LOCAL VETERINARIAN RETURNS FROM A 21-DAY PEOPLE-TO-PEOPLE GOODWILL JOURNEY TO EUROPE

Dr. Orville L. McFadden, local veterinarian, has returned from a 12-day People-To-People Goodwill Journey to Europe together with a group of 21 prominent Indiana veterinarians. The group visited -Belgium, -England, -Poland, U.S.S.R. (including Armenia), Denmark, Sweden, Germany and both West and East Berlin.

They were greeted in the various countries by the American Embassies; they visited veterinary colleges, local veterinarians and livestock farms. The exchange of ideas between their professional counterparts was interesting and education. Dr. McFadden saw many demonstrations of the newer developments in European surgery and methods of treating livestock diseases. Demonstrations included newer techniques for the removal of foreign bodies from cattle, repairs of fractures in man and animals, X-ray equipment and diagnostic methods for lamenesses in horses.

The group made many visits to livestock farms to study conditions as they exist in Europe. Seven days spent behind the "Iron Curtain" afforded an opportunity to see conditions as they actually exist in the U.S.S.R. Dr. McFadden, along with the other members of the delegation, helped to cement friendship and goodwill between the United States and the various countries that were visited.

Odds And Ends

by Ann Sheets

Clock collecting is a family hobby and our collection is growing steadily, if slowly. We have had a lot of fun working with the clocks and now we have found that they are beginning to develop personalities all of their own. We sort of like to compare them with politicians. For instance, there is a large old Seth Thomas weight clock that reminds us of LBJ himself. It is big and slow moving, its beat regular but unhurried. It chimes on the hour with a boing, boing, BUNG. The last chime always gets cut off way short and you think of LBJ with another Bobby Baker or Bobby Kennedy or Castro or DeGaulle or Sukarna struck in his throat just when he thought everything was going fine.

Speaking of Bobby Kennedy, we have a clock for him too. A mantle clock. It runs all the time, regardless of whether it is right or not. It strikes when it feels like it and works at will. Its beat is much faster than the LBJ clock and you can almost see Bobby skipping up to New York to make it look like he sometimes lives there while all the time he hurrying back to Virginia with an eye towards Massachusetts.

A very temperamental cuckoo clock reminds us a lot of Harry Truman. It pops off a lot, is hardly ever right, runs like crazy for a while, and then stops, and then pops off again. Like Truman, it is fun to have around, just to see what it will do next.

Least it seem as if the clocks are Democrats, which would never do in a Republican household, we do have a few old guard Republicans. The clock which reminds us most of Richard Nixon, for instance, was purchased at a little out-of-way clock shop in Germany and when it is running it is really running and when it stops it stopped for long periods of time. It works its little heart out and then stops for long periods of time when you know it is trying to decide whether to throw its hat back in the ring or go into permanent retirement. So far, it keeps coming out and trying again.

I guess the alarm clock must be the Goldwater of the household. It runs constantly and is it glows in the dark, it could be described as red-faced as we sometimes think its namesake must be. It is constantly sounding alarms and is hard to shut off. But, much as we hate to admit it, it's usually right.

The two other clocks in the household are quiet and hard-working and they get us off to work and meetings, mostly on time. They're not as colorful or as flashy as the other clocks but their dependability endears them to us. Just as we wish some good politician would.

GRASSROOTS OPINION

VEILLE: "Now that the Johnson Administration is being firm in its dealings with communists in Vietnam and Santo Domingo, let us have full cooperation from the Administration, including every phase of it, in dealing firm with communists who are infesting our own country. Those who fail to see the work of communists in the civil rights movement and in education, particularly many of our large universities, have only to read of the findings of the FBI and the Senate Internal Security Committee. Such information has been given, along with the names of some of the subversive leadership in the movements."

PETALUMA, CALIF., ARGUS-COURIER: "The New York Times recently printed the following news item: 'Accrington, England—Derek Jopson, 25 years old, was informed by health authorities recently that he could have his tonsils taken out soon at the local hospital. He has been on the hospital's waiting list for ten years.' Is this what we can look forward to under Medicare in the United States?"

CORBALLIS, ORE., GAZETTE-TIMES: "There are 47 million families in the United States. One fifth or 9.3 million of these families have an income of less than \$3,000 a year and are classified as living in poverty. Federal, state and local welfare programs total \$44 billion which, if divided without all the bureaucratic strings attached, could be apportioned so that each family new making less than \$3,000 could have 4,400. But then how would we support all those unemployed bureaucrats? There are undoubtedly many good things about the poverty program and if we ever wake up in a positive mood, we may recall some of them."

AZTEC, N.M., INDEPENDENT REVIEW: "The government is

worried over the unemployment of you, not seeming to realize that laws and regulations, and taxes for benefits, make it almost impossible to hire youth.

Read Romans 7:18 through 8:2
In Christ Jesus the life-saving law of the Spirit has set you free from the law of sin and death. (Romans 8:2, NEB)

Paul had been brought up in a strict religious atmosphere, yet as a young man he was unhappy in his spiritual life. No matter how hard he tried to keep the Law he felt himself a prisoner of sin.

Then, in a dazzling experience on the road to Damascus, he met Jesus! His whole outlook was changed. He came to see that the living Christ could set him free from "the law of sin and death."

John Wesley was probably thinking of Paul's words when he wrote about this heartwarming experience. He said, "An assurance was given me that he (Christ) had taken away my sins, even mine, and saved me from the law of sin and death." Freed from his doubts and fears, he set on his effective work of winning others to Christ.

Our personal spiritual experience may be less dramatic. But through dedication and worship, meditation and Bible study we, too, will find ourselves free by Christ for service to Him.

PRAYER: Almighty God, we praise Thee for sending Thy Son Christ to free us from bondage to sin. May we henceforth follow His example and live not for ourselves but for others. In His name. Amen.

THOUGHT FOR THE DAY

Baptist News

Rev. Fred Burklin, missionary-teacher, on furlough brought the morning and evening messages. In the evening service slides of his work in Germany were also shown.

In the pre-S.S. meeting Mrs. Judge of the Gary Mission told of the work they are doing among the children who also attend the Mission as well as men in need. The children have no place to play except on the city streets. Once a year the Mission finances a week at a camp. This year they were at the Baptist Crystal Lake Youth Camp - 54 in number, ages 1st grade through high school. The children had a wonderful time. Counselors and cooks were brought in from the Gary area. The Camp counselors of high school and college age from the Gary area joined the Junior High and Senior Youth groups of the church for a sack picnic at the home of Brad Moores after the Sunday morning church service. In the afternoon they attended the Patriotic Program at Winona Lake.

HONEY BEES in the southern and southwestern U.S. are going through a trying time. Thousands of honey bee colonies have died during the past two years. No explanation for the mysterious epidemic has been found, says the Department of Agriculture, and unless arrested it could have serious effects not only on the bee-keeping industry, but also on the production of crops that depend on honey bee pollination.

Soybean's Story To Be Told At State Fair

Food power from soybeans—the largest dollar earner of all U.S. exports—will be featured crop theme in the Indiana State Fair's 1965 Agriculture-Horticulture Building exhibit.

"This year's display will attempt to tell the story of the soybean from the farm to the family table," said Roscoe C. Stangland, director of the building.

Soybeans, a miracle crop which originally came from the

Orient, will be seen in seven stages of production, economic importance, processing, and utilization. The exhibit will be located in the south wing of the building, with 180 feet of wall space. Agriculture-Horticulture Building.

"We are trying to reach soybean producers by showing the latest production practices," Stangland said. Hoping to impress the general public with the economic and nutritive importance of the crop, Stangland

explained that soybean is Indiana's second largest crop.

Assisting with the general planning and individual exhibit are Purdue University and representatives from various industries. They will provide equipment, information, and supervision for the construction of the exhibit scheduled for 11 days August 28 through September 7.

☐ Practice courtesy at all times: Many of our traffic laws could be considered simply as common courtesy...yield the right of way, give adequate hand signals, watch for pedestrians and many others. Drive with courtesy and you'll automatically be a better driver.

☐ Understand and obey traffic laws: Although the laws governing drivers are essentially the same everywhere, there are variations that cover existing conditions in each area. Whether you're a resident or a visitor, it's important to know and adhere to the local laws - for safety's sake.

☐ Be certain your car is mechanically safe: Your driving skill and attitudes are helpful... but not enough if your brakes fail, your tail lights don't work or your car stalls in heavy traffic. Have your car safety-checked now!

☐ Be alert and courteous at all times whether you're a driver or a pedestrian. Safety organizations can inform and guide us; traffic officers can correct and direct us - but only when each and every one of us makes traffic safety our business will the terrible slaughter on our streets and highways cease to exist.

INGS MUST STOP Our Vacation CHILDREN

Even though we teach our children the ways of SAFETY, they sometimes forget! They dart into the street to retrieve a ball or ride their bicycle without a thought of cars. When there's the slightest doubt about a child's intention to

cross a street or run into it...Hesitate or STOP. Practice EXTREME caution near SCHOOLS and residential streets. WE LOVE OUR CHILDREN...LET THEM LIVE.

Watch For Our Children When You Drive

☐ Adopt caution as your constant companion: There is no such thing as being too careful when you drive. Always exercise extreme care - - don't be too sure the child on the sidewalk will not suddenly dart across the street. You may be obeying the laws, but someone else may be careless.

☐ Don't speed: One of the major causes of accidents today is speeding in excess of existing laws and road conditions. Speed limits, like all other laws of traffic, are to protect you! Be prepared when danger appears - - take it easy!

☐ Be sure you are alert and your emotions under control: Driving safely requires your full attention. If you're emotionally upset, ask someone to take the wheel for you. That's the only safe thing to do.

☐ Every time you approach a street corner or slide behind the wheel of a motor vehicle, you become responsible for the safety of life. Accept your responsibility. Learn the traffic laws and principles of safety - - then follow them.

In Indiana, a trip to Santa Claus Land delighted them all. A ride on the Miniature Train Mother Goose Land was interesting. The figures in wax in the Wax Museum are quite realistic. A few of them are Lincoln, Tom Sawyer, Huckleberry Finn, Becky Hatcher, Mr. and Mrs. Steven Foster, George Washington and wife, J. Whitcomb Riley, and many others.

Also in Santa Claus Land watched trained chickens, a duck and a rabbit either dance, play basketball, walk the tightrope or perform some other unusual feat.

The girls were particularly interested in the Doll House where over 2,000 dolls are displayed. The finest dolls in the world, dolls of nearly every land

dolls dressed as the Presidents and their wives dressed are only a few represented.

