### **We Are Here To Serve You.**

---

Bring your building problems to us and we will gladly help you to solve them. There are many times that the lumber dealers can suggest changes in the quality of different items, that will materially reduce the cost, without affecting the real value of the building or repair job. We have a complete line of building material, and know that the quality and our prices will please you.

## Mentone's Oldest Business Firm.

The furniture and undertaking business of L. P. Jefferies was established in 1891. and is far the oldest business concern in the community.

This furniture store has always been strictly up-to-date in every particular, and today has the neatest and finest displayed stock of home furnishings to be found in this part of the state. And that prices are right is evidenced by the numerous sales to people who reside in surrounding towns.

Mr. Snyder, who to a great extent attends to the furniture part of the concern, understands the furniture business from every angle. He is very proficient in arranging attractive window displays and takes pride in seeing that the large show window at this store presents an appearance that would do credit to a town several times this size.

In the undertaking field Mr. Jefferies also ranks the oldest in point of service in this part of the state, and his pleasing manner in handling the same has built this branch of the business up to cover a very large territory.

Levi Jefferies, as he is familiarly known, has always been active in civic affairs of the community, and has been lavish with both his time and money in the up-building of the same. Whenever he noted anything of a public nature in the community that was being neglected, he took hold of the matter himself and saw that it was properly cared for. One instance was his interest in our cemetery—For years there seemed to be no organized effort to care for our burial ground so Mr. Jefferies appointed himself a committee of one, and with what little money he could collect from an interested few, kept the place in a presentable condition—however every year he had to dig down in his pocket and defray a large part of the expense.

In looking over the old files of the Gazette we find that in all the years that the L. P. Jefferies store has been in business it has been a regular advertiser, paying thousands of dollars toward the support of the local paper, and when the Community Farm News was launched besides giving us an order for a good sized advertisement to be run each week, he and Mrs. J. jumped into the drive for subscribers and through them we added many names to our list.

Any business that has a public spirited man at the head of it like the Jefferies store surely deserves the support of the community, and we believe that our readers will always find it to their advantage when in need of home furnishings to pay this store a visit.

## A Busy, Hustling Company.

We made a short call at the office of the Mentone Lumber Company the latter part of the last week, and was greatly surprised to note how busy they were and what a large volume of business they were doing.

When we arrived, the manager, Mr. Eberly, was in the yard assisting the help to load up lumber, with Mrs. Eberly in the office look-

ing after that part of the business. We were informed that business had been like this for several months and at times they had more than they could conveniently handle.

The Mentone Lumber Company, a corporation, was organized in 1913, and on June 1st of that year they bought the lumber business of B. B. Straub. They immediately began the erection of a number of new buildings carrying a stock of lumber and coal that was a credit to the town. A short time later they added a complete line of builders hardware and paints, thereby placing them in a position to furnish everything necessary in the shape of material for the erection of a building.

Under the able management of Mr. A. E. Eberly, the new company was not long in getting their share of business and every year has shown a marked increase in the volume of business transacted, with the result that today they have the largest and most complete stock of building material to be found in this part of the county.

Through their extensive advertising and square business methods they are drawing trade to their yards from miles around, and we doubt if there is another merchantile concern in Mentone that can show more distant regular customers than this company. Mr. Eberly, who has complete charge of the affairs of the concern, is a thorough lumber man, having made it his life's business—and with his knowledge of the lumber trade, together with the companies chain buying power, is able to meet any and all competition, and in most cases give patrons a better grade of lumber at a lower price than you would have to pay for an inferior grade at other yards.

The manager of this company is a very progressive business man, and he always sees that the Mentone Lumber Co. does its full share and more, to advance any movement that will further the building up and advancement of Mentone. He has always been a good advertising patron of the local newspaper, and among the first to place an order for regular advertisements in the Community Farm News. In fact this company is helping financially and in every other possible manner to boost Mentone and is entitled to a liberal share of your patronage.

## Modern Parent Fails in Duty.

I am not concerned with whether young people neck or do not neck, drink or do not drink. What matters is that some day life is going to crash over them, when they reach the age of thirty or so, and their silly world of conceit is going to be smashed to smithereens.

There is no reality in the thing known as "American youth." Rather, we have in America, as everywhere, a group of young people who are passing through the unstable and erratic process of growing up. During that period young people should not be relied upon for rational conduct. There is nothing new or strange or alarming about young folk of today.

The present age is slightly more insane in many respects, especially in the way mature people act in regard to young people. The old-fashioned martinet parents may have hurt some children, but not as much as the parents of today, who flatter their children, slobber over them, and think they are endowed with ability to lead their elders.

### Baptist Church Notes

Sunday Bible School 9:30 a. m.  
Morning Worship 10:30 a. m.,  
Evening Service 7:30 p. m.  
Thursday Prayer Service at 7:30.

## Great Editor Writes for This Paper

ARTHUR BRISBANE

We are offering our readers a weekly editorial contribution by Arthur Brisbane, the most widely read and highest paid editor in the world. Mr. Brisbane knows people . . . He knows their interests . . . He knows news values for their current and human appeal and has the rare faculty of bringing their meaning into the understanding of the highest or the humblest . . . His word-mastery and intimate knowledge of the widest range of subjects are evidenced constantly in his graphic, terse and interpretative column covering the salient news of the world in punchy and illuminative paragraphs that is appearing regularly in these columns.

## Be On The Safe Side

Put Your Surplus Money in The Bank, Where it Belongs.

Just now there seems to be a wave of crime in the shape of "pick-pocketing" sweeping the north part of this state. You can hardly pick up a daily paper that does not give an account of some one who has been fleeced out of sums ranging from one to four hundred dollars by Gypsies.

The strange thing about these accounts of stealing by Gypsies is the fact that in no case have the officers been able to locate a band of gypsies in, or near the vicinity at the time the crime was committed—nor have they been able to find any other party aside from the victim who noticed the gypsies.

It occurs to us from all accounts that we have read of these thefts, that a band of professional "Dips" or in other words "pick-pockets" are working through this territory under the guise of gypsies. It would be a very convenient and easy matter for these experts to don Gyps attire at the proper moment, relieve their victim and as soon as the job is finished

ed to change to their regular togs and thereby escape all suspicion. This class of criminals is very cunning—good actors—and usually work in well organized gangs. One bunch locates the victim and the other relieves him of his roll.

It would not surprise us in the least that when the Gypsies are caught it will be found that they are simply a well organized band of "pick-pockets." We do not however, have any sympathy for their victims. In this day and age no one has any business carrying four hundred or even one hundred dollars around with him. There is a good bank near you in which you should keep all your surplus funds except the few dollars necessary for your immediate needs. In a good bank your funds are safe—earn your interest and subject to your demands. In your pocket a large sum of money invites thieves, pick-pockets and hold-up men, besides it earns you or no one else anything.

The Farmers State Bank, of Mentone, is a good safe place to keep your money, and if you are lugging around with you a large amount of currency you had better take our advice and put it in this bank before the Goblins invade this territory.

### DORAN ITEMS

Miss Mirabelle Tucker is driving a new Ford Coupe.

Mrs. Ora Tucker and daughter Lily spent Tuesday afternoon in Warsaw.

John Fear of near Argos spent Tuesday with Mr. and Mrs. Horace Rickel.

George Black made a business trip to Flint Michigan Thursday and Friday.

**4 TIMES Around the World with ONE OILING**  
**100,000 Miles Without Stopping for Oil**

An inventor who could develop an automobile, a railroad car or any other conveyance on wheels which would perform such a feat would be considered a wonder. But such is the record of regular accomplishment by the Auto-oiled Aermotor during the past eight years in pumping water.

Did you ever stop to think how many revolutions the wheel of a windmill makes? If the wheel of an Aermotor should roll along the surface of the ground at the same speed that it makes when pumping water it would encircle the world in 50 days, or would go four times around in a year. It would travel on an average 275 miles per day or about 30 miles per hour for 9 hours each day. An automobile which keeps up that pace day after day needs a thorough oiling at least once a week. Isn't it marvelous, then, that a windmill has been made which will go 50 times as long as the best automobile with one oiling?

The Auto-oiled Aermotor after 8 full years of service in every part of the world has proven its ability to run and give the most reliable service with one oiling a year. The double gears, and all moving parts, are entirely enclosed and flooded with oil all the time. It gives more service with less attention than any other piece of machinery on the farm. To get everlasting wind-mill satisfaction buy the Auto-oiled Aermotor, the most efficient windmill that has ever been made.

## CAUSE OF ANGLES

"Very angular, isn't she?"  
"Guess you'd be angular too if you'd been mixed in all the triangles she has."

## HIS BIG TROUBLE

She—I've forgotten more than you ever knew.  
He—I was wondering what was the matter with you.

## WOMAN IN SPEECH

She—What part of speech is a woman?  
He—An indefinite article.

## Worth Remembering

Stains on enamel can be removed by rubbing with rough salt moistened with vinegar.

## Six Groceries--One Advertises.

Our home advertising patronage in this issue is rather small—grocery advertisements especially being conspicuous by their absence—just a lonely one. Now it is not our desire to carry out-of-town grocery advertising, but we depend on the sale of space to support the paper, and if our home merchants will not advertise, we feel that we will be justified in taking on some of the chain store advertising from other towns. One grocery advertisement and six places selling groceries does not speak well for either the town or paper.

## MENTONE ITEMS

Mr. and Mrs. Arlo Friesner spent Labor Day in South Bend.

Herbert Workman of Detroit visited at the James Welch home.

Jean Manwaring spent last week with Dr. and Mrs. Shafer at Lafayette.

Dr. and Mrs. Petry of Lowell, Indiana, attended the Petry reunion Sunday.

Mr. and Mrs. Homer Blue visited at the Will Pittman home Sunday afternoon.

Mr. and Mrs. Lem Latimer spent Saturday and Sunday with Mrs. Hannah Baker.

Mr. and Mrs. Charles Blue of Fort Wayne spent Labor Day with Mr. and Mrs. Lon Blue.

Marion Latimer of Joliet Ill. spent the week end with his parents, Mr. and Mrs. Lindus Latimer.

Mr. and Mrs. C. O. Eiler and family visited the former's father at Hicksville, Ohio over the week end.

Edna Pittman and Elizabeth Welch spent last week in Bourbon guests of Mr. and Mrs. Milo Becknell.

Mr. and Mrs. S. J. Errington and daughter Francis of Toledo, Ohio spent Sunday and Monday with Mrs. Millie Sarber.

Our correspondents evidently celebrated Labor Day—and as a result items from neighboring communities are not up to the usual amount in this issue.

Mildred, Kathleen, Wendell and Bobbie Anderson spent over the week end at Edwardsburg Michigan with their aunt.

Mr. and Mrs. Earl Himes and son Junior and Mrs. Himes mother of Wabash spent Sunday in Mentone calling on friends.

Mahlon Mentzer and son James spent a few days the first of this week at West Baden where they attended the I. G. A. Convention.

Nenian Kesler of Fort Wayne came home to spend a few weeks with Ed Kesler and family before entering school at I U. at Bloomington.

Mr. and Mrs. Welch and Mr. and Mrs. S. H. Johnson of Fort Wayne are making a trip to points of interest in Southern Indiana and Kentucky.

Mrs. Lydia Ryneanson spent last week with Mrs. J. W. Patterson of North Manchester who has been seriously ill, and also attended a reunion at Liberty Mills Sunday.

Mr. and Mrs. Max Duhlap and daughter Mary Lucille returned to their home in Hastings Minnesota last Friday after spending the past several weeks with Mr. and Mrs. Henry Mills.

The Friendly Club opened for business Monday morning. This Club occupies the room next to Sarbers grocery formerly occupied by the Shafer and Goodwin Drug Store. The manager of the club, Miner Mollenhour has had the front of the building painted white and the interior of the building presents a real club like appearance.

## Nellans Reunion

The reunion of the Nellans families was held last Sunday at the tourist camp at Rochester. There were 60 registered as being present. The afternoon was spent in a social way and ice cream was served.

The officers for another year are as follows: Guy Nellans Pres., Harley Nellans Vice Pres., Mrs. Guy Nellans Sec. & Treas.

Those present were: Dr. Nellans Mr. and Mrs. Jack Nellans and family of Cinn. Ohio, Laffette

Nellans and wife of Plymouth, Mr. and Mrs. Mack Nellans, Mr. and Mrs. Otis Nellans, Mr. and Mrs. Elmer Redman and family of Argos, Vina Robinson, Ambi Nellans, Harvey Nellans and wife of Rochester, Mr. and Mrs. Herschel Nellans and family Mr. and Mrs. Curt Nellans and family, Mr. and Mrs. John Nellans Mr. and Mrs. Francis Kehoe and family, Mr. and Mrs. Dean Nellans and family, Mr. and Mrs. Grover Tinkey and daughter of Burket. and Clair Nellans of Argos.

## TIPPECANOE ITEMS

Mr. and Mrs. Wm. Vernet attended the Vernet reunion at Fort Wayne Sunday.

Mr. and Mrs. Dewey Kesler of South Bend spent Sunday with her parents, Mr. and Mrs. Morgan Ward.

Misses Ethel Ansdem and Thelma Horn of Elkhart spent Sunday with the latter's parents, Mr. and Mrs. Granville Horn and family.

The infant daughter of Mr. and Mrs. Robert Davidson born Sunday was buried Monday afternoon at Wakarusha, Mrs. Davidson was formerly Miss Goldie Newcomer.

Mr. and Mrs. Wilfred King of Fort Wayne, Mr. and Mrs. Don Ward of South Bend and Mr. and Mrs. Glen Snyder and family of Palestine spent Sunday with Clyde Ward and family.

For Sale—A good hand washing machine will sell very reasonable. Mrs. John Nellans, Phone Mentone 14-83.

## Immigration Restriction

Until 1819 no law was passed in congress which affected the immigrant. An act then adopted, though applying to all passengers, was in reality a law regulating immigration, because then nearly all passengers were immigrants.

## Woman's Good Service

Jane Burke, better known as "Camellia Jane," American army scout and mail carrier, was born in Princeton, Mo., 1852, and died in Deadwood, S. D., August 1, 1903. She was an Indian scout and was an aide to General Custer and General Miles. For several years she was the government mail carrier between Deadwood, S. D. and Custer, Mont.

# Community Building

## Cities Awake to Needs of Looking to Future

An inspiring aspect of city progress is the extent to which public sentiment has been aroused to the importance of both city and regional planning. It took years to popularize, to any great extent, the policy of planning for orderly development and for rational schemes of attractiveness within the cities. The mistakes made in these years, through lack of vision and planning, made the execution of comprehensive plans highly expensive and in many instances desirable changes prohibitive because of the cost. But now nearly all large cities, many smaller ones and a large number of towns have their planning boards and are taking stock of their assets in the way of finer and more profitable development.

Regional planning was the secondary step. It soon was found, in studying the needs of cities within their corporate limits, that anticipation of future development was an intimately related consideration. Then came the policy of planning the suburbs and the wider environments of cities, not only to avoid the mistakes made in the city proper in the years of growth, but to insure the highest possible values and the greatest consistent attractiveness of the outlying sections. There has been no difficulty in getting the authorities of these environments to co-operate with cities. The interests and benefits are common.—Exchange.

## Advantage of Clean

### City Easy to Perceive

The annual clean-up has more aspects than the esthetic, although that is not to be scoffed at. A bright, clean, well-kept city is pleasanter to live in than a shabby one; and it certainly makes a better impression on visitors. The clean-up drive aims, however, at more than window dressing, as it were. Cellars and other store places of litter are cleared out, as a fire-prevention measure. Yards are cleaned up so that they will not be breeding places for disease-carrying flies and mosquitoes. The object is to make the town a safer place to live in, as well as a more attractive one.

An annual clean-up drive does not imply an extraordinarily dirty city, any more than the old-fashioned spring housecleaning, which went from cellar to garret and ended up with a tablespoonful of sulphur and molasses for each member of the family, was an indication of slovenly housekeeping. As a matter of fact it is a fixed event on the calendars of most American cities, towns and villages.

Clean up inside and out—and keep it clean!

## Home Ownership

Home ownership as the best road to the prosperity of the individual and the country was the keynote of a conference of representative retail lumber dealers from various sections of the United States, held recently at Chicago.

Organization of a council whose object will be to help home builders build better and more livable homes was the outcome of the gathering. The lumbermen met primarily to discuss many of their merchandising problems, but the home ownership theme was injected into the conference.

## Have Garage in House

Home planning of all kinds should be considered from three points of view; utility, beauty and economy. Utility includes time saving and space saving as well as practicability and convenience. It takes only a moment's thought to convince us that both time and space will be saved by making the garage a part of the house; time in walking to and from the car, and space both through the elimination of the separate building and the elimination of the road back of the house.

## Proper Community Spirit

Monmouth greets each new enterprise to Main street with the hope and belief that there is prosperity in store for all and that as all have pulled together in the past we may depend on united team work in the future.—Monmouth (Ore.) Herald.

## Garden Walls

The best kind of garden wall is one with cracks and crannies. Into these one need only rub some fine soil, sow the seeds and cover them with earth so that the birds will not readily make away with them. Nature pretty well takes care of the rest.

## Benefits Community

When a man undertakes to own his own home he demonstrates good citizenship to a great degree and automatically becomes more valuable to himself and to the body politic.

## Prepare for Development

A city must concern itself with its own requirements for growth and orderly expansion. It must prepare for the future on a big scale if it expects the development that is its due.

## General Rule

If you find some one perpetually knocking the town, he is probably a total failure.

Fashions in women's wear have now made man the burdened sex.

What is the proper thing to do after nosing a peanut to the top of Pikes peak?

Thrills are peculiar things. The more you chase them, the harder they are to find.

The problem of the larger fuel tank, it seems, still occurs to vex transatlantic aviators.

## MICKIE SAYS—

FRIENDS, I AM IN YOUR MIDST THIS TIME ON A DELICATE MISSION—MAYBE YA KIN GUESS WHAT IT IS, WHEN I SAY IT HAS TO DO WITH YER SUBSCRIPTION \$O I AM GOING TO WATCH THE RECEIPTS AND SEE IF I MADE MYSELF UNDERSTOOD—  
THANKS, FOLKS

## Much Money Is Lost by Planting Inferior Seed

Thousands of dollars are lost every year by planting seed of low vitality. Seed of all field crops should be tested for germination before planting. This is especially urgent now for corn and sorghums. One cannot tell from the appearance of seed how well it will grow. Last year 141 lots out of the 5,000 lots of seed tested at the state seed laboratory germinated from 0 to 50 per cent. This means that several thousand acres would have been planted to seed which would not grow.

## Agricultural Notes

Infertile eggs keep longest.

Seed clover instead of alfalfa if the subsoil is extremely acid.

Feed poultry yellow corn, cod-liver oil, milk, and leafy feeds for vitamins.

Keep your lawn open for the best effect. Flower beds set in the lawn make the grounds seem smaller.

Retailers make best profits when prices of produce are low. The farmer gets more of the consumer's money when products are scarce and high priced.

The size of the egg a pullet lays has been found to be closely correlated with the age of which she begins to lay. Selection for very early maturity in the smaller breeds is likely to reduce the size of the egg of the flock.

## Aid Strawberry With Wild Ones

### Four Promising Varieties Are Found Suitable for Home Preserving.

(Prepared by the United States Department of Agriculture.)

All the strawberries in the United States and most of those of the world—that is, the tame ones—are descendants of two wild American strawberries, one a native of the Pacific coast and the other a native of the eastern United States.

There are many other wild strawberries, however, that did not take part in developing our present kinds. In the untamed wild ones may lurk some valuable trait that can be bred into our domestic varieties which may make them even more desirable than they now are. At any rate, plant breeders are turning to the wild sorts for improving the strawberry, especially to develop new types better adapted to such specific purposes as canning, preserving, and candy making.

### Four Promising Varieties.

George M. Darrow, who is in charge of strawberry-breeding work for the United States Department of Agriculture, has already achieved some success in this field. From the thousands of crosses made he has selected four promising varieties especially suited for preserving. They are known only by number as yet, and will need to be tested for adaptation before they can be recommended for planting. The breeding of preserving sorts is only begun, he says, and every region will need its own particular variety.

### Technique of Breeding.

The technique of breeding is relatively simple, Mr. Darrow explains, but the important and difficult part is in making the selections. To breed a new kind, no matter for what purpose, two parent varieties are crossed. They may be wild or tame. The pollen from the flower of one is placed on the pistil of the flower of the other. The seed developing from such a cross is planted and every resultant seedling grown to fruiting age before selections are made. If there are three acres of seedlings in fruiting there may be 8,000 kinds, each different from the others. From this enormous number certain promising ones are saved and each is propagated in a separate short row. When they bear, if there is sufficient fruit, canning and preserving tests are made of the most promising ones by canners and preservers with whom Mr. Darrow has made co-operative arrangements.

Before you decide to get up earlier in the morning first make sure that you are a bird and not a worm.

After riding on an overcrowded street car it is hard to see where our children are going to learn good manners.

### Death of Mrs. Elmer Leiter

Margaret Ellen Leiter, aged 77 years, mother of Charles Meredith of this place and Del Meredith of Warsaw, passed away at the McCoy Sanitarium, Warsaw Sunday afternoon at four o'clock. Mrs. Leiter has been in ill health for the past two years and had been confined to her bed for the past four weeks. The deceased was born in Ohio, but has lived in this vicinity for the past 71 years. She was well and favorable known in this community, being a member of the Methodist church and the Eastern Star lodge. The body was brought to her home in this village and the funeral services were held at the M. E. church Tuesday afternoon, Rev. Power officiating. Burial in Mentone Cemetery.

### MENTONE ITEMS

Lewis Halaway of Nappanee and Miss Francis Nuell spent Sunday in Elkhart.

Mr. and Mrs. Jake Smith of Illinois spent Monday evening with Mr. and Mrs. Isaac Jefferies

Mr. and Mrs. B. L. Holton and son Gerald of Waterloo, Iowa spent Sunday at the Krathwohl home.

Wilbur and Merl Holloway and Virgil Robbins of Fort Wayne, spent Labor Day in Mentone with relatives.

Mr. and Mrs. Boyce Underhill and Mrs. Edna Brunner and son Earl of South Bend spent Sunday with Mr. and Mrs. Charles Emmons.

Allie Lue Evans who has been spending the past few weeks with her grandparents Mr. and Mrs. Frank Lyon returned home last week.

Mr. and Mrs. George Borton of Michigan were guests over Labor Day of Mr. and Mrs. James Welch and Mr. and Mrs. Ira Borton.

Mr. and Mrs. Lester Brown and son Dale of Warsaw were guests of Charles Emmons Sunday afternoon. Callers in the evening were Mr. and Mrs. Clyde Brugh and Mr. and Mrs. Vern Blue.

The Misses Nellie, Scenora and Virginia Lyon were guests over the week end with their sister, Mrs. Fred Evans and family at Attica, Indiana.

