## JUST THINKIN'

by Charles S. Kinnison.

### To My Boy

As on the Road of Life you start,  
There's one thing you should learn—  
And that is Life will not impart  
Each thing you feel you earn.  
A lot of times you'll struggle hard  
And find when you are through,  
That small, indeed, is your reward—  
Far less than seems your due.

But still, my lad, don't ever think  
That Life is all unfair.  
And do not let your courage shrink,  
When you don't get your share  
Of all those things you try to get.  
But keep your courage high,  
And cast again your empty net—  
And neither whine nor sigh!

For when it's all been said and done,  
The man most apt to win  
Is he who'll face each rising sun  
With strong, uplifted chin!  
And as your goal you try to make,  
And care and strife you meet,  
Don't quit—but know that all must take  
The bitter with the sweet!

(© 1930, Western Newspaper Union.)

### Summing It Up

Happiness grows at our own fire-sides and is not to be picked in our neighbors' gardens.

### Tennessee's First Name

The territory now composing the state of Tennessee was once known as the state of "Frankland" or "Franklin," having been formed by the inhabitants of western North Carolina in 1785.

### Power

Those who seek education in the paths of duty are always deceived by the illusion that power in the hands of friends is an advantage to them. . . . Power is poison.—Henry Adams.

### Age of Accountability

The age of accountability is when you observe civilization and realize you are a part of it and blush.—San Francisco Chronicle.

## EFFECT OF WOMEN IN INDUSTRY

By REV. DR. SOCKMAN, New York (Methodist).

The entrance of women into business and industry has given them a new respect for their powers and has made a profound difference in their attitude toward marriage. The fact that two-thirds of the divorces in the United States are granted on demand of the wives does not prove that two-thirds of the blame rests with the husbands. The root cause of many divorces runs back into the undisciplined and individualistic freedom of premarital living on the part of both women and men. After a youth spent in indulgence, too many prodigal daughters, discontented with their marriage, says in the words of the prodigal son, "I will arise and go to my father."

The professional and business woman is ceasing to be conscious of her sex or to claim special consideration because of it. While women in politics may still be inclined to capitalize femininity, the novelty will soon be gone.

It is in the less well paid forms of employment like the factory and domestic service that the struggle for women's rights still is chiefly to be fought. Justice in these realms can be secured only by the co-operation and recognition of women among themselves and by a Christianized imagination which can understand the emotional factors involved.

## GOVERNMENT BY PARTY BEST

By EX-PRESIDENT COOLIDGE

**I**T IS necessary to have parties to maintain our form of government. Free government must be through political parties. The countries which we consider or speak of as backward continue to suffer most because they do not have well-organized political parties. When changes are desired, they are often driven to revolutionary methods to gain what is wanted.

We ought not to expect perfection in our government—certainly not when it is in the hands of the opposition, and certainly the opposition does not expect it of us when the power is in our hands.

I don't know of any other method of perfecting our form of government except through parties. One person becomes ineffective in any effort, and the only method for success is through co-operation.

We have come to believe that the best results come from having two major parties rather than a multiplicity of parties. We have always had two parties, under one name or another.

We are not warranted in expecting perfection in parties, but we must pick out the principles which we believe are the best and go with the party which best represents them.

The success of a President is more or less the success of the country, and unless the people give the President their support, the country will not be a success.

## WATCH FOR THE PARACHUTE.

Chance for Some Mentonpote to Receive a Reward.

During the month of September, 1930, the U. S. Weather Bureau will conduct a sounding balloon campaign at its aerological station, at Royal Centre, Ind. This part of a world wide campaign conducted by the weather services of all civilized countries during September, the object being to learn more about the earth's atmosphere.

A sounding balloon is a rubber balloon which carries a very delicate self-recording instrument known as a meteorograph. During the course of the balloon's flight, this instrument makes a continuous graphic record of the air temperature, pressure, and humidity.

By the time the balloon has risen to a height of from 10 to 12 miles, it has usually expanded to its bursting limit. When this occurs the instrument of course drops back to earth. A silk parachute retards its fall, however, so that it will not be damaged when it strikes the ground. In addition to the parachute, the instrument is protected by a spherical wicker basket.

Since the instrument rises and falls quite slowly, it is generally carried a considerable distance away by the wind. In most cases it lands within from 50 to 100 miles from the point

or release, though occasionally one drifts for several hundred miles.

In order to have as many of these instruments returned as possible, the Weather Bureau attaches a card to each one which requests the finder to pack the instrument and basket in a box and return it to the Weather Bureau Office, Royal Centre, Ind. It may be sent by express "collect," or by parcel post. Any postage paid by the finder in returning this equipment will be refunded. For this service the finder will be paid a reward that will amply cover the cost of packing and the trouble involved.

The parachute used is of a bright red color, so as to serve as a conspicuous landmark, and thereby aid in finding the instruments. It is hoped that any persons finding, or having knowledge of others finding one of these instruments, will communicate at once with the Weather Bureau Office, Royal Centre, Ind., packing and returning the instrument, basket and parachute promptly. Needless to say, the instruments should be handled with care, as they are not only delicate, but expensive.

## B. B. COX AS PRESIDENT.

County Principals' Association Names Beaver Dam Man to Head Organization.

At the meeting of the Kosciusko county teachers' association held at Warsaw Thursday Principal Cox of Beaver Dam was chosen to head the organization. Mr. Cox has shown himself to be one of the coming educators of this part of the state and the organization under his leadership will do much good. Frank Sanders principal of the Burket schools was elected secretary treasurer and is also a hustler who will be a great aid to the president elect.

## TON-LITTER CLUB TO BE ABANDONED

### Gives Way in 1931 to Pork Production Plan.

Last year Ohio growers of hogs produced more "ton-litters" than the growers in any of the other 24 states in which the ton-litter project is carried on. A ton litter is a single litter of pigs which reach a total weight of a ton or more when they are six months of age. The project will be repeated this year in Ohio for the ninth time, and after this year will be abandoned so far as the adult hog producers of the state are concerned, it is announced by J. W. Vuichet, extension specialist in swine production for the Ohio State university.

"We feel that the Ton-Litter club, which has been one of the most popular honor production clubs sponsored by the extension service, has now served its purpose and would soon outlive its usefulness if continued," says Vuichet.

"It has interested and guided hundreds of farmers in adopting feeding, breeding, and management practices which produce marketable hogs of high quality at a time when they will bring the most money. The principles which the growers have been applying in producing single ton-litters are the principles which they must follow in managing their entire herds in order to bring the greatest profits.

"Hereafter we are going to emphasize a pork production club which will involve the application of what has been learned in the Ton Litter club, to the entire herd. This project has already had one successful year in Ohio."

### Fall Is Best Time to Buy Cattle and Sheep

Cattle and sheep can usually be purchased to better advantage during September, October and November than at any other time of the year and farmers who contemplate buying beef cows or ewes for breeding stock should take care of their needs during the next three months, according to W. H. Peters, animal husbandry chief, University farm, St. Paul.

When possible, Mr. Peters says, it is desirable to purchase breeding animals for shipment direct from the ranch or farm on which they have been produced to the farm of the purchaser. This, however, is often impractical because of the difficulty and expense involved in locating and purchasing animals that way. By using careful judgment and taking the necessary sanitary precautions, highly satisfactory purchases of breeding animals can be made at the large central mar-

kets, especially during the fall season when a wide range for selection is usually available.

Sheep and beef cattle are both in a very strong position at present and prices are moderately high. This makes it especially important that the buyer understand his business, says Mr. Peters. If he does not, he would be wise to employ the services of some reliable person who knows market grades and values and who understands market practices. The old adage that "well bought is well sold" is still one of the big factors in determining profits from live stock and has a particularly pertinent application to the purchase of feeder cattle and feeder lambs.

### Live Stock Hints

Thumps is a common symptom affecting baby pigs.

The only sure way to kill lice and ticks on sheep is to dip each animal in one of the standard dip solutions.

The first signs of stomach worms in lambs are scouring, lack of thrift and loss of flesh. The lambs gradually get weak and listless.

Good pasture for growing pigs, brood sows, and other hogs is so valuable that it often makes the difference between profit and loss in the hog business.

Scabbed barley can be fed more profitably to cattle or sheep than to pigs. Feeding experiments have shown that it is also suitable as a beef cattle feed.

Hog cholera destroys more hogs in the United States than all other diseases combined. The losses have amounted to more than 6,000,000 hogs in one year, and the money losses reach millions of dollars yearly.

A few days before lambing time some of these fat ewes get down in a paralyzed condition, become insensible, stiffen out and die.

Success in growing a desirable type of market hog comes with selection of the proper kind of pig which then is given good feed and care.

Corn silage is often fed to breeding ewes and fattening lambs. If fed too liberally and for too long a period, it is likely to produce weak, flabby lambs, deficient in vitality.

### Almost Universal

Decimal computation was adopted in the United States in 1790, France and most of the European countries, with the exception of Great Britain following.

### Little to Control

Virtue is relative. Most of the people who boast of their self-control haven't much to control.—Bangor Daily Commercial.

## Analyzing ...YOU...

With the New Science of Syllables  
By C. J. COFFMAN  
Dean of All the Enumerators

### Margaret

Margaret, you will need the strength of will so beautifully displayed in yourself, to overcome the currents which you have selected as your problem.

The first syllable of your name, MAR, means just what the word means in the dictionary, that is, to spoil or mark with a blemish. To resist this you must

Typical Nose of use your strength the Margarets. and fighting ability. This strength is shown in your finely chiseled but wide-bridged nose.

In the science of syllables the meaning of GARA, representing the middle syllable in Margaret, is to diminish or restrain.

If you will direct your activities between those restraints you will shoot out into prominence in a most amazing fashion. You can become successful beyond the dreams of your friends or the envy of your enemies.

The last syllable of your name, ET, based upon the Hebrew word ETS, is the substance, the very foundation, of your strength. For this syllable has a general meaning of timber or tree. It shows not only the root formation of your growth but of what stuff you are made, the "timber" in you.

When you do set your mind on fame and success nothing can stop you. A wonderful example of this is shown in the career of Margaret Anglin who overcame almost insurmountable difficulties to arrive at her success.

So do not be discouraged, Margaret. If the grain of the timber in you is straight and true you will go through to your mark.

(©, 1930, Western Newspaper Union.)

### WILLIAM CARR

### FACES CHARGES.

Accused of Stealing 145 Chickens  
From G. A. Blackburn.

(Taken from Warsaw Times, Saturday, August 30.)

Charges of grand and petit larceny were filed in the Kosciuszko circuit court today against William Carr, of Palestine Lake. Carr is now in the county jail and is accused by officers of stealing 145 chickens from the George A. Blackburn farm located four miles from Mentone. The chick-

ens were stolen the night of August 20.

State Officer Harley Person has been assigned by the secretary of state to aid northern Indiana sheriffs to clear up the chicken theft rings which have been annoying farmers in this section. Person just recently cleared up the thefts in the neighborhood of Lacrosse, Laporte county.

Person and Prosecuting Attorney George Bowser were at Palestine lake today conducting investigations.

From other sources it has been learned that three and maybe four persons in addition to Carr, may be involved. Carr was arrested Friday by Officer Person, Sheriff McKrill, and City Police Officer E. S. Beebe, on the charge of driving an automobile without a proper license. Holding him on this charge, gave officers time to investigate the chicken stealing episode.

### OCT. 6-11 SET ASIDE

### AS SEED CORN WEEK.

### Purdue News Service

The week of October 6-11 has been designated by the Purdue University Agricultural Extension Department as "Seed Corn Selection and Storage Week" in Indiana.

The state wide campaign for seed corn selection and storage will reach into every county through the co-operation of county agents, bankers, farm bureaus, and corn growers' associations, working under the supervision of the extension departments of Purdue. The Indiana Corn Growers' Association, Agricultural departments of the railroads, and other state-wide associations are actively sponsoring the movement.

A new bulletin on "Selecting and Storage Seed Corn" has been printed for distribution among corn growers. Two illustrated circular letters on Seed Corn Selection and Storage will be sent to corn growers, and special articles will be sent to the newspapers of the State. Demonstration field meetings on seed corn selection and storage will be held in the leading corn growing counties during late September and early October.

The short supply and poor quality of seed corn last spring, coupled with the recent drouth, which has seriously injured the present crop, are important reasons for a seed selection and storage campaign that will insure an ample supply of seed for the 1931 crops, says M. O. Pense, of the Agronomy Department of Purdue. Farmers who have a good crop of corn will be urged to select enough seed for their own requirements and some additional seed that may be available to less fortunate farmers.

# POULTRY

## MAKING PROFITS RAISING SQUABS

### Careful Attention Must Be Given to Details.

(Prepared by the United States Department of Agriculture.)

Squab production will return a fair profit to persons who are willing to give careful, regular attention to the right kind of pigeons. Poultry men sometimes raise squabs as a specialty, but more commonly as a side issue to general farming or backyard poultry raising. Poultry specialists of the United States Department of Agriculture point out that it is advisable to start on a small scale and observe market conditions. Details concerning the method of housing, selection of breeding stock, and management of pigeons are described in Farmers' Bulletin 684-F, "Squab Raising," recently issued in a revised edition.

"The greatest difficulties that confront the beginner," the bulletin explains "are procuring good breeding stock and finding a market for the squabs. The profits in this business have been badly over-estimated. In successful plants producing market squabs only the average annual return above cost of fuel is between \$2 and \$2.50 for each pair of breeders. To be successful at the business, the squab raiser must give careful attention to details and have a thorough knowledge of squab production."

The following important points in squab raising are mentioned in the bulletin. A variety of good-quality, hard grains, including peas, should be fed; the pigeon pen should be dry, well ventilated, and free from rats and mice; and a double nest should be provided for each pair of breeders. Supply fresh drinking water, protected from dirt, and provide a separate pan for bathing. The squabs should be marketed as soon as they are feathered under the wings. Copies of Farmers' Bulletin 684-F may be procured from the Office of Information, United States Department of Agriculture, Washington, D. C.

### Turkey Business Shows Satisfactory Increase

Turkey raising in the United States has been regarded as a side issue and gamble, but increasing knowledge of parasitic diseases and their control is putting the industry on a more stable basis, says A. R. Lee, poultry husbandman of the United States Department of Agriculture. "There are now more than 3,500,000 turkeys on farms in this country, and they constitute 1 1/4 per cent of all poultry. The 1929 crop of market turkeys indicated a decided advance in the business as compared with 1928. The estimated increase was about 9 per cent."

### Pullets Beginning to Lay Need Proper Mash

Pullets ready to start their careers as layers are ready for the feed of their elders. At this age they need a laying mash which contains more animal protein.

The University of Wisconsin suggests as a mash for pullets about to start laying, equal parts of ground corn, ground oats, wheat bran, standard middlings, and meat scraps. Salt is added to the mixture, at the rate of five pounds when 100 pounds of each of the five ingredients are used.

### Poultry Hints

Jats, when first started, make excellent forage for chicks.

Pullets' eggs usually do not bring as high a price on the market as do hens' eggs; therefore, it is to the advantage of the poultryman to bring the eggs up to normal size as soon as possible.

Grain, oyster shell and water are other essentials in a laying ration. Milk is an excellent poultry feed and may be substituted for one-half the meat scraps in the mash. If it is kept before the hens all the time.

Alfalfa is an ideal pasture for poultry. It is perennial and probably offers the most nourishment of all the plants you might grow.

Good Thanksgiving turkeys are well fed and fattened. A fat turkey carries a great deal of flesh and the meat is of higher quality.

There is so little difference in the merits of the White Rocks and Barred Rocks that few owners would venture to recommend one in preference to the other.

Egg size can be increased, quite often, by feeding milk in some form. If skim milk is plentiful on the farm, it is advisable to mix a wet mash with milk instead of water. Milk may also be provided in the drinking fountains.

There is nothing which will improve the quality of summer eggs more than the production of infertile eggs. This means that all roosters should be removed from the breeding flocks just as soon as hatching eggs are no longer needed.

#### "Frazil Ice"

When water is kept in motion at a temperature below the freezing point, ice does not form on its surface. Instead, ice crystals form throughout the body of the water. Such ice is known as frazil ice.

#### Cotton Billiard Balls

Billiard balls have been made of linters, the short shreds of cotton created in ginning processes.

A chop Suey supper was given at the Mahlon Mentzer home last Tuesday evening in honor of James Mentzer who is entering Indiana University this fall. Those present were Miles Manwaring, Todd Teeter, Fred Beeson, Wendell Anderson and Frank Meredith of Warsaw.

### DEATH OF MRS. UPLINGER.

Mrs. Lillie Mae Uplinger, wife of Ruben Uplinger east of Palestine died of apoplexy very suddenly Thursday night. The deceased was 66 years old and while she had been in poor health during the summer she had not been bedfast and was feeling exceptionally well on Thursday.

The deceased had always made her home in the vicinity of Palestine and was a member of the Palestine Methodist church.

She leaves her husband, Reuben Uplinger; two sons, Charles Uplinger of Fort Wayne, and Earl Uplinger of Warsaw; one daughter; Beatrice Uplinger of near Palestine; eight grandchildren; two nephews, Wayne and Donald Humes, who made their home with the Uplingers; one brother and one sister preceeded her in death.

The funeral was held at the Palestine M. E. Church Sunday at 2 o'clock, and burial was made in cemetery at same place.

"One should always,"

said MRS. MOLLA PROPP,

"keep the compression well lubricated"

WELL, there we were! Right in the Sunday traffic, too! Henry tried to get the car off the road before the engine stopped, but didn't succeed very well.

You should have heard the cars behind us blow their horns. Henry got more flustered by the minute. I kept telling him it MUST be the compression . . . or anyway the alemite, or whatever it is you call the thing that sits on the side of the engine.

All at once I remembered where I got the last batch of gasoline. You see, my dear, Henry had taken the reserve gallon I had in the house and I had washed a dress in it.

And so I told Henry every

Copyright, 1930—John Jensen.

little while that it was the gasoline. He got red in the face and would have said something crude if I hadn't reminded him that I was a lady and that I KNEW it was the gasoline.

Pretty soon he took the carborundum thing apart and wiped it with his handkerchief—the one I gave him for his birthday, too. "Aha!" he said, "it's the gasoline!" "Aha!" I said, "I told you so!"

And so some college boys in a car called Elizabeth, I think, pushed us to the nearest station. You should have seen the difference! My dear, Henry was so pleased with himself that he ran through a red signal and got bawled out by the traffic cop.

## PROVERBS

A Chinese scholar at a San Francisco luncheon quoted from memory some of the proverbs of his country:

Rotten wood can't be carved.

Ask the young; they know everything.

Habits are cobwebs at first, cables at last.

Lock your door and keep your neighbor honest.

God helps us, but get up off that opium couch.

Patience and the mulberry leaf becomes a silk robe.

There are two sides to every question—the wrong side and your side.

Woman is like your shadow. Follow her, she flies, flee her, she follows.—Springfield Union.

Mrs. J. R. Brown has been visiting her son Clarence Brown and family at Warsaw the past week.

Mr. and Mrs. Clyde Reed of Naperville Ill., are visiting with her mother, Mrs. Emanuel Creakbaum.

Miss Elsie Robbins was the guest of Mr. and Mrs. Hugh Clayton, at Wabash the latter part of last week.

L. E. Eberly and family of Indianapolis spent Sunday and Monday the guests of Mr. and Mrs. A. E. Eberly.

Mrs. John Zolman who has been quite poorly for the past several days is somewhat improved at this writing.

Mr. and Mrs. Alpheus Smith and family spent Sunday with Mrs. Smith's sister, Mrs. Fred Eherenman and family.

Mr. and Mrs. Merrill C Carey spent the week end in Plymouth the guests of their cousins, Mr. and Mrs. Lloyd Staley.

Elmer Kesler and wife of Fort Wayne and Orville Sarber and wife of Mentone spent Monday at Benton Harbor and St. Joe Michigan.

Mr. and Mrs. Elias Smith Mr. and Mrs. Adam Bowen and son Lewis spent Sunday at Milford with Mr. and Mrs. Fred Eherenman and family

James Welch and son Oral and Mr. Welch's brother-in-law and son of Fort Wayne started Monday morning to the State Fair at Indianapolis for a few days.

Mr. and Mrs. Oliver Severns and Mrs. Fred Busenburg spent Sunday at South Bend to see the new baby boy at the Lee Severns home, who was named Richard Oliver.

Mr and Mrs. Isaac Horn and family attended the Grass family reunion at Elkhart, Sunday. They had a very enjoyable time and report that a very large number were present.

Marcus Burket, relief agent for the Winona railroad, took over the agents affairs at this station Tuesday and will remain in charge of the station during the time the retiring agent, Mr. Champer is engaged in his school work.

B. A. Jefferies entertained over Labor Day, Mr. and Mrs. Henry Bradway and daughter Marjorie and Mr. and Mrs. Everet Lantz all of Kokomo.

Miss Georgiana Haimbaugh of North Liberty returned home Monday after a weeks vacation with her grandparents, Mr. and Mrs. Obe Haimbaugh.

Ed Grove and wife of Alden Mich, Called to see P W. Busenburg last Monday. Mr. Grove worked on the farm for the Busenburg's thirty six years ago, for three years then moved to Michigan. His many friends here will be glad to know that Ed is doing well and has a good farm of one-hundred and twenty acres.

Mrs. H. F. Hoover and sons Charles and Warren of Valparaiso, Mr. and Mrs. Tom Long, Mr. and Mrs. Charles Mowry of Mansfield Ohio, Mr. and Mrs. Leroy Baker and daughter, Marilyn of Lima Ohio relatives of Mr. and Mrs. Clayton Switzer were here visiting and attended the Baker reunion, which was held at Wabash City Park on Sunday August 30th.

### W. C. T. U. MEETING.

The W. C. T. U. will meet Sept., 9, at the country home of Mr. and Mrs. Silas Meredith. Meet at 1:30 at Mentzers Store and conveyance will be made for those not having a way to go.

### HAS TONSIL OPERATION

Joe Blackford who has been in poor health for the past several months underwent a tonsil operation at the Emergency hospital at Warsaw Monday. At present writing he is recovering from the operation nicely and it is hoped that he soon will be on the road to recovery.

### SARBER—ELLSWORTH

Married, at the M. E. Parsonage, Rev. Power officiating, Saturday August 30, James Adam Sarber, son of Mr. and Mrs. Ike Sarber to Mary Louise Ellsworth, daughter of Mr. and Mrs. David Ellsworth. Christ-Sarber, brother of the groom acted as best man while Miss Geneva John son acted as bride's maid.

The wedding supper was held at the Ellsworth home with Mr. and Mrs. Isaac Sarber and son Christian and Mrs. Marie Workman and children of Warsaw as guests.

The newlyweds immediately left for South Bend where they spent the week end. Both bride and groom are well and favorably known to our readers, both being graduates of the Mentone High School. The Farm News joins with their many friends in wishing them a happy journey through life.

## A CHICAGO CRITIC FOR THE COMMUNITY FARM NEWS.

The Farm News has arranged with a writer of high standing in the "Windy City" to review each week's issue and furnish us for publication his comments for publication the following week.

This writer has our permission to be free with his criticisms on all articles and events as published in the Farm News, but it must be born in mind that they are the views as gleaned by an outsider and may not coincide with our ideas at all.

However he is a writer of great ability and while at times his criticisms may appear a little strong—yet to see ourselves as others see us will probably have a wholesome effect upon all of us as individuals as well as a community of the whole.

So now "Mr. Chicagoan" dig in—hew to the lines and let the chips fall where they may—even though some of them may light on the editors.—Ed.

