### Dr. Otis Bowen To Run For Representative

Otis R. Bowen, M. D., physician, has announced that he intends to file as a candidate for Joint State Representative on the Republican ticket for Marshall and Fulton counties. Dr. Bowen said: "I have served three terms as State Representative for Marshall County. Reapportionment has placed Fulton and Marshall Counties in the same representative district. These two counties will make a fine representative district because their cultures and their make-up are so similar and because they have many common interests."

Dr. Bowen said that he was pleased to have the opportunity to run in Fulton County as well as in Marshall County because he was born and raised in Fulton County. He was born near Rochester in the Richland Center Community, attended school in Kewanna and Fulton, and his parents live in Leiters Ford, besides having many relatives in the Akron and Rochester areas.

Because of these close ties, Dr. Bowen said: "I feel that I can assure the people of Fulton County of my sincere interest in them and their problems as well as assure the people of Marshall County that I would do my utmost to continue to represent them the best that I can."

## Jody Horn Dies In Crash

Jody Arlene Horn, sixteen year old daughter of Mr. and Mrs. Howard Horn of Mentone, was killed Saturday afternoon in a one car crash three miles northeast of Akron when her car dropped off the highway, went into a ditch, struck a fence, and came back on the road, hitting a tree broadside. She was thrown from the car and died a few minutes later in Woodlawn hospital.

Miss Horn died of a multiple skull fracture and lacerations to the face and left shoulder.

A passenger in the car with her, Miss Judy Lynn Gagnon, 16, an Akron junior, was injured in the crash. She received a broken collarbone, lacerations and shock. Her condition is reported as improved.

The two girls were returning from the afternoon session of the sectional tournament at the time of the crash.

The daughter of Howard and Pearl Davis Horn, Jody Horn was born in Kosciusko county April 27, 1947. She was a member of the Mentone Church of Christ, the Future Homemakers of America and the Mentone G.A.A.

She is survived by her parents; a brother, Lester of Flint, Michi-

At that time a group of farmers gathered at the Courthouse in Albion and were told about a new addition to the Farm Credit System. That is what we know today as the Albion Production Credit Association.

The total capital of the new cooperative in 1934 was \$45.00; today it has grown to over 2 1/2 million dollars.

### DID YOU KNOW?

### Goshen's Answer To Beatles To Appear At New- Castle Institute

The "Swinging Capers", Goshen's answer to the Beatles, will appear at the 1964 Farmers' Institute at Talma next Friday night, March 13. They are a group of talented youngsters, with shorter hair, who have worked up a dance band with a "beat" which has delighted many teenagers and many adults.

The five boys range in age from 13 to 15 and have developed a band which has already entertained at high school dances, at Gyrab, the Goshen youth recreational center, and at private parties.

All their numbers are self-taught with no music director to help them, and parents are pressed into service only to haul instruments to and from practice sessions and to dances, since none of the boys is old enough to drive.

Most of the practicing is done at the home of Mr. and Mrs. Dale Curtis, who have two sons, Tom, 13, and Mike, 15, in the band. Mrs. Curtis is a nationally known fashion designer of infants and children's wear, and she made the red corduroy vests and black pegged trousers which the boys wear with white shirts and black ties.

Other members of the group include 14 year old Andy Purvis, 15 year old Norman Grinstead, and Mark Harper, 15. None plan a future in music.

## Dottie Decorates

### 1-FOR THE LONG NARROW ROOM!!!

1. The long, narrow room isn't as big a decorating problem as you may think. With a little thought and effort it will look as if you had built it that way on purpose. The arrangement pictured above divides the room into dining and living areas. It actually gives the illusion of two spacious rooms. Place the sofa at right angles to the fireplace wall to serve as a room divider, and center the dining table and chairs in front of the fireplace. If space permits you can add extra storage units to the back of the sofa.

2. Though most rooms pose their special problems, you can solve them with a little ingenuity. The bigger the problem, the greater the triumph. We hope the floorplan shown is the solution for your room. Be sure and keep it flexible enough for easily made changes.

3. Investigate the great variety of interchangeable furniture units in the stores today. These units

come finished or unfinished and with a great variety of textured doors. They can be arranged in many different ways depending on the size of your room and your needs. The dining area grouping shown here could as easily be used to store books or other accessories.

### We Get Letters . . .

#### REASON TO BE PROUD

Although a final record of 12 wins and 10 losses may not appear too outstanding, an analysis of the schedule engaged in by our Mentone Bulldogs this past winter brings out some unusual features.

Several years ago it had become obvious that a really good team would require the stimulation of tough competition to reach its maximum performance. As a result, there has been a continuing effort to schedule the stronger teams from the surrounding area. That this effort reached an almost unexpected height is shown by the following figures:

Mentone lost to 9 teams this year (having lost twice to Culver).

Of the 9 teams which beat our Bulldogs, 7 squads made it to the semi-finals of their Sectional Tournaments, as follows:

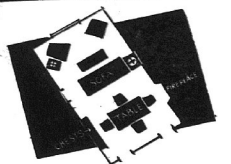

At Logansport	North Miami
At North Manchester	North Caston
At Plymouth	Pioneer
At Knox	Culver
At Warsaw	No. Judson
	Warsaw

Of these seven, no less than 6 made it to the final game, and only Warsaw's gallant failure against Columbia City kept Mentone-conquerors from winning every tourney. There could be one victor among the three at Logansport, where Pioneer came through, while Manchester, Culver, and North Judson were all victorious.

Of the only other teams to beat the Bulldogs, Claypool's fine young Knights were beaten by Coach Bridge's quintet in the sectional, while Pierceton lost to a good Milford squad.

So, perhaps our 1963-64 Bulldogs were not the best team in the area, but it certainly took the best ones to beat them!

## COUNTERPOINT

by Mrs. Arley Cullum

Here is a good question: "If you don't enjoy what you have, how could you be happier with more?"

The following Rules of This Establishment were handed to us by a friend and were reprinted in the Merchandising News and Views, as they were found in an 1878 Carriage Shop.

"Employees working here shall dust the furniture, clean their desk and sweep the floor daily. All windows shall be cleaned once a week.

Each employee shall bring his own bucket of water and scuttle of coal for the day's work.

Lamps shall be trimmed and chimneys cleaned daily.

Working hours shall be 7 a.m. to 8 p.m. every evening, but the Sabbath. On the Sabbath everyone is expected to be in the Lord's House.

Employees are expected to trim their own pen nibs to suit themselves.

It is expected that each employee shall participate in the activities of the church and contribute liberally to the Lord's work.

All employees must show themselves worthy of their hire.

All employees are expected to be in bed by 10 p.m. Except: each male employee may be given one evening a week for courting purposes and two evenings a week in the Lord's house.

After an employee has been with our firm for five (5) years, he shall receive an added payment of 5¢ per day; providing the firm has prospered in a manner to make it possible.

It is the bounded duty of each employee to put away at least 10% of his wages for his declining years, so that he will not become a burden upon the charity of his betters. Any employee who is shaven in public parlors, frequently visits pool rooms or uses tobacco, shall be brought before the management to give reasons why he should be continued in employment."

