MENTONE,

INDIANA

March Came in With a Roar,

And as a result you will probably need some more coal. Better order a load of DANA SOFT COAL and then you will know why so many other people insist on having this grade of fuel.

Mentone Lumber Company.

The Community Farm News

Subscription price \$1.50 per year in Kosciusko, Marshall and Fulton counties. Outside these counties \$2.50 per year.
C. W. KRATHWOHL, Editor and Publisher.

An Investment When you spend your money with your home merchant it helps to make a live town—a good live town increases property values That Pays Dividends

CO-OPERATION THAT PAYS FOUR WAYS.

In this issue will be found a full page advertisement of the Sherwin-Williams Paint Co., one of the oldest and most reliable paint manufacturers in the United States.

This advertisement is the direct result of co-operation on the part of our druggists, Shafer & Goodwin, who with little effort induced this company to expend a portion of their advertising appropriation in the Farm News where it would be sure to be seen and read by their many customers. This act on the part of Mentone's Big Drug Store is duly appreciated by the publisher, and while it greatly assists in making the publication of the local paper possible in this community, we are satisfied that the S. W. firm will reap good returns on the money that they spend with us in publicity, that the local firm will be well repaid for their efforts to bring some of this national advertising to our paper and that the buyer will be greatly benefited by being induced to use only the best quality paint on his buildings. Thus it will be seen that by co-operation the Manufacturer, the Dealers, the Home Paper, and the Consumer will all benefit by the deal.

Many of our local dealers could possibly aid us in the same manner, as there is hardly a large manufacturer who does not spend a large amount of money in advertising his product and by a little effort on the part of the dealer a portion of this expenditure could be diverted to space in the Farm News, where it would do the dealer some good and at the same time help build up the home paper.

BUSINESS OUTLOOK ALL RIGHT

By CHARLES M. SCHWAB, Steel Magnate.

I HAVE never felt more optimistic than I do today about the future of business. In the fifty years that I have builded steel mills I have never builded a mill that met the demands on it that followed. With that in mind, who wouldn't be optimistic? This recent speculative wave that has hit the country has brought losses only to those people who thought they were rich. We of the factories lost nothing, for we still have wealth in the bricks and mortar and machines of our factories.

Business in the United States is going to grow just as surely and just as fast in the future as it has in the past. In the steel industry alone we have a background that should inspire us. From 1,000,000 tons in 1879 to 57,000,000 in 1929, or two-thirds of the world's output is a record worthy of study. I have the greatest confidence that the industry of today will follow the path and the pace that have been outlined for it. Any business that is conducted a little better than the other fellow's is bound to succeed.

Real prosperity means prosperity, happiness and good times for the masses of the people. The average daily wage scale, excluding salaries of employees of the gigantic Bethlehem Steel corporation, the board of directors of which I am chairman, is slightly more than \$7 a day. The highest possible wages lead to and indicate well-being of the masses.

"TRUSTS" SEEN IN NEW LIGHT

By W. W. ATTERBURY, President Pennsylvania Railroad.

THE great combinations of industrial enterprises, once feared and antagonized under the name of trusts, are now recognized as among our greatest national assets and absolutely necessary to maintenance of our place in the world's trade. Many of our colleges and schools have in years not so far distant been the breeding grounds of a good deal of subversive and radical thought. Ideas were encouraged, and even directly taught, that were entirely out of harmony with human society as it has come to be organized, and that if allowed to go far enough would surely destroy that society. Would they set up something better in its place?

Radicalism in scholastic circles, I think, may be traced to two main sources. One is recourse to theory without contact with the practical affairs of real life. The other is the reflex of the unsound political movements of the last generation or two.

Such political movements, for the most part, have been aimed to prevent the accumulation of wealth in individual or corporate hands, in the mistaken idea that wealth is a dangerous or evil thing.

We know better now. We know that wealth is the most potent material power for good that exists in the world, and that, other things being equal, the bigger and stronger any useful and capably managed business enterprise becomes, the better and more beneficial it is to the welfare of the country as a whole.

The voice of the people has acclaimed the honesty of purpose of big business as now conducted, and the government, ever sensitive to popular opinion, is in all departments giving greater help and less hindrance to business than ever before in our national history.

IMPOSSIBLE TO OBEY ALL LAWS

By DR. NICHOLAS MURRAY BUTLER, President Columbia University.

If law enforcement meant the enforcement of all law, then the social order, at least in the United States, would quickly be afflicted with paralysis, partly because of their open conflicts with each other.

There is no ground whatever for the conventional statement that the violation of one law or disrespect for it leads to the disregard of all law. The contrary is the case. Lawlessness is selective, and unbroken human experience goes to prove that one man may hold a law in utter contempt and yet have high respect for the great body of the law of the land in which he lives.

The conduct of a gentleman and conduct in accordance with high moral standards are superior to law as methods of social control.

The failure of congress to enact reapportionment legislation for years might be mentioned as an instance of defiance of the Constitution by those in authority.

EGG CASES!!

We expect to have four (4) carloads of egg case material on track next

Saturday, March 8th

You folks who ship eggs should not overlook this opportunity
of saving money.

The Price Will be 37c in Lots of 500

Or better, and 37½c in Lots of 50 or better.

Egg cases cost about 1c more than last fall and yet our price is about ½c lower. If you appreciate a money-saving service like this you are welcome. If you are "pig-headed" and do not appreciate it, then "we should worry."

We Will Not Have Another Shipment Until Early Fall,

So even though you have some cases, better get a good bunch of them now.

We Still Have a Few Chick Datings in Latter March.

Our April datings are entirely booked up as is also the hatch of May 1st. Can still take care of some orders from May 5th, and on. Our chick price is 15c. After May 15th, the price is 12c. If you want some chicks in March, better phone us at once.

Just had word from Notre Dame University that the 2000 chicks which we sent them were the finest that they had ever bought. Might mention that our breeders are not only carefully blood tested but also that all our hatching eggs are iodine dipped. Our new electric machines are turning out better than 75 per cent hatches of the best chicks that we have ever produced.

Brooder Stoves With Big 52 Inch Canopies at \$17.00

With your choice of any of our 5 gal. drinking fountains thrown in for good measure. If you prefer a big 44 inch double-wire grill chick feeder, you may have one free with each stove. We have these feeders for sale. These feeders are handy when your chicks have outgrown the little trough feeders, and can be used until the chicks are big fellows. They are about the finest feeders we have ever seen and the price is "dirt cheap." Come out and see them.

DON'T FORGET THE EGG CASES

WHITE CITY EGG FARM,

C. L. MANWARING, MAMAGER

**PASTURE PLAYS BIG ROLE
IN LIVESTOCK PRODUCTION**

(Purdue News Service.)

Lafayette, Ind. Mar. 3. "The place of pastures on Indiana farms is receiving more consideration in recent years than formerly," said G. E. Young, of the Purdue University department of farm management in a talk during the recent agricultural conference. "This increasing importance of pastures in our Indiana farming system has back of it a number of important economic influences:

"First, the importance of pastures in a rotation to maintain soil fertility and to prevent soil erosion;

"Second, the importance of productive pastures in economical livestock production;

"Third, the importance of pastures in offering economic utilization for thousands of acres of land not well enough adapted to efficient crop production to compete successfully for that purpose with better grades of land.

"The gradual economic changes which have occurred as farming has been changing to a commercial basis, until almost everything produced on a farm is sold in competition on the markets, have placed an increasing premium of greater efficiency on the use of the land, labor, and capital resources at the command of each farmer," said Young.

"Our present type of agriculture forces on each farmer the problem of how much labor and how much investment to each acre of land will yield the greatest return for wages and interest."

Farm management records in Indiana show that the amount of livestock per farm is one of the important factors in determining farm profits. Since pasture is the cheapest source of feed for livestock considering the small amount of labor required for producing and harvesting, no livestock farmer can profitably afford to restrict the amount of pasture to a point where grain and hay feeding would be unduly increased as a result.

**USE FERTILIZER
ON INDIANA SOILS.**

Lafayette Ind., Mar. 3—Some timely suggestions for the use of fertilizer on Indiana Soils were given by Prof. S. D. Conner of the Purdue University Agricultural Experiment Station in an address recently at the Agricultural conference.

"Soil type is determined by several factors such as the proportion of sand, silt, clay and organic it may contain, the kind of subsoil under it, the location in bottom, terrace or high ground, prairie and timber land, glacial drift, and the kind of rock

out of which the soil may have been formed and other factors," said the speaker.

"Many of these factors that cause the soil to be different also are the reasons it may need lime or a certain kind of fertilizer.

"Dark soils and bottom lands need nitrogen less than light colored soil.

"Most all soils in Indiana except the newer soils and river bottoms need phosphate fertilizer. This is the reason why the average fertilizer is higher in phosphoric acid than any other ingredient. Acid soils which are common in Indiana need phosphate badly.

"Potash is needed on most sandy types of soil also on muck and chaffy soils, also on the white flat silt loam soils of Southern Indiana. Potash is not needed so much on rolling yellow clay soils. Eroded soils needed nitrogen and phosphate more than potash.

"Acid soils need lime. About half the soils in Indiana need lime for better growth of red clover. Three-fourths need lime for alfalfa or sweet clover. The dark bottom soils need lime the least. Soils are easily tested for acidity. Lime will not take the place of fertilizer nor will fertilizer take the place of lime. Both must be used for the best results."

W. C. T. U. NOTICE

The Mentone W. C. T. U. will meet Tuesday afternoon March 11, at the home of Mrs. Alberta Poulson.

Boston, with a reputation, well-earned, for sedate intellectuality, does not hesitate to remind the world that it still has in its make-up material for the mob that is likely, with sufficient provocation, to forget some of the formalities.

A "robot" airplane pilot is called "Macaviator." It shortens the term "mechanical aviator" and gives the impression that it is a canny member of society perhaps entitled even to wear the kilties.

It is not known how a tight-rope walker keeps in trim in the winter time, unless it is up and down the little path that Junior shovels through the snow to the incinerator.

That 46,580,000 of our population, or 39 per cent, have to support the other 72,726,000, or 61 per cent, is an estimate by statisticians, "support" including paying their taxes for them.

"Women weep, as women should, because they're so misunderstood." As far as we can see, the new, long skirts are worn by the girls with whom it isn't a matter of necessity.

Our line ranges in prices from 4c a single roll to \$1.00 and the designs are more artistic than in former years. Come in and see the patterns and get our prices.

Remember We Can Furnish

You with any item in the paint line, varnish stains, paint in small cans, enameloid any size and color and Varnishes, all of the Sherwin-Williams Quality.

Shafer & Goodwin

The Big Drug Store on
The Corner.

CARD OF THANKS.

We wish to thank the neighbors and friends for their kindness and sympathy shown during the sickness and death of our beloved father and grandfather.

Mrs. C. L. Davis and family.

SPRING MOVING.

Linus Borton has moved to the Blue farm west of town.

Ralph Blue has moved from the Blue farm into the Wilson property on North Franklin St.

Lawrence Johnson of Palestine has moved into the Linus Borton property on North Franklin St., and will drive the Clark merchandise truck. All of these changes were made on Wednesday of last week.

BIRTHDAY PARTY.

Mrs. Dewey Whetstone was most pleasantly surprised Sunday evening, it being her birthday. She was presented with a large birthday cake. The evening was spent in a social good time. Those present were Mr. and Mrs. William Romine and daughter. Mr. and Mrs. Frank Fisher and Mr. and Mrs. Jake Grass and children. They all departed late in the evening wishing Mrs. Whetstone many more happy birthdays.

MENTONE NEWS ITEMS

Mrs. A. E. Eberly spent Monday afternoon in Warsaw on business.

Miss Elsie Robbins entertained Lillian Igo at supper Sunday evening.

Merl Holloway of Fort Wayne is spending the week in Mentone with relatives.

Mr. George Mollenhour and children were guests Sunday of Mr. and Mrs. Vernon Jones.

Miss Goldia Neidlinger of Plymouth was a guest at the Vernon Jones home Saturday.

Mr. and Mrs. Dewey Whetstone entertained at supper Thursday evening Mr. and Mrs. Edwin Meredith and Mr. and Mrs. Jake Grass and children.

Mr. and Mrs. Vernon Jones, Mrs. Charles Emmons, Mrs. Isaac Sarber, Mrs. Lilly Fisher and Mrs. L. L. Mollenhour spent Monday afternoon in Bourbon.

TALMA NEWS ITEMS

Mrs. Obe Haimbaugh is visiting friends in Warsaw.

Mr. and Mrs. Lloyd Kesler and two children Mary Marjorie and Bobby of Warsaw spent Sunday with Obe Haimbaugh and family.

Bruce Zolman spent the week end with Harley Zolman and family at Rochester.

Mr. and Mrs. Lloyd Zent visited the formers parents near Palestine last Sunday.

Mrs. Sabith's Clary a sister of Mrs. Sam Friend was buried last Monday at Rochester.

John Landis returned home last week from North Manchester where he had been taking treatments for rheumatism.

Dan Smith and family moved to a farm near Burket last week. Mr. and Mrs. Steve Barrett will move on the farm vacated by the Smith's.

MRS. WILLIAM VERNETTE

Minnie Vernette, wife of William Vernette passed away early Monday morning at the McDonald hospital at Warsaw. Death was due to complications of diseases. She leaves one daughter, Mrs. Earl Sarber of near Burket, three sisters and one brother besides several other relatives. Her parents were Mr. and Mrs. Frank Flory and her former home was near Tippecanoe. Funeral services were held Wednesday afternoon at 2 o'clock at the Christian Church, conducted by Rev. Johns. Burial was made in the Mentone cemetery.

SURPRISE PARTY.

Mr. and Mrs. Lawrence Elick entertained at their home on North Tucker street, last Tuesday evening the following guests to a surprise birthday party in honor of their daughter Vadiis, The Misses Juanita Newell, Elsie Robbins, Ada Whetstone, Pauline Marshall, Pauline Blackford, Helen Mollenhour, Virginia Goodman, Messrs. Oliver Smith, Byron Nellans, Lyman Mollenhour, Deloris King, Ralph Borton Rex Tucker, Charles Fisher, Earl Smalley, Mr. and Mrs. Andy Goshert and son Billy and Donald and Freda Elick. Miss Elick received many nice presents. The evening was spent with a social good time. The hostess served delicious ice cream and cake.

Mr. and Mrs. Isaac Sarber entertained at dinner Sunday, in honor of their son, Christian's birthday, the following guests, Mr. Bud Case of Fort Wane, Miss Mary Ellsworth and James Sarber.

Talma Wins From Bourbon and Loses to Rochester.

The sectional basket ball tournament was played at Rochester last Saturday. In the draw Talma High School was to play Bourbon High School at four o'clock on Friday afternoon. This was a hotly contested game from start to finish. At the half the score was tied at eleven points. At various times during the game the score was tied but when the final gun sounded Talma emerged victors, the score being 19 to 17. The Talma boys were royally supported by almost all the High School students and many of the patrons.

After winning the game on Friday they again appeared on the floor at 10 o'clock on Saturday. This time they played Rochester. The boys played a good game of ball but were defeated, the final score being 11-21 in favor of Rochester.

BEST TO BE CAREFUL.

In writing up the causes that led to the closing of the Fribley store at Bourbon the News-Mirror of that place stated that owing to the fact that the recent small pox epidemic originated with one of the employees of that store the people were afraid to purchase their goods, and the business dropped off to almost nothing. That being the case it will stand our people in hand to think twice before attending the sale of that stock. While the store has probably been fumigated yet in a building as large as that one, piled full of goods it would be rather difficult to get a thorough job. We think that it would be best to stay on the safe side and fight shy of that sale—we have been fortunate enough to not have a case of small pox in this community so don't let us start now.

Good Old Days

We are hardly too old to remember when subscriptions were paid in coon skins, hard cider, cordwood and corn-cobs. So we have not grown any more sedate than to still make the proposition of exchanging subscriptions for the same. Coon skins would buy several years' subscription and enough of them would very nearly buy the paper. So before investigating the fur market we are compelled to forego the coon skins. But we could use a cord or two of black wood, says the Vandalia (Mo.) News. Somehow, we are better pleased to burn the wood than any other fuel we can get, not that we don't want to buy coal from the local mines which keep us supplied, but we just like to get that aroma from a good warm wood fire and also to hear the crackle of the wood burning in the stove.

One of the favorite diversions of children a generation ago was "playing horse." Today, however, the old game has gone into the discard. We seem to have advanced far into the horseless age; at any rate, when Caroline Ticknor recently set to work to prepare a children's book on famous horses, she discovered that most modern children had never even heard of a hitching post. The automobile has accomplished a number of things, says the Longview Daily News. Add to the list the fact that it has freed the American parent from the necessity of getting down on all fours every evening and playing Pegasus for his excited offspring.

COFFEE

There's Lots of Difference in Coffee But the Greatest Difference is in the Making.

No matter what the quality, coffee must be properly ground to suit the method of making to get good results. We guarantee the quality. Our new model Hobart Electric Coffee Mill removes the chaff by a vacuum process. Ask us how this benefits you. Prices right. No fancy expensive cans and labels. You pay for good coffee only in our packages.

Our first supply of 1,000 tumblers to give with each pound of Just Rite coffee has been exhausted but we were able to secure 700 more. This will last us about three weeks longer.

CLARK'S

WEED OUT POOR COWS TO CHECK BUTTER SURPLUS

Use of More Dairy Products by Farmers Would Boost Butterfat Prices.

Use of more of their own products by dairymen and their families, immediate weeding out of the two poorest producers among every eighteen "cream" cows, and the application of newer farm production methods to the dairy business, are the "three points" of the remedy suggested by the De Laval Bureau of Dairying to overcome the surplus butter situation which today confronts the dairy industry.

The immediate cause of the situation is the presence in the nation's cold storage warehouses of approximately 40,000,000 more pounds of butter than is considered normal. This surplus is being reflected in the price of butter, which in turn is having its effect on the price received by the farmer for his butterfat.

Dairy Profits Steady.
"Of all the branches of agriculture," says the De Laval Bureau, "dairying is one of the steadiest, year after year. Wherever good farm management is used profits are notably constant. Occasionally, however, a factor like the 40,632,000 more pounds of butter in storage this year over the same period last year, is causing some farmers to believe that the dairy business is being overdone. This need never be the case since the dairy farmer himself can wield a powerful influence on a number of factors affecting the production and cost of dairy products."

"Forty million extra pounds of butter seems a huge amount, but the people living on farms alone could consume this amount in less than six weeks by merely eating the amount of butter recommended for health's sake by the National Dairy Council and advised by nutrition authorities—two pounds per person per month. At this same rate of consumption farm folks themselves in another eleven weeks would consume all of the butter in storage and not leave a single pound for trade."

Weed Out Boarders.

"But perhaps the most effective measure dairymen hold in their own hands is cutting down the number of milk cows to those which are profitable producers. There are approximately 10,000,000 cows in the United States that are kept for the production of butterfat. Of this number of 'cream' cows, almost 500,000 are out and out money losers. They not only represent a loss of feed to their owners but at present produce just enough butterfat to create an excess supply and force down market prices. The disposal of one out of every eighteen

of these 10,000,000 cream cows, or better still, the weeding out of the two poorest producers among every eighteen cows, will automatically prevent any excess storage stock over normal. There has never been a more favorable time for culling out the money-losers and selling them for beef, which is now bringing good prices.

"The temporary accumulation of butter in storage was undoubtedly the cause of the drop in the price paid for butterfat. But for every cent drop in price an equal amount could be saved through better feeding. Raising as much low-cost, high-protein feed on the farm as possible is a commendable practice that works toward this end. Another is for every farm, whether selling whole milk or not, to separate enough cream for home use and provide skim milk for feeding calves, hogs and poultry."

Many Chilean women want instruction in the liberal arts and in the professions and commercial activities—the same as they are given in the United States and certain European countries, says El Mercurio, Santiago, Chile. Whether or not these pioneers in a new liberty will be able to overcome the traditional repugnance people have, for the most part, to women resorting to the universities and coming in daily contact with all sorts of men is to be seen. Our opinion is that the education of women should be devised first of all for the home—that noble and natural sphere of action for all true women.

In holding a man not liable for a fur coat his wife had charged to him, a District of Columbia court indulged in a dangerous bit of abstract speculation when it added: "It does not require the discernment of a Solomon to appreciate that the unauthorized purchase of goods by a wife whose husband has adequately provided for her inevitably will have a tendency to disturb and possibly disrupt their conjugal relations." But probably the judge had assured himself that the episode was not an incident in already disrupted conjugal relations.

The accusation often is made that we as a nation are money mad, says Thrift Magazine. It is high time some one refuted this gross libel. Go where you will in the United States and you rarely hear people so far forgetful of their purer selves as to converse on the subject of money or the attainment of material possessions. One seldom sees the dollar sign in the public press. Personally, we have quite forgotten what it looks like.

The number of trees cut down at Christmas time and left unsold might have the consideration of forestry experts. It would be a mistake to say that a tree which serves a purpose in holiday cheer is wasted. There should

Public Sale!

88—HEAD STOCK—88

As I am leaving the farm, I will sell at Public Auction, 3¼ miles south of Bourbon and 3¼ north of Tippecanoe, on the T. C. Dilly farm, on

Tuesday, March 11th

Beginning at 10 A. M.

5—HEAD OF HORSES—5

One span of sorrel colts with light mane and tails, coming 2 and 3 years old, weight 2800; well mated and good ones. This coming 3-year-old was worked last summer. Black mare coming 9 years old, in foal, weight 1600, and a good worker; These horses are all sound. One span of black geldings coming 7 years old, weight 3,000 lbs.

13—HEAD OF CATTLE—13

Two 2-year old Guernsey heifers, pasture bred, to freshen this spring; 2 yearling Durham steers, brindle heifer 1 year old, 5 Durham calves about 8 months old, 2 Guernsey bulls 10 months old, large enough for service; 1 Guernsey-Holstein heifer 2 months old.

46—HEAD OF HOGS—46

Four Duroc sows with pigs at their side, 1 sow bred to farrow June 2nd, and shoats weighing from 80 to 120 lbs; 3 male hogs, one 2-year-old and 2 fall pigs weight 120 lbs. These hogs are well blooded and all Durocs.

24—HEAD OF SHEEP—24

From 1 to 3 years old ewes, with lambs at their sides.

FEED AND IMPLEMENTS.