## TO HONOR WHITE CITY ON THEIR POULTRY TOUR.

The Illinois poultrymen who are traveling in large motor busses, camping in a tent city at night, and furnishing their own meals enroute, are on a tour of southern Michigan and northern Indiana, inspecting and learning the methods employed at the leading poultry plants through the territory traversed.

Their trip brings s them to the White City Egg Farm, Mentone's leading industry, at 6:45 a. m. on Friday of this week, which will be the only poultry farm in this state that they will visit. The fact that while the White City produces and sells a very large number of baby chicks each season, yet this farm is conducted primarily for the purpose of producing on a large scale eggs at profit and selling them through the regular channels for consumption. And the fact that their greatest volume of business and profits is derived from this source, makes it one of the few farms in the United States run on a large scale that can make a real showing of the actual profits to be made on a real egg farm. It is probably due to this fact that the Illinois party singled this one plant in Hosiendom for inspection during their tour.

Manager Manwaring, of the White City, will meet the party at Warsaw and accompany them to Mentone.

### Definition of Wealth

The ordinary definition of wealth includes only material objects owned by human beings and external to the owner.

## Wandering Back by A. J. Dunlap.

It was miles from our place to a neighbor;  
There were days when we saw none at all—  
For the horses were tired in the evening  
And no telephone hung on the wall.  
And the days flowed along like a river,  
With a peace in their quiet and charm  
That alone could be found in the country,  
In the days of the pioneer farm.

When I tire of this up-to-date frenzy  
With its clashing and clamorous blare;  
When I'm weary of pushing and rushing,  
And of life with its windows aglare;  
Then I quietly wander in fancy  
Back again to the farm where I knew  
The deep peace of the sunrise and sunset,  
And the cornfields that glittered with dew.

### OFTEN HEARD

Fourand Neckties,  
Starch Collars,  
Button Oles,  
Pokkit Hankachiffs,

### WISE AND OTHERWISE

It takes a certain amount of backbone for a man to put up a good front.

You never can tell. Even the hero's reputation isn't safe till he is dead and buried.

A man naturally has his suspicions about the woman who isn't afraid of a mouse.

Stand up for your own rights. If you don't somebody else is going to sit on them.

You never can tell. The fellow who is a mere hanger-on may be the hardest to shake.

A woman may have the greatest respect for old age. That is until it begins to tell on her.

It doesn't take footprints in the sands of time to prove that some of us are going backward.

"Hell is paved with good intentions," quoted the Wise Guy. "Yes, most of us have good intentions to burn," suggested the Simple Mug.

Harduppe—"That fellow Wigwag is always good for a touch. Anybody can get money out of him." Borrowell—"That's right. Even his wife makes him cough up."

### RANDOM THOUGHTS

Golf has also revived the art of conversation.

Politics not alone makes strange bedfellows, but also creates the bunk.

Prosperity is on the way, but it happened to catch a local instead of an express.

To avoid disturbing the performance, producers make the public cough up at the box office.

The reason that the public never becomes rich in the stock market is because it buys dear and sells cheap.

The American tourist who looks upon French money as a joke soon discovers the joke is at his expense.

Some of those ball players may be diamonds in the rough, but the umpires occasionally have to polish them off.

### MENTONE STUDENTS ENTER UNIVERSITY.

Bloomington, Ind., Sept. 1 James Mentzer and Doris Adamson, of Mentone, have been granted admission cards and will enter Indiana University for the first time next week, according to the announcement here today of Dr. David A. Rothrock, dean of the college of arts and sciences of the university. A total of 1114 new students have had their credentials accepted by the university, the majority of these students will enter as freshmen while a few, who have attended other colleges and universities will have upper-classman standing. Of the students who have had their credits accepted up to the present time, 482 are women and 632 are men. This number is expected to be considerably increased before the opening of the fall semester, as the office of the dean is accepting a large number of students' credentials and is sending out admission cards every day.

### HOW TO LIVE LONGER

By John Clarence Funk, A.M., Sc.D.

Director of Public Health Education,  
State of Pennsylvania

#### Forcing the Issue

NO ONE wants to grow old. But no one can prevent it. Man is born, lives and dies—a sequence which the wisest can in no way avoid. Any worrying will not help matters in the least. Intelligent living, on the other hand, is of great value in postponing the inevitable old age condition.

One has but to look around to realize that young men and women, as well as older ones, are foolishly engaged in habits that tend to shorten life. The consequence is that many a person who has actually only existed fifty or sixty years is an septuagenarian from a physiological standpoint. Where is the sense to that?

Continual worry, lack of the proper amount of rest, over-playing or over-working, failing to exercise, excesses of all kinds, and in general, forgetting that the body as well as business requires intelligent direction, are the factors that prematurely hasten old age.

It is an established and scientific fact that careful living, barring accidents, will defer old age. Therefore, so conduct your life that when you look old you actually are that way. Why force the issue?

(© 1929, Western Newspaper Union.)

#### Hawaiian Language

The Hawaiian alphabet consists of 12 letters. The vowels are given values as in Spanish, and are always pronounced, not slurred.

# Says WILL ROGERS

BEVERLY HILLS—Well all I know is just what I read in the papers, or what I see while prowling. Well Sir

a week or so ago had a great trip. We were starting to go to the famous Lake Tahoe in California to film the old Frank Bacon play "Lightnin'" right on the ground that it was laid on. You know it was a hotel on the Nevada and California line, and the divorcees

would stop there and it had a California address but in reality you would be living in Nevada. Well Fred Stone and his family were out at our little ranch at Santa Monica spending a little vacation with us, so we all decided to go up. We first hit out for Yosemite. I hate to admit it but I had never been there. My family had but not me, and Fred and his folks hadn't been. If you never have been there, don't miss it.

First place they have one of the most unique Hotels you ever saw. In fact lots of dandy places to stop. Everybody was apologetic for the falls, as on account of the Republicans giving us no more rains than they have why there hasn't been in years as little water coming over. But there—was some, and it would give you an idea of where they were and what would happen to some water if it did happen along that way, what a drop it would get.

We took drives and we took walks, and then we had a Barbecue down on the river bank on the gravel bar. They sure do know how to cook up steaks, and they sent their old Cowboy Banjo player and singer down and he was sure good. He had lots of old ones I hadn't heard in years and some I had never heard. Then they had an awful good Cowboy Rope spinner and Fred and I got a kick out of him, for we had wrestled with one of those things long enough to know how hard it really was.

Then we went to see the fire fall, on a high cliff. They build every night a big log fire, and as it burns into small embers, just at nine o'clock they push it over in a steady stream that last several minutes these burning embers, and here you are almost a mile straight down, and see this fall over this great preceptice.

Well it was a beautiful sight. Then we went to see em feed the bears. There is lots of bears in there, and they take the garbage from the hotels, and have little pits built like tables, and spot lights up in the trees, and

its on the bank of this beautiful little river, and all the crowd are just across on the opposite side. They put all the food in these places, and then they turn the lights on, and all at once right across the river is all these old bears, fussing and eating, and playing.

Then to Carson City, Nevada, one of the most picturesque and historic old State Capitols we have, saw where Corbett and Fitzsimmons fought the famous "Solar Plexus" fight. Fred got a kick out of that for he used to box with Corbett all during his Championship days, and Corbett always said he would have been a Champion middleweight if he had taken it up as a profession. He was always the best boxer, (and Fighter) of any Actor we ever had on the stage. Then to Reno, which is only forty miles from the lake. But Reno I will have to take a whole Chapter to tell you about it, and its "Industry." But if you want to have a good time, I don't care where you live, just load in your Kids, and take some congenial friends, and just start out, you would be surprised what there is to see in this great Country within 200 miles of where any of us live. I don't care what State or what town. I tell you Henry Ford has been good us to.

While we were up there at Lake Tahoe a fellow come up and wanted me to help him into some soft job in the movies. I asked him what he was doing and he said he was "house detective in the big hotel in Reno where all the divorcees live."

"I said, 'Brother, you must be hard to please. John Barrymore is not doing as well as you. Why you got a better job than Coolidge writing a gag a day.' I told him go back to work and don't even envy Hoover. 'But if you are going to give the job up consult me, I'll change with you.'"

Charley Dawes goes to Spain to study "Neolithic" people. That's his hobby, is studying odd creatures. He gave up all business and all governmental interests for four years just for a reserved seat to study ninety-six of America's most prehistoric men, then he went to London to study "odd" women, whose sole ambition in life was to get their daughters presented at court. So Spain will have to go some to show Charley anything.

Another drawing card entered the heavyweight contender class today. Sister McPherson versus McPherson. (© 1930, McNaught Syndicate, Inc.)

## Oldest Hieroglyphics

Hieroglyphics on predynastic vases, which are now in the Metropolitan museum, are classed as the oldest hieroglyphics extant.

## Farmers Who Are Interested in Better Eggs and Who Are Interested Enough to Help Themselves as Well as Us.

It goes without saying, that we have done more for the farmers in the way of egg price than any other buyer in Indiana, and have done more hard work to try to get a "Mark" on Indiana eggs than any other firm in New York City. We are working our heads off now trying to help you get more for eggs. Now, won't you please listen and try to follow our advice. We are not hoggish and don't ask all of this simply for our own benefit, but what helps us, sure will help you.

Now please try and adhere to the following advice for one year and see the results:

Get a good strain of straight blood poultry that lays a good sized egg (either white or deep brown) there is no difference in price now, and the general average price is about the same for equal quality eggs (size and cleanliness considered.)

Pick up your eggs every morning and evening, and carry a damp cloth with you, cleaning all traces of dirt off before it hardens and sticks to the shell.

## DON'T WASH THEM,

But simply wipe them with a damp cloth and don't leave them streaked with dirt but clean them. Keep them in the coolest place about the house never allowing rain nor sun to touch them.

Use all ill-shaped eggs at home because they are broken in shipping. Market your eggs at equal intervals twice each week—that is, we would like to have them each Monday and Thursday or each Tuesday and Friday, rain or shine.

Keep every egg that you are not sure of being strictly fresh at home or ship them separately, as we don't want to spoil a case of nice eggs with a few of doubtful character, and you can't afford to sell such eggs, as it hurts you as bad as it does us, for we have to buy eggs on a basis of what we get for them, and if you slip in a few bad eggs on us, it only hurts our sales, and causes us to have to lower our price, so you see the fresher we get the eggs the more we get, and the more we can pay you. Never keep roosters with your hens after June 1.

Watch the size of your eggs and when they begin to run small, then feed them some good laying mash with a little Cod-liver oil in it or some soaked oats with a little Cod-liver oil in it or anything to keep the egg size up to not less than 23 ounces per dozen or over.

Now please try and follow this advice and let's work together and put our eggs in a class with California, Washington and Utah. The Pacific coast states ship eggs to New York City, and get from 3 to 10 cents more than your eggs bring, and it is because they ship fresh, clean, good-sized eggs graded up to a standard, which you can do if you will work as they work. Now if you will work as hard as we are, trying to put good eggs on the map, then we will show the market that Indiana has just as good eggs as any state in the union. We will do our best and now it's up to you who sell us eggs, to work as hard as we do.

Yours for Better Eggs.

*Quality Butter & Egg Company*

# 'FARM' POULTRY

## CUTTING DOWN ON FEED MEANS LOSS

### Curtailing Mash in the Late Summer Reduces Eggs.

Cutting down the poultry feed, especially the laying mash, in summer means that laying will be seriously curtailed not only for the present season but later.

"Our experimental records show that to curtail or discontinue the laying mash to hens during late summer will result in poor yields of eggs later," says Dr. B. F. Kaupp, head of the poultry department at the North Carolina State college. "The body of the hen must be maintained first, and if sufficient feed is not furnished, she will use that given for egg production to build up her body. Production of eggs will fall off and if the hen draws on her body supply of nutrients, she will suffer in vigor so that production later will not be satisfactory."

If not sufficiently fed, the hen will draw on her body supply of fat to build the yolk of the egg and on her storehouse of minerals and vitamins to put into the egg. This drainage affects the condition of the body, says Doctor Kaupp, and undermines the health of the bird. He insists that the hen needs a mash feed along with the right amount of grain each day. When putting on the new growth of 8,000 feathers, she needs additional care and attention.

White corn fed alone will not give a hen all the food nutrients needed. While the egg is 65 per cent water, it also contains 10 per cent of fat, 14 per cent of protein and 11 per cent of minerals, mostly in the shell. Therefore, laying hens must have a good laying mash and grain feed each day in the year. In addition to this, each hen must also have at least seven pounds of green feed to each 100 birds every day.

If these requirements are met there is no reason why some eggs might not be secured throughout the summer and the body of the bird suffer no diminution in vigor for future production.

### Mites Are Infallible

#### Indications of Filth

Lice and mites are infallible signs of filth and neglect. When a hen house becomes thoroughly infested it is no small job to get rid of the vermin. If the hen house is small and of little value it is advisable to burn it down, provided other buildings are not endangered. If this is not practicable the house must be turned inside out and thoroughly cleaned and disinfected. Throw out the roosts,

feeding and watering utensils; litter droppings boards and even the floors if necessary. Burn old litter. Scrub roosts and floors, walls and ceiling with hot water containing a 10 per cent solution of carbolic acid or some coal tar preparation that will destroy all insect life and even the mites. When perfectly cleaned and dried put on a generous coat of whitewash containing a weak solution of carbolic acid, with brush or, better, with a sprayer.

### Red Leghorn Chicken Winning Popularity

A new breed of hen, not much heard of as yet, is called the Red Leghorn. It was recognized by the American Poultry association in August, 1929. This is what is sometimes called a "manufactured breed"; in other words, it is produced by cross-breeding. A report on the new variety says that the first crosses were made with Sussex Brown Leghorns and Rhode Island Reds. Further crosses were made with the stock got from the cross with Brown Leghorns. Buff Leghorns have earned a high reputation for egg production, but the new red variety promises to eclipse all other varieties because of its vigorous constitution, which it has inherited from its Rhode Island Red ancestry. The variety was first exhibited at Oakland coliseum show in 1925, and since then it has become fairly popular with American utilitarians.

### Many Small Eggs

With pullets coming into production, the average poultryman will be alarmed by the large proportion of small eggs that he gathers. Pullets eggs are to be expected during the first three or four weeks of each pullet's production. After a bird has been in production for several weeks, she should be laying standard size eggs, provided, of course, that she has the breeding that enables her to do so. Clean nests will also be a big advantage to the young pullets.

### Alfalfa for Hens

If your laying hens aren't getting yellow corn every day, give them all the green, leafy alfalfa hay they care to eat, advises W. C. Tully, of North Dakota Agricultural college. With no green grass or, other fresh leafy feeds, biddy has a hard time keeping thrifty and laying eggs, too. Vitamin A is a feed element most North Dakota hens find lacking in their winter rations, unless they are getting either yellow corn, alfalfa hay or cod liver oil.

### Birds Almost Extinct

The Labrador duck and passenger pigeon have become entirely extinct among American game birds, and the Eskimo curlew has been almost exterminated.

### Primitive "Car Line"

In 1799 part of a proposed English railway line was built. Anyone with a cart whose wheels fitted could put it on the rails and let his horse pull it, provided he paid the tolls.

## "KONJOLA DID MORE THAN ALL ELSE I TRIED."

"Certainly Glad To Endorse  
This Fine Medicine," Adds  
Indianapolis Lady.

MRS. DORA Z. UHLS

"About four years ago my health began to fail," said Mrs. Dora Z. Uhls, 409 Spring Street, Indianapolis. "Food soured in my stomach and I had gas pains around my heart. Smoothing spells were frequent. My kidneys were in a frightful state, my feet and ankles were swollen and my back ached constantly. Constipation and nervousness added to my misery.

"Konjola did more for me than all else I tried and I am certainly glad to endorse this fine medicine. Improvement began with the treatment and I gained each day. Soon the swelling left my feet and ankles and I was free from those terrible back pains. Food digests much better and I am gaining in vitality each day. I can not say too much in praise of this great medicine."

When given a real test, in usual cases over a six to eight week period Konjola has made a record that would frequently challenge belief were the actual facts not known and verified.

Konjola is sold in Mentone Ind., at the Shafer & Goodwin drug store, and by all the best druggists in all towns throughout this entire section.

### Growing Pines

It might be possible to start a pine by planting cones, but not practical. Usually a cone after being buried becomes damp and closes in such a way that the seeds cannot sprout. Cones should be dried in the sun, the seeds shaken out and planted. Exchange.

### "Preferred" Investments

Preferred stocks came into existence with the railroad reorganizations of the Nineteenth century and were used, as they are used today, to give investors something better than common shares, but not quite as safe as bonds.

# The Reason

We get so many eggs from Mentone Producers is because we are in a position to pay the most for Quality Eggs. And then Our Quick Returns is

# Another Factor

That makes friends among the shippers and causes so many to ship their Finest Eggs to us.

## JUST THINKIN'

by Charles S. Kinnison

### Mother's Hands

Hands that are worn and wrinkled,  
Hands that are old and tired,  
Hands that cheerfully struggled,  
Hands that with love were inspired;  
Gone, their grace and their beauty—  
Motherhood's sacrifice  
On the altar of duty  
Which cruelly claims its price,

Hands that were once soft and lovely,  
Beautiful hands, in truth,  
Hands ever willing and helpful—  
The glorious hands of youth.  
Now, tho they tremble and falter,  
To me they're the acme of grace,  
To me, her worn hands exalt her,  
Her touch ever soft to my face.

(© 1930, Western Newspaper Union.)

### FARMING COMMUNITY AROUND

### MENTONE HAS NO KICK COMING.

When we take into consideration the large shipments of farm products of different kinds and their total values, shipped weekly from Mentone we realize that our people have no cause for complaint about conditions, but on the other hand should give thanks that we of this vicinity are located in one of the few favored spots of this great country that has not suffered to any great extent by the unprecedented drought that has covered the greater part of the United States during the summer just drawing to a close.

Our diversified farm operations are probably one of the main

reasons for our position at this time, which is more proof that it is "not a wise plan to put all of our eggs in one basket."

A brief summary of the approximate marketing and shipping from the Mentone station weekly at the present time on only a few of the articles produced shows a valuation far beyond what the average person would presume. The Mentone Egg Producers ship on an average to the New York market \$12,000.00 worth each week. Live stock shipped from this station will average more than \$8,000.00 each week. The pickle station has been doing about \$3,000.00 for the past several weeks, making a total value on these three products of \$23,000.00 for the week, besides all the other products of considerable value. Then too, there will soon be ready for the market a good crop of onions, which will bring many more thousands of dollars to Mentone. While reports from all parts of the country show a failure of the corn crop, unless frost comes much earlier than usual the crop in this locality will be above the average and of an excellent quality.

The great increase in the price of corn will more than offset any losses from other crops caused by the dry weather, and taken as a whole we can see no reason for complaint in this locality.

The report and condition of our local bank shows that our community is in good financial condition and while there may be some of our people who have not prospered to the extent they possibly should, if they will take an inventory of their activities or inactivities during the past year, it is possible that they will find that the cause lies with themselves and not due to bad weather or the government.

## FAULT IN MEDICAL EDUCATION

By DR. W. W. BLACKMAN, New York (Homeopathic).

The modern tendency of medical education toward the emphasizing of training of specialists rather than general practitioners is to be deplored. The general practitioner is and probably will always be the most important single factor in the practice of medicine. The most important function of the medical college is to train men to be competent practitioners and every other function must be held subordinate to this.

Specialization is the superstructure built upon the foundation laid in the allied sciences, and the more widely and deeply the foundations are laid, the higher and better the superstructure can be built upon them.

Unfortunately, the modern tendency of medical education is toward the training of specialists rather than general practitioners. Medicine cannot be subdivided into specialties. It is not limited to the eye, the heart, or the stomach, but covers the entire body in health and disease. There are great dangers in specialization. Unless specialists have broad training and experience in general medicine, they are not safe practitioners.

### Last Week's News Reviewed by A Stranger in the Windy City

Chicagoan is glad to hear from  
readers on matters of general  
interest to the community. Let-  
ters sent to the above address  
will receive prompt attention.

Chicago, Ill., Sept. 8—You saw what Editor Krathwohl told me last week, didn't you? "Go right ahead, and let the chips fall where they may," he said in the fine editorial in which he introduced me to the readers of The Community Farm News. Well, I don't propose to be a crab, but I will speak out when I see certain things in the paper that strikes as deserving plain comment.

I was glad to read that Fred Busenburg received such a good price for his hogs, and I am inclined to think that Fred knows when to ship his porkers, as well as the kind to raise so as to command top prices on the market.

George A. Blackburn didn't do as well with his chickens as Busenburg did with his hogs, but it wasn't George's fault. The chickens must have been a superior quality, or that Carr fellow wouldn't be in jail for appropriating them.

I wonder how many of the guests at the Mahlon Mentzer Chop Suey party knew that the dish upon which they regaled is really an American dish, and although it bears a Mongolian name, none of it can be obtained in the interior of China.

I am glad to learn of the bounteous cucumber harvest now being gathered by the farmers of your community. Properly prepared and eaten in moderation, the cucumber is a valuable food production, but otherwise it may send some of its consumers over to The Big Drug Store for some colic remedy. (No charge for the ad.)

Now just a word to W. C. Davis, I did not lose the gun that he found, nor do I blame him for being willing to part with it for the price of the

advertising used to inform the world for his find. I saw and heard, and took part in all the shooting I ever care to in the recent unpleasantness with our German Brothers. You see even strangers read Farm News ads.

Congratulations to Mr. and Mrs. James Adam Sarber. Here you have a fine young couple undaunted by tales of droughts, panics, foreign entanglements or the calamities predicted by politicians should they fail of election. May their voyage on the sea of matrimony be free from storms—and icebergs.

When good and useful women like Mrs. Uplinger are called from this earth, the entire nation sustains a loss, as well as the communities in which they lived, labored and loved.

See you next week!

### SORRY FOR THIS DELAY.

The following items from correspondents were received after the Farm News had gone to press last week, the delay probably being due to the fact that the rural carriers did not work.

### TALMA NEWS ITEMS

Dorothy Horn and Von Kochenderfer attended the fair at Akron Monday evening.

Mr. and Mrs. Clyde Brugh of Mentone were dinner guests Sunday at the Vincen Teeter home

Mrs. Peter Horn and her brother, Jacob H. Grass attended the Grass reunion at Elkhart Sunday.

Mr. and Mrs. Paul Myers and Mr. and Mrs. Verdie Brockey spent Thursday evening at Logansport.

Miss Ferris Bryant of Rochester spent last week with her parents, Mr. and Mrs. Philly's Bryant.

Mr. and Mrs. Paul Myers were dinner guests Sunday of Mr. and Mrs. Bert Myers at Rochester.

Mr. and Mrs. Everett Kesler were dinner guests Sunday of her parents Mr. and Mrs. Wm. Fore at Rochester

Miss Dorothy Deamer left Thursday for Rockport Indiana. Miss Deamer will teach in the school at that place.

The Ladies Auxiliary of the New-castle Twp. Farm Bureau met on Friday afternoon August 29th, at the home of Mrs. Clarence Graffis with Mrs. Main Deamer, Mrs. Walter Zimmerman and Mrs. Charles Shock as assistant hostesses, with 25 members and 12 guests present. After the business session a program was rendered consisting of a duet by Mrs.

Peter Horn and daughter Dorothy, reading by Doris Adamson, Solo Dorothy Horn. Contests were then enjoyed with Mrs. Paul Myers, Mrs. Charles Coplen, Mrs. Wm. Jergensmyer, Mrs. Verdie Brockey and Mrs. Ora Horn winning prizes. An invitation was given by Mrs. Charles Coplen for the meeting to be held at her home on September 25, with Mrs. Joe Kochenderfer, Mrs. Wm. Jergensmyer and Mrs. John Haimbaugh in charge of the program. Dainty refreshments were served by the hostess and her assistants.