(That was before the pendulum began to swing toward "collective bargaining".

We enjoyed this: My father, a tailor, was well acquainted with the seamy side of the trade with its bickering and harassment, but this particular day he'd had just about all he was going to take. Then toward evening a Mrs. Nason entered his little tailor shop and asked how much he'd charge to shorten her coat.

"Five dollars," my father answered.

"Five dollar!" Mrs. Nason huffed. Five dollars! Why, your competitor Mr. Hagonpian, across the street only asked \$3.50!"

"Then let him do it," my father responded.

## WHAT OTHERS ARE DOING

**LAFAYETTE:** John C. Raber of West Lafayette, candidate for the Democratic nomination for Congressman of Indiana's second district, pulled his popcorn-popper campaign caravan into the state capitol parking lot in Indianapolis at midnight February 24 so he could be "first in line" outside the door of the office of the Secretary of State when filing for candidacy officially began.

**GREENCASTLE:** DePauw University announced today it will begin a search next week in Indiana to select the first recipients of scholarships which have been created by its new \$22 million Malpas Trust Fund. The huge fund was established last summer in the will of the late

Rolla M. Malpas, Lebanon, Indiana philanthropist and retired insurance executive.

**DALLAS, TEXAS:** The 22nd annual meeting of the National Electric Co-operative Association will be held in Dallas March 8-12. Three hundred Indiana RE MC leaders will participate in the meeting, being among 7,000 officials and members of rural electric systems from 46 states who will attend. The theme of the meeting will be "New Dimensions in Rural Electrification." Topics ranging from the need for consumer action to the problems of poverty in rural America will be discussed at the four-day session.

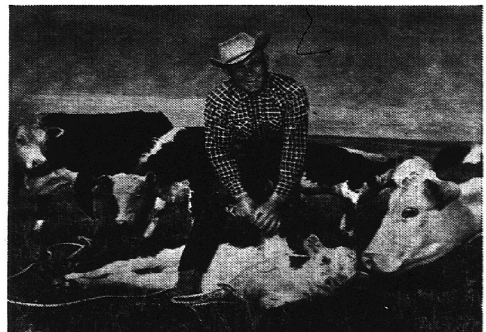

**TERRE HAUTE:** Two more 12-story residence halls will be constructed on the Indiana State College campus at a cost of \$4,079,297. The two halls, expected to be ready for use in September 1965, will complete the four-unit West Residence Hall project of 12-story halls. The first two units will be ready in September 1964. The units are not built with state funds, rather they have been financed with a \$4 million Housing and Home Finance Agency loan to the college and by issuance of revenue bonds to cover costs. The loan and bonds will be repaid from profits gained from the operation of the housing units.

## WHY STOCK COWS AND CALVES NEED WATKINS MINerals and VITamins

Stock cows, like all "mothers", need to be in good health to do their best... and good health and good nutrition go hand in hand. Yet your stock cows may not get the nutrients they need (especially the MINerals and VITamins) out of average range. And that can mean trouble. Cows that have a MINeral VITAMIN deficiency tend to have more trouble settling, more trouble calving, turn out more deficient calves and less milk. That's why so many stock cattle men are turning to Watkins MIN-VITE for Dairy and Stock Cattle... to make sure stock cows get the MINerals, and especially the VITamins they need to do their best. Call me. I would like to stop by and tell you about the Watkins recommended Stock Cattle Program.

## Students To Take Merit Tests

Twenty-five students at Mentone High School plan to take the 1964 National Merit Scholarship Qualifying Test, Gaylord Toll, principal, announced today.

The test will be administered at the school at 9:00 a.m., Tuesday, March 10. All students who wish to be considered for Merit Scholarships to be awarded in 1965 should take the test at that time.

The qualifying test is a three-hour examination of educational development. The test is the first step in the tenth annual competition for four-year Merit Scholarships provided by the National Merit Scholarship Corporation and by sponsoring corporations, foundations, associations, unions, trusts, and individuals.

The number of scholarships awarded in any year depends upon the extent of sponsor participation. In 1963, 1528 Merit Scholarships were awarded; 951 were provided by 179 sponsors and 577 by the Merit Corporation. There are 4118 Merit Scholars attending 425 colleges in the current academic year.

The test scores of students who are examined in March will be reported to their schools before May 15. The scores are used by counselors in many high schools to help students make decisions about college attendance and field of study. Many students who do not expect to win a scholarship take the test in order to learn more about their individual strengths and weaknesses in the areas measured by the test.

Some 14,000 Semifinalists, the highest scores in each state, will be named early next fall. Names of Semifinalists are published in a booklet which is distributed to all colleges and to other sources of financial aid for undergraduates. Further, their names and test scores are sent to the colleges they express an interest in attending as their first and second choices. The order of preference is not shown.

An additional 35,000 students, selected on a national basis, receive letters of commendation for their high performance on the are considered for special awards qualifying test. These students are considered for special awards made through the Merit Corporation, and their names and test

scores are also sent to their first and second-choice of colleges.

Each Semifinalist will be asked to take a second examination. Those who repeat their high performance will become Finalist in the Merit Program. Winners of Merit Scholarships will be selected from the Finalist group on the basis of school records and recommendations, test scores, extracurricular activities, leadership ability, and accomplishments outside the classroom. Each Finalist is awarded a Certificate of Merit attesting to his outstanding performance.

The scholarship stipends are based on financial need. The minimum award is \$100 and the maximum is \$1500. The average stipend awarded to freshman Merit Scholars in 1963 was \$796 annually, or \$3184 for the four years of college. Each scholarship constitutes a form of educational insurance, since the stipend may be increased at any time if the student's financial situation changes during the four-years term of the scholarship.

Supplementary grants are usually made to the colleges that the scholars attend.

## Beautify Dining Area

The cafeteria dining area is now a much more attractive and comfortable place to eat. Junior girls who are members of the Vocational Home Economics III class, under the supervision of Mrs. Arthur Carpenter, made the new draperies which are now hanging at the windows. The girls who participated are Diane Earnhart, Jody Horn, Lavina Bules, Sandra Grossman, Susan Mosier, and Nancy Wagner.

The draperies are greatly appreciated by the entire student body and school staff. In addition to creating a very attractive appearance, they cut out the direct rays of the sun which makes a much more comfortable situation in which to dine.

## Art Students Visit Exhibit

THE UPPER ROOM, NASHVILLE, TENNESSEE  
Thursday, March 5, 1964  
Read John 14:1-7

Jesus saith unto him, I am the way, the truth, and the life: no man cometh unto the Father, but by me. (John 14:6.)

"See a man wanted to go to a certain village on the other side of a mountain. He had never been there and did not know the way. Several offered to take him. Of one he asked, 'Have you been there?'"

"No," he replied, "but I can take you."

The traveler said, "You won't do."

The person who was selected to guide him was chosen because he said, "That village is my home."

Jesus Christ, sent of God, is man's Savior, guide, and friend. He is God's way to man and man's way to God. In Him God fully revealed Himself. In the love of Jesus we see God's love. In the words of Jesus we hear God's words. In Him we have God's standard for man, as well as the way to come up to that standard.