About 600 bushels of corn in crib; 5 bushels of good seed corn, 250 bu. of oats in bin; these oats will make good seed. Black Hawk corn planter with fertilizer attachment, 20-disc grass seeder, 24 spring tooth harrow, Oliver No. 11 sulky plow, 16-in. bottom, right hand; 405 Oliver Walking plow, left hand; John Deere cultivator, 7-shovel cultivator, double shovel plow, hay tedder, set of dump boards, 4-in. feed grinder, 2 sets of double work harness collars and pads, an old wagon and box, electric washer, slightly used; 2-horse electric motor, also bulbs, plugs and drop cord, 240-egg incubator, heating stove, 3-burner automatic Florence oil stove and oven, some lumber and other articles too numerous to mention.

ABOUT THREE DOZEN BROWN LEGHORN HENS

be some means, however, of preventing wasteful destruction in crowding the market beyond a real demand.

"If you think women talk too much, you never heard the man who introduces the speaker of the evening."—Toledo Blade. That experience is something we have studiously avoided for a long, long time, but we still have painful memories.

A leading French dressmaker is now hastening to explain that there really was no intention of ordering skirts way down to the ankles. Just a Scotchman's "two fingers" below the knee, sezze.

Of course, the way to stop war is to turn the minds of men into some other channel so interesting and absorbing that they will no longer think about fighting. But just how is that little thing going to be done?

No Indian Name

There was no universal American Indian name. The Indians were of many tribes and nations, speaking many languages. They had no idea of the extent of the two continents and most of them knew only a few of their neighboring tribes. Tribes had local names for the regions in which they lived, and often other tribes had other names for the same territory.

Trout Lose "Wildness"

Trout kept in hatcheries until they are six or eight inches long lose their wild instincts, and so when planted in streams or lakes become easier prey to predatory fishes than young trout planted at a smaller size.

Jewels in Watches

Jewels used in watch movements are there to make the bearings wear-proof. Watches of 17 or more jewels are considered high grade.

Horticultural News

MULCHING HELPS STRAWBERRY BED

Fruit Specialists Recommend Wheat or Rye Straw.

Mulching the strawberry bed, preferably with clean wheat straw, not only gives protection against alternate freezing and thawing in the winter, but tends to keep the plants from starting growth during unseasonable warm spring weather. It also keeps down weeds and conserves moisture, thus taking the place of cultivation, and helps to keep the fruit clean during the fruiting season. It is pointed out by Frank H. Beach and Clyde S. Holland, fruit specialists in the extension service of the Ohio State university. Serving all these purposes, mulching thoroughly justifies itself as a strawberry producing practice, in the opinion of the specialists.

Wheat or rye straw, clean, are perhaps the most satisfactory materials for mulching. Oat straw packs tightly and sometimes contains unthreshed grains. Manure, mixed with straw, while sometimes used, is likely to harbor weed seeds and insect pests, and is not always good for the soil upon which the strawberries are grown. In small home beds, rakings from the lawn will serve.

The mulch may be applied either before or after the ground is well frozen, since its purpose is to prevent freezing, thawing, and freezing again.

Pruning Currant Bushes by Removing Old Canes

The difficulty in pruning currants is greatly increased by neglect. Systematic annual pruning from planting should be followed. The finest currants are produced at the base of one-year-old shoots and on one-year-old spurs arising from two-year-old wood. Spurs on older wood produce fruit but it is much less in amount and smaller than that produced on younger wood. Canes, therefore, are usually past their best fruiting after their third crop.

The chief item in currant pruning is to remove canes which have passed their best fruiting and to replace them with new canes. A good plan is to remove a definite number of old canes each year and leave an equivalent number of new canes to replace them. When a three-year system is followed, nine canes to a plant makes it easy to keep the balance.

The three-year plan can be operated as follows: At the beginning of the second season leave six strong canes. At the beginning of the third season remove two of these canes and leave

five strong new canes. At the beginning of the fourth season, remove one two-year cane, two one-year canes and leave three new canes. Thereafter the oldest canes, those in their fourth year, should be removed and three new canes left to take their place. This will give a plant, at the beginning of the growing season, composed of three canes in their second season, three in their third season and three in their fourth season.

Dwarf Fruit Trees Are Becoming Very Popular

Of recent years the dwarf fruit trees have come into great favor because of their early fruiting qualities. It is claimed the dwarf varieties fruit in at least half the time it takes the standard tree to reach the fruiting point.

Now the dwarf fruit trees are being made to serve an ornamental purpose, as well as a useful one. They can be planted as specimen subjects the same as the ornamental trees, and at blooming time are as beautiful as any flowering shrub or tree.

When grown for their fruit they are economical, as they take up less ground, and therefore more trees can be planted to the same area. Dwarf trees are also much more easily cared for; spraying and pruning are simplified.

Spraying for Scale Is Job for Winter Season

San Jose and other scale insects, including oyster-shell scale, hose scale and curly scale make up a group of formidable plant pests. Often their presence is unknown until the plant has succumbed to their attack. They are tiny scale-like insects of varying shapes, which settle themselves on the bark, leaves and fruit of plants to obtain their subsistence by sucking the sap of the plant.

All sucking insects must be controlled by spraying them with a poison which will kill by entering the breathing pores, or with a substance which will smother them.

Blackberry Shoots

The new shoots of blackberries come up from the roots, and in time will form a rather dense clump. The best way to handle this is to take up the thrifty plants, dividing them from the main root underground, and set them where desired. Along a wire fence would be very good, because you could then tie them up to the fence and keep them in convenient shape for handling. This work can be done either in the fall after the leaves drop or very early in the spring.

Famous Bronzes

Bronze horses of Venice are supposed to belong to some Graeco Roman triumphal quadriga. These were brought to Venice by Doge Enrico Dandolo in 1204. They have had numerous adventures. During the World war they were taken down from the place before St. Mark's cathedral and safely hidden.

FARM STOCK

TUBERCULOSIS IS CAUSE OF LOSSES

Task of Cattle Raisers to Kill Ailing Cows.

(By J. W. LUMB, Extension Veterinarian, Kansas State Agricultural College.)

As producers and consumers of cattle and their products, it is the task of live stock raisers to treat herds and locate the tuberculous cow and give her a free ride to the rendering tank.

Tuberculosis of man and animals is so intimately interwoven that it is almost impossible to view them independently.

Three discoveries—that tuberculosis was infectious, that it was caused by a definite germ that could be isolated, and that tuberculin could be made and used as a test substance to determine the presence or absence of tuberculosis—were of very great importance and laid the foundation for our present methods of control and eradication. With this knowledge more exact methods were used in combatting the development of the disease in man and animals. Tuberculosis was proven to be a preventable disease.

These investigations definitely proved that man may become infected with bovine tuberculosis. It is true that such infections are, as a rule, limited to children or take place during the early periods of life. It has been found that very few people having tuberculosis of the lungs have the bovine type of infection. The form of tuberculosis that attacks the brain or spinal chord is seldom of the bovine type. General tuberculosis is likely to be of the bovine type in about 16 per cent of the cases. Taking the cases of abdominal tuberculosis in humans, the percentage showing infection of the bovine type may run well over 50, especially if infants and children are examined.

Production of Pork in Most Economical Manner

The man who provides automatic waterers, so arranged that the water in them can be kept above freezing throughout the coldest part of the winter season, and has his fattening yards provided with a self-feeder, is in position to produce pork in the most economical manner. A self-feeder is recommended only for fattening hogs and for growing pigs. It should not be used for brood sows. A brood sow should be fed a limited grain ration and not all she wants to eat. That is why a self-feeder cannot be used to advantage for her. Movable houses are essential for the rearing of the

pigs till they are at least four months of age.

Leading Farm Crops Now Marketed Through Stock

It has been conservatively estimated that three-fourths of the product of improved land and all the product of unimproved lands is used by live stock. Of the ten leading crops in the United States 85 per cent of the corn, 98 per cent of the hay, 35 per cent of the wheat, 80 per cent of the oats, 60 per cent of the cottonseed (in the form of cottonseed cake or meal and cottonseed hulls) and 90 per cent of the barley is marketed through live stock. These ten crops represent 87 per cent of the value of all farm crops produced in 1927, and 55 per cent of the value of the ten leading crops represents the value of the portion of these crops that are marketed through live stock.

Live Stock Hints

A foal that is born strong, fully developed, and robust is in the best state to resist disease.

Do not allow sheep to take the cold rainy weather which may cause pneumonia. Provide some shelter for them.

Undocked thin lambs that are sold either directly or indirectly for feeders are very severely discriminated against.

Intelligent management and feeding of the brood mare during pregnancy will do much to insure a good start for the foal at birth.

The mare goes 48 weeks, or about 340 days with foal. As foaling time approaches decrease the grain ration and increase laxative foods to keep the bowels acting freely. Constipation is dangerous.

The first ten weeks are the hardest in the life of the pig and likewise the most costly for the hog raiser, it is shown by cost of hog production studies made over the state by the University of Illinois.

Recent tests have shown that many unthrifty pigs are anemic and the direct rays of Old Sol are so far the best means known for combating this condition. Possibly at some future date a source of iron supply in the ration that will overcome this condition will be found.

The highest price paid for one pair of women's hosiery on record is \$2,000. This pair of stockings consisted of clocks made up of real diamonds.

MENTONE NEWS ITEMS

Mrs. James Blue spent Thursday in Warsaw.

Miss Geneva Johnson spent Thursday in Fort Wayne.

Freda Borton is reported to be on the sick list this week.

Carl son of Mr. and Mrs. Castle Whetstone is reported to be improving slowly.

Mrs. John Enstminger who has been quite poorly for the past several weeks is improving.

Ada Whetstone was a guest of Miss Greta Latimer, at the Austin Blue home near Mentone.

Ray Riner and Clara Williamson spent Thursday getting petition for a gravel road near Burket.

Mr. and Mrs. Cilford Keysucer of Chicago spent the past week with Mr. and Mrs. Thomas Whetstone.

Mrs. Billy Williams spent Saturday and Sunday in Claypool, visiting Mrs. Flora Dick and Mrs. Eva Pontius.

Everett Claybaugh who has been under the doctor's care for the past several days, is a little better at this time.

Mr. and Mrs. Henry Pontius, Mr. N. R. Teeter and Mrs. Lydia Rynearson spent Thursday afternoon in Bourbon.

Mrs. Dave Ellsworth and daughter Leota, spent Thursday in Warsaw, the guests of Mr. and Mrs. Burr Workman.

Russel Regenos, who underwent an operation at the McDonald hospital at Warsaw last week, is reported better at this time.

Mr. and Mrs. Arthur Brown and Mr. and Mrs. Sherman Bybee were guests over Sunday of Mr. and Mrs. Boyce Underhill at South Bend.

James Sarber who is employed in Fort Wayne spent over Sunday with his parents. Mr. and Mrs. Isaac Sarber and attended the Tourney at Warsaw.

Mrs. Little who has been spending the past few weeks in Mentone, in interest of the Prairie Farmer of the W. L. S. Chicago left Thursday for Knox where she will take up her duties there.

4 H. CLUB WORK.

The Mentone Home Economics Club voted at its last meeting to sponsor 4 H. Club work in this community. A committee was appointed to find out about the sentiment concerning the work and what interest parents and others are willing to manifest in such an undertaking.

Literature for organization is already in the hands of the committee

and a wonderful opportunity for worthwhile work amongst young people between the ages of ten and twenty years is open for leaders.

Many communities are successfully carrying on 4 H. Club Work, and it is spoken of in terms of highest praise. What our neighbors are doing, we can do equally well, or better.

Following is the 4 H. Club pledge: "I pledge my head to clear thinking; my heart to greater loyalty; my hands to larger service; my health to better living for my home, my community, and my country."

HOW TO LIVE LONGER

State of Pennsylvania

"Breaking" the Kitchen

A FAVORITE sport of the two weeks' vacation sojourner is to attempt to "break" the hotel kitchen. On the theory that the eat-what-you-please plan is an invitation to exhaust the food supply many guests, if actions may be interpreted, are quite convinced that their capacities are equal to the challenge.

Vacation stomachs consequently are anything else but stomachs on vacation. In reality they are afflicted with gross abuse every time their owners are at table.

Admittedly, eating can be raised to the status of a high class pleasure. But there is no "class" at all in turning this natural body function into a low sport. Which is exactly what happens when fat dowagers, corpulent men and even average people consistently attempt to embarrass the food stock of a resort hotel.

And what is true of these dining room indiscretionists also applies to others who, while temperate at the hotel, commit a similar crime by stuffing themselves and their children between meals with all sorts of edibles and drinkables.

Most certainly one does not want to be disciplined too much when on the annual pilgrimage. And there really is no need for it. Even luxuries have their place. Palatably cooked food has its right to reasonable attention, also. But to make eating the main joy of an outing is to overlook the real advantages of fresh air, rest and mental change.

Therefore, eat reasonably. Enjoy what you eat to the full. But don't try to "break" the hotel kitchen. You can't do it. Moreover, conceivably you may break yourself in the attempt. (© 1929, Western Newspaper Union.)

**Mont Blanc Is Advertised
 Light of the Mind
 Thinking Big and Small
 An Ancient Dread**

Francis H. Sisson, vice president of the Guaranty Trust company, repeats what has often been said here, that the big problem is not production, but distribution.

Business is on the up grade. Mr. Sisson does not agree with that distinguished political economist, Solly Wertheim, who says, "Business is looking up, flat on its back, looking-up."

Mr. Sisson reminds merchants that with adequate advertising goods can be sold at a lower price than without advertising.

First, have what the people want, then let them know you have it.

Consider Mont Blanc, nice mountain in Switzerland.

One million and eighty thousand people visited Mont Blanc last year, spending more than \$10,000,000 in little communities near the mountain. Only 100 climbed to the top.

We have bigger, better mountains, but they don't get the advertising that Mont Blanc gets, and they don't take in the money.

It is true that established reputation helps Mont Blanc. It is also true that advertising helps to establish reputations, and keep them established.

There is no better work than distributing good books. They are the light of the mind, stimulate ambition, develop good taste, prepare men's minds for service in the present by making them acquainted with the achievements, discoveries and services of the past.

Maj. George H. Putnam, veteran of the Civil war, and a most distinguished veteran of the book publishing profession, now dead at eighty-five years of age, represents public service in a high degree.

New York's police force includes a "radical squad," selected to deal with rebellious radicals.

Planning that squad in days of extraordinary prosperity, somebody was looking far ahead.

As a rule, prosperity is more effective than poison gas in dealing with radicalism.

In the clash between unemployed radicals and police in New York, the photographs show women struggling and fighting more violently than men. Nothing surprising in this. When women believe anything they believe

it more violently than men. And when they believe, nothing is important compared with their belief, and they care little what happens to them.

Henry Ford will say in Capper's Magazine for April that "It is just as easy to think big as it is to think small."

It is, after you get a start. For instance, in 1859, seventy-one years ago, John D. Rockefeller, who began working as office boy for \$15 a month, started for himself as a commission man. He began "thinking big." He had accumulated \$17,000 in 1862 and took a partner, Maurice B. Clark. They invested their money in a crude oil "refinery" in Cleveland.

That was the beginning of "thinking big."

In 1865 Mr. Rockefeller, who is now approaching his ninety-first birthday, and was then twenty-six, bought out his partner for \$72,500. Standard Oil corporation papers were signed on January 10, 1870. Standard Oil is now sixty years old.

John D. Rockefeller has been "thinking big" ever since.

His best "big thinking" has been devoted to the fight against disease. Instead of using a few dollars to relieve individual cases, he uses tens of millions to eliminate disease permanently.

Signals to protect pedestrians from automobiles are to be installed in big cities and "amber colored" lights were suggested. The police say: "We will pay no attention to any red. That makes them stop."

Why is it that red impresses men, and even the lower animals? Is it, perhaps, because men, for forty million years, and animals through hundreds of millions of years before man came, have known and inherited one great dread, the red blaze of a forest or prairie fire?

The national industrial conference board tells you that the wealth of the United States amounts to three hundred and sixty billion one hundred million.

It sounds a lot, but it is only \$3,000 for each American, with about \$500 extra for New Yorkers. That isn't enough.

Human machines alone, leaving out mines, real estate, factories, are worth more than three hundred and sixty billions.

This land and its people are worth whatever science and industry choose to produce—certainly not mere billions, but trillions.

Taxes may be bigger.

President Hoover warns congress that it is inclined to spend money too freely. An increase of 40 per cent in taxes might follow any too liberal appropriations.

(©, 1930, by King Features Syndicate, Inc.)

Equinoctial Storms

The weather bureau says that there is no reason why storms should be more frequent or severe at the equinox, nor, in fact, are they. The whole notion about equinoctial storms is erroneous, and it even is uncertain how, when, where or by whom the idea was started. The bureau only knows that in one form or another it goes back at least to 1748.

Negro Babies

The pigment which gives the typical African his dark color does not develop fully for several weeks after birth. New born infants of this race are usually reddish chocolate or copper in color.

Up-to-Date Lament

'Twas the night before pay day and all through my jeans I hunted in vain for the price of some beans. Not a quarter was stirring, not even a jit; the kale was off duty, milled edges had quit. Forward, turn forward. Oh time, in thy flight—make it tomorrow, just for tonight.—Pacific Power and Light Bulletin.

"Wonderful Is Konjola," Says Muncie Lady.

III For Seven Years-Tells How
New Medicine Gave First
And Only Relief.

MRS. EVA SOLLARS.

"I suffered from rheumatism from the time I was sixteen years old," said Mrs. Eva Sollars, 523 East Wyssor street, Muncie. Whenever the weather changed I was sure to feel sharp stinging pains through my entire body. Only sufferers from this dread ailment know what I went through. I tried many medicines and treatments for this malady but nothing helped. My nerves were worn out and my system badly run down.

"A brief treatment with Konjola showed me that I was on the right track. As I continued with this medicine the pains of rheumatism gradually left me. No one will ever know my gratitude to Konjola for all that it has done. My entire system has been built up and I am stronger and more energetic than I have been in many years. My household duties are a pleasure and I am enjoying my life to the fullest. Wonderful is Konjola."

Konjola is sold in Mentone at Shafer & Goodwin drug store, and by all the best druggists in all towns throughout this entire section.

POULTRY

BEST LITTER TO USE IN BROODER

Shavings, Cut Straw and Cut Hay Meet With Favor.

One of the commonest questions asked of the poultry department of the New Jersey agricultural experiment station during the spring is, "What is the best litter to use in the brooder house?" For the benefit of all poultrymen who are troubled with this problem the station issues the following statement:

There is no best litter, but there are certain requirements that litter must meet in order to be satisfactory for use in brooding chicks. These requirements are that it should be: Light in weight, thus allowing the droppings and dirt to work to the floor so the chicks are not likely to pick up contaminated material; absorbent, and therefore capable of keeping the brooder house floor dry; cheap, so one can afford to replace it every five days after the first four weeks; and clean, which means freedom from mold, mustiness, and dust.

Shavings, cut straw, and cut hay meet these requirements. They are not the only materials that one can use, but they are among the best. Straw or hay used for litter should always be cut. If the straw or hay is not cut it becomes matted and covered with droppings, and is therefore of no value for litter.

Bacillary white diarrhea, coccidiosis, and intestinal worms are spread to a large extent by the use of dirty litter, the experiment station warns. One rule in brooding chicks that should be followed, if all others are forgotten, is: "Clean the brooder house every five days." This means removing the litter, sweeping the floor of the brooder house, and putting in clean litter.

Produce Good Pullets at Reasonable Expense

At the Pennsylvania state college 926 pullets were raised to maturity at a cost of \$1.26 per bird after deducting the returns from 924 cockerels. Most of the chicks were leghorns valued at twenty cents each. The cost of production included feed and coal, labor at thirty-five cents per hour, and interest at 6 per cent on the investment in equipment, feed, and chicks.

The pullets were also charged with depreciation on the houses at 5 per cent and the depreciation on the equipment at 10 per cent. Undoubtedly the results in brooding and the mortality rate were very satisfactory to produce good pullets at the laying age at a cost

of \$1.26 per bird.

Many poultrymen sell leghorn pullets at eight weeks of age at about \$1 each. At three months of age they are worth about \$1.25 to \$1.50 each. Pullets that are ready to lay are seldom sold by poultrymen for less than \$2 to \$2.50 each unless they have a surplus.

Poultry Facts

It is also generally considered better to feed all rations dry rather than wet for turkeys.

Watch the old hens in your poultry flock. They are dangerous spreaders of poultry tuberculosis.

Milk, sour or sweet, is excellent for breeding stock. Beef scrap or other animal meal may be left out if a plentiful supply of milk is available.

Feed and protection aid in keeping turkeys fit. Vitamine A supplied in yellow corn, cabbage, alfalfa, clover, and most greens, increases resistance to colds. Cod liver oil also is beneficial.

As a sanitary measure place a disinfectant mat at the entrance to the brooder house. This mat can be made by filling a square box with gunny sacks soaked in some reliable disinfectant.

Isolate all birds from the poultry flock as soon as they show symptoms of disease. Then decide what method of treatment to follow.

Many turkeys are graded as number two or thrown out entirely because of failure to starve them out properly before dressing.

Small eggs produce small chicks, and these should not be incubated. Eggs uneven in shape are not suitable, nor are extremely long and very short round eggs.

The practice of reproducing the flock with eggs laid by hens insures a better quality chick than breeding from pullets.

Red mites may cause a drop in egg production. A satisfactory treatment for the pests is to paint the roosts and roosting cabinet with carbolineum.

In commercial poultry plants where fowls are kept in quite large numbers, the artificial lighting of the houses, morning and evening, proves profitable during the winter.

Old Language and Custom

Manx, the Gaelic tongue of the Isle of Man, in which language a new edition of the prayer book was printed in the middle of last century, is now spoken by hardly more than 100 inhabitants of the island. The titles of the laws of the island's parliament of "House of Keys" are still read each year in English and Manx from the place called Tynwald.

Analyzing ...YOU...

With the New Science of Syllabics

By C. J. COFFMAN
Dean of All the Enumerators

Catherine

"Beset around, and harassed,
With doubts and fears of yore,
By present ties embarrassed
You are what's gone before."

If you believe in reincarnation, Catherine, you can explain to yourself much better the aspirations and desires that surge up within you.

Proud Catherine.

Before you in this world of ours, there have been five English queens, two French queens and two Russian empresses who bore the name of Catherine. Doesn't that intrigue you a little?