### BEAVER DAM ITEMS

Frank Kries and family moved to Silver Lake on Wednesday.

Mrs. Clark Conley attended Institute at Warsaw the past week.

Mrs. Harley Thomas entertained company from Elkhart during the week.

Prof. Cox and wife are occupying the Mrs. Elmer Study home for the present.

John Cinninger had the misfortune of being kicked by a horse at the Elmer Huffman home.

Mrs. Charles Williamson of Mentone spent Wednesday at the home of her brother, Jonas Rickel.

Ivan Tucker and wife accompanied by Joe McFarland and wife motored to Ohio Tuesday to attend the funeral of a relative.

James G. Timberman of Silver Lake held a piano recital at the Beaver Dam Gym on Friday evening. A fair sized crowd attended.

Mrs. Ala Aumsbaugh departed Wednesday for her home at Cromwell, Indiana after spending two weeks at the home of her daughter, Mrs. Chas Cinninger.

### TALMA NEWS ITEMS.

Joe Foster of Nappanee spent Sunday here with friends.

Mr. and Mrs. Frank Arter spent Saturday evening in Akron.

Mrs. O. C. Montgomery and son Leroy spent Saturday evening in Rochester.

Mr. and Mrs. Paul Hutz and son of Indianapolis spent the week end the guests of friends.

Zimmerman Bros., of Rochester were business visitors here Wednesday and Thursday.

Mr. and Mrs. Hail Warren of South Bend spent Sunday here the guests of her parents Mr. and Mrs. J. Byers.

Earl Barr 26, well known young man of Talma Community where he had spent practically all of his life, died at 12:30 Tuesday afternoon at the St. Margaret hospital in Hammond following an illness of only eight days. Death was due to peritonitis which developed following an operation for ulcers of the stomach.

Earl, son of Burr and Elizabeth Barr, was born at Talma Nov. 15th, 1904 and all his life was spent in that community with the exception of the past two years during which time he held a position with the Inland Steels in Indiana Harbor. He was a member of the Gleaner Lodge of Talma, the K. of P. Lodge at Indiana Harbor and the M. E. church at Talma.

Surviving are his mother, Mrs. Elizabeth Barr, who lived with her son in Hammond, one brother, Fred Barr of Indiana Harbor, three sisters Mrs. Elmer Jones, south-west of Argos, Mrs. Frank Souther and Mrs. Ola Flenland of Hammond, one uncle Charles Barr of Talma.

The body was removed to the home of his uncle in Talma, Wednesday afternoon by the Zimmerman brothers of Rochester. Funeral services were held Thursday afternoon at 2:00 o'clock p.m. at the Talma M. E. Church and burial was made in Reaster Cemetery.

### Valuable Alloy

Carbaloy is a new alloy and is the hardest substance next to the diamond, and is composed of tungsten, carbon and cobalt.

### BILL BOOSTER SAYS:

NOBODY EVER GOT FAMOUS BY SAYING, "IT CAN'T BE DONE." FROM NOAH'S TIME, THE BOOSTERS HAVE GONE DOWN IN HISTORY, WHILE THE KNOCKERS HAVE GONE UP SALT CREEK, UP WHERE THE WHANG DOODLE MOURNETH! BE A BOOSTER, AND HELP EVERY GOOD THING ALONG!

## LIVE STOCK

### SILAGE FOR BABY BEEF FEED FAILS

#### Not Profitable Where Yield of Corn Is Low.

Corn silage is not a profitable feed for fattening baby beef calves under northwestern Minnesota conditions, according to the trials conducted at the northwest experiment station of the University of Minnesota at Crookston. The reason given is the low yield of corn silage obtainable in the northern part of the state, for it has been demonstrated that silage feeding is profitable in the corn belt where yields are normally high.

Calves fed a ration of ground barley, linseed oil meal and alfalfa hay made greater daily gains as well as cheaper gains, and were valued at 15 cents per hundredweight higher than calves fed the same ration plus corn silage. The feeding period was 196 days, lasting from November 27 to June 11. All of the calves were purchased at the same price. The margin per head over feed cost for the calves fed silage was \$22.37, while for those fed the same ration without silage it was \$27.71.

In these same trials, but with different lots of calves, it was learned that ground barley alone is more efficient than a mixture of ground barley and ground oats. It was also shown that feeding ground oats during the first half of the fattening period and ground barley the last half is not as satisfactory as feeding ground barley throughout.

It was concluded that the advisability of adding ground oats to a ration of ground barley, linseed oil meal, alfalfa hay and corn silage would depend upon the relative prices of oats and barley. At the values used in this trial, 38 cents for oats and 52 cents for barley, the addition of oats did not prove profitable.

#### Vaccination Tests at Experiment Stations

Vaccination tests at Ames, Kansas, and other experiment stations, indicate that pigs even a few days old can be immunized against cholera in a high percentage of cases and with pigs approaching weaning (seven to nine weeks old) immunity is as certain as with old hogs.

The explanation offered by careful observers of this apparent variation between experiments and practice generally hinges on this fact: Pigs up to six or eight weeks of age have tender, pliable skin and soft flesh. With ordinary vaccinating practice, where rapid handling and treatment is commonly the rule, it is probable that among

certain individual pigs there is more or less leakage of serum from the hole through which it was injected. If this is true, it does offer a reasonable and plausible explanation why vaccination is uncertain with young pigs. This fault or error should not apply to pigs eight weeks old or older especially when the job is carefully done—with speed not the dominating thought while the job is being done. It appears to be sound policy to vaccinate pigs when the younger ones reach two months of age.

#### Clover in Stubble Is Cleanest Hog Pasture

Clover in wheat and oat stubble is usually the cleanest pasture on the farm. This is a good place to put your pigs. The sanitation program is spoiled if big spring shotes, fattening hogs, or old sows are turned into the stubble fields after threshing.

At this time of year sanitation is very necessary. Tests of Dr. H. B. Raffensperger have shown that worm eggs incubate rapidly during warm weather. Eggs dropped now from wormy spring shotes or old hogs may ruin next fall's pigs. A few fall sanitation pigs on stubble fields, if the plan is rigidly adhered to, will not endanger the spring pigs materially.

#### Use of Soy Beans Not Favored for Hard Pork

One of the feeds which is receiving attention is soy beans and unquestionably they furnish a very high protein supplementary feed. Recently, however, the packer has been putting in his "two cents' worth," regarding soy beans and his song doesn't sing quite as well as some of us would like to have it. The packer states that the flesh of swine fed soy beans as a protein supplement is inclined to be soft and that not only the meat cannot be cured right, but that the lard will not harden as will the carcass of the animal that has not been fed soy beans.

#### Grain for Lambs

Lambs which have not been marketed should be given some grain after they are weaned in order to get them into good condition for market. The best plan is to provide grain in a creep for the lambs before they are weaned, and then they will be accustomed to eating grain. Lambs handled under this plan will make better gains even though they are on good pasture. The plan avoids a setback at weaning time, and the lambs may be marketed earlier.

#### Men Just as Forgetful

John Early, chief house detective for a large Chicago hotel, says men are as forgetful as women about leaving things in vacated rooms.

#### Nautical Term

"Go by the board," is a nautical expression, meaning to go over the side of a vessel, as in the case of a mast broken off short.

## New Stock of Wall Paper HAS ARRIVED!

These patterns represent some of the niftiest designs for next year and if you can arrange to have your papering done this Fall you may be assured that you have the latest in styles. Priced 8c per double Roll up.

## It's a Good Time to Paint

So why delay that job for another year? Paint protects your buildings from the severe winter weather and adds very much to the appearance. We have the World and Well Known Sherwin-Williams line of paints which we can truthfully say there are no better.

Barn Paint at \$1.50 per gallon requires one gallon of linseed oil to each gallon of paint. Retains its gloss and brilliancy longer than any barn paint on the market.

#### OUR SODA FOUNTAIN

Will continue to furnish the public with the very best and purest drinks obtainable. Ice creams in different flavors at all times.

# Says WILL ROGERS

BEVERLY HILLS.—Well, all I know is just what I read in the papers, or what I "Contact" from hither to thither. I sure did hate missing that big Air Show in Chicago. I think that is becoming to be the one great show we will have. Just think how it will grow in importance when everybody really goes to traveling by air, and its coming all the time. They have some

big 32 passenger ships out here between Los Angeles and Frisco and they are full all the time.

There is really something to see at one of those shows. You take Automobile shows and all you have to do is to go in the show rooms in every town and you see the same thing you can at a show, and they have them so perfected that about all that ever shows up new at a show is some new fangled Cigar lighter, or odd shape door knobs. But at an air show there is hundreds of entirely different models than you had ever seen before. Then to see fellow, like Al Williams, the great Ex-Naval Flyer (who they all say is one of the best in the world) and Jimmy Doolittle who can fly and land blind, only by using instruments and all the dozens of others. Now its a real show.

You know I was reading about the big Military air show they held in England the other day, and they had a battle between an invading army of them, with the other side protecting the city, and with the speed and the altitude that the bombing planes can make now, they found that it was almost impossible to keep them away. That is if they didnt know they was coming. They say there has to be some way of detecting when they are coming so they can go up and be ready for em. As it is now by the time they leave the ground and get to an altitude of 18 and 20 thousand feet why they have already dropped their bombs and gone. They have bombers now that travel 175 miles an hour.

While we were up at Lake Tahoe in the heart of the Sierra Nevada Mountains we would see the mail planes sometimes going over the mountains. They had to get a high altitude to make it, and there is not much chance of landing if the old Put Put goes bluey, and they do that both ways in the night too. I tell you when you get an air mail letter from away out here, you just ought to stop and think what a chance a half dozen fine young men have taken with their lives to get you that letter there one two or

three days earlier. Gosh that's a risky old game over these mountains at night.

Well let's see what other shows we had lately. Out our way for the last few weeks Aimee and Ma McPherson have just about run the spotlight ragged. We can't find out if Aimee really did swing on Ma or not. Then to make the argument better why the "Face histing" entered into it. Ma said Aimee had her face re-upholstered. Aimee said she didnt. Ma said that her (Ma's) nose was broken, Aimee said she broke it putting it in the church's business, and in the meantime the congregation never lost its faith. It was with em, nose or no nose, face or two faced, it didnt matter. And speaking of Ma's why I haven't communed with you since Ma Ferguson was defeated for the nomination, and of course the election, for it was on the Democratic side, and Texas has about been cured of its last election's short sightedness. Democrats are coming back in the fold so fast and praying for forgiveness that it looks like a bargain sale.

Well, this week takes care of pretty much the last of the primaries. This will throw thousands in every State back among the unemployed. Everybody is always asking if women voting has made any real change in our political system. It has. It has just doubled the amount of candidates. The only way we can possibly have more people seeking public pensions is to give the children the vote. We have done it for the wife, let's do it for the kiddies. Children have the same qualification for office the grown-ups have, they are out of work.

The Islam women in Jerusalem have asked their government to take their veils off and allow the bride and bridegroom to see each other before marriage. It won't do 'em any good. We don't use 'em over here, but you would think we did.

A big bootlegger in Seattle on trial spoke of some of the deals pulled off at last year's bootleggers' convention. There is one of these chambers of commerce ought to go out for. The Elks or the Shriners, or the American Bankers wouldn't be in it with that one. Imagine all railroads advertising excursions to the annual bootleggers' convention where they will give away samples.

Get busy, Claremore.  
(© 1930, McNaught Syndicate, Inc.)

## HOW TO LIVE LONGER

By John Clarence Funk, A.M., Sc.D.

Director of Public Health Education,  
State of Pennsylvania

### The Hot Weather Complex

ONLY a limited number of people are in a position to evade the summer's excessive heat. But that fact presents no excuse to become all worked up about it. Blustering complainingly about hot weather does not make it or the blusterer one bit cooler. On the contrary, it will quite likely have just the opposite effect.

A hot weather complex which involves an actively antagonistic attitude toward the heated spell, frequent trips to the thermometer, vigorous fanning and vain desires for cooler climes, is the poorest possible way to fight heat.

It will surprise those who sincerely make the effort to discover that a proper mental attitude toward the super-heated season will go a long way in reducing actual or imagined misery. A daily bath, spare eating of red meats, starchy foods and sweets, the use of cooling drinks, a main diet of vegetables and fruits, and limiting physical activity to the minimum necessity, will also decidedly help the situation. But after all, the most important point is to develop a more tolerant attitude regarding the inevitable.

Torridity is not pleasant. But why make it worse by burning up mentally in the bargain? Kill the heat complex, and see the temperature drop!  
(© 1929, Western Newspaper Union.)

### POINTED PARAGRAPHS

Time is an expert beauty slaughterer.

Barbers and carpenters are both shavers.

The hero of today has no title deed for tomorrow.

Be good and you'll be happy—and probably poor.

Twilight is the bridge that connects day and night.

Culpability is about the only ability some men possess.

The tiller of a ship is different from the tiller of the soil.

The instructor of a swimming school is literally immersed in business.

There is plenty of room at the top for the hair tonic manufacturer.

No matter how bad a thing is you should be glad that it isn't worse.

When a man gets the matrimonial fever he catches it from some woman.

### AS OTHERS THINK

It is so much easier to be prosperous than it is to be civilized.—Dr. Nicholas Murray Butler.

There are many jobs which are dull as long as they are done slackly, but interesting if they are done well.—Dean Inge.

My experience of life does not at all support the proposition that as a man grows older he grows wiser.—Rt. Hon. Augustine Birrell.

I am not eighty years old, I am eighty years young. After this I shall only have a birthday every five years.—Sir Thomas Lipton.

In its true sense science is the one proper positive expression of Christianity that the world has yet seen.—Prof. John MacMurray.

The husbands and wives who still devotedly love one another after twenty years or more of marriage are those who live again in their children.—Mr. J. D. Beresford.

### SHORT CIRCUITS

The race is not always to the state troopers.

Give a man seclusion enough and he'll hang himself.

Higher education fails to give the lowdown on many things.

From the saxophonist's viewpoint, a man is as old as he plays.

The most effective way to kid a woman is to tell her the truth.

When you're married and settled down, dates are forbidden fruit.

For a dumbbell, it's a long time between thinks.—Buffalo Courier-Express.

### WISE PROVERBS

Every man hath his faults.

Small faults let in greater.

In every fault there is folly.

One man's fault is another man's lesson.

By others' faults, wise men correct their own.

Everyone's faults are not written on his forehead.

Forget others' faults by remembering your own.

### Giving Women Their Due

Women certainly do talk faster and more often, but there's nothing to be ashamed of in that. If they talk about worthwhile things it's an ability to be proud of. It is time it received its proper due.—Dr. Paul Winslow.

## Public Sale.

As I am leaving the farm I will sell at my residence on what is known as the Clem Ailer farm located 8 miles northeast of Rochester, 8 miles southwest of Mentone, 1½ miles west of Talma Christian Church, 3 miles east of Tiosa and ¼ mile east of Tiosa Lutheran Church, on

TUESDAY, SEPTEMBER 16

Sale starts at 12 o'clock, the following property, to-wit:

### HORSES

One bay mare, 6 years old, weight 1500, sound; one bay gelding, smooth mouth, weight 1500.

### CATTLE

One purebred Jersey cow, 4 years old, will be fresh in March; one Jersey and Holstein cow, 2 years old will be fresh in February; two spring calves.

### SHEEP

Twelve ewes; one buck

### HOGS.

One Chester White male hog; one Chester White sow and 10 pigs; one Chester White sow and 8 pigs; one Chester White sow and 8 pigs; one Chester White sow, will farrow by day of sale. Part of these are registered and the others are eligible to register.

### FEED

Five tons good mixed hay; four tons timothy hay; three tons more or less, oats straw in barn; 200 bushels big white oats, good for seed 250 shocks, more or less, corn in field.

**Paul Myers.**

Harold Steiner, Auct.

F. R. McCarter, Clerk.

### Briefly Told

A man sooner finds out his own foibles in a stranger than any other foible.

### Dreamers

The young man who simply asserts that he is going to be a railroad president hasn't hitched his wagon to a star. He'll find his wagon jogging along behind a couple of draft horses.—American Magazine.

### Racing Rule

Entries for the Kentucky derby usually close the last of February. Any three-year-old thoroughbred is eligible. There are some stakes where a mare is entered before birth of the foal, but that is not true of the Kentucky derby.

### Stock Exchanges Old

The idea of a stock exchange is an old one, and stock brokers, so called, have existed for many years. In fact, Nelson states that as early as 1285 in England the term "broker" is referred to in an act of parliament.

### Distinct Species of Rats

White rats will not live with brown ones because they are two different species of rat and the brown ones are inclined to be much more vicious than the white ones.

### Limited Liability

The word "limited," after a firm name indicates that the liability of each stockholder is limited to the amount of his stock or shares, or to an amount fixed by a guarantee.

"I think,"

said MRS. MOLLA PROPP,

"that the self-winder is one of our greatest inventions."

**M**Y DEAR, when you call the fire department, you'd better have a FIRE when they come. If anything annoys those men it is being called and not finding a fire.

I know, because it was only yesterday when Henry and I were out riding. All at once I sniffed something, and I told Henry that it was too bad for people to put a glue factory in such a nice neighborhood. And just then we passed a man and he held his nose and looked at us... US, mind you.

Then I saw something. "Look, Henry!" I yelled. "Isn't that smoke coming from those cross-wise things in the lid!"

And sure enough, black smoke was just OOOZING out. "The car's on fire!" Henry shouted.

Copyright, 1930—John Jensen.

"Call the fire department!" "Fire! FIRE!" I yelled and ran to the corner. I was so excited I couldn't read the instructions on the fire box and a man came along and sent in an alarm.

When I came back, there was Henry sitting on the fender, fanning himself with his hat. "Well, the fire's out," he said. "My hero," I cried. "How brave you are!" "Oh, it was nothing—not much anyway," he remarked.

Then the fire wagon came tearing around the corner. I told them that the fire was out and how brave Henry was. The chief looked inside. "Well, my boy," he said, "next time don't leave a pair of old gloves hanging on the exhaust pipe." I thought I'd die; Oh, that man!

#### NOTICE O. E. S. MEMBERS

Monday night, September 15th, we have our first chapter meeting of the fall. There will be a pot-luck supper at 6:30. Bring your own table service and a well filled basket.  
Edna Burns, W. M.

For Sale:—Brooder House 10 x 16 ft., Also 1 brooder stove Inquire of H. L. Poulson. Sept. 17

#### BURIAL OF MR. CREAKBAUM

The funeral service of Lyman Creakbaum was held in the M. E. Church Saturday afternoon, September 6th. He had been in poor health for sometime and passed away at the home of his sister, Mrs. Mack Kesler west of Akron Thursday, September 4th. He was well known in this community having lived here all his life. His age was 59 years 10 months and 12 days. Burial was made in the Mentone cemetery.

#### BEAVER DAM ITEMS

Webster Gray and family spent Sunday at the Jonas Rickel home.

Mrs. Ivan Warren and little daughter Doris are on the sick list.

Simon Crall and family spent Tuesday with Levi Swick and wife at Akron.

Ivan Warren and Homer Clark made a trip to Michigan Sunday in quest of fruit.

Howard Conley and family attended the Brethren Conference at Winona Lake Sunday.

Floyd Study and family and Jeanette Cinninger were Warsaw callers Saturday evening.

Maribel Tucker motored to Michigan Monday and brought home several bushels of peaches.

John Summe and wife and Thomas Rager and wife of Silver Lake were entertained at Amos Summe's Sunday.

Alpheus Study spent several days with his grandson Floyd Study and family and called several old friends and also attended the Akron Fair.

School convened at Beaver Dam on Monday September the 1st. The teachers are as follows: Mrs. Donald Baum 1st and 2nd grade; Miss Lena Swick, 3rd and 4th; Mr. Lloyd Carpenter, 5th and 6th; Mr. Kindy Physical Training; Miss Brannon, Home Economics and Latin; Mr. Williams, Physics and General Science; Mrs. Lloyd Carpenter, English and Mr. Byford Cox, Principal.

#### IF YOU MET WITH A SEVERE ACCIDENT.

Was Laid up in a Hospital or Home Could You Pay Your Expenses for One Cent a Day?

#### IT CAN BE DONE.

Pay us \$3.65 or at the rate of a penny a day for a whole year, and in return should you at any hour of the day or night during the year be riding as a passenger on a railroad train, steam boat, street car, elevated or subway car and by the wrecking of that vehicle you become injured, we will pay you at the rate of \$100 per month for one day of more for a period of a year's time. Should you be killed we will pay to your estate \$5,000.00 and in event you are permanently disabled by the loss of one or more limbs or the sight of an eye or eyes, we will pay you from \$1,500.00 to \$5,000.00 depending upon the extent of your disability.

Suppose you should become injured from the wrecking of your automobile, or while riding in your friend's car. Suppose you are riding in a taxi cab, motor bus, or elevator, and through the wrecking of that vehicle if you should be injured we would pay you at the rate of \$100.00 a month, and if killed your estate would receive \$1,000.00; also for loss of sight, or limbs from \$500.00 to \$1,000.00.

That's Not All—This same indemnity would come to you for injuries received as a result of being struck by lightning, injured in a tornado, by being burned or suffocated by smoke in the burning of a church, school building, theater, store office building or lodge room. Should you drown while bathing at a bathing beach your estate would receive \$1,000.00.

Furthermore—Suppose you were struck, knocked down or run over while walking or standing on a public highway. Suppose you were injured while driving a truck, wagon or buggy, and if you are a farmer, suppose you were injured while operating a threshing, mowing or heading machine, a binder, harrow, plow or tractor, we would pay you for one day or more of disability at the rate of \$50.00 a month; and if killed your estate would draw \$500.00.

This 1c Day Will Also—entitle you to a \$10.00 medical or surgical attention for any of the foregoing injuries that does not totally disable you, and if you are injured in any accident, any place, any time and are laid up for a month you will receive \$25.00.

Applications taken at Farm News Office.

## Poultry Points..

Readers interested in poultry raising will find much of interest and value in the poultry material printed in these columns. It is all from authoritative sources, much of it from the United States Department of Agriculture, and can be relied upon as practical information. You can safely quote it when discussing any phase of poultry raising with your friends and neighbors.

#### First of Long List

The first encyclopedia written in English and with the articles alphabetically arranged was a "Universal English Dictionary of Arts and Sciences," by John Harris, a London clergyman, published in 1704.

#### BAPTIST CHURCH NOTES

Sunday, September 14, 1930

9:30 a. m. Bible School  
10:30 a. m. Morning Worship  
7:30 p. m. Evening Service  
6:30 p. m. B. Y. P. U.  
7:30 p. m. Thursday, Midweek prayer service.

The above is our regular schedule for the Sabbath and week. This week the Ladies Aid will meet at two o'clock this Wednesday afternoon at the church for their September meeting. All the ladies of the church are cordially invited.

Now that vacations are all over let us rally to the services in the house of the Lord. Start next Sunday to be a regular attendant.

V. E. Squibb, Pastor.

#### Spanish City's Distinction

The picturesque streets of Seville, Spain, have formed the background of four well-known operas: "The Marriage of Figaro," "Don Juan," "The Barber of Seville" and "Carmen."

## Sugar-Beet Growers Profit by Research

### Application of Fertilizer In- creases Value of Crop.

(Prepared by the United States Department of Agriculture.)