PRAYER: O God, we thank Thee for Thy Son Jesus Christ, our Redeemer, whom Thou didst send to live with us and to uphold us in the battles we fight and in the work we do. We commit ourselves into Thy hands with utter faith in Thy Son, in whose blessed name we pray. Amen.

#### THOUGHT FOR THE DAY

In Christ we have God's standard for men, and He gives us power to come up to that standard.

## It pays to let your pigs eat like hogs

It pays, that is, if your pigs are on Pioneer feeds. During our Hog Feed Purchase Plan you'll see your profits rise, while your pigs make rapid gains at low conversions. Pioneer feeds are the feeds with balanced amino acids for better protein building. Amino acids are the basic protein builders and when they're balanced, you get top production, top profits. Over the years, the Red Comb-Pioneer folks have developed the know-how to formulate feeds geared to the genetic capacity of Hogs in this area. So, go ahead . . . let your pigs eat like hogs. Stop in to get the details and see how it pays—in more ways than one.

## Talma Has Science Visitor

On Friday 21, 1964, Dr. Lawrence Strong, from Earlham College visited the science classes at Talms. His discussion was on liquid oxygen.

He told us that the boiling point of liquid oxygen is about 300 degrees below zero F. It keeps this low temperature by boiling, and when you put an object in it, the oxygen boils very rapidly until the object is as cold as the liquid oxygen.

When he put some liquid oxygen in a test tube and put a stopper in the opening it produced a force that blew the stopper across the room. It was caught by our principal, Mr. Acton.

Janet Gordon

Dr. Strong put a piece of rubber tubing in the liquid oxygen until it was cold. When he brought it out and pulled it, the hose shattered in many pieces.

Then he put a hollow football in the liquid oxygen. When he took it out and threw it against the wall, instead of bouncing back, it shattered to pieces. I enjoyed his experiment very much.

Stanley Shand

Dr. Strong used for one experiment a sealed glass container shaped like a hollow dumbbell. The bulb at one end had a cup-shaped depression to hold a liquid, while the other was a round. Inside the round end was a small quantity of water.

Dr. Strong poured liquid oxygen into the cup-shaped depression. The water in the round end soon froze. It froze because when it evaporates, it carries the heat with it and causes the water to cool down. The liquid oxygen cooled the vapor and condensed it as frost on the cup-shaped bulb.

When a living animal is to be frozen you must freeze it very quickly so that ice crystals will not puncture the body cells. If these cells are punctured the animal will die. Liquid oxygen is so cold that it will freeze the animal very quickly.

Dr. Strong demonstrated this with a live goldfish. Taking it from the bowl and putting it into the liquid oxygen. It froze almost instantly. Quickly he brought the fish out and put it back into the bowl. In about 10 seconds the fish came back to life. This proves that living animals can be frozen by liquid oxygen.

Brent Flenar

Oxygen supports combustion. To show this, Dr. Strong had hydrogen and oxygen in a pop bottle. He ignited it with the bunsenburner. The two elements combined with a great noise. If you combine hydrogen and oxygen you get water.

Peggy Rensberger

## FROSTBITE

FROSTBITE time is here again. The parts of the body most susceptible to frostbite are the toes and fingers; these extremities are farthest from the central heating department of the body. When blood circulation is decreased, as it is by cold, the extremities are the first to be affected.

However there are other factors besides low temperatures that contribute to frostbite: duration of exposure, intensity of the cold and the velocity of the wind. In the presence of a strong wind, frostbite may occur in temperatures that otherwise would not be harmful.

Dry cold is tolerated by humans better than moist cold. Wearers of wet clothing, shoes or gloves are particularly susceptible to the effect of cold weather.

Signs of frostbite are dead whiteness of the skin, coldness and numbness of the flesh. Victims should be taken indoors and the frozen parts warmed rapidly in warm water or in a warm blanket.

The frostbitten area should not be rubbed, as the tissues while in that condition are easily torn or bruised.

## FAT PARENTS: FAT CHILDREN

FAT PARENTS and tension often add up to overweight, says Dr. Edward M. Litin, chief psychiatrist of the Mayo Clinic. Overeating in general, he says, represents an effort to ease intolerable tension. But tension or otherwise, there's no question that fat parents beget fat children. If parents are overweight, the odds are as high as 80 per cent that their children will be too, according to Dr. Litin.

SUPERSONIC transport planes will not only cost about \$20 million each, they'll have much less margin for error than today's jets. For example, by flying a couple of thousand feet too high or too low, manufacturers estimate, pilots could easily add \$180,000 a year to the fuel bill for a single plane! . . . FOOD sterilizing on a large scale is possible with Holland-made equipment now being marketed in the U.S. As many as 1,500 containers a minute can be processed in the hydrostatic units, reports Votator, Louisville. The containers are carried by endless conveyor chains through preheating, sterilizing, cooling and drying stages housed in steel towers.

ABRAHAM LINCOLN's unusual body build was probably the result of an inherited disorder, Marfan syndrome, a disease of the connective tissue that affects skeletal development, vision and the cardiovascular system, says Dr. Harold Schwartz, Huntington Park, Calif. The syndrome, first identified in 1896, is marked by excessive long-bone growth which produces disproportionately elongated arms, legs, fingers and toes, with a long head and "long" facial features. The Lincoln-esque face, his severe farsightedness and very long arms and legs "strongly" suggest this syndrome, according to Dr. Schwartz. . . . BERRIES of the red sage, common in the Southeastern U.S., are poisonous, reports the American Medical Association. The plant, sometimes called wild sage and found in flower gardens, along fence rows and in fields, poisoned several children recently in Hillsborough county, Fla., one fatally.

THE MOON was once "dusty" and its "seas" probably actu-

ally contained water for a brief period three billion years ago, reports Dr. Charles R. Warren of the Department of the Interior's Geological Survey. Warren theorizes that when the dusty-ice began to approach the sun after being formed outside the solar system, the various ices began to turn to gases and steam away as they do in comets. The dust, however, was held to the moon by gravity and accumulated until it was many miles thick.

## 4-H CLUB OFFICERS TRAINING SCHOOL CONDUCTED

Twenty-six 4-H clubs were awarded 4-H Banners for 100 per cent attendance of their officers at the Officers Training School program, conducted February 19, at the Warsaw Freshman High School. Three hundred twenty-one officers representing the forty-nine 4-H clubs in the county were in attendance.

The clubs with 100 per cent attendance were as follows: American Maidens, Atwood Never Quitters, Atwood Victory, Be Better Young Ladies, Beaver Dam Better Daughters, Burket Busters, Chain-O-Lakes, Claypool Chefs, Claypool Cloverettes, Claypool Happy Hoosiers, Crystal Lake Cook and Look, Harrison Hustlers, Humdingers, Leesburg Plain Farmerettes, Leesburg Successful Farmers, Lucky Lassies, Milford Junior Misses, Milford St. Homemakers, Monroe Mere Men, Monroe Merry Maidens, Park Avenue 4-H, Pierce-Happy 4-H's, Room 4-U, Sidney Happy Hustlers, Sidney Triple "S" and Syracuse Community Hands.