Mrs. Rena Long, niece, Clyde Baker and wife, nephew of Mrs. Clayton Switzer visited in this community and attended the Baker reunion at Wabash last week.

Mr. and Mrs. Melvin Warren and children of Michigan City and Mrs. Ada Warren and son Jacob of Laporte spent Sunday with Mr. and Mrs. Ray Dillingham. They also called on Mr. and Mrs. Frank Warren.

### Farm Dwelling Burns

Fire of unknown origin destroyed the dwelling house on the O. V. Jones farm near Sevastapol on Thursday night of last week. The building had just been made ready for a new renter who was to have moved into same the day following the fire. The insurance on building was \$600.00, which only partly covered the loss.

## MENTONE.

## Corn Smut Will Decrease Yields

### Disease Is Caused by Certain Type of Germ Belonging to Molds.

"The enlarged outgrowths or galls which may now be seen on the corn is smut," according to W. E. Brentzel, botanist and plant pathologist at the North Dakota Agricultural College. "This trouble," he says, "is somewhat similar to wheat smut although different in many important respects. Corn smut never goes to wheat and wheat smut never goes to corn. Seed treatment will control covered smut of wheat but has no value in the control of corn smut.

"This disease is caused by a certain type of germ belonging to the class known as molds. These germs may now be seen as a black powder falling from the corn smut galls. They pass from one season into the next by wintering over in old diseased stalks, sometimes in the soil and may also live in manure for several months. During the summer while the corn is growing the smut germs move about as dust in the winds and find lodging on the corn. The funnel-shaped pockets in the tops of corn and the pockets at the base of the leaves collect dust and water. When the germs or spores lodge in pockets containing moisture they begin to grow and in a short while form the smut ball which we now see in the corn fields.

#### Will Grow on Any Part.

"Corn smut is not particular about which part of the plant to grow on. When the parasite attacks the ears the grain usually is a total loss. When other parts of the plants are smutted, such as the leaves, tassels, silks and nodes, the amount of loss is hard to estimate. Often the plants are broken over, sometimes by the excessive weight of the smut galls and sometimes by the weakening of parts where the smut growth comes out. In one way or another smut is causing heavy losses in some fields.

"Growers have asked whether silage made from these smutted ears and stalks will injure cattle. It is very true that these smut galls have an ugly appearance and some may hesitate to feed them to a fine lot of cattle. However, so far as is known corn smut has never caused any disease or ill effects when fed to cattle. In experiments conducted by the experiment stations of South Dakota, Kansas, Michigan and the United States Department of Agriculture cattle were fed corn smut in heavy amounts. In no case was any injury done to the cattle resulting from the smut.

#### Only Known Remedy.

"The only remedy known to avoid losses to the crop is to destroy the nearby source of the disease for the next year. In fields where this means of control is impractical it is neces-

sary to rotate crops. Smut resistant corns have not been developed yet but plant breeders are having some success in this direction. It is hoped that in the near future we may have developed a variety of corn which will resist smut."

## Big Quantity of Humus in Soil Most Desirable

One of the important explanations of the desirability of having a quantity of humus or decomposing organic matter in the soil is found in the capacity of humus for soaking up and storing water which is thus made available later for use by growing plants. Experiments have revealed that 100 pounds of sand can hold only 25 pounds of water, and 100 pounds of clay soil can hold only half its weight in water. In contrast, 100 pounds of decaying organic matter may hold as much as 190 pounds, or nearly twice its weight of water. Most soils are mixtures in varying proportions of sand, clay, silt, and organic material. As a rule the greater the proportion of organic matter contained in the soil the greater its water-absorptive capacity, and the greater reserves of moisture it will retain for resistance to drouthy and hot weather.

## Eradicate Barn Flies With Creosote Spray

Fleas grow in filth and the first step in cleaning up a place is to remove all the dust, straw, manure, etc., from the barns and haul it out to the fields. Spray the floors and walls with a very strong solution of creosote. It is better to use this dip in its original strength if you can do it. After the dip has soaked in for a day or two spray again with kerosene, following that with an application of naphthalene crystals. Be very careful of fire.

Keep the hogs away from these breeding places and it is likely you will have no further trouble.

The world would be spared a great many painful exhibitions if "temperamental" people would only learn that self-control is a sign of mental and emotional maturity and the lack of it a sign of the contrary.

A different plumber joke—A plumber and his mate in Yorkshire, England, who were called to a mansion in which a fancy dress ball was in progress, found it necessary to cross the ballroom, and were awarded first prize for their costumes.

For economical operation of spray rigs, farm roads should be kept in good condition. An occasional dragging is not alone necessary for this. In addition to dragging it is necessary to have the road well drained.

Many growers find that it pays to own a ditcher. They use this for their peach orchards to keep the drainage in good shape and then use it in keeping their roads well ditched. Spray rigs are heavy and dragging them around through the mud is hard on teams and expensive in time.

## Keep Poultry Yards Clean and Sanitary

### Parasites Undermine Health and Sap Vigor of Birds.

(Prepared by the United States Department of Agriculture.)

Care exercised in keeping poultry yards clean and in sanitary condition has a double function in keeping the flock clear of parasites that undermine the health and sap the vigor of the birds. The injury by mites, lice, fleas, and other parasitic organisms is sometimes obvious, but it also happens that some insects and other small creatures are carriers or intermediate hosts of some of the internal parasites of poultry.

For example, according to specialists in the United States Department of Agriculture, one variety of roundworm must develop for one stage of its life outside the poultry it affects. The roundworm lays its eggs within the chicken and they are eliminated in the droppings. They will not mature if picked up by a fowl. They do mature if a water flea picks up the eggs. Then if a hen takes in the water flea with her drinking water the roundworm parasite of the flea develops into a poultry parasite.

Many similar examples are known, and others are suspected. The grasshopper, for instance, has recently been shown to transmit at least one important parasite of domestic poultry.

Sanitation and cleanliness which prevents such insects from having access to the droppings may thus break a cycle through which infestation reaches the flock. The insects in themselves may not be harmful to poultry, but if they have had an opportunity to feed on contaminated droppings they may be the means of spreading these particular parasites.

Americanism: Broadcasting the roar of Niagara falls: Having it introduced by a radio announcer.

Rarer than the day in June is the person who really appreciates it as it ought to be appreciated.

You could easily distinguish the new small paper money from postage stamps, if the stamps had mucklage.

The laziest gardener in the neighborhood claims it took him 12 years to learn to lean on a spade successfully.

A new taxicab line has started up in New York. The question is whether to build a new street to make room for it.

At the request of his loving family, a local cynic has just looked up his birthstone, and reports that it is an emery wheel.

For the benefit of the young graduate the office skeptic favors a diploma with an interlinear translation of the Latin.

People had fewer "advantages" 50 years ago, but they had more time in which to enjoy and appreciate those they possessed.

Thoughtful wives may find comfort in reflecting that the average husband is at least a little better than the average man.

Characterization: The kind of a girl who would fix up something of celery and peanut butter for a man who just had his tonsils out.

Why couldn't some afternoon bridge outfit put up a prize of a nice, hot boiled dinner for the winner, to take home to a hungry husband?

An Ohio oil well is being drilled to a depth of a little more than a mile. This is thought to beat the best dental records by several feet.

It is well to remember that many a man who enters a bull market emerges with a bare pocketbook.

Strange time robs us of the ability to do so many things we intended to do if we had only had the time.

## GOOD STICKER

She—And will you love me when I'm old and gray?

He—Good gosh, dearie! Are you going to stick to me that long?

## WHEN SHE WAS SAD

He—Does the moon ever make you feel sad?

She—Only when I'm out with a dead cat.

**Be strong!**  
It matters not how deep entrenched  
the wrong,  
How hard the battle goes, the day,  
how long:  
Faint not—fight on! Tomorrow  
comes the song.

—M. D. Babcock.

#### SEASONABLE FOODS

A dainty food, which may be served  
in patty shells, in timbale cases or  
croustades, is the  
following:

**Sweet breads.**  
With Mushrooms.  
Parboil one pair of  
sweet breads in  
slightly acidulated  
water. Remove the  
membrane and cut  
into small pieces.

or chop. Chop five fresh mushrooms.  
Add to a hot pan with one table-  
spoonful of butter, one tablespoonful  
of flour, cook until smooth, then add  
one cupful of rich cream and the  
mushrooms which have been cooked  
in a tablespoonful of butter for five  
minutes. Stir and cook until well  
heated through, season with salt and  
white pepper and serve in patty  
shells or on toast.

**Golden Filled Kisses.**—Add to four  
unbeaten egg whites one-half tea-  
spoonful of salt, one teaspoonful of  
baking powder, one-half teaspoonful  
of vanilla and two cupfuls of sugar.  
Beat until the mixture will hold its  
shape. Place in spoonfuls on a bak-  
ing sheet and bake in a slow oven  
until dry and lightly browned.  
Scoop out and when cool fill with  
orange jelly and whipped cream, equal  
parts. Put together in pairs, chill and  
serve.

**Orange Jelly.**—Soften two table-  
spoonfuls of gelatin in one-half cup-  
ful of cold water. Add two cupfuls  
of boiling water, one cupful of sugar  
and orange juice, two tablespoonfuls  
of lemon juice and a little salt. Set  
away to become firm.

**Salad Jelly Foundation.**—Take two  
tablespoonfuls of gelatin, one cupful  
of cold water; when soft add two  
cupfuls of boiling water, one-fourth  
cupful of lemon juice, three-fourths  
of a cupful of sugar, and a teaspoon-  
ful of salt. Allow the jelly to thicken  
slightly, then stir in any prepared  
fruit or vegetables, turn into wet  
molds and chill. If fruit is used the  
fruit juice may be used in place of  
some of the water.

#### Man of Proper Training

Give me a man so trained in mind  
that his body is the ready servant of  
his will, and does with ease and pleas-  
ure all the work that, as a mechanism,  
it is capable of. Thomas H. Huxley

#### MENTONE ITEMS

Louise Rogers spent a few days  
last week with Miss Virginia  
Lyon.

Mildred Anderson left Tuesday  
morning for Louisville Kentucky,  
where she will teach this winter.

Mrs. Lula Waite and son Ever-  
ett of Laurel Nebraska, was visit-  
ing Miss Louise Black last week.

Mrs. Mable Emmons of South  
Bend spent a few days last week  
with Mr. and Mrs. Frank Warren  
and other relatives.

Born to Mr. and Mrs. Raymond  
Hibschman, Friday Aug., 30, a  
son. Mr. and Mrs. Hibschman  
were formerly of Mientone.

Mrs. Elsie Minear underwent  
on operation for acute appendicitis  
Thursday morning at the Mc-  
Donald hospital at Warsaw.

Mr. and Mrs. Irvin Snyder and  
Gaylord Emmons spent a few days  
in Franklin Indiana, where they  
visited Franklin College and the  
Masonic Home.

Mrs. John Fenstermaker, Mrs.  
Herschel Fenstermaker and baby  
and Mrs. Bert Holloway spent  
Friday in Milford with Mr. and  
Mrs. Raymond Hibschman.

Mr. and Mrs. F. R. Burns and  
daughter Jean and Miss Thais  
Greulach returned home Thursday  
after spending several days vaca-  
tion at Madison Indiana, My Old  
Kentucky Home, Lincoln's Birth  
place, Mammoth Cave and the  
Onix Cave.

#### When It Is Welcome

Lima Beane says the best time to  
say what you think is when you think  
of something that is pleasant for oth-  
ers to hear.—Toledo Blade.

#### Negroes in British Empire

There are some negroes in England,  
but the number there is extremely  
small. The British empire has within  
its boundaries lands whose popula-  
tions consist largely of negroes, as, for  
instance, Jamaica and Central and  
South Africa. The natives of such  
countries are British.

#### Forest Preservation

Some of the national forest districts  
have already set aside certain "wild-  
erness" areas, to be maintained free  
from occupancy or industrial develop-  
ment. The preservation of research  
and primitive areas is now a part of  
the forest service program on a na-  
tion wide basis.

## DEPENDABILITY IN Banking - Service

Dependability in banking service has always been  
the outstanding characteristic of this institution.

In making your banking connection it should be  
done with great care, and with consideration of the  
record and standing of the bank which invites your  
business, as well as the service and convenient banking  
hours it offers.

**Farmers State Bank,**  
**Mentone, Indiana.**

## Facts for Egg Producers WHO WANT "More Money for Eggs"

More money can be had only by produc-  
ing high quality eggs. We have the buy-  
ers and we pay for quality.

### Quality Eggs

Are those which are of good size, clean, sound strictly fresh  
and white yolks.

## Zeppelin Beats Record. Britain Must Protect. John Bull—"Shylock" Farming as "Big Business"

"AROUND the world in eighty days" was Jules Verne's dream of what might be. The exact flying time of the Graf Zeppelin's cruise around the world was twelve days and eight minutes. To mention those figures in scientific achievement is like mentioning ten billion dollars in Wall street. No need to enlarge on the figures.

The Zeppelin frequently made less than 90 miles an hour.

At the Schneider Cup race airplanes were prepared to exceed 300 miles an hour.

They could fly from Tokyo to San Francisco in one day. Who doubts that their speed will be transferred to big bombing planes?

We need air expansion, not retrenchment.

Jews in America and other countries, worried about co-religionists in Palestine, may find comfort in the fact, as regards future events, that the British empire cannot allow Arabs to defy British authority.

Let Jerusalem riots get beyond control and the Moslem world become convinced of its ability to defy the British, or convinced that the British have had all the fighting they want, and there will be trouble, serious and widespread.

The Jerusalem riots involved not merely the safety of Jews in Palestine but the safety of the British empire wherever Mohammedans are numerous.

To suppress, with a strong hand, the rioting and murdering in Jerusalem and other parts of Palestine, is not merely a matter of fulfilling obligations solemnly assumed, but of protecting the integrity of the British empire.

The Vatican was reported to be much concerned as to the safety of church shrines in Jerusalem. If Arabs were allowed to get the upper hand indefinitely, one of the first steps prompted by Mohammedan enthusiasm would be the destruction of Christian shrines and churches.

Sir Phillip Snowden, who manages Great Britain's finances, won his fight for a fairer distribution of the German spoils. And suddenly British Tories blazed forth in praise of the great Snowden.

It is amusing to see what happens when a shoe is on the other foot. In Italy, France, Belgium, Snowden was

represented as a fiend incarnate, a pirate and of course a Shylock, when he asked for only part of the money due him.

That must remind us of some things that were said about Uncle Sam—"Uncle Shylock" was one name.

An airplane pilot, assisted by a farmer, took off near Bellingham, Wash., and before returning seeded 68 acres in one hour and 40 minutes. The farmer scattered seeds from a sack through a door in the cockpit, using about 800 pounds of alfalfa, timothy, clover and orchard grass seeds.

When gigantic machinery plows, harrows and pulverizes the soil in one operation, when another machine harvests, stacks, bales and weighs the crop in one operation, and airplanes do the sowing, agriculture will join "big business."

Henry Ford's interesting statement that he would stop manufacturing automobiles "if booze came back again," causes unnecessary discussion.

Mr. Ford, a sincere teetotaler, probably said that hastily. He is as good now as ever. He established his reputation and that of his car, long before prohibition came.

What Henry Ford could do, without the aid of prohibition at fifty, he could do now at sixty-five. He wants to help prohibition, that's all.

When efficient gangsters don't want witnesses to testify, they don't testify. Somebody killed three men in New York's "Hotsy Totsy" speakeasy. Two waiters and another man saw the gunman who did the killing. Commissioner Whalen said the three would see nothing more. They were killed to "shut their mouths."

If you think prosperity will continue—as it will unless foolishness interferes—buy your little boy a seat on some stock exchange.

He will make money as a broker, and his seat, while he "sits" in it, may make him rich apart from his own work.

You can't say that of many seats.

A stockbroker has such a "clean" business, buying and selling as ordered, a profit on every transaction. Wise brokers don't gamble. They let the customers do that.

The most important part of civilized man's education is learning to resist germs.

Measles will wipe out a tribe of Alaskans or Eskimos in two or three weeks. White men call it a child's disease.

(©, 1929, by Kin Features Syndicate, Inc.)

## Snakes' Sight and Hearing

All snakes have good eyes, and some of the nocturnal species have very large ones, but the eyes have no lids and are not movable. No external ear is present, but a complicated internal apparatus exists, so that snakes hear well and are affected by musical sounds.

## My Favorite Stories

by Irvin S. Cobb

### Examples of Higher Criticism

WHENEVER actors get together it is almost inevitable that sooner or later the subject of dramatic criticism will come up and that some one present will quote a notice favorable or unfavorable—but generally favorable—touching on his own work.

No symposium of this sort is complete without reference to the instance of tact displayed in print by a local reporter on a certain historic occasion in a small middle-western city when ambitious nonprofessionals gave a classic drama. The newspaper man who had been detailed to cover the performance was wishful to avoid giving offense to the members of the cast yet, in honesty, he could say nothing complimentary. So he merely wrote this:

"For the benefit of the new hospital fund, our leading amateurs presented 'Lady Audley's Secret' at the theater last night before a large audience of our best townspeople. The orchestra rendered several pleasing selections and the acoustics of the hall were never better."

Then there is the famous criticism done by an editor in Rising Sun, Ind., when a certain native-born prodigy essayed the role of the melancholy Dane. The criticism ran something like this:

"Among scholars there has long been a dispute as to whether the works attributed to Shakespeare were written by Shakespeare—or by Bacon. The editor of this paper has hit upon a satisfactory way of settling for all time this ancient question. Let the tombs of both be opened. The one who turned over in his grave last night was the author of Hamlet!"

I am reminded also of what Kin Hubbard, better known as "Abe Martin," had to say years ago of a certain theatrical entertainment. For brevity and yet for completeness I think it would be hard to beat this:

"Al Jeffrey's Uncle Tom's Cabin company played at the opera house last night. The Siberian bloodhound was badly supported."

Hap Ward, the comedian, furnishes one from his own experience:

"We were playing a one-night stand in Oregon," said Hap. "On the morning following the performance I found a notice of our show on the front page of the town paper. The opening sentence was promising—I smiled to myself as I saw it. For it read as follows: 'Ward and Vokes in their new play, as given here last night, were not half bad.'"

"Then I read the second sentence and quit smiling."

"On the contrary, they were all bad!"

(© by The McNaught Syndicate, Inc.)

## MENTONE ITEMS

Mr. and Mrs. Ivan Kern and family were Sunday guests of Mr. and Mrs. Isaac Jefferies.

Mrs. Mary Swain who spent the past week in Chicago with relatives returned home Sunday.

Lawrence Lyon of Book Ind., was the guest of Don Adrain Bunner a few days last week.

Mr. and Mrs. K. L. Bunner of Indianapolis were guests of Mr. and Mrs. D. L. Bunner over Labor Day.

Mrs. John Mikesell has returned home after spending a weeks vacation at South Bend with her son's Omer and Irvin Mikesell.

Mr. and Mrs. Carlin Myers and son George were guests of Mr. and Mrs. Carlin Myers Jr. for a weeks visit at Buffalo New York.

Mr. and Mrs. Seth Taylor and family of Warsaw and Mr. and Mrs. Conda Walburn spent over Labor Day at Turkey Run and the Shades.

Don Bunner left last Thursday evening for a 10 days vacation at Buffalo, Montreal and Quebec. While in Buffalo he will be the guest of S. Carlin Myers Jr. and family.

Mr. and Mrs. W. H. Thorton and Mrs. Martha Miller of Chicago were over Labor Day guests of Mrs. Mary Swain and sons. Mrs. Thorton remained for a two weeks visit.

Mr. and Mrs. Herschel Enyeart and children of South Bend and Mrs. Pearl Blue and daughter Fairy and granddaughter Elaine of Chicago spent over Labor Day with Mr. and Mrs. Ed Halterman.

Mr. and Mrs. Vernon Jones, Mr. and Mrs. Miner Mollenhour Mr. and Mrs. Freemont Fisher, Mr. and Mrs. Artie Eaton were entertained at a six o'clock dinner on Friday evening by Mr. and Mrs. Devon Eaton near Mentone.

## Ancient Beauty Culture

Even Venus was not above bleaching her hair. Mohammed first introduced henna hair dye to the ancients. Cleopatra had the first "permanent wave" by braiding her hair and placing it between hot stones. Those peeps into the past of beauty culture were given the Chicago and Illinois Hair Dressers' association in convention.

## STREAMER OR TWO MUST DANGLE FROM THE SHEER FROCK TO BE CHIC

WHEN she moves, when she steps, with what airy grace does her frock flutter its multitudinous scart ends, floating streamers and such, before the admiring eyes of the world, this summer. Brought down to a final analysis, it is fabric manipulation which creates of picturesque "tag ends" a silhouette of new beauty and novelty.

More and more originality expresses itself in neckline and shoulderline treatments achieved through odd drapes, berthas, scarfs and various arrangements which tend to arrive at soft feminine lines.

It's tremendously interesting to study the pages in pattern books devoted to collars, capelets and the like, also very inspirational to the woman who makes her own clothes.

According to fashion's vocabulary, those are "shoe-string" straps which hold the decollete gown in the picture in place. It would almost seem

as if this same caption might be applied to the long slender streamers which like the proverbial shoestring are untied, dangling with untrammeled freedom and grace. The skirt is tiered, of course, for almost every sheer frock is in tiers this summer.

The newest thing about tiers is that they have taken to trailing a wee at the back—thus giving a versatile interpretation to uneven hemlines which fashion insists must be. To be explicit, the silhouette generally favored for the evening frock, has three or four flat apron tiers for the front of the skirt, the same number of flounces formed at the back, but much longer, giving a proud little flare as the wearer moves about.

Coral colored georgette was selected for the making of the model here shown, which again emphasizes the importance of this shade.

## FARM POULTRY

### FLOCK HISTORY IS GUIDE IN CULLING.

#### Always Better to Improve Production by Care.

"In culling poultry the history of the flock should be the first important consideration," say the extension specialists in poultry husbandry at the Ohio State university. "If the flock as a whole has been laying heavily, throughout the entire year, culling should be comparatively easy, as the good birds will show evidence of high production, while the few poor birds will be outstanding, showing very definite evidences of low production or none.

"If the flock has laid indifferently throughout the year, or has suffered from parasites such as red mites, lice, or intestinal worms, or is improperly housed or cared for, the culling will be very difficult, for many of the birds that are really worth keeping will be questionable, due to their condition. Under such circumstances the first step should be to correct conditions, and allow the good birds to come back and show their value, which will cause the poor birds to be more easily recognized.

"It is always better to improve average production by better management rather than by culling, which decreases the number of birds and cuts down the possible earning power of the flock."

### Get Rid of Parasites on Chickens in Flock

The hens have enough to bother with in the summer with the hot weather without having to fight lice and mites in addition. The flock owner can do a great deal to help the hens get rid of these pests.