Application of phosphatic fertilizers to sugar beet fields has increased the annual value of the crop by millions of dollars, members of the National Fertilizer association were told recently by Oswald Schreiner, chief of the division of soil fertility of the United States Department of Agriculture. Comparatively, this is a new practice, and it was introduced into the principal beet-growing states following soil fertility experiments carried on in Colorado and Nebraska by the department.

Since it became evident to the western sugar-beet growers that the application of comparatively small amounts of phosphatic fertilizers would enable them to increase their yields of beets by an average of three tons an acre and thus increase their income by approximately \$18 an acre, the quantity has increased steadily until it is now estimated that phosphates are applied to from 200,000 to 300,000 acres annually. With an increase of three tons to the acre, valued at \$7 per ton, the value of this year's crop will be increased by about \$5,000,000 over what it would have been without the use of fertilizers, said Doctor Schreiner, who estimated the cost of fertilizer at approximately \$700,000.

Doctor Schreiner cited the discovery and demonstration by department specialists of the remarkable response of western sugar beet soils to phosphatic fertilizers as one of numerous examples in which the research work of the department has been of great practical benefit to farming regions of the United States.

### Complicated Ration Is Not Needed for Chicks

Rations for young chicks need not be complicated as long as the essentials for good growth and health are present in the feed. The poultryman can make use of the natural feeds, particularly yellow corn and wheat, to good advantage. By adding minerals and animal protein to these feeds and allowing the chicks to have access to green feed and to be outdoors in direct sunlight, the flock owner should be able to keep his chicks free from nutritional troubles.

Chicks fed on white corn and kept on bare yards are likely to develop a nutritional trouble which resembles rump. Sore eyes, blindness and a pale, unthrifty condition are characteristic symptoms of the disease. If rapid growth and early maturity of pullets is expected, a complete ration should be kept before them throughout the summer.

Methods of feeding should not be overlooked, for they may be quite as important as proper rations. Few people realize, for instance, the danger of disease infection and parasitic

infestation when chickens are allowed to pick up grain from bare ground contaminated with droppings.

### Farm Fish Ponds Will Be Found Profitable

It is estimated by Cornell university experts that with proper stocking and management an acre of farm pond will produce 200 pounds of fish per year without artificial feeding. This is in addition to its value for supplying water for live stock, for cutting ice, for irrigation under special conditions, and for skating, bathing, fishing, and so on. Pond storage of water is practicable under most soil conditions and since most of the cost is for labor, it would seem that more farmers should be interested in them. Information on farm ponds can be secured from the Department of Agriculture, Washington, D. C., and from your agricultural college.

## FARM NOTES

Pigs or chicks raised on clean ground grow fastest and require the least feed per pound of gain.

In agriculture, as in other industries, the margin of profit on each unit produced may narrow as volume increases, yet not adversely affect the total income.

Sudan grass is about the same quality as timothy hay, and is relished to the same degree by live stock. The great advantage of it is that it will make a quick growth the same year.

Small weed patches may be smothered by straw, manure and stack bottoms. Such smothering materials must be kept moist so that decomposition will be active, and they must be deep enough to prevent stems from penetrating through to sunlight.

Summer fallowing is one of the most effective practices for killing weeds. One of its advantages is that it requires practically no outlay of capital, about all that is required being the labor of the farmer and the use of equipment which he already has.

In sprinkling the garden be sure that sufficient water is put on to reach the roots of plants. It takes from two birds to two or three gallons of water to each square foot of ground to make a moderately dry soil enough to compare with the effect of one inch of rainfall.

### Fingerprints

There are 300,000 combinations of ridge characteristics in fingerprints, and from this may be realized the extreme unlikelihood of any two persons being identical. Definite conclusions are usually reached within a few minutes when working with fingerprints. Finally, where the human body may grow or change, the ridge lines of the fingers never do.

## Analyzing ...YOU...

With the New Science of Syllables  
By C. J. COFFMAN  
Dean of All the Enumerators

### Marie

Considered by many to be the most beautiful name, especially favored by the artistic French, you do start off well indeed, Marie.

It is possible that you do not have any idea of your own real abilities. This may be due to the fact that your first syllable, MAR, really indicates "mark" or "disfigure," to "hold back or retard."

But this need only occur when you yourself fail to observe your chances to go ahead.

There is more strength in your gentle hands than people imagine. As a matter of fact a very ancient syllable found in your name, ARI, means "the lion."

So call upon the stronger part of yourself, Marie, even though you may feel doubtful about the outcome. To make yourself go on to success all you need to do is to imagine the enjoyments of living in success.

If you can start this imagination into a direct doing right now you will soon graduate from the day dreamer class into something permanent.

Your mind has a way of radiating that which seems to water and encourage other minds. This is indicated by the syllable RI in your name, adapted from a very ancient rendering in the Hebrew.

Even the I itself means fruitful country.

It is easily possible for you to join the ranks of the famous, even if it is not so easily accomplished. The main attribute here is the ability to keep on keeping on.

Thus did one Marie gain the heights. Just a plain little woman with one tremendous talent—the ability to be everlastingly and painstakingly exact. This is Madame Marie Curie of France, one of the world's greatest scientists.

In lighter fields, but requiring no less of strength and determination, you are the namesake of such as Marie Prevost, Marie Dressler and Marie Tempest, so well known in the dramatic and cinema world. Come now, Marie, another step, another push and who knows the greatness to which you may attain?

(© 1930, Western Newspaper Union.)

### Explaining the Notch

The notch in coat lapels is said to have originated through the rivalry of General Moreau with Napoleon. Moreau's followers having devised it as a secret badge of their partnership.

### M. E. CHURCH NOTICES.

The second and third quarterly Conferences will be combined in a service next Sunday evening September 14th, at 8:30 o'clock.

Dr. U. S. A. Bridge, District Superintendent of the Wabash District will preside and will preach at 7:30. We urge all our people to be present, and invite everyone to both these services. The regular services are as follows:

Sunday School ..... 9:30 a. m.  
Sunday Morning Worship 10:30 a. m.  
Sunday Evening Worship 7:30 p. m.  
Prayer meeting Thursday evening at 7:30. W. O. Power, Pastor.

## SORORITY MEETING.

The Psi Iota Xi Sorority held a business meeting at the home of Miss Artella Kesler Friday evening. Plans for the winter were discussed.

## DEATH RELIEVES SUFFERING OF GRANDMA LATHAM.

Grandma Latham, aged 78 years, who suffered a paralytic stroke about a year ago passed away at her home in Mentone Monday morning at 5 o'clock. The deceased has been bed-fast and helpless for sometime and death was expected at any time. We have been unable to learn of the funeral arrangements at the time of going to press.

## DEATH OF MRS. REOME.

Iva Ile, wife of Corman Reome, aged 49 years, died at the residence of Allen Dillie, Mentone, Saturday, September 6. The deceased has been a sufferer from tubercular trouble for a number of years and her passing was not unexpected.

The funeral was held from the Dillie residence Tuesday at 2 p. m. Rev. Power of the M. E. Church officiating. Burial was made in the Palestine cemetery.

## Advantage for the Dumb

The dumb have one great advantage. They can't realize how dumb they are.—Buffalo Evening News.

Henry Hicks was almost nine,  
And I was half past eight—  
Had a double seat at school,  
And traded hooks and bait.  
Used to say, when we grew up,  
We'd never marry wives—  
Buy a farm and live alone,  
Together all our lives.

Human plans are fickle things  
When taken at their best;  
Hickses sold their farm one day  
To move away out west.  
Spent our last day on the creek  
And at the pasture gate—  
WELL—

'Good-bye's hard for grownup folks—  
—But worse for nine and eight.

Life has brought me many friends  
The wise, the short, the tall;  
Still apices a friendly face  
More precious than them all—  
Just a freckled, friendly face  
That seems to smile and say:  
Farm-made friendship is the best  
And never fades away.

It is very difficult to translate moral rights into terms of cash.—Phillip Snowden.

A young fool is depressing, but an old one is a catastrophe.—Dr. S. Parkes Cadman.

The reason American cities are prosperous is that there is no place to sit down.—Alfred J. Talley.

You can't say civilization don't advance, for in every year they kill you in a new way.—Will Rogers.

If books could stop war we should not have had one for the last thousand years.—George Bernard Shaw.

Some women apply mixtures to their faces that would take paint off an automobile.—Dr. Charles W. Pabst.

Since the beginning of time new ideas have had to meet the antagonism of the old women of both sexes.—Le Baron Cooke.

## FARM STOCK

### SWEET CLOVER IS FINE AS PASTURE

#### Best Legume Crop for All Classes of Stock.

(By J. J. MOXLEY, Extension Live Stock Specialist, Kansas State Agricultural College.)

Sweet clover is the best legume pasture crop for all classes of live stock in Kansas with the exception of alfalfa for hogs, and even for hogs it is a very good substitute for alfalfa. It will carry more stock per acre than any other tame or wild crop grown in Kansas. While there have been in the past few years a few cases of sweet clover bloat, it should not be condemned as a pasture crop on account of an occasional bloat, as any rank succulent pasture such as rye, wheat, or even blue grass will occasionally cause bloating.

When first turning cattle or other stock in on sweet clover it may be well to gradually accustom them to it. If they are being turned in on a rank growth, they should be fed some dry feed first so they will not gorge themselves.

In pasturing the first season's growth, it is advisable to let the plant get a good start of about ten inches. After this it may be pastured down as much as the top growth will permit until frost and even then the excess growth may be grazed off. Pasturing the second season may start as soon as the stock can get a "bite" of it. It is the first pasture crop in the spring, being two or three weeks earlier than native pasture. Sweet clover will furnish two to four times as much grazing per acre as native pasture. It should be grazed heavily enough throughout the season to prevent it from getting coarse and woody. If not grazed close to the ground it will reseed itself and come on again the next year.

### Feeders Favor Silage for Cattle and Sheep

Feeders of beef cattle and sheep have even more reasons to build a silo and feed silage than the dairymen, according to experiment station results in all sections of the country. Yet nearly all dairymen feed silage, while the majority of beef men and sheep men do not.

After summarizing the results of all experimental data available, Prof. F. B. Morrison, director of the New York experiment station, finds that the average ton value of silage for dairy cows is approximately one-third that of good mixed hay, while the per acre yield of silage is four or five times

greater than that of hay. ... cattle, he finds silage worth half as much per ton as clover hay, and for sheep more than half as much.

In an average of 20 trials with two-year-old steers, gain on silage-fed cattle cost \$1.22 cents a hundred less than on steers fed no silage. In these tests, a ton of silage replaced 27 pounds of concentrates and 605 pounds of clover hay.

Professor Morrison, who has long been considered one of the foremost feeding authorities of the country, feels that cattle and sheep feeders, like the dairymen, could get more money for their corn crop and make greater profits on live stock by feeding silage. In one corn belt state, 78 per cent of the members of dairy herd improvement associations own silos as compared to 12 per cent of all the farmers of the state.

#### Live Stock Notes

The loss of the pig crop every spring is considerable and in many cases it is due to anemia.

Feeding of iron salts to the sow does not influence the quality of milk as far as the ability to prevent anemia is concerned.

The use of anti-hog-cholera serum, a method developed by the federal bureau of animal industry, is the only reliable preventive known.

With the cattle market showing a decided preference for lightweight finished cattle there are greater possibilities of profits from raising well bred beef cattle.

It generally takes the best feeders of baby beef cattle from 180 to 200 days to make finished baby beef from heifer calves and 200 to 225 days to make finished baby beef from steer calves.

When hogging down corn it will be profitable to feed the hogs some protein supplement, such as tankage or skimmed milk. The hogs will not require quite as much tankage as they would if they were being fattened in a dry lot.

In the fall of the year the live stock raiser should take an inventory, particularly to determine which animals he will cull out to attend for market. Old animals that have outlived their greatest usefulness as breeders should be disposed of.

#### Territory for Bird.

A sanctuary large enough for 40,000 migratory birds, 40 square miles in area, has been established in Louisiana.

#### The Wearied Ones

It is only those who never think at all, or else who have accustomed themselves to brood invariably on abstract ideas, that ever feel ennuil.—William Hazlitt.

# DAIRY

## PRESENCE OF COW WELL JUSTIFIED

### Continuous Crop Production Reduces Plant Food.

The need for soil building is so great on the average North Carolina farm that the presence of the dairy cow can be justified even though the net profit from her milk or cream be small.

"On any farm where crop production is unsupported by live stock growing, the conservation of soil fertility is a difficult problem," says John A. Arey, dairy extension specialist at the North Carolina State college. "Continuous crop production as practiced in this state reduces the plant food content of the soil and encourages erosion. A good example of this can be found in parts of the Piedmont section where there are thousands of acres of rolling land which are even now so badly washed as to be unfit for farming. The methods of clean culture practiced are largely responsible for this condition. Instead of cultivating such land, much of it could be put to pasture, which would check erosion and at the same time furnish profitable grazing for cows."

Mr. Arey says that it makes little difference as to the cash return from a crop if this is secured at the expense of soil fertility. In the end the farmer loses. Gradually his soil becomes less productive and eventually he will be forced to move to a more fertile farm to secure an income sufficient to maintain his family.

The dairy cow converts large quantities of feeds into milk. Some of these feeds have high plant food value and since only about 20 per cent of this plant food value is lost in the feeding process, there is a gradual accumulation of plant food in the form of manure on every well-managed dairy farm. The good crop yields secured on such farms are ample proof of this statement.

Manure also has a greater value than its chemical analysis would indicate because it is the home of beneficial bacteria and improves the physical condition of the land.

### Value of Corn Silage in Ration Is Proven

The value of corn silage in the ration has been demonstrated in an experiment conducted at the Purdue university agricultural experiment station. A ration containing a moderate amount of silage was compared with a ration containing no silage but double the ordinary amount of hay. The following interesting facts were observed: 1. Milk production de-

creased markedly when the ration without silage was fed. 2. Milk production was practically maintained when silage was included in the ration. 3. Milk and fat were produced more economically when silage made up part of the ration. 4. Body weights of the cows were more uniformly maintained on the ration containing silage.

The cows, therefore, actually demanded silage as a part of the ration, principally because it was a palatable, appetizing, available and succulent feed.

### Size and Development of Heifer for Breeding

Not only the breed, but also the size and development of the dairy heifer must be taken into consideration in determining the age at which to breed. Large heavy breeds, though somewhat slower in maturing, should be bred to freshen at the age of twenty-seven to thirty months, and the matured breeds which are more quickly matured, may be bred to freshen at an age of twenty-four to twenty-seven months. But if a heifer seems to be undersized or underdeveloped, it will be better to delay breeding for a few months in order that a more satisfactory size may be reached by the animal before freshening.

### Digestible Protein in Grain Ration for Cows

The greater the amount of alfalfa or clover hay a cow is fed, the less protein she needs in her grain mixture. Thus, a cow getting no silage but all alfalfa, clover or soy bean hay she will eat, needs only from 12 to 13 per cent of digestible protein in her grain ration. This may be secured in the following mixtures: 200 pounds corn and 100 pounds each of oats, wheat bran and linseed meal; or in 100 pounds each of corn, oats and wheat bran and 150 pounds of gluten feed.

### Calves on Grass

Some farmers make the mistake of turning young calves, those under six months old, on pasture, expecting them to get most, if not all, of their feed from grass alone. The most successful dairymen, those who have well grown heifers for herd replacements, continue their calves on grain, skim milk, and hay until they are well on to nine months old before they depend entirely on pasture to supply all the feed. This plan saves the needed pasture.

### British Royal Emblem

The present English crown was made for Queen Victoria in 1838. The materials for it were obtained from the crowns of bygone British rulers.

### About Ourselves

While it is illuminating to see how environment molds men, it is absolutely essential that men regard themselves as molders of their environment.

## A Rich Background —OF— EXPERIENCE

For nearly 40 years this bank has conducted a sound, conservative, successful banking institution.

This is why we enjoy the confidence and patronage of a large circle of friends who have found it profitable to be connected with a bank rich in experience and offering a distinctive service.

## Farmers Who Are Interested in Better Eggs and Who Are Interested Enough to Help Themselves as Well as Us.

It goes without saying, that we have done more for the farmers in the way of egg price than any other buyer in Indiana, and have done more hard work to try to get a "Mark" on Indiana eggs than any other firm in New York City. We are working our heads off now trying to help you get more for eggs. Now, won't you please listen and try to follow our advice. We are not hoggish and don't ask all of this simply for our own benefit, but what helps us, sure will help you.

Now please try and adhere to the following advice for one year and see the results:

Get a good strain of straight blood poultry that lays a good sized egg (either white or deep brown) there is no difference in price now, and the general average price is about the same for equal quality eggs (size and cleanliness considered.)

Pick up your eggs every morning and evening, and carry a damp cloth with you, cleaning all traces of dirt off before it hardens and sticks to the shell.

## DON'T WASH THEM,

But simply wipe them with a damp cloth and don't leave them streaked with dirt but clean them. Keep them in the coolest place about the house never allowing rain nor sun to touch them.

Use all ill-shaped eggs at home because they are broken in shipping. Market your eggs at equal intervals twice each week—that is, we would like to have them each Monday and Thursday or each Tuesday and Friday, rain or shine.

Keep every egg that you are not sure of being strictly fresh at home or ship them separately, as we don't want to spoil a case of nice eggs with a few of doubtful character, and you can't afford to sell such eggs, as it hurts you as bad as it does us, for we have to buy eggs on a basis of what we get for them, and if you slip in a few bad eggs on us, it only hurts our sales, and causes us to have to lower our price, so you see the fresher we get the eggs the more we get, and the more we can pay you. Never keep roosters with your hens after June 1.

Watch the size of your eggs and when they begin to run small, then feed them some good laying mash with a little Cod-liver oil in it or some soaked oats with a little Cod-liver oil in it or anything to keep the egg size up to not less than 23 ounces per dozen or over.

Now please try and follow this advice and let's work together and put our eggs in a class with California, Washington and Utah. The Pacific coast states ship eggs to New York City, and get from 3 to 10 cents more than your eggs bring, and it is because they ship fresh, clean, good-sized eggs graded up to a standard, which you can do if you will work as they work. Now if you will work as hard as we are, trying to put good eggs on the map, then we will show the market that Indiana has just as good eggs as any state in the union. We will do our best and now it's up to you who sell us eggs, to work as hard as we do.

Yours for Better Eggs.

**Quality Butter & Egg Company**

# POULTRY

## HENHOUSES LEFT IDLE KILLS LICE

### When Fowls Are Removed Pests Do Not Survive.

Under ordinary temperatures a louse will not live more than a week removed from a bird, so if louse-free chickens are to be placed in a henhouse previously occupied by other poultry, it is necessary only to clean the house a week or so in advance, according to F. H. Wilson of the department of entomology of the New York state college of agriculture. Incubator-hatched chicks can be reared louse free quite easily if they are isolated from other chickens, he says.

To rid birds of lice the sodium fluoride treatment is recommended. Pinches of this material distributed among the feathers is the usual procedure. It is a rather irritating substance so precautions should be taken to prevent its getting into the eyes or widely distributed over one's skin. Mr. Wilson warns. If the bird is dusted over a paper, the dust which does not stay on the bird can be saved and used again.

A new method to kill lice suggested by the makers of nicotine sulphate is to paint the upper surfaces of the roosts with the sulphate, undiluted. It is thought that the fumes from this material rising among the feathers of the roosting chickens will kill the lice and cause them to drop off.

To merely clean the henhouse and leave it a few days will not kill red mites, however. These are small reddish colored creatures that live in cracks and crevices and crawl over the birds at night to feed, and then they return to hide during the day. Painting or spraying the roosts with kerosene or a properly diluted solution of nicotine sulphate usually eliminates the mites.

### Weed Out Boarders and Save High-Priced Feed

Weed out boarders that cost thousands in feed. Failure to weed out and sell the unprofitable hens during the summer costs poultrymen thousands of dollars each year. Profit that could be realized from the laying hens is used to feed those boarder hens that eat high priced feed without producing any eggs. This loss can easily be stopped by culling the flock about once each month during the summer. Culling at regular intervals makes it possible to remove from the flock of unprofitable hens shortly after they cease production.

### Cod Liver Oil Helps Build-Up Ailing Hens

Adequate roosting room is essential to the proper development of chicks on range. Chicks that are crowded at night are overheated and weakened. From four to six inches of roost space should be allowed for each bird. If there are too many birds for the size of the colony houses, summer shelters should be built. A summer shelter consists of a roof, sides and door covered with wire and with roosts on the inside running from end to end.

### Poultry Facts

Pullets thrive better if separated from the cockerels soon after sex can be distinguished.

Leghorn chicks will usually start roosting on low flat roosts in two or three weeks while the heavy breeds still prefer to stay on the floor at that age.

A board or concrete floor, either is suitable for a poultry house. Concrete has the advantage of not warping and being more easily cleaned than a board floor.

Careful market men no longer buy thin, sickly birds. Since the grower has been responsible for the condition of the fowls, it is only fair that he should stand the loss.

The only difference between white and dark eggs is the color of the shell. The insides are exactly the same.

Hens are rarely profitable layers after two or three laying seasons. Production drops sharply after the second or third years.

The best treatment for sick turkeys is the ax. Ordinarily there is little that can be done after turkeys become affected and run down physically.

Training turkeys to roost while they are quite young helps avoid crowding in the brooders and may save many poults from being crushed or smothered. Laths tacked on four-inch blocks make good perches for the small turkeys.

To control red mites, paint the wood with some strong, oily penetrating material. Carbolineum, creosote, crude carbolic acid and kerosene mixed in equal parts; whitewash; waste crank case oil; and lime sulphur are all recommended.

**Trees Glow, Warn Autoists**  
To prevent accidents, such as have caused injuries to many autoists along tree-lined roads of the Rhine region, German officials paint the trees with a band of phosphorescent paint. At night the trunks glow so that drivers may see them far enough away to avoid swerving into them.

## KONJOLA SOON BRINGS HEALTH TO MUNCIE MAN

Liver And Kidney Ailments  
Quickly Yield To Power  
Of New Medicine Win-  
ning Eager Praise.

MR. OLIVER CHAPMAN.

"About two years ago I had yellow jaundice and this left me in poor health," said Mr. Oliver Chapman, 1207 First street, Muncie. "My liver and kidneys were weak, bladder actions were frequent and I had dull pains across the small of my back. My appetite was very poor and I felt tired and sleepy after the days work. I became extremely nervous and very irritable and could not sleep well at night. I became worse as the weeks went by.

"It was not long after I began taking Konjola that I began to note a real improvement in my health. At the end of two weeks I began to feel like another person. My complexion cleared up, my appetite increased and I began to take on strength and energy. I now sleep well at night, my liver and kidneys are no longer sluggish and bladder actions are normal. I shall continue to take Konjola for it is the very medicine my system needed."

Although Konjola often works quickly, six to eight bottles are recommended as a fair trial in most cases. No medicine should be expected to banish ailments of years standing within a week or so.

Konjola is sold in Mentone Ind., at Shafer & Goodwin drug store, and by all the best druggists in all towns throughout this entire section.

## JUST THINKIN'

by Charles S. Kinnison

### Regarding Sunday Dinner

Why is it we gorge like a beast,  
Almost, when we need food the least?  
For instance, on Sunday we stuff  
As though we could not get enough,  
Tho that is one day of them all  
The portions we eat should be small—  
We loaf, like an old lazy dog,  
But eat like an over-fed hog!

So here's a suggestion from me,  
To which Wife Dear will agree:  
Cut down on the big Sunday spread,  
And try just a luncheon, instead.  
I'd say this was merely her due—  
For she needs to rest, same as you.  
So cut down that big Sunday meal  
And see how much better you feel.

Postscript:  
But don't expect me, I beseech,  
To practice this thing that I preach!  
(© 1930, Western Newspaper Union.)