And then, too, Henry VIII, during his lifetime, married three separate Cathelines, one of whom he beheaded. But that's not nice for this story and we hope that you were not any of these, in former incarnations.

Of the twelve Cathelines mentioned prominently in history, I am sure that none of them bore themselves more proudly, or could carry themselves more finely, than you.

Now you can use, or misuse, this faculty of pride. Rightly used it becomes self-respect, force of character. Wrongly used it becomes egotism, conceit and arrogance.

The reason I am analyzing you in particular, Catherine, is so that I can help you to get the best out of life for yourself. There is one little art in this that may be very helpful, and here is your formula:

Be very humble within, when in the presence of anybody who can teach you some one thing. (ANYbody can teach you SOME thing.)

The other part of the formula is to be very strong and vigorous in your nature when you are teaching anyone else, because the more you appear to know what you are talking about, the better the other person can learn it.

According to the ancients there are syllables in your name which indicate the ability to pray effectively. Other syllables indicate the increase of that prayer. Catherine, you can have anything you want, if you will study how to bring yourself into conscious realization of the contact of your soul with the higher sources.

Political Announcement Under This
Heading to Run Until the
Primary \$1.50 Each.

FOR SHERIFF

This is to advise the voters of Kosciusko County that I will be a candidate for Sheriff of said County, subject to the Republican Primary to be held May 6th, 1930.

Harley D. Person

Odd Tax Payment

Among the peculiar local taxes in Sark, one of the Channel Islands, is one which is paid in chickens by each house according to the number of chimneys it possesses.

Odd Plant

The plant coral root has neither root nor leaves, being a cluster of underground stems and an upright branch which is a few inches high and bears a number of purplish flowers.

The Reason

We get so many eggs from Mentone Producers is because we are in a position to pay the most for Quality Eggs. And then Our Quick Returns is

Another Factor

That makes friends among the shippers and causes so many to ship their Finest Eggs to us.

An Investment When you spend your money with your home merchant it helps to make a live town—a good live town increases property values That Pays Dividends

COMMUNITY SUPPORT

The time is arriving when the Junior Class entertains the Senior Class in our high school. The customary practice is to take the class out of town to entertain them. The money expended runs from fifty to one hundred dollars. This fund has been created by selling refreshments at games and by giving plays. The people of this community have been the principle customers. Why not keep the money at home? Just as good food will be found. Just as much fun will be had and the cost will be less.

Another expenditure of the high school which could be kept at home is in the purchase of basket ball sweaters. Although there are at least three dealers in Mentone who would be glad to have this business and could handle it as economically as buying from a traveling salesman the sweaters were not bought through local channels.

The above article was handed to us by one of our leading citizens, and we believe that it expresses the sentiment of every business man in Mentone. The class of '30 has a chance to establish a precedent that will gain for them many friends in this community by breaking away from the notion that nothing is good enough for them in Mentone, and instead of spending their money with people who have never given them one penny support, play the game fair and patronize the home town whose business men have supported their activities and supplied the money to pay for the banquets, etc.

Here is a chance for the parents and teachers to exert their influence and convince the graduates that living up to the "Golden Rule" is the best policy.

NORTHERN INDIANA TELEPHONE COMPANY GETTING WHAT IS COMING TO THEM.

Wabash Co. Residents Granted Right to Install Poles on Highways.

Wabash, Mar. 5—Indications that the Northern Indiana Telephone company is not going to get back all of its former subscribers as it had hoped was seen today when the county commissioners granted a petition to 54 residents in the northern part of the county to install telephone poles along the public highways in that section of the county.

The petitioners said that it was their intention to start a non-profit and co-operative telephone line for their mutual benefit and service as well as service of others who might move in the territory through which the lines will run.

Those who signed the petition were Charles Roher, Lloyd Mishner, S. W. Clevenger, Luther Brubaker, Albert Niccum, Dan Frantz, Albert Niccum, Roy Bechtol, H. O. Grossnickel, G. M. Grossnickel, S. A. Haines, John Baker, T. J. Johns, I. W. Steele, Roy Stucker, Roy Zimpleman, R. G. McNear, John Keister, Clarence Penrod, Roy Ruse, C. D. Delauter, Albert Niccum, Ora Goodwin, Carver Smith, Alvin Bolinger, J. W. Hoover, A. B. Caskey, R. D. Allisbaugh, S. H. Shively, H. B. Weddle, O. A. Kanower, C. H. Hockensmith, Dewey Hockensmith, Simon Neher, Ralph Shock, W. B. Protzman, C. D. Miller, Arthur Tyner, Frank Maurer, F. P. Freeman, D. I. Hecathorn, Walter Pratt, Homer

Thomas, Russel Werking, Arthur Coblentz, Vernon Enyeart, Robert Fitch, George Enyeart, O. W. Cox, Ira Aughinbaugh, S. T. Breeding, Millard Schaaf, E. N. Meek, and O. F. Tully.

It is our opinion that when the farmers once learn that under the law they will be allowed to build lines for their own convenience and not for profit—being strictly mutual—with no tolls or rentals, they will quickly take advantage of the same and mutual phone lines will sweep the territory covered by the Northern Telephone Co. like wild-fire. About thirty years ago the Bell Company had the idea that the sky was their limit when boosting phone service, and the result was the whole country was quickly covered by mutual companies. History usually repeats itself about every so often and we believe that the time is about at hand in the telephone game.

It will be a good plan for the farmers in this locality who are in favor of getting cheaper and better phone service to get busy with petitions and get the right-of-way for the erection of poles granted by the county commissioners and thereby be in a position to fall in line with other communities in this movement. Delay in this matter will give the present rate grabbers a chance to devise some method of throwing a wrench in the machinery.

NO HARD TIMES IN SPORTING CIRCLES.

The fourteen schools that participated in the county basket ball tourney will divide \$1,505.00, the net profit of the recent tourney held at Warsaw.

The above news item is all right and we are glad that the schools have this nice melon to carve, but when we stop to think that the whole country is crying hard times, no work, millions out of employment, eggs at twenty cents per dozen and wheat at the dollar mark, and every paper that you pick up will tell on its sporting page what record breaking crowds are attending all sporting events does it not set you to thinking that we are going to the extreme in pleasures of this kind?

The gross amount taken in at this tourney was \$2,355.50, and we believe that we are safe in saying that one half of the people who contributed that large sum owed either butcher, grocer, baker or the coal man, and that instead of paying their just bills they paid the above amount together with a couple of thousand more for incidentals and a thousand days time for something they could just as well have done without.

We believe if the money that has been spent on sports during the past winter had been used in the proper channels—paying debts—there would be greater prosperity, more work and business would be on a sounder basis.

When you spend money on sports you get nothing and nothing has been created. But when you spend your money for something of service, you usually get value received, and someone receives money for the producing the article.

There is absolutely nothing wrong with this country—we were never in a position to have better times than we have right now. The whole fault lies right with ourselves—so let's cut out a portion of our expense that consumes nothing but time, get down to hard work, and if we have money in our pockets and owe a bill that is due, pay it at once, the money is our creditors and he should have it.

All these little flurries in the business world are purely psychological, and if every person who owes a dollar that is due will pay it instead of hiding his money, everything would be on the boom in less than two weeks.

SHERWIN-WILLIAMS PAINT HEADQUARTERS

Washable walls of lasting beauty at small cost

Specify S-W Flat-Tone and engage a good painter

Here is a washable flat wall paint of velvet softness! A wall paint with wonderful body that thoroughly hides the old surface and covers more square feet of wall per quart—yet costs no more than other wall paints.

Think of what it will save you in redecorating costs. Soap and water will restore the rich fresh beauty of its colors year after year. Come in and let us show you the wonderful effects that can be obtained with this modern wall paint—the rich costly Spanish leather effects and velvety multi-colored walls. Now they are within the means of anyone.

S-W Paint Products are sold the world over under this famous trade-mark

FRIDAY AND SATURDAY SUGGESTIONS

S-W Flat-Tone

A washable flat wall paint for interior decorations on smooth or sand finish plaster, wallboard and other interior wall surfaces. Spreads easily under brush. Dries without streaks or brush marks. Produces beautiful velvet finish. Can be repeatedly washed.

Price per quart . . . **90c**

S-W Floor Enamel

A beautiful enamel finish for wood, concrete or linoleum floors. Withstands daily scrubbing and tramping heels.

Per quart **\$1.00**

S-W Enameloid

The world's finest rapid-drying decorative enamel. Ideal for woodwork, furniture, toys, etc. Wide range of charming colors.

Per quart **\$1.80**

S-W Mar-Not

A water-resisting floor varnish made to withstand tramping heels. For oak, light maple, birch or linoleum. Per quart . . . **\$1.45**

SWP House Paint

The world's best house paint. Covers more surface per gallon. Costs less on your house. Lasts twice as long. Regular colors, . . . **\$3.50**

Shafer & Goodwin,

The Big Drug Store on The Corner

Hope You Were Pleased

With the sample book of Wall Paper designs we recently sent you and that we may soon have the pleasure of showing you the complete line of the better grades that were not included in the sample books. Our line ranges in prices from 4c a single roll to \$1.00 and the designs are more artistic than in former years. Come in and see the patterns and get our prices.

Remember We Can Furnish

You with any item in the paint line, varnish stains, paint in small cans, enameloid any size and color and Varnishes, all of the Sherwin-Williams Quality.

Shafer & Goodwin

The Corner.

BASKET BALL TEAM ENTERTAINED

The members of the Mentone Basket Ball team, coach and family and some friends were very pleasantly entertained at the Vernon Jones home, at a 7 o'clock supper, Thursday evening, March 6th, by Mr. and Mrs. Vernon Jones Mervin Jones and Mr. and Mrs. Fremont Fisher.

The guests were lead into the dining room, which was beautifully decorated in orange and black streamers where a large table was heavily laden with good things to eat. All were asked to find their places, which were marked by place cards. After all were seated each was asked to read the back of his place card on which was written some comical expression regarding the tourney and was very laughable for all.

After everyone had eaten a very large supper of good things upon the table, another course consisting of ice cream and angel food cake was served, and to top off the good supper, the third course was served, which proved useful to all, being tooth picks.

It seems that the Jones family have owned a large capon, which they have been keeping for this supper.

The remainder of the evening was spent in playing games. All departed at a very late hour, thanking the hostesses over and again for their wonderful supper and good time had by all.

Those present were: Donald Vanguilder, John Mathews, Edgar Igo, Walter Barkman, Elery Nellans, William Blue, Mr. and Mrs. Ronald Goshert and sons, Lewis and Billy, Mr. and Mrs. Champers and sons Charles and Frank, Mr. and Mrs. Fremont Fisher and son Charles, Mervin Jones, Miss Goldia Neidlander and Mr. and Mrs. Vernon Jones and son Paul.

It was impossible for two members of the squad, Walter Fenstermaker and William Barkman to be present, which was regretted by all present.

Analyzing ...YOU...

With the New Science of Syllabics

By C. J. COFFMAN
Dean of All the Enumerators

Charlotte

Charlotte, you represent the secret sign. It is up to you to determine

Adaptable Ear of Charlotte.

what kind of a sign this shall be. An old Greek rendering which uses your first syllable, CHAR, meant gladness and joy.

But no one must accuse you of lightness or frivolity, for a still more ancient use of your CHAR, indicated strength in anger.

These two meanings will show you why you can make your own choice as to the use of the powers in your name.

If you feel quite modern in your attitude of mind, you can give dignity to very flapperlike costuming. On the other hand, if you love the ancient, you are capable of giving a very demure and modern effect to old ideas in dress and toilettries.

You can even display these versatilityes without making any effort on your part. Anyone who can read character would know it by looking at your ear with its adaptable nature displayed too clearly.

Adaptable indeed is this ear, from deep study and scholarly attainment, to the more frivolous "life of the party." Taken all in all, you are the secret sign of attainment, Charlotte.

Your chances of success will be very much by yourself, in the way you take hold of things, or fall to.

In another day, a Charlotte came, gentle, refined and beautiful, to free her people from a tyrant. She was Charlotte Corday, of whom you have no doubt read in your French history. What she did was not nice, but it was effective.

Or, with your adaptability, you might write and emulate the success of Charlotte Bronte. With your keen observation and good expressive powers, you are quite capable of writing effectively.

(© 1930, Western Newspaper Union.)

Grandmothers at Twenty-Two

In India there are more than 8,000,000 child wives, of whom nearly 4,000 are under five years of age. Nearly 30,000 girls under five are widows, and it is not uncommon to find girls who are grandmothers at the age of twenty-two.

Antiques Always in Demand

Antique shops have been known from time immemorial. One has been unearthed among the ruins of ancient Pompeii.

A man's full name should be the same name he uses when sober, but occasionally it isn't.

Not that we are in the position of having to know, but whatever became of coffee ice cream?

It wasn't so many weeks ago that a lot of people were complaining because the weather was overwarm.

Because it is good news, this paragraph never grows old: Peace has broken out again, in China.

We suppose the editor of the Congressional Record doesn't even know what a blue pencil looks like.

Amateur theatricals are pretty bad, too, but we guess the worst of all is an amateur job of job printing.

"A taxi driver in Paris won a recent eating contest by devouring 41 eggs." He's no taxi driver, he's a taxidermist.

These transition skirts, short in front and long in the back, remind us of the old saying, "Good God, and good devil."

Statistics are those authoritative and conclusive figures which merely strengthen woman's intuition to the contrary.

Every family has one: The telepathic friend who invariably phones just as you are well under way in the bathtub.

If you should happen ever to meet it in a social way, the full name of the newly found flu germ is Pleomorphic Streptococcus.

When the office skeptic hasn't anything else in particular against a politician he says of course somebody else is writing the speeches.

They can food, they can heat, they can music, but they can't can time to be placed on the shelf and used when it happens to be needed.

We have also asked our congressman for a probe of what the hotels do with the many million small cakes of soap which are used once.

The beauty of these dollar-and-a-half watches is that the more you drop them on the stone sidewalk, the better time they seem to keep.

In spite of all they can do with a pie, we will say for restaurateurs that they never have tried to get three halves from one grapefruit.

Adults learn faster than children, says an educator. So there may still be hope that dad may get a passing grade in Johnny's homework.

Skirts are already so long again that Dora spends only half as much time as formerly wondering whether the seams in her stockings are straight.

A GOOD Place To Do Business.

Our facilities offer every convenience for the transaction of business and personal banking. Prompt courteous service.

Founded in 1892

Capital \$75,000.00.

Surplus and Profits \$56,000.00

Farmers State Bank,
Mentone, Indiana.

And what has become of the old-fashioned movie showing a fellow filling a telegram at a Western Union office, followed by a closeup of the message, on a Postal Telegraph bank?

"Do you own a radio set?" asked the 1930 census taker, that being one of the questions he is required to ask. "No," replied the apartment dweller, "I live with several, but I do not own one."

"What makes children noisy?" inquires a columnist. They need to develop lung and leg power so they will be able to compete with the self-advertisers and dodge the automobiles.

All is not so well between Brother Charley and the new flame: It appears he picked up her family album the other night and remarked, "Why, Baby, I didn't know you cared for cartoons."

The latest telephone novelties are a connection with a steamer at sea, and a long distance wedding of a Texas girl and an Ohioan. Imagine getting a wrong number, and finding you have married the Leviathan!

The ties of a common tongue are a great aid to understanding, of course, and still a British detective story is always twice as mysterious to us on account of the custom of calling the second floor of a house "the first floor."

ORCHARD CLEANINGS

WINTER DAMAGE TO RASPBERRIES

Canes Are Wholly or Partially Killed in Fall.

Winter injury on raspberries consists of the canes being partially or wholly killed some time after the plants have stopped growth in the fall. The tips of the canes are usually affected first, because this portion of the cane is the youngest wood. The extent of the winter injury is probably dependent on two factors: first, the state of maturity of the canes, and second, the degree of the fluctuation of the temperature. If the plants go into winter with a large amount of soft young wood the amount of injury is much greater than where the wood has had time to mature. Since the wood that is designed to bear the fruit is nearest the tip of the cane, it frequently is responsible for crop failures.

Such dead or injured wood affords a splendid point of entrance for wood parasites which continue the destruction of the living wood. Thus we often find the disease called cane blight, *Coniothyrium fucellii*, which occurs as a follower of winter injury.

The most practical way of preventing winter injury that has been observed is to lay down the canes in the fall and cover them with dirt. This may be done with a spade or by throwing two furrows together, thus burying the canes in a ridge just over the crowns of the plants. This practice has been observed to effectively prevent winter injury. If this practice cannot be followed, then every effort should be made to bring the plants into the winter condition with the minimum amount of immature wood.

Winter Pruning Points From New Hampshire

The New Hampshire station gives the following advice:

The swivel saw is becoming most popular for ordinary pruning work. Whatever implements are used, they should be kept sharp and make a clean cut, without leaving a stub.

In pruning old trees, care should be taken to thin out the small wood in the outside of the tree in order to admit more light. Thinning out the tree is a valuable help in scab control, and also keeps the tree more thrifty and productive. By pruning trees in winter fruit growers can help avoid a rush in the spring work, and December is ordinarily a time when the job can be done to advantage.

If any trees are affected by canker, all tools should be disinfected after

cutting with a solution made of one 7.3 grain tablet of bichloride of mercury in a pint of water.

Control Scale Insects by Use of Lime-Sulphur

The common material used in control of all scale insects is lime-sulphur. This is a combination of stone lime and flowers of sulphur in water which, when applied to scale insects, cuts off the air supply and smothers them. Spraying for control of scale must be done at this time of year, as the material is highly caustic and will burn the foliage if applied when the plant is in leaf.

The formula is one gallon of commercial liquid lime-sulphur to eight gallons of water. Dry lime-sulphur may be substituted for the liquid where only small quantities of spray are needed. Use it at the rate of 12 or 15 pounds to 50 gallons of water. These quantities, both liquid and dry, may be increased or decreased in proportion to the amount of material needed.

Horticultural Notes

Make sharp clean cuts. Don't leave stubs.

Cut out all dead, diseased or insect-infested wood and burn it.

Do not allow fallen fruit to remain under the trees to harbor insect pests.

The first thing to learn about the red raspberry and the point to keep in mind all the time is that it suckers, like quack grass.

There is an old saying, "Prune when the knife is sharp," meaning of course that any old time is the time to prune. Fruit men know better nowadays, and confine their pruning work largely to the winter season.

The scale infests plums, peaches, cherries, apples, pears, raspberries, blackberries, gooseberries, currants, roses, lilacs and other shrubbery of like nature, also most of the shade trees.

Spraying for the control of scale must be done before the buds have opened as the solution is very caustic and will sear or burn the foliage, if in leaf. It is also very hard on hands, and heavy leather gloves should be used, else the hands will soon begin to bleed.

Clemenceau's Sobriquet

Emile Bure, editor of L'Avenor, a Paris daily, is quoted as saying that he is probably responsible for giving Clemenceau the sobriquet, "The Tiger." Clemenceau had been attacked in a political article and called as "fierce as a tiger." Bure adopted the term in amusement, but it grew into a nickname that was in general use.

LIVE STOCK

MARKETING FARM PRODUCTS EASIER

Co-Operative Principle Seen as Solution of Problem.

Co-operative marketing of farm and ranch products was viewed as the ultimate solution of the chief problems of distribution now facing American agriculture by Cecil W. Creel, director of the Nevada agricultural extension service, in an address before the Western Cattle Marketing association assembled in San Francisco.

"The passage of the agricultural marketing act of last summer, the subsequent creation of the federal farm board, and the setting up by this board of national producer-owned and producer-controlled marketing associations is sufficient evidence, I believe," Creel stated, "that the co-operative marketing principle not only is justified, but now has the support of intelligent public opinion throughout the length and breadth of the land."

Pledging of assistance to the federal farm board in its program of organizing national co-operative agencies, the Nevada director stated, means that the co-operative movement will have the aid of county agents, county farm advisers and other extension workers in the various states.

Creel, who is chairman of the range live stock committee of the extension workers in the 12 western states, told the cattlemen what the extension service is doing to help the stock-raising industry.

Credit, in part, he said, for the study of public lands in the western states about to be inaugurated by the commission recently appointed by President Herbert Hoover is due extension workers in the West. At their meeting in Tucson in 1924, the western men proposed such a survey, with particular reference to the range live stock industry, and have repeatedly called it to the attention of officials in Washington.

Feed Value of Cooked Potatoes Equals Silage

In years like the present one there is considerable interest in the value of potatoes for live stock feeding. When the price of potatoes is low it is often advisable to divert a portion of the crop in order to obtain a reasonable return for the remainder.

Feeding tests have been made at a number of experiment stations, and results indicated that pound for pound corn silage, made from mature corn and potatoes are approximately equal. In feeding potatoes they more nearly take the place of corn silage than any

other feed because of their succulence. If the culls and unmarketable potatoes are used any returns from feeding them would be in the nature of clear gain. When the lower grades of potatoes bring anywhere from 20 to 25 cents per bushel at the loading station it probably is advisable to use them for feed.

Spring Lambs Pay Best, Says Stock Specialist

Early lambs sell highest. Fat spring lambs sold 3 cents higher last June than they did in August. Prices were still higher in May, says E. T. Robbins, live stock specialist at the University of Illinois.

This plan of lamb raising reduces chances of loss due to stomach worms and the lambs also escape the hot weather which slows up their gains. They bring in cash much earlier, too, as well as bringing more of it. Warren Moffett of Macoupin county sold 11 early lambs last spring for \$35 a hundred, sending them to the St. Louis market. They averaged 60 pounds each, bringing him \$21 a head. Moffett puts his ewes on rich pasture a month before mating them and starts feeding grain two weeks before.

Legumes for Lambs Are Successful at Illinois

A four-year feeding test recently completed at the Illinois College of Agriculture emphasizes the importance of legumes in fattening lambs. An example of the successful use of legumes for this purpose is shown in one report of nine lots which were fed corn and alfalfa hay and gained 100 pounds for every 350 pounds of corn and 453 pounds of alfalfa hay fed. Self-feeding of corn was found to result in considerable losses. However, self feeding of a mixture of ground corn and ground alfalfa hay proved a safe method of feeding and produced faster gains and better finished carcasses than hand-feeding. Corn alone did not prove satisfactory.

Eradicate Lice

A mixture of one-half powdered sabadilla seed and one-half sulphur rubbed into the hair of horses or cattle is a fairly satisfactory means of ridding the animals of lice. When the weather becomes warm enough so that the horse can be washed without danger of his taking cold, it would be preferable to give him a thorough washing with a stock dip solution. These stock dips, if used according to directions, will not cause the hair to come out.