There are various remedies on the market which can be used, or a drug known as sodium fluoride can be bought at the drug store and can be put on the hens, applying it on the back, head, throat, on the breast, around the vent, between each thigh and the breast and on each wing. This is a rather tedious process, although it will get all the lice.

Within the last year and a half, however, it has been found that painting Black Leaf 40 on the perches will rid a flock of lice. This is easy and effective.

Mites are a worse pest than lice, since these little bugs stay in the cracks and crevices around the nests, droppings boards and perches during the day and get on the birds at night, at which time they suck the hen's blood. These can best be fought by

using a strong disinfectant on the nests, roosts and droppings boards.

If these pests—lice and mites—are allowed to remain on the birds, they will sap the chicken's vitality and will hinder egg production considerably.

### Ducks and Geese Are Fed Pretty Much Alike

Ducks and geese are fed just about alike. They should be kept warm and dry and fed about four or five times per day. All young water fowl should have soft feeds, that is to say, wet mash mixed as follows: Three parts yellow corn meal, four parts bran, one part red dog or low-grade flour by weight. Add to this 10 per cent of high-grade meat scraps, 1 per cent of fine sand, and mix with water or milk so that it is quite moist but not sloppy. Feed this every two or three hours for two weeks.

### Care for Chicks

Raising good chicks is about the most important thing on a poultry farm. That to a large extent determines your profits. If you neglect the chicks by crowding them too closely, by letting the house become filthy and the soil in bad shape, you may produce weak chicks that do not live well and lay well. It is comparatively easy to grow good chicks if you are willing to do the necessary work of properly caring for the chicks.

### Turkeys on Upgrade

Turkey raising is on the upgrade, now that the blackhead bugaboo has been done away with. And the turkey growers are getting the marketing system down to a fine point, too. Six turkey marketing associations have just been formed in various parts of Colorado, and the next thing will be a statewide pool. Profits received by members of turkey marketing pools in the West last year were very pleasing—that's why new pools are being formed to handle this year's crop.

### Scratching Shed

In some of the warmer sections of the country, fowls will prefer to spend their nights in the trees and on outdoor roosts but severe storms, driving snows or heavy rains will in most instances, send them into the houses. It is the storm more than the cold that the hen objects to, and for this reason, if no other, a scratching shed where the fowls are sheltered from the wind, should be provided where the layers can sing and keep busy during the entire day.

### Historic Chapel

Although the present building of St. Bartholomew's hospital in London is comparatively modern, the hospital patients still use the beautiful old Norman chapel, the only part of the ancient hospital that remains. It is one of the earliest Norman churches in existence, the work of Bishop Gundulf, bishop of Rochester from 1077 to 1108.

## The Big Drug Store on the Corner

The above is a good name and very applicable to our village drug store. However it by no means does this institution full justice. Mentone can truly claim to have one of the most modern and complete stores of this kind to be found in any town twice this size in the state.

In the year 1898 Chas. Shafer bought a drug store in our city, and with his hustle and likeable ways began doing a good business from the first day. The business grew so rapidly that in the year 1903 he concluded that a partner in the business would be a good move, and as a result the partnership of Shafer & Goodwin was formed. The bringing of Clayton Goodwin into the business, who also is a hustler with a winning personality, added more new customers to the list and the business become one of the most prosperous in the community.

Five years ago this firm bought the two corner store rooms at the north-east corner of Broadway and Main Sts. They immediately had the corner room remodeled, sparing no expense to make it an ideal home for a modern drug store. After completion of the changes of the room they moved their stock into same, adding new lines and new goods until they were completely equipped to satisfy the large and varied needs of their ever growing list of customers.

A couple of years ago their competitor moved his stock of goods to another town, thereby leaving this firm in full possession of the field, and like good business men they put forth every effort to even better their service, reducing profits where possible, depending upon a larger business to make up for the reduction they had made. And that they have retained all of their old customers and added fully ninety percent of those of their former competitor is the best evidence that they have been giving service and right prices. There is no store in any surrounding town that can beat Shafer & Goodwin on high quality and low prices.

As citizens who have the welfare of the entire community at heart there are none who stand higher than Chas. Shafer and Clayton Goodwin. Any movement that will tend to the advancement of Mentone or any of its interests can always count upon the financial and moral support of The Big Drug Store on the Corner. They are regular advertisers in the Community Farm News and were boosters from the beginning.

In conclusion we will say that if in need of anything that can be had in a drug or jewelry store you will call upon this firm you may rest assured that you will get first-class goods at a reasonable price, and you can bank on any statement or promise that they make.

## An Anonymous Communication

To the Citizens of Mentone:

We are hearing comment and argument about, condemnation and defense of the City Council's seeming apathy in regard to forcing motorists to stop at the intersection of Main and Broadway. Since the accident a few days ago in which little Thomas Stanford was in-

jured, happily not seriously, this babble has been particularly noisy.

We did not witness the incident mentioned above, and can not say whether it was due to carelessness on the part of the motorist, or the unlucky child.

But we do know, as every one of you who spends any of his time on our streets does know, that there is too much speeding through town, both by tourists and local drivers; too much careless driving. Perhaps there is too much carelessness on the part of the pedestrian, too; but pedestrians are more apt to be thoughtful of their own safety

We do not criticize the Council so much in their reported attitude as we criticize YOU. The Council is not a body of potentates who make laws and enforce them, regardless of whether they are wise and just; they are not kings, and do not claim divine right. They are supposed to be a quartet of public-spirited men who are governed by the wishes and needs of their fellow townsmen as they see them. It is our opinion that the only reason the members of our City Council have not taken action is that they have not considered the question seriously, and do not realize the real danger that exists. They will prove themselves worthy of the trust placed in them, if they are made to realize your wishes!

If you value your lives, or the lives of your children, do something!

Or, if you are not enough interested to do anything, do not criticize your equals for the same fault.

Editor's Note:—The writer of the above article should know that newspapers as a rule do not pay any attention to unsigned articles—not that the writers name must be published—but as a matter of protection to the publisher. Besides it is bad form for anyone to write an article for publication to which he is unwilling to sign his name. However in this case we have made an exception to our rule and published the above because we feel that there is real need for some protection from reckless driving on our Main Street. In our opinion, if it is not contrary to law, "Bumps" in the pavement at the intersection of Main and Broadway would soon put a stop to fast driving. It does not require an officer to look after the "Bumps" and while some foolish driver might try to take them at a forty mile clip once, we do not think that he would try it the second time. We have seen these "Bumps" in action in other localities and they are very efficient as speed regulators. They do not get out of order and are always on the job.

### Scarlet on the Bench

Scarlet was the "judicial color" throughout the Middle Ages, and those dignitaries of the church who were entitled to sit as Judges in England during the Thirteenth and Fourteenth centuries wore robes of that hue.

### Costly Superstition

The Gran Chaco, the country in dispute between Bolivia and Paraguay, is inhabited by Indians who have the curious custom of burning their whole village after a death has taken place in one of the huts

### Effects of Caffein

Caffein is the alkaloid found in coffee and in smaller quantities in tea. It acts as a mental stimulant in small doses, but in larger ones it may cause insomnia, mental dullness and anxiety. Different persons react differently to caffein.

### Peat's Great Value

Peat is regarded as a splendid fertilizer. It is light and porous and is mixed with stiffer soils such as clay and sand to give these qualities to the soil.

**Nerves Need Watching**

There is a tendency for people who  
feel indisposed to blame it on their  
nerves and let it go at that. Real  
nervous disorders, however, are se-  
rious and the excuse of nerves should  
not be used to camouflage some other  
disorder.

**Rockhill Reunion**

The thirty-sixth annual reunion  
of the Rockhill family was held  
Sunday Sept. 1, at the Lakeside  
Park in Fort Wayne, with about  
90 relatives present. At the noon  
hour all gathered around the  
table which was loaded with the  
bountiful things to eat and stood  
with bowed heads while Rev. E.  
A. McKim, Pastor of the Central  
Church of Christ of Fort Wayne  
offered prayer.

After the dinner was over Mr.  
R. B. Hanna of Fort Wayne gave  
an interesting talk about the early  
history of the Rockhill family and  
made a suggestion that a complete  
history be written, which was ap-  
proved. At the business session  
the following officers were elected  
Pres. Frank Rockhill of Bourbon,  
Vice Pres., John Snyeer of South  
Bend and Sec-Treas. Ota Fields  
of Fort Wayne, committee on ar-  
rangements O. E. Fields and  
Elmer Rockhill.

The following places represented  
were Waupin, Wis., Alliance Ohio,  
Hammond, South Bend, Bourbon  
Tipton, Tippecanoe, Warsaw,  
Argos, Etna Green, New Castle,  
Garrett, Arcola and Fort Wayne.

The reunion of the Rockhill  
family will be held at Centennial  
Park, Plymouth Ind. next year.

#### SOME HOT WEATHER DISHES

As gelatin makes such an agreeable food, saving more expensive protein foods, it is especially adapted to hot weather.

**Superior Salad.**—Dissolve a package of lemon gelatin in one cupful of boiling water, add one cupful of pear juice, one tablespoonful of lemon juice, one-fourth teaspoonful of salt, four halves of canned pears, one pimiento cut into small pieces and one cream cheese. Prepare the gelatin. Soften the cheese with a little cream add the salt and a dash of paprika. Fold into the gelatin small balls of the cheese. Turn into molds and chill. Serve on lettuce with mayonnaise. Pineapple in place of pears also makes a fine salad.

**Summer Plum Pudding.**—Dissolve one package of lemon gelatin in one cupful of boiling water. Add one-fourth teaspoonful of salt, one and one-third cupfuls of any fruit juice, to three-fourths of a cupful of spice cake crumbs, three-fourths of a cupful of chopped walnuts, one-half cupful of raisins, one-half cupful of chopped prunes, one-fourth cupful of finely shredded citron and one teaspoonful of grated orange peel. Mix all together and chill until firm. Serve with sweetened whipped cream or a soft custard, flavored with grated orange rind.

**Cherry, Prune Jelly.**—Wash and soak over night one-third of a pound of large prunes. Cook in the same water until tender. Remove the pits and measure the liquid—there should be a cupful, if not add other fruit juice. Dissolve a package of cherry gelatin in a cupful of boiling water, chill, add the prunes when quite thick, mold and chill. Serve with cream.

**Banana Fluff.**—Rub four ripe bananas through a sieve and add to dissolved lemon gelatin when it has become cool. When almost set beat well with an egg beater until a very stiff froth. Pile lightly in glasses and chill; garnish with a maraschino cherry.

*Nellie Maxwell*

#### War's First Victim?

It is believed that the first boat sunk in the World war was the San Wilfrido, a British ship sunk by a mine, August 3, 1914.

## My Favorite Stories by Irvin S. Cobb

### Something New in Natural History

AS PERCY KNIGHT, the English comedian, told me the story, there was once a fellow countryman of his, a seafaring man, who had a turn for oil colors. Naturally his fancy led him to marines. In odd times aboard ship he practiced his art until he had mastered two studies—a brig running before the wind in the midst of a lot of cottony-looking waves, and a sloop beating her way along a rocky shore.

This done, the ambitious one decided to give up sailoring and turn artist in earnest. He would drift across the country with his materials strapped to his back and do signs for public houses. He had a natural fondness for public houses, anyhow.

On his first day's travel he got two commissions. On the morning of the second day at a point well inland he came upon a wayside tavern. Above its door hung a signboard so battered by the rains of years and so bleached by the suns that the original design upon it was practically obliterated; only a few pale streaks of color remained. In the doorway lounged the proprietor.

The wayfarer scented another job. He halted, introduced himself as a craftsman and for a price offered to repaint the signboard.

"Righto," said the owner, and a bargain was struck. "Now, then," said the public housekeeper, "wat's your notion abaht doin' me a sign?"

"Well, on this side 'ere, I'll do you a smart brig scuddin' along in 'art a gale," said the artist, "and on the other side we'll 'ave a tidy sloop makin' for port with a sunset be'in' er."

"Wyte a bit, matey, wyte a bit," said the publican, "Carn't you read? Don't you see it says yonder that this 'ere is the Red Lion Inn? It's been the Red Lion Inn for 70 years. You'll paint me a red lion there or the deal's off."

The artist fetched a sigh of resignation.

"Ave your own wye abaht it," he agreed. "I'll paint you your bloomin' red lion. But I warn you now it's goin' to look quite a bit like a full-rigged ship!"

#### Vernette Reunion

The eighth annual reunion of Vernet families was held at the home of Mr. and Mrs. Charles Byrer in Fort Wayne on Sunday Sept. 1st.

Forty-two were registered present for the day and every one en-

joyed the meeting very much.

A splendid dinner was enjoyed at the noon hour and ice cream was served to every one before leaving for their homes.

Relatives were present from Bourbon, Inwood, Pierceton, Mentone, Tippecanoe, Claypool, South Bend, Warsaw Chicago and Fort Wayne.

At the business meeting it was decided to hold the next reunion at the home of Mr. and Mrs. John Laird near Mentone on Sunday preceeding Labor Day 1930.

Frank Vernet was the oldest member present being 86 years old and Lela Fay DeWitte the youngest being 8 months old.

A vote of thanks was given Mr. and Mrs. Byrer for their hospitality in entertaining the clan and all started on our drive home ward feeling it was a day well spent.

#### MENTONE ITEMS

Robert Caywood of Warsaw is visiting with Mrs. Edwin Meredith for a few days.

Mr. and Mrs. Con Welch were guests at the Edwin Meredith home first of last week.

Mrs. Edwin Meredith spent Wednesday in Warsaw the guest of Mr. and Mrs. James Caywood.

Mr. and Mrs. Elra Rapp of South Bend spent a few days last week with Mr. and Mrs. Joshua Garwood.

Mr. and Mrs. Fred Babcock and daughter Virginia of Gary, spent the week end with Mr. and Mrs. F. R. Burns.

Mrs. Milt Evans, Mrs. Walter Hoyt and Mrs. Emmett Clark spent Thursday with Mrs. Mary E. Clark of Mentone,

Mr. and Mrs. Omar Igo and daughter Lillian and George Igo and daughter Ruth spent over Labor Day in Illinois with relatives.

Doris Louise Flenar spent a few days last week with her grandparents, Mr. and Mrs. Wesley Flenar.

Mr. and Mrs. Chester Bashore and family, Mr. and Mrs. Warren Gill and Mr. and Mrs. Judd Hammerschmidt of Chicago spent the week end with Mr. and Mrs. W. A. Warner.

Mrs. Broda Clark and son George and Mrs. Fern Carter and son George are enjoying a two weeks vacation at Yellow Stone Park, Denver Colorado and other points of interest.

Mr. and Mrs. Milt Evans and son Carl of Martinsburg Ohio, and Mr. and Mrs. Walter Hoyt of Hanover Ohio spent Wednesday and Thursday of this week with Mrs. Evan's cousin, Emmett Clark and family, they also called on other relatives and friends around Mentone.

Mr. and Mrs. L. P. Jefferies and Mr. Jefferies' assistant Robert Reed attended the funeral of Mrs. Rathenberger, wife of the undertaker at North Webster last Monday Sept. the 2nd. Mr. and Mrs. Rathenberger were members of the Kosciusko County Undertaking association.

#### Brazil Nuts

The oily three-angled nuts known as Brazil nuts grow on the "lecylthidaceous" tree. The nuts themselves grow inside a large fruit. Each globular fruit contains from 18 to 24 closely packed nuts. These are the nuts which are often known as "nigger toes."

#### Good St. Nicholas

St. Nicholas was the patron saint of Russia. He was the bishop of Myra in Lycia in the Fourth century. He is regarded as the patron saint of merchants and travelers by sea and land, but also especially of the young and of scholars. Hence his festival, December 6, was formerly celebrated in the English schools, and still survives in the Santa Claus of Christian rejoicings.

#### Gulf Stream Temperature

The temperature of the Gulf stream is several degrees higher than that of neighboring oceans. Water has a remarkably high heat capacity. It is four times that of air, five times that of earth. The water of the Gulf stream carries its accumulated heat, derived from the tropical sun, for a long time and to great distances, giving it out gradually to the air.

The next monthly meeting of the Newcastle Twp. Farm Bureau will be held on Wednesday evening Sept. 18 at the Talma High School. A splendid program is being prepared by the committee, Mrs. Paul Myers, Mrs. Wilvin Long and Mrs. Otis Nye.

D. M. Bryant of Los Angeles California called his parents, Mr. and Mrs. Geo. Bryant by telephone, on Sept. 6th and congratulating them on their 50th wedding anniversary.

### IT IS BETTER—

To let your recreation be manful, not sinful.

To bend the neck promptly than to bruise the forehead.

To think before you speak than to speak before you think.

To hold on to your good name, for it is of more value than gold.

To put your foot down where you mean to stand, and keep it there.

To look well to your feet when they are likely to lead you into the paths of sin.

To labor to keep alive in your breast that little spark of celestial fire called conscience.

To pay due attention to one generation of children. It will save you a hundred years' labor with adults.

To stick to your own opinion, if you have one, and to allow others the same liberty of sticking to theirs.

### RANDOM THOUGHTS

The girl who you call "baby" was not born yesterday.

It's just as easy to enforce prohibition as it is to enforce styles for women.

Reckless drivers are those who make possible the enormous turnover in the automobile industry.

Reunions are the vogue in this country, but the one most needed is to once again make both ends meet.

Some men finish making the last payment on the car just in time to use it as the first payment on a new car.

Trader Horn says that a bullet once passed through a lion and hit him. He ought to know that it's dangerous to stand near a lion.

### Sophistication

A careful examination of several explanations of the meaning of sophistication lead to the conclusion that if you don't know much and pretend you do, you are sophisticated.—Rochester Democrat and Chronicle.

### A Child's Desires

A canary bird in a big cage is sometimes more important to a child than bread, beans or fricassee of chicken.—Woman's Home Companion.

## MENTONE ITEMS

Mrs. David Holloway is improving at her home on So. Franklin.

Mr. and Mrs. Lee Koli entertained guests from Goshen Sunday evening.

Mr. and Mrs. Wesley Flenar were Sunday guests of their son Seth Flenar and family.

Mr. and Mrs. Monroe Paulus of Silver Lake spent Friday at the Cloice Paulus home.

Wm. Deamer and wife and Bert Busenburg and wife called on relatives in Warsaw Sunday afternoon.

Miss Scenora Lyon and Bob Hoover of Nappanee were guests of Mr. and Mrs. Frank Lyons Sunday.

Rosemary Baker left Sunday for Philadelphia where she will be the guest of her brother Doyle for a few weeks.

Mr. and Mrs. George Tinkey and son Max of Warsaw were Sunday guests of Mr. and Mrs. Franzil Minear.

Mrs. Ira Borton spent last week in Niles Michigan the guest of her son, George Borton and wife and mother Mrs. Sarah Cochran.

Mr. and Mrs. Walter Hurd of White Pigeon Michigan and Mr. and Mrs. Verl Halterman were Sunday guests of Mr. and Mrs. Jake Kesler.

Messrs Earl Craig and Byron Burgener of Bourbon, Miss Marie Baily of Tippecanoe and Miss Bethel Coplen spent Sunday in South Bend.

Mr. and Mr. Chas. A. Wood, daughters Margurite and Henrietta of Bourbon, Mr. and Mrs. Cloyd Dickenson sons Donald and Harry of near Etna Green and Mrs. Mary Tucker of Mentone were Sunday guests of Mrs. Lizzie Hibschan.

Mr. and Mrs. Ernest Busenburg and daughter Betty, and Mr. and Mrs. Fred Kubley and Mabel Busenburg of Elkhart and Everett, Lois and Opal Busenburg spent Sunday afternoon with their sister, Lena Blue and family. Mrs. Minnie Busenburg and children were also callers.

## The "Stop" Sign is Up

After we went to all the trouble of setting the type and after we had the first page of this issue printed the village officials get busy and put up a "Stop" sign at the enter-section of Main and Broadway. This is sure getting quick delivery.

## COMING!

Sept. 20

## Psi Iota Xi Installation

A very impressive and beautiful service took place at the home of Miss Francis Clark Saturday afternoon when the Alpha Xi Chapter, located at Logansport, Ind., initiated the members of La Petite Club into Psi Iota Xi Sorority, and installed a local chapter. The house was tastefully decorated for the occasion with baskets of flowers. At six o'clock a prettily appointed three-course dinner was served.

The visiting delegates were Miss Thelma Sines, Grand Vice President, Mrs. Victoria Martin, the Misses Tamar Smith Beth Pawlen Mary Margaret Graf, Katherine Kammerer and Harriet Huff.

Miss Sines was presented with a lovely gift in token of the appreciation of the new chapter.

Charter members of the local chapter are the Misses Frances Clark, Eunice Reed, Nellie Lyon, Annabel Mentzer, Thais Greulach Louise Black, Thelma Harris, Artella Kesler, Rosalind Mentzer, Mildred Anderson and Mary Jane Borton.

## Wood for Lead Pencils

The forest service says that the red cedar, from which lead pencils are made, grows all through the eastern part of the country. The lead pencils are made from the heart wood, and probably the trees suitable for this purpose are about fifty years old.

## Silkworm Culture

The silkworm is mentioned in Japanese mythology, but its historical record begins in 190 A. D., when a Chinese named Komo-O, came to Japan bringing silkworm eggs with him. Ninety years later, several Chinese experts in agriculture went to Japan, and from that time the industry flourished.

## Paint WITH Paint

It's an old adage that "We only get what we pay for," and this is especially applicable to paint. You get just what you pay for. The many cheap brands of paint now on the market may appear Cheap When Priced By The Gallon,

But how many more gallons will it require to paint your buildings with cheap paint? It is not cheap at all as you will soon discover. You are not experimenting when Sherwin-Williams paint is used, its reputation for fifty years as a standard paint all over the world is sufficient evidence of its quality.

## BARN PAINT

"SUMMIT" Barn Red is a high grade paint which we are selling at \$1.50 per gallon and every gallon requires one gallon of linseed oil. This paint is a rich red which will stay red. We solicit your paint business and will assure you that the paint you purchase at our store will give you satisfaction.

# DORAN ITEMS

Mrs. Bert Holloway has been on the sick list this week.

Edison Tucker spent last week at the State Fair at Indianapolis.

Mrs. Edson Sarber spent Wednesday in Akron attending the fair.

Miss Mary Blackburn is spending the week at the Floyd Tucker home.

Mr. and Mrs. Elmer Huffman made a business trip to Warsaw Saturday.

George Creakbaum and family are moving in the Biddleman home in Sevastapol.

Mr. and Mrs. H. V. Nellans made a business trip to Niles Michigan Saturday.

Elmer Leininger and wife return ed home Sunday night after touring in the Western States.

George Smith Jr. is spending the week with his grandparents, Lloyd Creakbam and wife.