The training school, which is sponsored by the First National and the Lake City Banks of Warsaw, is held annually to aid 4-H club officers in fulfilling the officer duties in their local clubs. It is one of the many leadership training activities of the 4-H program.

## Indoor Humidity Affects Comfort

North, South, East, West, no matter where you live, lack of humidity can be a problem.

Los Angeles had a record low of less than one per cent humidity recently.

In Chicago, the Weather Bureau says outside air at zero degrees with 100 per cent humidity will drop to 6 per cent humidity when heated to 72 degrees — drier than the average desert!

Low humidity contributes to dry, itchy skin and respiratory ailments; makes wood panels crack, pets shed and house plants droop. The solution? A humidifier, which draws air in and forces it through a wet screen of Scott industrial foam. Hot dry air picks up moisture from the foam, and is blown into the room as humidified air. Odorless, flexible urethane foam pads filter dust particles, and are easy to remove for cleaning or replacement. Controls keep humidity in the comfort zone — 30 to 50 per cent indoors.

## 10 years of research behind Purina Early Weaning Chow

Purina Early Weaning Chow for baby pigs is extra palatable, highly-fortified, nutritious. It's made for hogmen who plan to wean pigs at 3 weeks... or even earlier. It's used in early weaning of late-farrowed litters, for orphan pigs or undersize pigs at normal weaning age.

In 6 tests on 616 pigs, Early Weaning Chow-fed pigs gained as fast as pigs on sow's milk and creep feed from the 3rd to 6th week — 77 lb. per pig daily — made 1 lb. gain from only 1.27 lbs. feed!

In on-the-farm tests, pigs followed the same pattern, weighed 23-33 lbs. at 6 weeks. Cost per lb. of gain on good pigs raised under good management ranged from 12¢ to 14¢.

## Rochester Farmer Employs Hydroponics Feeding

### P.M.A. Meeting Set

Dr. Henry T. Scott, director of the biological laboratory, Wisconsin Alumni Research Foundation, Madison, will talk on "The Truth About Dairy Foods" at the 39th annual meeting of Pure Milk Association at the Conrad Hilton Hotel, Chicago, Saturday, March 14.

This was announced today by A. L. McWilliams, PMA general manager, who also revealed that Senator William Proxmire of Wisconsin will be present at the meeting to receive an award from the association at noon luncheon.

The meeting will get under way at 9:45 a.m., with Avery A. Vose, PMA president, presiding. The program will include an outline of the dairy situation by A. W. Colebank, administrator of the Chicago milk marketing order; the general manager's report by Mr. McWilliams; the president's report by Mr. Vose; the treasurer's report by Walter C. Kirchner, and a business session.

Registration for PMA's 244 voting delegates from Wisconsin, Illinois, Indiana and Michigan will begin at 8:30 a.m.

### 1964-65 Dairy Support Prices Set

Dairy support prices for the 1964-65 marketing year have set at national averages of \$3.15 per hundredweight for manufacturing milk and 58 cent per pound of butterfat, Melvin R. Myers Jr., Chairman, Agricultural Stabilization and Conservation (Fulton County) Committee, said today. These prices reflect 75 percent of the parity prices for the two commodities. Comparable prices for 1963-64 — also at 75 percent of parity — were \$3.14 and 58.1 cents.

Dairy support prices are mandatory between 75 and 90 percent of parity, the Chairman explained. The law requires that the Secretary of Agriculture set, within this range, the level "necessary in order to assure an adequate supply."

Milk production in the 1963-64 marketing year has averaged about 1 percent less than a year earlier, and consumption of milk and its products has increased slightly. While purchases of dairy products were moderately smaller than in 1962-63, they have been large in the 1963-64 marketing year. It is anticipated that purchases will continue heavy in the 1964-65 marketing year.

In carrying out the program to support prices for milk and butterfat sold by farmers, the Department of Agriculture will, as in the past, offer to purchase butter, cheddar cheese, and non-fat dry milk in carlot quantities. Buying prices for these three dairy products are the same as the current year's prices because last year's experience indicates that these prices will keep producer average returns at the national levels announced today for the coming marketing year.

Fresh green grass every day in the year—regardless of the weather or the season—is the good fortune of the livestock on the Raymond Grant farm located five miles west of Mentone on State Road 110. This modern method of feeding livestock, known as hydroponics, has been increasing in popularity throughout the country. It has been used for growing vegetables and flowers for scores of years.

The underlying principle of which hydroponics is based is the growing of oats under lights 24

### Notes From Your County Agent

The mid-winter meeting of the Northeastern Indiana fruit growers will be held, Wednesday, February 26th, at the Day Hotel in LaGrange. The program will begin at 10:00 a.m.

The latest information on insect and disease control will be discussed with a special emphasis placed on the safe use of chemicals.

There is not much news in oats varieties for this year. The only new variety is Clintland 64 and there is no seed available for other than a few seed producers. These recommended for use in this area are Clintland 60, Goodfield, Putnam 61, Newton and Garland. The Goodfield variety was developed in Wisconsin and has done well on very good soil. It is a very short strawed plant and tends to be too short in any soil but the very best. Garland is another Wisconsin development and we know very little about it.

We are still partial to the Newton variety. It has some disease resistance that will pull it through in adverse seasons.

There is some good news out of Missouri. They have a new variety of hybrid corn called MO 12. It looks like an excellent yielder, a white kernalled corn and a double-cross hybrid that should make it disease resistant and stand up well. It was released for planting in 1963.

We have no information on how well it will yield but that doesn't matter. The contract price is \$50 a ton for the cobs. It is being raised for pipe making. This corn which grows an average of ten feet tall and has a cob about 2 inches in diameter which is extremely hard. Some of the notables pipe smokers like McArthur, Hoover, Hart and Frantz will be able to get a better grade Missouri meerschaum.

The year 1939 was the last year not affected by war or its aftermath. At that time people spent about 23 cents of their after-tax income dollar for food. At today's prices, we could get the same 1938 style groceries for 14 cents. Actually, today people are spending about 19 cents for food of each dollar they receive. Compared with 1938, we are buying more, buying better quality, and getting a lot of quick-fix services and a lot of pretty packages.

This 19 cent figure is the lowest percentage of income ever spent for food by any people at any time in history according to the Grocery Manufacturers of America, a trade association.

Outside this building is a bin which holds 350 bushels of oats, which is a two month supply for the 50 head of cattle. From this bin the oats are augered into the hydroponics unit. The unit has 36 large trays in each of which are 180 smaller trays, interlocked. Each day water is run into the top six trays. This is warmed to room temperature before it is used to irrigate the lower trays. Four and one-half ounces of plant food is added to the water. No soil is used at anytime.

The entire feeding operation can be done in less than one hour. A man merely stands in front of the unit and pulls out the first of the interlocking trays. As he empties one and draws forward the others, he runs the oats through the chopper. When the six have been emptied they are refilled and pushed to the back. The growing period starts again.