Parson Jones Speaks

Dear Mr. Publisher:

The last letter I got from you, you asked how I was getting along at my new church in the city. Well, as you know, Sir I've always had a church in the country until I got this call to the city. I can honestly say I don't see much difference - folks are equally bad in the country and the city. Just like changing a snakes roosting place ain't gonna help his personality much, so is the humans I've met. I used to think that may be country churches were a little more set in there ways, but if any congregation ever got more set than the one I got now, they would probably hatch.

Back years ago churches use to fight tooth and nail to make sure nobody changed their doctrines. They had the doctrine of the Holy Trinity, the doctrine of the Holy Spirit, the doctrine of the Virgin Birth and such like. Well, there shore ain't nothing wrong with that, but now we done come up with all sorts of new doctrines.

First off, theres the doctrines of the holy hour. Church has got to be held at 11 o'clock on Sunday morning. I tried to change it to 9 o'clock at our church and it almost tore the congregation apart. They don't care much about the doctrine of the virgin birth one way or the other, but they don't want you fooling with the doctrine of the Holy hour. To hear them talk the Good Book has a commandment "Thou shalt worship at 11 o'clock." One woman swore I was trying to change the Bible by switching the time. I reckon if our folks had a been the shepherds when Jesus was born they would'a told the angels to go away and come back at 11 o'clock Sunday morning. Then, there's the doctrine of the Holy seat. We got some folks that won't set in but one seat. If somebody else gets it they'll stop coming. They don't mind what you preach. You can talk about Jesus setting on the throne as long as he or nobody else don't try to get their seat. I reckon holding on to that one seat is like a baby holding on to his blanket - it gives him a sense of security. So we been kinda cautious about taking folks sitting places away cause we don't want to make neurotics out of 'em.

I know you've heard of the doctrine of the holy comfort. Some folks believe that the Holy Comforter is the one who makes everything comfortable in church. Lotsa my folks won't come unless the heat is just right and the seats ain't too hard. They're more interested in heat than they holiness. As a matter of fact, Mr. Publisher, we've got one group known as the cushion committee to make sure some of our soft reared friends don't become calloused.

Well I reckon you can see how the church has come along way. We've still got "holy" things in the church but they've changed a mite.

I've gotta go now. By the way, would you be interested in a pocket watch that chimes at 11 o'clock. Holy smoke, its later than I thought.

Yours truly,

Parson Jones

Quotations From "What Is Modern Math?"

EDITORS NOTE: The Tippecanoe Valley School Corporation has adopted a program "modern math" which will begin this fall in all of the corporation's schools. In an attempt to learn more of the program we asked Mr. Roy Meredith, administrative assistant to the superintendent, for an outline of the program and what it is. The following article was submitted by Mr. Meredith quoting from another article, "What is Modern Math."

Many teachers and parents are puzzled or dismayed by the unfamiliar terminology and concepts in the so-called "modern mathematics." Unfortunately, children are quick to sense such attitudes, so it is important for all of us to become familiar enough with the new math-its methods and goals—so that we do not transmit negative feelings about it to young students.

Today's children are being educated for a world we could hardly envision twenty-five years ago. Not only are entirely new fields—such as computer programming—open to them, but also the old fields—from agricultural research to government planning and business management—are requiring a more sophisticated mathematics as the basis for their research, planning and operation.

There has also been a rapid development in the field of practical mathematics—the bread-and-butter variety which affects our daily through the physical sciences, the engineering sciences, and even the social sciences. Today, the psychiatrist studies probability to use in presenting studies of case histories, while social workers have courses in statistics and talk of one-to-one correspondence.

Another cause of the revolution in mathematics may be traced to the revolution in automation. Automation is no longer a new word in our daily vocabulary. It is found in many aspects of the average man's life... automatic dialing of telephones, automatic pilot on the airplane, automatic computers that top up our checkbook balance, and computers that even forecast the election before the votes are counted. To build and operate these devices, the mathematicians and the scientists dusted off the old theorems and were forced to enlarge the science of modern mathematics.

The aim of modern mathematics is to teach the student to think in generalizations based on experience and not just to do operations a taught by the rules; to find out for himself why he adds, multiplies, subtracts or divides; to see through the process process... to see, for example, that subtraction is the inverse or the opposite of addition; that division is the inverse or opposite of multiplication.

tion. Arithmetic is taught, not to produce answers to given problems according to set ways of doing this or that, but to provide the skill to determine what process is to be used and why this process will produce the desired result. If properly presented, modern math develops an intellectual mastery over the subject.

Math has been difficult, especially for children, since up until now the emphasis has been on the learning of isolated facts, of specific skills and special rules to be used in certain instances. Too often, children are unaware of the basic meaning of and reasons for these rules and operations. The result is confusion. They try this, that, and the other way and sometimes are lucky enough to hit the target. If not, a mental block sets in, which colors the whole experience of mathematics.

Math is now a way of thinking, not a process of memorization. It is analyzing a situation, then selecting the important elements and putting them into an equation. Of course, the four processes of adding, subtracting, multiplying and dividing will still be needed. A machine can now do them accurately than man, but man must set up the equation. Man must do the basic thinking, the understanding of the situation. The emphasis now is on becoming idea-minded instead of skill-minded.

In modern math, the student copes with the entire field of numbers, not as patchwork devoting his early years to arithmetic with its +, -, x, etc., another year to patch called algebra; another to space relations called geometry, etc. He learns that they are all part of one over-all, interlocking pattern.

Modern math is not all new, it grew out of the old, the traditional. There is no gap between the two; rather, the new might be considered an enrichment of the old.

Mr. and Mrs. H. V. Nellans accompanied Mr. and Mrs. Glen Walther of Silver Lake to Alexandria last Wednesday where they attended the funeral of a friend and nearest neighbor in the City Trailer Park at Leesburg, Florida. After the funeral they visited Mr. and Mrs. Carl Jones who are also winter residents there. Other winter residents, Mr. and Mrs. Bruce Leroy, were also present.

SMALLPOX, an extreme rarity in the U.S. because of effective vaccination procedures, still is a significant health problem in many parts of the world, reports the American Medical Association. Even in this country, booster shots are required

every 3-5 years to maintain immunity, and too many people neglect to get the shots. For this reason, the level of immunity in the U.S.A. is dropping steadily, and the Association recommends that you ask your doctor about booster shots.

How to Burglar-Proof Your Home

If you think having a house burglarized is something that always happens to somebody else, think about this a moment — there is a burglar committed every half minute of every day of the year in the U.S.A. F.B.I. and Police reports indicate that the burglar's principal accomplice is the person he victimizes! All too often, homeowners, perhaps unconsciously, contribute to their own misfortune through neglect. The Check List below is a guide to making your home burglar-proof. If you can answer 'yes' to every question, then you will not only save your valuables — but will receive commendation from the police force. Five affirmative answers means you are doing a good job of foiling burglars, but four or less means you're definitely helping them burglarize your home!

- | Check | Yes | No | Yes Score |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|----|------------|
| 1) When leaving the house for an extended period, do you notify neighbors and local police that you are taking a trip? | | | 10 Points |
| 2) When leaving the house for an extended period, do you arrange to have mail held for your return, and regular deliveries of newspapers, milk, etc., similarly suspended? | | | 20 Points |
| 3) When you leave your home, do you check to make sure that all exterior doors and windows are securely locked and all ladders securely fastened with Yale pin tumbler padlocks? | | | 20 Points |
| 4) Do you have Yale pin tumbler cylinder "deadlocks" on all exterior doors? If not, have you installed Yale auxiliary dead-lock nightlatches to protect such doors? | | | 40 Points |
| 5) Do you wait until after your return to tell your local newspaper about your vacation? | | | 10 Points |
| | | | 100 Points |

If you have been overlooking some of these guidelines in your home protection program and are surprised at the numerous ways a burglar can be "helped," you can at least be reassured by the fact that potentially your home has never been better protected than it is today. You can learn why and how by visiting the Yale & Towne Lock Exhibit in the Better Living Center at the New York World's Fair.

There, the Yale "electronic classroom" illustrates the story of man's 4,000-year search for "style and security" in locking devices. By operating electronically-controlled, giant-size Yale pin tumbler cylinders, visitors see the progress in lock-making skill from the crude wooden locks of ancient Egypt, through the Greek and Roman periods, the Middle Ages, and today's maximum security locks which are also styled for beauty in appearance to fit the decor of our homes and business places. Illustrative of ancient locking devices is the key-operated wooden lock developed by Egyptians more than 2,000 years B.C., and which first utilized the principle of the modern pin-tumbler lock (see cutaway illustration). Also on display is an operative replica of an ancient Greek lock, the first to employ a keyhole to permit a door to be locked or unlocked from either side.

Rare keys and locking devices from Asian, European and American locksmiths from ancient times through the 19th Century are compared with their modern counterparts to demonstrate the advances made in safeguarding homes and personal property. Also on display are sculptured doorknobs and other ornamentalations which were created for Yale & Towne by such famous artists as Ibrahim Lassaw, Fernand Leger, Mirko, Isamu Noguchi, Paolo de Poli, Theodore J. Roszak, Andrea Spadini, Van Day Truex, and Paolo Venini. They add beautiful accents to any home or business decor.

Kokomo, a medium large red fruited tomato variety, is recommended for home gardens by Purdue University horticulturists.

Our Churches Cordially Welcome You

THE CHILD'S WORLD IS AS FAR AS SHE CAN SEE

A child's outlook upon the world comes through a child's eyes and a child's mind. Of necessity this outlook changes as he or she grows into adult hood. There are two powers, however, with which every child is endowed, these being love and faith. If retained they provide the greatest blessing life has to offer. All too often these blessings are replaced with fear and apprehension. Love and faith is the only power greater than these. Wisdom, so much to be desired, cannot take their place.

How then may we retain this spirit of love and faith, or, once we have lost it, how may it be regained? By prayer to Him who did not create within us a spirit of fear, and by holding fellowship with those who possess an abiding faith. The Church of our choice provides these contacts of prayer and association with those of strong faith, and as an institution of God it functions best when many attend. Use, and seek its benefits.

Today's MEDITATION

The World's Most Widely Used Devotional Guide

The Upper Room

THE UPPER ROOM, NASHVILLE, TENNESSEE

Thursday, July 15, 1965

Read Genesis 45:1-6

Bless them which persecute you: bless, and curse not... Be not overcome of evil, but overcome evil with good. (Romans 12:14, 21)

In Egypt, Joseph was confronted by his brothers who had plotted to take his life. He viewed the situation not as an opportunity to get revenge but as an opportunity to restore lost friendship and lost love.

If any person ever had a reason to take revenge and a ready-made opportunity to do it, it was Joseph. But he was a man who let God overrule his passions. He preferred to search for the will of God in his up-and-down life and to look for the good in every situation. He had learned to resist the temptation to seek revenge against people who wronged him. He had learned to return good for evil.