Russel Eber and lady friend were Sunday evening guests of his parents John Eber and wife.

Mr. and Mrs. Ivan Miller visited with Mrs. Miller sister of near Silver Lake Wednesday evening.

Carl Rickel and family of South Bend spent the week end at the home of Mr. and Mrs. Horace Rickel.

Lester Creakbaum was badly cut and bruised when the gravel truck, which he was driving over-turned.

Mrs. Gus Mollenhour and daughter Velma spent a few days this week with Mr. and Mrs. Hiarm Mollenhour.

Mr. and Mrs. Bernard Black entertained Sunday evening Mr. and Mrs. Devon Shipley and children and Mr. and Mrs. Clarence Tinkey and son.

Among those who attended the Indiana State Fair this week are: Mr. and Mrs. Elmer Huffman, Mr. and Mrs. O. A. Heighway, Mr. and Mrs. Mars Tucker, Floyd Tucker and wife, Lindus Latimer and wife, Gus Mollenhour, Bert Holloway, Devon Tucker, Mr. and Mrs. H. V. Nellans, and Mr. and Mrs. Ernest Igo.

Mr. and Mrs. Dale Cook visited with relatives in Chicago last week

Mr. and Mrs. Mars Tucker attended the circus at Warsaw Saturday.

Mr. and Mrs. Bernard Black spent Sunday with Mr. and Mrs. George Black.

O. F. Miller and wife spent Sunday with Mr. and Mrs. John Milier of Bourbon.

Mrs. John Creakbaum has been working at the H. M. C. Cafe, at Akron the past week.

Mr. and Mrs. Curtis Riner were callers Sunday at the home of Mr. and Mrs. Ernest Igo.

Mrs. Elmer Study, Mrs. Eva Whetstone and children will move to Warsaw this week,

Mr. and Mrs. Ora Tucker and children attended the circus at Warsaw last Saturday,

Mr. and Mrs. Joe McHenry of Bucyrus Ohio were guests of Mr. and Mrs. Chas. Petry Sunday.

Mr. and Mrs. Ivan Miller spent Sunday at the home of Charles Braudenburg of near Silver Lake.

Mr. and Mrs. Lloyd Creakbaum spent Sunday with Mr. and Mrs. Frank Alexander of Silver Lake.

Mr. and Mrs. Frank McGee of Warsaw are spending the week at the home of Mr. and Mrs. M. A. Tucker.

Mrs. Lee Higgins and children of Elkhart are spending the week end at the home of Mr. and Mrs. Gus Mollenhour.

## Perfection in Samplers

The old-fashioned sampler consisted of a square of perforated canvas, the rows of perforations being equally spaced. Designs were stamped on the canvas and filled in with different colored worsteds, the stitches forming little "x's." On the finest canvas this would almost give the effect of a painting.

## Snake Breeding

Many snakes lay eggs, but most venomous ones and many of the commonest species are viviparous. The young are ready to take care of themselves as soon as they leave the egg, but are usually protected for a time by the mother.

## Another Arab War Senate and Sugar Would End Strikes Mystery of Finance

ANOTHER war has broken out following wholesale murders in Palestine. Jews and Arabs are boycotting each other in business. The Anglo-Palestine bank refuses bills of credit to Arabs. The latter boycott the Rutenberg Electricity company and the Jewish tank.

British airplanes start real work with Arabs killed and wounded their friends convinced that Mohammed is not as powerful as was supposed.

Christians are as much interested as Jews in the outbreak. Once a religious war starts, the Mohammedan fanatic enjoys equally the murder of a Christian or a Jew. If anything, the Arabs might favor the Jews, to whom they are racially related. From the Jewish religion Mohammed borrowed much for his Koran.

It has been said that the Koran was written by an educated Jew for Mohammed, who probably could not write, although he certainly could fight.

The senate is discussing tariff. One hundred and twenty million Americans who eat sugar, beet sugar men, Louisiana sugar men, sugar growers of the whole world, are interested in sugar.

A high sugar tariff really means protection, a national subsidy of many millions, for employers of Asiatic labor in Hawaii and the Philippines.

Sugar comes duty free from those places, belonging to Uncle Sam; Asiatics do the work. Their employers get the profit. Not much of it will go to sugar growers on this continent.

Our friend Cuba, good customer and neighbor, would be ruined by a high tariff, if anything could ruin so plucky a people.

Britain's Labor government seeks a way to "end strikes and lockouts."

In a recent cotton strike workers lost \$5,000,000 a week in wages. Mills lost \$7,000,000 a week in export trade and must fight to get it back.

Arbitration is the only way. If the Labor government can find arbitrators that both sides will trust persuade employers to play fair and union men to keep bargains when they find they don't like them, it will render inestimable service to Great Britain and teach this country something it needs to learn.

From the material point of view Russia will gain by her "continuous industrial year."

There will be no stoppage of machinery, on Sunday or other days during 360 days each year. Five other days, six in leap years, will be devoted to patriotic, bolshevik holidays.

Each man will have his rest time longer than under our six-day and Sunday plan, but machinery will never stop except for repairs.

To make machines work all the time and give men reasonable leisure would be the ideal program. But, of course, Sunday should not be neglected—especially on a basis openly hostile to religion.

The International Congress of Psychology learns that married life brings the male mind closer to the feminine mind.

Investigation of "sex differences primarily non-intellectual," said Doctor Erman, shows that married life weakens "mental masculinity."

Naturally and fortunately, men were once all cannibals, all murderers, all thieves. To meet a stranger was to kill him or run so that he would not kill you. Women had to change that gradually, in their husbands and in their little boys also. They have done it, partly. Much work remains for the feminine mind.

Finance is a mystery, understood least by the man who thinks he understands it.

Britain lent millions to France, and France now is drawing gold from London, worrying the Bank of England.

The French lend money on call at 2½ per cent, while complaining of poverty caused by the war. This richest country in the world lends call money at from 9 to 20 per cent. A French business man can borrow money on time loans for 3½ per cent. American business men pay 6 to 8 per cent.

Today the stock gamblers and investors probably will start again cheerfully. August was a great month. Two hundred and forty representative stocks increased in value by four thousand, four hundred and sixty-five million dollars.

Colonel Lindbergh says a flyer must have some imagination to get him out of trouble—not too much imagination, which might distract him from his flying. And the first-class flyer must not know what fear is.

Lieutenant Doolittle possesses the necessary requirements. While showing what an airplane could do, above the Cleveland airport, he stripped the wings from his plane and jumped at 2,000 feet with his parachute. He immediately asked for a new plane and went up to compete in "upside-down" stunts.

## Must Use Horsehair

The Etude says that materials other than horsehair for violin bows have been tried, but none has proved satisfactory or come into general use.

## TIPPECANOE ITEMS

Mrs. Betty Clark spent Sunday with John Nellans and family.

Mr. and Mrs. Simon Snyder spent Wednesday at the State Fair.

Hugh and Velma Nellens left for Lafayette where they will attend school this winter.

M. and Mrs. Fred Horn are the proud parents of a baby girl named Audry Deloris.

Mr. and Mrs. Francie Kehoe called on Mr. and Mrs. Lloyd Teel Sunday evening.

Francis Kehoe and Mr. and Mrs. H. V. Nellans spent Wednesday and Thursday at the State Fair.

Mrs. Rose Moriarty of Hammond who has been visiting in Fort Wayne for the past week, and on returning home stopped over Sunday to visit her sisters and Mrs. Minerva Shaffer who has been quite poorly.

## TALMA ITEMS

Lloyd and Orton Zent attended the State Fair Friday.

Lon, Mack and Alonzo James attended the State Fair last week.

Miss Cleo Walters had the misfortune to break her arm one day last week.

Obe Haimbaugh and Roy Adamson and family attended the State Fair Thursday.

Mr. and Mrs. Con Welch of California were Sunday guests of Mr. and Mrs. Silas Meredith and family.

Mr. and Mrs. Edwin Meredith spent Saturday evening in Warsaw the guests of James Caywood and family.

Mr. and Mrs. Harley Zolman and two daughters Annabelle Lee and Dona Joan of Rochester ate Sunday dinner with Mr. and Mrs. Ora Horn. Roy Adamson and family and Lee Tippy and wife and Robert Horn and family were afternoon callers.

LOST—A pipe vice between Center Church and Mentone. Finder will please return to Howard Kohr, Mentone.

## MENTONE ITEMS

Bernice Kohr is on the sick list this week.

Corlyss one of the Twin sons of Mr. and Mrs. Cloice Paulus is ill.

Mr. and Mrs. John Harris were in Indianapolis the first of the week on business.

Miss Stella Meredith is taking treatments at the Methodist hospital at Indianapolis this week.

Mr. and Mrs. Con Welch of Long Beach California were guests at the Mahala Meredith home last week.

Mr. and Mrs. Allen Long and daughter Marcie visited over Sunday with their son Harry Long and family at Muncie.

Mr. and Mrs. Edison Vandermark attended the State Fair at Indianapolis last week and report a good time and a great show.

Mr. and Mrs. C. E. Turner and Mr. and Mrs. James Case have closed their cafeteria at Winona and are enjoying a trip to Florida.

Mrs. Lizzie Morgon of Warsaw spent over Sunday in Mentone, with Mrs. Ben Blue, Mrs. Sam Mentzer and Mrs. Catherine Brown.

## John Harris Sells His Residence

John Harris has sold his residence on North Broadway to Mr. John D. Long of Fulton County. Mr. Harris will not give possession until December when he intends to locate in Warsaw. He has resigned his position as Special Agent of the National Fire Insurance Co., which he has held for the past ten years.

## Clark's Expand

Last week W. F. Clark purchased the store at Palestine, taking immediate possession of same. Mr. Clark will increase the stock of the Palestine Store and run it in connection with his store at this place. We believe that this move will be of value to Mr. Clark and at the same time give Palestine a real live up-to-date store. We have not yet learned who will have charge of the Palestine store.

# SIMPLE MATTER

First College Boy - Gee, Bill, but I'd like to get out of debt!  
Second Ditto—Aw, that's a cinch! Jes borrow the money that you owe from the Governor.

## Date of Seeding Wheat and When to Harvest

That the date of seeding wheat has little or no effect on the time of harvesting is the conclusion which may be drawn after looking over the seeding and harvesting dates kept for the past 36 years on plots at the North Dakota experiment station.

In the years of 1896, 1901, 1908, 1920 and 1924 the date of harvest was August 10, but the dates for seeding in those years respectively were May 6, May 4, April 18, April 26 and April 22. In some instances there was a variation of a month in the date of seeding while in every instance the date of harvest came on the same date.

Late seeding of wheat is not advocated by the station, however, as it is usually followed by a short straw and a lighter crop, taking the weather conditions into consideration.

## Turkey Is Roamer

Many poultry men consider that turkeys are naturally a roaming bird and that they can pick up their feed from all over the farm. It has been found, however, that much better success with turkeys can be enjoyed by keeping them confined and by following out the definite up-to-date practices that have been found economical and efficient. Another practice which should be kept in mind in handling the turkey flock is that of feeding sprouted oats or fresh well-cured alfalfa meal.

## Feeding Steers

The Ohio experiment station recently conducted a test showing that where silage was used in large rations for fattening steers, \$16 more per acre for corn could be realized. There are many experiments carried on by many of our experiment stations which have demonstrated conclusively that silage will lower the cost of beef production. With this evidence, certainly agricultural advisers would do well to urge a greater use of the silo.

# Public Sale

I, the undersigned, will sell at 11:00 o'clock on

## Tuesday, September, 17,

Four miles north-east of Mentone, 9 miles south-west of Warsaw and 1 mile south of Harrison Center church, on the O. M. Gates farm, the following property:

## 4 MULES 4

One span coming 8 years old, weighing 2,500 pounds; 1 span coming 7 years old, weighing 2,400 pounds. These mules are **REAL WORK TEAMS.**

## 13 Head of Cattle 13

One Black Cow, 6 years old, giving 4 gallons of milk per day; 1 Roan Cow, 4 years old, giving 2 gallons of milk per day; 1 Brindle Cow, 3 years old, giving 3 gallons of milk per day; 2 Heifers weighing 800 pounds each; 1 Herford steer weighing 700 pounds---an **EXTRA GOOD ONE**; 6 Good Calves; 1 Herford Bull.

## 100 Head of Hogs 100

Fifty-three head of shoats weighing 125 pounds each; 2 Duroc Sows with 22 pigs two weeks old; 1 Black Sow with 4 pigs; 2 White Sows with 14 pigs; 1 Hampshire Sow to farrow by date of sale; 1 O. I. C. Male Hog.

## 17 Head of Sheep 17

16 Black Faced Ewes; 1 Good Service Buck.

## FARM IMPLEMENTS

One Fordson Tractor and plows, 1 Studebaker wagon and flat rack, 1 Triple wagon bed, 2 Oliver corn plows—1 new, 1 spring tooth harrow, 1 double shovel plow, 1 single shovel plow, 1 Syracuse walking plow, 1 single Disk in good condition, 1 new McCormick-Deering mower, 1 Gail corn planter, 2 good sets work harness, 1 good pair of bob-sleds, and other miscellaneous articles.

**Terms Made Known on Day of Sale.**

# Mrs. O. M. Gates.

## Dispose of All Surplus Fowls

### No Profit in Holding Cock- erels Longer Than Twelve Weeks.

All surplus males, indeed all of the cockerels whether they are to be raised or not, should be removed from the company of the pullets before they are old enough to become bothersome. On most farms it is the custom to sell the males at the age when they weigh about 2 pounds each. Chicks that are hatched before the first of April bring good prices at the 2-pound stage. This should be by the time they are 10 or 12 weeks old, or earlier. Many grow good broilers of 2 pounds in eight weeks, sometimes in six.

#### No Profit in Holding.

There is no profit in holding the cockerels longer than 12 weeks, unless they are to be kept for breeding purposes, or to supply a special market. I know of a number of poultry men who supply motorists chicken lunches and dinners during the summer and early fall. These men make a good profit by holding the cockerels to a later date, sometimes to the age of four or five months, because they can dispose of them at a large price to the traveling public, says a writer in the Indiana Farmer's Guide. Poultry men who are located on main-traveled roads should consider this method of making larger profit from their flocks. It is a field of endeavor not yet overcrowded.

Cockerels to be kept for breeders should be removed to a separate house and range. If there happens to be but one good range available, let the pullets have it. It is of more importance to them than it could possibly be to the cockerels. However, it is a good plan to take good care of the males. Remember, they are responsible, jointly with the females, for the future welfare of the flock.

#### Grow Good Pullets.

There is one last rule that poultry men should observe in endeavoring to grow good pullets. Be careful in changing them to the laying quarters. I would house the birds just before they start laying or as soon as a few eggs are found. Do not delay the matter, as they learn to hide the eggs in out-of-the-way places; also, and most important of all, never house the cockerels with the pullets. It is time enough to introduce males when hatching eggs are needed a year later.

### Fattening Turkeys on Range Is Proper Plan

In getting the turkeys ready for market it is a good thing to begin feeding a little night and morning about the middle of September.

The feed should be very light at

first and the amount gradually increased until about ten days before marketing, when they should be given all they will consume three times a day.

In the beginning equal parts of wheat, oats and corn may be given, but the proportion of corn should be gradually increased until the last of October, when they should be fed on corn alone.

As a usual thing, results are not satisfactory where the birds are confined during the fattening period.

### Advantages of Broccoli Over Cauliflower Plant

Broccoli, says a "Vegetarian," in the Journal of the Market Garden Field station, Massachusetts Agricultural college, has two distinct advantages over cauliflower, which it closely resembles. The grower is almost certain of a crop of broccoli even under rather adverse circumstances. Then, too, after the terminal head of broccoli has been removed, side shoots continue to develop, which carries the crop through a long season, from July to freezing weather. The vegetable is increasing in popularity in this country. The variety, Christmas Calabrese, is a satisfactory one to plant.

### Plants Not Forced Will Endure Low Temperature

Garden vegetables such as cabbage, tomatoes, etc., will endure lower temperatures and greater extremes of drouth without injury, after transplanting, if grown more slowly in the forcing bed than is customary. Such vegetables grown in a seedbed of sandy soil, low in plantfood, watered sparingly and ventilated freely, have large fibrous root systems, short, stocky, firm, woody stems and a concentrated sap of low freezing point.

Vegetables grown in a seedbed of rich soil, highly manured, abundantly watered and in a high temperature with little ventilation, have scanty root systems.

### Feeding Soy Bean Hay

Soy bean hay may be fed to dairy and beef cattle and sheep and, to a certain extent, take the place of linseed meal or other similar concentrates used for balancing the grain ration. To illustrate, a ration for a dairy cow composed of 20 pounds soy bean hay, five pounds ground corn, four pounds ground oats and one pound linseed meal, contains as much digestible protein as 20 pounds sudan grass, four pounds corn, and three pounds linseed meal.

"De way of de transgressor," said Uncle Eben. "is hard, but sometimes it 'pears like a concrete pavement fo' balloon tires."—Washington Star

## 4 TIMES Around the World with ONE OILING 100,000 Miles Without Stopping for Oil

An inventor who could develop an automobile, a railroad car or any other conveyance on wheels which would perform such a feat would be considered a wonder. But such is the record of regular accomplishment by the Auto-oiled Aermotor during the past eight years in pumping water.

Did you ever stop to think how many revolutions the wheel of a windmill makes? If the wheel of an Aermotor should roll along the surface of the ground at the same speed that it makes when pumping water it would encircle the world in 90 days, or would go four times around in a year. It would travel on an average 275 miles per day or about 30 miles per hour for 9 hours each day. An automobile which keeps up that pace day after day needs a thorough oiling at least once a week. Isn't it marvelous, then, that a windmill has been made which will go 50 times as long as the best automobile with one oiling?

The Auto-oiled Aermotor after 8 full years of service in every part of the world has proven its ability to run and give the most reliable service with one oiling a year. The double gears, and all moving parts, are entirely enclosed and flooded with oil all the time. It gives more service with less attention than any other piece of machinery on the farm. To get everlasting wind-mill satisfaction buy the Auto-oiled Aermotor, the most efficient windmill that has ever been made.

## Facts for Egg Producers

### WHO WANT

## "More Money for Eggs"

More money can be had only by producing high quality eggs. We have the buyers and we pay for quality.

### Quality Eggs

Are those which are of good size, clean, sound strictly fresh and white yolks.

## Louis Kadans Co., Inc.,

306 Greenwich St., New York.

# POULTRY

## CULLING METHODS QUITE IMPORTANT

### Much Money Lost Each Year by Unskilled Manner.

All the good methods in building a profitable poultry flock may be followed but if culling is not practiced, the results are disappointing.

"Culling is one of the most discussed phases of poultry work," says C. F. Parrish, poultry extension specialist at the North Carolina State college. "There is a great deal of money lost each year on unskilled and ill-timed culling. Most poultrymen are elastic in their culling practices, leaving weaklings, short and round backed birds, deformed or undersized chicks with the hope that these may develop into profitable birds. This is bad. Such birds are always costly. Culling must start with the baby chicks and space may be saved and disease eliminated if the baby chicks are rigidly culled."

This culling needs to be followed on through the growing stage and when the pullets are transferred to the laying house in the fall, the good poultryman will pull out the weaklings that may have been overlooked earlier. If egg production drops suddenly, it may be a case of poor feed or disease but when birds have gone eight months and have not laid, it means that they are from low-producing stock and should be disposed of.

The laying flock should be culled at least once each month, says Mr. Parrish. Then when egg prices drop in the spring, another rigid culling should take place with only the best hens in the flock kept in the laying house. The virtue of this plan is that the hens are marketed as they become culled and no birds are kept that are not paying their way in egg production. In such cases, also, the hens are not all dumped on the market when prices may be low.

To cull properly, Mr. Parrish suggests giving attention to the comb, health, eyes, molt, pelvic bones, flexibility of the abdomen, shank and beak, vent color and weight.

### Rape Sometimes Used as Green Poultry Feed

Rape is sometimes used as green feed for poultry and the field will probably be all right as a goose pasture. In the fence corners and possibly throughout the field, there will be more or less other green plants and pasture grasses which will serve to vary the ration.

Some poultrymen have cut rape and used it for green feed for penned

flocks on limited ranges. They plant it in drills and do not cut below the crown so the green feed can be harvested several times during the summer.

Geese will thrive on almost any kind of pasture grass that a cow will eat and will eat almost any grass or vegetable or growing plant that chickens will eat. Most goose breeders do not use rape for pasture, however, but keep the geese on clover pasture land or on low grassy areas not used for crops.

### Profitable to Market Cockerels as Broilers

Those who have been advocating putting the cockerels off as broilers rather than keeping them longer in order to get more weight on them will be interested in the findings of the New Hampshire Agricultural college. After numerous experiments, they have satisfied themselves that it takes but seven to eight pounds of feed to produce a broiler weighing two pounds, while it takes anywhere from 12 to 20 pounds of feed for each succeeding pound up to six pounds. It is self-evident then that it does not pay market poultry men to hold their cockerels to get the six pounds in weight.

The poultry editor has always been advising you to get rid of your cockerels long before they eat their heads off, so to speak.

### Gains for Chicks

Chicks make the cheapest and most rapid gains when they are young. It is therefore essential that an ample amount of good wholesome food be kept constantly before the birds. Mash hoppers should be of sufficient size so that a large majority of the chicks can eat at the same time, thereby avoiding the constant fighting and crowding for room to eat. The outdoor mash hopper of adequate size is very desirable for developing the young stock. All feeding utensils should be kept clean.

### Grasshopper Control

Turkeys are a great aid in keeping grasshoppers under control. They require little feed and little investment in the way of buildings. Their need of a wide, free range makes it somewhat difficult to grow them in thickly settled countries. Grown turkeys are extremely hardy, but young poult need considerable care. A little water on the feathers, cold feet, a bit of spoiled food, or even one louse, will kill them at this stage. Poults should be watched until well feathered.

Sept. 20

### Antony's Great Oration

The speech in Shakespeare's play is in part founded on the historical funeral oration made by Mark Antony, though of course it is not a translation of his actual words.

### Oyster Shell for Hens of Great Importance

Profitable poultry raising depends on the elimination of weak, unhealthy chickens, subnormal egg production and soft-shelled eggs. Of course, there are many poultry feeds which will help to keep fowls healthy but there is one mineral food which combined with a balanced ration and plenty of sunlight will do away with all three of the evils just mentioned. This is crushed oyster shell.

The best form of crushed oyster shell contains 98 per cent calcium carbonate and therein lies its value to poultry. The formation of the egg requires three distinct steps. The yolk is made first. This passes to the next stage where it is coated with the white or albumen. The final step of the process is the formation of the shell. Egg-shell consists mainly of calcium carbonate. It is therefore evident that if the hen has not a sufficient supply of this mineral in her system, fewer eggs will be produced and those that are produced may have soft shells. In other words the calcium carbonate in the crushed oyster shell supplies the egg shell material.

