## Annual Meeting

On March 22 the Mentone Egg Producers held their annual meeting in the library at which meeting a new board of directors was elected. The following directors were elected: Russell Norris, Frank Carls Lawrence Yarman, Royce Tucker and Cecil Long.

On March 29 the new board met and selected Royce Tucker as Manager of the Egg Car.

Following is the annual report of Mentone Egg Producers.

## W. F. M. S.

The W. F. M. S. of the Methodist church met at the home of Mrs. Dora Taylor on Friday. The meeting opened with song. Mrs. Jeffries had charge of the devotions. Mrs. Clark presided and gave a very interesting account of missionary that is financed by the young people of the junior organization of the church. Mrs. For Goodwin had charge of the east of program, a Symposium. The of Bu around the world with the Bert A g peoples missionaries.

The articles read were The Modern Girl and how Missionaries Live by Mrs. Goodwin, Opportunities in Peru by Mrs. Ed Kesler, In Manchoukuo by Mrs. Dora Taylor, The Wrong Complexion by Mrs. Dennis, The Lure of The Open Door by Mrs. Bess Manwaring, A high Grade Training by Mrs. Shafer. At the Social Evangelistic Center by Mrs. DeWitt, From

Hua Nan College Foochow China by Mrs. Carter. Mrs. Clark and Mrs. Manwaring sang a solo accompanied by Mrs. Shafer.

Louise Paulus gave a report on "The Child Grew" taken from the picture "The Boy Jesus painted by the French artist Dagnan Bouveret. It portrays the Luke Gospel: And the child grew and waxed strong, filled with wisdom, and the grace of God was upon him.

Freda Elick gave a report on the picture "The Child in The Midst" painted by an English artist, John S. Eland. It was Jesus who put the child in the midst but we do not always keep him there.

The meeting closed with prayer. Refreshments were served by the hostess assisted by Mrs. Shafer and Mrs. Carter.

## MARRIED

On March 17, Orton Zent, son of Mr. and Mrs. Lloyd Zent was united in marriage to Miss Clarabella Hunter daughter of Mr. and Mrs. R. H. Hunter of Rochester.

A single ring ceremony was performed at the Baptist Parsonage by Rev. B. G. Field pastor of the Rochester Baptist Church. The couple were attended by the bride's sister and her husband, Mr. and Mrs. Elane Gotner.

Following the ceremony the newly weds were entertained at the home of the grooms parents, Mr. and Mrs. Lloyd Zent. Guests who enjoyed a six o'clock dinner were Mr. and Mrs. Donald Boggess and daughter of South Bend, Mr. and Mrs. Waldo Hindel and daughter of Plymouth, Mr. and Mrs. Blaine Cotner of Ligonier, Mrs. N. R. Hunter, Mrs. Euich Carter and Mr. and Mrs. Nelson Hunter and son of Rochester, Mr. Earl Zent and Mr. Joseph Bybee of Mentone.

Mr. and Mrs. Zent are graduates of the Talma High School. After April 1 they will be at home to their many friends on the Creighton Bros. farm near Warsaw.

## Slush Fund

A slush fund is money used to influence votes or legislation.

## WHO PAYS FOR YOUR PAPER ????

We feel certain that everyone who receives this paper, should they miss one issue, they would investigate the cause. Do you know who makes this paper possible? Look through the Co-Op News ads and see to whom you are indebted and show your appreciation by patronizing them.

## D. A. R. MEETING

The Agnes Pruin Chapman Chapter of the D. A. R. at Warsaw gave a Citizen dinner Tuesday evening, March 26 in the parlors of the Presbyterian Church.

After the four-course banquet was served the meeting opened with selections from the Hale Stone Quartette. The Welcome address was given by Miss Elizabeth Thompson. Doctor A. W. Cordier from North Manchester College gave a very interesting talk on "America Ideals" and Miss Virginia Ruggles followed with a violin solo.