All of us have opportunities to exact justice when people do us wrong, but the same opportunities are also chances to be merciful. If we search for God's will, He will show us the best way of dealing with our situations.

PRAYER: Dear Father, make us tenderhearted and willing to forgive, as Thou hast had such boundless mercy toward us. Help us to resist the temptation to exact revenge, even when we can think of good reasons for doing so. In the spirit of Jesus we pray. Amen.

THOUGHT FOR THE DAY:

Mercy often mends what justice would destroy.

Winner of Another Honor

Stephen T. Ridgeway, 21, above, grandson of Mrs. Bernice Rush, has been chosen as the candidate for a Rotary International Fellowship in 1966-67. He is the first Indianapolis Rotary sponsored candidate to win the coveted award. There were 14 entrants from the district.

Next spring, after his graduation from Carleton College, Northfield, Minn. where he is a physics major, he will leave for Switzerland or Australia.

This honor is one of several he has won because of his interest in science. During his years in Central High School in South Bend he won a several days trip aboard a naval ship. Another award was a course of study during one summer at North Manchester College.

Last summer, on his own, he traveled to Europe to learn more about the people and their ways. Part of his six month stay was spent living with a German family who spoke both German and English. At that time he worked in a factory. Later, purchasing a motorcycle, he toured several of the surrounding countries. He can speak and write both German and French.

His parents, Mr. and Mrs. Thurman Ridgeway (Ruth) moved from South Bend three years ago to Indianapolis. Mr. Ridgeway is the chief of administration and management service of the Indiana Employment agency.

Holloways Return From Trip

Mr. and Mrs. Clayton Holloway, Mr. and Mrs. Robert Holloway, Steve and Vickie returned late Friday night from a week's trip. They spent several days over the 4th with the Clayton Holloway's son Max who is in the Air Corps in Biloxi, Miss.

A/3c Max will have completed his six months training in the Radio Communications School and will be headed for home July 30.

The Holloways left Max Wednesday, after taking in the Deer and Animal Park, and Marine Land, west of Biloxi. They stopped at Mobile, Alabama and took a tour through a battleship anchored there. In Tenn. they stopped for the Look-out Mountain tour at Chattanooga and then came home by the way of the Smokie Mountains. Because of the Fourth, traffic was slow on both week-ends. Aside from spending more time in the car than planned, the trip was enjoyable.

Mrs. Marion Smith expects to return home from the Murphy Medical Center in a day or two. Mrs. Smith has been confined to the hospital since a fall a week ago. Surgery was required to correct two broken bones just below her ankle.

Parson Jones Speaks

Dear Mr. Publisher

My wife may become a "first" in American History. She's gone and signed up to be a woman for the U. S. government. If like can fly one a them things like she flies off the handle, the United States will run circles around Russia. My madam won't have no trouble getting up in the air - as a matter of fact that's what made her sign up for this astronaut job.

She got so mad the other day she couldn't see straight - at least that's the excuse she gave for hitting me with the broom. What happened was, the front door of our house fell off the hinges. She snorted like a female bull. She allowed as how she had been following me around ever since I'd been in the ministry. She'd lived in church houses where members wandered in like it was a public park. She swore that wasn't the worst part. What made her mad was everybody throwing it up to her about having a free house when nothing it in worked. It was like living in a antique. She pointed out that for 15 years we had put up with leaky faucets, every-

running commodes and sagging doors. As if that wasn't enough the heat didn't work in the winter and the windows were stuck fast in the summer. Most of them had so few electrical outlets that extension cords were run all over the place. Going thru the house was like walking thru the jungles. Between fuses blowing everytime the lights were turned on, and the door knobs falling off everytime you opened a door things got pretty hectic, according to the madam.

On top of all this the little woman reminded me that by the time the church got around to looking into these things it would be easier to go thru congress. Anyway, you can see that the madam is on the war path.

I asked her, easy like, how come she signed up to be a astronaut. She told how she had been watching them astronauts blasting into space, and that they made sure everything was working. She swore that before she died she's like to go to at least one place where everything worked.

Mr. Publisher, I reckon you see the problem us preachers have. I tried to console my ole lady by pointing out that maybe the church members was just

trying to impress on us that "this world's not our home - we're just passing through." Anyhow, I gotta close and see if I can't wire the front door back for at least another year.

Yours truly,
Parson Jones

The altar of the church was graced with large baskets of white gladioli and orchid mums with lighted candelabra on either side.

played the traditional wedding march.

The bride, given in marriage by her father, was attired in a white street length frock which featured a lace bodice with a rounded neckline and long sleeves. The bouffant skirt was of white nylon. Horse Falls

Gale Johnson was riding his horse Quilty Kid during the Horse Show in the Western Pleasure Class at Laud, Sunday afternoon. Suddenly the horse slipped, fell, and landed on Gale. They both got up and went on with the show where Quilty Kid placed second.

Increasing pain in Gale's left wrist caused the Johnsons to stop at the Murphy Medical Center on the way home where x-rays revealed a cracked bone in the wrist.

While at the Horse Show Mrs. Johnson also entered Quilty Kid in the Women's Pleasure division, where he placed fifth.

Others re-elected were Gale Creighton, secretary, and Eldon Cumberland, treasurer. Ralph Davis was elected vice-president, an office created this year. Whit Gast is the other board member. All board members and the superintendent of schools were present.

Three applicants for the coach's position at Mentone were interviewed and the board instructed the superintendent to continue to negotiate for a coach to replace Roger Bridge who resigned to accept a position at Tipton.

Discussion was held concerning physical examinations which must be taken by bus drivers for the corporation's schools.

It was noted that the board must refund \$1623 which was over paid by parents transferring their children to Harrison Township under the trustee system. Some of the overcharges dated back to 1959.

Mrs. Darrell Bruner was hired as a part-time secretary at the Akron Grade School.

Storms Huffs And Puffs Blows A Lot Of Stuff Down

A series of severe thunderstorms accompanied by high winds, hail and lightning struck the local area Saturday night dumping an estimated two inches of rain and leaving riddled corn fields and broken trees in its wake.

Several strips of roofing blew off the Mentone gym and let two inches of water pour in on the floor.

The Northern Indiana Co-op filling station sustained heavy damage when a chimney toppled and crashed through the roof of the building.

Other area damage consisted of many toppled trees, chicken and brooder houses. Extensive hail damage was done in the area between Mentone and Palestine and many fields present a tattered and torn appearance compared to their look a week ago.

Electricity was off for an hour on main street and the north end of town did not have current most of the night. Long distance telephone service was also impaired.

Other chimney damage and tree damage has been reported in the surrounding community including a tree which blew through the roof of a newly remodeled home owned by George McIntyre of Burket.

The roadway of the Verrazano-Narrows Bridge linking Brooklyn and Staten Island is 12 feet closer to the water in summer than in winter according to the Catholic Digest.

TONASKET, WASH., TRIBUNE: "Camouflaged as the 'Great Society', the insidious tentacles of Socialism have so fastened themselves upon the body politic of this once great Republic that relatively few of its citizens are aware of what has happened. Particularly is this true of the younger generation, confused by the double-talk of government bureaucrats and inoculated with the poison of 'social security', they have grown into maturity with no real conception of the meaning of liberty and freedom. When men were free in America, before they surrendered their priceless heritage of liberty to a paternalistic government, they conquered a continent and established in this land a haven for the oppressed of the world."

PONTOTOC, MISS., PROGRESS: "...in Bulgaria. Offenders caught the second time driving while drinking are invariably sentenced to death... the death sentence is invariably carried out. On second thought, a death sentence for drunk drivers is not as harsh nor unreal as it might seem. Habitual drinking drivers in America generally sentence themselves to death. The pathetic and useless part of this sentence is that innocent drivers are often killed when the drunk driver's death sentence is fulfilled."

RANGELY, COLO., TIMES: "We understand that it will be illegal to state in a 'helpwanted' ad after July 1 whether you seek a man or woman worker. On that date a Federal law takes effect which makes it illegal to discriminate between the sexes... It's had to keep from discriminating against something or somebody in filling a job nowadays. If you choose an applicant with experience in the work you want done, you're certainly discriminating against ignorance... We hope the Supreme Court will hurry up and rule on some of these important questions."

GRANGEVILLE, IDA., FREE PRESS: "How soon will the Federal Government stop treating the individual states as a group of irresponsible children. The theme today seems to be 'We will take your money then tell you how much you can have back and what you can use it for.' Similar to an alcoholic father mooching from his son with a paper route."

WILLAMINA, ORE., TIMES: "Not many Americans know that the Federal Office of Education has been authorized to spend approximately \$1.5 billion during the current fiscal year. This is more than double the amount spent during the past fiscal year and it is a good example of the rate at which we are federalizing education. Let us never forget that Federal financing means Federal control. The Administration in Washington will soon be in position to control the intake of the finds of our children. That means we are losing our freedom."

SANTA PAULA, CALIF., CHRONICLE: "The subsidy for voluntary insurance would be offset by a new hardship clause. Those 65 and over are now entitled to deduct all of their

medical expenses. After this year, they will only be allowed (a) 3 per cent deduction plus one half of health insurance premiums. This is giving something with one hand and taking it away with the other. The older people get, the more their medical bills cost."

GARNETT, KAN., REVIEW: "New industry coming into a community means ever more than just so many new job opportunities. It is estimated that 100 new industrial workers in a community means 359 more people; 100 more households; 91 more school children; \$710,000 more personal income per year; \$229,000 more bank deposits; 97 more passenger cars registered; 165 more workers employed; 3 more retail establishments; and \$331,000 more retail sales per year."

ARGO, ILL., NEWS: "...the Great Society, the rewards of being in the underprivileged class are so golden that those of other classes may well decide to join, rather than remain privileged, or among those who must foot the tax bills for all the benefits."

GOSHEN, IND., NEWS: "They're equipping automobiles nowadays with everything but what they need the most, eyes."

FORT MILL, S. C., TIMES: "At this time of confusion, uncertainty and unrest in so many

areas of activity we might well think of William Penn when in a critical period facing his people he met with the Indian chieftains and said, 'My friends, we have met on the highway of good faith. We are all one flesh and blood. Being brethren, we shall take advantage of one another. When disputes arise we will settle them in council. Between us there shall be nothing but openness and love.' The Indian chiefs replied, 'While the rivers run and the sun shines we will live in peace with the children of William Penn.'

CUERO, TEX., RECORD: "The mere fact that a boy or girl manages to get a college diploma does not necessarily testify conclusively that their education has been a success... There are men and women who have never been inside of a college, but who nevertheless, are better educated than some of the young graduates. When you know what we mean by this, you are beginning to show signs of education yourself."