## ANOTHER FAMILIAR NAME

Twenty-eight years ago S. S. Mentzer and his son Mahlon, opened a grocery store in this village under the firm name of Mentzer & Son. A little later they added a small stock of dry goods and established a very thriving business. About 1904, Mr. Art Manwaring, now deceased, entered into partnership with this firm and a complete stock of general merchandise was added which greatly increased the volume of business transacted. After several years Mr. Manwaring withdrew from the firm in order to give his entire time to the White City Egg Farm which he established at that time.

After the withdrawal of Mr. Manwaring, the business was organized and run under the firm name of The Mentzer Co., which name it has retained to this day, with Mahlon Mentzer as manager. The general store business was continued until about five years ago when the dry goods department was sold out—the business continuing with the lines of groceries, gents furnishings and shoes.

Three years ago this firm joined the I. G. A. forces, completely remodeling their store, bringing it strictly up-to date, thereby becoming the first store in this town to adopt the modern grocery method of "Serve Yourself if you wish." Their affiliation with the I. G. A. has enabled them to give the lowest possible price on fancy and staple groceries, and maintain a complete and fresh stock on hand at all times, and since entering this organization their business has steadily increased.

The many old time customers of this firm know that what they buy of Mentzers must be all right or it will be made all right, and as a result they have many customers who have been patronizing them from the day that the father and son started in business.

Mahlon Mentzer the manager of this firm, has always had the interests of the community at heart, ready with both time and money to aid any movement that would tend to the betterment of the community or the advancement of Mentone, and by his constant advertising has made the name "Mentzer Co" familiar in every home with in the trade territory of this village.

The firm were boosters for the Community Farm News, and is one of its regular advertisers. Watch for their announcements and you will be able to keep a close tab on the trend of grocery prices.

## H. V. JOHNS, FUNERAL DIRECTOR

A few months ago H. V. Johns entered the undertaking business in our city. He carries a complete line of goods necessary for conducting the business and holds himself ready at all times to answer any calls he may receive.

Mr. Johns is a son of Rev. Johns of this place, is a graduate of one of the best undertaking schools of the state and is perfectly competent to conduct any funeral. He is well and favorably known in this community and we see no reason why he should not be able to build up a large business in his chosen profession.

Mr. Johns is another person who greatly assisted in the building up

of the Farm News. It was he who did our soliciting at the start of this paper and through his efforts we added about one hundred and seventy-five subscribers to our list.

## ENGINEERING AND ATHEISM

By C. J. ULLRICH, Ex-President American Engineers' Association.

The statement that engineers are atheistic and unappreciative of the religious instinct is not true.

There is no reason why the engineer should be less religious than other educated and cultured people. On the other hand, engineers, by the very reason of their training and experience should and do have a profound regard for religion in its broader philosophic aspects. Being of an open mind, trained in the sciences, schooled in the laws of nature and taught to think along straight lines, the engineer reasons it out for himself. His study of the sciences and his experience with the laws of nature show him that unbroken order reigns in the universe.

The fact that the engineer fails to attend church regularly, refuses to subscribe to an orthodox creed or fails to take an active part in social reform should not brand him as being irreligious. He may, after all, be far more devout in his religious make-up than many of those who show their religion more ostensibly.

## PROBLEM OF MEDICAL COST

By SECRETARY OF THE INTERIOR RAY LYMAN WILBUR.

The American medical profession, ultra-modern in science, is woefully archaic in economics. Medicine has never been adjusted to the strides of modern business. As a result the cost to the public of obtaining the benefit of medical care is exorbitant. The profession has progressed mightily in scientific discoveries, in combating disease and prolonging life. It has stood so far as adjusting its financial aspect is concerned.

A survey of the medical expenses of a group of government employees showed that they had spent on the wide range from 0.7 per cent of their annual salaries to 33.9 per cent. This grossly uneven burden shows the extreme hardship imposed on those families in the higher brackets.

We have planned a five-year program covering all angles of the medical cost problem. At the end of that time we expect to be able to make a definite recommendation to the profession and to the public which will remedy the situation.

Medical men must face the problem, and can gain nothing by stubborn, unreasonable resistance. I have often told audiences of physicians: "Either you are going to do it, or it's going to be done to you."

Meanwhile, all experiments and plans, many of which are in process of being launched, can do no harm by being given trials. They should all prove useful in arriving at the ultimate solution.

### Church Of Christ

Sunday morning services as follows, Bible Study at 9:30, Preaching at 10:30 Communion at 11:30. Evening service at 7:30. Prayer meeting each Thursday evening at 7:30.

You are cordially invited to any and all of these meetings.

J. S. Johns, Minister

### Baptist Church Notes

### Kleckner--Longbrake

A pretty wedding occurred at the home of Mr. and Mrs. Ora Kleckner of near Tippecanoe, last Sunday at high noon, when their daughter Elva became the bride of Raymond Longbrake son of Mr. and Mrs. A. V. Longbrake of Burket. Rev. D. H. Oldham of Akron performing the single ring ceremony. They were attended by Ella Kleckner sister of the bride and John Longbrake a brother of the groom. Just before dinner was served Mr. and Mrs. Oldham sang I Love You Truly.

The ceremony was witnessed by twenty five guests, as follows: A. V. Longbrake and family of Burket, Elza Ball of Silver Lake, Mr. and Mrs. Joseph Doyle, Mr. and Mrs. Anthony Lechlitrer and Mr. and Mrs. Frank Garnett of Goshen, Rev. and Mrs. Oldham of Akron and Mrs. John VanGundy.

Mrs. Longbrake is a graduate of the Tippecanoe school and a charming young lady and her husband a young man of ability. They both have a circle of friends who wish them much happiness. They left immediately following the ceremony for their home in Elkhart where Mr. Longbrake is employed in the paper mill.

Mrs. J. R. Black spent a few days last week at the Allie Black home.

Goldie Warner who was quite sick last week is reported to be improving.

Don Adrain left last Thursday for Bloomington, where he will attend school this year.

Charles Carter wasn't able to attend school for a few days last week on account sickness.

Mr. and Mrs. T. L. McCrea of Gary were callers in Mentone Friday at the Mentone Cafe.

Mrs. Seth Flenar and children spent last week with her parents, Mr. and Mrs. Jerry Robbins.

Mr. and Mrs. Irvin Nelson attended the Bankers Association at Evansville, Indiana last week.

Mrs. Cora VanGilder was on the sick list for a few days last week with an abscess in her ear.

Mrs. Leonard from Severance, Kansas is visiting her sister, Mrs. Anna Manwaring for a few days.

Miss Annabel Mentzer was unable to resume her duties as teacher last week at Talma on account of illness.

Mr. and Mrs. James Blue and Mr. and Mrs. Lee Blue and family spent over Sunday in Michigan with relatives.

Charles and Miles Manwaring left last Wednesday, for Indiana University, where they will resume their studies.

Mrs. Leonard Wolford and son, Frederick and Mrs. Bonnie Latta, spent last Wednesday the guests of Mrs. Chester Herdeen of near Mentone.

Mrs. Elsie Minear, who recently underwent an operation for appendicitis, was able to take up her duties again at the Telephone Office last Thursday.

Mr. and Mrs. Orville Sarber spent the week end in Gary the guests of Mr. and Mrs. T. L. McCrea. Mrs. McCrea is a niece of of Mrs. Orville Sarber.

Mr. and Mrs. Lawrence Elick spent over Sunday in Michigan.

Mr. and Mrs. W. J. Mowrer of Rockfalls Illinois and Mrs. J. E. Johnsson of Bourbon took dinner with Mrs. Lydia Rynearson last Saturday.

Miss Irene Giffin who is a nurse at the McDonald hospital at Warsaw spent Thursday in Mentone with her parents, Mr. and Mrs. James Giffin.

Lou Groves of Talma, Orville Mentzer of Pawnee Oklahoma, and Mahlon Mentzer spent last Thursday and Friday in Chicago on business, they also visited visited Mrs. Sarah Whang.

**The Home Economic Club.**

The Home Economic Club met Tuesday afternoon September 17, at the home of Mrs. Harve Poulson.

**Housekeepers Asked to Watch for Pest**

**Mediterranean Fly Threatens All Fruit in Country.**

Housekeepers throughout a large section of the United States are being enlisted by the United States government as inspectors and scouts in the effort to repel a thoroughly dangerous foreign enemy—the Mediterranean fruit fly—which has already invaded the country.

Fruit from Florida, where the infestation of the fruit fly was first discovered, has been placed under an embargo, but only after much fruit which may have been harboring the pest, had been shipped to distant states. Federal authorities urge the utmost care in inspecting any fruit imported from Florida.

Except for the watermelon and the pineapple, all fruits grown in the United States are vulnerable to the attacks of the Mediterranean fruit fly. The fly is to be found in the form of small maggots or worms, inside the pulp of the fruit. When these maggots have reached full size or when they have been working for some time, the infestation is easily discovered, since they will destroy most of the pulp. Before that time, any fruit which is conspicuously soft, or in which any sort of worms or maggots are found, is open to suspicion.

Destruction of such fruit is urged by the government. To make sure of killing the maggots, the fruit should be boiled or baked for a long period. Throwing it into the garbage is the surest method of giving the maggots an opportunity to grow and spread.

# Public Sale!

I, the undersigned will sell at public auction at my residence 1-4 mile south of Sevastapol or 3 1-2 miles south-east of Mentone, on

**Saturday, Sept. 21, 1929**

Commencing at 12:00 o'clock, noon, the following property:

## Household Goods

One Globe cook stove, 1 kitchen cabinet. 1 buffet, 1 12-foot table, 1 3-burner oil cooker with oven, 1 book case, 3 rockers, 1 set of staight chairs, 1 stand, 1 large mirror, 1 clock, 1 sewing machine, 1 piece of linoleum about 14 x 14, 2 or 3 beds and springs, 1 bed room suit, 3 good rugs, 1 Edison Phonograph with 40 or 50 records

## Farming Implements

One buggy, 1 mower, 1 riding and 1 walking breaking plow, 1 lot of sap pails, 2 barrels of vinegar, 1 good wagon with stock rack, 1 wagon fairly good, 2 disks, 1 cultivator, 1 cream separator and other articles too numerous to mention.

**Terms Made Known on Day of Sale.**

**Jacob Kern.**

Jas. Gill, Auct.

Cal Beltz, Clerk.

## 4 TIMES Around the World with ONE OILING 100,000 Miles Without Stopping for Oil

An inventor who could develop an automobile, a railroad car or any other conveyance on wheels which would perform such a feat would be considered a wonder. But such is the record of regular accomplishment by the Auto-oiled Aermotor during the past eight years in pumping water.

Did you ever stop to think how many revolutions the wheel of a windmill makes? If the wheel of an Aermotor should roll along the surface of the ground at the same speed that it makes when pumping water it would encircle the world in 90 days, or would go four times around in a year. It would travel on an average 275 miles per day or about 30 miles per hour for 9 hours each day. An automobile which keeps up that pace day after day needs a thorough oiling at least once a week. Isn't it marvelous, then, that a windmill has been made which will go 50 times as long as the best automobile with one oiling?

The Auto-oiled Aermotor after 8 full years of service in every part of the world has proven its ability to run and give the most reliable service with one oiling a year. The double gears, and all moving parts, are entirely enclosed and flooded with oil all the time. It gives more service with less attention than any other piece of machinery on the farm. To get everlasting wind-mill satisfaction buy the Auto-oiled Aermotor, the most efficient windmill that has ever been made.

## County To Have Farm Marketing School

Arrangements have been completed by which Kosciusko County farm families are to have the privilege of attending a co-operative marketing school which will open Friday evening, October 4, 1929. Announcement of the location will be made in a few days.

The purpose of the school is to better acquaint farm people with the principles on which sound co-operative marketing must be built. The recently enacted Agricultural Marketing Act aims to aid agriculture by setting up and developing co-operatives efficiently managed.

The Indiana Farm Bureau Federation and the Department of Vocational Education of the State Board of Education are sponsoring these schools. A trained instructor familiar with the most successful farm cooperative marketing organizations in the country will be in charge.

It is expected that farm people from all over the County will avail themselves of this unusual opportunity to acquaint themselves with the coming program of agriculture.

## Flowers For Ye Editor

Our thanks are due to Mrs. L. P. Jefferies for a very beautiful bouquet of flowers brought to our office one day last week. This is indeed a matter of rare news—newspaper men are accustomed to receiving bricks instead of bouquets.

## Pioneer in Equality

The International Typographical Union, according to an historical sketch of "Women in Industry," published by the National Women's Trade Union league, was the first national union to accept women on an equal footing with men.

## Skunk Family

A civet cat is more correctly called the little striped skunk. It is smaller than the genuine skunk. The end hair is short, thick and dark. The top hair is silky and black with white stripes or patches. There is also a Chinese civet, belonging to the civet family. Its fur is heavy and quite silky, but the color varies and is spotted.

## House and Lot Unity

The keynote to a beautiful home is unity between the house and the lot. There can be no unity where the house is of unusual design and the grounds bare or improperly planted. Proper planting involves the proper use of shrubs. There are three distinct uses of shrubs: For screening unsightly objects; for making a natural transition from the house to the yard, and for accent purposes.

In carrying out the above ideas as are used by owners of pretentious houses and country estates, a few suggestions will be given:

Plant in masses and not as individual shrubs; use planting beds and make them large enough; use care in size and color of shrubs; plant small shrubs in front of larger growing shrubs. All shrubs have a natural height and will never grow taller. As pertaining to the average suburban home grounds, shrubs fall into three general heights: Dwarf—three feet and under; medium—three to six feet; high—six to ten feet and up. The latter size is rarely used for foundation planting.—Detroit Free Press.

## Noxious Weeds in City

The city commissioner of Calgary, Canada, recently issued a warning to all owners of properties where noxious weeds are allowed to flourish, that unless immediate steps were taken to wipe out this nuisance the city would do the work and the cost be charged against the property holders. Last year the city experimented with chemicals as weed eradicators and their efforts are shown by the reduced growth this year to have met with success. The cost of the campaign would be about \$10 to \$20 per lot, the commissioner estimated. He advised citizens who own lots where the harmful weeds are growing to eradicate them, otherwise the city would have to step in.

## Provide for Recreation

The building up of park and playground areas has come to be one of the chief enterprises of American cities. The center that can show itself to be a leader in this respect is making an excellent bid for more residents and establishing a strong claim upon those it already has. Ample recreation facilities are indispensable in modern city life.

## Build Upon a Rock

The admonition of the ancient wise man to build upon a rock is valuable and practical advice. It is not always possible to follow it literally, but with present-day knowledge adequate foundation may be built regardless of soil conditions.

## Playgrounds Multiply

More than 800 communities in the United States have established public playgrounds.

If Debussy had been living at the time of Mozart, he would have composed as Mozart, and vice versa. Modern music has a background of classical simplicity.—Kansas City Star.

## Traditions of Sheep Disproved

### Coverings of Wool Over the Face Does Not Indicate Its Quality.

(Prepared by the United States Department of Agriculture.)

Traditionally sheepmen have believed that the best sheep have coverings of wool over their faces. Another common belief was that folds around the neck and shoulders of a sheep was an indication of a fleece of superior quality and value. Another idea commonly held was that the weather exercised a controlling influence in the quality and quantity of wool.

#### Bring Out Facts.

Research work by the United States Department of Agriculture has disproved two of these ideas and confirmed the other, but with a highly important modification. To bring out the facts, the department workers have for years carried on painstaking investigations, using methods which they admit seem wasteful and useless until the methods and results are understood.

The bureau of animal industry maintains a flock of sheep in eastern Idaho. Each June at shearing time each sheep is identified, weighed, and sheared. The staple is measured. The fleece is weighed. A sample is inclosed in a tin container and sent to the United States Experiment farm, Beltsville, Md. In the wool laboratory skilled workers dry the samples in an electric conditioning oven and get the moisture-free weight. They remove grease with carbon tetrachloride and the dirt by a special scouring process. Another drying makes possible a determination of the weight of clean wool and of dirt. Thus it is possible to compile a complete record of each sheep's production each year and for successive years.

#### Constant Culling Wise.

These records have disproved the first two ideas which were widely believed. Weather does make some difference in wool production, but there is much more difference between individual sheep in one season than there is between flocks in different seasons. This points the wisdom of constant culling of low-yielding ewes and selective breeding for heavy fleece production.

Application of these facts on the sheep ranges is returning to sheepmen each year many times the cost of the research, says E. W. Sheets, who is in charge of the animal husbandry work of the Department of Agriculture.

### Swine Having Constant Access to Water Thrive

It has been demonstrated many times by experiment stations as well as by thousands of producers that

hogs do better and make larger gains from a given amount of feed when they have constant access to water. Normally a hog drinks only small quantities at a time, but it likes to drink often. It will drink several times during one feeding period when it can run to a self-feeder at will. When the feed is thrown on the ground or on a feeding floor where the individual hog must eat in competition with a large group, it is not likely to stop for water so long as there is grain to eat. But when it can run to a self-feeder it soon learns that there will be plenty of feed left when it returns. Then it begins to eat more deliberately and to drink several times before it has satisfied its hunger.

### Feed Market Chickens as Much as Possible

All chickens intended for the early market should receive as much food as they will consume four times daily.

Under good management it is possible to add half a pound weekly to the weight of birds which have been specially bred for the table.

Of course, in every flock there will always be a few birds with a tendency to put on very little flesh—in fact, there is often some difficulty in maintaining their weight.

Such birds should be marketed without delay. If kept for special fattening they frequently drift into an unmarketable condition.

## Farm Notes

Cut a poor tree when it is young to permit a good one to replace it.

A good draft horse is a ready and willing worker and is neither irritable nor nervous.

Pullets and cockerels should be kept in separate flocks if they are to develop as they should.

When raspberries and blackberries have been harvested, cut out and burn the old fruiting canes. This will help hold disease and insect injury in check.

Good pasture for growing pigs, brood sows, and all classes of swine is so valuable that it often makes the difference between profit and loss in the hog business.

Fewer mistakes in culling hens will be made when the flock has been properly fed and the hens given a chance to lay as many eggs as they are capable of producing.

Among the thousands who get out into the open, over the holidays, are coroners.

This country appears to have become a refuge for the insect pests of all the earth.

The Toledo Blade says that man is losing interest in legs. They are still handy to walk around with.

## Feeding Sweet Clover

So far sweet clover hay has not been observed to in any way injure sheep or horses. Its bad effects seem to be confined to cattle. Then, too, sweet clover pasture has never been known to produce this trouble. Thousands of farmers have used sweet clover pasture for years without any bad results. The North Dakota experiment station has conducted a sweet clover pasture test with calves without discovering bad effects.

## AL FRESCO FOR HER

He (simple cuss)—Do you know any parlor games?  
She—No—all my flirting is done out-of-doors.

## AFTER HE'S GONE

"I want to learn the whereabouts of my husband."  
"Madam, at this very minute your husband is passing through the state of coma."  
"I hope to heavens he gets a flat tire."

## COMING!

## A Good Entertainer

Jessie Rae Taylor who will appear at the Community Building Friday evening is one of the best impersonators in this country, and all who attend may be assured of a very enjoyable evening. It is through the efforts of the Psi Iota Xi Sororoty, that the entertainer is brought to our village and our people should show their appreciation by giving their society a packed house.

## TALMA ITEMS

Gail and Harley Mathews spent Sunday in Michigan.

Joe Foster of Nappanee spent Sunday here with friends.

Paul Partridge and Cecil Mercer spent Wednesday in Michigan.

Mrs. Gail Mathews who has been on the sick list is improving.

O. C. Montgomery and family spent Sunday evening in Rochester.

Robert Tippy attended the motor boat racing at South Bend Sunday.

Lavoy Montgomery, Paul Partridge and Palmer Warren spent Saturday evening in South Bend.

Mr. and Mrs. Fred Barr and family of Indiana Harbor spent the week end with Mr. and Mrs. Frank Arter.

Claude McKinney and wife and Mr. and Mrs. Alfred Bowman of South Bend spent the week end at their home.

G. Myers of Plymouth who had charge of the local pickle station for this season, returned to his home Saturday.

Lavoy Montgomery was the guest of his grandmother, Mrs. Taylor Jefferies at Rochester Tuesday evening.

Mr. and Mrs. Roy Hubbard and family of Argos spent Sunday the guests of her parents Mr. and Mrs. Frank Arter.

Mr. and Mrs. Ernest Hoover and daughter of South Bend spent Sunday with her parents J. W. Byers and wife of this place.

Phyllis June Dick has returned home after spending a few days the guest of her sister, Mrs. Devon Emmons at Pierceton.

### Good Bye White Squirrel

Bert Whetstone has changed the name of his business from the White Squirrel Cafe to the "Mentone Cafe." We think that this was a good move on the part of Bert, as the old name was inappropriate for an eating establishment.

The Mentone Cafe has a large advertisement in this issue Read it.

### COMING!

Jessie Rae Taylor  
Impersonator and Humorist  
Sept. 20

### TALMA ITEMS

Miss Dorothy Alderfer is on the sick list.

Mrs. George Bryant is not so well at this writing.

Emmett Transburger spent Sunday with Mr. and Mrs. Walter Zimmerman.

Mrs. Robert Tippy and sons spent Friday afternoon with Mrs. Leon Kotterman.

Miss Dorothy Deamer left Tuesday for Greencastle to attend Depauw University.

Mr. and Mrs. Artie Eaton, and Mr. and Mrs. Lou Groves spent Sunday in Michigan.

Vincent Brockey of South Bend spent Sunday with his parents Abe Brockey and wife.

Mr. and Mrs. Devon Eaton were Sunday evening guests of Marshall Eaton and wife.

Leon Ketterman and family spent Sunday at Winamac the guests of Mr. and Mrs. Guy Deeds.

Floyd Sibert and wife and Mrs. Nora Sibert of Collamer were guests Sunday of Vincent Teeter and family.

Mr. and Mrs. Milo Horn and family of Hammond were week end guests of his parents, Mr. and Mrs. Peter Horn.

The Pleasant Valley Community Club met last Thursday afternoon with Clarence Peterson, at her home near Talma. The afternoon was spent socially and refreshments were served.

Mr. and Mrs. Jacob Kuhn of Carrol Co. spent Sunday with his sister and husband, Mr. and Mrs. George Bryant, Verdie Brockey and wife were also guests at the Bryant home.

Those who attended the District Farm Bureau Meeting at Bass Lake, on last Saturday night were: Mr. and Mrs. Lon Haimbaugh, Mr. and Mrs. Mack Haimbaugh and family, W. H. Cooper and wife, Mr. and Mrs. Otis Emmons and daughter Allene, Dorothy Horn, Maurene Jefferies, Von Kochenderfer, Kermit Biddinger, Delbert Hunter Leonard Eiler, and Oren Butt. A duet was given by Allene Emmons and Dorothy Horn, and several numbers by the Four Cylinder Sod Busters.