It is said that \$6.00 a day covers the complete operating cost of one unit of this size, and the cattle gain at the rate of under 15 cents per pound. Mr. Grant welcomes visitors who desire to view the set-up.

## Ann Rush Wins In Essay Contest

Ann Rush

Each year Indiana Daughters of the American Revolution sponsor an American History essay contest for students from grades 5, 6, 7, and 8. The subject for 1964 was "A Revolutionary Patriot."

Ann Rush, daughter of Mr. and Mrs. Paul Rush and granddaughter of Mrs. Bernice Rush of Mentone placed first in the state from Grade 7 of Talma Junior High, with her subject "Dr. Benjamin Rush."

Ann was sponsored by the Anthony Nigo Chapter, DAR, of Mentone. The object of the contest is to create greater interest in American History among young students.

The DAR Historian received thirty-six essays from sixteen chapters, twelve each of these were from the 7th and 8th grades where competition was keen, making it difficult for judges to select second, third, and fourth place. Judges thought that as a whole, the essays this year were much improved, with many more written in their own words and rules more carefully followed.

Each winner will receive a book and a blue ribbon. Ribbons will also be present for second, third, and fourth place.

Ann's essay is now in the hands of the East Central Division Chairman to be judged. Winners from this division will be sent to National at Washington, D. C.

## This Is Girl Scout Week

Mentone's Girls Scouts are celebrating Girl Scout week from Sunday, March 8, through Saturday, March 14. They are a part of the 3,000 members of Lakeland Girl Scout Council, which includes Kosciusko, Whitley, Noble and Elkhart Counties.

They join more than 2½ million other members of the Girl Scouts of the U.S.A., largest organization of its kind for girls anywhere in the world in the observance.

"A Promise in Action" is the theme, both of Girl Scout Week and the Girl Scouts' 52nd birthday, which occurs March 12. This date marks the anniversary of the first meeting of the United Girl Scout troop in the United States.

In Scouting, girls from 7 through 17 of all races and creeds obtain practical experience in working together for the common good. The purpose of Girl Scouting is to teach girls to get along with one another, to become better citizens, to be

of service to their communities, and to accept responsibility.

Girl Scouts of the U. S. A. was founded in Savannah, Ga., by Juliette Gordon Low on March 12, 1912.

Girl Scouts here are supported in part by the Kosciusko county United Fund.

Locally, troops have decorated three windows for display during the week. Brownie Troop 142, with Mrs. Georgia Teel and Mrs. Dale McGowan, as leaders have done the window of Bernice's Beauty Shop. Junior Troop 25, led by Mrs. David Cooper and Mrs. Jerry Hudson, have a display in the Deluxe Cleaners window and Cadette Troop 30, led by Mrs. Denton Abbey and Mrs. Loren Tridle are using the Times-Union window at Romine's Electric.

Some of the girls attended a Song Fest on Sunday afternoon held at the Scout Cabin in Warsaw. On Tuesday, March 10, they held a Mother-Daughter Banquet at the Methodist Church. Thursday the Junior and Cadettes are invited to attend a program at the Scout Cabin celebrating International Friendship day. Linda Truman will show films and tell about her trip to Ecuador.

Following Girl Scout Week activities the Junior and Cadette troops will be taking orders for cookies. Delivery dates are April 17 - 25. This is their chance to earn some money for camping trips and other activities.

## CATTLE FEEDING TOUR SET

County Extension Service Donald E. Frantz, County Extension Agent, A Cattle Feeders Tour and meeting has been scheduled for March 17. The stops to be made have not been finally determined but will be in the south part of the county this year. The group will eat at the Steer Inn at noon and will then meet with Paul Mitchell, Livestock Marketing Specialist, to look over the cattle price situation.

The price situation can stand some looking over at this time. The price for top quality cattle is at a seriously low point. There is an over supply of well finished cattle and at the same time people are selling some of the new crop cattle to avoid taking heavy losses. This has bunched the cattle even more. It will be worthwhile to get Mr. Mitchell's appraisal on this thing as he has had a lot of experience in about 3) years of livestock pricing studies.

—O—

Prune grape vines as soon as the chance of extreme cold weather is over.

Vines should be pruned every year from the time they are four years old for the best production. Here's how:

Cut back all the old canes to the main trunk of the vine. The older canes will be darker in color and heavier than last year's growth. Choose four or five of the newer canes and cut them back so that each has eight to ten buds. Tie them to a support.

With this type of pruning, summer pruning won't be necessary. Sap flowing from the cut area during the spring won't harm the plant.

To get grape vines started buy one-year-old vines. New vines can be planted as soon as weather permits. Set them eight feet apart in rows which are nine or ten feet apart. Set the vines about two inches deeper than they were in the nursery row. Niagara is the leading white grape in Indiana and the Concord is the most popular grape of all.

Grapes are gaining in popularity and are good from the standpoint of adaptability. They can be grown on a backyard fence and require little space. Vines will live for many years and even, old neglected ones can be easily rejuvenated to yield well.

What do you do with your living room? Everyone knows what goes on in family rooms, recreation rooms, game rooms, and dens. It has been suggested that the "living room" is going such items as the Sunday suit, the sterling silver, fine china and linens—used only for company and special occasions.

A quotation worthy of consideration:

"Democracy, as we have tried to shape it in America, has been heavily impregnated with the Ten Commandments of Judaism and the spirit of Jesus. Our democracy is not perfect. Imperfections exist, but its virtues exceed those of any other system mankind has tried. Democracy was never created to be a leveler of men. It was created to be a lifter, developer of men. It was created to lead the gifted, the energetic and the creative rise to high heights of human achievement, and to let each man find his own level on the stairway of existence."—Dr. Walter R. He shouldn't contradict or correct her in public.

He shouldn't speak slightly of her relatives.

"Oh, just fine," Robin replied.

"And what did you do in Sunday School?" Grandfather wanted to know.

## Good For A Loaf Of Bread

**EDITOR'S NOTE:** A six sided brass token was recently found by Ralph Ward which brought back fond memories to all who remembered C. E. Turner, a baker in Mentone 65 years ago.

Earl R. Shinn has recalled here for us many of the memories associated with the old brass token. The token can be seen in the window of the MENTONE NEWS office.

A six sided token or chip, plain on one side, the other stamped C. E. TURNER, GOOD FOR ONE LOAF OF BREAD, MENTONE, IND.—what pleasant memories has been recalled by this token. The heavenly aroma of freshly baked bread still hot from the oven, was the special smell intriguing to a husky growing boy on a clear, frosty morning. Occasionally this odor would be so irresistible that a group of boys, of which I was one, would pool their resources until we had a nickel to buy one of these delicious loaves of hot bread at the bakery.

It might be of interest to know that six of the brass tokens could be purchased for a quarter, entitling the customer to six large loaves of bread. Of course, as this was about 65 years ago, there has been quite a change in prices and times.

This bake shop was located behind the building now owned and occupied by Vincent Goodman, and was operated by Edward Turner in connection with a restaurant. Ed or Eddie, as he was familiarly known, was very versatile and was an outstanding citizen who contributed much to the community. His speciality was the cornet. He was also band leader and director. Along with this he was a good boxer, 100 yd. sprinter, but, like many others, age crept up and slowed him to the point that when he sprinted it was up and down in the same place.