About fifty county egg producers, processors and hatchery men are expected to attend the convention.

Parson Jones Speaks

Dear Mr. Publisher

I just got back from our church convention. In case you don't already know, a convention is a place where folks travel a long distance to approve what has already been done. This year they voted to spend a \$100,000. on a project to study business morals. They had already spent the money but they wanted our approval. I reckon you've heard about meetings being cut and dried, Mr. Publisher. Well sir, this one was dry as a bone, but it wasn't cut none. Even the benches were grumbling about the seats being too hard. Them astrons that set for hours on them launching pads don't know how easy they've got it - at least they get off the ground.

Well, I reckon conventions is one way the Lord convinces us that He still performs miracles. It proves that the Almighty can use almost anything to get His work done.

Course they may not want me to come back next year when they hold their annual gear-oiling ceremony. According to the Bishop I throwed a monkey wrench in the works when I got up and made a motion. I thought it was a pretty good motion no matter what position you take. I just stood up and addressed the chair (it always seemed a little stupied to me, to address a chair, but then you gotta be kind to everybody I guess.) I said "Mr. Chairman, I make a motion that we nominate a committee to study and find out what denomination God is." Folks were so shocked that it took five minutes to get a second to the motion. It passed, Mr. Publisher, by a slim majority. There was one group in it who was afraid we might find out God was a difference denomination, so we would have to close down. They said we had to much money invested to take the chance at this time. I pointed out to 'em that its better to be broke than to be wrong. The Treasurer, seeing that things were heading in the wrong direction, suggested that the committee be approved, but that it not go into action until after the annual money raising campaign.

Well sir, it was voted on just that way Mr. Publisher. Just as soon as we solve the money proposition we've gonna check on what denomination God is. I'd shore heet to be on the committee cause any decision they reach is gonna make somebody mad. I hope it ain't us.

Bye now.

Yours truly,
Parson Jones

Boating Tips...

LAUNCHING STEPS

Two of the most embarrassing things that can happen to a boater are forgetting to replace the drain plug before launching and forgetting to attach a bow line to the boat before it's pushed off the trailer. The first goof permits water to rush into the boat through the open drain, the second one makes it necessary for you to wade or swim for your drifting boat. Both can be avoided by getting into the habit of following these five launching steps recommended by the Mercury outboards people: first, back the trailer down the ramp, stop a few feet from the water's edge and set the car brakes; second, release all the tie downs, tilt the motor up and connect fuel and electrical lines; third, put in the drain plug; fourth, back the trailer into position for launching; fifth, attach a line to the boat's bow and hold it to prevent the boat from drifting away once it is afloat. Unblock the bow winch and push the boat down the trailer into the water.

day to undergo surgery on Friday.

Fourteen members, one guest, Miss Betty Trump, and eight children were present. Mrs. John Tally was hostess and was assisted by Mrs. Don Baker.

TEEN-AGERS' TOUGHEST PROBLEM: learning good manners without seeing any. Catholic Digest—July.

CLEFT LIP

CLEFT lips occur in this country once in about every 800 births. The cause of this deformity is not definitely known, although some consider that it is due to a vitamin deficiency in the mother during pregnancy.

Whatever the cause, there is failure of the upper lip to unite. Care of the cleft individual begins at birth. Most surgeons operate on infants with a single cleft lip soon after birth and with this early repair such infants are usually able to return home within a week with reasonably normal appearance. Double cleft lips are repaired several weeks to several months after birth.

The absence of proper care and repair of this deformity will result in a life of poor appearance, inadequate speech, faulty dentition and later social and economic handicap.

Children born with cleft lips and cleft palates are known as remedial cripples, but today, through the combined efforts of the family doctor, plastic surgeon, otologist and speech therapist the child can lead a normal, useful life.

In a number of states there are special agencies in the department of welfare which provide cleft children with skilled and complete care.

Mr. and Mrs. Dean Meyers and family, Kathy Tridle, and Marion Boggs enjoyed a week's vacation last week at Bruce Lake, Indiana River, Mich.

Doctor and Mrs. Wymond Wilson had almost two weeks of relaxation, golf, and enjoyed the scenic beauty of Sun Valley, Idaho recently. They flew through rain and thunderstorms going out, but reported that the weather was lovely all the time they were there.

Mrs. Ora Carmean, Pam and Greg, spent last week with her parents, Mr. and Mrs. Orley Johnson, of Niles, Michigan. Pam attended Girl Scout Day Camp, at Camp Briarwood, and Mrs. Carmean assisted as a leader. Mrs. Johnson served as Director of the camp. The girls stayed overnight on Friday night and slept outdoors. The camp is located in a valley, and although the storm raged all around them, they weren't aware of anything more than a little rain until the next morning.

Sunday visitors at the Artley Cullum home were Mr. and Mrs. Joe Wilson, of Monticello, Mr. Homer Wilson of Delphi, Mr. and Mrs. Tom Harmon, and family, of Mentone.

Quacks Discussed By Seward Club

The Seward Home Demonstration Club met Wednesday, July 14, at the home of Mrs. Gerald Smalley southwest of Burket. The meeting was opened by the president, Mrs. Swick, and the vice president, Mrs. Donald Smalley led the group in the pledge to the flag and the club creed.

Mrs. Bernice Goshert read for meditation "Thoughts Put to Work" and "Three Kinds of Giving". Mrs. Frank Nelson gave the history of the song of the month, "The Stars and Stripes Forever" and led the group in singing it.

Mrs. Gerald Smalley in her health and safety remarks stressed all the importance of everyone being aware of quackery in medicine and health cures.

Mrs. Earl Sarber, in her garden report, said to plant beans and corn in July for a fall crop and also stressed that July is the month to plant Iris. She read an article concerning beautification of the countryside by having attractive mail boxes, well painted buildings and plantings around them.

Mrs. Smalley gave the lesson on frauds in medicine. She reported that in one year's time 12 million arthritis sufferers are cheated out of a quarter of a million dollars by promoters of fraudulent cures and misrepresented treatment edpa sent treatments. More serious than the waste of money is the patient's loss of faith in legitimate treatments which offer genuine hope of relief. This is only one of the diseases that quacks use as a means to swindle people.

Roll call was answered by giving medical superstitions. Following the secretary's and treasurer's reports, a report on mental health patients was given by Mrs. Wm. Kassen.

Mrs. Frank Nelson reported for the trip committee. Members will meet at the Westminister Hotel at 6:45 Wednesday, July 28, and then will go to the Wagon wheel Playhouse to see "South Pacific."

The president read a letter from Mrs. Donald Goon, a former member of the club. It was reported Mrs. Nelson will represent the club at the national August 9 - 13.

The meeting closed with the club collect and Mrs. Stanley Newton conducted the auction.

Delicious refreshments were served by the hostess and the co-hostess, Mrs. Donald Smalley, to 20 members and 2 children. The meeting date for next month has been changed to August 25. It will be a picnic at the Akron park and will be held at noon with members of the Mentone Home Demonstration Club as guests.

Read Revelation 14:1-7

Fear God, and give glory to him. (Revelation 14:7)

During World War II, there was a lad who was a member of the French underground. It was his business to carry a little hand-printed newspaper from place to place. This newspaper had regular news stories in it, but buried in each story would be some special message that had meaning for specific persons to whom he could deliver the papers.

One can readily suppose this is true of the Book of Revelation. It was delivered to the "seven churches that are in Asia," and, of course, to the thousands of early Christians who were plagued and persecuted by the Romans. It was the good news for persecuted Christians.

Buried deep in the symbolism of Revelation is the heart of the gospel: "Then I saw another angel flying in midheaven, with an eternal gospel to proclaim to those who dwell on earth, to every nation and tribe and tongue and people; and he said with a loud voice, 'Fear God and give him glory, for the hour of his judgement has come; and worship him who made heaven and earth, the sea and the fountains of water.'"

PRAYER: Our Father, help us to understand the heart of the gospel. Use us to proclaim the good news to every nation, tribe, tongue, and people. To Thee be the glory!

In Thy Son's name we pray.

Amen.

THOUGHT FOR THE DAY

The gospel is good news today, just as it was in the days of Romans persecution.

Baptist News

Sunday afternoon during the Memorial Service, touching tributes honoring Missionary Harry Goehring, were brought by his associates and friends.

One of the highlights of the service was the taped recording of Mr. Goehring and his wife Nancy singing "What God Hath Promised." This was played by her cousin Rev. Francis Rogers of Rochester's Hillcrest Baptist Church who had taped it when the Goehring were at his former church in Plymouth, Ohio. At that time they were on deputa-tion work before leaving for their field of service in East Pakistan.

Others who took part in the service were his college companions Missionary Fred Burdick (Grace Seminary), and Gospel-Singer Rev. James Reese (Bryan University, Dayton Tenn.); his former pastor Rev. Irwin Olson; Missionary-appointee Jesse Eaton who would have joined the Goehring in East Pakistan as he and his family leave for there later this year; Vice-Pres. of Grace Seminary, Dr. Homer A. Kent, Sr.; other friends Rev. Gordon Wray, Rev. Russel Eber-sole, and Pastor H. Addelman. The later was also at Bryan University at the time Mr. Goehring was there. The organ was played by a brother-in-law, Mr. Bruce Miller.

Over 300 relatives and friends of Mr. and Mrs. Goehring attended the service which was recorded by Rev. Griffith Rice, a Baptist pastor from Fort Wayne.

With The Sick

Mr. Darrell Coplen has been in the Murphy Medical Center for the past week undergoing examinations.

Mrs. Lum Smith, of Rochester, is in the hospital for tests and x-rays.

Services

Those from a distance who were in Mentone Sunday for the Memorial Service of Missionary Harry Goehring were Mr. and Mrs. Roger Goodman and sons Vernon and Kenneth and a pilot friend. They flew here from Longview, Texas, with Roger as co-pilot. He has his license to solo however.

Rev. and Mrs. Irwin Olson, of Carmel, Indiana, Mr. and Mrs. Omar Cox, Mr. and Mrs. Harold Cox, of Elkhart, Rev. and Mrs. Francis Rogers of Rochester, Mrs. Steve Fay, Missionary-appointee soon to leave for East Pakistan, and a sister of Mr. Goehring's of Zeniole, Pa.

Cold-Start Frying

Try cold-start frying for vegetables, fruit, poultry and frozen prepared seafood, suggests Jan Armstrong, Purdue University consumer marketing specialist.

The method of cold-start frying you use depends on the food to be fried. When cooking unthawed coated frozen food, pour the oil over the food. When cooking freshly coated food, place it gently in the oil to prevent washing off the coating.