Wanted—A good second hand heating stove large enough to heat the Post Office. Inquire of E. R. Shinn., P. M.

### As to Water Rights

There are all sorts of legal questions involved in the matter of the control of water. All navigable waterways belong to the public. The federal government has jurisdiction over lakes and rivers as regards their navigation; while the states have the jurisdiction in other matters. Ponds and brooks belong to individuals, subject to state regulations.

Mr. and Mrs. John Norman of Lapaz, Indiana, visited Postmaster Shinn and wife Saturday. Mrs. Norman is a sister of Mrs. Shinn. Mr. and Mrs. N. are at the head of the Lapaz public schools, and while here placed with us a nice order for printing for that institution.

### Uses of Iodine

The addition of iodine in the food of animals will prolong the useful life of a cow by two or three years, and the productive life of a hen by at least a year.

### Smart Youngsters

One proof that the new generation is smarter is the fact that children know how to handle their parents without a book on the subject.—Cap-er's Weekly.

### Fatal Automobile Accident.

Taken from the Indianapolis News  
of Friday, Sept. 13

Two brothers were injured seriously last Thursday when their roadster over-turned and skidded for more than 100 feet after a collision with a truck.

Melvin Ketterman aged twenty four, 720 East sixty-fourth street, suffered a crushed chest, and Roland Ketterman, age twenty-nine, 2426 Ashland avenue was cut on the head and his chest was also crushed. Harry Ketterman aged fifty-two, their father, who was also riding in the roadster escaped injury.

The roadster, driven by the younger Ketterman was in a collision with a truck driven by Alfred Briscoe, age seventeen, R. R. 12, box 224, at the Lawrence road and Pendleton pike. Rolland Ketterman was thrown out of the car.

The injured were taken to the Ft. Benjamin Harrison hospital and later removed to the City hospital. Deputy Sheriffs Brown and Ragan investigated the accident, but no arrests were made.

Later, Rolland Ketterman died at 6:30 p. m., Saturday evening and was buried Tuesday afternoon at Logansport. The Ketterman's formerly lived at this place the father Harry Ketterman being a brother of Clem Ketterman.

### Public Sale Advertising

People contemplating having a public auction in this community will do well to consider the Community Farm News in their advertising program. The Farm News goes into the homes of over four hundred families in this immediate vicinity and consequently is a medium in which to advertise your sales. Where only small hand bills, 6 x 9 are wanted, we will print 200 of them and print the same matter in the Farm News one issue for only \$4.00. If you wish more than 200 bills the charge will be 25c for each additional hundred.

### Bake Sale

The Go Foward S. S. Class will have a bake sale at Sarber's grocery Saturday. President

### The Warship Question Cheaper Cars Coming? Standard and Shell Diamonds From Sugar

Ramsay MacDonald arrives soon to talk over armaments at sea. He probably comes prepared to ratify officially a program already agreed upon, substantially. He would not want to return with nothing after Snowden's triumphant round trip to The Hague.

The British, well informed by their separate air department, care little about surface ships for any future war. They know that ships will cut no figure.

But they have 70,000 miles of sea coast to patrol in their empire. Their cruisers are really floating forts or police stations, boarding houses for marines that can be landed when needed, then moved on to soothe the next troubled spot.

If the President would establish a separate air department, appointing a head engineer with others under him, all controlled by Engineer Hoover, to develop new ideas, Uncle Sam might not spend his life copying Germany, Italy and Britain. And we would not worry about warships.

Alfred P. Sloan, Jr., president of General Motors, told stockholders he bought "a substantial interest" in Opel, great German automobile concern, to develop German manufacture of automobiles rather than supersede it with organization and methods entirely American.

This country depends largely on export of manufactured articles, it is, therefore, interesting to hear from Mr. Sloan that in Europe his company in 1928, in dollars and number of units, sold more automobiles than any European concern manufactured.

Mr. Sloan plans for Europeans the kind of car they want at a price they can afford. Not so rich as we, they do not demand so much luxury.

Mr. Sloan, Mr. Ford and others in this country may need to produce here a cheaper car than any now offered.

General Wood, head of Sears, Roebuck, plans a car for \$200. Henry Ford years ago showed the writer a small, powerful engine, made for a car to sell at \$250. He probably has kept the plans for that product.

Professor Hershey of McPherson college told scientists at Minneapolis that genuine diamonds of superb color can be made by subjecting ordinary table sugar to a pressure of ten tons to the square inch.

He has produced such diamonds in his laboratory.

In another laboratory, the senate, Mr. Smoot is about to prove that he can produce for friends enough money to buy all the diamonds in South Africa by subjecting ordinary table sugar to a tariff pressure of two cents or so per pound.

Standard and other oil stocks have been going up despite the British invasion by "Shell." The 24,754,967 shares of Standard Oil of New Jersey are worth about two billion dollars now.

That is just one fragment of old Standard Oil, built up by Mr. Rockefeller and chopped into pieces by a rampaging government because it was supposed to be worth "nearly a billion," altogether.

What old Standard is really worth now, nobody knows. Including oil in the ground, ten billions probably would be a reasonable price.

Mellon, needing \$500,000,000 for Uncle Sam's use, invited subscriptions to treasury certificates. He was offered \$1,486,000,000, almost a billion more than needed.

He did not pay 9 per cent, or the Federal reserve 6 per cent discount rate, either.

Mr. Mellon could have bought the \$500,000,000 of certificates himself, and saved on income tax. But he avoids all business connected with government. And besides, he knows how to invest more profitably.

In his government, Mussolini held eight posts. Now the powerful Italian resigns seven of his cabinet offices, remaining premier and minister of interior only.

The king announces the changes by royal decree. Mussolini told him what to announce.

The years are passing, Mussolini knows it and seeks to build a government machine that will survive.

The Italian question is: "After Mussolini, What?"

Twenty-eight European nations are working at a plan called "The United States of Europe Plan." Germany says she will join, but not if there is an anti-American pact.

That's another hint to President Hoover and others responsible to make this country strong enough to take care of itself.

The circus is now a trust, John Ringling having bought all of any size. The "What Is It," sacred white elephant, Siamese twins, lady bareback rider will soon come out on the ticker in stock quotations, as they do in real life, on the sawdust.

(©, 1929, by King Features Syndicate, Inc.)

### Pass Closely Guarded

Restrictions as to passage through the Khyber pass apply both to men and women. The pass is open only on certain days of the week and at certain designated hours. It is the main strategical point of entry into India from Afghanistan and is, therefore, carefully guarded.

## MENTONE ITEMS

Mr. and Mrs. Wade Whetstone and family spent Sunday at Larwill the guests of Mr. and Mrs. McCray.

William Forst returned home Monday where he has been spending a few weeks visiting his niece, in Virginia.

Misses Vera Crisman and Pauline Ingalls of Bourbon were guests of Miss Frances Clark over the week end.

Mr. and Mrs. O. N. Hayden and daughter Louise of Niles Michigan called on Mr. and Mrs. A. H. Stanford Sunday.

Mr. and Mrs. Frank Manwaring and sons who have been spending the past month in Denver Colorado returned to their home in Mentone last week.

Mrs. Mattie Kinsey of Providence R. I. who has been spending the past two weeks with her parents, Mr. and Mrs. W. H. Cattell returned to her home last week.

Miss Ruth Aughinbaugh who has been a patient at the Robert Long hospital at Indianapolis, was able to be brought home Monday evening. They report her to be improving.

Mr. and Mrs. L. P. Jefferies, Mr. and Mrs. I. F. Snyder and Gaylord Emmons drove to Chicago Sunday and spent the day with Robert Snyder and wife. They report a very enjoyable time.

## EASY BERTH

"They say he's fallen into an easy berth."

"Yes; married the rich pullman conductor's daughter."

## Community Building

### More Than Commercial Value in Fruit Trees

There is a growing tendency to use fruits, especially fruit trees, for ornament as well as utility. It is not difficult to appreciate this, for their flowers are certainly a beautiful sight in themselves, and the fruits often make striking effects in contrast with the foliage. Flowering shrubs and trees, more particularly those bearing colorful fruits, are always in demand. There surely is no reason to disregard domestic fruits.

In localities where commercial orchards exist, people come from great distances to see the trees in bloom. The early cloudlike masses of white bloom on the cherries, plums and pears, and the exquisite pink glory of apples in full bloom are sights to be remembered, and which they fill the air with fragrance borne far by the breezes. As the season advances, and the branches bow with clustered fruit, a great appeal is made to the eyes as well as the palate.

Make fruit trees a part of your flower scheme. Often a large mass of color, such as a full-blooming fruit tree offers, is just the thing to make a picture that will stand out in your memory in contrast with the pictures presented by the landscape planting at other periods of the season.

### Highway Ugliness Soon to Be Thing of Past

Missouri gets a place in a list of states that have made some definite plans or actually have accomplished something toward highway beautification. Enough states now have concerned themselves with this idea to give it a national scope. In a few of the states hundreds of miles of trees have been planted along the highways; in others this or similar improvement has been started or is contemplated. The planting of shrubbery, placing of historical markers of artistic quality, together with removal of the litter of signs and roadside shacks, all are on the program of this hopeful enterprise. The conviction seems to be growing that returns on the full investment in highways cannot be realized until they are made more inviting and restful to the eye. As matters stand, there is danger of excessive speeding to get away from the ugliness that crowds upon the traveler in practically every mile of his journey.—Kansas City Times.

### Old Hiding Place

The bed of the Mattaponi river near Richmond, Va., has revealed an Indian dugout believed by members of the Pamunkey tribe to be three hundred years old.

## Paint WITH Paint

It's an old adage that "We only get what we pay for," and this is especially applicable to paint. You get just what you pay for. The many cheap brands of paint now on the market may appear Cheap When Priced By The Gallon,

But how many more gallons will it require to paint your buildings with cheap paint? It is not cheap at all as you will soon discover. You are not experimenting when Sherwin-Williams paint is used, its reputation for fifty years as a standard paint all over the world is sufficient evidence of its quality.

### BARN PAINT

"SUMMIT" Barn Red is a high grade paint which we are selling at \$1.50 per gallon and every gallon requires one gallon of linseed oil. This paint is a rich red which will stay red. We solicit your paint business and will assure you that the paint you purchase at our store will give you satisfaction.

### DORAN ITEMS

Mr. and Mrs. Byford Cox have moved into the Elmer Study house

Alton Tucker left for Lafayette last week where he will enter college.

Mr. and Mrs. Lester Rogers and son were Sunday guests of Mr. and Mrs. E. R. Zentz.

Phyllis Jane Hoffman has been on the sick list but is reported better at present writing.

Mr. and Mrs. Mars Tucker made a business trip to Tippecanoe Wednesday morning.

Gus Rickel of Lafayette spent last week end with his parents, Mr. and Mrs. Lloyd Rickel.

Mr. and Mrs. George Igo spent Sunday with Mr. and Mrs. Floyd Tucker and Francis Holloway,

Mr. and Mrs. Ernest Igo and Mr. and Mrs. Curtis Riner visited the Shades and Turkey Run last Friday.

Mr. and Mrs. Wallace Hibschan of Mentone spent Sunday afternoon with Mr. and Mrs. Bert Holloway.

Mr. and Mrs. Gus Mollenhour and daughter were Monday evening dinner guests of Mr. and Mrs. Byford Cox.

Mrs. George Smith and children spent Wednesday at the home of her parents, Mr. and Mrs. Lloyd Creakbaum.

Mr. and Mrs. O. F. Miller and children spent Tuesday at the home of Mr. and Mrs. Ed Miller near Rochester.

Mr. and Mrs. Ralph Tucker of Akron were Sunday evening callers at the home of Mr. and Mrs. Bernard Black.

Mr. and Mrs. Bernard Black and A. E. Black and daughter Mary enjoyed a picnic and fishing at Loon Lake Sunday.

Mr. and Mrs. Floyd Tucker and Francis Holloway were Saturday evening dinner guests of Mr. and Mrs. Lindus Latimer near Burket.

Mr. and Mrs. Ivan Tucker entertained Wednesday evening Mr. and Mrs. Leonard Summear, Wilma Roger and Mr. and Mrs. Milt Becklehammer of Walton.

Mr. and Mrs. Mars Tucker and children, were Sunday evening guests of Mrs. Nellie Tucker of Silver Lake.

The committee of the Parents Teachers Association met at the home of Ner Kinder Thursday evening to arrange the program for the year.

The Theta Mu Club were delightfully entertained by Mrs. Devon Eaton Thursday afternoon Dainty refreshments were served by the hostess.

Women are the chief workers in the silk industry in Japan.

A women's automobile club has been organized in Munich, Germany. Countess Von Pestulozza is president.

Operating a coal mine and saw mill is part of the day's work for Miss Margaret B. Bennett of Pittsburgh, Pa.

Mrs. Catherine D. Thatcher has been appointed director of the new aviation branch of the weather bureau in Albany, N. Y.

The president general of the Daughters of the American Revolution, Mrs. Lowell F. Hobart of Cincinnati, Ohio, was the first president of the American Legion auxiliary.

Miss Eva Austin, an eighteen-year-old stenographer of Okmulgee, Okla., has quit her desk to become an airplane saleswoman. She has more than 50 hours of flying time to her credit.

The Women's club of San Francisco, Calif., with 9,000 members, is said to have the largest membership of any women's club in the United States. The project is worth \$2,000,000.

### M. DUMESNIL SAYS—

The pedal is the soul of the piano.

Beethoven had his weakness; Bach never.

Slow, correct practice is the basis of all progress.

The pianissimo tone is the most difficult tone. Any pianist can pound.

Bach is so perfect he can be played in any rhythm and at any tempo.

Technique should be sugar-coated for children. Appeal to their imagination and they are immediately interested.

Ask yourself each time you practice, "Am I producing the best tone of which I am capable?" Very likely you will be able to improve it.

## Obtain Healthy Seed for Spuds

### Most Profitable Plan Is to Eradicate All Infec- tious Diseases.

(Prepared by the United States Department  
of Agriculture.)

Sweet-potato growers will find it profitable to eradicate, so far as is possible, the several destructive diseases which annually cause losses in the growing of the crop. Of these diseases, stem rot is one of the most difficult to control, and control methods minimizing damage from stem rot also reduce injury from several other parasitic infections.

#### Breeding Plot.

L. L. Harter and J. L. Weimer, sweet-potato specialists in the United States Department of Agriculture, in a recent publication say they "have learned from experience that the use of what may be called a 'breeding plot' is of considerable value in eradicating stem rot and other diseases."

#### Use Separate Field.

"While it is advisable to pull up and destroy all diseased plants," they continue, "it is a big task where the acreage is large. Where it is not possible to do that, it is recommended that the farmer set aside a part of his field from which he will take his seed potatoes for the next crop and rogue out all diseased plants from it during the entire summer. Such a practice does not involve great labor and will greatly improve the crop in a year or two. This method is especially to be recommended if the stems are not split when selecting for seed. . . . To prevent diseased plants from producing seed by pulling them up and destroying them would eliminate much loss in the succeeding crop. This practice should be followed each year."

### Dairy Thermometer Will Be Found Quite Useful

It may be no fault of your separator that there is a high percentage of fat in the skim milk. Experiments carried on at the Purdue experiment station indicate that milk separated at a temperature of 90 degrees Fahrenheit showed a fat content in the skim milk of .026 per cent. while milk separated under similar conditions except that the temperature had been allowed to drop to 60 degrees Fahrenheit contained .99 per cent of fat in the skim milk.

Sometimes it pays to warm the milk if the separating is done at a long distance from the stable. Many times the purchase of a dairy thermometer will be found to be a profitable investment.

### Cockerels and Pullets Should Be Separated

Cockerels should be separated from pullets when they are from eight to

ten weeks of age. The pullets for next winter's laying flock will develop faster and more evenly if there are no cockerels in the lot to disturb and annoy them, according to William Kohlmeier, of Purdue university.

When pullets are left in the brooder house by themselves they have additional room, which in many cases is badly needed. When cockerels are sorted out it is often possible to leave the pullets in the original brooder house until they are ready for the laying house.

### Late Ducklings Have Several Advantages

The late hatched ducklings have a number of advantages over their earlier hatched brothers and sisters.

In the first place, the summer and early fall hatched ducklings, if pushed for rapid and cheap gains, will go on the late fall and early winter markets in time for the Jewish and Christian holidays. They are naturally profitable, for at this time the highest prices can be realized and in addition, the weather during the growing season for late hatched ducks is more favorable for rapid growth.

### Agricultural Notes

Alfalfa makes a well-balanced ration for horses when fed with corn alone.

To feed cows well will help prevent a milk shortage next fall; furthermore it pays well.

Bluegrass probably is used more frequently as a hog pasture than any other forage crop.

The lamb's mother should have all the legume hay she wants, because legume hay makes milk.

Disking or otherwise cultivating early plowed fields to keep down weeds and volunteer wheat will aid materially in controlling Hessian fly and will increase the yield of wheat.

Carefully choose varieties of apple trees to be planted next spring. Many of the kinds once considered leaders are now being displaced by higher quality and better selling varieties.

Produce the best. Quality products bring prices high enough above the market quotation for ordinary products to make it profitable and economical to produce them. They also make satisfied customers and bring repeat orders.

#### Matter of Relationship

Half brothers and sisters have one parent in common. Stepbrothers and sisters have no parent in common. When a man with children marries a woman with children these children are stepbrothers and sisters to each other. A child or children resulting from the union of this man and woman would be half brothers or sisters to each of the other sets of children.

# POULTRY FACTS

## LAYING HOUSES IN NEED OF CLEANING

### Scrape and Scrub Various Utensils Made Use Of.

Information to poultrymen concerning fall cleaning of poultry houses is given in a statement just issued by Hoyt M. Wells, poultryman for the Colorado Agricultural college.

"The laying house for the pullets should be given a thorough cleaning," says Wells. "All droppings boards, roosts, nesting boxes, feeders and drinking containers ought to be scraped and scrubbed with a good disinfectant. Roosts may be painted with a carbolineum product to control mites. Old litter should be removed from the floor, and if the floor is wooden or concrete, it should be scraped and sprayed with a good disinfectant.

"White-washing walls and ceiling will give greater sanitation and provide more light in the house in wintertime. White-wash may be applied best with a force spray pump."

This mixture gives good results: Slack lump lime with water to the consistency of cream. Take five quarts of this, add one pint of good coal tar disinfectant and one quart of kerosene, stir thoroughly, and add an equal amount of water. Strain the whitewash through a fine screen or a piece of burlap before using it in the sprayer.

"Window lights should be cleaned and broken ones replaced. Sweep down all muslin curtains, and replace with new muslin those that are too dirty or torn.

"This is the best time of the year to repair the roof, or put on a new one. Check over all seams on patent roofing for leaks.

"A good deep litter should be put in the laying house next, and new nesting material in the nest boxes. Remove old litter and replace with bright, clean straw every four weeks or oftener, if necessary."

### Scratching Found Not Essential to Fowls

Three flocks of Rhode Island Reds and three White Leghorns at the University of Illinois indicated that hens do as well when fed grain in boxes as when they are obliged to scratch for it in deep litter. This method has the advantage of being much cleaner and more sanitary.

One lot of each breed was fed dry mash in hoppers and scratch grain morning and night in straw litter. A second lot received dry mash in hop-

pers, but the grain was fed daily in shallow troughs. For the third lot the scratch grain was ground and mixed with the mash and the whole ration self-fed in hoppers.

No high records were made, but the egg yields were not affected materially by the methods of feeding. The test ran for 41 weeks.

The grain mixture was shelled corn, 70 pounds and oats, 30 pounds. The mash was made up of 17 pounds each of ground corn, ground oats, wheat bran and flour middlings, 25 pounds of dried buttermilk, 5 pounds of bone-meal and 2 pounds of salt.

\*\*\*\*\*

## Poultry Facts

\*\*\*\*\*

Shut up the broody hens each night.

Infertile eggs do not spoil as readily as fertile eggs do.

Eggs are a food which is quickly and easily digested.

Cleanliness is next to Godliness. In the chicken business it spells success or failure.

A little extra feeding now may give you more late summer and fall eggs. Hens won't eat much in the real hot weather, and a bit of extra weight put on them now will help them to lay later on.

Don't forget the water pans. Eggs are not produced without a constant supply.

For the gosling a mixture of corn meal, bran and ground oats mixed with the table scraps and moistened with milk or water to a crumbly consistency is satisfactory.

Records kept by poultry flock owners show that culling of flocks and marketing of unprofitable layers and surplus broilers are highly profitable practices.

Eggs from hens have a higher rate of hatchability than those from pullets, and produce larger and more vigorous chicks.

Charcoal is good for turkey poulters—sweetens up their digestion. It's a good idea to keep a pan of it where the poults can help themselves.

If there are mites in the poultry house keep the chicks outside. The mites can live for six months to a year without the chicks, but the chicks can't live six days with the mites.

### Cannot Be Failure

There is no honest and true work carried on with constant and sincere purpose, that ever really fails.—Jordan.

## Soy Beans Are Popular as Protein Supplement

Soy beans are proving a popular protein supplement in Indiana. Twenty-one of the twenty-four members of the Howard-Miami Dairy Herd Improvement association are feeding soy beans to their herds, according to L. O. Holliday.

The demand for linseed oil meal and cottonseed meal is increasing each year. As the need for such protein-rich feeds as a supplement to home-grown feeds for dairy cattle becomes more fully realized the demand for such by-products in dairy districts will continue to increase. Some other source of protein must be secured. Present indications are that the soy bean may play an important part in the solution of this important problem.

## Disk Before Plowing Is Advantageous Practice

It has been pretty definitely proved that pulverizing the top layer of the soil with disk harrow before plowing is done is a very advantageous practice. When the furrow is turned over the pulverized soil breaks away from the furrow and helps fill up the furrow bottom much more effectively than when the solid furrow is turned over. In the latter case large openings are often left which cause the soil to dry out rapidly and become too hard to work down well.

When using a disk for this purpose, do not angle it too much. Let it run rather straight and it will do satisfactory work.

## Agricultural Hints

Give the hens plenty of water.

Hog lots and pastures used year after year are one of the causes of runty pigs.

There is no such thing as too much sweet corn. Don't be stingy with your planting.

In recent years the soy bean has entered into the regular cropping system on a very large number of farms.

The manure pile is a fertile source of danger through providing a breeding place for flies, but it is also the most valuable single adjunct a mixed farmer can have.

Sweet clover hay should be cut before the stalks get too large to be good for hay. It is also important to cut sweet clover before the stalks get very coarse in order to prevent killing it.

Big play is said to have been diverted from Monte Carlo. The press agent of this famous resort may have been remiss in not supplementing the illustrations of the game with pictorial display of beach pajamas.