### ARE WE GETTING THE TRADE THAT OUR TOWN IS ENTITLED TO?

With farm products being marketed from Mentone with an average value of more than \$25,000.00 for every week in the year, this town should be one of the most prosperous trading points in the state. And if our merchants are not getting their full share of the trade that this vast amount of money is sure to create, it is time that they give the matter consideration, locate the trouble and place their merchandising methods in such a shape so that they will get at least 50 percent of this steady flow of money.

There is no reason why a merchant in Mentone cannot sell

goods just as cheap, if not cheaper, than any merchant in the neighboring cities. And they should bear in mind that the day is past when the patriotic appeal has any effect upon the average buyer—he goes where he can get the best goods, service and most attractive prices, and as he takes a number of daily and county papers you may rest assured that he is familiar with the prices quoted in neighboring cities and towns.

However the merchant should not stop at the giving of high quality goods, service and attractive prices—he should tell the people about it in a truthful way—Advertise continuously.

Have you ever noticed that the largest advertisers are the most successful business men? Well it is a fact, as anyone can see by studying the matter. Towns in which the business men advertise most generally have the biggest and most satisfactory trade. When the business men of a community complain that the people go to other towns to trade, it is usually because the business men of the other communities have advertised more attractive and extensively, thus giving the people an idea that their goods, service and prices are better than can be had by the customers in his home town. This is the age of the auto, when the distance to the neighboring city or town is measured by minutes instead of miles, and any bunch of merchants who wish to prosper must meet any and all competition.

The fact that a merchant is located in a small town is no reason that he should not do a large volume of business. There are many out-standing stores in the United States located in small towns that do an annual business that make some of the city stores look like thirty cents. A few of these stores are Garver Bros., Strassburg, Ohio, 1000 population, that does an annual business of a million dollars; the Outlaw concern at Winner, S. Dak., 3000 population sells \$865,000.00 worth of goods a year; a department store at Lynden, Wash., 1250 population does \$750,000.00 annually. You say "How do they do it." They do it through the same business policies and methods that have won success for retailers in the largest cities in America. They keep a good stock, give their customers real service, and they advertise consistently in their local paper every issue.

### ADVERSITY AS A BLESSING

By REV. DR. J. P. McCOMAS, New York (Episcopal).

These are the days of depression and hope of recovery in business, and, in a measure, in political and social life. A year ago our people were snared with success, but now we are learning the uses of adversity and we must recognize it as one of God's dealings with men, sent in love and wisdom. When God sends success, and we accept it as from Him, and value the Giver above what is given, using it as a trust, then it is not to be feared.

In 1898 and in 1918 most men boasted "we won the war" and forgot to sing Te Deum. Now we can be thankful for partial recovery, and that we are aware of the ambush and the snare. Let it be a summons to new adventure and unselfish service.

# DORAN STATION ITEMS

## (Leave Items at Black's Store)

Mr. O. F. Miller who has been ill remains about the same.

Mrs. Harry Meredith and son were shoppers in Mentone Thursday.

Mrs. Mars Tucker has been on the sick list, but is reported better now.

Miss Edith Heighway is spending the week in South Bend with friends.

# A NEW ARRIVAL.

A daughter was born to Mr. and Mrs. Arlo Freisner of this village at their home on Thursday of last week. Add another figure to the population of Mentone.

# A REAL SURPRISE.

The announcement on last Wednesday of the marriage of M. Roy Rush, the popular manager of the Mentone Egg Producers, to Miss Olive Drudge, of near Rochester, was indeed a surprise to all the friends of the contracting parties.

They were married Wednesday of last week at 3:30 p. m. at the Christian Church parsonage at Warsaw, Rev. Albert Millican, officiating. The single ring ceremony was employed, and the couple were attended by Miss Frances Rush, niece of the groom, and Mr. Jack Prisch, both of Mentone.

The newly weds immediately left for an extended trip through the east and will be at home to their friends after October 1, on a farm near Mentone. Both of the young people are well known to our readers who join with us in wishing Mr. and Mrs. M. Roy Rush a happy and prosperous journey through life.

# DEATH OF F. O. BABCOCK.

Frederick G. Babcock, 49, expired at 5 o'clock Friday morning at his home in Mentone following a serious illness of the past three months with asthma and complications. Mr. Babcock, with his wife and daughter moved to Mentone four months ago from Gary, Ind., where he was manager of a large clothing store. He was a member of the Elk's lodge in Gary, and of the K. of P. lodge in Rochester.

Surviving relatives are, his wife; one daughter, Virginia Babcock, at home, one brother, Charles Babcock of Indianapolis. Funeral and burial services were held at Rochester Sunday.

# W. C. T. U. MEETING.

The Mentone W. C. T. U. met with Mrs. Silas Meredith Sept. 9. Meeting was called to order by Pres. Opening song, Lead On King Eternal Prayers by Mrs. Allen Blue, Mrs. Haimbaugh and Mrs. Norris. Song, O Womanhood Arise.

Following officers elected for the coming year were: Pres. Mrs. Russell Norris, Vice Pres., Mrs. Bess Manwaring. Sec'y., Mrs. Emma Lash; Treas. Mrs. Broda Clark. Prayer by Rev. Squibb. M. B.

### Last Week's News Reviewed by A Stranger in the Windy City

Chicagoan is glad to hear from  
readers on matters of general  
interest to the community. Let-  
ters sent to the above address  
will receive prompt attention.

Chicago, Ill., Sept. 15.—Who is the greatest man in the Mentone Community? Is he a lawyer, a merchant, a doctor, a farmer or a minister? Or is he a member of none of these professions, but one whose life along some other lines has made him great. There is one man in your midst who, above all others, is entitled to fame. Who is he?

I am asking my readers of The Farm News and other papers the above question. Name the greatest man in your community, and write me a short letter telling why you think him great. For the best letters I receive that are mailed before midnight October 31, I will pay a total of \$25 as follows:

For The Best Letter .....\$10  
Second Best Letter ..... 5  
Ten Next Best Letters, each ...1

Let's go! You can write about anybody but the editor and others directly connected with this newspaper. We all know they're great, but you understand why they must be ruled out in this instance. Sign your name to the letter, but it need not be published unless you so desire. I'll be waiting for your letter and you may get the \$10.

When Editor Krathwohl went to the Akron fair, it seemed as though all our correspondents also took the week off, but last week's paper shows that they wrote their news all right but that it did not reach the Farm News office in time for publication in the intended issue. No doubt, some of the correspondents had their news in the pockets or purses during the fair and intended handing the letter to the editor. But he was so interested in the sights that the writers did not have the heart to bother him. Then, of course, there's another explanation. You see there

was a holiday that week, and Uncle Sam's mail carriers had a day to themselves. That may have delayed the delivery of the news-letters.

Well, the fairs will soon be over, and there are no more holidays until Thanksgiving Day, so for a month or two, we are going to run along without interruptions.

Death is always sad, but it is almost unexplainable at times. When such young lives as that of Earl Barr of Talma, are nipped in the bud we realize how little we understand the plan on which the great universe is conducted.

This is auction sale time, and Paul Myers who held a sale on his farm eight miles southwest of Mentone Tuesday, realized that a successful sale depends on having the right kind of attendance. Therefore, he advertised in The Farm News. Did you ever stop to think that if an ad brought only three extra people to an auction sale, and if those three people made only a few bids of a dollar a piece, that the ad would have paid for itself several times?

#### EILER—CREIGHTON

On Sunday Sept. 14, 1930 at 2:00 p. m. at the United Brethern Church at Atwood Ind., in the presence of about seventy-five relatives and friends was solemnized, the wedding of Miss Marjorie Creighton, daughter of W. H. Creighton of Atwood and Leonard Eiler, son of Mr. and Mrs. C. O. Eiler of north of Mentone Ind., with Rev. V. E. Squibb of Mentone officiating.

Mr. Eiler who has been employed at Creighton Bros., Poultry Farm near Atwood, has accepted a position as operating manager of a large poultry farm known as the "Redmon Poultry Ranch" near Milford, owned by W. C. Redmon, of Peru; and Redmon Park, for which place they left on Monday morning, where they are at home to all their many friends.

#### ASKED TO DISPLAY SAMPLES OF THEIR BROODER HOUSES.

The lady in charge of the Poultry Department of the Cass County Fair at Logansport, called up the Mentone Lumber Co., the latter part of last week and insisted that they send over a square and round type of the brooder houses that they manufacture for display at their fair being held this week. The brooder houses being manufactured by this concern are meeting with great favor by the poultrymen and this request for a display is indeed a compliment for their product.

## New Stock of Wall Paper HAS ARRIVED!

These patterns represent some of the niftiest designs for next year and if you can arrange to have your papering done this Fall you may be assured that you have the latest in styles. Priced 8c per double Roll up.

## It's a Good Time to Paint

So why delay that job for another year? Paint protects your buildings from the severe winter weather and adds very much to the appearance. We have the World and Well Known Sherwin-Williams line of paints which we can truthfully say there are no better.

Barn Paint at \$1.50 per gallon requires one gallon of linseed oil to each gallon of paint. Retains its gloss and brilliancy longer than any barn paint on the market.

#### OUR SODA FOUNTAIN

Will continue to furnish the public with the very best and purest drinks obtainable. Ice creams in different flavors at all times.

# POULTRY FACTS

## DIVERS CULLINGS IMPROVES FLOCK

### A Regular System May Be Used to Secure Layers.

Cull the poultry flock a little at a time, along through the season as the hens stop laying and have a better paying and less expensive flock.

This is the advice of W. F. Armstrong, poultry worker at the North Carolina state college. He says the plan is better than culling the entire flock at one time during late summer or fall and forgetting about it until next season.

"By culling at intervals of two or three weeks after spring egg production begins to drop, much feed is saved," says Mr. Armstrong. "This system is simple and does not require an expert. When out of laying, the hen shows a narrow measurement between the pelvic bones and between these bones and the breast bone. The vent is small and yellow and the abdomen is hard. This is enough to look for in this plan, except that the unusually fat birds may be culled at any time."

Another advantage in culling as the hens quit laying is in the better price received for the culls. Prices for poultry is always lowest in late summer and fall. By selling the cull birds as they go out of laying a better price and market is secured, says Mr. Armstrong.

Late in the summer or early fall, the regular culling system may be used to select next year's layers and breeders. Early molting hens are always the poorest layers.

Quit culling, he advises, when the flock is down to the number wanted for the next season. Do not confuse culling with selecting the breeding birds for next season. The pullets developing quickly and the quick-growing, energetic cockerels will always make the best breeding stock if the performance of their parent birds is known.

### Feed Milk to Increase Size of Pullet Eggs

One of the problems connected with worms in poultry is building up health and vigor and condition after the worms have been removed by the proper drug. Prof. J. J. Halpin, of the University of Wisconsin, makes a recommendation in regard to the use of cod liver oil that appears sound and worth trying, to the extent of making 2 or 3 per cent of the mash cod liver oil. Professor Halpin says: "Some of our correspondents have had trouble with worms in their flocks; after they fed cod liver oil, they found

the trouble from worms practically disappeared. I wouldn't recommend cod liver oil as a treatment for worms, but I think cod liver oil will undoubtedly prove of benefit in any flock where resistance is lowered, due to cold, worms, or anything of the sort. Naturally, the more practical thing to do is to give a good worm remedy, and then use cod liver oil to help build up the flock."

### Water Is Big Source of Infection to Poultry

The quality of the water for poultry should be determined by cleanliness and freedom from possible infection. Cleanliness can be taken care of by rinsing the container daily, or more often, if necessary. The water can be kept much cleaner. If it is elevated from the floor to a point where litter cannot be scratched into it.

Quality of water as a source of infection can be taken care of by giving water from a well or the water supply which is used in the home. It is dangerous to dip water from streams or stagnant pools. One can never tell where such water comes from and what diseases it carries. A bird may have died of some contagious disease and have dropped into this stream or stagnant pool causing an infection which when carried to the poultry house may mean disaster to the flock.

### Early Fall Layers

Some people have objected to the early layers in the fall, as they will often molt in the early part of the winter and thereby shuck up in egg production. On the other hand, when such birds do go into the molt, they will again start laying in the early part of the year and the eggs will be especially suitable for hatching purposes, as the birds will be better matured. In fact, many hatcheries prefer eggs from this age of pullets for hatching purposes.

### Important Task

Probably the most important job for the poultrymen at this season of the year is that of getting the young pullets into winter quarters. Providing warm, dry, draft-free houses with sanitary equipment is one part of the problem. Culling out the late hatched, poorly developed pullets is another reasonable job. The removal of the undeveloped pullets will give the thrifty birds more room in the house, save feed, and tend to prevent disease epidemics.

### Way of the World

Buy provisions from a man for a year, or ten years, and he remains an impersonal institution known as a grocer; ask him for an empty packing box and he becomes your personal friend.

### Have to Be Linguists

Latvia, the largest of the Baltic republics, is a nation of linguists because of its proximity to countries speaking widely different languages.

"I suppose,"

said MRS. MOLLA PROPP,

"that the differential has some use or they wouldn't put it on the engine."

THE Georges moved last week up on the hill. I told Gertrude not to trust her glassware to the MOVIE MEN and I would take it up in my car.

Well, there she was, sitting in the back seat with a lamp shade on her head, the seat full of dishes, three heirlooms in her hands that she said came over to Boston in the Constitution. She's always bragging about her Puritan ancestors, but if they drank out of those things they couldn't have been so much.

Anyway, just as I turned the corner I bumped the rear end of a truck. I couldn't help it... I blew my horn, didn't I? You should have seen Gertrude. She went forward and the lamp shade hit the ceiling and then slopped down over her ears.

Maybe I shouldn't have started

Copyright, 1930—John Jensen.

up so suddenly after the stop, but I did, and Gertrude went back into the rear seat on top of a stack of dishes.

Then I realized that I had started too quickly, so I stepped on the brake just as fast as I could and Gertrude came sailing over the front seat again.

"Let me out," she gasped. I opened the door and she stalked away with the lamp shade still on her head and her three precious relics in her hand.

Then I found out that in her jumping back and forth she had broken all the dishes in the car. I suppose she blames me for that. They say she stayed in bed with her nerves for a week.

Never again, my dear, will I help neighbors move. They just don't appreciate what you do for them.

#### Mankind's Failings

We are so presumptuous that we wish to be known to all the world, even to those who come after us; and we are so vain that the esteem of five or six persons immediately around us is sufficient to arouse and satisfy us.—Pascal.

#### Feline Beasts of Prey

There are at least 50 species of the cat family widely distributed throughout the world. They embrace the most powerful living beasts of prey, including the lion, tiger, leopard, ounce, jaguar, puma and cheetah, as well as lynxes, wildcats and other small carnivores.

#### Speaking of Sermons

A young fellow from Fargo who should have known better than ask the question, inquires "if there are many women preachers in the United States?" "Millions," sighed the Tribune editor, gazing at his wife's picture on the desk. "Millions, my boy; and they're not all in the pulpits either."

#### May Be Cotton Substitute

"Kendye" is an Asiatic plant which, it is claimed, produces a fiber which can be used as a substitute for cotton.

#### No End of Trouble

Correct one trouble and you cause another. Eliminate inferior people and the superior would have nobody to afford the contrast that keeps them satisfied.—San Francisco Chronicle.

#### Purgatory Waits

Disgruntled Daniel—"You can't see me tomorrow because you're going to a lecture at the Philatelic society; last night you went to that debate on capital punishment; dash it, Egbert, you're always off making whoopee somewhere!"—London Opinion.

#### Catnip Tea

Catnip is a synonym for catmint. Catmint is an aromatic herb of the mint family of which cats are fond, and which is used as a domestic remedy, being slightly stimulant and tonic. Catnip tea is simply made by steeping catmint leaves in water.

#### COUNTY AID SUPPORTS AUTO.

A subscriber informs us that he knows of a case in this vicinity where a party who is drawing aid from the poor fund supports and operates an automobile.

If this is a fact we think that it is the duty of the official making this allowance to see that the charge either disposes of the auto, or that he, the official cut off the poor allowance. The chances are that the auto in question is an old worthless machine and the money required to keep it in repair and gas would more than support the party that is now receiving aid, and if this party would devote the time now consumed in riding around to some gainful occupation, said charge would accumulate a bank account.

While we believe in taking care of the poor in a proper manner we think that when they use their money on an automobile it is about time to call a halt. We know of a number of people in this town that pay considerable taxes and work every day who do not feel that they can support a car—and the editor is one of them.

#### FAMILY REUNION.

The second annual reunion of the Stephenson family will be held at Cripple Gates, Tippecanoe Lake, Sunday September 21. Stanley S. Boggs, Secretary.

Wanted:—Day old calf or will sell fresh cow. Would buy small flock of breeding ewes. Fred Busenburg.

#### Indians' Ancestors

The origin of the North American Indians is a question on which authorities are unable to agree. Some hold that the American Indian is indigenous, others that he was distinctly Asiatic in origin, while still others contend that Australia and the South Sea Islands were the base from which the aboriginal Indians pushed off for America.

# CLARK'S

## HOW TO LIVE LONGER

By John Clarence Funk, A.M., Sc.D.

Director of Public Health Education,  
State of Pennsylvania

### Anger!

THERE are many other ways of exhausting one's nervous and physical energy than through hard work or a habitual disregard for the fundamental living habits. And anger is very prominently one of them.

For example, the other day a petty argument arose on a golf course. One of the participants in the controversy permitted his feelings to get the better of him. He consequently fussed and fumed—and then dropped dead.

An extreme instance, of course. However, one has but to look among his own acquaintances to realize that the man or woman who is constantly fretting or easily angered is burning up precious nervous energy. Moreover, many of them cannot afford to burn it up this way.

Temperaments differ, certainly. And it must be admitted that some people are more naturally given to emotional upsets than are others. For them the problem is doubly hard. But as a general proposition, the person who is enjoying a maximum of physical health is less likely to become the victim of habitually unrestrained emotions of any kind than is the person who through excesses or improper habits of living is the possessor of a sick or half-sick body.

It is a well-established fact that the mind and the body are so closely related that their effects act reciprocally. And if the body is in first-class condition, is maintained there and is not subjected to any unnatural stimulants, stress or strains, the likelihood of serious habitual emotional outbursts can be very much reduced, barring actual mental crises.

It follows that if you are constantly giving way to anger you are unfortunate and may even make yourself ill. It can kill you eventually.

Fortified with healthy recreations, proper amounts and kinds of food, sufficient sleep and plenty of fresh air, one cannot but help live more rationally. And in this manner, explosive anger, which is enemy to health and happiness, may lose its power to hurt you and others. Kill habitual anger by being one hundred per cent alive.

(© 1929, Western Newspaper Union.)

### BEGIN WORK ON MONDAY.

Work began in earnest on the new school building Monday. Material is being delivered and a force of men are now at work on the preparatory work of our new temple of learning. It is intended to rush the building to completion as fast as the weather will permit.

Mr. and Mrs. Logan VanDoran and daughter Helen spent Sunday with Mr. and Mrs. Adam Bowen.

Mr. and Mrs. Harry Long and children of Muncie were guests of Mr. and Mrs. Allen Long over Sunday.

Mr. and Mrs. George Myers and daughter Mary Ellen spent Sunday with Mr. and Mrs. George Stockberger.

Mrs. Clara Gates and sons moved last week from the farm to Mentone and have rented the Minnie Blue property.

Mr. and Mrs. A. A. Johnson and Charles Lenberg of Chicago spent the week end with Mr and Mrs. A. H. Stanford.

Mr. and Mrs. Earl Rush of Detroit Michigan are spending this week with Mr. and Mrs. Bert Rush and other relatives.

Mr. and Mrs. Clair Ellis and daughter of Athens visited her grandparents, Mr. and Mrs. George Arnsberger over Sunday.

Mr. and Mrs. Simion Paxton, Mrs. Huldah Hatfield and Mrs. Date Paxton of Warsaw were Sunday guests of Mr. and Mrs. H. Paxton.

Mr. and Mrs. Joe Warren, Mr. and Mrs. Dan Shoemaker, Mr. and Mrs. Miller and Robert Walters of New Pairs spent Sunday with Mr. and Mrs. Lloyd Shoemaker.

Mr. and Mrs. M. M. Latimer of Burket and Mr. and Mrs. L. L. Latimer of Mentone attended the Golden Wedding of Mr. and Mrs. R. P. Smith at Warsaw Sunday.

Guests at the Fred Busenburg home Sunday evening were, Mr. and Mrs. Frank Mickey, Mr. and Mrs. Floyd Chrisman and daughter, Mr. and Mrs. Geo. Riddle, Mr. and Mrs. Norman Stoner and son of Rochester Howard Stoner of Annapolis and Mr. and Mrs. Howard Severns.

Olin Johnson and wife of Portland Indiana, visited Mr. and Mrs. Joshua Garwood over the week end. Mr. Johnson is a cousin of Mr. Garwood. Mr. Johnson has been a mail carrier for twenty years.

### MENTONE THEATRE NO MORE.

Monday workman began removing the elevated floor and putting began the elevated floor and putting in the plate glass front in the Rynearson building which has been used as a moving picture theatre for the past several years. The theatre has never proven to be a paying proposition, and the chances are that our village will not have another play house for some time. We understand that the Borton Cream Station will occupy the room as soon as it is in readiness.

### TRACTOR ENGINE BURNS.

Wednesday night last week about 8:30 o'clock the engine belonging to the Blue threshing ring caught fire and burned to such an extent that it was almost a complete loss. It was a very unusual fire and it is difficult to say just what was the cause of the same. It is evident that the engine had not been wiped off in some time and the accumulation of grease and dust was what gave the fire fuel to work on. The Mentone fire boys were called but were unable to render much assistance.

### HOME ECONOMICS CLUB

#### TO ATTEND MEETING.

The leaders of the Mentone Home Economics Club will attend a Leaders meeting at Warsaw on Thursday Sept., 18th. A called meeting of the local club will be held at the home of Mrs. Emma Lash on Friday Sept., 19. The leaders will give the lesson and plans for future meetings will be discussed.

All members are requested to be ready for roll call as nearly 7 o'clock as possible.

## THE ALARM CLOCK

BY A. J. DUNLAR

They say a king has lots of grief  
In keeping things O.K. —  
Stays up all night 'to think things out,'  
When he should 'hit the hay.'  
Out on the farm, a restful sleep  
Was ours the whole night through;  
We never had to stay awake  
To fret and fuss and stew.

The only trouble that we had  
Was when the old alarm  
Disturbed at dawn our peaceful sleep  
That blessed us on the farm.  
Then, how we longed to shut it off;  
To still its clanging call  
And drift back to the Land of Dreams —  
Our faces to the wall.

But well we knew that Nature moved  
With sure and silent power;  
That in the corn the hungry weeds  
Were growing hour by hour;  
And so we let the old clock rave.  
We worked all day and then  
At bedtime took the old clock down  
And wound it up again.

THE OLD FARM SERIES

### A VERY SAD ACCIDENT.

Saturday of last week fifteen school boys of Warsaw, composing a hazing party, met with an accident that caused the death of Floyd Bibler, age 15, and injured four others.

The whole bunch were piled on one automobile; the hood, fenders and running board all being loaded, and while probably running at a high rate of speed and not paying any too much attention to the driving the driver lost control of the machine, with the result that it run into a telephone pole with the above accident.

This accident should serve as a lesson to some of our home school boys who have been in the habit of performing the same kind of pranks with an automobile.

### MENTONE NEWS ITEMS.

Olin Johnson and wife of Portland Indiana, visited Mr. and Mrs. Joshua Garwood over the week end. Mr. Johnson is a cousin of Mr. Garwood. Mr. Johnson has been a mail carrier for twenty years.