Eddie missed no business opportunity. He shipped bread daily in large rattan baskets to towns located on the Nickel Plate Railroad. This no doubt explains the finding of the bread token in an old thread cabinet, originally belonging to Mr. and Mrs. Laurence Elick, who at one time resided in Packertown.

Mr. Turner died some years ago at Warsaw, Ind., aged in his middle eighties, ending a lifetime that in part was some of the history of Mentone in "the good old days."

## With The Sick

Patty Weber surprised her mother who had gone to visit her at the St. Joseph Hospital Saturday afternoon. She could go home! She is now home with her parents Mr. and Mrs. Walter Weber of Route 2, Akron, after spending three and a half months in two of the South Bend hospitals. Patty had mangled her right leg November 21st in a silo auger accident and has had four operations on it. She is in a wheel-chair now, feeling good, though the leg is still swollen. Trips back to the plastic and bone surgeon will be necessary each week for an indefinite time.

Mrs. Irvin Nelson is home from the Murphy Medical Center. She broke her leg several months ago, and later suffered a heart attack. Mrs. Curtis Neffans of Bourbon is with her.

Mrs. Delbert Ruberg, wife of the former pastor of the Talma Bible Church, fell and broke two bones and splintered a third bone in her left leg. She was to be released from the Lutheran Hospital Monday to go to their home at 3008 Webster Street, in Fort Wayne. She will be unable to be on her leg for at least three months.

Mr. Eric Lisdat was taken by ambulance, from the Prairie View Rest Home, to the St. Joseph Hospital, South Bend Saturday. He was admitted for tests which were to begin on Monday. His room number is 728-2.

The mother of Mr. Ralph Mollenhour, Mrs. Cleo Mollenhour, 209 W. Market St., Warsaw, received a severe neck whiplash as her car was struck from behind. Friday evening she had stopped at an intersection when a car without brakes rammed her car, shoving it into the intersection. She was taken by ambulance to the hospital for x-rays then dismissed. \$250 damage was done to her car. When Mr. and Mrs. Ralph Mollenhour visited her Sunday afternoon she was feeling a little better but has a very sore neck.

The World's Most Widely Used Devotional Guide

## The Upper Room

THE UPPER ROOM, NASHVILLE, TENNESSEE

Thursday, March 12, 1964

The Father hath delivered us from the power of darkness, and hath translated us into the kingdom of his dear Son: in whom we have redemption through his blood, even the forgiveness of sins. (Colossians 1:13-14.)

I once watched a blacksmith weld a broken axle on a toy wagon. He took the torch, and with it fused the alloy and the axle together. Having finished, he stepped back and said, "There it is, kid, made whole again. Maybe it isn't as smooth and pretty as before, but it's twice as strong."

Lives become broken when they wander from the will of God and fall into sin. These broken lives can be made whole again when welded with true repentance and the redeeming power of Christ. These lives may bear the scars, yet they are made strong in faith and for service in God's kingdom.

Through God's strength, the most sordid and broken life can be remolded to His holy will. Lives made whole receive their strength from God. He uses redeemed persons in the great task of spreading and strengthening His kingdom.

PRAYER: Our Father, grant us faith to believe that our broken and sinful lives can be made whole and useful through Thy Son's redemptive power. Renew us for service in Thy kingdom and for the Master's sake. In His name we pray. Amen.

1. One touch of wallpaper can add new interest to a room, or turn a wastebasket into a work of art. The above sketch shows various ways you can use wallpaper as accent material, but remember that it is most effective when used sparingly.

A dressy black-and-white print of either a lace or chintz pattern covers the plywood valance over the window. Marbleized paper covers the wastebasket and makes a border around the picture mat. Use a small pattern for the stationery box and the desk folio. In the small sketch a TV set becomes less obtrusive when covered with the same cane-textured wallpaper as the wall behind it.

2. A bright and ingenious use of wallpaper is shown in this black and white flower print cut the same width as the bed, and giving the effect of a high headboard. Attach to the ceiling a scalloped canopy cut of plywood at the lumber yard, and cover with the same paper. The same print can also be used for a matching window valance or to frame the dressing mirror.

3. Transform an eyesore door

or doors by covering them with a plywood panel wallpapered with this rich-looking marbleized pattern. Add a marbleized dais and black and white linoleum as shown to further dramatize and unify your entrance.

## C Of C Outlines Mentone's Merits

The 1964 officers of the Mentone Chamber of Commerce, as noted in another article in the paper, are quite serious about seeking means to improve the town and bring in new business and industry.

In outlining the town's merits they point out that Mentone is truly the heart of Industrial Indiana—located 100 miles east of Chicago, 50 miles west of Ft. Wayne on the Nickel Plate Railroad, 100 miles north of Indianapolis, 50 miles south of So. Bend and near many other small cities where all the services and most of the industrial needs of modern industry can be found and are in large supply.

Mentone is strategically located on State Highways 19 and 25 and is only eight miles from U. S. 30, making truck transportation easily accessible.

The main line of the Nickel Plate Railway, one of the fastest of the high speed freight lines of the Nation, is available for spur connections to all available factory sites.

Also to Mentone's advantage is its proximity to the East-West Toll Road and its location in a highly specialized agricultural area which produces large amounts of small grain, livestock, poultry, eggs and milk.

Mentone also boasts good housing with a large percentage of the homes being privately owned and with numerous areas suitable for additional housing, low taxes, good retail services, good health facilities, an adequate supply of power from the Northern Indiana Public Service Company, two good municipal wells and a large municipally owned field for future drilling, good fire protection, many good service organizations, and the opportunity to partake in many recreational advantages through the nearness of the 93 public lakes in the county.

The Chamber urges every resident of the town and area to think of ways of improving the town and its facilities and of urging new business and industry to come here.

## 240 eggs per hen makes low-cost production

Thousands of flocks on Purina Laying Chows now are producing 240 eggs per hen in 12 to 13 months of laying. They do it at low feed cost per dozen, because Purina Chows are built on the high-efficiency principle. They help hens produce eggs on less feed per dozen than lower-efficiency rations.

There's a Purina Laying Chow built and priced for every size of flock from a few hens to many thousands. Call us or drop in. Let us give you our prices.

### Today's MEDITATION from The World's Most Widely Used Devotional Guide

**The Upper Room**  
THE UPPER ROOM, NASHVILLE, TENNESSEE

Thursday, March 19, 1964

Read Luke 5:17-26

Be ye kind one to another, tenderhearted, forgiving one another, even as God for Christ's sake hath forgiven you. (Ephesians 4:32.)

After a man told a lie about his friend, the false news spread all around. Soon the liar was ashamed of what he had said and went to his friend to ask for forgiveness.

In reply, his friend took him to a high mountain and opened a pillow filled with feathers. A strong wind came and blew the feathers all around the countryside. Then he said, "I'll forgive you if you gather these feathers." But his friend was not able to collect them.