The Warsaw Chapter entertained two-hundred-seventy-five D. A. R. members and guests. The Plymouth and Mentone Chapters were the guests of the evening. Those attending from the local chapter were Mrs. Edna Burns, Mrs. Yoland Riner, Mrs. Orpha Blue, Mrs. Ed Kesler, and M. S. Ethel Nellans and their guests were Misses Mary and Lola Mollenhour, Pauline Swick, Louise Paulus, Freda Elick, Jean Burns, and Geraldine Nellans.

Miss Gretchen Dixon of Kentland, Indiana was the winner of the Ruth Bryan Owen Girl Citizenship contest of the Indiana Society of the D. A. R. Miss Dixon's name was drawn at the luncheon meeting of the state council Friday, March 22 at the Columbia Club in Indianapolis. Miss Dixon was one of three-hundred sixty five Indiana high school contestants, among was our own representative, Miss Pauline Swick.

## Cost of Waterways

Eighty per cent of all the money spent for rivers, harbors and flood control projects is paid to labor.

## Home Economics News

The Mentone Home Economics Club has nearly reached its capacity membership. The March meeting was held with Leona Eber as hostess at her home on North Tucker Street. Lois Lemler was assistant hostess. The regular business session was followed by the lesson on gardening and insect pests and a discussion of Purdue bulletins which are available and may be had for the requesting.

Girls from the Home Management Class of the Home Economics department of the Mentone High School with their instructor, Miss Mentzer, added much to the afternoon program with a Talk on the "Problems of the Consumers" by Pauline Swick, a playlet, "A Bargain in Sheets" with Elizabeth Doran as saleslady and Willodean Janke and Flo Mollenhour as customers. The Club greatly enjoyed their work.

Myrtle Leininger and Lula Blue had charge of the recreational part of the program and directed some very amusing stunts. Prizes were won by Eva Laird, Olive Tucker, Linnie Vernet and Mrs. Alexander. If you are in need of a hearty laugh, attend the Home Economics Club meeting.

## Idiosyncrasy

Idiosyncrasy, meaning a constitutional peculiarity, is correctly used in the same manner as one would use peculiarity. One does not say, "He has a peculiarity for strawberries," but "A peculiarity of his is a craving for strawberries." Hence, "An idiosyncrasy of his is a craving for (or an aversion to) strawberries."—Literary Digest.

## Roof of Copper Pots

A plating of copper made of beaten household pots and pans is being used in re-roofing the foreign office of the Supreme court building of Denmark, a building in which kings and nobles of all sorts have been dined. The roof needed repairing, but it was found there was no appropriation. The people came to the rescue with gifts of outworn copper pots and pans.

## Many Sharks Off California

Twenty-three kinds of sharks are found in the waters off the coast of California.

## Quick Method for Increasing Egg Production

**Average Egg Yield More Than  
Doubled by Proven  
Plan**

Yolk and white—that's the whole story of the interior of every egg. In the production of an egg there must be enough white to go with the yolk or the egg cannot be laid. That's common knowledge—universally accepted knowledge—yet it is so frequently disregarded in the handling of poultry that many flocks today are producing far below their normal capacity, according to C. S. Johnson, manager of the Purina poultry department.

"The fact that one hen or a group of hens has a better production record than another bird or group of birds does not mean, necessarily, that the

former have better inherent laying ability than the latter," Johnson says. "It means far more often that the poorer group just hasn't been given equal opportunity to show what they could do in the way of fully sustained production.

"In every hen, for example, there's an 'egg nest' containing hundreds of small yolks—some no larger than a pinhead, others as large as a marble. These yolks were put in the hen by nature and are developed by the yolk making feed that the hen eats. Grain alone will develop these yolks. But they can't be turned out as yolks alone. There must be a white and there must be a shell.

"There's a small amount of white and shell material in grain, but not much," says Johnson. "That's why hens fed on grain alone lay so few eggs. It is estimated by the U. S. Department of Agriculture that the average farm hen in the United States lays only 72 eggs a year and most of these are produced in the spring months when eggs are cheap. That's what straight grain feeding or unbalanced feeding does. When one stops to realize that it takes 80 eggs from a hen in a year to pay her feed cost it is easily observed that the average farm hen hardly pays her way.