In the first method of cold-start frying, you place food in a single layer in a large skillet. Pour on vegetable oil until it just covers the food. Stir to surround each piece with oil. Place skillet over medium heat or turn electric skillet control to medium high. Fry until golden brown, stirring gently occasionally, about 15 minutes. Remove

from heat or turn control to "off". Take food from skillet with slotted spoon; drain on paper towel. For a second batch, place food in skillet, restore heat, cook as before.

Use this method for French fries, skillet baked potatoes, sweet potatoes, frozen potatoes, fresh mushrooms, parsnips, carrots, small onions, cauliflower, yellow squash, zucchini, summer squash, and seafood. Do not thaw frozen prepared seafoods such as fish sticks, scallops, breaded shrimp, breaded sole, deviled crab cakes, tuna or halibut croquettes. Thaw swordfish, halibut or salmon steaks completely.

In the second method you pour room-temperature vegetable oil to a depth of $\frac{1}{2}$ inch in a large skillet. Place prepared food in single layer in skillet. Use medium high on electric skillet control. Fry until golden brown,

turning once, after 7 minutes. (After first 5 minutes, slip spatula under food to prevent sticking.) Remove from heat or turn control to "off." Remove food and drain.

Use this method for frying frozen fillets of ocean perch, haddock, halibut or sole; coated vegetables; fruit fritters or fruit puffs; quick-fried chicken, seasoned chicken or breaded chicken.

Chicken requires a longer cooking time. When using a $2\frac{1}{2}$ to 3 pound cut-up broiler-fryer, fry covered for 15 minutes, turn, continue cooking uncovered for 8 to 10 minutes more.

The Passing Of A Pioneer

The interesting obituary from 1912, reprinted here, is for the grandmother of two local men, Lee and Ralph Arnsberger. It was discovered among some old papers, and sent to them by their sister, Mrs. Grace Gifford, of Tucson, Arizona. Mrs. Arnsberger and her husband helped found the Mentone Baptist Church and this article is timely now at the time of the dedication of the new parsonage.

Hannah Arnsberger whose maiden name was Lewis, was born in Ohio, Jan. 4, 1828, where she grew to womanhood. She was united in marriage with Solomon Arnsberger Jan. 11, 1848 and soon after they moved to Kosciusko county Indiana, and settled on a farm, or rather the wild woods, for at that early date the forest was almost undisturbed by man. By their in-

dustry and perseverance they succeeded in making a beautiful farm, with comfortable and commodious buildings, where they lived and enjoyed the labor of their hands. After their children were grown up and most of them married, they moved to the new town of Mentone, where they had built one of the first substantial dwellings of the town. Here she lived until death called her from labor to reward. Soon after coming to this state, she with husband united with the Yellow Creek Baptist church and when the Sevastopol church was organized they united in that organization, as constituent members, doing their part of the erection of a house of worship and other christian duties. In 1886 they with sixteen others with letters from Sevastopol and Yellow Creek churches organized the Mentone Baptist church. Here they again helped to build a house of worship, and were faithful to the end of this life which came to Father Arnsberger nearly five years ago, and on Feb. 3, 1912, at the ripe age of 84 years and 20 days Mother Arnsberger left this world and went to that home prepared for the faithful.

She leaves to mourn her departure four children, three sons and one daughter, thirteen grand-children, six great grand-children, two brothers and many other relatives and friends. The funeral services were held in the Baptist church conducted by Rev. B. F. Truman of Warsaw, burial in Mentone cemetery.

Social Club Enjoys Dinner

The Palestine Social Club met recently with Mrs. Flo Shirey for a delicious carry-in dinner.

Jesse Baum gave meditation after the noon meal using a reading, "My Prayer." Edna Jones read the secretary's report. Present for the meeting were Edna Jones, Jesse Baum, Mattie Leher, Vida Horn, Agnes Surgy, Reba Tucker, Janice Hatfield and sons Ricky and Ryan, Geraldine Parry and Flo Shirey.

The August meeting will be at the home of Mrs. Horn in Warsaw.

Petition Seeks Signatures For New Town Hall

A petition is being carried in Mentone this week to secure necessary signatures to build a new town hall.

Planning has been in progress for about four years on the building but has been held up by the railroad who owned a corner of the space needed for the new building.

Members of the volunteer fire department are carrying the petition and expect to have needed signatures soon.

Included in the new building

would be an enlarged fire house, public rest rooms, an office for the clerk-treasurer; a public meeting room; and kitchen with room for fish fries. At the present time all the fire equipment cannot be stored in one building, there are no public rest rooms, the clerk has his office in his home, and there is no public meeting room and kitchen.

Laddie Gets Another Honor For Bravery

Doug Sheetz, printer's devil, j.g., admires Laddie, the collie-shepherd owned by Lee Marsh as Marsh looks on. Both have recovered from injuries sustained in December when an enraged dehorned bull attacked Marsh.

Laddie shows Lee Marsh the crushed leg he received in saving his master's life last December 2.

Laddie, the much decorated dog owned by Lee Marsh, R. 2, Akron, has received yet another award for his bravery in saving Mr. Marsh from death last winter. Laddie attacked a thousand pound bull which was attacking Mr. Marsh and kept up the attack until Marsh could safely get over the fence. Marsh required 26 stitches for head injuries and Laddie suffered a broken leg. Awards received by the dog to date have included a citation for distinguished dog heroism from the Quaker Oats Company and the William O. Stillman certificate for outstanding courage and faithfulness in rescuing his master from the attacking bull.

Laddie's latest award is second place in the "America's Hero Dog of the Year for 1965" contest. For this Laddie will receive a silver medal, a silver plaque,

It's Darrell King rushing across the street, ladder in hand, to assist fellow Chamber of Commerce member Dave Cooper in tightening down the guy ropes of the "Mentone Day" sign. The sign has been erected earlier but had been blown down by the capricious windstorm which struck Mentone July 16.

AMERICAN POULTRY HATCHERY FEDERATION CONVENTION CHICAGO

A great many people from the Mentone area attended the meeting held at the Conrad-Hilton Hotel, July 20-22.

Some of the most interesting subjects discussed were "Coccidiosis Prevention and Control," "The Importance of the Midwestern Egg Industry," "Styles and Shapes of Egg Contracting."

Among those attending from the area were: Gene Sarber, Kirk Laxen, Mr. and Mrs. Mott Bryan, Mr. and Mrs. Millard Laughlin, Mr. K. G. Brown, "Red" Jacks, Frank Nelson, "Bill" McKenna, Mr. and Mrs. Richard Manwaring, Mr. and Mrs. Charles Manwaring, others from Manwaring Lagoon Farms were Frank Manwaring, Earl Staden, Forrest Long, and Alton Harkey.

Some of those report it got mighty hot there too, and that Mentone always looks good after a few days in Chicago, guess they all are just small town people.

Parson Jones Speaks

Dear Mr. Publisher:

My daddy was a smart man. I may be a little prejudice, but I think having me was the smartest thing he ever done. He used to have some the wisest sayings I ever heard, and most of 'em were made up originally by him. For example he said "A bird in the hand is unsanitary." He also said, "Smile and the world can see your teeth." But the best thing my daddy ever said was "Son" get a kick outa life." Little did my paw realize that my hole life would be built around this philosophy.

When I was a little boy my brother kicked me around. As soon as I was old enough to court, the gals started kicking me. The preacher that married me and the madam swore I would get a kick outa marriage. Now I know why they called him a prophet. After I took up preaching I got even a bigger kick outa life. There's so many more people in church to do the job. To tell the truth Mr. Publisher, I'm sick and tired of getting a kick outa life. I'd be tickled pink to trade a few kicks for a helping hand.

It ain't no wonder churches is having a hard time getting preachers. Over in them heathen lands they may est preachers, but at least that proves they got a little taste left for he clergy. In the United States folks just run their ministers off. As a matter of fact I read where one denomination has started giving battle ribbons to their ministers who have fought in church wars. This sounds pretty good on the surface. However, it don't take into consideration the fact that most fighting men get combat pay. Shucks, they don't even pay me loafing wages. Another thing they don't provide for us preachers is purple hearts for the wounds we get. I remember how Ellie Nicklesinger one time bit the blood outa my finger at choir practice but I didn't even get honorable mention in the Sunday bulletin. Wouldn't it be nice if a fella could wear a hole chestful a ribbons on Sunday just like a Sargent? Who knows maybe someday they'll judge a preacher's talent by his battle scars instead of the money he's raised.

Mr. Publisher, I hope you'll forgive my griping, but you're the only psychaistrist I can afford. I reckon the only way to stop this kicking problem is to put a stick of dynamite in my hip pocket, so when somebody kicks it will blow their foot off.

See you at the launching pad.
Parson Jones

Odds And Ends

by Ann Sheets

Sometimes sons can teach their mothers more about keeping a stiff upper lip than the mothers themselves can. Saturday and Sunday were such days in our lives.

Some time ago I wrote about the dogs who had ruled our lives and mentioned little Schatzie-tina, the dizzy blonde bomb shell, who lived with us, meddling with our hearts and our lives. She didn't seem to have a brain in her head or a care in the world but she loved us and we loved her in return.

Schatzie was Todd's favorite companion and the two of them tramped over every inch of the farm hunting everything from rabbits to rocks with "sparkly stuff in them." They scoured the woods and the creek banks for everything from diamonds to ghosts. The fact they never found much what they were after didn't deter them. They just romped and looked some more.

When Doug came into our lives Schatzie accepted him without a tinge of jealousy and even some to guard him as he toddled about the yard. He loved her in his way and she was as gentle with him as she was sometimes rough with Todd.

A watchdog to the point of barking at the milk man and bread man, she could remain fast asleep on the back step while a stranger pounded on the front door at one a.m. Nevertheless, she gave us a feeling of security.

It all ended Saturday when we discovered her body under the front porch, her vantage point from which to glare at the milk man and bread man. Evidently the heat and a hard run took its toll.

I wasn't much better than Todd about keeping back the tears and it was with a heavy heart that I tucked him into bed. In fact, I couldn't sleep all night for thinking about it and dreading to see Todd come morning and the funeral with which he wanted to help. Instead of gloom, however, his face bore a set but determined smile when he came downstairs and the only tears shed as Schatzie was borne to her final resting place, to grave in her beloved woods, were mine. Todd even erected a monument for her, a stone made out of "sparkly stuff".

And so it is. Todd is the brave one and I still get misty eyed thinking about the little rascal of a pup who grew into a big rascal of a dog. He has accepted it as part of his growing up and

is already pleading for another dog - just like Schatzie. Sounds like a good idea to me. Now if we could just convince Daddy...

Love is patient and kind; love is not jealous or boastful; it is not arrogant or rude. Love does not insist on its own way; it is not irritable or resentful. (1 Corinthians 13:4-5, RSV)

One of the best tests of Christian Character for every adult, youth, or child is how we act in our homes. Many of us who are active, professing Christians cannot pass this test. One wife said, "When my husband comes into the house, he hangs his religion up with his coat."