One Point of View

No investment pays larger dividends than unselfish deeds of kindness

Named by Franklin

Benjamin Franklin gave the Gulf stream its name. He published a chart in 1770 representing his theories as to the course of this ocean current.

A MISTAKE .

In an article on another page in relation to the new school building it should have read "Harrison Township" instead of Franklin.

MENTONE NEWS ITEMS

Miss Isabelle Swick spent Saturday in North Manchester.

THE COMMUNITY FARM NEWS

SODALES CLUB MEETING.

The Sodales Club met for their regular meeting March 6th, at the home of Gladys Carter with Miriam Shinn acting as assisting hostess. The meeting was called to order by the president Cora Vangilder. Roll call was responded with "Ye Old Time Schools, Bring Old School Pictures." The sec'y. report was read and approved. We had a very interesting talk given by Yolande Riner on "Old Coverlets" and we also enjoyed her display of coverlets that she brought with her. We enjoyed having as our guests for the afternoon, Mrs. Ellison of Winona Lake, Mrs. Klingel of Warsaw and Mrs. Nellie Reed. Mrs. Ellison gave a splendid talk on "The Federation of Club...". The hostesses served dainty refreshments on small tables decorated in keeping with St. Patrick's Day. After which the members adjourned to hold their next meeting with Wanda Davison on March 20th.

Beaver Dam Junior Class Play.

The Junior class of Beaver Dam High School will present their class play on Friday evening March 14th. The play is a clever comedy of three acts entitled "Billy's Aunt Jane." Billy is a very intelligent college lad and one of the most popular students on the campus. Everything goes well until Billy's aunt, who is financing Billy in college becomes financially embarrassed and writes Billy that she must mortgage the farm to keep him in college. At the next vacation Billy goes to aunt Jane's farm determined to help her out of the financial difficulties. He takes with him one of his college professors and a host of college friends, who are to spend their vacation there.

Come out and see "Billy's Aunt Jane"; see the marvelous developments that take place in one short summer. Everybody is invited. The admission will be 25 and 35c.

BIRTHDAY PARTY.

A birthday party was given Sunday in honor of Bert Holloway at their home south of town. Those present were Mr. and Mrs. David Holloway, Mr. and Mrs. Wallace Hilschman, Mr. and Mrs. Raymond Hilschman and sons Devon and Robert Mr. and Mrs. John Fenstermaker and Mr. and Mrs. Ray Dillingham and daughter Georgia.

Finding Trouble

It is true the man who is looking for trouble can always find it, but the man who isn't looking for it occasionally stumbles into it, too. That is why it isn't always wise to trust altogether to luck.

TALMA NEWS ITEMS

Mrs. Wm. Brown spent the week end with her sister Mrs. Nellans of Plymouth.

Mr. and Mrs. James Myers spent Sunday with Mr. and Mrs. Wm. Grass of near Warsaw.

Mr. and Mrs. Charles Flagg of Rochester spent Sunday evening with Lloyd Zent and family.

Mack Alspach Lucetta Mickey and two daughters Miram and Betty were Sunday guests of Blanche Darr and family.

Mr. and Mrs. Raymond King and son Howard of Elkhart visited with the former's parents John King and family last Sunday.

Mrs. Obe Haimbaugh is sick at the home of her daughter Mrs. Lloyd Kesler at Warsaw. She was visiting there when taken sick.

Mr. and Mrs. Robert Horn and little daughter and Mr. and Mrs. Harley Zolman and daughters spent Sunday with Mr. and Mrs. Ora Horn.

Mr. and Mrs. Raymond Weirick and children and Mrs. Blanche Darr and son Elmer spent last Thursday evening with Mr. and Mrs. Harry Clymer at their sugar camp.

Lloyd Zent and family entertained last Sunday, Mr. and Mrs. Lon Graham, and John Emes of Bourbon, Mr. and Mrs. Frank Ladd and son John of Warsaw and Mrs. Cynthia Meredith of Mentone.

Works Both Ways

People seem able to stir up a lot of misery in just talking about their health.—Los Angeles Times.

Spanish Idea of Beauty

Longfellow calls attention to the fact that the Spanish people greatly admire "emerald eyes" and celebrate them in song.

In a Nutshell

The material good reverses its benefits the more nearly we clasp it. All life is a lesson that we live but to enjoy in the spirit.

Ask the Surgeon

One of the things medical science might explain is why an operation always seems to loosen up a woman's vocal chords.—Cincinnati Enquirer.

End of War

War will end automatically when the umpire's decision against the home team seems as just as his decisions against the other side.—Rochester Times-Union.

Earliest Levees

The first levees built at New Orleans were begun in 1717. Only small earthen dikes of from 4 to 6 feet in height were then necessary to confine the river at flood time.

Words

Professor Ramsay, head of the English department at Missouri university, says the vocabulary of the average university student runs from 50,000 to 70,000 words. One can appreciate this extraordinary equipment by recalling that Shakespeare did all his stuff with 23,000 words, that Homer charmed the Hellenic world with a much skimpler allowance and that George M. Cohan, lineal descendant, perhaps, of Aristophanes, probably never has had 1,000 words in the bank in his life, says the St. Louis Post-Dispatch. If Professor Ramsay is right the current collegian has the raw material for masterpieces to blow the bards sublime out of the picture. One may wonder, however, how many of those dashing theasurians carry in their portmanteaus what Mr. Hoover has just described as "the good old word—work." If they have, there's no stopping them. If they haven't, there's no starting them. Meantime, we are accepting Professor Ramsay's figures with thousands of reservations.

New Yorkers, despite their hustle and bustle, are a kind-hearted lot, as demonstrated by the establishment of a new organization known as the Tail Waggers, which is no less than a club for dogs—a sort of first-aid post and identification bureau where injured mutts can be taken for treatment and lost pups held for their owners, says the Providence Journal. Each dog is carefully described by its master or mistress, a description card is placed on file and indexed and cross-indexed, and an identification medallion is issued. When a lost puppy is brought to the club it is necessary merely to look him over, note the outstanding characteristics, consult the files and call up the owner. It is all very simple, efficient and kindly.

The population of the continental United States is now increasing at the rate of about 1,600,000 persons per year, or approximately one person every 23 seconds, according to the Boston Transcript. The total increase is made up of the annual excess of births over deaths, which amounts to 1,150,000 and the excess of immigration over emigration, which amounts to an additional 240,000 per year. This year the population will be more than 30 times as great as it was in 1780 and nearly twice what it was in 1890, or only 40 years ago. History records no other instance in which the population has increased so rapidly.

Come On, Science, Help!

Every year science enables us to get there quicker. Now, if it will only provide something to do when we get there.—Buffalo News.

Drip-O-lator
MAKES HEALTHFUL COFFEE

Made in U.S.A. Guaranteed Pure Aluminum

Why Boil the Tannic Acid Into Your Coffee and Let the Delicious Coffee Oils Escape?

That is just what you do with coffee-pot or percolator—you boil OUT the GOOD—boil IN the BAD. Authorities have definitely established that coffee should not be boiled even for a single minute.

The delicious coffee oils, which give coffee its rich flavor and aroma, evaporate when coffee reaches the boiling point. Tannic Acid is extracted only after the coffee boils.

And coffee boils in the bottom of your percolator just the same as it boils in your coffee pot.

In the Drip-O-lator the coffee is made at just under the boiling temperature. The Tannic Acid does not go into your cup of coffee. The delicious coffee oils are extracted but are not evaporated. The full strength and flavor is brought out without that bitter taste.

The coffee is healthful, more delicious, richly aromatic and always uniform. And you save time and coffee.

Don't miss this opportunity to own the most important of all utensils now sold at a popular price.

MEETING WITH SUCCESS.

Mr. O. V. Borger, of the Boyer Fire Apparatus Co. of Logansport, is calling upon the farmers in this community in the interest of the new fire truck. He states that in general that the farmers are enthusiastic over the proposition and that many of them are signing up to defray their share of the expense and secure this modern fire protection. This is as it should be and we urge all farmers to contribute to this enterprise as it will be money well invested.

NOTICE

I will be in C. E. Walburn's office on Wednesday evenings from 7 to 8:30 p. m. and Saturdays from 1 to 5 and 7 to 9 p. m. to take care of mortgage Exemption.

E. A. BLUE.

Or Cold Feet

No matter how clever a doctor may be he cannot cure swelled heads. — South Bend Tribune.

Candle Made to Fit

Any candle may be made to fit a candlestick if dipped into hot water long enough to soften the wax.

Snake's Meals Infrequent

The great constrictors such as the python and boa take a long time to kill and prepare a meal and still longer to swallow it. Digestion goes on for many days, and even in a country full of game, a constrictor does not kill more than once a month.

DR. YOCUM IMPROVING

We take the following from a letter received by Mrs. H. C. Thompson the first of the week from Mrs. Yocum in which she says:

"The Dr. was seriously ill but is beginning to stand on his foot a little. If you look at the card Dr. wrote to H. C. T. this evening to enclose in my letter you will see a number of red buildings which belong to Infirmary organization (Baptist by denomination) and I marked an x which represents his room. One of the nurses—the 2nd, dietitian Miss Yokel was a graduate with Winifred Clark at Battle Creek and remembers her so well and knows some folks at Silver Lake and is quite fond of us and we like her too. She takes every opportunity to come to our room. Another one is from Kankakee. She is the head dietitian and because we are all from up that way they fix the Dr. Yocum's tray with care. I am taking work under them in the diet kitchen and they give me all kinds of privileges. The helpers are mostly "coons and coonesses." I really like them because they know their places and do their work but have to be watched of course. They will do anything for the Dr. by tipping them a little and are not very high priced either. We have an apartment on the 2nd floor front and very comfortable. Maurice and I take our meals at our rooms now since the Dr. is better and drive back and forth three miles away. It does not seem far any more. The weather is fine and flowers in bloom. We are glad to escape the weather and mud in Indiana but miss the old neighbors."

The doctor adds "I think I will be out of this place next month."

Length of Average Step

The natural walking pace of the average man in average level country is 30 inches in length.

Success Suggestion

"Do what you like and like what you do afterward," says a correspondent in Farm and Fireside.

Good Advice

Into the well which supplies thee with water cast no stones

Too Deep for Him

"I've been planting rhubarb roots and sweet potato roots and strawberry roots for well onto forty years," grumbled Farmer Jones. "but consarn if I know them Greek and Latin roots that fool boy, John, writes home from college about '—Pathfinder Magazine.

Early Labor Brotherhood

The first labor organization destined to exert a national influence was the Knights of Labor, founded in 1809 by Uriah S. Stephens, a Philadelphia garment worker, and was a secret society, with ritual, grip and password.

BEWARE OF "BARGAIN"

MAIL ORDER HOUSE SEED.

(Purdue News Service.)

Farmers are cautioned by the State Seed Commissioner, H. R. Kraybill to beware of so-called "bargain" seed which is offered by sample from people outside of the state.

A sample of a lot of alsike and timothy seed mixture purchased by a farmer from a mail order seed company in Iowa was recently submitted to the seed laboratory for analysis. The analysis showed a purity of 91.38 per cent and a weed content of 6.27 per cent. The seed contained over 16,000 noxious weeds per pound.

No official Indiana seed label was attached to the seed and since the farmer ordered the seed by mail and made the purchase outside of the state he did not have the protection of the Indiana Seed Law. No farmer should send away for seed unless he does so cautiously and wisely, Kraybill says.

The farmer should protect himself by insisting that all seed which he buys is properly labeled with Indiana State Labels and by buying seed only from reputable and reliable dealers. The seed business is strictly competitive and when seed is offered much below the market price the farmer should investigate thoroughly before buying.

...YOU...**

With the New Science of Syllables

By C. J. COFFMAN
Dean of All the Enumerators

Clara

Your name intrigues me a little, Clara, because the other day in searching through a very ancient manuscript, I came across some Latin and Greek syllables, which made part of your name mean to dig open, to pierce.

Clara's Forehead and Fingers.

Another part of your name indicated a banquet and a good time.

But the startling part was to find another section, I.T.A., meaning adversity, affliction and calamity. This apparent contradiction is borne out in your life by your high forehead and your short fingers, a rare combination.

Now remember, none of these things are fates or destinies. They are influences only, and by telling you about them in advance, I can help you to avoid them.

Besides all this you must remember that the Latin root for Clara is CLARUS, to make clear or transparent, and to free from impurities. This is like our word clarify.

Nevertheless, you can well afford to look cautiously at the tendency of the lives of some other Claras, and their possible outcomes, such as Clara Morris, an actress of former days and our present Clara Bow, today's screen favorite.

Your best career is probably a dramatic one, but in your case it will require a great deal of balance to maintain happiness. Do not let personal ambition run away with both your heart and your head.

Thus, by seeing the deeper things within you, you will discover your power and strength, before being compelled to apply them to the world at large.

If you can be really happy in your work, you can spread lots of happiness, both for yourself and others, but you will find it very difficult to make progress if your heart is heavier than the load you have to carry. (© 1930, Western Newspaper Union.)

When a bore gets on the air, he may annoy, but all a person needs to do is to twist the dial and he is gone. Some modern inventions do have their compensations.

Byrd, now a rear admiral, retired, differs in many ways from the type to which we are accustomed. At the South pole it is doubtful if he even has a rocking chair.

Bury Me in Pink Gandhi's Appeal The King's Maxim If War Did Come

Woman's interest in dress, strong and deep, goes back a million years. She started with a necklace, according to scientists. First an ornament around the neck, then one around the waist, then a skirt and all sorts of things.

A woman in California who murdered a man and killed herself asked to be buried in white satin with yellow roses in her hand.

A well-known actress in New York jumps from a twentieth-story window and makes two requests: first, that she be buried in pink satin; second, that her husband keep away from the funeral.

Beautiful in sincerity and humility is Gandhi's appeal to the British government. "On bended knees, I ask you to ponder this phenomenon"—namely, the "impoverishing of India's dumb millions" by Britain.

Gandhi says, "I do not intend to harm a single Englishman." He will only resist passively.

Very touching, but not the attitude that gains independence, not the attitude of a people ready for independence.

Britain set a different example before the Hindus after the Sepoy rebellion.

The British put murderous rebels inside of cannon and blew them to pieces, knowing that religious superstition would make the punishment most horrible.

No rebellion of consequence since then.

One industry marches on to higher and higher figures. In the cigarette business, prosperity reigns. Everybody always has money to buy cigarettes.

When employment is lacking there is leisure to smoke more cigarettes, and all feel that they must have them, job or no job.

Last year's production was one hundred and nineteen billion cigarettes, almost a thousand cigarettes per year for every man, woman and child in the United States.

One thing most important to all business men in connection with the gigantic cigarette industry: Cigarette men are the most aggressive, energetic and continuous advertisers in the nation.

The Standard Oil Company of New Jersey sets an example to other oil concerns, voluntarily reducing its re-

finery operations by one-seventh.

Refining is a continuous process, and must continue seven days a week but only six days' actual work will be done, to prevent overproduction.

And most important part of the good example, men will not be discharged or have their wages cut.

An English clergyman reveals King George's six maxims, all hung up on the walls of his library.

The first is: "Teach me to be obedient to the rules of the game."

Excellent for a constitutional monarch, obeying the will of his people.

Rulers of a different kind, Alexander, Caesar, Napoleon, had a different maxim: "See that you obey the rules of the game as I make them."

We do not understand management of prisons, or our criminals are different from other criminals.

Weeks ago, Warden Hoffman of Auburn prison, New York, told a reporter: "We are sitting on a powder keg."

Recently, a convict stabbed the head keeper of the prison to death. He knew that the electric chair, nearby, would inevitably avenge that murder. Nevertheless, he committed it.

\$72,000.00 BOND ISSUE REQUESTED.

Trustee East Announces That He Will Take Action Immediately.

Our present school building has been condemned by the state fire marshal and state board of education, with orders not to use the present structure for school purposes after June 30, 1930.

As a result it is up to Franklin township to erect a school building, and trustee East will take immediate action in order that we may have a building in readiness for the Fall term of school. The trustee has announced that he will ask for a bond issue of \$72,000.00 for the purpose of erecting a modern fire proof school building to be located east and north of the Winona railroad station. The proposed building will not contain a gymnasium or assembly hall the plan being to use the Community building for these activities.

As it has come to a show down, and we must erect a new school building let us all put our shoulder to the wheel, boost the proposition, and not place any obstacles in the path of the officials, and Mentone will open her next year of school in a modern, new fire proof building.

Windows Important

The value of windows to a building from esthetic and utilitarian aspects can scarcely be overemphasized. Windows have a profound spiritual function to perform in that they not only express the spirit of the building but also bring in the great out-of-doors.

Traffic Officer Finds Health In Famous Konjola

Suffered Three Years—New
Medicine Did More Good
Than All Else.

MR. THOMAS R. POLLARD

"For three years I was in distress and misery before Konjola came to my rescue," said Mr. Thomas R. Pollard, traffic officer on the Indianapolis police force, living at 217 North Addison street, Indianapolis. "My stomach was in a very bad condition and every bite of food soured and nauseated me until I vomited. My liver was sluggish and caused headaches and dizzy spells.

"But all that is ended now, and I owe all my new and glorious health to Konjola. This medicine went right to work, just as I was told it would do. Daily my improvement became more noticeable. My system was cleansed and regulated and then my digestion was restored. Konjola also regulated my kidneys and today there isn't a trace of that ailment. No wonder I am so enthusiastic about this medicine."

Konjola is sold in Mentone at Shafer & Goodwin drug store, and by all the best druggists in all towns throughout this entire section.

Patience

What signifies your patience if you can't find it when you want it?—Franklin.

Furious Skidding

Young people are not necessarily going to the devil just because the road has been improved.—Toledo Blade.

Keep Old Name of Coin

The current French-Canadian word for a "dollar" is still a "pistole," an ancient French coin, formerly worth ten francs, today still nominally used in some parts of France in buying and selling horses.

OBITUARY

On April 4, 1875 in Marshall Co. Ind., near Tippecanoe, Ruth and Franklin Flory welcomed into their home their first child Minnie.

She made this her home until July 18th, 1896, when she was united in marriage to William Vernetto of Mentone Indiana. To this union was born one daughter, Edna.

For many years she has had poor health, but she bore it with wonderful patience and her suffering ceased on March 3, 1930, when in the presence of husband and daughter at the McDonald hospital in Warsaw she was called away.

She leaves to mourn her going the husband, daughter and son-in-law, Earl Sarber of Burket, who so tenderly cared for her, three grandchildren, Etta Mae, William and Ileen Sarber to whom she was so devoted. Three sisters, Mrs. Pearl Stuckey of Tippecanoe, Mrs. Jesse Moriarty of Hammond Ind., Mrs. Carl Neidigh of West Virginia one brother, Henry Flory of Argos, and a host of relatives and friends.

CARD OF THANKS.

The family desire to thank our many friends and neighbors for the kindness and sympathy that was extended to us in our hour of bereavement.

Missionary Meeting.

The Women's Missionary Society will be held at the Baptist parsonage Wednesday March 19th, at 2 o'clock with Rev. and Mrs. Squibb.

Theology and Cupid

A Baptist minister was once asked how it was that he consented to the marriage of his daughter to a Presbyterian. "My dear friend," he replied, "so far as I have been able to discover, Cupid never studied theology."—Pathfinder Magazine.

FARM POULTRY

PAYING POULTRY FLOCK IS GROWN

Spring-Hatched Pullets Carefully Developed Are Best.

Developing the spring-hatched pullets from the time the chicks leave the incubator until the pullets are placed in the laying house is the pathway to profits in the poultry industry.

"The object of this development is to have pullets of stamina, bone and vigor and fully up to the standard weight of the breed," says R. S. Dearstyne, poultryman at State college. "At first the proper mashers are needed until finally the laying mash containing 20 per cent of protein is given. The young pullets must have an abundance of succulent green feed especially, as the grass on the range gets old and tough. When placing birds in the laying house, do this about two weeks before they start laying so that they may become accustomed to their surroundings."

Nesting material should be changed often, runs cleared of litter, perch poles scraped and freed of mites, and the birds examined for internal parasites. A minimum of four feet of floor space to each bird is needed in the house, and at least two feet of perch pole for each three birds. Dampness in the house and damp litter is to be avoided if the birds are not to have roup and colds. Fresh, clean water is necessary and the mash hoppers are to be kept filled at all times. Oyster shell and grit needs to be kept before the birds, and grain fed twice each day with the heaviest amount at evening.

Mr. Dearstyne says that the poultryman will do well to spend about ten minutes each day in general observation of his flock. This will help him to find any lack of thriftiness or any indication of disease. Birds roughly handled, irregularly fed and watered, infested with parasites or neglected in other ways will not prove profitable.

Caponizing Profitable Way to Market Poultry

Caponizing is one of the most profitable ways of marketing late-hatched cockerels. In an experiment last year fifty June hatched cockerels were caponized. The birds were of dual-purpose breeds and caponized when they had reached a weight of 12 ounces to 2½ pounds. These birds were sold the following April and averaged six pounds each, dressed for market. They brought 35 cents a pound, or an average of \$2.10 per bird. The feed cost of producing these birds was 84 cents each and with an additional charge

of 10 cents for dressing and picking, the net profit was \$1.16 per bird.

Another poultryman caponized 191 barred Plymouth Rocks last summer. When sold their average weight was 7.7 pounds each, and they brought 48 cents per pound. The total cost of growing these capons—chicks, feed and labor—was placed at \$366.14. There were 176 birds at selling time, which brought a total of \$561.14, leaving a net profit of 85 cents per bird.

Poultry Notes

Winter egg profits will depend largely on the care given pullets.

Hatch the chicks early so that the pullets are mature for winter egg production.

Don't forget the importance of fresh, juicy greens for both the baby chicks and old hens.

The first half of April is the ideal time to hatch chicks of smaller breeds such as the Leghorns.

Giving hens 12 hours of light increases egg production at the season when the prices are high.

When calcium carbonate is not available in sufficient quantities, hens lay soft-shelled eggs or no eggs at all.

Making it easier for the hens to consume large quantities of mash aids in the production of eggs. At least 10 linear feet of double hopper space should be provided for 100 hens.

Culling should not be considered as a substitute for correct management of a flock of hens. Even the good producers may cease laying in the summer if proper care is neglected.