## My Favorite Stories by Irvin S. Cobb

### Based on the Currency Systems

THE late Charles E. Van Loan, a splendid story teller in his own right and equally adept as a story writer, used to love to tell this one: An ambitious promoter undertook to stage a prize fight between two heavyweights at a little Mexican town just over the national boundary from California. The fight was advertised to go for 20 rounds.

From both sides of the line a great crowd gathered, the majority of those present being Mexicans.

A somewhat inexperienced but quick-witted Texan acted as referee. It subsequently developed that, contrary to the ethics, the referee had a private bet on one of the scrappers. Midway of the fight it appeared highly probable that his favorite shortly would be knocked out and so, to save his money, the referee declared the bout a draw and ended it right there.

Enraged and disappointed, the audience rose up, shouting threats. The native contingent was especially vociferous. A first-class riot was threatened.

But the imperiled referee had a smart notion in reserve. By waving his arms and shouting that he had a statement to make, he secured comparative silence. Then he made his announcement and it proved eminently satisfactory. The Americans present saw the point of the joke; the Mexicans were appeased because the explanation seemed to them perfectly sound.

"Gentlemen," the referee said, "this was advertised as a 20-round fight and that's exactly what it's been—20 rounds Mex or 10 rounds American."

## Leading Mercantile Establishment in Mentone

In almost every town there is one outstanding business place which is so well known, and associated with the community so closely, that even to mention the town brings to mind this one business firm. Such is the status of the Clark store in Mentone. By their up-to-date business methods, hustle, push and extensive advertising they have become the best known business house in Mentone, and while some firms complain of business falling off this store has been constantly increasing the volume of business each year.

Possibly a great deal of this increase in business is due to their extensive advertising, but the fact that they endeavor to give real service to their customers, handling only first-class merchandise, and selling it at a reasonable price, has much to do with their success.

Mr. W. F. Clark the owner of this store, came to Mentone in 1889 and entered the employ of Mack M. Forst, now deceased, who at that time was operating the general store in the village. About seven years later he, together with Mr. Wm. Forst acquired a one third interest in the business which continued until the time of the death of Mr. Mack M. Forst. A short time after the death of Mr. Forst, Mr. Clark bought the entire business and with the aid of Mrs. Clark and their son George, have built up a business that is considered one of the most profitable in this community.

A couple of years ago through failing health, Mr. Clark was forced to give up the management of the business and seek medical aid and rest, at which time George practically took over the management. Just out of college, young and full of pep, he inaugurated changes in the business that greatly added to the service rendered by the store to its many customers and at the same time showed a substantial increase in the volume of business transacted. One addition being "A Store at Your Door" delivery service that is on the road every week day serving their patrons in the surrounding country. That this service has been appreciated by the people on the farm is shown by the fact that they have been able in this manner to draw a number of new customers to Mentone who had not been in the habit of making this town their trading point.

A couple of weeks ago the Clark Store purchased the store at Palestine and will operate it in connection with their store at this place. Palestine is a thrifty farming community and we predict that with the Clark methods of merchandising they will be able to build up a good trade at that point and that the acquisition of that business will greatly increase their total sales.

While the Clark Store has been an extensive advertiser, the management has never lost sight of the fact that to make advertising profitable, quality goods, reasonable prices, and real service must be back of it, and to strict adherence of these points they can attribute their success.

For the past several months Mr. W. F. Clark has so far improved in health he is able to be at the store almost every day and takes an active part in the management of same, and we hope that he may soon regain his old time vigor, as this town cannot afford to have

men like him put on the retired list.

In conclusion we will say that the advertising patronage of the Clark Store amounts to more in one year in dollars and cents than the entire amount of money that we receive from all of our subscriptions and if it were not for their patronage it would be next to impossible to publish a paper in this community.

## DEMOCRACY FACING CRISIS

By REV. CLYDE H. LININGER, Indianapolis (Methodist).

Loss of our idealistic tendencies is one of the weaknesses of our government. America is the largest country ever to try the democratic form of government, but we have lost some of our idealism. We don't find the high ideals that formerly characterized American life. One of the dangers we are facing is that of allowing minorities to rule our civic righteousness. Our forefathers fought that we might have a free country, and yet a large number of us pass up the right our forefathers fought for—the right to rule ourselves—and thus we leave the minority in power.

People seem to place the burden on the minorities and thus fail to assume the responsibility of shouldering their part of the load. Too many people believe good men should keep out of politics, when, in fact, good men should get into politics.

Americans need courage, faith and leadership and the idealism to stand back of the leaders that are put into office. Democracy lies with the individual and the character of the citizens.

## HOSPITAL MONUMENT TO SERVICE

By WILLIAM M. REMY, Indianapolis.

The unselfish purpose exemplified in the building and the maintenance of a hospital is one of the finest reflections of the tendency of our age. All over the country statutes are being passed to protect the rights of our neighbors, and those with whom we do business as well as ourselves. Governments are looking forward to protection of all peoples and not of a particular group. We have left behind the feudal and monarchical age. The age of legislation for selfish purposes has gone.

The hospital is a comparatively new institution; just a short time back people whose minds became defective were stoned to death in England and those unable to work were cruelly maltreated. Erection of a hospital as a monument to service has come with the new vision and the new ideals of our civilization.

The Indiana Christian hospital stands as one more monument to the constructive thinking progress of the day in which we are living. Its contribution in helping to build and maintain life, in offering civic service has been a very praiseworthy one, and it is to be hoped that the good work may be continued.

## TALMA ITEMS

Mr. and Mrs. Lloyd Zent and son Orton were Sunday guests of the former's parents, near Burket

Mr. and Mrs. Con Welch of Long Beach California were Saturday night and Sunday guests of Mr. and Mrs. Wm. Deamer.

Oliver Kalambacher and his cousin Cleo Allen wanted a fish fry, so they started to the river Saturday morning about six o'clock and went down the river and ended up at six in the evening with one fish weighing about one and one half pounds.

A complete surprise was given John Kalambacher last Friday night it being his 60th, birthday. Those present were Mrs. DuBoise Mr. and Mrs. Cleon Allen of Hammond, Mrs. Mary Allen of Tippecanoe. Mr. and Mrs. Overmeyer and Mrs. Lillie Pheobus of Mentone, Mr. and Mrs. Raymond Tippy and son and Mr. and Mrs. Oliver Kalambacher and children of Talma. Four large birthday cakes were presented to him.

## More Eggs Wanted

We have just received a letter from Stern & Brauner, 169 Chambers St., New York City, in which they state that fancy eggs are getting very scarce on that market and the very highest prices are being paid. This firm is very anxious to get more fancy eggs from the Mentone district for which they have customers who are not afraid to pay a good price for something that is good.

Here is a chance for local producers to connect with one of the best firms buying eggs on the New York market and at a time when they are in a position to pay more money for your product than you can obtain from any other buyer. We have every reason to believe that this is the opportune time for any producer who is not satisfied with his New York buyer, to make a change and give this firm a trial shipment. We are positive that they will treat you right. Just give them a trial on your next shipment.

## The KITCHEN CABINET

(© 1929. Western Newspaper Union.)

We shall advance when we have learned humility: when we have learned to seek truth, to reveal it, to publish it; when we care more for that than for the privilege of arguing about ideas in a fog of uncertainty.—Walter Lippmann.

## GOOD THINGS "TO PUT UP"

Prepare your own fruit salads to use during the season when many of the good things are out of the market.

**Fruit Salad.**—Simmer small pieces of any available fruit—pineapple, pears, apricots or peaches—in a light sirup, using care not to over cook, adding a few fresh or maraschino cherries. Cover with the sirup and sterilize, using the cold pack method. The sirup may be used for gelatin desserts, punches, fruit salad dressings or rudding sauces.

**Fruit Jelly.**—Take half a peck of apples, two quarts of quinces and one quart of cranberries. Wash the fruit, put the quinces, cored but not pared through the meat chopper and cut up the apples including the skins and cores. Combine all the fruit—just cover with water and cook until soft, mashing and stirring often. Drain through a jelly bag and to each pint add a scant pint of sugar, heated hot. Boil the juice fifteen minutes before adding the sugar. Cook until it jellies then pour into sterilized glasses.

**Ruby Jelly.**—To two quarts of cranberries add five large quinces, put through the food chopper with half their cores. Add three quarts of water and cook until soft, stirring frequently. Drain through a jelly bag, measure the juice and add an equal amount of heated sugar, after the juice has boiled about fifteen minutes. After the sugar is added boil five minutes and remove when it jellies. Marmalade may be made from the pulp, adding three-fourths of its measure in sugar, then cook until thick.

**Pears for Salad.**—Use large under-ripe pears. Halve and remove peeling and core. Sweeten very lightly, add a bit of lemon or ginger root, cover with boiling water and cook until tender but not soft. Can in hot sterilized cans. Pear salad in the winter is such a favorite that many cans will be needed.

*Nellie Maxwell*

## Low, but Clear

Speak in low tones, but clearly, when in a sick room. Never whisper to some one in the room, as the patient will invariably imagine you are talking about him and his condition.

## ADMINISTRATORS' SALE!

The undersigned, administrator of the Rose Eddinger estate will sell at public auction at the Eddinger residence in Mentone, on

**Saturday, October 5, 1929,**

Commencing at 1:00, p. m., the following property:

## Necessary Knowledge

No man can lay claim to a liberal education unless he knows something of the reach and sweep of these peaks of poesy and learning raised by the spirit of man in the civilizations of Greece and Rome.—Markham.

## Constituents of Honey

Honey contains 18 parts water, 73 parts carbohydrate (including 76 parts sugar and 2 parts dextrin), .02 mineral substances or 4 parts of pollen grain, gum, bee glue, formic acid and volatile oils and other flavor substances.

## Steam in Warfare

Rear Admiral George Wallace Melville says that when the British admiral, Sir John B. Warren, ascended the Potomac in 1812 his expedition was reconnoitered by an American steamer.

## Metal Requires Rest

Metallurgists have now learned that metals become tired out in much the same manner as living creatures. When they are fatigued by constant small shocks, they may break without apparent cause and there is no way to prevent this collapse except by giving the metal a rest!

## Mentone's Bad Man Arrested.

**Russel Kercher, Ex-Convict, Bootlegger and Robber Taken After a Gun Fight With Sheriff McKrill and Deputy.**

This quiet village was thrown into considerable excitement last Saturday night as the result of Russell Kercher, who had been threatening the lives of his family for more than a week, during which time a number of appeals were made to the law enforcing authorities at Warsaw both by Mrs. Kercher and other citizens, but with no action on the part of the authorities until Kercher became so bold that he himself on Saturday night telephoned the sheriff to come and get him.

That Kercher intended to kill the sheriff or anyone that might attempt to arrest him is very evident. He had made many threats that he would shoot it out with anyone who tried to take him, and the battle that ensued upon the arrival of the sheriff and his deputy is good proof that he meant just what he said. After the smoke of the battle had cleared away and the desperado was securely hand-cuffed he was taken to Dr. Clutter for first aid, where it was found that the prisoner was suffering from a gun-shot wound in the leg and one through his stomach. He was immediately rushed to the McDonald Hospital, at Warsaw, where an operation was immediately performed and from all present indications he will recover.

Kercher has a long criminal record, having served time in several prisons in different parts of the country for hold-ups, bootlegging and robbery, and is considered a tough character by all who know him.

The following story, taken from Monday's Warsaw Times, and by Sheriff McKrill is probably the correct account of the arrest and events leading up to it:

"About a year ago Kercher told officers that he never would be taken alive and said if officers came to arrest him that he would shoot it out with the officers and kill himself.

"I had a telephone call at 8:30 o'clock Saturday night from Ker-

cher in Mentone, saying that he understood I had a paper for him and asking me to come down alone. I never go on a missions after night without a deputy. (He phoned three times before he found the sheriff)

"At 9 o'clock Deputy George Gill and I left for the Kercher home, in Mentone. We met Kercher at the door and I read the warrant to him. The charge was possession of liquor.

"Kercher went into the house and asked to clean up. After shaving, he locked up the house and then turned suddenly on us with a shotgun and a revolver. I kicked the front door shut. We locked him in the house. He then ran out the back door toward his car. He said he wanted to reason with us. When four feet distant from me he fired with the shotgun just missing my left temple. I ducked when he pointed the gun at me. It was dark, but moonlight.

"Kercher's car was headed south. He went on the west side of the car with his guns pointed over the rear right fender to the north as we approached. When he fired first, the battle commenced. Seven shots were fired and two took effect. Gill shot him in the leg and I shot him in the left side. (This shot went clear through the stomach and bowels) Kercher rolled off the running board and Gill and I took him to Dr. Clutter at Mentone and to the McDonald hospital. Charles Nice and Frank Lucas are the guards.

"A week ago Monday night Kercher threatened to shoot his two children. He went up town and while he gone his wife hid his gun. He then threatened them with a razor and his wife took the children and went to the home of a neighbor."

Officers state that Mrs. Kercher appealed to the prosecuting attorney and the sheriff for help, but she was informed that officers

could not anticipate a crime. On Wednesday Sept., 18th, the affidavit charging Kercher with possession of liquor was issued. State witnesses are Herbert Dorsey and Morris Paxton.

Officers are now trying to discover the person who "leaked" in reference to the warrant. Officials at the clerk's and sheriff's offices deny telling any person, and the complaint and warrant were hidden from the newspaper men.

In the above reference to a "leak" we take no stock. Kercher knew that his acts during the preceding ten days were sufficient to cause his arrest and he was simply anxious to get a crack at the sheriff, hence his telephone call. However the main question that arises in our mind is this: Is it absolutely necessary for a community to have a hoodlum like this running at large for week or more after he has lined his wife and children on the bed and threatened to kill them, and that the officers are powerless to act until the said bad man has actually carried out his threats? If that is law of this great state it is certainly time that some changes be made in our statutes—if it is not the law it is time that some changes be made in our law enforcing machinery. The events in this case show that this man's mind was in such a state that he could hardly wait for to have something transpire to give him an excuse to kill and that desire became so great that he could wait no longer and then he phoned the sheriff.

### Columbus' Brave Deed

Writing of Columbus' first voyage, one authority says: "It was perhaps the bravest exploit ever undertaken, for he was sailing not along the coast, but straight out into the 'Sea of Darkness,' as the Atlantic was then called, every minute farther and farther away from the only land he really knew."

### Drains Enrich the Soil

The vast sandy plain on which Berlin is situated provides a soil adapted to the working of the famous Berlin drainage system, established in 1876. Pumps send sewage from the city by radiating mains to surrounding farms, 48,000 acres of which are under municipal control. All are under sanitary supervision.

We have seen some heads so solid that a woodpecker would think twice before attempting to penetrate them.

Whoever it was who first said, "Great minds run in the same channels" must have been studying the wedding presents.

As soon as raspberry seeds come in again, we shall know whether we have any fillings for the dentist to attend to.

If the new small paper money will stick a little harder than the other, we are willing to forget about postage stamps.

Spare the rod, and spend the next fifteen years wondering whether he will become a master of ceremonies in a movie.

A visitor in upper New York tells of sighting a "Harness and Hardware Shoppe." Where is this thing going to stoppe?

The Toledo Blade's list of close acquaintances goes back farther than that of most of us: It refers to Cleopatra as "Pat."

The old red barn may be going out of style, as the Kansas City Star says, but we still have Ben Franklin's lightning rods with us.

India objects to the "too frank" episodes in American photoplays. If Hollywood can shock the Hindus, it deserves Aphrodite's crown.

"If dampened slightly and put into a bag, bran makes a good wallpaper cleaner." It was feared for a minute it was a recipe for pudding.

Unfortunately there isn't always as much difference between a cool million made in the stock market and a "hot" one made in racketeering.

"Several of the beauty contestants at Galveston fainted." This reflection on the other entrants seems to us to have been rather uncalled for.

The office smocks, worn to protect dresses, are now so delicate we expect to hear of something else presently which will protect the smock.

"I wonder," mused the shr-wd milkman, as he added a fourteenth bottle to the thirteen already on the porch, "whether these people can be out of town."

The French government has frowned upon transatlantic flights as useless and dangerous, and plain common sense rather than anger prompted the frown.

### Deserves Nickname

Yokohama is called the "eye of Japan" because it is one of the principal ports and because it has a commanding position on a V-shaped plain extending into the sea.

All those who pay their accounts before the first of the month will get credit on their card. The only place in Mentone offering this plan. E. J. CARTER, MENTONE, INDIANA.

**Velvet Jacket-and-Skirt Suit Is "It" for Fall**

Just about the smartest item on the fall style program in the way of a dressy suit is a short-jacket model of either black or dark-toned velvet. The one in the picture is carried out in black and white, for which combination Paris continues to show enthusiasm. A little ermine-trimmed black velvet cap crowns this costume.

**Fall Coats for Tots Stress Fabric Contrast**

Playing up contrasts in materials, in color or in both is conspicuously in the game of fashion this fall. Children's coats especially reflect this trend. One colored broadcloth borders another or applique design is worked which patterns motifs of one color felt or cloth on a contrasting background. The tiny-tot coat in the picture combines two worsted novelties, each in a delicate shell pink.

**Hat Types Range From Beret to Spanish Sailor**

Fall hat collections present a perfect wilderness of "types" and silhouettes. First as sketched in this group the simple beret which is smart either of felt, velvet or crochet chenille. Centered to the left the little nose veil which many women are affecting with snug hats. Lower left corner, a "baby-bonnet" type. Back-views! See the one at the top of this group. All sorts of millinery maneuvers take place in back-brim treatments. Next is shown one of the popular "pirate" shapes and lastly a Spanish sailor.

**To Be Modish Hats Must Reveal the Brow**

Forehead-revealing hats for fall. That's the message! The whole trend of millinery is in the direction of these "high brow" effects. Not only are the shapes themselves manipulated to reveal the brow, but the vogue is accented by young girls who wear their hats back on the head. Felts by the way, are taking on a higher-quality standard. Handsome soleils are outstanding. Contrast color effects, as pictured, are important.

### MENTONE ITEMS

Mr. and Mrs. Lawrence Elick spent Tuesday in Michigan, on business.

Mr. and Mrs. Cal Fretz and son spent Sunday with Mrs. Trella Holderman at Tippecanoe.

Marshall Goodman who is employed in Fort Wayne spent Sunday with his mother, Mrs. Dora Goodman.

Mr. and Mrs. Marcus Burket were called to Logansport Tuesday of this week to attend the funeral of a nephew.

Mrs. Mahala Meredith and daughter Stella, and Mrs. Roy Adamson made a business trip to Rochester last Saturday.

Mr. and Mrs. Conda Walburn spent Sunday in Silver Lake the guests of Mrs. Walburn's grandparents, Mr. and Mrs. Haney.

Dr. and Mrs. T. J. Clutter and son Clayton returned home Saturday after spending several weeks in Michigan. They also visited in Toledo and Loraine Ohio.

Mr. and Mrs. Obe Haimbaugh entertained on Sunday the following: Mr. and Mrs. H. V. Lehman Misses Nadine and Charlene Arnsberger, Merrill C. Carey of Warsaw Mr. and Mrs. Jacob Martin of Argos, Mr. and Mrs. Mathew Keiser and family and Mr. and Mrs. Roy Downhouse of Knox.

### WAS NOT HER OWN

"She gave me an ugly look."  
"Well, it couldn't have been her own, as she still has it."

## Community Building

### Right Kind of Building Affects Value of Land

The wrong kind of buildings are sometimes found on city land in much the same way that the wrong kind of hats are found on women's heads. Says the National Association of Real Estate Boards. When a woman wears an unbecoming hat, it means that she has not looked around sufficiently for the right hat and her appearance consequently suffers. When the wrong building is erected on a piece of land, it means that its owner has not looked around sufficiently for the right building, and the value of the land suffers.

Owners of land cannot afford to toss a coin to decide whether to build an apartment house or an office building on a given site, because the proper use of the land can make or break its value, says the association.

There is a certain type of structure suitable for every piece of urban real estate, and property owners should seek advice on this subject before breaking ground, because the highest and best use of the land is a serious matter and involves a look into the future.

It is not enough to observe all of the advanced rules in selecting a location unless, after its selection, the land is developed to the best advantage, because maximum values cannot be brought about for urban real estate until the proper buildings are placed on it.

### National Campaign for Senic Beauty Now On

The Virginia state chamber of commerce recently called a conference to discuss cleaning up the scenery. The garden clubs of Nashville, Tenn., are proposing to plant rambling roses along all the highway fences leading into their city. They see Nashville a few years hence as "a bridal procession of flowers." Seattle contemplates a 60-mile highway between Tacoma and Everett, electric-lighted and fringed with rhododendrons. To a young Detroit school girl, Mrs. John D. Rockefeller, Jr., gave a three-day trip to Washington and the promise of a Presidential handshake as a reward for coining the slogan "This is your country—beautify it," which Mrs. Rockefeller expects to use as a trenchant weapon in a national campaign to banish unsightly hot-dog stands, billboards, placards and plasters from the roadside.

### Selecting Home Site

It is highly important that the home builder ascertain that the section in which he is contemplating construction will continue as a home section so that he may not only put his prop-

erty to the highest and best as a residential site, but count on it persisting in this use for many years to come. He should, of course, inquire whether the district is protected by zoning laws or building ordinances that bar the construction of commercial buildings, but he should remember that zoning laws can be amended if it can be shown that commerce or business is making justifiable demands on a district.

The home builder, therefore, should seek competent advice as to the trend of the land in the sections adjacent to his proposed home, for although no one can be a magician in these matters, the changing of districts, with the possible change of zoning laws, can be foretold with reasonable accuracy.

### Get Reliable Contractor

Where a contractor accepts a job of house building at a price that is too low for him to make a profit on good work, the tendency is to cheapen or slight work in such a way that no loss will be sustained. This is particularly true where there are inadequate plans and specifications.

Furthermore, there are in the ranks of the contracting profession men who are unskilled, just as there are in other professions. Their capacity to do high-grade work is distinctly limited. They deliver the kind of workmanship that they know about—the type that is condemned by high-class builders. They charge less because their costs are less, but what they deliver is often not worth its price.

### City Planning in California

A city-planning enabling act is a matter of current interest in California at the present time. The National Association of Real Estate Boards points out. The state legislature has passed a bill repealing the existing planning enabling act and substituting a new law and the legislation has just been signed by the governor. Enactment of the bill was favored by the California Real Estate association.

### Home Modernizing

When modernizing your house you take advantage of the sturdy construction which exists in the structure itself and add to that more features which are substantial, modern, useful, and decorative.

### Ethetics and Business

It is not incompatible to combine estheticism with sound business principles. Those communities that succeed in doing so are always in the van of progress.

### Dissatisfaction's Prod

The more I see what goes on in business and in institutions of learning the more I am convinced that almost the sole hindrance to progress is the lack of the stimulant that we call "dissatisfaction." The moment you become satisfied with what you are doing, that moment is the beginning of the end.—Clifton Dagget Gray.