Love of one another is at the heart of Christian living. In the First Epistle of John we read: "For this is the message which you have heard from the beginning, that we should love one another." Certainly the "one another" includes the members of our family. Paul spells our Christian love in practical terms in First Corinthians, chapter 13.

Can we pass this test—living by the standard of Christian love in our own homes? Are we patient and kind? Do we refrain from jealousy, boasting rudeness, irritability, selfishness? If we can live this way at home, we shall be able to do it elsewhere.

PRAYER: Our Father, we thank Thee for our homes. Help us to practice Christian love in all our dealings, especially with the members of our family. In Jesus' name we pray. Amen.

THOUGHT FOR THE DAY
Love is a way of living that makes for happiness at home and elsewhere.

Cubs Camp In Park

Jim Miller accompanied the Cub Scouts on an afternoon and night camp out Saturday. The Mentone Park was selected as a likely place in which to camp and three tents were erected to sleep nineteen Cub Scouts.

The afternoon was enjoyed with ball games, pole climbing, swinging across the creek, a hike and running races.

Supper was a weiner roast and was completed later in the evening when ice cream and pop were served.

It has been reported that sleeping was quite a chore. It seems voices could be heard at all hours of the night. Camp broke up at 9 a.m. Sunday morning and reports have it that many slept the rest of the day.

All in all, a successful camp-out was reported and the Cubs and Miller have joined in thanking Ted Peterson for his assistance and tent. He stayed with them from start to finish. Dick Kindig and Jack Fawley assisted on Saturday afternoon.

Best of luck to our 4-H boys and girls!

The loving care, the good feed, the grooming and training our boys and girls have given their animals is bound to tell when they compete in the show ring.

We work closely with those who use Purina... the feed of Champions—as part of their fitting rations. We predict that some of these youngsters have animals that will be hard to beat!

To all our local contestants... best of luck! Many will win ribbons but all will be winners... because of the practical knowledge they've gained in the care and feeding of livestock.

The News Visits A Mint Still

by Ann Sheets

"What's that thing?" Todd asked as we drove aimlessly through the country last week in an attempt to cool off.

"A mint still," we replied, not paying much attention.

"What do they do there?"

"Oh, they get mint."

"How?"

We were obviously losing ground. Besides, how did they get mint? We stopped to find out.

If we had been hot before, we were now suffocating in the intense heat of the still operation where we met Mrs. Walter Yant who was busy firing the huge boiler in an attempt to

heat up the 80 pounds of pre-sorted mint for a successful

Between shovels full of coal Mrs. Yant explained some of the operation to us. About how the plants were planted in rows on the first year and how after that they were plowed up only to return the next year in a carpet all over the field. She explained about the weeding process and told us they harvest only once the first year. After that they harvest the peppermint twice a year with an average field producing four or five years. Some fields on good firm ground will produce as long as

12 - 15 years. She explained that the best ground for the mint is that area between muck and high ground.

The mint is harvested either early in the morning or in the evening so that some moisture is present. It is first cut and

dried like hay and then is chopped into specially constructed trucks. The trucks have heavy steel sides and are filled to the top with mint.

After the truck is brought to the still the mint is packed down tightly while live steam is pumped into the bottom of the truck. After being thoroughly packed down the truck is driven under a huge "lid" which is

clamped onto the truck and steam is pumped into the truck at the bottom and as the steam goes through the truck the oil goes out a pipe in the top of the lid and then into a condensation tank. There the steam is cooled by coils of cold water and after a few minutes raises to the top when it can be drained off. Depending on the condition of the mint, the load can be cooked out in from 30 minutes to two hours. As a rule a good crop of mint will produce between 30 and 35 pounds of oil per acre.

Mrs. Yant and her husband, who joined us when he brought in another load of mint, explained that hot-dry weather is needed for mint and that a rain can mean a loss of several hundred dollars. They have been operating their still near Loon Lake for twenty years and in that time have seen many other stills go out of business because of the changing weather pattern Indiana has been undergoing. Another factor involved in the closing of the stills is the lack of help which is partially created by the hours demanded for the harvest.

At the far left is the huge boiler which provides the necessary heat for the mint separation process. The steam enters the truck, right, at the bottom and forces the oil through the tube seen at the top. The top tank is filled with cold water which cools the oil as it drains into the center two tanks. After the oil has separated and been drained off it is ready to market.

Mama Sheetz and company were accidentally caught watching the lid operation. The truck is driven under the huge "lid" and is fastened down securely before the steam is forced into the bottom of the truck.

This is the peppermint still operation of Mr. and Mrs. Walter Yant which is located near Loon Lake. The Yants, in the foregrounds have been harvesting peppermint there for twenty years. Out of sight, at the far left, is a giant smoke stack which belches forth black smoke as the boiler is fired. If you think your job is hot, you should try theirs.

Ettingers Entertain German Guest

The Bill Ettinger family had the pleasure, two evenings recently, of entertaining an unusually interesting supper guest. He was Mr. Jochen Renz, (pictured above on the right, with Mr. Ettinger on the left, of Stuttgart, Germany.

Mr. Renz is in the United States as a representative of the Karl M. Reich Machine Factory of Nurtigen, West Germany. He is making a 9 month tour of their many outlets in this country.

One of their outlets is the Tyler Machinery Company of Warsaw, for whom Mr. Ettinger is a representative.

The Karl M. Reich Company has been in business in Nurtigen for 50 years, and employs 800 people. They make planers and heavy machinery.

A personable young man of 26, Mr. Renz started with the company 10 years ago as a sales apprentice. He has been married 1½ years, but his wife was unable to make the trip with him. She is a school teacher, and her teaching duties kept her there. Her job keeps her quite busy, as their school operates six days a week.

Mr. Renz is very well impressed with this country, particularly with the modern factories. He drives a Volkswagen bus, fully equipped before shipment to the United States with his company's machinery for the tour, and when given the opportunity to drive Mr. Ettinger's streamlined American car, quite obviously enjoyed it.

There were some things Mr. Renz made especial comment on. One was the amount of living space we have here. In Germany people are much more crowded. Another was corn served for supper. Although he enjoyed it, he never had seen it eaten before. Potatoes cooked with the skins on were another

"first" for him. It happened that he was in Mentone during Friday night's storm of two weeks ago. That was quite an experience for him. They have thunder and lightning in Germany, but he had never seen so much wind.

During his visit, the Ettingers enjoyed hearing about life in Germany. Mr. Renz described his hometown of Stuttgart in World War II, when all the buildings were levelled by bombs. It is all rebuilt now, with most traces of destruction gone.

A highlight for Mr. Renz was a trip to Nappanee, where he was very interested in the Amish. He was delighted to be able to snap a few pictures of them.

So far his trip has taken him down the East Coast, across the South, and up the Mississippi Valley. From Warsaw his next stop was Fort Wayne. The following weeks will take him to points in Michigan, then Chicago, and eventually he will work his way to the West Coast.

Upon seeing Mary Ettinger's homemade brownies, Mr. Renz revealed signs of homesickness, and admitted he is already looking forward to December, when he will arrive home for Christmas.

HULLABALOO SHOW TO BE AT '65 INDIANA STATE FAIR

It's "twist and shout" time when the Hullabaloo Show swings into the 1965 Indiana State Fair, September 6! Popular billiard Bobby Vinton will host the star-studded show, which includes such featured entertainers as country western singer Roy Clark, the Good Time Singers, the Collins Kids, The Clinger Sisters, NORAD (North American Air Defense Command) bandleader Mark Azzolina, and of course, the TV Hullabaloo Dancers.

Bobby Vinton, host of Hullabaloo, is most familiar to the teenage audience for his popular rock and roll recordings, including million-record sellers "Blue Velvet" and "Blue on Blue". Roy Clark, billed as "the world's fastest guitar," is a fast-rising singer-comedian who has appeared most frequently on the Tonight Show, along with other appearances on the Jimmy Dean Show, the Dick Clark Show, and the Tennessee Ernie Ford Show. The Good Time Singers, a foot-stamping, hand-clapping folk-singing group are a familiar sight to regular viewers of the Andy Williams Show.

Hard work and determination have earned the young and pretty Clinger Sisters a natural spot on the Danny Kaye Show, where they delight audiences with their singing. Columbia recording stars Larry and Lorrie Collins, known professionally as the Collins Kids, have appeared as a singing and dancing team on virtually every well-known TV variety show, including the Ed Sullivan Show and Hollywood Palace. Azzolina, musical conductor and officer in charge of the NORAD "Cavalcade of Music" Band, will appear with the Hullabaloo Show in a conducting capacity.

Tippecanoe Valley School Board Sets School Budget For Hearing

by Robert Forbes
T.V.S.C. Superintendent

The Tippecanoe Valley School Board at a special meeting July 30, 1965, tentatively adopted for advertising a budget for the school corporation of \$1,058,843.00 for the calendar year of 1966.

Compared to the 1965 budget as advertised the proposed budget for 1966 is down \$36,257.00. All accounts with the exception of one showed a decrease in appropriation. General Administration, Coordinate Activities, Operation, Maintenance, Fixed Charges, Auxiliary Activities, Debt Service, and Capital Outlay all showed reductions from the 1965 budget. Instruction, however, showed an increase from \$596,000.00 to \$685,843.00. This was mainly because of substantial increases in teachers' salaries the past year and anticipated increases next year, several of which will be mandated by law.

Awarded Scholarship

Roger E. Nellans

Roger E. Nellans, son of Mr. and Mrs. M. x Nellans, Mentone, has been awarded a Schlensing Scholarship, in the amount of \$500, for the academic year 1965.

Mr. Nellans was selected from a large body of applicants from the Indiana University Medical School which has an approximate enrollment of 700.

Approximately five Schlensing Scholarships are given annually, the award being based primarily on academic achievement of prior years.

Nellans, starting his second year in medical school, is married to the former Suzann Parker, daughter of Mr. and Mrs. S. L. Parker, of Spring Hill Acres, Warsaw. Mrs. Nellans is in her third year at Butler University preparing for a secondary teaching degree.

Mrs. Shoemaker Is New J.P.

Mrs. Kenneth (Patricia) Shoemaker of Mentone has been named Justice of the Peace for Harrison township to fill the vacancy created by the death of Clarence Eiler two years ago. Mrs. Shoemaker's nomination must have final approval by Gov. Roger Branigin. Mrs. Shoemaker is the daughter of Mr. and Mrs. Earl Shinn of Mentone and is the mother of three sons.