God's forgiveness is not dependent upon undoing all the harm and damage our sins have caused. Therefore, should we not all the more gladly give thanks unto God for His forgiveness? It is for Christ's sake that He forgives us.

It is when we are repentant that God forgives us our sins and blots them out. However, if we expect God's forgiveness, we must be willing to forgive one another, as Christ has commanded.

**PRAYER:** Our heavenly Father, we thank Thee for Christ, who gave His life for us as a ransom. Teach us Thy lovingkindness so that Thy kingdom may enter our hearts. Through love make our earth a paradise for Thy honor and glory. For Jesus' sake. Amen.

**THOUGHT FOR THE DAY**  
I give thanks unto God for His forgiveness.  
Lawrence Nya Taylor (Liberia)

## Inside Measurements

" . . . . Rise and measure the temple of God and the altar and those who worship there, but do not measure the court outside . . ." Rev. 11: 1-2.

That which we accumulate in worldly goods, wealth and prestige is comparable to the outside court of the temple. Each of us is a temple of God; and when life is ended only the inside measurements are considered. We must pass from life, and the person on the lowest rung of our social ladder is equal to the one possessed of great affluence and fame; material possessions are not measured.

Our most important thought therefore, is how best to increase the measurement of the temple within us. Attendance, with participation in the activities of the Church, of our faith are of primary importance, for the Church points the way to praiseworthy thoughts and deeds, and to a commendable way of life that enlarges the temple of God from within.

### It pays to let your pigs eat like hogs

It pays, that is, if your pigs are on Pioneer feeds. During our Hog Feed Purchase Plan you'll see your profits rise, while your pigs make rapid gains at low conversions. Pioneer feeds are the feeds with balanced amino acids for better protein building. Amino acids are the basic protein builders and when they're balanced, you get top production, top profits. Over the years, the Red Comb-Pioneer folks have developed the know-how to formulate feeds geared to the genetic capacity of Hogs in this area. So, go ahead . . . let your pigs eat like hogs. Stop in to get the details and see how it pays—in more ways than one.

## Roman Banquet Staged At M.H.S.

The Latin classes of Mentone High School entertained the past Latin students at a Roman banquet Friday evening at 6:00 p.m. in the Latin room.

An authentic three-course dinner was served by Latin I Slaves, barefoot and clad in Roman tunics. Hosts were Gene Hughes and Clair Taylor, Roman nobleman, clad in togas. The

banquet was a sacrifice and the hosts held gods by James Huffman. During the meal Roman music was furnished on the Italian accordion by Carolyn Warren and the zither by Anne Istok.

After the tables were cleared and fingerbowls passed, a toast was given to Bacchus by each guest from a single bowl of wine.

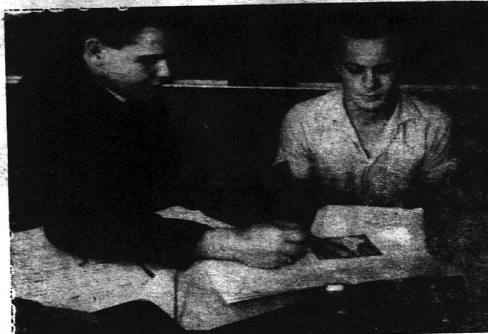

The feature of the evening's entertainment was a Roman wedding which was staged by members of Latin II-class.

After the sacrificial prayer by Mark Hubartt several members sang "Amo Te Vere" (I Love You Truly) accompanied on the accordion by Carolyn Warren. Then the wedding parties entered, first the groom, Ken Romine, with his mother, Diane Roberts. The bride, Beverly Hurst, beautiful in a white shift floor-length gown with jeweled belt and accessories, entered with her mother, Becky McDaniel.

The priest joined the hands of the bride and groom and placing his hand over theirs, he voiced a prayer to Venus. Then the wedding Latin words were said by the bride, followed by the Latin words of the groom. After the bride was snatched from the arms of her mother by the groom, the couple were greeted with "Feliciter!" and were accompanied around the room to the door where the bride was carried over the threshold.

Members of Latin I class who were slaves and served the dinner were Sandra Ballinger, Sue Booth, Linda Bowerman, Jennie Bryan, Beth Creighton, Connie Grossman, Glenna Ridenour, Coni Teel, Don Fore, Marcus Parks, Danny Romine, David Smythe, Gary Teel, Steve Tucker, Tom Whetstone and Mike White.

Members of Latin II class who furnished the music and staged the wedding were Marlene Bralier, Cynthia Ellsworth, Janet Goshert, Beverly Hurst, Ann Istok, Becky McDaniel, Sandra Nelson, Diane Roberts, Nancy Smelser, Georgia Vires, Carolyn Warren, Mark Hubartt, James Huffman, Gene Hughes, Mike Kern, Jim Roberts, Ken Romine, and Clair Taylor. Mrs. Caldwell is the Latin teacher.

## Notes From Your County Agent

There is a good chance that the germination of soybean seed may be low this year. It usually is in a season when the harvest conditions are dry and there is a chance of harvest damage. Tests of samples at the state laboratory have run in the low 80's as an average with some as low as 60 percent germination.

This is mostly a mechanical damage. The beans were unusually dry at harvest time and the seed coats were brittle. Just a little crack in the seed coat or in the germ can cause the seed to be damaged. It would be a good idea to check this year's seed before using it.

The Purdue Egg Day program will be held April 2. Dr. Joe Ostendorf will be on the morning program with a report on "Trends in Poultry diseases."

Control of transmissible gastroenteritis (TGE), a prevalent disease of baby pigs, can best be accomplished through prevention practices.

This prevention includes: Proper disposal of dead pigs, proper isolation of all additions to the swine herd and keeping visitors, both human and animal, out of hog houses.

Research at Purdue during the past 10 years had led to additional knowledge of how TGE virus enters infected swine herds. There is little evidence that swine become long-term carriers of the virus, but they are important spreaders while they are ill with the disease and shortly afterward.

Some cases, the scientists report, were found where swine apparently recently moved through sale barns or other concentration points and brought the virus to the herd.

The principal source of TGE induced plants galls that disfigure foliage.

Most trees and shrubs are susceptible to scale attack and should be examined carefully. Lilac, euonymus and dogwood are among those often injured or killed outright.

Many scale insects are small, resemble the bark itself and are difficult to see. The San Jose scale, for example, is the size of a pinhead and the oyster shell scale only slightly larger.

Both may be serious pests.

The maple bladder gall is an example of a plant gall that can be prevented by a dormant spray. It attacks foliage of young soft maples and causes leaves to be covered with green or red "warts".

The entomologists say dormant sprays are best applied just before buds break and leaves start to emerge. Use a dormant spray oil at the rate of one quart in six gallons of water. Thorough coverage is essential.

## NOTHING GUARANTEED

Your fishing license permits you to fish and limits the number of fish you may keep... but it doesn't guarantee you'll land a thing. The same is true of Indiana's Five Investor-Owned Electric Companies, "licensed" by the Public Service Commission to provide your electric service. Although there is a limit on the profit they are allowed to earn, there is no guarantee that they will realize any profit at all. The Commission regulates rates, financing and services of all public utilities... but it does not guarantee them a profit.