### Convention Statistics

It is estimated that there are about 15,000 conventions of various kinds in the United States each year. The cost of them approximates \$225,000,000, and about 3,000,000 people are in attendance.

### Sportsman Honored

The Jockey club says that the Withers horse race is named after one of America's great sportsmen, D. D. Withers, as the Belmont, for instance, is named after a famous racing family, and as is the derby of England.

### Leaky Corks

If the cork has been in the bottle for some time and is apt to leak, remove it and place in boiling water. Let it remain there until the water cools. Then return to the bottle and you will find it will be as good as new.

### Monkey Runs Amuck

A ring-tailed monkey recently escaped from his cage in a pet shop on a busy street in a large city and went on an inspired rampage. He released a dozen or so assorted puppies and a manx cat, threw several bowls of goldfish at the puppies and killed some canaries.

### BEAVER DAM ITEMS

Miss Rose Bennet was a Sunday caller at the Simon Crall home.

Samuel Isler and wife were visitors at the Chas. Cinninger home Thursday evening.

Homer Clark and family spent Monday evening at the Clyde O'Hara home in Laketon.

J. W. Swick is erecting a fine new hen house. He expects to try out his luck in the poultry business.

Floyd Study and family were visitors at the Alvi Summe home in Silver Lake Saturday evening.

Quite a number from this vicinity attended the Mrs. Edith Howard sale at Burket Saturday afternoon.

The farmers have been busy threshing clover seed this week. Some fine yields have been reported.

The first Parent-Teachers Meeting of this fall was held Tuesday evening in the Gymnasium at the Beaver Dam School. A fair sized crowd attended.

Mr. and Mrs. Byron Linn and child ren of Mentone, Mr. and Mrs. Ernest Clase, Mr. and Mrs. Olnie Clase and Mr. and Mrs. Harvey McCleary of Warsaw were callers at the Chas. Cinninger home Sunday afternoon.

For Sale:—Ninety Leghorns, one year old. Royce Tucker phone 7-175.

### MENTONE NEWS ITEMS

Mr. and Mrs. Conda Walburn made a business trip to Fort Wayne last Monday.

Miss Irene Giffin and Mr. Dean Aker of Warsaw called on Mr. and Mrs. James Giffin Thursday evening.

Mr. and Mrs. James Giffin spent Saturday and Sunday in Peru visiting at the Harter and Wagoner homes.

Miles Manwaring, son of Mr. and Mrs. Frank Manwaring of Mentone, has been pledged to the Delta Tau Delta fraternity at Indiana University.

### NOTICE.

I can use 2 more butter customers this week. Mrs. Fred Busenburg.

### Pansy an Importation

The commercial pansy of today is a development of a small flower native to Europe, variously named. It is a direct descendant of the heartease of the English gardens and the Johnny Jump-up, and was probably brought to the United States by the earlier settlers.

# LIVE STOCK

## CRUDE OIL WILL ERADICATE MANGE

### Water in Wallow Covered With Heavy Film.

Mange, which has been reported as infesting hogs in several localities, may be treated most effectively by applications of crude petroleum, fuel oil, coal-tar dip or lin-and-sulphur dip, says Dr. R. F. Bourne of the veterinary department of the Colorado Agricultural college.

"The methods used in applying such preparations include dipping, spraying, hand dressing or the use of medicated wallows," Doctor Bourne says.

"Cement wallows which provide for three or four inches of liquid with allowance for a rise in level when the pigs are occupying them, have proved satisfactory in warm weather. Wallows should be charged with water only until the pigs become accustomed to using them. Then, for a day or two, the water may be covered with a heavy film of crude oil. This routine should be repeated as often as necessary to control the disease.

"Wallows should be in a shaded place to avoid the water becoming too warm to be inviting. Spraying with fuel oil or applying it with a garden sprinkling can, in which the openings have been enlarged, often gives relief at less expense.

"Mange in hogs resembles itch or mange in other animals, and is caused by a similar minute mite which lives exclusively upon and within the skin of hogs, although sometimes temporarily affecting other animals and man. The females measure only about one-fiftieth of an inch in length while the males are still smaller.

"The female burrows into the skin and travels for a considerable distance under the surface by excavating a tunnel within which her eggs are deposited. This migration causes intense itching and results in much scratching and rubbing, which together with the direct effects of the invasion, causes loss of hair, thickened, inflamed, and often furrowed and scabby lesions of the skin.

"The condition spreads to other hogs by contact and probably also by infested pens, the mites being able to live away from their host for several weeks. In some cases the progress of the disease is rapid and the effects severe, while in other instances the disease is only mildly irritating and spreads slowly. It is usually most noticeable in unthrifty animals or in those kept in unsanitary, crowded quarters."

## Here's the Fast Way to Pick Your Corn

### The New McCormick-Deering FARMALL Two-Row Picker

The new McCormick-Deering Two-Row Power Corn Picker—built especially for the FARMALL Tractor and operated through the power take-off—provides plenty of power and speed to handle your corn crop. It picks and husks 16 to 18 acres a day . . . enabling two men to pick and husk as much corn in one week as 4 hand-huskers could pick in 4 weeks.

This modern corn picker is easily controlled from the tractor seat. It will enter a field on any two rows and pick them clean without disturbing adjacent

rows. The gatherers raise the down and leaning stalks, chains carry the stalks

back, forcing them against snapping rolls, the ears are quickly snapped, elevated to the husking rolls, and then delivered to the wagon which is hitched directly to the center of the tractor drawbar.

Flexible paddles attached to a revolving beater located above the upper end of the snapping rolls force the trash down through the snapping rolls and discharge it on the ground. This feature is exclusive on McCormick-Deering Corn Pickers.

See us now about the FARMALL Two-Row Picker. We can also give you information on the FARMALL One-Row Picker and the One-Row Tank Picker.

# Says WILL ROGERS

BEVERLY HILLS.—All I know is what I read in the papers. About ten days ago we had quite a mess of news happening.

But here lately it's pretty well bogged down. When those Frenchmen was flying the Ocean, and Lindy was receiving 'em, you know that must have been quite a Novelty. Think of Lindy meeting somebody instead of being met. But he did a mighty gracious

thing, as he always does. When those boys landed he was right there, to give them the glad and of welcome, and it was real too. For he is for anything that is for the good of aviation whether he is the one doing it or not. Yes sir he and Annie was there.

Well those fellows had a right to make that trip. They were real aviators in the first place, and they had made every known preparation, and taken every precaution. The trouble with most of the other trials that have failed, they were by practically unknown Aviators, and they were just taking a chance, and figure in maby they could make it. You see when those Germans come meandering in here by way of the North Pole and way stations (which by the way was a great trip, why that stirred the French. You let a German do something and even if it's wrong the Frenchmen will want to out do him. Now that they have it done, I look to have to put up immigration laws against visiting foreign Aviators. They will be dropping in here so fast that Grover Whalen will have to be shaking hands with both mits.

Mr. Hearst getting thrown out of France was big news away back in the same days the Frenchmen were landing. He went on over to England and they received him with open arms, and even asked him to write something about them. France got sore at something he wrote about 'em, and England with their minds on what could be accomplished by publicity, as they had seen it done by America, they said, "Sure W. R. publish any of our old Treatys you want. We will even write you one to publish, go ahead, write what you want and stay as long as you like." Well anyhow they lost a mighty good spender, when they let him go. Outside of Flo Zeigfeld he does things in a bigger way than any man I ever knew.

Well let's see what else there is in the prints. I thought we was going to have some Farm Relief to report to you by this sabbath day. But the commissions are just gathering data. They

won't take the farmer's word for it that he is poor. They hire men to find out how poor he is. If they took all the money they spend on finding out how he is, and give it to the Farmer he wouldn't need any more relief. But soon as winter comes he will be O. K., soon as snow flies he can kill Rabbits, that will be the biggest relief he has had so far.

Well the elections will be breaking out pretty soon, and a flock of Democrats will replace a mess of Republicans in quite a few districts. It won't mean a thing, they will go in like all the rest of 'em, go in on promises and come out on Alabi's. If the Farmer could harvest his promises he would be sitting pretty.

When Jimmy Gerard said that fifty-seven men run this country everybody thought it was an ad for Heinz pickles, so he had to add Bishop Cannon and Al Capone.

Poor Jimmy. Everybody jumped on his selections—everybody that wasn't mentioned. The Senate was broken-hearted in fact. The funny part about the whole thing is, the ones that are running it don't want their names mentioned—not this year anyway. They are liable to sue Gerard for slander.

Just back from a rodeo over at a great little Western town called Winemucca, Nev. That's a great State. When you feel that the people around you are taking too much care of your private business, why move to Nevada. It's freedom's last stand in America. Yet they don't do one thing that other States don't do.

Only they leave the front door open. You can get a divorce without lying, a drink without whispering and bet on a game of chance without breaking even a promise.

Quit hollering about how poor off we are and look at the real troubles of some of these other birds; down in the Argentine soldiers are guarding their President, Peru just loaded theirs on a battleship and advised him to head for Siberia, Brazil is in a huddle, the Labor Government in England are about to join the unemployed, Hearst has joined Germany, and Brisbane has joined Russia, so it looks like Mexico is about the only one with no trouble at all.

(© 1930, McNaught Syndicate, Inc.)

## Trees Had Tenants

Woodmen cutting down two ancient elms at Lindley Wood, near Nunent-on, England, made two unusual discoveries. In the first tree they cut through a swarm of bees, which were so effective in their protests against being disturbed that the woodmen had to abandon their work. When the second tree was felled a nest of young rabbits was revealed in the stump.

# H. V. JOHNS,

## FUNERAL DIRECTOR

Lady Attendant.

Calls answered Day or Night

PHONE 103, MENTONE.

## Male Brain Heavier

The brain of man is usually heavier than that of woman, although at birth and at the age of fourteen the female brain is heavier. The average weight of the adult male's brain is about 48 ounces and of the female about 43½ ounces. Weight of brains, however, has no direct relationship with intelligence.

"Spot Fyter" for grease and dirt spots. A few drops, a little rubbing, and they are gone. For sale at Clark's Store.

## IF YOU MET WITH A SEVERE ACCIDENT.

Was Laid up in a Hospital or Home Could You Pay Your Expenses for One Cent a Day?

## IT CAN BE DONE.

Pay us \$3.65 or at the rate of a penny a day for a whole year, and in return should you at any hour of the day or night during the year be riding as a passenger on a railroad train, steam boat, street car, elevated or subway car and by the wrecking of that vehicle you become injured, we will pay you at the rate of \$100 per month for one day of more for a period of a year's time. Should you be killed we will pay to your estate \$5,000.00 and in event you are permanently disabled by the loss of one or more limbs or the sight of an eye or eyes, we will pay you from \$1,500.00 to \$5,000.00 depending upon the extent of your disability.

Suppose you should become injured from the wrecking of your automobile, or while riding in your friend's car. Suppose you are riding in a taxi cab, motor bus, or elevator, and through the wrecking of that vehicle if you should be injured we would pay you at the rate of \$100.00 a month, and if killed your estate would receive \$1,000.00; also for loss of sight, or limbs from \$500.00 to \$1,000.00

That's Not All—This same indemnity would come to you for injuries received as a result of being struck by lightning, injured in a tornado, by being burned or suffocated by smoke in the burning of a church, school building, theater, store office building or lodge room. Should you drown while bathing at a bathing beach your estate would receive \$1,000.00.

Furthermore—Suppose you were struck, knocked down or run over while walking or standing on a public highway. Suppose you were injured while driving a truck, wagon or buggy, and if you are a farmer, suppose you were injured while operating a threshing, mowing or heading machine, a binder, harrow, plow or tractor, we would pay you for one day or more of disability at the rate of \$50.00 a month; and if killed your estate would draw \$500.00.

This 1c Day Will Also—entitle you to a \$10.00 medical or surgical attention for any of the fore-going injuries that does not totally disable you, and if you are injured in any accident, any place, any time and are laid up for a month you will receive \$25.00.

A real honest to goodness accident policy that covers the pedestrian as well as the traveler. Just think, all this for only 1c a day.

## AMERICAN BENEFIT LIFE ASSOCIATION

Applications taken at Farm News Office.

## DO NOT TAKE ANY CHANCES

Cleaning clothing with naphtha, gasoline etc., is very dangerous, regardless of the fact of whether you may have any fire around or not. The rubbing of the cloth can ignite the fluid, and the result is a bad burn or possibly death. Play safe use "Spot Fyter" which is non-explosive. It will clean most anything in a jiffy. Costs only 50c per bottle at Clark's Store.

## Farmers Who Are Interested in Better Eggs and Who Are Interested Enough to Help Themselves as Well as Us.

It goes without saying, that we have done more for the farmers in the way of egg price than any other buyer in Indiana, and have done more hard work to try to get a "Mark" on Indiana eggs than any other firm in New York City. We are working our heads off now trying to help you get more for eggs. Now, won't you please listen and try to follow our advice. We are not hoggish and don't ask all of this simply for our own benefit, but what helps us, sure will help you.

Now please try and adhere to the following advice for one year and see the results:

Get a good strain of straight blood poultry that lays a good sized egg (either white or deep brown) there is no difference in price now, and the general average price is about the same for equal quality eggs (size and cleanliness considered.)

Pick up your eggs every morning and evening, and carry a damp cloth with you, cleaning all traces of dirt off before it hardens and sticks to the shell.

## DON'T WASH THEM,

But simply wipe them with a damp cloth and don't leave them streaked with dirt but clean them. Keep them in the coolest place about the house never allowing rain nor sun to touch them.

Use all ill-shaped eggs at home because they are broken in shipping. Market your eggs at equal intervals twice each week—that is, we would like to have them each Monday and Thursday or each Tuesday and Friday, rain or shine.

Keep every egg that you are not sure of being strictly fresh at home or ship them separately, as we don't want to spoil a case of nice eggs with a few of doubtful character, and you can't afford to sell such eggs, as it hurts you as bad as it does us, for we have to buy eggs on a basis of what we get for them, and if you slip in a few bad eggs on us, it only hurts our sales, and causes us to have to lower our price, so you see the fresher we get the eggs the more we get, and the more we can pay you. Never keep roosters with your hens after June 1.

Watch the size of your eggs and when they begin to run small, then feed them some good laying mash with a little Cod-liver oil in it or some soaked oats with a little Cod-liver oil in it or anything to keep the egg size up to not less than 23 ounces per dozen or over.

Now please try and follow this advice and let's work together and put our eggs in a class with California, Washington and Utah. The Pacific coast states ship eggs to New York City, and get from 3 to 10 cents more than your eggs bring, and it is because they ship fresh, clean, good-sized eggs graded up to a standard, which you can do if you will work as they work. Now if you will work as hard as we are, trying to put good eggs on the map, then we will show the market that Indiana has just as good eggs as any state in the union. We will do our best and now it's up to you who sell us eggs, to work as hard as we do.

Yours for Better Eggs.

## Quality Butter & Egg Company

# POULTRY

## DRESSED TURKEYS SWELL PROFITS

### Co-Operative Project in Nebraska Is Success.

(Prepared by the United States Department of Agriculture.)

Increased profits from turkey growing as the result of co-operative marketing of the dressed fowls has proved an incentive to farmers in the North Platte irrigation district in western Nebraska. "Marketing dressed turkeys in car lots," says D. H. Propps, of the bureau of agricultural economics in the Yearbook of the United States Department of Agriculture, "is one of the most practical of co-operative marketing projects."

"The growers in a county or district," Mr. Propps explains, "determine approximately the number of turkeys available for sale. Representatives of the growers get in touch with prospective buyers and receive from them sealed bids which are opened at a stated time. The entire number is then sold to the highest bidder, who then fixes the dates on which he wishes the dressed birds to be delivered. The farmers dress the turkeys the day before delivery and cool them overnight on the farms. The birds are weighed, graded and paid for as they are delivered. The purchaser bears all expenses and assumes all responsibility after the birds are received."

Turkey growers realize from 50 cents to \$1 for the labor of dressing. This represents from 15 to 20 per cent of the value of the turkey, and is fully three-fifths as much as the entire feed cost of raising and fattening the birds in the North Platte district. In 1927 the growers sold nearly 25,000 birds, and netted about \$18,000 for the work of dressing. At turkey-dressing time neighbors often change work, and if one grower is inexperienced he can usually get a neighbor to show him the best method of dressing the birds. Farm dressing is usually better done than in commercial establishments and buyers consider this when bidding for the turkey crop. The fact that turkeys move to market so largely just in advance of Thanksgiving and Christmas is a point favoring the co-operating sellers.

### Before Winter Sets In Clean Up Poultry House

Before winter sets in the poultry house should be given a thorough cleaning. All the old filth should be removed, the walls, etc., brushed down, and the place made as clean as physically possible. This should then be followed with a drenching

with a good disinfectant. In fact if mites were present the house should be sprayed with kerosene oil emulsion and the roosts and parts adjacent should be painted with crank case oil or a similar product. Thorough treatment now may prevent the mites hibernating and causing trouble next spring and summer. The cleaning and disinfecting process should not be confined to the walls and roof but also to the floor. One advantage of the concrete floor is that it can be easily cleaned. If the poultry house has not had its full clean up it should be done at once. To put pullets into unclean quarters and to needlessly expose them to disease is to court trouble. It's another case of the ounce of prevention.

### Insulation of Curtains to Keep Out Icy Winds

All that can be done to the farm poultry house in the way of insulation or storm curtains or banking around the outside, will tend to keep out the icy winds and hold in the bird heat to make the pullets more comfortable. But ventilation must not be reduced to a point that makes the house damp. A damp poultry house always seems colder than a dry ventilated house at the same temperature. Dampness seems to be a cause of colds and low vitality and both conditions may cause roup or at least a low per cent of egg production.

### Helps Avoid Worms

One authority has stated that worms have very little chance of obtaining a foothold in chickens that have a gizzard well filled with insoluble grit. This authority claims that all eggs and cysts of the worms are ground and damaged so much by a gizzard full of grinding material that no worm infestation results. At any rate, it wouldn't hurt to see that the young growing stock is given plenty of coarse, insoluble grit and pure, fresh water.

### Cooping One Rooster

The practice of cooping one male bird in a pen of, say, twenty fowls, and letting the alternate bird run with the flock day and day about, is better perhaps than allowing the two birds to run together. It has been found, however, that the cooping of the male in the pen excites it so much that, instead of resting and gaining strength, the opposite effect is noted. The "resting" bird should be cooped out of sight of the pen. It will feed better.

### Name Given Plain

A "piedmont plain" means a plain at the foot of a mountain.

### Old Rainmaking Device

A Dutch natural scientist, experimenting in rainmaking, succeeded in causing a general precipitation over an area of three square miles by dropping chipped ice on clouds from an airplane.

## KONJOLA WON

## GRATITUDE OF HAPPY LADY.

"I Hope My Experience With  
This Great Medicine Will  
Help Others To Win  
Health" She Says.

MRS. MARTHA E. BLACK.

"There is nothing unusual about my desire to tell others about Konjola," said Mrs. Martha E. Black, 427 Euclid Ave., Indianapolis, and I hope my experience will help others to regain their health. I suffered terribly from kidney, liver and bowel troubles. I was forced to rise as often as six times nightly and had constant pains across my back. Constipation filled my system with poisons, my liver was sluggish and I became very nervous.

"I began to feel better soon after I began taking Konjola. This was the first medicine to help me. Seven bottles of this medicine made an end of my health troubles and now I feel fine. That was three years ago and not one of my ailments has returned to this day. I occasionally take a few doses of Konjola to keep myself in good health."

Taken after meals over a six to eight week period, Konjola has proven America's most popular medicine for ailments of the stomach, liver, kidneys and bowels, and rheumatism, neuritis and nervousness.

Konjola is sold in Mentone Ind., at the Shafer & Goodwin drug store and by all the best druggists in all towns throughout this entire section.

### Land of Thunderstorms

Java is probably the country which has the most thunderstorms. The earth experiences about 10,000,000 thunderstorms a year, or an average of 44,000 daily.

## JUST THINKIN'

by Charles S. Kinnison

### Conflict

I would not ask my life to be  
Too free of things that bother me.  
For, I must have some cares, to see  
The good things that are mine.  
I would not live that kind of life  
That kept me out of every strife—  
Far back behind the line!

And I deserve no kind regard  
Of any man—or fine reward,  
If I shall go thru life unscarred—  
For that would only show  
That I was one who would not make  
A valiant fight for any stake,  
Afraid to take a blow!

For well I know that I'll be struck,  
When I engage with men of pluck—  
And I must dare the mire and muck,  
For every worth-while goal!  
And tho it smudge my hand and brow,  
I make myself this solemn vow—  
It shall not spot my soul!

(©, 1930, Western Newspaper Union.)

## NATION NEEDS HOME MAKERS

By MRS. THOMAS ALVA EDISON.

**B**ECAUSE the art of home making has declined so much in recent years, due to the trend originating in woman suffrage and the World war, the country is facing a situation of widespread restlessness. Men no longer find satisfaction in their homes. Unless the women of America make a decided effort to return to the business of home making, the most vital institution of the country is threatened. America is essentially a nation of homes. The woman who doesn't want

to make a home is undermining our nation.

An aversion to housekeeping exists on the ground that there is too much drudgery connected with it, but every business and everything in life is 98 per cent drudgery.

As a matter of fact, a good home maker must have executive ability and be a good purchasing agent, an economist, something of a chemist to supervise the diet of her family, and a gracious hostess. She also should be versed in music, art and literature to have a proper background and to be able to entertain herself, her husband and her friends.

A college education is invaluable for such a home maker. If the family finances make it necessary to choose between sending a boy and a girl to college, the girl should be the one elected. The boy can get his broadening contacts in business and elsewhere.

The college woman, however, must realize that home making is her highest goal and that it is a full-time proposition which is as much of a business as running an office. In flocking into outside business, women have lost their prestige in their own field without making up for it by accomplishment on a par with that of men in business.

## POSSIBLE TO BANISH POVERTY

Despite the obvious losses to more than 200,000 manufacturing concerns of the country when economic depressions occur, less than half of 1 per cent show any active interest in the problem of industrial idleness. Amazing results have been achieved by the national social workers in their efforts to stabilize industry. Apparent miracles have been brought about in tiding over seasonable periods of demand for certain products.

Society at large is almost as much to blame for depressions as is industry. Individual employers, regardless of the size of their concerns, cannot prevent such catastrophies, but by skillful forecasting and shrewd management they can mitigate the effects. We look forward to a time when poverty will be banished and opportunity for work will exist for every one at all times.

## WOULD DO AWAY WITH SECTS

By DOCTOR COFFIN, President Union Theological Seminary.

The achievements of science have been major contributing factors in the decline of Christianity. If Christendom is to be reborn denominationalism and nationalism must disappear from the Christian church. Denominationalism is detrimental primarily because it now represents social distinctions rather than differences in belief.

In a manufacturing town the owners and executives are to be found in a church of one denomination, the skilled workers in another and the ordinary laborers in another.

To meet conditions in the modern world the church must create an appreciation of God; must reconcile science and God's relation to the universe, and must refuse to be identified with political or commercial orders.

# WELCOME INN CAFE

## SOLD BY VIRGIL HIRE.

(From Delphi, Ind., Journal.)

Mr. and Mrs. Virgil Hire sold the Welcome Inn cafe on East Main street, two doors west of the present Journal office, Tuesday morning to Mr. and Mrs. Paul Hufford, who took charge of same immediately.

