jones was working at the farm. The blaze was thought to be caused from a short in the machine.

Mrs. Ella Elick and daughter, Stella of Fort Wayne, Mrs. Bertha McAfee and children of Bluffton and Bruce and Wendell Decker of Ossian, Ind., spent last Wednesday and Thursday with their son and brother, Mr. Lawrence Elick and family.

SCHOOL REUNION

One hundred and fifty pupils, teachers and families, former patrons of the River Bend School, Harrison township met Sunday, August 13, near the home of Alva Mellott to celebrate their fifth annual reunion. Long tables loaded with abundance of extra good food was enjoyed at the noon hour, followed by a program of readings, songs and interesting talks by five former teachers: Orvil Kilmer of Warsaw, Mrs. Dora Burch of Claypool; Mrs. Martha Herald of Burket; Ora Beeson and Mrs. Anna Hess.

The following officers were elected Chairman, Alva Mellott; Vice Chairman, Frank Elder; Secy-Treas., Mrs. Ruth Wells with Mrs. Nellie Pittman as assistant.

All who were in any way connected with this school are invited to attend next year—the third Sunday in July, near the Mellott homestead.

Paint That Barn.

POULTRY

LAYING HENS ARE ANXIOUS TO QUIT

Good Plan to Keep Them in House Until Noon.

"Laying hens are looking for any excuse to quit laying at this season of the year," says R. E. Cray, extension poultry specialist at the Ohio State university. "But there are several ways to fool them."

Cray recommends that the layers be kept in the house until noon or the middle of the afternoon, to increase their consumption of mash ration. The morning grain feed should be reduced or eliminated, and wet mash should be fed at noon, to the amount of four or five pounds to each 100 birds. Regular dry mash, moistened with milk, is suitable for this meal. At the same time the amount of milk which is being fed to the layers should be increased if possible.

Comfort for the laying hen in hot weather is an important factor in determining whether she will or will not quit laying. The laying house should be well ventilated and kept as cool as possible, for this reason.

Green feed in liberal amounts will help maintain the laying record of the hens and pullets, as well as contribute to their general good health.

Natural Mother Found Best for Young Chicks

"Give me a mother with feet and feathers instead of a brooder," an old-fashioned poultryman insists. He has his hens set in batteries of twelve, each hen and her brood to herself, the divisions being made with poultry netting. Corn and water are supplied to the hens to discourage their gobbling up the more expensive chick feed. The coops and yards are moved often to fresh ground, but the hens are not let out until the chicks are weaned. The edge of the strawberry bed, garden or corn field are the favorite parking places of this breeder for his hens and chicks.

Feeding Green Corn

A common method of feeding green corn is to chop it into short pieces and allow the hens to pick it off the cob. In such cases the poultryman should be careful to see that the birds' crops are full at night. Even though some of the green corn may be consumed it would be a good idea to feed some shelled corn at night to insure birds going to roost with full crops. The chief dangers from green corn feeding are intestinal disorders and partially filled crops, but if the poultryman realizes these dangers he will introduce new corn to advantage.

Vigorous Hybrids

In a study of hybrid vigor in poultry at Kansas experiment station, White Leghorns and Rhode Island Reds were used. In the pure breeds the mortality of the birds up to three weeks of age was 5.6 and 6.3 per cent respectively, while that of the hybrids was 1.4 per cent. The hybrids of both sexes outgrew the pure bred offspring. The mating of the Leghorn males and Red females produced more rapidly growing offspring than those of the reciprocal cross.

Poults' Worst Enemy

Lice are the worst enemy poults have to fight. They are usually found between the quill feathers of the wing. Lice will kill a poult quicker than they will a chick. Poults are very sensitive to strong odors. In treating them for lice it is well to use as little lice powder as possible, but be sure it is fresh. Sodium fluoride is used by the pinch method on poults after they are three weeks old. The hen that is given eggs of any kind should be well dusted with sodium fluoride.

Influence of Minerals on Growth of Chicks

Experiments at the Wisconsin station show that chicks which were fed the Wisconsin ration of eighty parts ground yellow corn, twenty parts middlings, five parts chick size bone meal, five parts chick size ground limestone and one part salt, with free access to skim milk, did much better in recent tests than chicks that were fed rations in which part of the minerals were left out. In ten weeks the chicks which were fed the regular ration given above weighed 500 grams. A similar lot in which the bone meal was left out grew to an average of 486 grams, while a lot that failed to have limestone included in their ration weighed 353 grams. At the age of nineteen weeks the chicks weighed 1,107, 908 and 460 grams, respectively, for the different lots.

The above tests show the need of including minerals in the chick ration. A ration containing milk or milk by products, combined with minerals in the approximate proportion used in the Wisconsin ration, forms the basis for most of the successful chick starting mash. Yellow corn is a good ingredient for one of the grains as it contains a plentiful supply of vitamin A. The kind of other cereals used does not matter so much, so long as they are easily digested and attractive to the chicks.

Ancient Dower Chests

The hope chests of a former day were in this country usually made of pine. Some examples are in existence made of finer wood. Usually the chest contained a till with a lid of its own. In this the silver was kept. The main body of the chest was designed to hold blankets, comforts and linens. Some chests had a drawer beneath, some had two drawers, and an occasional chest contained three drawers.

IF YOU MET WITH A SEVERE ACCIDENT.

Was Laid up in a Hospital or Home Could You Pay Your Expenses for One Cent a Day?

IT CAN BE DONE.

Pay us \$3.65 or at the rate of a penny a day for a whole year, and in return should you at any hour of the day or night during the year be riding as a passenger on a railroad train, steam boat, street car, elevated or subway car and by the wrecking of that vehicle you become injured, we will pay you at the rate of \$100 per month for one day of more for a period of a year's time. Should you be killed we will pay to your estate \$5,000.00 and in event you are permanently disabled by the loss of one or more limbs or the sight of an eye or eyes, we will pay you from \$1,500.00 to \$5,000.00 depending upon the extent of your disability.

Suppose you should become injured from the wrecking of your automobile, or while riding in your friend's car. Suppose you are riding in a taxi cab, motor bus, or elevator, and through the wrecking of that vehicle if you should be injured we would pay you at the rate of \$100.00 a month, and if killed your estate would receive \$1,000.00; also for loss of sight, or limbs from \$500.00 to \$1,000.00.

That's Not All—This same indemnity would come to you for injuries received as a result of being struck by lightning, injured in a tornado, by being burned or suffocated by smoke in the burning of a church, school building, theater, store office building or lodge room. Should you drown while bathing at a bathing beach your estate would receive \$1,000.00.

Furthermore—Suppose you were struck, knocked down or run over while walking or standing on a public highway. Suppose you were injured while driving a truck, wagon or buggy, and if you are a farmer, suppose you were injured while operating a threshing, mowing or heading machine, a binder, harrow, plow or tractor, we would pay you for one day or more of disability at the rate of \$50.00 a month; and if killed your estate would draw \$500.00.

This 1c Day Will Also—entitle you to a \$10.00 medical or surgical attention for any of the foregoing injuries that does not totally disable you, and if you are injured in any accident, any place, any time and are laid up for a month you will receive \$25.00.

A real honest to goodness accident

policy that covers the pedestrian as well as the traveler. Just think, all this for only 1c a day.