To carry on heavy production hens must have strong bodies and a good supply of nourishing feeds.

Good producing hens may become thin if not fed sufficiently. Total feed consumption can be increased usually by giving a moistened mash once a day throughout the summer months.

Give free range to the birds which are to be used as breeders this spring. They should also be fed an abundance of whole yellow corn.

Breeding, selection, and poultry culture are employed by alert poultrymen to meet the shifting market demands for poultry and eggs.

Eagle's Carrying Power

An eagle can carry about 10 or 12 pounds. Occasionally a larger weight has been carried a short distance.

Probably Flunked

Experience must be a good school or so many people wouldn't be taking postgraduate courses.—Norfolk Virginian Pilot.

Profit in Milking Three Times Daily

Agricultural Depression Has Passed Up Farmer Using Labor-Saving Machinery.

The dairy farmer is matching the increased efficiency of industry with science and labor-saving machinery, says the De Laval Bureau of Dairying. In the dairy industry, with only a slight increase in the number of dairy cows since 1917, there has been over 40 per cent increase in the milk production of the country. This increase in milk production has helped tremendously to increase agricultural returns and at the same time helped fortify the nation's health.

The shifting from less productive crops and animals to more productive crops and animals, especially since 1922, is working vast changes in the entire agricultural industry. Greater production per acre and per animal, which lowers cost per unit of production, covers the program progressive farmers are using to increase the returns on the individual farm, and no group in any branch of the agriculture industry can be credited with greater progress than dairymen. As a typical example of one of the many plans farmers are using to increase profits, the De Laval Bureau cites the case of a farmer with good producing cows, who, upon finding a greater consumption demand, milked his cows three times a day, at 4 a. m., 12 noon and 8 p. m. This increased milk production 20 per cent over the common practice of twice-a-day milking. Instead of increasing his herd this dairyman increased the production per cow. Any dairyman using a milking machine is in an excellent position to do this. He can thus increase his profits materially for the time and labor saved by the mechanical milker enables three milkings a day to be done in the same time or less than required by twice-a-day hand milking.

Experiments have shown that cows producing over 20 lbs. (depending on the breed or grade) do well where this new plan of more frequent milking is used, especially during the first six months of the lactation period, with less under trouble and fewer breeding difficulties. The beneficial results of the three-time method were also demonstrated. It helped develop cows, regardless of age, and was a big factor in keeping up the increased milk yield months after the cow was put back on two-times milking during the latter part of the lactation period.

Farmers who utilized science and labor-saving machinery, it was found, were the ones who least felt the period of agricultural depression. The reason for this was because progressive dairymen and community leaders were about the first of the agricultural groups to turn economists and efficiency engineers. Like the manufacturer, these dairymen took advantage

of modern equipment to realize greater profits. Three-times-a-day mechanical milking is an example of the vision shown by such progressive farmers. It has been estimated that the 15 to 25 per cent milk increase through the three-times plan would more than reimburse the farmer for his modern equipment outlay in a short time. Relieved of the hardest job on the farm, the farmer has time to plan and carry out other profitable projects and to enjoy himself. Combine grain harvesters, tractors, cream separators, gas engines and brooder stoves are other accessories to better methods of farming which are insuring increased profits for far-sighted business farmers.

HOW TO LIVE LONGER

By John Clarence Funk, A.M., Sc.D.

Director of Public Health Education,
State of Pennsylvania

"Smart" Living

ONE constantly hears the statement that it is "smart" to do this and that. By which is apparently meant that today's convention has put the stamp of approval upon the particular action involved. The "smart people" are doing it—and no one wants to appear dumb and behind the times.

Well, it may be smart to drink synthetic gin, it may also be smart to go out on wild joy rides, it may be considered smart for the young man and woman to inhale twenty or more cigarettes a day, and it may even be smart to make a practice of spending one's nights at jazz road-houses instead of in bed. But no matter how smart these things may be, they are neither healthy nor are they the manifestations of intelligent living.

And the joke in this razzle-dazzle existence is that the really smart people will have none of it. The actually successful men and women of today will not be found cavorting in such a silly manner. Quite on the contrary, they seriously realize that abounding health is based upon a sensibly regulated life and that success, whether it be commercial or home making, must find its foundation in health alone.

There is absolutely nothing smart in outraging nature. But that is a lesson that many of the young people, and not a few older ones who try to act young, have yet to learn. Many to their ultimate sorrow.

Smart living means wise living. And wise living means following strictly the key laws of long, happy and healthy life.

Smart smartness doesn't pay!
(© 1928, Western Newspaper Union.)

Pioneer in "Pictures"

It is believed that James J. Corbett, former heavyweight champion of the world, was the first motion picture actor under contract. In the early days of the industry it was recognized that action was the most important element needed to catch the popular interest.

The Reason

We get so many eggs from Mentone Producers is because we are in a position to pay the most for Quality Eggs. And then Our Quick Returns is

Another Factor

That makes friends among the shippers and causes so many to ship their Finest Eggs to us.

C. W. KRATHWOHL, Editor and Publisher.

An Investment When you spend your money with your home merchant it helps to make a live town—a good live town increases property values That Pays Dividends

OUTSIDE COMPETITION IS STRONG.

Our Streets and Mails Are Flooded With Circulars and Hand Bills from Out-Of-Town Merchants Bidding for Trade.

Competition, not only between the merchants but between communities, is keener than at any time in the past. Automobiles and good roads have increased the shopping radius of both the people of the farms and towns. A journey of twenty to fifty miles is no longer a hardship and people travel to the stores that have appealed to them most, through their advertising and the service that they offer. The people of today are spending more money than ever before, and things that were luxuries a few years ago are today considered necessities. It is advertising that has brought this about. The community can be the shopping center for an ever widening trade territory; this town made more progressive and enterprising if the merchants will all advertise their respective lines effectively and consistently.

To have advertising effective you must have something that is reasonable, something that the people want and at a price that is as low as the same article is sold for elsewhere. We believe that our merchants are in a position with their low overhead expense to sell goods as cheap if not cheaper than they can be sold in neighboring towns so why not go after the business by advertising your wares together with prices that will meet the quotations appearing on the bills with which this town is flooded daily.

The Farm News has a special cut copy service that will make your advertising effective and this is absolutely free to all those who wish to advertise. Just tell us what you want to advertise, the price and the amount of space that you want and we will do the rest, and if you have a good article at the right price, good results are sure to follow—but remember that one feather does not make a feather bed, nor does an occasional advertisement build up a profitable business.

WORLD MOVEMENT FOR PEACE

By DR. FRED B. SMITH, World Peace Promoter.

We are in the midst of the greatest revolution which has ever occurred in the history of the world. At first it may seem as though this is rather an exaggerated statement but I believe that thorough consideration will bear it out. Some time ago, looking at the dictionary to get a definition of the word "revolution," I found this: "A revolution is some great change or alteration in a system," and, further on, it said: "It is not called a revolution unless it is successful."

Well, when I consider these two elements in the definition of a revolution, I am quite certain that my statement is accurate. The proposal is to change the age-long habit and method of all the races and all the nations of which there is any recorded history, in their method of adjusting either international, inter-racial or clan misunderstanding.

MIND MATTER OF RELATIVITY

By DONALD A. LAIRD, Colgate University.

Physical differences are as nothing compared with the enormous differences that may be found in mentality. Education does not seem to improve one's regular equipment of brains. Children who are found by tests to have a little less than the usual modicum of brains in the first grade are still a little behind when they are in the fifth grade, and in case they reach the eighth grade, they still test a little below.

Intelligence is not increased by going to college. Neither is it a chance affair. Parents with brains much above the average have children with brains much above the average. Brains seem to be quite definitely inherited, just as eye color, stature or temperament.

If education does not improve intelligence, what makes college men successful? Of hundreds of thousands of men in the army during mobilization the average score was 65. After the war the same test was given to a large number of students entering college for the first time. The average score by these freshmen was 150.

This does not mean that the college freshman has twice as much intelligence as the army man, since the army score does not start with zero intelligence. But this difference does mean that the ordinary college man is much better equipped with brains than the ordinary man on the streets.

PENAL SYSTEMS NEED REFORM

By CHARLES H. TUTTLE, United States Attorney, New York.

Thoroughgoing reform of both state and federal penal systems has been shown by the recent prison riots to be a foremost and most urgent public problem. The lines of reform in our own state are not difficult to see. One prison should be set aside as a reception prison, where preliminary physical, mental and moral examinations should be made, in order to determine classification, segregation and the ultimate place of confinement.

In each prison there should be a psychiatric board; a system of vocational training under the state department of education; modern standard shops; the financial equalization of all prisoners by a system of restricted pay for work done, in substitution for money received from outside; adequate observance of the laws of hygiene; and credit in time off for good behavior and industrial accomplishment. The state also could beneficially employ such of its prisoners as required outdoor life in the reforestation of non-tillable lands or in the operation of prison farms.

Among reforms needed in the federal system of penology are the construction of a penitentiary in the northeastern part of the United States, from which section comes the greatest number of prisoners now in Atlanta; the appointment of parole officers to supervise the large number of federal prisoners out on parole and a parole board working on scientific lines.

SHERWIN-WILLIAMS PAINT HEADQUARTERS

Washable walls of lasting beauty at small cost

Specify S-W Flat-Tone and engage a good painter

Here is a washable flat wall paint of velvet softness! A wall paint with wonderful body that thoroughly hides the old surface and covers more square feet of wall per quart—yet costs no more than other wall paints.

Think of what it will save you in redecorating costs. Soap and water will restore the rich fresh beauty of its colors year after year. Come in and let us show you the wonderful effects that can be obtained with this modern wall paint—the rich costly Spanish leather effects and velvety multi-colored walls. Now they are within the means of anyone.

S-W Paint Products are sold the world over under this famous trade-mark

FRIDAY AND SATURDAY SUGGESTIONS

S-W Flat-Tone

A washable flat wall paint for interior decorations on smooth or sand finish plaster, wallboard and other interior wall surfaces. Spreads easily under brush. Dries without streaks or brush marks. Produces beautiful velvet finish. Can be repeatedly washed.

The old car problem has been solved. Harry Bailey, a furniture manufacturer in Honolulu and member of the Hawaiian Foreign Trade council, tells what pineapple plantation owners are doing with wrecked and junked automobiles. The pineapple requires its iron every day as a stimulant. So to make a solution of iron oxide, parts of old cars are melted in a bath of acid and the oxide thus obtained used as a spray for the tropical fruit.

Chinese are supposed to pay all debts once a year. Authority in China is arbitrary and exacting and those who do not pay may expect to have the money taken away from them, or, if it cannot be produced, to suffer an unpleasant penalty. It is perhaps for this reason that the Chinese acquired the reputation of being the most honest of nations.

An eastern physician predicts that in 50 years there will be no bald-headed men. Pairing him off with the other doctor who, a few weeks ago, declared that in 50 years we'd all be bald, we come to the conclusion that in 50 years there will be some bald and some hairy.

Frequent assertion that only aircraft would matter in any possible war of the future does not prevent a close study of the relative efficiency of ships. Imagination, through force of habit, still calculates theoretical battles on the old familiar terms.

A Chicago story says a Hindu student at the university bearing the name of that town has discovered a drug which will neutralize the bite of a cobra. Has he found a way to keep a patient alive until the drug can be injected?

A statistician figures that more than 3,000,000 persons are injured annually in their homes. This includes, however, the many thousands of cases reported as "It was dark and I walked into an open door."

A European astrologist picks some time in September as the date when the world will come to an end. We can just go ahead then and tear out the last three months of our diary.

There are more millionaires in American prisons today than ever before, which would be most encouraging if there were not more non-millionaires in prisons, also.

Benzine Product

Xylene is the name applied to any of three hydrocarbons of the benzene series. It is found in coal, wood tar and certain kinds of petroleum. It may also be prepared artificially.

CARD OF THANKS

We wish to thank the new subscribers to, "The Indianapolis News" that made it possible for us to attend the State Tournament.
Signed—Merle H. Lynn and Lowell Powers.

COUNTY TREASURER

This is to announce to the Republican voters of Kosciusko County, that I am a candidate for County Treasurer, Kosciusko County, subject to the decision of the Republican primary to be held on May 6th, 1930.

GRANT B. WILLIS

NEW GAS SAVING DEVICE

Carl Myers has been experimenting with a new gas saving device for automobiles. While he is keeping his progress on his new invention a secret, yet we have it on good authority that in his last test he went several miles and the gas consumed was a very small amount. If every auto owner adopts the Myers patent it will be hard on the gas dealers.

MENTONE NEWS ITEMS.

Mrs. Emma Creakbaum spent Sunday with Mr. and Mrs. Wm. Jackson.

Mr. and Mrs. Chauncey Becknell and Mr. and Mrs. Curtis Perry of Bourbon spent Sunday with Mr. and Mrs. Adam Bowen and son.

The five year old daughter of Mr. and Mrs. Howard Gross who lives north of Mentone, passed away early Tuesday morning at the McDonald hospital, at Warsaw. Death was due to pneumonia. Funeral services will be held Thursday afternoon.

PEAT MOSS

Customers say that our German Peat Moss is the best brooder moss they have ever used. We have a large stock of it at all times at only \$2.75 per bale. We expect to have two carloads of this splendid quality of

German Peat Moss on Track

In about ten days or two weeks. Direct from the cars the price will be

\$2.15 Per Bale.

Might say that the average dealer cannot buy a carload for a penny less than what we will sell you a single bale direct from the car. We cannot afford to solicit you individually so let us know how many bales you want. This will be our last shipment until fall.

Brooder Stoves at Wholesale Prices.

Have you seen the wonderful brooder stove we are selling? Don't buy a stove until you see it.

Have You Seen Those Big Wire Grilled Feeders

That we are selling practically at cost? Just the thing when your chicks have outgrown the little metal troughs.

DO NOT FORGET

We have hundreds of those five and six gallon chick drinking fountains at \$2.00 each. We have all kinds and you may have your choice.

Can Still Accept a Few Orders for March and April Chicks.

Have never had such wonderful hatches of such wonderful chicks. Buy Manwaring's chicks now instead of wishing you had this fall. Big birds and big eggs that top the market. You that wish to top the market, buy Manwaring's chicks. We shipped 1500 to Maryland and at three weeks only seven chicks have been lost. We ourselves have better than 9000 chicks up to three weeks of age and our entire loss to date is considerably less than 1 per cent. Drive out and let us show you. You will be under no obligation whatsoever. Remember all our breeders are carefully blood tested and all eggs are iodine dipped. Our chicks cost no more than ordinary hatchery chicks. Why not have the best when it costs no more? This is wonderful brooding weather folks. If you wish to start yours right now and get the benefit of this wonderful weather we can take care of your order. Do not wait. We can accept only so many orders.

E. A. BLUE.

"The Whole Town's Talking."

It sounds like a bit of gossip but it isn't. It happens to be the name of the play which the Senior Class of M. H. S. has chosen to present on Wednesday evening April 9th.

It is a popular three-act comedy of the best type. Some talented actors and actresses have been discovered and a real performance is expected.

SPOOKS, YELLOW TINY

PEG SHOW WAY IN

DAIRY BUSINESS.

Purdue New Service.

Spooks, Yellow, Tiny and Peg did it. They showed Dad that he was all wrong, by making a total profit above feed costs for a year of more than \$565. Spooks, Yellow, Tiny, and Peg are four grade Jersey cows, in the herd of Kenton Parkinson, father of Robert Parkinson, a vocational agriculture student in Rensselaer high school, at Rensselaer, Ind.

Last year, Robert became interested in keeping record on farm projects, through the instruction given by his teacher, Ray S. Bundy. He began a record on the four cows belonging to his father, on February 1, 1929. This involved weighing the milk of each cow twice a day, keeping a record of the amount of feed eaten each day, taking butterfat tests at regular intervals, and keeping track of the amount of work re-

quired to take care of the cows.

The cows had never been fed a balanced ration, and so Robert put them on the 4-2-1 ration recommended by the dairy department of Purdue University Agricultural Experiment Station, consisting of four pounds of ground corn, two of ground oats, and one of ground soybeans, supplemented with soybean hay. Corn cost 80 cents a bushel, oats, 40 cents, soybeans at \$1.20, and the hay was valued at \$8.00 a ton. All these feeds were produced on the farm.

In figuring his costs for the year, Robert took into consideration taxes, interest, rent of buildings, risk, depreciation of buildings, and insurance. Butterfat sold for an average price of 41.3 cents a pound, and skim milk for 40 cents per cwt.

The average production of the cows was 410.8 pounds of butterfat and 7555 pounds of whole milk, worth on the whole \$202.70. The feed for each cow cost \$61.43, and other expenses brought the total to \$114.35 for each cow for the year. This left a profit of \$88.35 above all costs. As Robert puts it, "Dad didn't think cows would pay. He does now."

TREATING SEED OATS

SO SIMPLE REMEDY.

Purdue News Service.

"It is approaching oat planting time and farmers are beginning to ask what to use for smut treatment," says Dr. C. T. Gregory of the Purdue Agricultural Extension Department.

"They want to know about the new treating materials that are being advertised. They read about the effectiveness of these treatments and naturally many of them want to know what Purdue has to say."

Oat smut and barley smut can be controlled quite effectively by these new organic mercury compounds. Farmers need not hesitate to use them if they wish to do so. However, why discard the tried and true formaldehyde treatment of oats. It is cheaper than the new methods, if properly used. It is a dry treatment and it is sure death to the oat smut.

This is the method. Mix a pint of formaldehyde with five gallons of water. Dump 40 or 50 bushels of oats in a pile or in a wagon box. As the pile of oats is being shoveled over apply the five gallons of formaldehyde mixture with a sprinkling can. Apply it slowly so that the five gallons will be scattered rather evenly throughout the pile of oats.

After the pile is shoveled over and the formaldehyde is applied, cover the pile for at least five hours with a blanket. Leave the seed longer, if

desired, but at the end of five hours the water will all be absorbed by the oats. Five gallons of solution on 40 to 50 bushels of oats does not wet the seed. It can be sown the next day or if treated in the morning the seed can be planted in the afternoon.

For less than 40 bushels, use proportionate amount.

HOW TO LIVE LONGER

By John Clarence Funk, A.M., Sc.D.

Director of Public Health Education,
State of Pennsylvania

Wheezers and Sneezers

EVERY season in many sections of the United States a vast army of American citizens wheeze and sneeze. They do this to their exceeding discomfort, while at the same time obtaining slight sympathy from their more unfortunate friends.

Comparatively few of these annual victims can afford either the time or money to seek climes unfriendly to hay fever. Consequently, many resign themselves to their condition, optimistically anticipating that distant, though effective, event commonly known as the fall frost.

Science, so miraculous in many departments of life, has not shunned the hay fever victim, however. Speaking in aggregates, immense as it is in itself, there is only a comparatively small minority of individuals in this country who possess an unusual sensitiveness to the pollens of certain plants, weeds, grasses and trees. This limited causative field has made possible the development of a counteracting serum.

However, it becomes necessary in the first place to discover the particular pollen that is causing the trouble of each individual. And this can not be done without making a visit to a physician prepared to make tests with the pollen extracts that logically may be suspected of creating the difficulty.

Fortunately, such a test is exceedingly simple and painless. A needle prick carries a bit of each extract under the skin. The particular criminal doing the damage is promptly disclosed by way of a slight local reaction. All the other extracts remain neutral. Thus caught, inoculations for that type are administered over a period of weeks. Immunity, however, must be established before the pollen season arrives. It is too late to resort to this treatment after the onset of the attack.

While this scientific weapon is not always 100 per cent effective, its average of success is sufficiently high to justify all wheezers and sneezers to give it a trial. Wheezers and sneezers, take notice.

Heavy Wood

Lignum vitae, one of the heaviest woods, weighs from 73 to 83 pounds per cubic foot.

Afternoon and Evening Poultry and Egg Meeting, by

Mentone Egg Producers Association

At the Mentone Community Building, on

Tuesday, March 25,

Afternoon Session Starts Promptly at 1:30

1st—Mr. and Mrs. Edson Vandermark, Musical Selection.

2nd—Dr. Frank Tucker, Poultry Diseases. Come, hear and see Dr. Tucker lecture on and post poultry. His talk will be profitable for all. Birds with different diseases will be killed and examined. Come prepared to ask the Dr. those poultry disease questions that interest you at this time.

3rd—Mr. and Mrs. Edson Vandermark will favor us with a musical selection.

4th—J. S. Johns, Sanitation. This important question will be discussed from the 'chick' in the shell to the hen in the laying house. Bring your question on this subject.

Evening Session Starts Promptly at 7:30

1st—Talma Sod Busters, Quartet, music.

2nd—E. R. Menefee, of Purdue Poultry Department will talk on the subject "What determines the value in eggs?" Certainly this is a subject in which all are interested.

3rd—Following this discussion we will hear from the Sod Busters.

4th—Irvin Nelson, "Community Welfare."

5th—The Ladies Auxiliary, of Newcastle Township Farm Bureau, will give a playlet, entitled "Mother Pulls The Strings."

EXTRA!

EXTRA!

EXTRA!

Sometime during the afternoon or evening there will be Egg Judging contests.

Contest No. 1—Owners of flocks of less than 500 birds laying eggs for The Mentone Egg Producers Car will compete for \$15.00 in prizes. Both ladies and gentlemen are welcome to enter this contest.

Contest No. 2—Free for all. Owners of flocks of any size may enter this contest.

P. S.—Husbands bring your wives. Wives bring your husbands—sure you must bring the children and invite your neighbors to come, both sessions will be profitable for all.

COMMITTEE

Mentone Egg Producers.

MENTONE NEWS ITEMS.

Mr. and Mrs. C. O. Ketrow and grandson spent Sunday in Fort Wayne visiting friends.

Mr. and Mrs. Charles Emmons were Sunday dinner guests of Mr. and Mrs. Clyde Brugh.

Mr. and Mrs. Irvin Snyder and Gaylord Emmons were Fort Wayne business callers Monday.

Mr. and Mrs. Merl Smith and two children and Mr. and Mrs. James Smith were guests Sunday of Mr. and Mrs. Verdo Smith.

Miss Winifred Clark of Shreveport Illinois was the guest of her mother, Mrs. Broda Clark over Sunday. Mrs. Clark returned home with her for a short visit.

Mr. and Mrs. Elmer Rathfon entertained at dinner Sunday, Mr. and Mrs. Arthur Brown of Niles Michigan and Mr. and Mrs. Boyce Underhill of South Bend.