For the past seven years the Hire's have conducted a first class restaurant and during that time have made money. It was no secret to see the Hire's lock the doors and travel from coast to coast during the winter months and come home and open up with a full house of customers on account of their service. Not only that but because the Hire's have been very courteous to the public and have made many friends during their seven years residence here. One thing about the Hire's that could always be heard, they payed any account they owed that was just—they are honest and along with their courtesy they have made good. What the future has in store for them no one knows but the Journal joins their many friends in wishing them abundant success no matter where they go or what business they go into. Their present plans are unknown.

Mr. Hufford is a son of Isaac Hufford a well known farmer south of Delphi and has had much experience in the restaurant line. He is a mighty fine little gentleman and has been located in Gary for the past five years where he was married.

Regretting to lose the Hire's we welcome the Hufford's.

# Up to Each Man

Every man has it in him to rise above the stragglers and the drifters, to fight against the current instead of floating with the stream. True, it is work—hard work—but the rewards gained and the satisfaction of fighting justify the effort made.—Grit.

# FATAL AUTO ACCIDENT

## EARLY FRIDAY MORNING.

**Andrew Ritter and Frank Mann  
Are Instantly Killed East  
Of Plymouth.**

Andrew Ritter, 64, and Frank Mann, 65, of near Tippecanoe were instantly killed at 7 o'clock Friday morning when an automobile they occupied was struck by the locomotive of the Broadway Limited on the Pennsylvania railroad at a crossing three miles east of Plymouth.

The bodies of the two victims were mutilated beyond recognition. The driver of the automobile apparently failed to hear the approaching train and the engineer, who applied the brakes was unable to bring his heavy train to a stop until after the crash.

The automobile was carried on the pilot of the locomotive for a distance of nearly one-half mile and was reduced to a mass of wreckage by the impact.

The train was running at a rate of between 60 and 70 miles an hour at the time of the crash.

Bodies of the two men were badly mangled one being severed twice. At noon Friday one foot and part of one arm of one of the victims of the tragedy still were missing.

According to the engineer the bodies were thrown 100 feet, falling upon the tracks, where they were horribly mutilated.

Ritter is survived by a widow and eight children. Mann was a widower

## JOHN HETTLER, 79, ENDS LIFE

**Hangs Self in Barn at Farm of Son  
West of Burket.**

John Hettler, 79 of two miles south and two miles west of Burket, committed suicide early Friday morning by hanging himself in the barn on the farm of his son, Carl Hettler, where he was making his home.

Mr. Hettler left the house at 8 o'clock in the morning and was found one-half hour later by his daughter-in-law dangling at the end of a baling wire, suspended from a rafter of the barn. After placing wire about his neck, he had jumped into space from a high work bench.

Although he left no message or word of any sort and had not hinted at such an action, the cause was attributed to despondency over ill health. Mr. Hettler had made his home with his son and his wife for the past three or four months. He had formerly lived in the vicinity of North Manchester. Mr. Hettler was 79 years old.

Ill health is believed to have been the cause of the suicide as Mr. Hettler had been very nervous for

sometime and in ill health for more than a year. The family, however, was shocked at his death.

Since the death of his wife a number of years ago, he made his home with his son and daughters. Until the time, of his wife's death he had resided on a farm three miles south of North Manchester.

Children surviving are: Carl Hettler, of near Burket; Mrs. Charles Swank and Mrs. Lester of North Manchester; Mrs. Fred Goltrey, of Roann; Mrs. Brooks, of near Disco, and Mrs. Nora Hand of Wabash.

Coroner Paul Landis, who was called to hold an inquest, gave a verdict of suicide. Funeral services were held at Laketon, with burial in the Laketon cemetery beside his wife.

*"There must be oil,"*  
said MRS. MOLLA PROPP,  
"the meter shows seven with the engine running."

HAVE you ever been out alone when something happened to your car? Well, Henry had forgotten all about our anniversary and we weren't speaking and I took a long drive all by myself.

All at once something said "clank... clank... clank!" I wondered what could be the matter. Henry had told me always to be sure that there was oil in the distributor, and sure enough there was for I looked carefully at the ammeter and it said seven when the engine was running.

But that didn't help the clanking any, so I stopped and lifted the lid and looked at the differential. It seemed all right. But the clanking was just as bad.

Then I thought maybe it was the tires and sure enough the right rear tire was flat on the under side. The rest seemed all right.

Well, there I was. Henry had shown me how to change tires

and it seemed just too easy. First you take the tool called Bill or Jack or something and wiggle it up and down until the wheel is up in the air. Then you... well, then you just change tires. Perfectly simple, isn't it!

I guess I must have sat there an hour thinking how easy it was to change tires and how I wished that Henry was there and how I'd have him show me again just as soon as I saw him.

Then who should come along but the Johns and Mr. John got out and changed the tire for me, although I had to explain it to him as he went along. He didn't seem any too happy about it, but Mrs. John made him do it.

Of course, as I said, the tire wasn't altogether flat and that made it easier to change, although when I told this to Henry he just laughed—that sort of laugh that gives you an inferiority complexion, my dear.

Copyright, 1930—John Jensen.

#### Bliss Carman Remembered

Bliss Carman died in Connecticut, but was buried in his native town, Fredericton, New Brunswick. On the house where he spent his boyhood days is a bronze tablet bearing the inscription: "In this house lived Bliss Carman, Canadian bard and internationally loved poet, 1861-1929. This tablet is erected by the Imperial Order, Daughters of the Empire in New Brunswick. Earth of my mother earth, spirit to Thee."

#### Shingles an Improvement

The homes of many of our ancestors in other lands had roofs of tile or thatch. When they came to these shores they found no tiles awaiting them. They made shingles. As it turned out, they were better off without tile or thatched roofs, because the shingles were warmer in winter and cooler in summer. Shingles have been popular in this country for more than 300 years.

#### FARMERS MEETING.

There will be a meeting of farmers at Tippecanoe Community School Building on Thursday evening, Sept. 25, at 8 o'clock, in the interests of feeding poultry and live stock.

Dr. E. E. Clore of Greenwood, will be present and deliver a talk that will be of great interest to all who attend. A special invitation is extended to all farmers to be present.

For Sale—Eight year old cow fresh. Call Alva Crevison, Mentone.

#### STATE POULTRY MEETING TO BE OUTSTANDING EVENT.

##### Purdue News Service

The annual meeting of Hoosier poultry raisers to be held at Purdue University on Oct. 1, 2 and 3 is attracting keen interest throughout the state. "The important poultry problems to be discussed by some of the country's leading poultrymen will attract a record attendance," stated L. J. Demberger, of Stewartville, President of the State Poultry Association. The State Association is sponsoring the meeting, but it is open to every poultry raiser in Indiana.

Starting Wednesday afternoon Oct. 1, the hatcherymen will deal with the serious problems in their industry. In the evening a discussion of plans for disease eradication is expected to bring the largest crowd of hatcherymen ever assembled in the state.

On Thursday morning October 2, Dr. E. C. Young and Prof. Lynn Robertson of the Purdue Farm Management Department will talk about the general economic conditions and the cycles in the poultry industry. Another treat for the morning will be a thorough discussion of infectious animal disease work at the University of Illinois. During the afternoon of the same day, Dr. Graham will discuss other problems pertaining to the health of the flock.

The economic use of feeds, a live question in all poultry circles, will be discussed by Prof. C. W. Carrick, head of the Purdue Poultry Department. Other problems, such as, poultry equipment and management of the flock will be discussed by well known poultrymen on Friday.

Poultry raisers consider this meeting one of the best opportunities to get first hand information, especially with flock health and efficient production as the two main topics. Complete programs are being distributed by Leonard Todd of the Purdue Poultry Department.

#### Honesty and Policy

Honesty is the best policy, but he who acts on that principle is not an honest man. Whately.

# Sunday on the Farm

by A. J. Dunlap

The rule of the Good Book was law on the farm:  
That Sunday be kept as a day made for rest;  
And after six days full of labor and toil,  
We knew that the rule of the Good Book was best.  
No screaming alarm clock aroused us at dawn;  
We woke when the sun was well up in the sky;  
Awoke to the clucking of hens in the yard  
And clamorous squealing of pigs in the sty;  
Awoke to the laughter of leaves in the trees  
That rippled along on the still Sabbath air;  
Awoke to the odor of bacon and eggs  
That, like sweet incense, ascended the stair.

When breakfast was over we salted the cattle  
And turned the teams out in the dusty corral;  
Inspected the hog-lots, the orchard and pasture  
And doctored the gall-sore on Dolly or Nell.  
Then went to the house where the women were working,  
And out in the shade of the cottonwood tree  
Reclined on the bed of the deep tangled bluegrass,  
And dozed to the buzz of the brown honey-bee.  
No mountain resort of the millionaire make  
Can ever hold half of the comfort and charm,  
We felt when the six days of labor were ended  
And Sunday arrived on the peaceful old farm.

## IT PAYS TO FEED COWS IN SUMMER

### Big Mistake to Overlook Grain in Dairy Ration.

New York dairymen who do not feed grain to their milk cows in summer while they are on pasture are overlooking a sure method of increasing their net income, says F. B. Morrison, head of the animal husbandry department at Cornell university. It is surprising, he says, that many men who take much trouble in providing their cows with excellent rations during the barn feeding period of the year, depend blindly on Dame Nature in summer.

Pasture alone was satisfactory for cows in early days, when even the best of them yielded an amount of milk we would now consider too low for profit. By skillful selection and breeding, the modern high-yielding dairy cow has been developed, with a capacity for producing milk so great that any ordinary pasture will not furnish her enough feed both for milk production and for body maintenance.

The proper feeding of milk cows on pasture is much simpler than during the winter, and, says Professor Morrison, doubtless this is the reason why so many farmers, busy with their crops, fail to give their herd the necessary attention in summer. Often the cows are merely turned to pasture after milking at night and morning, with no further thought as to the supply of feed actually available for them. It is no wonder that when pasturage becomes scanty in midsummer, the cows run down in flesh and fall off decidedly in milk yield. Even if fed liberally when barn-feeding starts in the fall, quite commonly they cannot then be brought back to normal and usual production.

It is especially important to feed grain liberally when pastures become short and parched. This is important any year, and of particular importance this summer, when every far-sighted dairyman desires to do his share in providing sufficient milk in the New York milk shed during the shortage period next November.

Under typical pasture conditions in the state, he says, experience shows that it is best to feed a grain mixture containing about 18 per cent protein, at the rate of one pound of grain to three pounds of Jersey and Guernsey milk, and one pound of grain to four pounds of Holstein, Ayrshire, or Shorthorn milk.

The first English news sheet was limited to foreign news. Domestic events were unnoticed.

## Increase Profitable Butterfat Production

The following are essentials in profitable butterfat production, according to H. H. Kildee, formerly of the dairy husbandry division of the University of Minnesota, University farm St. Paul.

Proper shelter in a warm, light, well ventilated barn. The leeward side of a barbed wire fence is an expensive shelter for milk cows.

A knowledge of the herd through the use of milk scales and the Babcock test.

Corn silage and clover or alfalfa hay as patriotic, profitable, palatable feeds.

A grain ration in proportion to milk and butterfat produced.

Fall calving as a means of increasing production as well as price at a time when more labor is available.

A bushel of grain fed before calving rather than two fed afterward. Prepare the cows for the milking period.

Water of moderate temperature. Ice water is not conducive to greatest milk production.

A milking machine in case of labor shortage.

Co-operation with the neighbors in organizing cow-testing associations and purchasing feeds in carload lots.

## Grinding Roughage for Cows Saves All Waste

Three members of the Bedford (Pa.) dairy herd improvement association are grinding roughage, Tester Willard Straw reports. "This practice does away with practically all waste," says he. Soy bean hay run through a feed-mill, plus a commercial dairy feed used in connection with silage and home-grown grains, enabled Carl Armstrong's herd (Kendall county, Illinois) to place second in the testing association, with an average of 747 pounds of milk in a month.

George Smith (also of Kendall county), the following month, secured an average of 706 pounds by feeding a 84 per cent commercial dairy feed along with ground oats and ground barley, clover hay and silage.

## Ask Blood Test

Many states require the blood test on breeding cattle entering them, about fifteen in all. North Carolina was the first. Now we find in this list Georgia, Alabama, Arkansas, Mississippi, Oklahoma, Indiana, Iowa, Ohio, Texas and West Virginia. Ohio is practically surrounded by states requiring a blood test on shipments of breeding animals. Minnesota, New Jersey, Pennsylvania, South Dakota and Oregon prohibit entrance of animals positive to the blood test.

#### Doubts All Experts

We get tired of authorities who pontificate on their specialties. Our observation of men is that as soon as one of them becomes an authority on anything, he loses his sense of proportion and his tolerance for the viewpoint of others.—Public Ledger.

## MENTONE NEWS ITEMS

Mrs. Bessie Bybee was a caller at the Mary Tucker home Sunday afternoon.

Oliver Severns and wife spent Sunday with their son Lee Severns and family.

Mr. and Mrs. Elmer Welker and daughter spent Sunday with Mr. and Mrs. Clyde Brugh.

Mr. and Mrs. John Emmons and family and Henry Emmons spent Sunday at Saint Joe Michigan.

Mr. John Swick spent Monday in Akron visiting his brother Levi who is reported to be very ill.

Every dwelling house that is in shape to rent is now occupied in Mentone with the exception of one or two.

Mr. and Mrs. Clyde Brugh, and Mr. and Mrs. Charles Emmons spent Sunday evening with Mr. and Mrs. John Emmons and family.

Mr. and Mrs. Emmet Carter and daughter and Mr. and Mrs. Robert Reed were Sunday evening guests of Mr. and Mrs. Curtis Riner.

John Carey and family have moved to the Oblenis property on north Tucker street from the Mrs. Gross property on North Franklin St.

Mrs. Berniece Deafenbaugh will return home this week from Michigan, where she has been spending the past month on account of Hay Fever.

Isaac Mollenhour and wife of near Peru were calling on old friends here last week while on their way to South Bend to visit their son and family.

Mr. and Mrs. Allen Millbern and daughter Opal of South Bend, Mrs. H. A. Milbern of Kokomo Ind and Mrs. Mary Jane Milbern of Warsaw were visitors at the Geo. Lyon home last week.

Mrs. Tipton came with her daughter Mrs. Gross from the farm last week and spent a short time at her home on North Franklin St. Her friends are pleased to know that she is very much improved in health.

Mr. and Mrs. George Tinkey and son Max of Warsaw, Mr. and Mrs. Frank Thompson and family of Inwood and Mr. and Mrs. Tom Underhill and son Charles of Muncie spent Sunday with Mr. and Mrs. Franzel Minear.

Mr. and Mrs. Will Black of Portland Orgeon is here visiting relatives and friends. Mr. and Mrs. Black were formerly of Mentone and moved to Oregon about nineteen years ago. Mrs. Black will be remembered as a niece of Mrs. Susan Forst.

## HOW TO LIVE LONGER

By John Clarence Funk, A.M., Sc.D.

Director of Public Health Education,  
State of Pennsylvania

### Aye! Aye!

TWO thousand school children were some time ago subjected to an eye examination. It was not a selected group. Yet 45 per cent of them required glasses for their school work. Moreover, 32 per cent of the 55 per cent who made a normal reading of the examination chart were discovered to be far-sighted when controlled by "drops."

Which seems to bear out the statement made by authorities that 50 per cent of impaired eyesight can be prevented. It appears that some one is to blame.

Children do not like to wear glasses. No one does. But it is the duty of those responsible for the young people's future to have their eyes examined by a reputable specialist and abide by his advice, if and as required. When it becomes necessary for a child to wear glasses it certainly is better for him to do so during a few years of school life than to have permanently defective vision later on.

Even though the specialist may find nothing wrong at the time, such subsequent conditions as frowning, watery eyes, blurred vision, eye ache, or persistent headache are, singly or in combination, indicative that trouble has developed. Don't delay having it remedied.

And while on this eye subject, don't neglect your own. Seriously impaired sight is too big a penalty to pay for such carelessness. When it comes to this advice for your children and your self step up and sincerely exclaim, "Aye! Aye!" and mean it.

### A BARGAIN IF TAKEN AT ONCE.

I have decided to dispose of my ladies hat and ready-to-wear business in Mentone, and if taken within the next thirty days will let it go at a very low price, for cash.

Fleeta Emmons.

Cabbage For Sale:—Any amount delivered. Royce Tucker.

### OLD RESIDENCE EXPIRES

Mrs. Catherine Eherenman, aged Kosciusko resident died at the home of her daughter, Mrs. Mary Fawley near Warsaw. The deceased was one of the early settlers of this county having moved here with her parents when but seven years old. She was a step-mother of Byron Eherenman of this place and Albert Eherenman of Fort Wayne.

### Wire and Nails Often Fatal to Live Stock

Farmers should take precautions to prevent pieces of wire, nails, or similar objects from being strewn around where cattle, swine, or other live stock may come in contact with them. Besides the injury which may be caused by the animals stepping on such articles, there is also the likelihood that the animals may pick up these sharp objects with their feed and swallow them, often with fatal results, says Dr. W. L. Boyd, professor of veterinary medicine at University farm, St. Paul.

"We frequently observe the condition known as traumatic indigestion and occasionally pericarditis or inflammation of the heart and its coverings due to the migration of foreign bodies to the heart sac," says Doctor Boyd. "The type of foreign body which causes the most damage is the one which is sharp on both ends. These occasionally occur in feed which has been ground and has a wire or nail in it that has been made sharp on both ends by the mill."

### Losses in Sheep From Acidosis Is Puzzling

Paralysis of pregnant ewes, followed—shortly afterward—by death, has become a problem with sheepmen in the Middle West.

The disease is caused by an acidosis; the indirect cause is the condition of the ewes being too fat and not having enough exercise. The ewe becomes lame, gets weak, and finally collapses in a paralyzed condition. Two or three days later, she dies.

Post mortem examination usually shows that the uterus contains twin lambs, or triplets.

To prevent acidosis, cut down the feed, provide exercise, and feed a laxative feed—not dry feed. Each ewe suspected of being affected with this disease should receive a quarter pound of epsom salts, dissolved in a pint of water and administered as a drench. Alfalfa hay might well be used in place of dry fodder.

### Animals to Cull

In the fall of the year the live stock raiser should take an inventory, particularly to determine which animals he will cull out to fatten for market. Old animals that have outlived their usefulness should be disposed of. It costs more to feed and house live stock during the winter months, and this expense can be lessened if none but the most useful animals are kept. Shy breeders, old stock with poor teeth, and the females which are not good mothers should be sent to market.

In large cities people can hide themselves when they want to; in small places they can hide only their sentiments.—Leonard Ide.

Christmas is the Christian's Fourth of July in which he celebrates his freedom from the works of the devil.—Rev. Charles A. Shreve.

### ALL WORK GUARANTEED

I do all kinds of well drilling and repairing and guarantee that you will be pleased with my service. Homer Saner, Phone 8 on 198, Akron. Dec. 24.

### FOREST LIKE BANK ACCOUNT DECLARES RICHARD LIEBER.

Indianapolis, Ind., Sept. 22.—The farmer with a well-stocked and well managed woodlot has in hand the possibility of securing cash during time of droughts and in other times of stress, Richard Lieber, state conservation director, pointed out today.

"The forest is like a bank account," Lieber said. "As the tress grow they increase in value and that value is stored and saved until maturity, when it can be cashed in by logging off the timber. The forest crop, unlike the other farm crops, is not a perishable one."

Ralph Wilcox, state forester, said that the property stocked woodland should be worth at least \$300 an acre.

If every farm would have forty acres devoted to the forest crop, it would represent a reserve value of \$12,000," Wilcox said. "If every farm had only 100 black walnut trees growing in the waste spaces, worth an average of \$20 each, they alone would represent \$2,000. There always is a ready market for black walnuts. If each of these tress supplied five bushels of nuts each at \$1 a bushel, another income would be established."

### TALMA NEWS ITEMS.

Joe Foster of Nappanee spent Sunday here with friends.

Mr. and Mrs. Lou Grove spent Saturday evening in Rochester.

Paul Cormick of Peru was a business caller here last Wednesday.

Lavoy Montgomery was the guest of Nelson Hunter Tuesday evening.

Mrs. Frank Partridge is reported to be quite ill at her home near this place.

Mr. and Mrs. Oliver Grove of Rochester were supper guests Friday evening of Mrs. S. Y. Grove.

Kenneth Nutt and Sid and Roy Dick attended the Cass County Fair at Logansport Thursday evening.

Mrs. Cleo Teeter and family of Fulton spent Sunday here the guest of her mother, Mrs. L. W. Hatfield.

Mr. and Mrs. Walter Sweet and Mrs. Sweet's mother, Mrs. Clara Jefferies of South Bend were the guests of Mr. and Mrs. O. C. Montgomery Sunday.

Mr. and Mrs. Oliver Grove of Rochester spent Sunday with Mrs. S. Y. Grove.

Mrs. Ola Fleshman and daughter of Hammond spent the week end here the guests of her uncle Charley Barr.

Mrs. H. E. Imler who has been the guest of her mother for the past week returned to her home in Logansport Friday.

Mr. and Mrs. B. Boggess of Rochester spent Tuesday evening the guests of her parents, Mr. and Mrs. R. N. Hunter.

Mrs. Charley Green who was taken Friday to the Kelly hospital at Argos for appendicitis operation is reported not so well at this writing.

Miss Olive Coplen and Miss Lena Wagner who are teaching school at Leiters Ford spent the week end with their parents, Mr. and Mrs. Frank Coplen and Mr. and Mrs. Fred Poor.

### SAYS FARM NEWS AD. PAYS.

Homer Saner, the popular Well Man of Akron dropped into our office Monday and stated that his local advertisement in the Farm News had secured him considerable business, and ordered the same inserted for another three months. People make no mistake in employing Homer, as he understands the well business, guarantees all his work and is a square shooter.

### Nature's Protection

The bureau of fisheries says that shrimps do not throw off a secretion which discolors the water, but that this fluid is discharged by the squids, which frequently travel in schools of shrimps. This discharge is a thin black fluid which occurs in sacs in the bodies of all octopods, and is used as a protection to enable the animal to escape when being pursued.

### Butter Long Preserved

When cutting turf on a mountain bog on top of Cruickrooskey hill, Glenegannon, Cardonagh, Ireland, a party of men found two kegs of "bog" butter. The staves of the two kegs crumbled to pieces on removal, but the butter was in a wonderful state of preservation, although buried for probably several hundred years.

### Electrical "Load"

The "load" of electric machinery is the output of or demand upon a machine, usually measured either in terms of current delivered or of power delivered. A "load" may be light, heavy normal, full, half excessive, etc., according to the output of the machine at the time considered.

# Says WILL ROGERS

LAKE TAHOE Cal.—Well all I know is just what I read in the papers, and what comes along where I happen to be messing around. I don't care where, or how much you have traveled, if you want to hit a unique neck of the woods go up around Lake Tahoe, and over into Nevada, Reno, Carson City, Virginia City, all those Hot Springs up around there, then that

Lake Tahoe 6300 hundred hoofs high, 26 miles long and 12 wide.

Its not only the unique country, its the people too that you run onto up there. Lots of Frisco people have their summer homes up there, the Fleischackers have a great place, and he goes back to his business and rounds up a new gang of guests and brings em up for every week end.

Then down the Lake further on Emerald Bay Mrs. Knight has I'll bet the most unique House in America, a Swedish House. Now we never thought about the Swedes having houses. We just kinder pictured em being born, and then leaving the next day for Minnesota, and then live in American made homes. But say on their native heath those Johnsons know how to live. This house of hers is absolutely authentic, and its the most livable thing I ever saw, all heavy substantial stuff.