Like other companies operating in America's free enterprise system, Indiana's Electric Companies constantly search for increased operating efficiencies. These result in the best possible service at the lowest possible price to you.

## D. A. R. Hears Conservation Talk

Mrs. Fred Koenig of Etna Green was hostess to the Anthony Nigo Chapter, DAR, at the recent meeting held in the social rooms of the Farmers State Bank at Mentone.

The meeting was opened by the Regent, Mrs. Paul Shireman, with the ritual service. Members answered roll call with a superstition.

Mrs. James Wells read the minutes of the previous meeting and the treasurer's report was given by Mrs. Ernest Igo.

The President General's message for March was read by Mrs. Arthur Brown.

Mrs. Dale Cook, chairman of the nominating committee, presented the following slate of officers, which were voted into office: Regent, Mrs. Shireman; Vice-Regent, Mrs. Loren Gross; Chaplain, Mrs. Carl Metheny; Secretary, Mrs. Wells; Treasurer, Mrs. Wayne Smalley; Registrar, Mrs. Edna Carey; Historian, Mrs. Glenn Clauss; and Librarian, Mrs. Walter Lackey.

Mrs. William Cox read excerpts from an article "Togetherness With the Soviet Union?" for national defense. "There is one very obvious road that leads to peace . . . All we have to do is stop opposing the Communists and let them have whatever they want. Then there will be peace, that is, if you define peace

as the absence of war between nations . . . The step is a very small one from "any road to peace" to "peace at any price." The DAR Resolution on freedom of the press was given by Mrs. Rex Yazel.

Program chairman, Mrs. Charles Tucker, spoke briefly on St. Patrick's Day and Easter Sunday in introducing the evening's program. She then introduced Dick Higgins of the Conservation Department, who showed a series of informative slides, mainly of Kosciusko County and other Indiana scenes. Many of the slides depicted the violations that occur during boating, water skiing, fishing, and hunting activities. A question and answer period followed leaving members more fully informed and appreciative of the duties of the Conservation Department.

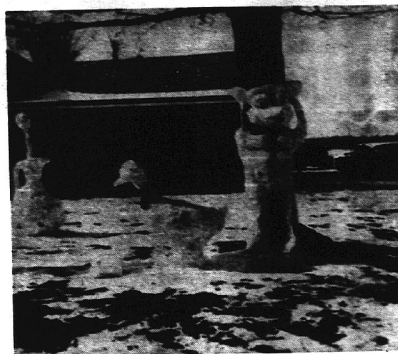

Mrs. Hazel Linn closed the meeting with prayer.

Refreshments in a St. Patrick's Day theme were served by the hostess and her assistant, Mrs. Tucker.

The next meeting will be held at the Westminister Hotel Winona Lake, on April 28 with the Agnes Pruyn Chapin chapter of Warsaw as hostesses.

### BAPTIST CHURCH

Missionary-Plane Project with  
S & H Green Stamps  
The Senior Training Union of  
the church starting a collec-  
tion of S & H Green Stamps to  
help purchase a "CESSNA 180"  
to be used by Rev. "Hank" Scheltema, missionary-pilot in the  
Amazon Valley of Brazil.

Rev. Scheltema, wife, and four  
children work among the civil-  
ized Brazilians, but he stated that,  
"In the Amazon Valley, which is  
nearly the size of the U.S., ex-  
cluding Alaska, there are many  
savage tribes living deep in the  
jungle which have never been  
seen by white men. Not only un-  
evangelized and uncivilized, but  
they are primitive and some are  
cannibalistic."

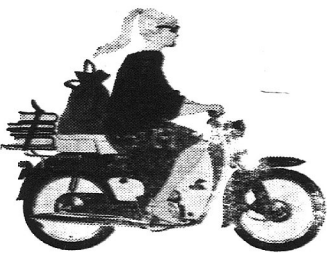

The work of this dedicated  
young missionary-pilot is most  
interesting. During his first term  
of service he had a small plane  
which enabled him to reach  
many new points for preaching  
along the longest runway in the  
world—the Amazon River and its  
tributaries. With the plane, three  
widely separated mission stations  
can be reached for preaching on  
Sunday. By foot, along narrow,  
snake-infested paths, through  
dense jungles, it would take days  
to reach even one of the stations.  
Not only valuable time, thus  
money, has been saved, but phys-  
ical as well as spiritual lives  
have been saved.

Missionaries, their families,  
and natives have been rescued  
from danger and even death.  
Moving pictures films showed  
examples; a stranded boat in  
the middle of the Amazon River,  
and a poison-snake-bitten native  
—sure death if the plane had not  
been available to fly the man to  
medical care. Missionaries can  
save much time getting to  
their stations, supplies can be  
flown in much faster. Many more  
villages can be reached, some  
which are pleading for missiona-  
ries.

The task of buying the plane  
is an immense one, with \$15,000  
yet to go by the end of April.  
Rev. Scheltema feels so strongly  
the need of a larger one that he  
has made arrangements to get  
parts with S & H Green Stamps.  
For example 12 books of stamps  
will buy an airplane battery.  
Anyone wishing to help could  
donate S & H Green Stamps,  
which will be sent by the Senior  
Training Union Group to Rev.  
Scheltema around the middle of  
April. The Scheltemas' plan to  
leave in a few months for the  
work they love as their furlough  
is nearly over.

from The World's Most Widely Used Devotional Guide

# The Upper Room

THE UPPER ROOM, NASHVILLE, TENNESSEE

Thursday, March 26, 1964

Read Matthew 26:36-46

Again, for the second time, he went away and prayed, "My Father, if this cannot pass unless I drink it, thy will be done." (Matthew 26:42. RS.V.)

One bitter cold day I knelt alone at the altar of a little village church and prayed a desperate prayer. A tragedy had overtaken me, and the pain of it was almost beyond description. In this modern Gethsemane I turned my face toward heaven and asked God to take my life.

God indeed took my life, but not as I had asked. He used it from that very hour as never before. The cross of pain I was called to bear became the instrument whereby I was enabled to help others. Though my suffering I came to understand better the world's suffering.

God's Son prayed in a Gethsemane infinitely more terrible than mine. He prayed that the cup might pass, but with perfect faith He prayed, "Thy will be done." His prayer was in accordance with God's plan for the salvation of the world.

**PRAYER:** Our Father in heaven, whose wisdom is unimpeachable, whose love for us is perfect, and whose power is supreme, enable us to say, "Thy will be done." Grant to us Thine infinite strength for every ordeal. In the name of Christ. Amen.

## With The Sick

Mrs. Charles Holloway of Burket is in the Woodlawn Hospital, Rochester, in traction. This is a result of an auto accident two weeks ago when the Holloways were on a trip in the southern part of Indiana. They were run into by another car at an intersection.

Mr. Eric Lisdat was operated on Tuesday for removal of a bone from his left hip which was then fused to a place where a bone was missing below his left elbow. The two operations took longer than expected and the doctors felt that the one scheduled for his leg should be postponed until this week-end. A definite time is not known as yet.