Mr. and Mrs. Chauncy Tucker and daughter, Iola Mr. and Mrs. Ed Halterman and Mr. and Mrs. Verl Halterman were Sunday guests of Mr. and Mrs. Herschel Enyeart of South Bend.

Will have a large display of Marshall Fields and Co. coats and dresses, Tuesday March 25th, from 9 to 4.

New line of hats every Friday and Saturday. Emmons Hat Shoppe.

SURPRISE PARTY
ON MRS. SHAFFER

Mrs. Minerva Shaffer was very pleasantly surprised Friday evening at her home on north Broadway.

The occasion was in honor of the 75th, birthday anniversary of Mrs. Shaffer. All came with well filled baskets and a bounteous supper was served, to which all did ample justice.

A large birthday cake decorated the center of the table. The cake was baked by Mrs. Shaffer's granddaughter Mrs. Minerva Eversole.

Those present were Mr. and Mrs. Mm. Mahoney, Mr. and Mrs. Noah Eversole and nephew Roy Kepper, Noble Shaffer and family and John Shaffer and family.

One Man's Influence

An institution is the lengthened shadow of one man; as, the Reformation, of Luther; Quakerism, of Fox; Methodism, of Wesley; Abolition, of Clarkson. Scipio, Milton called "the height of Rome;" and all history resolves itself very easily into the biography of a few stout and earnest persons.—Emerson.

Home Economics Club Work.

Home Economics Extension work in Kosciusko Co., for 1930 will be continuation of the Home management project which was begun last year. The instructor from Purdue University meets with the leaders from the county clubs on Tuesday and Wednesday March 18 and 19th, at Warsaw.

Two leaders from the Mentone Club will bring the lesson to the other club members at their next meeting March 25, at the home of Grace Weissert. There will also be a discussion of washable window shades, different types of linoleums, and response to roll call "Favorite Curtain Materials."

Anyone interested in this work is eligible and welcome to be a member of the club.

CHICKS, CHICKS, CHICKS,
AND THEN MORE CHICKS

C. L. Manwaring, manager of the White City Egg Farm escorted the Editor through that institution the first of the week, and while we were aware of the fact that the White City was the leading industry in Mentone yet we had no idea that the plant was what it really is.

The large modern electric incubators which were installed this season were running to full capacity hatching chicks by the thousands and keeping quite a force of help busy keeping them filled, packing and getting the chicks ready for shipment.

In the large brooder house there are about 8,000 chicks ranging in age from four days to a few weeks. The inside of this brooder house is certainly a pleasing and interesting sight and is surely worth seeing. Everything is kept strictly up to date and one visit to this institution and you will readily see why the White City is classed with the leading poultry farms of the state.

Earliest Friction Match

The first true friction match was not invented until 1827 by a man named John Walker of Stockton-on-Tees, Durham, England. Ignition of sulphur and phosphorus by friction was discovered by Godfrey Haukwitz in 1680, and it was 150 years before this discovery was applied to matches.

Analyzing ...YOU...

With the New Science of Syllabics

By C. J. COFFMAN

Dean of All the Enumerators

"Frances her name, and frank her face
Whatever be her lot,
When comes her fame, her highest
place,
May sorrow find her not."

Frances

You do not need to ever be a martyr, Frances, but you easily can be. In helping you. In advising you for this life, I would suggest first that you do not too eagerly take offense when you find opinions differing from your own.

Rather assume the attitude that if your side is right it will be demonstrated without much crying out on your part. On the other hand, if the other side should be right, the least you say the less there will be to retract.

You have such a well-balanced face that I am sure you will see these things. Your picture indicates that.

Taking some of the old syllabics from the days when language was based mostly on definite meanings, I find that part of your name means, "to be joyful, to triumph."

I like to believe that this is what you are going to do, for you have the power.

Another syllable in your name, CES, indicates the ability to halt the actions of others. You have the power to do this in either one of two ways, by throwing discouragement in their pathway, or by helping them to see a better way, and thus moving them out of the wrong way.

Such a laborer in the fields of right was Frances E. Willard, great humanist and temperance organizer.

On the male side of the lineage of your name (though not of your family) was St. Francis of Assisi. Though his ideals seemed entirely impractical, though he did what the world called a foolish thing, he did accomplish a great good among his people, and organized a great work.

The great things of this world, Frances, do not all belong to some one else. Some of them may belong to you. If you believe that, you will take them.

Within Reach of All

"The ambition to dwell in idleness and achieve flattery," said Hi Ho, the sage of Chinatown, "is easily gratified. Every one may look forward to a tombstone and an epitaph."—Washington Star.

In a Nutshell

A man without mirth is like a wagon without springs, in which one is caused disagreeably to jolt by every pebble over which it runs.

COMMUNITY FIRE TRUCK RECEIVING GOOD SUPPORT.

The progressive farmer will not run the risk of losing his barn, stored with the past season's crops, nor of rendering himself and family homeless by a disastrous fire when valuable assistance can be arranged for through co-operation with his neighbors and home town.

The following list represents those that have already been seen, and all others will be seen as soon as solicitor can get to them.

Austin Blue and Son; H. E. Blue; S. S. Boggs; S. Boldman; Wm. Cattell; Wm. Deamer; O. B. Deaton; S. S. Doran; Noah Eaton; Wm. H. Freeberry; C. A. Fretz; Thos. R. Haimbaugh; David Harsh; C. O. Herendeen; Ott Jefferies; E. E. Jones and Lucinda; Edw. Kesler, Forrest L. Kesler; Jacob Kesler; E. H. Kinsey; E. S. Lash; George Long; Frank Lyon; George Lyon; Roy E. Maxwell Artie Miller; H. V. This Week

by Arthur Brisbane

Don't Sell Wheat Short Federal Control of Power Memories Fade Smallpox Also Marches

Uncle Sam buying wheat at a price above world market and storing it helps wheat growers of other countries, although that is not his intention.

What the wheat situation will be next July, nobody can guess. Wise gamblers will refrain from selling short. Uncle Sam's pocketbook is back of wheat prices in the United States, a new kind of "corner."

Flour has reached its low price since the World war, \$6.60 a barrel, compared with \$7.30 a year ago, and \$18 a barrel, the peak price in war time. Good news for housewives. Bad news for farmers.

Senator Couzens introduces a bill to regulate production, transmission and distribution of all classes of power in interstate commerce.

He would let government supervise rates, and securities issued by holding companies.

Some say the people should have no control of power and its distribution, although power in national life comes next to food, water and air.

The people at least might supervise sales of securities. One company issued more than 60,000,000 shares of stock based on odds and ends of power companies. Foolish investors bought the pieces of paper, at a price exceeding fifteen hundred million dollars for the whole collection.

William Howard Taft, chief justice of the Supreme court, President of the United States, secretary of war, rode to his grave in Arlington cemetery on a gun carriage, the first United States President to be buried there.

A military funeral was, perhaps, not what he would have suggested, but he was entitled to it as former secretary of war and commander in chief of the army and navy.

Before burial the body of the late chief justice lay in state for three hours in the Capitol, on a catafalque upon which had lain the coffins of Presidents Lincoln, Garfield, McKinley and Harding.

Now Lincoln stands out in that, or any list. How soon men become unimportant and are forgotten!

Lincoln never.

Ominous and threatening for India is the beginning of Mahatma Gandhi's campaign of "no violence, but refusal to obey," against the British.

Gandhi and his followers march in protest to make salt tax-free, and smallpox marches with them.

Three are dead, 22 prostrated by disease. The British have made a desperate fight against the various plagues in India, smallpox included, with the natives fighting against them.

It has never been possible to prevent natives bathing in the filthy Ganges, occasionally swallowing water upon which corpses are set adrift.

Under British rule the population of India has increased by 100,000,000. It would soon diminish under native rule, with the aid of smallpox and other plagues.

There is plenty of money in this country, the difficulty is to get it.

Secretary Mellon needs \$450,000,000 for Uncle Sam.

The public offers to buy twelve hundred and ninety-one million dollars' worth of treasury certificates. There is plenty of water in the oceans, lakes and rivers. The trouble is to get it on dry soil that needs it.

All doctors and parents will be interested in news of a "meningitis carrier," a nineteen-year-old youth, William Fehiker, in the reformatory for boys at Boonville, Mo.

Five superintendents and inmates with whom he came in contact died of meningitis, showing how easily the deadly disease may be contracted.

From Devil's Lake, N. D., comes the sad story of Sioux Indians that drank anti-freeze mixture for the sake of its alcohol.

It was the wrong kind.

A large crowd attended the regular monthly meeting of the P. T. A. which was held on Wednesday evening of last week, with Elmer Rathfon acting as chairman. Talks were given by Rev. Shipley, pastor of the Methodist church and the county nurse Mrs. Anna Leininger was chosen as chairman for the next meeting which will be held on March 26th.

Mrs. O. E. Nye assisted by Mrs. Hailey Walburn, Mrs. Gaston Coplen and Mrs. Paul Myers was hostess to the members of the Newcastle Township, Ladies Auxiliary of the Farm Bureau, on Thursday afternoon March 6th, at her country home north east of Rochester. Mrs. Edwin Meredith and Mrs. Charles Coplen were taken into the Club as new members. Roll call was answered with Irish jokes. After the business session the meeting was then in charge of the entertaining committee which was Mrs. Calvin Fretz, Mrs. Silas Meredith and Mrs. Earl Zent. Very interesting stunts and contests were given after which dainty refreshments were served by the hostess and her assistants. An invitation was given by Mrs. Wm. Jergensmeyer for the next meeting to be held on March 27. Mrs. Charles Hoffman, Mrs. Devon Eaton and Miss Reatha Herrell were guests.

EUROPEAN FARMERS

FERTILIZE HEAVY.

(Purdue News Service)

Lafayette, Ind., March 17.—"The European farmer has learned to utilize his land to the best advantage," said Prof. S. D. Conner, of the Purdue University soils and crops department, at the recent agricultural conference here. Conner spent last summer in Europe. "Through long experience he has found that certain types of soil and certain localities are well adapted to the growing of a particular crop. In certain sections, wheat is the main cereal crop, in other sections rye is grown.

"American farmers use fertilizer to start the crop. A small quantity with the seed is profitable. In Europe, the land has been farmed longer and they must grow larger crops, so they fertilize heavily, not only to start but to finish the crop. In other words, they feed a full ration and keep a good supply in the soil at all times. One to two tons of fertilizer per acre is not unusual. Seldom is less than a thousand pounds per acre of good fertilizer used. European farmers know that fertilizer in large quantities will not injure the soil.

Very little soil washing is seen in Europe. This is partly due to deeper plowing, thus furnishing a reservoir to hold rainfall. It is not profitable, though, to plow deeply unless large amounts of manure and commercial fertilizers are used. It is quite common to see wheat yielding as high as 60 bushels per acre. In many ways the Indiana farmer is better than the European, but we also learn something from him."

Conner pointed out the forests in Europe are highly profitable and are regarded as part of the farming business. He advised this attitude for Indiana farmers.

GARDEN HINTS GIVEN

BY PURDUE SPEAKER.

Purdue News Service.

"The best way to reduce labor in the farm garden is to increase its size and introduce field methods for its culture and care," said E. C. Stair of the Purdue University horticulture department at the recent agricultural conference which was held at Purdue. He continued, "Land today is cheaper than labor. One half or two thirds of an acre of land planned correctly, with easy access, and cultivated with horse drawn implements will yield more net returns than any similar area on the farm.

"The garden should be a year-round garden. If properly planned it will yield a continuous supply of choice fresh vegetables throughout

the entire summer, and may also be the source of winter supply if, in addition to canning and drying certain products, provisions are made for the storage of other vegetables, such as root crops, in the fresh state."

He said, "To have the best results the vegetables must be grouped, plant all of the cool season crops such as spinach, radishes, lettuce, onions, peas, etc. early, so that they can mature before the hot days begin because they will go to seed in the long hot days of later summer. Corn, tomatoes, beans and the vine crops should be planted later, because, if they are planted early, the seed will rot and, also, because they require hot weather to mature. After the early garden is harvested a part of the space might well be planted with a good supply of root crops for fall storing. A good supply of beets, carrots, parsnips, turnips, salsify, etc. should be grown and stored in some handy place so that they are readily accessible in the winter. This storage place may be a good farm cellar, an outdoor storage cellar or a pit on top of the ground."

In discussing places to buy seed, Stair said, "There is no best seed company. It is best to select an old reliable company that has stood the test for several years. Select a company that grows all or at least a part of its own seed. It is not necessary, however to buy all the seed from one company. In fact, better success will be obtained if the seed from several companies is used. Nearly every company specializes in one or more crops. They usually take pride in producing the best there is in these particular crops. If the catalogs are examined, these specialties can nearly always be picked out.

Worse Than a Spy

A stool-pigeon is a pigeon used as a decoy to draw other pigeons in a net. Hence it is used for a person used as a decoy for others. Especially one who unofficially acts as a spy for the police is called a stool-pigeon.

Love of Flowers Old

Horticulture is practically as old as the history of mankind. The gardens of the ancient world are famous down through history, and in Europe today tourists are constantly conducted to the famous gardens which started during the Middle ages.

Presidential Powers

Section 1 of Article 1 of the Constitution states that "all legislative powers herein granted shall be vested in a congress of the United States, which shall consist of a senate and house of representatives." The President's power over lawmaking is in suggesting laws to congress and in approving or vetoing laws that have passed.

"Konjola Truly
Is Astonishing"
Says This Lady

Week and Unable to Walk She
Finds in New Medicine A
Real Relief from
Stubborn Ills.

MRS. WILLARD ELLIOTT

"I suffered for six years and at the time I began taking Konjola I was unable to walk," said Mrs. Willard Elliott, 822 North Washington street, Kokomo. "My stomach and kidneys were terribly weak and made me an easy prey for rheumatism and neuritis. I could scarcely hold water on my stomach and my kidneys and bladder pained me and kept me awake at night. The pains from rheumatism and neuritis attacked my entire body and at times almost drove me mad.

"Konjola did more for me in three weeks than all other medicines had been able to do in years. Gone are all my aches and pains from rheumatism and neuritis. My stomach is in excellent condition and I eat heartily of the most nourishing foods. My kidneys function perfectly and my bladder actions are normal. My nerves are strong and steady and my work is no longer drudgery. I am in better health than I have known for years. Konjola truly is an astonishing medicine."

Konjola is sold in Mentone at Shaffer & Goodwin drug store, and by all the best druggists in all towns throughout this entire section.

Taste in Books

Non-fiction is steadily gaining. In philosophy, biography, art and science, the "chatty," superficial book is no longer good enough. The reader questions what five years ago he accepted. —Woman's Home Companion.

POULTRY

PLAN TO PREVENT POULTRY LOSSES

Poor Production Usually Due to Insanitary Methods.

Successful poultrymen realize that practically all heavy losses in poultry are preventable, according to Charles N. Keen, assistant professor in poultry at the Colorado Agricultural college.

Heavy losses and poor production in poultry are usually due, Mr. Keen says, to some of the following factors: Failure to have clean houses, clean feed, clean water, birds free from parasites and failure to remove sick birds from the houses.

The fact that one changes the straw regularly does not mean that the house is in a good sanitary condition. Regular cleaning of the dropping boards must go with it. When you enter a poultry house during cold weather and the odor is such as to make you halt when you open the door, it is evident that the air is not sanitary.

The practice of feeding in open hoppers, dishpans and the like, allows droppings to get into the mash feed. This spreads disease and causes a great deal of waste. Stagnant water left in the house for 24 hours, to three or four days at a time, is not a sanitary condition.

Birds which are affected with lice and mites become weakened and subject to disease. The following system used at the Colorado experiment station while birds are housed during the winter has proved very satisfactory, and we have little trouble with disease.

Dropping boards are cleaned three times a week or more and sprayed often with a spray consisting of 50 per cent creosote oil and 50 per cent distillate or kerosene with one-half pint creosote disinfectant added to five gallons of the mixture. This spray is used from once a week to once a month, depending upon the amount needed. The dropping boards are oily from this spray. This helps in cleaning them during cold weather.

A good disinfectant mixed with water is used for nests and other parts of the house several times a year. For lice the perches are painted with nicotine sulphate four or five times a year, or more often if necessary. Whenever colds appear a good disinfectant is used in the water, and any birds appearing weak or showing a tendency to roup, are removed. All birds which become sick are killed. It is surprising how much the killing of a few diseased birds will save.

Summing It Up

Speak kind words and you will hear kind echoes.

Sunlight for Poultry Flock Quite Essential

During the winter months the location and adjustment of windows in the laying house are very important. There should be windows in each end of the house so that sunlight will strike the entire floor some time during the day. Along the south wall should be a large number of windows, and it is preferable that these be made of a high grade glass substitute which permits the entrance of the maximum amount of ultra-violet ray. Muslin curtains and ordinary glass are not satisfactory for this purpose. These windows should be well fitted and should be kept clean as the ultra-violet ray does not penetrate through dust and dirt. Furthermore it is better that they be arranged so they can be taken down during the summer months and not subjected to weathering.

Adequate Ventilation Essential for Poultry

Adequate ventilation is important for a profitable poultry flock. Sufficient fresh air must be admitted to replace the moisture-laden air thrown off by the birds. It must be admitted so as to avoid drafts. The open front principle is used extensively in many sections. It has been determined that the openings in the front wall should equal approximately one-tenth of the floor area. To protect the flock during severe storms frames covered with a light weight of muslin may be used in the front openings.

Avoid Diseases

Raising strong healthy chicks is largely a problem of keeping them away from the infection and diseases which thrive in old poultry yards.

Experience proves that although the old birds are free from the effects of disease, they harbor many diseases which prove destructive to young chicks.

Wire screen floors have been used successfully for years by some poultrymen and their use is increasing rapidly.

Needs Shell Material

A hen producing 200 eggs a year must be supplied with sufficient calcium carbonate, so that after the loss that comes through digestion, she still will be able to deposit around the egg in the form of shell nearly three pounds of shell forming material. Such heavy calcium carbonate or egg-shell production demands serious consideration. Even though every other requirement is supplied, a deficiency of calcium carbonate will be limiting factor in production.

Hurry Call for Serum

A report has it that the pleomorphic streptococcus is guilty of the common cold as well as of influenza, and that it may yet be possible to vaccinate the man in the street car who sneezes on the back of the public neck. About a half pint of the serum for him, doctor! —Minneapolis Journal.

Analyzing ...YOU...

With the New Science of Syllabics

By C. J. COFFMAN

Dean of All the Enumerators

Elizabeth

Prophetic ability is one of your strong points, as your first syllable would show us, the EL signifying God in the language of the ancients.

In fact, your first three letters, ELL, constitute the beginning syllable of some wonderful prophecies, notably Elijah and Elisha.

Ell himself is a character of some import in the Bible.

Your name really presents quite an assortment of meanings, if we take the syllables apart. Among these might be noted power, strength and virginity.

Your erect, fine carriage and straight back would indicate a determination to carry this virginity into the attributes of mind, as well as body. It gives you independence of thought and directness of mental action, not possessed by many.

In times past, this virgin intent of mind and body has attracted the more ardent wooing by its very existence. This was most noticeable in Queen Elizabeth of England. Possessing statesmanship to a degree seldom equaled, she also possessed a very human heart. Most of her cruelties were simply an expression of her rebellion against woman's greatest loss, the lack of an ardent, true lover.

Success and a career cannot compensate for this loss, and your greatest single asset is the home and family. For this you must continually labor, making all else secondary.

Elizabeths there have been who were great in their careers but the happiest Elizabeths have been those unknown to fame, who succeeded in building a happy though humble home.

I do hope that your aspirations, your desire for big things will not lead you to select the wrong thing, Elizabeth. What the world calls the big things are by no means the best things. They are only good insofar as they contribute to the best things. You are probably as able as I to pick out the best things. They are legion, but their name is Love.

(© 1930, Western Newspaper Union.)

Women Barred From Bridge

A sign posted on the Forth bridge in Scotland forbids any woman walking across the structure and it is said the restriction is rigidly enforced. The reason is that the walk is considered too precarious for a woman to attempt.

WHY ALL THIS DELAY?

It has now been several weeks since the hearing on the petition of the phone company on the rate increase and up to the present time we have heard of no decision. Naturally the question arises "Why all this delay?"

Can it be possible that the phone company has decided that no increase is wanted? Or are they holding off the decision until the last moment before rentals are due and spring it before the patrons have a chance to think it over and plan a line of action?

In case it is the latter, we do not think that it will require any time for the majority of the patrons to reach a decision, and in case of any increase in rates there will be a wholesale removal of phones.

We understand that the Wabash people are going right ahead with their organization on a strictly co-operative plan and intend to put in their own lines regardless of the outcome of the present increase. If an increase is granted and put into effect in this locality we believe that our people will follow suit and do just what the Wabash people are now doing. At any rate we urge all phone holders to stick together and order their phones removed as soon as any raise is tacked onto their rental.

INERTIA HURTS COLLEGES

By REV. DR. BELL, Warden St. Stephen's College, New York.

American higher education, professional schools and graduate schools as well as American life in general, are suffering from a lack of men and women emerging from the colleges with any unified concept of life or any perception of what is needed in cultured living. We are suffering from an insufficient training, preparatory to specialization in the understanding of life as a whole, in perception of human values, in estimation of the human problem as a unit.

In our colleges there are four conflicting desires. One is the old one of turning out balanced and thoughtful people. A second is, by premature specialization, to turn out technicians in scholarships. A third is to fit men to earn a living rather than to live, to make the college into a trade school. A fourth is to provide four years of pleasant, social experience with a veneer of polite accomplishment, with athletics and "student activities" bulking very large in the life of the undergraduates as they gently submit to be sprayed with culture.

There can be little of renewed effectiveness until purpose is redefined along the first line. This is hard to do, because inertia has carried the colleges far into evil ways.

The only solution to the problem is the revival of the small, resident college connected with a university, where older and wiser men can talk casually, intimately and informally with the younger men in the undergraduate body.

PRISON SYSTEM WORKS REFORM

By LEWIS E. LAWES, Warden Sing Sing Prison.

STATISTICS will show that 73 per cent of the men leaving prison on parole make good. Three out of four never come back to Sing Sing. For all the criticism, and some of it is justified, that is leveled at New York state's prisons, I will venture to say that the prisons today are 1,000 per cent better than they were twenty-five years ago. I was first trained, for three years, under the hard-boiled system or iron discipline then in Elmira, Clinton and Auburn prisons.