### TALMA ITEMS

Mr. and Mrs. Artie Eaton were dinner guests Sunday of Otis Nye and wife.

Mrs. Vincen Teeter called on Mrs. Leon Kotterman Friday afternoon.

Mr. and Mrs. Devon Eaton were dinner guests Sunday of Mr. and Mrs. Curtis Riner.

Mr. and Mrs. Oliver Kalmbacher were dinner guests Sunday of Frank Partridge and wife.

Mr. and Mrs. Cleo Allen were guests Saturday night of Mr. and Mrs. Oliver Kalmbacher.

Mr. and Mrs. Irvin Nelson and son Robert were dinner guests of Mr. and Mrs. Harry Cooper.

Mrs. W. H. Cooper attended the funeral of Mrs. Marie Mechling at Tiosa on Friday of last week.

Mr. and Mrs. Leon Kotterman attended the funeral of Mrs. Kotterman's uncle near Roann Sunday.

Mr. and Mrs. Lou Groves and Mr. and Mrs. Leon Kotterman and children spent Saturday evening in Mentone.

Mr. and Mrs. Leon Kotterman moved Saturday from the Ray Emmons property to the Kistler property in Talma.

Mr. and Mrs. Wendel Dusenberry of Mishawaka are the proud parents of a son named Richard Leon born last Thursday at the home of her parents, Mr. and Mrs. Joe Kochenderfer.

In honor of the 16th, birthday of Harold Partridge several of his friends gathered at the home of his parents, and gave Harold a surprise on last Tuesday evening. A weinie roast was enjoyed by all, after which water mellon was served.

The Annual Home Coming and Basket dinner was held Sunday at the Bethlehem Baptist church with a large crowd in attendance. Ministers were there from Athens Warsaw, Mentone and Rochester. Mr. Oom of Warsaw sang several special numbers. Rev. Squibb of Mentone spoke at the morning service.

Mrs. George Bryant is slowly improving.

A large crowd attended the Farm Bureau meeting last Wednesday night. Talks were given on Tax reduction of Fulton Co., by Hugh McMahan, county Auditor, George Black, Treasurer, Mrs. Otis Emmons and Mrs. John McKinney Jr. gave short talks after which a program was given. Committee chosen for next meeting was Mrs. Rathfon, Mrs. Deamer, and Mrs. Ancil Jefferies.

### Factor in Increasing Production of Crops

Last year farmers bought more fertilizers than in many years. This increased use of fertilizer was a large factor in increasing crop production. The American farmer is learning gradually the lesson offered by the European farmer who spends more on fertilizer per acre than any other farmer in the world. Holland is continually enriching its soil, which makes possible the intensive methods of the country and puts it at the head of the list of nations in the crop yield per acre. Where the American farmer was inclined formerly to plant over a wide area of land of questionable fertility, he is coming to realize that with more intensive methods, proper fertilization, and greater attention to the culture of his fields, he can make more money with less labor and acreage and undergo less anxiety from plant diseases and frosts.

### My Favorite Stories by Irvin S. Cobb

#### The Untrustworthy Britisher

TODAY'S offering has been doing yeoman service for years now but I claim its very popularity attests its intrinsic worth.

An Irishman stranded at Southampton, applied for a job on a ship bound for American ports, hoping to work his passage back to New York where he lived. The skipper agreed to sign him on provided he could produce a written recommendation testifying to his honesty and good character. The applicant hunted up an obliging board ing-house keeper, who wrote the required paper for him, and, on the strength of this he temporarily was enrolled as one of the ship's company.

Just as the craft was preparing to sail a Britisher presented himself before the master asking for a place in the crew. As the ship was short-handed and time-pressed, this man was accepted without the formality which had marked the employing of the first green hand.

Two days out from port the Irish man and the Englishman were scrubbing decks, each equipped with a pail and a swab. There was a head sea on. Suddenly a big coterer broke over the bow. The drenched Irishman was buffeted about and slammed against a rail, still clinging, however, to his broom and bucket, but his fellow worker fared worse. He was carried overboard and vanished instantly.

Dripping, the survivor made his way to the bridge where the skipper stood. "Captain! Say, captain!" he called up.

"What is it?"  
"You remember that d—n Britisher you took on without any references? Well, he's gone off and took one of your buckets with him."

(© by the McNaught Syndicate Inc.)

## Dr. Clutter Meets With Auto Accident

What might have proven to be a serious automobile accident occurred about 1:30 p. m. Monday at the intersection of the Burket road east of this village, as it was two machines were badly wrecked and the occupants escaped with torn clothing and numerous bruises and scratches and it is truly remarkable that some one was not killed or seriously injured.

Dr. Clutter in his Page sedan, with his son Clayton driving, and accompanied by John Darbey, of Cleveland, was on his way to visit his patient Russell Kercher at the McDonald hospital, at Warsaw. They were driving at a moderate rate of speed and while they had the right-of-way at the Burket crossing, it seems that Mrs. Clem Shoemaker, of Claypool who was driving on the Burket road failed to realize the fact and as a result they came together with great force right on the crossing.

This is a very bad corner and we understand that neither party in the wreck were really to blame except that Mrs. Shoemaker either forgot or did not know that it was stop crossing.

## We Are Very Sorry

Through the rush of late news and advertising a great many items of local events and personals were unavoidably crowded out of this issue. But, it is the old old story, people waiting until the last minute to hand in their items. The paper must go into the post-office Wednesday morning and in a last minute rush like this week we are compelled to leave what we are unable to handle.

## MENTONE ITEMS

Wallace Hibschan and wife and Mrs. Ed Holloway of Warsaw spent last Sunday with Mrs. Lizzie Hibschan.

Mr. and Mrs. Robert E. Snyder of Chicago and Mr. and Mrs. S. L. Snyder of Grand Rapids spent the week end with Mr. and Mrs. L. P. Jefferies and Mr. and Mrs. I. F. Snyder.

Mr. and Mrs. Charles Meek and daughters Mary and Hester and Mrs. Smith of Fort Wayne spent Sunday with Mrs. Lizzie Hibschan.

George Myers and wife, John Underhill and wife and Carl Myers and wife were at Carl Underhill's home at Huntington for noonday luncheon Sunday.

Mr. and Mrs. Clark Ernsberger Mr. and Mrs. Duard Hodge of South Bend and Mr. and Mrs. George Felman were Sunday guest of Mr. and Mrs. Milo Kesler.

Abe Mollenhour and wife and Mrs. Cal Gill and children of South Bend and Mr. and Mrs. George Stockberger dinner guests of Mr. and Mrs. George Lyon. Afternoon callers from South were Sherman Pyle and wife and Allen Millbern and wife.

## Looking for a Home?

Described as a "home lover," a cow at Newport, England, recently jumped through the plate glass window of a furniture store, looked over the suites, then leaped back through the window, galloped across the street and climbed the stairs of a real estate office.

## Uses for Pecan Wood

The Forest service says that pecan wood is used very little for furniture. It is not in the same class with oak and mahogany, but it is about the same as gumwood. It is used for miscellaneous purposes where great strength is needed.

## House Made of Newspapers

Newspapers were the only material used for the whole of a house, with the exception of the framework and the floors, built in Massachusetts. The newspapers, several layers thick, were varnished and set between wooden uprights.

## Newton's Humility

"I do not know what I may appear to the world, but to myself I seem to have been only like a boy playing on the seashore and diverting myself in now and then finding a smoother pebble or a prettier shell than ordinary, whilst the great ocean of truth lay all undiscovered before me.—Isaac Newton (1642-1727). Brewster's Memoirs.

## Tongue Twister

Jean was reciting in Latin class one day and part of the phrase she was translating was "beasts of burden." When she sat down after translating it correctly, she could not imagine why they all laughed so hard until the professor said: "The translation was correct Jean, but you said, 'bursts of beaden.'"

# CLARK'S

# FARM STOCK

**CATTLE ARE FINE  
BUILDERS OF SOIL**

**Gather Forage From Fields  
and Turn It Into Profit.**

In cattle the personal preference of the farmer is the chief factor in breeds. Some men like beef cattle, some dairy. At any rate there ought to be an appropriate sized herd of cattle on every farm. Cattle are soil builders. They gather up the forage from the far fields, turn it into beef or dairy products, and deposit the residue back upon the same soil. Another look around your own community will convince you that the farms on which cattle are handled continually are the leading crop producers. They are little troubled with disease, and require as little care and attention as any other animals upon the farm. For the farmer who has natural inclinations for dairying, there is no branch of the farm business which returns a steadier all-the-year-around income. At the same time the milk will do much to help solve the hog raising problem, and keep the hens laying. In fact, I am strongly of the opinion that for the small type farmer, especially, a few good milch cows, some old sows and a flock of hens, make just about the best "hook up" possible for a satisfactory existence, for himself and family, says a writer in an exchange. On the average size farm of from 120 to 160 acres, it must depend altogether upon the way the farmer handles his cows as to how many he can keep. I would say, however, that an ordinary farm of this sort ought to support from ten to twenty cows; furnish adequate pasture during the summer, and feed during the winter. I once had a little German neighbor who kept 25 head of cattle in good shape on 40 acres, raised enough corn to mostly do him, always had hogs to sell, and hauled his cream to town in a ten-gallon can. This man's case, however, was most unusual, and few of us might even hope to do as well.

## Horses' Sore Feet

A horse that has cracked hoofs should have the hoofs soaked with an application of linseed oil. This may be kept on his foot by blinding moistened clothes about the hoof.

Cut a small groove over the part of the hoof that is splitting, between the crack and the soft part at the top of the hoof. Be careful not to cut this too deep. Put an application of tar in this depression. This will prevent injury to the foot and prevent any germs entering.

## Smaller Central House Now Meets With Favor

The rapid advance of sanitary methods in hog production has created a distinct tendency toward smaller central hog houses, and more use of small individual houses which can readily be moved about. The central hog house has much in its favor in the way of convenience and probably will always be used to a certain extent during the coldest months of the year when it is difficult to feed and care for animals that are scattered all over the place. Such a house has the disadvantage of creating about it an unsanitary condition of the hog lot, which can scarcely be prevented even with the greatest care. Such a hog house also is necessarily remote from pasturage.

## Improve Market Lambs by Simple Operations

Because lambs which have been castrated and docked are better developed and are more uniform and attractive on the market than other lambs specialists are urging a more general adoption of these practices. The fact that the largest part of the return from farm flocks is derived from the sale of lambs makes it desirable to have the lambs in the best possible marketable condition.

Ram lambs and undocked lambs are discriminated against on the market because they are less well developed and lack a uniform and attractive appearance. It is impossible to obtain as large gains or as good condition on lambs that have not been castrated.

## Plaid Velvet Frocks of Outstanding Vogue

A more timely suggestion for a "first" autumn frock than that of plaid velvet, who can offer? You'll love the new velvet plaids which are in multiple number throughout fabric displays. They are shown in rich deep colorings, also in tones and tints of lighter trend.

## France Has Largest Library

The principal library of France and the largest library of the world is the Bibliotheque Nationale, Paris.

**Jas. Gill, Auct.**

**Stan. Lash, Clerk.**

## Advice to Sweeties

"Folks would be surprised to know," says a newspaper trade journal, "how many people are working at the busyness of giving advice in newspaper columns on affairs of the heart." It pays well, too, yet it remains a labor of love.—Farm and Fireside.

## Great Medical Discovery

The carbon-tetrachloride treatment for hookworm disease for human beings was introduced by Dr. Maurice C. Hall of the Department of Agriculture in 1921. Doctor Hall discovered its value as a drug for the removal of hookworms in dogs, and then found that it could be applied to human beings with satisfactory results. It is a great contribution to tropical medicine.

## Cattle Branding Old

A little delving into history convinces one that the branding of live stock with hot irons is probably as old as the industry itself. For instance, British histories make direct references to the branding of cattle and horses as early as the Eighth century.

## Only Ho'landers "Dutch"

The name "Dutch" or "Dutchman" is properly applied only to the people of Holland, though the people there call themselves "Netherlanders." The word is a corruption of "Deutsch," meaning "German" or "Teutonic," and was formerly applied to Teutons in general. Now, except in slang or colloquial usage, it is limited to the Low Germans or Hollanders.

DORAN ITEMS

Mr. and Mrs. Bert Holloway and son spent Saturday evening in Warsaw.

Mrs. Lloyd Creakbaum was a Sunday caller at the home of John Creakbaum.

Lindus Latimer of Burket was a Sunday dinner guest of Mr. and Mrs. Floyd Tucker.

Mrs. John Creakbaum spent Monday in Akron the guest of Mrs. Byron Spitler.

Russel Eber of Fort Wayne spent the week end with his parents John Eber and wife.

Mrs. Max Smith and son Bobbie spent Wednesday at the home of Mr. and Mrs. Ora Tucker.

Mr. and Mrs. Philip Whetstone were Saturday evening guests of Mr. and Mrs. Clyde Brugh.

Bill Creakbaum of Akron visited with his parents Mr. and Mrs. Lloyd Creakbaum Monday afternoon.

Mr. and Mrs. William Arter of Akron spent Saturday evening at the home of Mr. and Mrs. George Black.

Mr. and Mrs. Mars Tucker were Friday afternoon callers at the home of Mrs. Norman Tucker of Silver Lake.

Miss Adline Spitler of Akron and Bobby Smith of Mentone were Sunday guests of Mr. and Mrs. Ora Tucker.

Mr. and Mrs. Elmer Huffman and son and Lillian Igo spent last Sunday in Michigan, where they went after peaches.

Mrs. George Smith and children spent Thursday and Friday at the home of her parents, Mr. and Mrs. Lloyd Creakbaum.

Mrs. Ivan Tucker and daughter Mirabelle were callers at the home of Mr. and Mrs. C. M. Tucker Saturday evening.

The Parent Teachers Association held their first meeting, Monday evening at the school building in which they elected officers for the year.

Mr. and Mrs. Elias Leininger entertained their children and families at a birthday dinner Thursday evening in honor of Mr. Leininger's birthday.

Mr. and Mrs. Paul Cumberland spent Wednesday shopping in Fort Wayne.

Mrs. Heney Black of near Gil ead spent Wednesday at the home of A. E. Black.

Mrs. H. V. Nallans spent Wednesday at the home of her daughter Mrs. Bernard Black.

Mr. and Mrs. Ralph Tucker of Akron spent Thursday evening with Ora Tucker and family

Mr. and Mrs. Edson Sarber spent the week end in Chicago the guests of Miss Beulah Sarber.

Mr. and Mrs. Charles Black returned home Wednesday evening after spending six weeks in Michigan.

Wayne Cook underwent a major operation for appendicitis at the McDonald hospital, Warsaw Wednesday.

Chas. M. Tucker went to Indianapolis Wednesday and Thursday to get a view on the stock and grain markets.

Neighbors and friends met at the home of Ner Kinder Wednesday night after which they gave Professor and Mrs. Byford Cox a Shriveree

Mr. and Mrs. Gus Mollenhour and daughter and George Black and wife attended the show at the Char-Bell Theatre, Rochester Sunday afternoon.

Mr. and Mrs. H. V. Nellans entertained at Sunday dinner Mr. and Mrs. Aaron Singer, Mr. and Mrs. Shaw of Wabash, and Mr. and Mrs. Bernard Black.

Professor and Mrs. Byford Cox entertained Sunday evening Mr. and Mrs. Gus Mollenhour and daughter, Mr. and Mrs. George Black and Professor and Mrs. Harold Young and daughter of Grass Creek.

Mr. and Mrs. Frank McGee and Theo. Mayer of Warsaw were Sunday dinner guests of Mr. and Mrs. Mars Tucker. Afternoon and evening callers were Nora Tucker and children, Adline Spitler, Bobby Smith and Mrs. Floyd Tucker.

One Point of View

Anyone can plant radishes; it takes courage to plant acorns and wait for the oaks.

## DEPENDABILITY IN Banking - Service

Dependability in banking service has always been the outstanding characteristic of this institution.

In making your banking connection it should be done with great care, and with consideration of the record and standing of the bank which invites your business, as well as the service and convenient banking hours it offers.

## CHICKEN HOUSES NEED IMPROVING

### Lack of Light or Ventilation Discourages Hens.

Many old poultry houses are lacking in light or ventilation or both. Where ample light is already provided through windows but ventilation is inadequate, it is often best to remove the upper sash of the windows. If there are not enough windows, additional openings should be cut in the upper part of the front wall.

"Under Kansas conditions it is desirable to make these openings equal to about one-tenth of the floor space. Hail screen over these openings will serve to keep the poultry in and rodents out," suggests Walter G. Ward, extension architect, Kansas State Agricultural college, in giving hints on improving the old poultry house. "Frames covered with a light weight of muslin may be provided in the front openings to protect the flock during very cold or stormy weather."

Many old chicken houses are unnecessarily high and are very cold during the winter months, continues the building specialist. He says a simple remedy is to construct a straw ceiling or loft. The straw is preferably carried on inch mesh poultry netting. For supports 2x4 inch cross ties placed every 4 feet will be practical. About 1 foot of loose straw is placed on the netting and small openings in each end above the straw serve to keep it dry. The straw is left in the poultry house throughout the year.

### Find Sour Milk Good Ingredient of Protein

Sour skim milk in unlimited quantities gives a higher total and average egg production, higher profit over feed cost, and produced eggs at a lower feed cost than semi-solid buttermilk, dried buttermilk, meat scrap or sour skim milk whey. The dried buttermilk and semi-solid buttermilk pens gave a smaller percentage of large eggs and a larger percentage of small eggs than did the sour skim milk pen. Some skim milk whey is inferior to the other feeds in every way. The dried buttermilk pen gives the highest hatchability.

A comparison of semi-solid and dried buttermilk shows the semi-solid pen gives higher per cent production and eggs per pullet. The dried pen, however, gives slightly higher yearly average profit over feed cost per pullet, cheaper feed cost per dozen eggs and higher hatchability.

The results of experiments indicate

that a vegetable protein supplement to sour skimmed milk, such as peameal, alfalfa meal, and beanmeal, is productive and profitable. In production and profit over feed cost, the supplements ranked: Peameal, alfalfa meal, beanmeal, then no supplement.

## Poultry Hints

Shut up or sell male birds.

Cleanliness is the best preventive of poultry diseases.

Brooder houses should be placed where the drainage is good.

Store the eggs in a cool cellar if possible. Market them twice a week.

Feed poultry yellow corn, cod-liver oil, milk and leafy feeds for vitamins

Young chicks should be encouraged to roost at an early age. The chicks will become accustomed to roosting if a low roost which slopes from the floor back of the hover to the rear of the house is provided.

What kind of eggs are going to market this summer? Demand for them may be increased by proper care. Be sure the hens have plenty of clean, airy nests well filled with litter—one nest for every five or six hens.

Round out the corners of the brooder house to keep the chicks from crowding.

Artificial brooding of chicks involves the problems of providing a suitable shelter for them on ground which is free from worm parasite infestation.

Be sure the old hens and young stock have plenty of ventilation during the hot summer months. Open the rear ventilator in the house and take out the windows.

Small eggs produce small chicks. The size of next year's eggs depends first upon breeding, second upon feeding.

Encourage chickens to roost while they are still young to prevent crooked breast bones and crowding and to aid ventilation.

Barley is considered a very good feed for poultry. It is richer in protein and carbohydrates than oats, and has less crude fiber. In some sections it is made a substitute for corn.

### Almost the Limit

Absent Minded—The professor who came to breakfast one morning, kissed the egg and cracked his wife on the head.

### Uses for Sawdust

The sawdust of mahogany and rosewood is used in dressing furs, and that of some woods, such as the pencil cedar, yield perfumes.

# Community Building

## Bird Sanctuary Gives Town Distinctive Touch

In a charming little American town, with wide green lawns, beautiful shrubbery, a profusion of flowers and fine old elm and maple trees arching many of the streets, the citizens have set aside a certain wooded area as a bird sanctuary. In that region, birds are safe from human molestation. Although the grounds of the sanctuary cover a limited area, its influence appears to have spread through the whole town.

In many yards there are bird-feeding stations. Trees along the main streets have little feeding platforms nailed to them. Bird baths are almost as common as hitching posts used to be. The visitor there sees a regular parade of lovely birds, some rare, some common, all a little less shy than usual. Natives speak familiarly of warblers and of varieties difficult to identify except for the true bird lover. Wild ducks swim on a pond not a stone's throw from the highway and take afternoon stellas under the shrubbery of private homes and even in the school yard.

If the author of "Main Street" has never visited such a town, he has missed something really fine in American life. There are more such friendly and beautiful communities in this country than the average person realizes.—Evansville Courier.

## Highway Beauty Matter of Highest Importance

The highways in many parts of Europe carry their appeal to the traveler not simply as public improvements of great utilitarian value but as works of art, if such an expression may be applied to a public thoroughfare. Through a beautiful lane of trees, between hedges or attractive fences of stone or other material, the highways run and lure the traveler on. It is an idea which is being caught up in America and turned to valuable account. It is now being applied, if on a limited scale at first, in Missouri. The trees, shrubs and hedges now being planted along the principal roads under direction of the state highway commission is an enterprise that promises to give Missouri a return, hitherto denied, on its heavy investment in these improvements. The selfish effort to capitalize on that investment has lined the highways at many points with ugliness. It is a procedure the public should resent, and the best way to do it is for the communities throughout the state to aid the highway commission in what it is now undertaking.—Kansas City Star.

## Plan Wisely Before Start

Building a house without blue prints and specifications is the easiest way to waste money. Properly drawn blue prints, with accurate specifications, are simply a detailed plan for the spending of your money. It means that you have things planned out in advance of building and that all expenses have been anticipated. You know what you are going to get from the beginning to the end. Accurately prepared blue prints and specifications are worth many times more than they actually cost, for without them time is lost in trying to study out how the different parts go together, and there are endless opportunities for the making of changes and substitutions with an accompanying greater expense and probably cheapening of the quality of materials.

## Why Sacrifice to Speed?

Over in Mill valley is a beautiful, tall, redwood tree that worries those who drive automobiles too fast. Unless people who love permanent beauty more than fleeting thrills object forcibly, that tree is almost certain to come down.

And why should that tree—or any other tree in a residence district, anywhere—be cut down? Speed in a home neighborhood is never essential, but beauty is. Warnings can be posted at corners, accidents can be prevented in that way, but nothing can be done to restore the magnificent beauty that dies by the ax. The Redwood league might say a word in this case, as it says many for the sake of our mountain trees.—San Francisco Call and Post.

## Autumn Street Frocks Styled With Capes

In the autumn fashion parade, street frocks styled with intriguing capes repeat and repeat. The one in the picture is of grayish green crepe lined with a darker green. Stroll along Hollywood avenues or boulevards these autumn days and you'll likely meet Josephine Dunn of cinema fame wearing this costume, which shows that these screen artists know "the latest."