Fire Control Board Established

The Monday night session of the Mentone town board saw the presentation of several petitions for a new town hall to the town attorney Brooks Pinnick and the formation of a co-operative Mentone and Tri-Township Fire Control Board. The newly created board will allow one body to allow building contracts instead of each of the four areas doing it separately. This will also grant one authority for the maintenance of the new building.

The cost of the \$35,000 - \$40,000 new structure will be divided with Mentone town paying half. The three townships will divide the remainder of the cost with Harrison paying 5/20th, Franklin 3/20th, and Newcastle 2/20th.

Two from Mentone and one from each of the three townships will be named to the Fire Control Board.

Little League Ends Season

The Mentone Little League will end its 1965 season tonight. A picnic previously planned for August 6 will be held at the ball diamond on August 13. All Little League members and their parents are invited to the picnic and are urged to take cupcakes or cookies. The rest of the food will be furnished by the little league association.

Following the picnic, which is set for 6 p.m., awards will be presented to each team.

A trip to Chicago to see the White Sox play, which was previously planned, has been cancelled due to a new ruling forbidding school corporation buses from going out side a 50 mile radius. All schools receiving state aid are included in this law.

Glenn Petty To Be Mentone Coach

Glenn Petty, a native of Fortville and a graduate of Fortville High School and Butler University, has been named head coach at Mentone High School to replace Roger Bridge who resigned to accept a position at Tipton.

Petty has coached for two years at Eaton. A 1963 graduate where he studied on a full-tuition athletic scholarship, he was a member of Tau Kappa Epsilon fraternity and the Butler Letterman's Association. He is a member of the Masonic lodge.

Mr. Petty is married and is

the father of one son, Adrian Jay.

Big Catch!

Terry and Gary Harrold, sons of Mr. and Mrs. Arden Harrold, R. R. 1 Mentone, are shown holding part of their big catch from the Tippecanoe River last week. The largest of the fish pictured here is a 2 1/2 foot small mouth bass. The next one is a 10 inch carp which proved to be full of eggs. Using night crawlers for bait, the boys brought home several more. They had a large catfish on the hook. Their father estimate it to have been 2 1/2 foot long, but they lost it about three feet from shore. Dad sheepishly admitted of all the fish the trio brought home, he caught only one!

Left to right: Dr. C. L. McFadden, chairman of the Muzzle Loading event with his son, Richard Coppes of Warsaw, Representative Charles Halleck, and Mike Yazel, winner of the event. Hallack made several remarks at the event and urged all constituents to write to him and give him their opinions concerning current events. He stressed the importance of this and of all people working together for what they feel is right.

Water Safety Course Planned

A Water Safety Instructor's course, sponsored by the Kosciusko county chapter of the American Red Cross, a participating United Fund Agency, will be conducted August 23, 24, 25, 26, 27, at the Epworth Forest Beach, North Webster. It was announced today by Stanley Kintzel, Warsaw, and Earl Money, Syracuse; co-chairman of water safety for the chapter. Sessions will be held from 5 to 8 p.m. each day. This is a change from the date previously announced.

Charles Hefley, director of the water front at Epworth Forest, will be the instructor. Mr. Hefley, teacher in the schools at Marion, is an authorized American Red Cross water-safety instructor. His teaching professional training includes pupil guidance.

Men and women aged 18 and over of high school graduates, who plan to use this training to teach others may enroll. They must have completed the current ARC Life Saving course. It is required that they attend all sessions.

Phase one of the course is a review of swimming strokes, carries, etc. Any currently authorized water safety instructor can pass the enrollee on phase one, or they may contact Mr. Hefley.

FARM NOTES

Donald E. Frantz
County Extension Agent

A recent study of integrated egg businesses were made in the mid-west, much of it in Indiana. In the study the effort was made to find out why integration has grown and what people think about it and to gain insight as to what future patterns will be.

It was of interest to not that contract producers were satisfied with their arrangement even though they may have lost

some of their management functions. On the other hand the independent egg producer has remained so largely because he values the right to be his own manager all the way.

There are many interesting things in the report and I have some extra copies. It is research number 795, Coordinated Egg Production and Marketing.

The next 90 days could be critical for Indiana pastures. But good management can give them the strength to carry cattle safely through this low moisture period, explains Purdue University extension agronomist Howell Wheaton.

He offers these tips on summer pasture management:

An almost essential practice is to clip weeds when they begin to hamper production. By mowing a pasture of water and nutrients, weeds can reduce potential production as much as 25 per cent. Pasture clipping, in addition to weed control, will all more uniform grazing.

If no clover, alfalfa or other legumes are present, grass pastures may be sprayed with 2, 4-D, using label instructions, to control broadleaf weeds.

Another production boost can come from rotational grazing. Use an electric fence to divide fields into two or three lots. Wheaton suggests. If a severe feed shortage is possible, green chopping for 40 to 60 days through the dry season will give at even greater increase in feed produced.

It's still time to fertilize, the agronomist says, and adequate fertilization increases the efficiency of water use.

In most areas of the state there is enough soil moisture present to make use of additional plant nutrients. Alfalfa and clover fields will respond to summer-applied phosphate and potash. In absence of soil test, use at least the equivalent of 200 pounds of 0-25-25, Wheaton says.

Pasture and hay fields that are largely grass can use an additional 40 to 50 pounds of actual nitrogen.

Many times production is limited by a potash or phosphate deficiency, and not a deficiency of water.

If Sudangrass or sorghum-grass supplementary pastures are used, they will also respond to 40 to 50 pounds of nitrogen after the first harvest. Leave enough stubble to give the plant a chance to come back. Sorghum-sudan crosses are particularly susceptible to clover grazing.

Research indicates that leaving a six-inch stubble provides more production than leaving a three-inch stubble. Allow growth of Sudan-grass to reach at least 18 inches before grazing or green chopping. This not only is a good practice from the standpoint of total production, but it reduces the danger of prussic acid poisoning.

New seedlings may provide feed in late August, so don't neglect them now. Young grasses and clover seeded in wheat or oat fields suffer from competition.

Remove the straw as soon as possible, because the young tender plants need light and air to survive. And don't forget to clip weeds. Young grass and legume seedlings can not remain healthy and vigorous if they are covered with straw.

Tippe Mission Group Meets

The Women's Missionary Society of the Tippecanoe Community Church met Wednesday evening at the home of Mrs. Blanche Harmon. The meeting opened by singing "Wonderful Words of Life" and prayer by Mrs. Rex Fites.

Devotions were given by Mrs. Treva Moore using Ga. 5-1, Matt. 10:28-31, and two poems "Am I Selfish" and "What I Call Living". Mrs. Fites reported on the repaired sweeper. The quilt committee asked for old blankets for their quilts.

A letter was read, telling of the needs for Children Haven for Children. Plans will be made to visit the home in the near future. Mrs. Fostie Sill gave the program an article "Number One Sin" from Billy Graham's magazine, Decision. Four cards were sent and the meeting closed with prayer by Treva Moore. Present were 19 members, 4 children, one guests, Mrs. William Marks of Ft. Wayne. Co-hostesses were Mrs. Don Kauffman and Rosabel

Krutsch. Refreshments of perfection salad, fancy crackers, fruit drink and coffee were served. The next meeting will be at the LaMar Leffert home on Aug. 25.

Back From Camp

Eleven young people have returned from spending a week at Camp Adventure, Epworth Heights, North Webster, Indiana. The program at the camp for Methodist youth included Bible study and discussion, and small group camping. Altogether there were 175 campers and 35 counselors. Attending from Mentone were: Susan Shirey, Carmen Auglin, Kathy Yazel, Susie Romine, Jane Ettinger, Carolyn Boggs, Denis Teel, Brant Nellans, Debra Cooper, Susan Boggs, and Honey Hudson. Pat Smith and Diana Sarber served as counselors. Rev. Campton, of Mentone, assisted by Mrs. Campton, was the Camp Director.

THE UPPER ROOM, NASHVILLE, TENNESSEE

Thursday, August 5, 1965

Read Luke, 6:17-23

Come unto me, all ye that labour and are heaven laden, and I will give you rest. (Matthew 11:28).

While in Cuba once, I was asked to preach to a rural group far from a city. The appointed place was on a hilltop from which we could see for many miles. At the schedule time, with the friendly faces looking up at me from their positions on the ground, I began to speak.

My interpreter touched my arm and pointed into the growing darkness toward a lantern being carried someone moving up toward us from the valley below.

The latecomer was a weary but radiant mother, carrying in her arms the disease-twisted form of her daughter. As the mother sat on the ground tenderly cradling her, they both smiled up at me expectantly. I thought of the comforting words - words of peace and hope - of our Savior as He stood on a hillside long ago speaking to the expectant multitudes.

PRAYER: Our Father, how thankful we are for the glorious message of love, as revealed through our Savior, Jesus Christ. Create within us an attitude of concern for people the world over, and help us reverently and joyously to proclaim Thy Word throughout all the journey of life. In Jesus' name. Amen.

THOUGHT FOR THE DAY

What glorious news we have to

share with the expectant world!

Return From Extensive Trip

Mr. and Mrs. Max Nellans recently returned from a three week vacation trip which covered 22 states and 8,200 miles. Their route covered the Bad Lands, Black Hills, Yellowstone and Grand Tetons National Park, Grand Coulee Dam, Seattle Civic Center (former World's Fair site), San Francisco's Golden Gate Bridge, the great redwoods in Sequoia Park, Las Vegas (unbelievable at night), Zion and Grand Canyons, Phoenix and Denver.

The Nellanses thought each new wonder more awe inspiring and beautiful than the last one they had seen but decided that this is a natural reaction of all tourists. After all, how can one judge which is the most awesome and beautiful - for instance, the manmade Grand Coulee Dam with enough concrete in its structure to make a four-lane highway from Seattle to New York City or nature's greatest wonder, the giant 3,000 year old redwoods that have over 600,000 board feet in one tree, enough lumber to build 40 bungalow homes.

Odds And Ends

by Ann Sheetz

Whew! Am I tired! It turned into a real rough week-end all because I tried so hard to save money.

We collected quite a bit of

crystal in Germany and had some as wedding presents, but we'd never had a place to put it. I'd been looking at china cabinets at sales but they seem to range from \$25 to \$160, all too much. So with the adages "The Lord helps them who help them-

selves" and "make use of what you have" I dug into a closet and pushed out a large glass doored bookcase. In doing it I scratched the floor which will have to be fixed and lost my temper which will never be fixed.

By that time the closet was a shambles so I cleaned it-completely with washing the wood-work and mopping the floor. Found all sorts of things I'd forgotten or though lost. The old bookcase had held quite a few things in there and something was needed to replace it so Todd carried in an old chest of drawers. We had to empty that too and he found Loren's old Army belt and Todd's still wearing that. He can't unfasten it. Then there were the cards from all the countries we'd visited including the deck from Belgium with Hitler as the joker and Roosevelt, Churchill, Stalin, and DeGaulle as kings. That brought back old memories and slowed work just like the slide of the Neckar river we thought we'd lost but found. By this time we had the living room and toy room heaped with everything from my wedding dress to the old cards, and time was running out.