But my mind changed about methods after that. I've learned that the administration of any prison is a matter of judgment. In a way the public is to blame for the uncertainties in prison management. The public attitude toward prisons and prisoners is very fickle. First the people will clamor for punishment of lawbreakers in prison and then again they will decry it. They want either hatred or pity. I try to avoid both.

I believe in fair play for inmates and that is all. I introduced some concessions. I was the first warden to ever let inmates give a show to the outside public at which an admission fee was charged. I allow this to let the Mutual Welfare league raise funds for useful, reasonable welfare work for all the prisoners.

I haven't lost confidence in human nature and thank the Lord I have a sense of humor.

NEVER TOO OLD TO LEARN

By PROF. HERBERT SORENSON, University of Minnesota.

Results of exhaustive tests have demonstrated that one is never too old to learn. At thirty-five or forty, and even later, the ability to acquire new knowledge through study is evident provided only that the break with youthful study habits is not too old.

The acquisition, association and retention of facts and symbols atrophies only with disuse, not necessarily with increasing age. Those who have been active in study show no age handicap. The ordinary learning curve would show a steady rise from eight to sixteen years, and probably to twenty or later, remaining then parallel to its base line until the age of twenty-five, dropping slowly to thirty-five and then, somewhat more rapidly, decreasing to forty-five or later.

Explanations for this decrease may be due to an inner degeneration of the nervous system, to disuse or long absence from systematic study, to lessened enthusiasm with increasing age or to lessened opportunity for study caused by heavier vocational demands.

Just as exercise will improve muscles and pep up a physique that has been allowed to grow soft, so continued study will probably more than make up for any deterioration that has set in. So far as we know, the brain does not suffer changes with advancing age. If one wishes to keep his mind unimpaired he should keep it active. Atrophy is the product of disuse.

SHERWIN-WILLIAMS PAINT HEADQUARTERS

Specify S-W
Enameloid

Mrs. Pheobus Ends Life By Taking Poison

Formerly Miss Ruby Grubbs of
This Place.

(Warsaw Times March 19)

Mrs. Clarence Pheobus, 24, formerly Miss Ruby Grubbs, daughter of Mr. and Mrs. Daniel Grubbs, of west of Mentone, died at about 9:30 o'clock Tuesday night at the Pheobus country home two miles south of Warsaw, two hours after she had taken a quantity of poison with suicidal intent.

At 7 o'clock last evening she telephoned the Elks' club here asking to speak to her husband. He had not arrived at the club having just left his home. Walter Brant answered the telephone.

"I've done something I ought not to have done. Get Clarence and come right out here at once," she said to Brant.

Brant met Pheobus as he was entering the Elks arcade and together they drove to the Pheobus home. There Mrs. Pheobus told them she had taken a quantity of poison, an insect powder. They somewhat doubted her statement judging from her composure and previous threats to commit suicide, but summoned Dr. S. C. Murphy. On his arrival she had become very ill and was vomiting. Dr. Murphy worked with her for some time then hastened back to town to procure emulsions to administer.

Between her spasms of nausea she jested with those around her. Upon the return of the physician she had expired.

Previous threats to commit suicide "because my husband don't love me any more" had been given little credit by her friends.

Miss Grubbs became the wife of Mr. Pheobus last fall. She was previously employed as a nurse at the McDonald hospital, Warsaw, and was born and reared at Mentone.

Corner Paul Landis today returned a verdict to the effect that Mrs. Pheobus died by suicide.

Funeral services of Mrs. Clarence Pheobus were held Friday afternoon at 2 o'clock at the Bibler Funeral home in Warsaw. Officiated by Rev. Shaffer. Burial was made in the Palestine cemetery.

Nugget of Wisdom

We make allowance for the follies of youth. But if it wasn't for the allowance we would probably get less folly. Detroit News.

GAS GROUNDHOGS EARLY SAYS PURDUE SPECIALIST

Purdue News Service.

To prevent damage by groundhogs and obtain the best results with recommended methods, it is advisable to apply control measures during April, says G. C. Oderick, rodent expert of the U. S. Biological Survey and Purdue University Agricultural Experiment Station.

After a long winter's nap, groundhogs are very busy during March and April preparing to raise a litter of from three to seven young. New burrows are dug and old burrows are made more extensive; thus providing a hazard to livestock in walking or running over infested pastures and fields. Each year burrows made by the animals in levees cause breaks results in severe losses and erosion of soil develops from their burrows in ditch banks, hillsides, and sloping land. Growing crops, particularly the legumes such as soybeans, clover and alfalfa are also seriously damaged by animals each year.

Two fumigants may be cheaply and effectively used to control groundhogs. Calcium cyanide, a dry powder releasing hydrocyanic acid gas, is applied by placing a tablespoonful far into the burrow where it forms a gas which destroys the animals entering or leaving the burrow. Carbon bisulphide, a liquid, is applied by soaking rags or waste with an ounce of the liquid and placing it in a burrow where it forms a deadly gas. In using either of the two fumigants, all burrows in a den should be treated and the entrance to each burrow closed with sod or other material.

These methods should be used in groundhog burrows only during April, May and June, when the groundhog young are reared. During this period fur bearing animals will not be found in groundhog dens and will not therefore, be harmed by the use of the fumigant.

Full particulars regarding the method of groundhog control is found in a recent publication; U. S. Dept. of Agriculture Leaflet No. 21 entitled, "Woodchuck Control," obtainable from the Department of Entomology, Purdue Agricultural Experiment Station, Lafayette, Indiana.

Diamond Grounds

Most of the diamonds found in South Africa are found far below the surface in what is called "blue ground," some of the main shafts being 2,000 feet or more in depth. The Alaskan mines are of two general kinds, placer mines and lode mines. The placer mines are near the surface, while many of the lode mines are deep mines.

Federal Reserve Advises
Russia Answers the Pope
In A. D. 1001930
Gangsters, Cruel, Silent

Los Angeles.—The federal reserve chief tells business to go ahead boldly, showing more initiative, less hesitancy.

Excellent advice. Business will advise the federal reserve, when and if prosperity booms again, to be less enthusiastic about promoting usury, and run the federal reserve more like a banking institution, less like a pawnshop.

Reserve board financiers that forced 15 to 20 per cent interest rates, handing hundreds of millions to money lenders and adding thousands of millions in value, temporarily, to inflated bank stocks, need advice as much as any business man needs it.

Russia, inflamed by the pope's protest against atheistic propaganda, retaliates in vindictive fashion. In the Minsk district a fund is started to build an airplane, presumably for war, to be called "Our Answer to Pope Plus." And from the Veronesh district workers send to the industrial fund at Moscow ten carloads of church bells, sacred images, crucifixes, etc., to be melted down. That shipment is called "an answer to the pope."

One item of news will be remembered a million, and ten million, years hence.

Nothing else in our age will be of the slightest consequence, even 100,000 years from now.

The news that will outlast recollection of this age of industrial and financial barbarism is the discovery of another planet in our solar family, sailing around outside the orbit of Neptune.

Earth dwellers in the year one million nineteen hundred and thirty, as they converse in the ozone area, thirty miles above the earth, will wonder how such primitive beings as ourselves could have discovered that planet.

Similarly, we wonder how primitive cave dwellers could have made those interesting pictures of rhinoceroses and horses.

Gangsters are not kind to each other.

John ("Billiken") Rito, described by police as "a bootleg racketeer," member of the "Bugs" Moran gang, lies in the morgue. Wires with which his arms, hands and ankles were bound when he was taken out of the Chicago river have been removed. The police wonder who burned the tips of his fingers in the process of torturing him before he was murdered, and why they did it. They will never know. Racketeers kill, and don't talk.

Golf links, daily dozens, radio setting-up exercises and other devices are designed for the man who leads a sedentary life physically. Edison wants to know: "What about the man mentally sedentary and inactive? Who will plan something for him?" Many millions need to be called early on the radio with this question: "How long is it since you have exercised your mind? How much reading worth while do you do, and how much do you think as you read?" It is mental, not physical, inactivity that hurts a nation.

The Union Pacific railroad has bought \$500,000 worth of fine new motor omnibusses. Railroad men have passed the phase of contempt for automobiles. The Union Pacific will use 22 new omnibusses between Chicago and Los Angeles, 11 between Portland, Spokane, Boise and Salt Lake City.

What people think decides what they are. Prosperity is to a considerable extent a matter of psychology.

Once a man was fastened in a chair, his feet put in warm water, and as a practical joke he was shown a razor of which the blunt end was drawn across the soles of his bare feet. He was told, "You will bleed to death painlessly in this warm water." He didn't lose a drop of blood, but he died.

Don't let prosperity die in that fashion, killed by imagination.

Mr. Edison is hopeful about a rubber supply from goldenrod. Chemists who think it ought to be done by some synthetic process and victims of hay fever are less optimistic.

The great inventor, eighty-three years old, says he wants only five years more to finish this job, and doesn't ask to live one hundred years.

The death of Primo de Rivera, former Spanish dictator, killed by heart disease, reminds you that being dictator is a wearing job. It takes such a man as Mussolini to stand it for a long time.

The Italian ruler establishes a "minor" class of citizen, not obliged to enter the Italian army.

This is planned to keep Italians in foreign countries interested in Italy. Wise Mussolini.

President Hoover, like a good family doctor for the nation, says nothing or says things that are encouraging. There is a great deal of value in that.

Buy what you want, beginning with a good automobile; buy it now and then enjoy it now. Life does not last forever. Keep it busy, and full. (©, 1930, by King Features Syndicate, Inc.)

Earned Sobriquet

The sobriquet "the Commoner" was applied to William Jennings Bryan early in his political days because of his championing of the cause of the common people. After the election of 1900 he established at Lincoln, Neb., a political magazine of wide circulation which he named the Commoner.

Scallop and Fringe Brims Berets and Pokes for Spring

This quartet of smart spring hats features a scalloped linen straw brim (see first hat); also the close fitting draped beret of supple fabric-like straw. The smartness of the poke bonnet when made of navy or black glossy panamalaque is evidenced in the model to the left below. The self-fringed linen straw brim is very chic as will be seen by the hat to the right.

Lace or Chiffon Frocks With Jacket or Bolero

With every dress a jacket or bolero is fashion's ultimatum—and frocks of filmy lace or wispy, flowery chiffon are no exception to this rule. The beauty of the matching bolero or jacket is that the wearableness of the gown multiplies in that the afternoon ensemble with the jacket removed becomes a sleeveless evening mode.

Splendid Royal Show

The Field of the Cloth of Gold was the name given to the meeting place of Henry VIII of England and Francis I of France, near Ardres, France, in 1520, on account of the gorgeous apparel of the participants and the splendor of the pageantry that took place.

What Really Counts

It is not what you'd do with a million, if riches should be your lot, but what you are doing at present with the dollar and a-half you've got.—Exchange.

Peplum, Bolero, Cape Stylize Spring Modes

Spring modes revel in such stylizing details as boleros, capes and peplums. The latter are apt to flare anywhere from the waistline to the knees. The peplum jacket is a popular note. Boleros of every description flourish in connection with both daytime and evening modes as a separate item or incorporated in the making of the garment itself. Capelets are ingeniously designed to take the place of sleeves. Graceful cape-back effects enhance many a formal evening gown.

Brimmed and Draped Hats Feature Novelty Straws

Your choice, so says fashion, in regard to widened brims or close fitting draped effects. Straws, too, cover a wide range, extending from the smart linenlike panamalaque, sisol, bakou, panama and such exotic types to fanciful straws of every variety, stressing crochet effects as pictured.

TALMA NEWS ITEMS.

Mr. and Mrs. Earl Zent spent Sunday with Lloyd Zent and family.

Mr. and Mrs. Blanche Darr visited friends at South Bend last Sunday.

Alonzo James Haimbaugh spent Saturday night with Delbert Hunter.

Mr. and Mrs. Ora Horn and John Horn spent last Sunday with Peter Horn and family.

Mrs. Fred Mercer and daughter and Miss Edna King visited Saturday and Sunday with friends in Whiting.

Mr. and Mrs. Lee Tippy have moved to Rochester and Harley Mathews and family have moved on the Tippy farm.

Mr. and Mrs. Logan Vandoran and daughter of Warsaw took Sunday evening supper with Mack Haimbaugh and family.

Percey Fuller and family of Tippecanoe and Oliver Kalambacker were Sunday guests of Mr. and Mrs. John Kalambacker.

Mr. and Mrs. Raymond Weirick and children visited the former's brother, Rupert and family near Bremen last Sunday.

Mr. and Mrs. John Rickel and children called on their daughter, Mrs. Ed Severns at the Emergency hospital at Warsaw last Sunday.

Mrs. Mack Haimbaugh and daughter Geraldine and son Alonzo spent Saturday in Warsaw shopping and also called on the former's parents, Mr. and Mrs. James Vandoran.

'THE WHOLE TOWN'S TALKING.'

A rip-roaring three act comedy to be given by the Senior Class of the Mentone H. S. at the Community Building, Wednesday, evening April 9th, at 8 o'clock. Admission 25 and 35 cents. See bills.

FALLS DOWN EMBANKMENT.

Ella McKinley, formerly of this place, but now of Indianapolis, met with an accident on Sunday March, 16, when she fell down an embankment and fractured a wrist, limb and skull. She is now in an Indianapolis hospital and her condition is considered quite serious.

COUNTY FARM BUYS ROUND BROODER HOUSE.

The Mentone Lumber Company delivered a round brooder house to the county farm the first of the week. It seems that the round brooder houses built by this local concern are meeting with great favor with the poultrymen and it is keeping the lumber yard busy to supply the demand.

MENTONE NEWS ITEMS

Mrs. Etta Hathaway of Brookston is a visitor of Mr. and Mrs. A. E. Eberly this week.

Miss Bernice Koher is reported to be seriously ill at the Woodlawn hospital at Rochester.

Mr. and Mrs. Verdo Smith moved to their farm formerly known as the Wash Doran farm, at the edge of town, one day last week.

Mr. and Mrs. Arlo Frisner and Emma Blue entertained at Sunday dinner, Mr. and Mrs. Vincent Brockey and daughter Mamie and boy friend, Bill Applegates, Mr. and Mrs. Everett Cramlet and baby, Mr. and Mrs. A. E. Swartz and two children Mrs. Chas. Changers all of South Bend, Mr. and Mrs. Abe Brockey and Mr. and Mrs. Verdie Brockey of Talma.

DEATH OF MRS. ALLIE MOON.

Mrs. Allie Moon formerly of this place died at the home of her daughter near Burket, Monday forenoon. We have been unable to learn the funeral arrangements.

Some New Advertisers This Week.

We have several new advertisers this week, and business conditions look much brighter for the Farm News. Hope our subscribers will give them enough extra patronage so that they will become regular buyers of space in the Farm News. Our readers should bear in mind that it is the advertising patronage that we receive that makes it possible for us to publish this paper. Hence if you want a paper in Mentone patronize the advertisers.

Farm Home Destroyed By Fire

Fire destroyed the two story frame house owned and occupied by Festus Minear, near Claypool Sunday. The flames were discovered about 11:20 Sunday morning and the Claypool fire department rushed to the scene but was unable to cope with the blaze. The Warsaw department was called and Loren Melick, driver of the big fire truck and a number of the volunteer firemen made a run to the place. However the entire upper story had burned away and nothing could be done after a cistern had been pumped dry. Most of the household goods were saved. It was said the blaze started from a spark on the roof. People who were present at the fire state that the building could have been saved had there been a community fire truck in the vicinity.

Purest Water

Fanny

Somehow Fanny takes us to a country place. Perhaps it is a small farm, on the edge of a little village in the West.

Fanny's Fan.

Perhaps people call you Fan for short. A lot of things have been done with a fan, the weapon of coquetry, concealer of the unconcealable.

Fans may be out of date, but if they ever come back in style, you must get one, Fanny. You could do so much with it.

In the modern sense a fan is one who is very enthusiastic concerning some sport or some thing. To us it means an ardent follower. You are all of that when your enthusiasm is once aroused.

You are inclined to be quite steady in your delights.

The serious side of your nature might find its best outlet in nursing or in teaching. It is likely, however, that you would couple this with the natural duties arising in a home of your own. This is because you are primarily domestic.

So, if you do not want a career among the great ones, so-called, I shall not blame you. Much study has convinced me that all the happiness of life is not in careers, even though there are many happy people who have developed greatness.

But if you should decide upon a career, something dramatic or literary should claim your devotion. Fanny Hurst gives you a good example of how your name could be made famous in the literary field. You might find that there was not such a great difference between Fanny Hurst and Fanny You, for she is just a human being like yourself, who has brought out the common things of life in a big, fine way.

Now the way to bring out the common things in a big, fine way is to put the finest bigness of yourself into the common things you do. That is not too preachy, is it?

Printed Cotton Net
Versus Flowery Chiffon

Here is a style-note for the "summer girl" to bear in mind—the chic of printed cotton net. Frocks of these gaily be-flowered nets invite a most feminine fashioning which employs fluttery flouncings, cunning capelets to take the place of sleeves, and all sorts of other beguiling devices. Of course a huge lovely transparent cape-line such as milliners promise for summer is the logical chapeau to top an enchanting frock of dainty net.

PSI IOTA XI MEETING.

Beta Epsilon Chapter of Psi Iota Xi Sorority entertained the Senior girls of Mentone High School Friday evening, March 21, at the home of Mrs. Robert Reed. Home and table decorations and contests enjoyed during the evening carried out a Japanese note, and Bunco was a feature of the entertainment. A chop suey supper was served, at which the honor guests were presented with corsages of sweat peas. Guests included the following Senior girls: Mable Sarber, Eileen Mollenhour, Beulah Kelley, Frances Rush, Anna Lohrer and Marjorie Baker, and the following Sorority members; Bernice Bowen, Francis Clark, Thais Greulach, Artella Kesler, Annabel Mentzer, Nellie Reed, Pauline Riner and Mary Jane Borton.

MENTONE NEWS ITEMS

Mr. and Mrs. H. Paxton and children visited Mr. Paxton's brother, Silas, Sunday.

Miss Mary Wilson of Talma spent the week end with her grandparents, Mr. and Mrs. E. S. Lash.

Mr. and Mrs. Ronald Goshert and family were guests Sunday evening of Mr. and Mrs. George Myers.

Mr. and Mrs. Herbert Hamman and family of Leiters Ford spent Sunday with his uncle, Adam Bowen and family.

Mr. and Mrs. Charley Nelson of Fort Wayne, brother of Mrs. Cora Williams visited at the Billy Williams home Sunday.

The Junior Class of the Tippecanoe High School presented a play entitled "The Lady Of The Library" Friday and Saturday evening of last week at the school building. A large crowd was reported both evenings.

INSURANCE OF ALL KINDS.

J. A. Champers, has the insurance agency formerly conducted by the late Marion Heighway, and is in a position to handle any business that he may be favored with. He will make a specialty of fire and automobile insurance, with first class service at reasonable rates.

"NOBODY BUT NANCY."

"Nobody But Nancy" a whirlwind farce-comedy, will be presented Friday evening, March 28, in the Beaver Dam gymnasium.

This is truly an attractive comedy. Nancy King, eighteen and always in trouble, is the despair of the whole town of Sweet Springs. To secure a coveted job from her rich Uncle Adam, who employs only married people, she writes that she is married

This is not entirely true, for she is indeed single. When the news arrives that Uncle Adam is coming to town, Nancy suddenly faces the desperate necessity of finding somebody for a husband, and of finding him quickly. What happens when Uncle arrives furnishes situation for a very excruciatingly funny comedy.

Adeline Perkins, the town old maid, who has a certain weakness for the rich peppery uncle, Adam King, provides a good comedy role.

Jimmy McCabe, an uncultured but honest chap, who is smitten with Fanny, the hired girl, furnishes loads of laughter.

Be sure to see this three act royalty play Friday evening, March 28.

W. C. T. U. MEETING.

The Mentone W. C. T. U. met in local institute March 18th, at the Baptist Church.

Devotional led by the president, Mrs. Russel Norris. The afternoon session was taken up by business and talks by different members; and a round table conducted by Mrs. Oyler of Warsaw. At 6:30 the luncheon in the basement of the church was enjoyed by everyone present.

At the evening session the devotional was led by Mrs. Oyler of Warsaw, followed by a miscellaneous program. Salute to both flags the Christian flag and the Stars and Stripes by Lucille Warren, song by Mrs. Severns and Mrs. Nellans. Reading by Mrs. Devon Eaton. Song by the Power sisters. Reading by Ethel Mae Power. The principal address of the evening was given by Rev. E. M. Riddle of Warsaw. His theme being The Test of Citizenship.

BAPTIST CHURCH NOTES

Bible School will be held at the usual hour next Sunday morning. Rev. Davission of the Bethlehem Church will preach at the morning service. In the evening we will unite with the Methodist church in a service under the auspices of the Anti-Saloon League of Indiana. Rev. Jerrens of Indianapolis will speak. Come to this meeting and be informed from headquarters regarding these things.

The Ladies Aid will meet at the church on Wednesday afternoon, April 2nd, to have the opening of the Sunshine Bags which were given out last fall. A special program of entertainment is being prepared and every women of the church is invited and urged to attend.

NOTICE TO THE R. N. A.

The Officers and Members of the Maple Leaf Camp, are requested to be present Saturday evening March 29th, for practice. A committee will entertain.

Several from Mentone attended the Rodio at Peru Sunday.

Miss Vadis Elick spent the week end with Miss Anna Teel of near Tippecanoe.

Better read over the advertisements carefully—you may be the lucky one and get \$5.00.

Mr. and Mrs. George Neuell and family were Sunday dinner guests of Mr. and Mrs. Jesse Neuell

Mrs. Rose Carey and daughter Clarabelle spent Sunday in Warsaw with Mrs. Pearl Joyce and family.

Mr. and Mrs. Wade Whetstone and family spent Sunday with Mr. and Mrs. Archie Latimer at Akron.

Mr. and Mrs. Boyce Underhill of South Bend spent Sunday with his parents, Mr. and Mrs. Charles Emmmons.

Many thrifty house wives save more than \$5.00 per year reading over the special offers each week in the Farm News.

Mr. and Mrs. Wilson Horn and Mr. and Mrs. Russell Creighton and children visited Mr. and Mrs. Elmer Sarber Sunday.

Mr. and Mrs. George Baker and family of Packerton were Sunday guests of Mr. and Mrs. Lawrence Elick and family.