Then another great one is Anita Baldwins summer place just off the big Lake on Fallen Leaf Lake. Its log, the biggest ones you ever saw. The Living room with the highest ceiling, and everything in it is Indian, and I mean authentic Indian, as she has one of the greatest Indian collections in America. There is not one thing you see or touch when you get in that house thats not Indian, or Indian design. Dishes, Knives, Forks, all the cushions of the chairs and settees are cowskin covered, sofa pillows are woven corn husks.

I was admiring some of her Indian Baskets, and happened to say that I wanted to get hold of some, and she said, "Over in Carson City there is some very nice ones, they were made by a very famous Washor Indian Woman now dead, but they are rather dear, they run about ten thousand each." When I regained part consciousness, I thanked her for the information and asked if she thought I could get a slight reduction if I sent over and got say a dozen or so. I

wouldnt give ten thousand dollars for the basket they had Moses stored away in the bullrushes in.

But we must get away from homes and get to the real interest up around Nevada, and thats the "Divorcees." All of em dont live in Reno. They Live over on, or near the California line. they have to serve three months, if they leave the State during that time and stay a week, they have to add that on to their sentence at the end. Most of them are young Women. There is on an average of about 2000 here all the time. Two judges in Reno are trying cases most all the time.

Its a funny colony, and it aint funny, its sad. You talk to these women, and the most of em would like to go back and have another try with the husband. But they are game and they wont come till he wires, and he is all hopped up over some other younger Gal, and he dont wire, and they sadly go through with it. Course you dont hear the mans side out here. They dont always tell you about the man they are going to marry the next day after the decree. But its really pitiful. Course there is the old Stagers here who think no more of changing husbands then they do their brand of Gin. But there is many a heart break here and lots of children, thats the tough part. Some of them their Mothers told me they hadnt told them yet, they thought they were just here for a summer vacation. Divorce aint so bad I guess when its only the participants suffer, but its sure tough on the children. Well anyhow its a great Industry, and I guess about the only way to stop it is to stop marriage.

Me and my destitute friend Arthur Brisbane cant seem to get together on Russia.

There is a thousand things I talk about that I don't know any more about than a Senator, but I did take an airplane three years ago and flew from London to Moscow and Leningrad, stayed there a couple of weeks, went with no delegation, and wasn't personally conducted, saw everything, didnt even belong to Hoover Committee, and I don't know any more now about Russia than Brisbane does.

If I wanted to start an insane asylum that would be 100 per cent cuckoo, I would just admit applicants that thought they knew something about Russia.

## Amazon Nations

There seem to have been three nations of Amazons—one in Africa under Queen Myrina; one, the Asiatic, with an empire along the Black sea, and the Scythian Amazons, probably a branch of the Asiatic tribe.

## Fertilizer Types and Distributors

### Little Known of Merits of American Machine and Drilling Quality.

(Prepared by the United States Department of Agriculture.)

Up to the present no accurate information has been available as to the relative merits of the American types of fertilizer distributing machines. Also, little has been known regarding the factors which affect the drilling qualities of fertilizers. To obtain reliable data the United States Department of Agriculture undertook an experimental study of fertilizers and distributors the results of which have just been published in Technical Bulletin 1824, entitled, "Factors Affecting the Mechanical Application of Fertilizers to the Soil."

#### Test Atmospheric Conditions.

Atmospheric conditions, especially relative humidity, were known to have a marked effect on the drillability of fertilizers, so it was necessary, for the purposes of these experiments, to construct a room in which the temperature and humidity were fully under the control of the experimenter. This room was lined with insulating board and the space between this lining and the outside walls was filled with sawdust. The only entrance to the room was through a vestibule equipped with three tight fitting doors. By means of thermostats it was possible to keep the air in the room at any desired temperature and humidity. The fertilizers used in the experiments were stored in trays in this room. Fertilizer distributors of various makes were installed successively in the room and the fertilizers were run through the machines with the air at various humidities to determine the effect of humidity on the rate of delivery.

Distributors representative of various types were also operated and tested to show the relationship of construction and principle of operation to evenness of distribution and control of delivery rate.

#### Effect of Weather.

The experimenters noted the effect of weather conditions on fertilizers and also the effects of other factors, such as hygroscopicity, size and shape of particles, specific gravity of the fertilizers, and friction between particles. In the study of distribution they also observed the effects of the depth of fertilizer in the hopper, the inclination of the distributor, the use of agitators, and other factors.

This bulletin may be obtained, while the supply for free distribution lasts, upon application to the Office of Information, United States Department of Agriculture, Washington, D. C.

## Ax Is Best Treatment to Give Sick Turkeys

Here's bad news for ailing turkeys. It sounds very much like the usual Thanksgiving prescription, but the di-

rections in this case are not to wait for November to give it. Dr. W. A. Billings, extension veterinary specialist at University farm, St. Paul, Minn., nationally known "turkey talker," says the best treatment for a sick turkey is the ax. "Let's have as few sick ones as possible," he writes in his turkey news letter mailed to turkey raisers all over the United States.

As another timely hint, Doctor Billings suggests: "When your poults get out on greens for the first time, take care they do not gorge themselves. Break the good news to them gently. Their eyes are bigger than their tummies and some may load up and die because they are gluttons. If the little fellows are starved for greens they should be handled carefully to prevent such trouble. This applies to alfalfa, rape or any other green, leafy plant."

Predictions that this is to be a "good grasshopper year" hold little promise for modern turkey growers, Doctor Billings opines, because if the birds are allowed to roam to eat the hoppers they will likely die off from other causes. He urges keeping the poults confined in pens on clean ground, entirely away from chickens and at a safe distance from farm buildings.

## Effective Control of Cucumber Beetle Pes'

One part of arsenate of calcium and twenty parts of land plaster, mixed thoroughly together and applied in dust form at the rate of thirty to sixty pounds per acre, has been found by the Ohio experiment station to be an effective measure of control for the cucumber beetle. The station made a duster by using a half gallon tin can and nailing a three-foot strip on each side and joining the two strips together at the top with another piece rounded off for convenience and comfort in handling. Then twenty holes were made in the bottom of the can with an eight-penny nail, punching from the inside out.

## Clean Up Grain Bins Before Harvest Time

Farmers will find it worth while to repair their cribs and grain bins before the harvest season. The job is both more simple and easier at this time of the year because the posts and beams are not loaded. Windows may be added for more light and ventilation and greater convenience may be secured by placing the doors where they are needed to save steps in taking out feed. The outside of the buildings may be improved by cleaning up and painting.

## Salvation Army's Birth

The Salvation army, which was first known as the East London mission, and later as the Christian mission, was founded in 1835. In 1878 the name the Salvation army was adopted.

## Little Frost in Australia

Nearly one-half of Australia lies within the tropics and frost seldom occurs except in the great deserts of the interior.

### SHIPS A BUNCH OF HOGS.

Edson Vandermark last week shipped forty-six head of Hampshire hogs averaging about 175 pounds each. They were very even and he received a good price for them.

### A NEW CORRESPONDENT

We are pleased to state that we have secured a correspondent for Palestine and that in the near future our readers may expect to find items from that neighborhood in the Farm News. Now Burket, we would very much like to secure a reporter from your neighborhood.

### CHURCH HOME COMING.

The annual home-coming of the Palestine M. E. Church will be held at that place on Sunday October 12. This is an event that is greatly enjoyed by the entire community and a large number of "home comers" are expected to be present. Edison R. Vandermark is chairman, and Mrs. Edison R. Vandermark is Secy-Treas. of the organization.

Dean of All the Enumerators

### Kathryn

Kathryn, you are quite a contradiction. In the first place, numerology teaches us that four is the number of opposition, and the first four letters of your name. KATH, had two ancient meanings. These were "according to," and "against." With the

Changeful Chin of Kathryn.

best intentions in the world you may get yourself called insincere by trying to be both for and against some situation or proposition.

When you find it necessary to take sides in a given controversy, go right into it with all your might and express yourself forcibly.

You will find that this is much better even though you seem to make enemies in the process. It will even have a tendency to change the contour of your face and strengthen your chin.

Sometimes you wonder why you attract deception. Make careful search of your own heart in this and see if you are paying too much attention to the contradictory and controversial opinions flying around you.

It is better to have a few friends of a definite sort, than to have too many acquaintances of several sorts, each trying to use your influence to their advantage.

Once determined on a definite course, Kathryn, there are few heights that you cannot reach. And to gain your best successes, you must not let anybody call you "Kate." It is only a diminutive but it tends to keep you within their power as long as you submit to it.

By insisting upon the dignity of your full name, Kathryn, you force people's opinion of you upward. This you will find very essential.

(©. 1930, Western Newspaper Union.)

### Silver Bandages

Bandages, made of silver, instead of cotton, apparently have the power of healing surgical wounds, according to Dr. P. Maritsch, of Vienna university, Austria. The silver, applied in the form of a thin leaf, he reports seems to have a marked antiseptic value.

## PUBLIC SALE

I will sell at public auction at my farm, 1½ miles southeast of Talma, 5½ miles southwest of Mentone, 5½ miles south of Tippecanoe, and 9 miles northeast of Rochester.

TUESDAY, SEPTEMBER 30, 1930.

Sale starts at 12 o'clock, the following property, to-wit:

### 2—HORSES—2

One bay gelding, coming two years old; one bay mare, coming two years old. These are heavy draft colts.

### 18—CATTLE—18

Consisting of fresh cows, close-up springers, and heifers. They are all Jerseys and in good flesh.

### 102—SHEEP—102

Breeding ewes and two Oxford bucks

### HOGS

One Duroc sow and 9 pigs; one Duroc sow and 5 pigs; one Big Type Poland China sow and 8 pigs; one pure bred Big Type Poland China boar, two years old; one Big Type Poland China boar, 5 months old.

### 600—CHICKENS—600

600 yearling hens, that good old Manwaring strain, the kind that tops the New York market, these hens have been culled, and their egg record will be given on day of sale. This flock of birds are free from disease, never had coccidiosis, and are in new coops, purchaser paying cost price for coops.

FEED—Bailed alfalfa, third cutting.

### OTHER PROPERTY.

One spring tooth harrow, 16 tooth; about 80 ft. of lawn fence; one iron kettle; one copper kettle, one cant hook; oil drums; one 50 gallon; one 30 gallon; one 15 gallon. Other articles too numerous to mention.

Lunch served by Ladies of the Talma Christian Church.

TERMS MADE KNOWN DAY OF SALE.

## HARRY COOPER

Harold Steiner, Auctioneer

Herman Coplen, Clerk

### BAPTIST CHURCH NOTES.

Thursday evening at 7:30 our prayer and Bible study service to which all are invited. Next Lord's Day the regular services as usual. With home-comings and vacations over may we not rally to all the services of God's house to praise Him who has blessed us with such wonderful crops this year, when most of the country is stricken. We should remember the source and fear least a worse calamity come upon us if we neglect to thank Him in a real way.

Tuesday and Wednesday Sept. 30 and Oct. 1 the Logansport Association will be held at Denver, and we should attend as many of the sessions as possible. Young People's night is Tuesday night, when the trophy for attendance is to be awarded on the usual basis. Prof. Kent of Franklin College will deliver the address. V. E. Squibb, Pastor.

### BEAVER DAM ITEMS

Mr. and Mrs. Howard Conley were Warsaw callers Thursday forenoon.

Amos Summe, John Cinninger and little Joan Study have been suffering with severe colds.

Chas. Cinninger and family spent Sunday in Mentone at the home of their daughter, Mrs. L. M. Fife and family.

Mrs. Ivan Warren remains quite poorly, her sister Mrs. Beihl of Huntington has been with her several days.

Mr. and Mrs. Atwood Elder of Pierceton spent the week end with the latter's daughter, Mrs. Homer Clark and family.

Mr. and Mrs. Paul Cumberland moved from the Samuel Eiler farm into the John Engle property at Beaver Dam this week.

**Last Week's News Reviewed  
by  
A Stranger in the Windy City**

Chicagoan is glad to hear from  
readers on matters of general  
interest to the community. Let-  
ters sent to the above address  
will receive prompt attention.

Chicago Ill., Sept. 22—"Wait For The Bourbon Fair," shouts a headline on the front page of last week's Farm News. Those who wait for it are more certain of reward than are those who are waiting for the return of fair Bourbon. Your guess is as good as anybody's. Am I a wet or a dry?

Well, according to the Farm News advertising, you can now go to Clark's and buy a pair of overalls for 89c and a work shirt for 59c. When you tender a dollar and a half in payment, you'll receive 2c in change—Just enough to pay the postage on the letter you are going to write me telling who you consider the greatest man in Mentone. After getting such bargains, I wouldn't blame you for naming Mr. Clark, I suppose that's the proprietor's name.

On page four of last's weeks paper column two contained complete panorama of life. A baby girl was born to Mr. and Mrs. Arlo Freisner; M. Roy Rush surprised his friends by marrying Miss Olive Drudge; the W. C. T. U. held a meeting to plan for the betterment of the conditions under which we live; and the grim hand of death snatched from your midst, Frederick G. Babcock, still in the prime of his life. It may have been accident, and again it may have been journalistic genius that placed those four items in a single column.

According to a subscriber, there is a party living in your county who maintains an automobile on money drawn from the county poor fund. It would be fine if our counties were rich enough to supply everyone with an automobile, but until all the poorer people are fed and properly housed and clothed, I suppose it would be well to look into this matter.

The Mentone theatre is being torn out, but for a wonder it is a cream station, not a miniature golf course, that will take its place.

Did you notice that Will Rogers, America's philosophical humorist or humorous philosopher, opines that the man selected by Mr. Gerard as the ones who "run" the country may not be so proud of the job for which they are alleged to be responsible? Well, you got to remember this about Will, he always has been and probably still is a candidate for the Democratic nomination for President. Once he came mighty close to landing the honors. When the New York convention was deadlocked between Smith and MoAdoo, a stampede to Rogers netted a total of 1½ votes.

But Mr. Rogers hails from Claremore, Oklahoma, lives in Bererly Hills, and makes part of his living in Mentone. I therefore rule him ineligible for the honor of being your greatest man. There are too many others, including the Democratic Party, having claims on him to allow him to be known as a citizen of Mentone.

**BABSON NOW A BOOMER.**

Early in 1929, Babson, business barometer, predicted a crash—and it came in October. As a prophet, his foresight, was verified. Now that he foresees a revival of business, his words ought to help clear business skies of the clouds of doubt that have obscured the vision of mercantile and industrial confidence. He pointed out in a recent letter to the people of the country that as stocks of goods are low because of slowed-up buying, it is certain that with improvement in demand, the wheels of industry will force appletion to succeed depletion. This means revival in business. The dollar that has been crawling along paying one purchase debt a day, is showing a disposition to speed up and pay ten purchase debts a day and that spells prosperity. Ten-debt-a-day liquidation floats a mighty cargo of confidence—which is the only thing lacking to dispel the clouds of unemployment.

**A SWIFT MOVING CHICKEN.**

Chet L. Manwaring, manager of the White City Egg Farm reports some great production speed for one of his young White Leghorn pullets. This youngster was hatched on March 15th, turned out to free range this spring, stole a nest away in the woods and on Sept. 15th, appeared with a brood of chicks of her own production—just a seven months turnover—and that's going some.

## New Stock of Wall Paper HAS ARRIVED!

These patterns represent some of the niftiest designs for next year and if you can arrange to have your papering done this Fall you may be assured that you have the latest in styles. Priced 8c per double Roll up.

## It's a Good Time to Paint

So why delay that job for another year? Paint protects your buildings from the severe winter weather and adds very much to the appearance. We have the World and Well Known Sherwin-Williams line of paints which we can truthfully say there are no better.

Barn Paint at \$1.50 per gallon requires one gallon of linseed oil to each gallon of paint. Retains its gloss and brilliancy longer than any barn paint on the market.

## OUR SODA FOUNTAIN

Will continue to furnish the public with the very best and purest drinks obtainable. Ice creams in different flavors at all times.

## Farmers Who Are Interested in Better Eggs and Who Are Interested Enough to Help Themselves as Well as Us.

It goes without saying, that we have done more for the farmers in the way of egg price than any other buyer in Indiana, and have done more hard work to try to get a "Mark" on Indiana eggs than any other firm in New York City. We are working our heads off now trying to help you get more for eggs. Now, won't you please listen and try to follow our advice, We are not hoggish and don't ask all of this simply for our own benefit, but what helps us, sure will help you.

Now please try and adhere to the following advice for one year and see the results:

Get a good strain of straight blood poultry that lays a good sized egg (either white or deep brown) there is no difference in price now, and the general average price is about the same for equal quality eggs (size and cleanliness considered.)

Pick up your eggs every morning and evening, and carry a damp cloth with you, cleaning all traces of dirt off before it hardens and sticks to the shell.

## DON'T WASH THEM,

But simply wipe them with a damp cloth and don't leave them streaked with dirt but clean them. Keep them in the coolest place about the house never allowing rain nor sun to touch them.

Use all ill-shaped eggs at home because they are broken in shipping. Market your eggs at equal intervals twice each week—that is, we would like to have them each Monday and Thursday or each Tuesday and Friday, rain or shine.

Keep every egg that you are not sure of being strictly fresh at home or ship them separately, as we don't want to spoil a case of nice eggs with a few of doubtful character, and you can't afford to sell such eggs, as it hurts you as bad as it does us, for we have to buy eggs on a basis of what we get for them, and if you slip in a few bad eggs on us, it only hurts our sales, and causes us to have to lower our price, so you see the fresher we get the eggs the more we get, and the more we can pay you. Never keep roosters with your hens after June 1.

Watch the size of your eggs and when they begin to run small, then feed them some good laying mash with a little Cod-liver oil in it or some soaked oats with a little Cod-liver oil in it or anything to keep the egg size up to not less than 23 ounces per dozen or over.

Now please try and follow this advice and let's work together and put our eggs in a class with California, Washington and Utah. The Pacific coast states ship eggs to New York City, and get from 3 to 10 cents more than your eggs bring, and it is because they ship fresh, clean, good-sized eggs graded up to a standard, which you can do if you will work as they work. Now if you will work as hard as we are, trying to put good eggs on the map, then we will show the market that Indiana has just as good eggs as any state in the union. We will do our best and now it's up to you who sell us eggs, to work as hard as we do.

Yours for Better Eggs.

# POULTRY

## VACCINATION IS REMEDY FOR POX

### New Method Being Used by Nevada Poultrymen

Control of chicken pox in Nevada has been facilitated in Washoe county by a method new to poultrymen of the state, one that has proved itself speedy, economical and effective, according to Edward C. Reed, county agricultural extension agent.

The method, which in essentials is similar to the vaccination of persons against smallpox, consists of plucking feathers from the leg or the wing of the chicken and applying a concentrated chicken pox vaccine to the follicles from which the feathers are removed.

Advantages over the subcutaneous method, by which the fowls are vaccinated with a hypodermic, consist in the much greater speed, often running as high as 2,000 vaccinations a day; less resulting illness among the pullets; and smaller expense for vaccine, as less is used.

Washoe county poultrymen are planning what they think will be an improvement on last year's method for inoculation. Instead of using a stiff bristle brush for the application, they propose to use a small rake-like metal instrument and to scratch the web under the chicken's wing.

Vaccine for the method is especially prepared and is secured through the veterinary control service of the University of Nevada.

The method was first used extensively in Holland, but experimental work in agricultural experiment stations in the United States, particularly in California and Oregon, has resulted in some improvement in the European method.

### Time of Feeding Hens Very Important Matter

The old idea was to give the hens some grain the first thing in the morning, because they are hungry at that time and will eat readily. The new idea is to feed in the evening enough grain that a little will be left over for the morning feeding.

This left-over grain will in no way satisfy their morning appetites, so there should be a good-sized mash hopper filled with laying-mash for them to finish off on. Cleaning up the left-over grain and eating mash should occupy the hens' time until ten o'clock.

At this time give them a light feeding of grain, about one-third of the total amount of grain they will get that day. The hens, being tired from a morning of continual eating, they will rest for a while, after the ten o'clock feeding of grain.

As soon as this feed is exhausted the hens will begin to eat mash and continue until the regular grain feeding in the evening.

### Poultry Notes

Get in touch with your county agent to obtain the paid culling service.

Although pigeons have long been reared only as a fancy, not as an industry, of recent years, the lofts are multiplying. The work of carrier pigeons in the war is accountable for this.

If pullets are cared for and fed properly during the summer months, they will start laying two to three months earlier than if they are given no attention and made to hunt for all their feed.

When the pullets and cockerels are distinguishable they should be separated. The pullets should be allowed to grow normally while the cockerels should be pushed on feed consumption for an early market.

Plans have been developed for a northwestern turkey marketing organization. The turkey marketing organization's leaders will meet as soon as the present crop has been sold to put a marketing program.

Tying strings crisscross over the chick yard, fastening the strings to the fence posts will keep away crows and hawks.

Small cement runs are probably best for use with long, continuous brooder houses. Dirt runs are quickly contaminated and trouble results.

To prevent infection through feed and drinking water, dry mash should be fed in hoppers; scratch grain from troughs, and drinking water from elevated, clean vessels.

A pedigree is a valuable aid to the poultry breeder since it expresses briefly the performance history of a bird. Although the possession of a good pedigree does not guarantee that the bird itself will be a good breeder, it furnishes the most reliable means on which to base expectations.

The poultry flock which furnishes a food supply for mites has little energy left for egg production. Kill the birds of the pests by painting the perches with carbolineum, old crank case oil, or gas tar.

### Old Indian Villages

The "Seven Cities of Cibola" were a group of Indian villages visited by the early Spaniards in their explorations in the territory north of Mexico.

### Uncle Eben

"A good many people," said Uncle Eben, "goes around lookin' for sympathy when what they needs is dyspepsia medicine." Washington Star.

## RHEUMATISM AND STOMACH PAINS SOON BANISHED.

Muncie Man, Freed Of Painful  
Ailments, Gains Ten Pounds  
Enthusiastic About New  
Medicine.

MR. HARRY BROWN.

"Rheumatism had a frightful grip on my legs and arms," said Mr. Harry Brown, 327 East Jackson street Muncie. "There were times when I thought I could no longer bear it. My stomach was in bad condition and had been for three years. At times I ate nothing for the entire day. Gas accumulations, sallow complexion and heart palpitations kept me miserable all the time. I was far under weight and very weak."

"A friend induced me to try Konjola and before I had finished the third bottle I knew I had found the medicine I should have found three years before. In five weeks I felt like another man. I now sleep well at night and am free from rheumatic pains, I eat what I wish without distress and have gained 10 pounds in weight. Konjola deserves all the praise it gets for it is the only medicine that helped my painful and stubborn case."

Konjola, the new and different medicine, is a systematic treatment, taken after meals. It quickly goes to the source of the ailment, cleansing and invigorating the ailing organs and bringing permanent and glorious relief.

Konjola is sold in Mentone Ind., at the Shafer & Goodwin drug store and by all the best druggists in all towns throughout this entire section.

### Northern Wild Flowers

Many varieties of wild flowers grow in great profusion throughout the treeless plains of northern Canada.

### BUTTER AND EGGS

169 Chambers Street

New York, Sept. 14, 1930

The Community Farm News,  
Mentone, Indiana.  
Gentlemen:

Would you please change our ad? We want to call the attention of every farmer shipping fancy eggs to New York, that we are out on a drive. Will pay SKY-HIGH prices for real fancy eggs.

That goes to both our regular shippers who are now shipping and to any one else. We always paid high prices, but from now on our prices will be from one to three cents per dozen higher. We need more fancy eggs and our customers are willing to pay the price for them.

Respectfully yours  
Stern & Brauner