Todd sat in a rocking chair wearing the old army belt and Loren's alpine hat from Bavaria and bossed while I gather up the crystal. I managed to break one sherbert dish and poke a hole in the skirt of a Dresen figurine but everything finally went in place and the dining room look-

ed good. But the rest of the house! The buffet drawers, the hutch cupboard, the utility room, and the kitchen had joined the living room and toy room in looking like a tornado had ripped through. I worked late Saturday night and was the first one up Sunday morning, cleaning, sorting, burning, fixing.

The toy room looks okay again except for the mending. I piled on the sewing machine (found that stashed away too) and the living room is passable. Doug has admired the bookcase-turned china cabinet so much and so violently that when he looks at it anymore he automatically grabs the seat of his pants and runs. We've both lost track of how many times he's been smacked.

Some of the drawers still need a little more straightening and I'll have to touch up the floor - and I will too as soon as those sore muscles loosen up a little. Sure is a lot of work to save money.

Parson Jones Speaks

Dear Mr. Publisher

I conducted a Bible Study at our women's meeting the other night. I studied and they just set there. The trouble with most church gatherings is that the members expect the preacher to unscrew the tops of their heads like a fruit jar and then pour 'em full of religion. Trouble is most of their lids are rusted shut.

I had 2 strikes on me when I started the Bible study, mainly cause I was using one of these modern translations of the Good Book. Folks at our church just don't like these "new Bibles". One lady said it didn't even sound like Jesus talking when you read outa one of these. The hole group swore with one accord that you couldn't beat that ole timely religion.

The way I see it, Mr. Publisher, is that they want Jesus to speak in the King James English. It ain't much wonder that the church is loosing ground so fast. We're presenting a Jesus trying to tell a rocket age what to do - in the King James English. I guess folks figure if the Lord can't even speak our modern English he shore can't help us with our problems. Its pretty hard for me to see the Lord walking around in the United States calling everybody "thine" and "thou" and talking a-bout sheep.

Fine I'm concerned, if Jesus was on earth today he'd be driving a car instead of a jackass. He'd probably be wearing one of Robert Hall's suit and shave every day like most men. He'd be talking about atoms and space rockets instead of sheep and w.x candles.

All this business about trying to keep Jesus in the King James Version is another sneaky attempt to bar Him from the 20th century.

Just yesterday, Mr. Publisher, I was talking to a Catholic Priest friend of mine and he told how lotta his folks were upset over all the changes they were making, especially using English in the Mass. He allowed as how a site of good Catholics were confused. I told him now he could appreciate how confused us Protestants was when we heard it done in Latin.

It seems like maybe the good

Lord is tired of folks trying to make a antique outa Him.

While I'm riding a tricky horse Mr. Publisher, I might as well push him a little farther. You take a lotta what goes on in church Sunday morning could use a little bringing up to date. A hole bunch of our hymns are wrote and sung the way they done it a couple hundred years ago. They were up to date then, but some of 'em have got kinda stale since then. Maybe if we wrote some that had a modern beat to 'em, our teenagers might go around singing them instead of the Beetle songs. Along with that maybe a small band would do a better job than our choirs. Folks might pat their feet, but at least that beats sleeping.

Well I gotta go for now. Don't forget to remember to write.

Yours truly,
Parson Jones

Hawaiian Square Dance Enjoyed

A Hawaiian square dance was held Friday night at the home of Mr. and Mrs. Alton Perry with square dancers from Mentone, Atwood, Burket, Akron, Hartford City, Warsaw and Tippecanoe participating.

Mrs. Wilberta Williamson won the prize for the best female costume and her husband Richard won the prize for the craziest. Most of the couples came dressed appropos to the Hawaiian theme.

While the dancing was being enjoyed in the barn the children enjoyed a treasure hunt and a hot dog and marshmallow roast. There were twenty nine couples and 20 children present.

Men In Service . . .

SAN BERNARDINO, Calif.—Airman Third Class Bernard W. Hoffman, son of Mr. and Mrs.

Gilbert B. Hoffman of R.R. 3, Warsaw, Ind. has been selected Outstanding Airman of the Month for Norton AFB, Calif.

Airman Hoffman, a data services specialist, was chosen for the honor in recognition of his exemplary conduct and duty performance. He is a member of the Air Force Systems Command which manages research, development, production and procurement of USAF missiles, planes and support systems.

A graduate of Claypool (Ind.) High School, the airman formerly resided at 12 main St., Claypool. He received his B.S. degree in education from Indiana University.

LINCOLN, N.C., TIMES: "On the strength of the recent Supreme Court rulings, the Justice Department could conceivably challenge the more than 2,000 bank mergers that have taken place since the Clayton Antitrust Act was amended in 1950. There is no justifiable reason to question these mer-

gers. All have been approved by Federal agencies charged with maintaining sound and competitive banking in the areas affected. There is no evidence that such mergers have not been in the public interest and to subject them now to a differing standard is a reckless abuse of power."

JOHN DAY, ORE., BLUE MOUNTAIN EAGLE: "We're getting all kinds of information about health care for the aged . . . And, we do not believe it is in the interest of good government (by the people . . . for the people . . . etc.) for the federal government to be the sole proprietor of such a program when coverage as good can be provided without burdening every-

one with taxes which would be ever increasing. We believe the basic idea of the Eldercare proposal is the safer procedure."

EL DORADO, KAN., TIMES: "The Federal Aviation Agency has taken pains to let it be known that jumping from an airplane without a parachute is a breach of regulations. This is a step in the public interest, all right. If there's anything that will keep people from indulging in this sport, it is knowing that it violates FAA rules."

A Column of News By And For All Girl Scouts Of The Mentone Community

Bike Hike

Friday morning, the Junior Scouts left the Mentone Methodist Church on bicycles, headed for Crystal Lake for an all day trip. Town Marshall, Gene Norton, escorted the group out of town until they reached the country road. Each girl brought a sack lunch for the noon meal. Their destination was the home of Cheryl Clappitt at Crystal Lake. Cheryl is also a Girl Scout. After eating and enjoying some games and resting, the girls began the trip towards home. Mrs. Tom Harman, assistant leader, was in charge for the day Pam Abbey, Senior Scout, assisted and Tim Harman accompanied the group as "unofficial traffic coordinator." Junior Scouts making the trip were: LuAnn Miller, Linda and Deanne Mason, Sheryl and Terri McGowen, Candy Smythe, Sharon Crall, Debra Kelley, Lynne Knoop, Cindy and Marcella Allen, Barbara Rush, Karen McFadden, Debbie Coplen, Jessica Gross, and Betty Ettinger. When plans were first made concerning this trip, Lisa Harman also was to go, but because of her recent

broken arm and hospitalization, she wasn't able to join the rest.

This 14 mile trip was made with no serious accidents, no flat tires, (just one bicycle chain that persisted in coming off) no sick girls, etc. We feel it was a most pleasant trip and all seemed to think it was an enjoyable day. Just don't ask this assistant leader to go on another such trip, at least until her sore muscles are better!!

Brownies

Enjoy Outing

The two Brownie Troops of Mentone enjoyed an all-day outing at the Girl Scout Cabin in Warsaw on Tuesday.

Their guests and drivers for the day were: John Ettinger, Mrs. Ernest Cooper, Mrs. LaMar Leffert, Mrs. Frederick Morgan, Mike Morgan, Mrs. Eldon Seny, Teri McGowen, Lori McGowen and Sheryl McGowen.

Girls from Troop 108 attending with their leaders, Mrs. Howard Allen and Mrs. Ora Carmean, were: Cheryl Anglin, Pam Carmean, Brenda Coplen, Seita Coplen and Sandy Mason.

Their guests and drivers for the day were: Mrs. Kenneth Anglin, Marcella Allen, Cindy Allen, and Greg Carmean.

This concludes the summer activities for both troops. They will both resume meetings on September 14.

Pop Sold

The Caddette Scouts and the Junior Scouts were asked to sell cold pop at the City Park Saturday afternoon during the Chicken Barbecue Day. The girls were located 'over the bridge' where the Muzzle Shoot was taking place. Even during the rain, these girls were real busy trying to sell their pop. All money taken in will go into the Park Fund.

Mentone H.S. Completes Summer Season

by Roger Bridge

Mentone High has just completed the most successful summer baseball season in the last 10-15 years. The boys, after losing their first three games to Syracuse, No. Webster, and Akron, decided to go to work and proceeded to win their next eight games in a row before losing a 6-4 heartbreaker to No. Webster in the county tourney.

The fall season will start on August 23 at Mentone with No. Webster being the visitors. If possible, the whole town should turn out to watch these boys as they are a real bunch of competitors.

DID YOU KNOW?

Mark and Greg Kralis have returned recently from spending a week at CRO camp, Camp Lawrence, near Valparaiso, Indiana. Suzanne and Cindy Kralis attended the same camp two weeks earlier.

Mr. and Mrs. Ralph Warren were Monday dinner guests of Mr. and Mrs. Arthur Luty of Tiosa. Other guests were Mrs. Warren's brother and sister-in-law, Mr. and Mrs. Dwight Luty of Chandler, Arizona who had not been here for fourteen years. Surgery was required to reset one of the broken bones in Lisa Harman's arm last Wednesday. She was able to return home Thursday, still wearing a cast, and her arm is healing nicely now.

An executive meeting of the PTA was held Tuesday evening in the home of Mr. and Mrs. Jerry Kralis. Those attending were Mr. Bill Ettinger, Mrs. Roger Ring, Mrs. John Huff, and Mrs. Tom Harman, Puff President.

The Misses Jennie and Jody Hudson spent a weekend recently with their grandparents, Mr. and Mrs. Floyd Huff, in Pierceton.

MANY ATTEND MENTONE DAY

A good crowd was in attendance all day Saturday at Mentone Day. Over 800 servings of chicken were consumed by spectators who watched a ball game, a Muzzle Loading event, a square dance and who heard Congressman Charles Halleck speak.

The square dance was moved to the Mentone gym due to the inclement weather. There thirteen sets participated in the dancing before a large crowd.

MARK KRALIS HONORED

A party was held Saturday at his home to honor Mark Kralis on his 10th birthday. Delicious refreshments of ice cream and cake were served to the following guests: Terry Jacks, Steve Bruner, Gary Peters, Scott and Eric Eggleston, Eddie and Roger Drudge, Ricky Lowe, and Craig Doran.

DID YOU KNOW?