Mr. and Mrs. Raymond Hibschan and family of near Milford spent Saturday and Sunday with relatives in and near Mentone.

Mr. and Mrs. C. B. Cole and family had as their guests on Tuesday evening Mr. and Mrs. Carl Cuthers and Miss Betty Coburn of Fort Wayne.

Mr. and Mrs. Byron Spittler of Akron and Mr. and Mrs. Ray Riner attended the funeral of Mrs. Edward Norris at Chili Wednesday afternoon.

Mr. and Mrs. Mace Sarber entertained at Sunday dinner, Mr. and Mrs. Abe Whetstone, Mrs. Albert Sarber, Mrs. Ora Bowman and Mrs. Lizzie Morgan.

Mr. and Mrs. Donald. Baum of Warsaw, Mr. and Mrs. K. A. Riner and Mr. and Mrs. Ray Riner were six o'clock dinner guests of Mr. and Mrs. Oliver Grove at Rochester Sunday.

Mr. and Mrs. Henry Robbins and son Virgil and Mrs. Floyd Halterman attended the funeral of their cousin, Mrs. Clarence Pheobus, which was held last Friday afternoon at Warsaw.

Mr. and Mrs. George Igo entertained at a six o'clock chicken dinner on Wednesday evening the following guests, Mr. and Mrs. Carl Cuthers, Miss Betty Coburn, Miss Ruth Igo all of Fort Wayne, and Mr. and Mrs. C. B. Cole and son Robert.

EASTERN STAR NOTICE.

There will be a special meeting of Eastern Star Chapter at Masonic Hall Friday evening, March 28th. There will be initiation and a special entertaining committee.

Whether you win the \$5.00 or not it will pay you well to read over the advertisements in each issue.

M. E. CHURCH NOTES.

The Northern Indiana Annual Conference will convene Tuesday evening April 1st, at Hartford City. Bishop Frederick Fisher who is a former member of this conference will preside. An excellent program has been arranged and anyone who can attend will find speakers of ability for any day's session they can attend. The Conference will adjourn Monday April 7th,

This week being the last week of our year we urge our people to do all they can to help close a prosperous year. Especially we are anxious to make next Sunday a banner attendance day for both in the Sunday School and Worship Services.

The Go-Forward Class will have a social and pot-luck supper for the members of the class and their families Wednesday evening March 26th, at the church.

Prayer Meeting Thursday evening at 7 o'clock.

NEW PLUMBING AND HEATING ESTABLISHMENT

L. M. Fife Now Located in Room
Formerly Used by Armour
Cream Station.

Mentone now has a plumbing and heating establishment up town on West Main Street next to the monument works.

Mr. L. M. Fife has purchased the plumbing and gas fitting stock of the Mentone Lumber Co., and will move the same to his new location in a few days. He is having the front room painted and repaired and will use it as an office and display room. The rear room he will use for his shop. He will keep a complete line of plumbing and heating supplies and will order anything that his customers may want in his line on short notice. Aside from a general plumbing and heating business he is prepared to do electric wiring and soldering of all kinds. Mr. Fife is a first class mechanic, understands his business, and will gladly furnish estimates on any thing in his line that you may want.

JOE IGO DIES OF MENINGITIS.

End Comes Sunday After Illness of Several Weeks.

Joe Igo, 33, of this place expired at 3:30 o'clock Sunday afternoon at the McDonald hospital where he had been a patient since Wednesday night, March 12. Mr. Igo became ill while visiting in Rochester, Sunday, March 9th. It was found on the following Wednesday that he had contracted spinal meningitis. He remained conscious for only short periods during the last few days of his illness. An abscess had formed at the base of his brain, adding greatly to the pain he suffered.

The deceased was born in Franklin township and had resided just south of Mentone until 10 years ago when he moved to Mentone and engaged in stock buying.

Surviving are his parents, Mr. and Mrs. Omer Igo, of Mentone; four brothers, Lewis Igo, of New Mexico; Ernest, Virgil and Edgar Igo of Mentone; five sisters, Mrs. Marion Taylor of Atwood; Mrs. Floyd Tucker and Mrs. Elmer Huffman of Mentone; Mrs. Roy Walters, of Burket, and Miss Lillian Igo, at home. A grandmother, Mrs. Lucinda Black, 83, of Mentone, also survives.

Funeral Services were held Tuesday afternoon at 2:30 at the home. Officiated by Rev. Homes of Logan-sport. Burial was made in the Nichols cemetery.

CLUB MEETING.

On March 20th, the Sodales Club met with Wanda Davison and Ethel Nellans as hostesses at the home of the former. Roll call was responded with "Bits Of Irish Wit." The Secretary's report was read and approved. Hazel Lynn gave a very interesting paper on "Antique Furniture." The remaining part of the afternoon was spent in playing rook. The prize being given to Edna Burns. A delicious luncheon was served on small tables which were decorated with carnations, the club flower. After which, the members adjourned to meet with Mrs. Ella Stanford, on March 27th.

Abbreviation of John

The custom of abbreviating John as "Jno." seems to be an ancient one. "Notes and Queries" of June, 1864 says: "Our forefathers write 'Jhon' oftener than 'John,' and the 'h' in former days assumed the form of 'n.' 'Jhon' contracted into 'Jho,' and writing the 'h' as 'n' becomes 'Jno.'"

To Stabilize Table

If the legs of your card table show an inclination to fold at an inopportune time, an invisible hairpin wrapped tightly around the center, where the two braces clamp, will meet the emergency.

MENTONE NEWS ITEMS

Several from Mentone attended the Rodio at Peru Sunday.

Miss Vadis Elick spent the week end with Miss Anna Teel of near Tippecanoe.

Better read over the advertisements carefully—you may be the lucky one and get \$5.00.

Mr. and Mrs. George Neuell and family were Sunday dinner guests of Mr. and Mrs. Jesse Neuell

Mrs. Rose Carey and daughter Clarabelle spent Sunday in Warsaw with Mrs. Pearl Joyce and family.

Mr. and Mrs. Wade Whetstone and family spent Sunday with Mr. and Mrs. Archie Latimer at Akron.

Mr. and Mrs. Boyce Underhill of South Bend spent Sunday with his parents, Mr. and Mrs. Charles Emmons.

Many thrifty house wives save more than \$5.00 per year reading over the special offers each week in the Farm News.

Mr. and Mrs. Wilson Horn and Mr. and Mrs. Russell Creighton and children visited Mr. and Mrs. Elmer Sarber Sunday.

Mr. and Mrs. George Baker and family of Packerton were Sunday guests of Mr. and Mrs. Lawrence Elick and family.

Mr. and Mrs. Raymond Hibschan and family of near Milford spent Saturday and Sunday with relatives in and near Mentone.

Mr. and Mrs. C. B. Cole and family had as their guests on Tuesday evening Mr. and Mrs. Carl Cuthers and Miss Betty Coburn of Fort Wayne.

Mr. and Mrs. Byron Spittler of Akron and Mr. and Mrs. Ray Riner attended the funeral of Mrs. Edward Norris at Chili Wednesday afternoon.

Mr. and Mrs. Mace Sarber entertained at Sunday dinner, Mr. and Mrs. Abe Whetstone, Mrs. Albert Sarber, Mrs. Ora Bowman and Mrs. Lizzie Morgan.

Mr. and Mrs. Donald Baum of Warsaw, Mr. and Mrs. K. A. Riner and Mr. and Mrs. Ray Riner were six o'clock dinner guests of Mr. and Mrs. Oliver Grove at Rochester Sunday.

Mr. and Mrs. Henry Robbins and son Virgil and Mrs. Floyd Halterman attended the funeral of their cousin, Mrs. Clarence Pheobus, which was held last Friday afternoon at Warsaw.

Mr. and Mrs. George Igo entertained at a six o'clock chicken dinner on Wednesday evening the following guests, Mr. and Mrs. Carl Cuthers, Miss Betty Coburn, Miss Ruth Igo all of Fort Wayne, and Mr. and Mrs. C. B. Cole and son Robert.

EASTERN STAR NOTICE.

There will be a special meeting of Eastern Star Chapter at Masonic Hall Friday evening, March 28th. There will be initiation and a special entertaining committee.

Whether you win the \$5.00 or not it will pay you well to read over the advertisements in each issue.

M. E. CHURCH NOTES.

The Northern Indiana Annual Conference will convene Tuesday evening April 1st, at Hartford City. Bishop Frederick Fisher who is a former member of this conference will preside. An excellent program has been arranged and anyone who can attend will find speakers of ability for any day's session they can attend. The Conference will adjourn Monday April 7th.

This week being the last week of our year we urge our people to do all they can to help close a prosperous year. Especially we are anxious to make next Sunday a banner attendance day for both in the Sunday School and Worship Services.

The Go-Forward Class will have a social and pot-luck supper for the members of the class and their families Wednesday evening March 26th, at the church.

Tweed, Tweed, Tweed! Is Fashion's Spring Song

In planning her spring wardrobe the style-conscious woman includes a tweed suit. The new lacy tweeds vie with tweeds which are nubbed or flecked with white or a contrasting color. A fascinating thing about this season's tweeds is their colorfulness, which trends to dull pastels in many instances. The tweed suit in the picture features one of the "last word" sleeveless jackets with a cape. A rival to tweed suits and ensembles is the knitted costume, the knitted effects taking on a tweed patterning.

Crisp Taffeta Again Comes Into Its Own

There are taffetas and taffetas down on the spring fabric program. Many are in monotone, navy in particular, bright hues or dusty pastels, or perhaps in the new hacienda, this rusty red being the color choice for the so very youthful frock in the picture. You'll love the gorgeously flowered printed taffetas for evening wear. Other taffetas prefer to be patterned with little bouquets a la directoire. And taffeta hats! Ask your milliner—she knows.

PROFITS FROM THE TWO-LITTER HOG SYSTEM ON INDIANA FARMS.

Purdue News Service.

Receipts from the sale of hogs from Indiana farms are greater than the combined receipts from all other livestock and livestock products, G. E. Young of the farm management staff of Purdue University pointed out recently. The value of hogs sold is approximately four times as great as the value of corn sold. The efficiency of hogs in marketing the corn crop is shown by five years records of the hog enterprise on central Indiana farms from 1922-1926. Hogs returned 99 cents per bushel after paying for all other costs as well as the labor required to care for the hogs during these five years. Had the corn been sold on the market at the same time that it was fed it would have brought 67 cents per bushel.

The practice of raising two litters per year is a common one in Indiana. It is well suited to most Indiana conditions though it is not well adapted to some farms. The total pig crop of the state is produced in a ratio of about 60 per cent spring pigs and 40 per cent fall pigs.

The two-litter system of hog production is an intensive system in contrast to the one-litter system. It is especially adapted to small farms which necessarily place emphasis on the greatest return per bushel of corn. On such farms it is relatively easy to produce more pigs than can be fed out on the corn produced. The purchase of additional feed and feeding two droves of pigs to light weights helps to give volume of business to otherwise small farms.

C. O. Miller of Clinton County is producing on his 200 acre farm about 250 pigs each year. His system of farrowing early spring litters and early fall litters is carried out to permit his spring pigs to be marketed in September and his fall pigs in March when the prices of hogs are usually the highest of any times during the year. The disadvantages of cold weather at the time of farrowing January and February pigs, Mr. Miller says, are not as great as the disadvantages of having late fall pigs which are too small to go through the winter efficiently. The sows farrow at a time when there is little else to do but care for the livestock.

Mr. Miller uses individual hog houses for farrowing houses and later as shelter for shoats. He has been highly successful in weaning large litters per sow and in keeping parasite and disease losses very low by using this type of house. The ease with which he can rotate pasture fields and lots with these

E. J. CARTER.

portable houses makes his sanitation problem much simpler than if permanent lots and houses were used.

Both spring and fall pigs are full-bred from the start. Pigs are fed in "creeps" before they are weaned and are given a full feed the entire time. They are ready for market by this treatment in six months but may be fed longer in case of a favorable feeding ratio.

This system of full-feeding and early marketing permits Mr. Miller (1) To take advantage of the high seasonal hog markets of the year; (2) To make best use of the feed he uses through quick maturing hogs which sell best at light or medium

weight; (3) To increase the volume of his farm business by producing more hogs than would be possible by feeding only the feed he produces.

States' Divorce Laws

The number of causes for divorce varies in different states. One state recognizes 27 causes, while there is one state in which divorces are not granted for any cause.

Man-Eating Lions

Some lions form the habit of coming into native villages and carrying off people. This gives them the name of man-eating lions. However, this is true of few lions.

Koniola Brings New Health to Hammond Man

Eager to Tell Others of Medicine that Made Good After All Else Tried Had Failed

MR. MARCUS YODER

"About a year ago I had an attack of the flu which left my stomach, liver and bowels in a weakened condition," said Mr. Marcus Yoder, 305 Truman Boulevard, Hammond. Gases formed in my stomach after every meal and caused my heart to palpitate wildly. A weak liver caused bilious attacks and dizzy spells, the latter so severe that I often staggered when I walked. I was constipated and forced to the almost daily use of cathartics.

"By the time I had taken three bottles of Koniola my stomach was back to normal, and I did not suffer the least discomfort after the heartiest meal. My liver, too, responded almost as quickly and functions perfectly today. I am no longer bilious and dizzy and do not suffer headaches. My bowels are working regularly for the first time in months and I do not find cathartics necessary. I am in excellent health for the first time in more than a year."

Koniola is sold in Mentone at Shafer & Goodwin drug store, and by all the best druggists in all towns throughout this entire section.

"HE'S MY PAL."

A three act comedy will be presented by the senior class of the Talma High School, at the Talma H. S. Auditorium, 7:30 o'clock, Thursday and Friday nights March 27 and 28. This is a play that you will want to see—it is one of the best comedies out. Admission, reserved seats 35c, general admission, 35c.

START GRAIN EARLY FOR YOUNG PIGS.

Purdue News Service.

Lafayette, Ind. March 25—Start feeding grain to young pigs when they are about three or four weeks old, to produce thrifty hogs, is the suggestion given by John W. Schwab swine specialist in the Purdue University Agricultural Extension Department. Starting early with the proper ration is one of the essentials to good health and to maintain the natural body resistance to disease. Mr. Schwab also points out that young pigs make more rapid and cheaper gains than older ones.

A home mixed feed used successfully consists of 80 pounds of cracked corn, 20 pounds of coarsely ground wheat, and 10 pounds of good tankage. The use of this feed in a self feeder is recommended by Mr. Schwab. This ration and method of feeding should be followed until the pigs weigh about 50 or 60 pounds.

The wheat may be replaced by an equal amount of flour middlings, hulled oats, or screened ground oats. Screening of the oats is necessary because the digestive system of the young pig cannot handle oat hulls readily. Skim milk, fed morning and evenings may replace the tankage. Soybeans, while good for other purposes, have not been found to be a satisfactory protein supplement for starting young pigs.

Schwab suggests using a self-feeder in a "creep" so that the pigs may get all they want but that the older hogs may be kept out in order to keep from getting them too fat, unless they are going to market.

NOTICE

I will be in C. E. Walburn's office on Wednesday evenings from 7 to 8:30 p. m. and Saturdays from 1 to 5 and 7 to 9 p. m. to take care of mortgage Exemption.

OBITUARY.

John A. Manwaring was born on the old Manwaring farm, one mile east of Mentone, June 22nd, 1867 and died March 17th, 1930 at his home in Chicago, age 63 years.

He was the son of Elliott and Sarah Manwaring and one of seven children of whom two have survived, Loren D. Manwaring of Los Angeles, California, and Susan Clay of Oberlin, Ohio.

He was united in marriage to Luda C. Thompson in 1893, and to this union was born a daughter, Newell Claire Finn, with whom he had made his home in recent years. Mrs. Manwaring preceded him in death in the year 1916.

He has been a member of the Mentone Baptist Church since early manhood and was still a member at the time of his death.

Besides his daughter he leaves to mourn his loss, a devoted son-in-law, three grand children, and a number of relatives.

ASKS YOUR SUPPORT

Irvin Gresso, formerly of the firm of The E. W. Gresso Co. of Warsaw, Indiana has announced his candidacy as a republican candidate for Auditor of Kosciusko County.

Mr. Gresso a man of broad experience in commercial lines, is a graduate of the Huntington Business University. He also attended school at the Zanerian College, Columbus, Ohio and at North Manchester, (Indiana) College.

Previous to engaging in the mercantile business, Mr. Gresso did considerable work in the Educational Field; starting, early in life, as principal of the Disko Public Schools. He next spent six years as head of the Commercial Department of the Huntington High School and six years as head of the Commercial Department of the Anderson High School. He is the author of a text book widely used in commercial schools.

Mr. Gresso has always been an active republican and has resided in Kosciusko County for the past eleven years.

"NOBODY BUT NANCY"

The Senior Class of the Beaver Dam High School will present the farce-comedy, "No Body But Nancy" at the Beaver Dam Gymnasium, Friday evening March 28th, at 8 o'clock. Admission 25 and 35 cents.

Gibraltar's Formation

The Rock of Gibraltar consists for the most part of pale-gray limestone of compact and crystalline structure. Above the limestone are found layers of dark-blue shales with intercalated beds of grit, mudstone and limestone.

POULTRY

GROWING CHICKS NEED VITAMINES

Corn, Cod Liver Oil, Milk and Grass Urged.

Give your poultry yellow corn, cod liver oil, milk and leafy feeds for vitamins, recommends the poultry department of the New York State College of Agriculture. Chicks need vitamins for health and growth and are more sensitive to a lack of these vitamins than most animals. Growing chicks need them more than mature birds.

Of the three principal vitamins for chicks, vitamin A is found abundantly in such foods as yellow corn, green vegetables, cod liver oil and milk. Lack of this vitamin in the diet will retard and stunt growth and will lower resistance to disease.

Vitamin B which maintains the health of the nervous system is found in the outside covering of cereals, in green vegetables, and in milk. A lack of this vitamin affects the organs of digestion and reproduction, and the nervous system.

Vitamin D, or the anti-rickets vitamin, hardens the bones of growing chicks and prevents leg weakness. To prevent rickets feed cod liver oil or eggs or allow the chicks to run out in the sunlight every day. Sunshine has the same effect on chicks as does vitamin D in their food. Window glass filters out the valuable rays of sunlight so cod liver oil must be fed when the windows are kept closed or even when the chicks are outside, if the weather is cloudy the greater part of the time. Feed one-half pint of cod liver oil to each 100 pounds of grain and mash. Unrefined cod liver oil from a reliable company is just as efficient as refined oil and is much cheaper.

Cod liver oil tends to lose its value when exposed to the air, so mix fresh lots of mash every week or two. Mix the cod liver oil in a small amount of bran or mash with the hands and then add this to the main pile and shovel the pile over several times until it is evenly distributed. It is usually advisable to feed cod liver oil during the first ten weeks of spring rearing. Cod liver oil should be stored in a cool dark place in closed containers.

Feed for Chicks to Be Raised for Broilers

Chicks to be raised for broilers or roasters should be fed as other chicks are up to the time of finishing for their special purposes. What are called growing mashers and the usually fed hard grains are given to produce sturdy frames upon which fat may be

deposited later in the finishing process. There are any number of formulas for these, all suitable and each preferred by some poultrymen. There are excellent commercial mixtures and formulas are given from time to time in these columns. Broilers are usually sold at from eight to twelve weeks of age and, during the last ten days or two weeks of that time are penned up and fed upon a special fattening ration, of which cornmeal makes up the greater part. If milk in some form is added in liberal quantity to this ration, the quality of the product is improved.

Vitamine D Important for Egg Hatchability

Birds that have access to direct sunlight will generally produce eggs of greater hatchability than birds that are deprived of this aid. Sunlight furnishes the vitamin D which is important. Experiment stations have not proved that cod liver oil is as effective as direct sunlight in providing this vitamin, but as sunshine is not available at all times, the majority of hatcheries require that the hatchery flocks receive cod liver oil in their ration. The addition of green alfalfa or clover hay is also an aid in supplying the vitamins needed. The use of glass substitutes on the hen houses will also aid in giving the hens outdoor conditions, even though the weather may not be suitable.

Avoid Cold Nests

A cold nest with cold eggs will often cause a good hen to stop setting. Let her warm the nest first, then place under her, eggs that have stood in a warm room for several hours. A piece of sod the size of the nest box and about four inches thick, turned grass side down, will hold the heat, and keep the moisture from leaving the eggs too rapidly when hens are setting. Make a slight rounded hollow in the center of the dirt, then put in a layer of chaff or short straw.

Don't Feed in Litter

D. C. Henderson, poultry extension specialist at South Dakota state college, says that since bacillary white diarrhea and coccidiosis can be spread only through the mouth and digestive tract of the chick, hopper feeding, as opposed to the feeding of mash and grain in the litter, may be one of the best preventive measures in combating these diseases. It is recommended that the first few feeds be given on clean newspapers, with hoppers or boxes for subsequent feedings.

Satan's Advantage

He who will fight the devil at his own weapon must not wonder if he finds him an overmatch. —South.

Why Not?

Madame Looking-Forward says the fad of sending wedding presents in pairs is so sensible, because later when the couple get their divorce each can take one of them. —Exchange.

Analyzing ...YOU...

With the New Science of Syllabics

By C. J. COFFMAN

Dean of All the Enumerators

Esther

Taking your first letter, E, and tracing it back to the ancients, we find

It has the meaning of window or light. This corresponds quite a little with the general meaning of your first syllable, ES, which signifies fiery. Queen Esther had a good deal of this quality, as you may see in the Bible. There are only ten chapters in the Book of Esther, and it will inspire you wonderfully to read it.

In the Greek ESO practically means within, while ESTHES means apparel. Coupling these two with the ancient ES means that you should be clothed with fire, a blazing example of righteous power.

Strange to remark, a large part of this will demonstrated in the way you carry your beautiful throat.

For with the thoughts, the ambitions flaming within you, you must exercise much control. Practice before your mirror as to which positions best exhibit your throat, for there is an other reason your skill in this will be effective.

This second purpose, though not secondary in fact, is your healing ability, signified in the last syllable of your name, THER. The syllable THER is a primary root in the word therapeutics, which means to possess healing qualities.

First, practice dignity and haughtiness before your mirror, especially as expressed through your pose of the throat. Next, see how much of condescension and gentle loving kindness you can express. Make it appear to yourself that you are descending from haughty refusal of the demand of a grown person, to the kindest condescension for a little child.