"But she can be made to pay by giving her enough material for whites and shells that will enable her to complete the eggs with the yolks she has in her body so that more eggs can be laid. It takes laying mash to make these whites and shells. Grain alone just can't do it. Neither will just any random untested, ordinary laying mash. What's required is a mash that has been developed, tested, balanced, and blended especially to give hens what they need for making whites and shells.

"It is entirely possible to produce such a mash. At our Experimental Farm, for instance, we have definitely and repeatedly been able to step up egg production from a yearly average of 72 eggs per bird when fed on grain alone to an average of 178 eggs."

### Band Is Forbidden for Funeral of Murderer

Budapest.—A husband, having killed his wife, has no right to fulfill her last wish.

This stand was resolutely taken by the aged parents of the beautiful wife of Lieutenant Colonel Komjathy, conspicuous figure in Budapest society.

After a few years of happiness, he shot and killed his wife, believing her unfaithful.

For the funeral the remorseful Komjathy wanted to hire a gypsy band to play her favorite song, "When the Leaves Fall Off the Trees." He asserted that his wife had pledged him, when they still were on good terms, to fulfill her that last wish.

The parents of the murdered woman refused to grant Komjathy permission to act as a loving husband for the last time.

### Hunt Cemetery Vandals in Tombstone Outrages

Vermillion, Ohio.—Vandals who have overturned forty-three tombstones in Maplegrove, the village cemetery, have been sought here by armed deputy sheriffs.

On an evening when Sheriff V. J. Moore posted a guard in the cemetery the vandals failed to appear. Instead, that night, they ripped down scores of mail boxes along a road south of the village.

Sheriff Moore said the vandals had "lassoed" the mail boxes as they drove past in an automobile. Federal agents were expected to investigate the destruction of mail boxes.

### Sons Vind'cate Father's Name by Drastic Means

Santiago, Chile.—Two young Scotsmen, Lionel and Cyril Page, cleared their father's honor by drastic means.

The father, who died recently, was Wilfred E. Page, manager of a British firm in Chile and president of the Chilean Chamber of Commerce.

His conduct in this post was so severely attacked by Senor Eleodoro Guzman, a member of the chamber of deputies, that the two sons challenged him to a "duel to a definite end."

The alternative was complete apology. Senor Eleodoro decided to apologize.

Vigor Personified

### YEAST FOAM EGG MASH

Made by N. I. Co-Op. Ass'n. will put your Birds in fine condition to produce MORE EGGS, HEAVIER EGGS, BETTER IN EVERY WAY.

Eggs produced on Animal-Poultry Yeast Foam Mash Feeds are being sold as Yeast Foam Health Eggs. They are a thicker, heavier egg and go much farther in baking than ordinary eggs.

These yeast feeds build and maintain the vitality of the birds which means better results, better health all down the line. Try them and be convinced.

## Burglars Pay Visit; Leave Baby Behind

Macon, Ga.—A new type of burglary has developed here.

Mrs. Marvin Maxwell returned home from church and discovered her house had been broken into during her absence. A thorough search revealed nothing missing.

Instead, one article had been added—a three-day-old baby girl.

She called police to come and get the foundling, but by the time they had arrived she had become attached to the child.

"Isn't she a darling?" the woman cooed to police.

She finally refused to let the officers take the infant from her.

## Bandits Go Bit Too Far; Victim Loses Patience

Chicago.—Note to bandits: Rob Louis Braspenick of his money, if you will. He will not protest. Steal his samples, and he will just look hurt. But don't bother his lady friend. That changes him to a raging lion.

Mr. Braspenick, who lives at 716 Grace street, is a whisky salesman. While he was driving around making sales, he was accompanied by Miss Helen Smith. Braspenick had just driven up to 53 East Forty-second street when three colored robbers approached.

One produced a gun and forced the couple out of the car. Braspenick was robbed of his money—a few dollars—and samples of whisky valued at \$30. Then one of the bandits put his hands on Miss Smith apparently to take her purse.

Braspenick didn't like that.

Picking out the bandit with the gun, Braspenick struck him, knocking him flat. The other two fled. As soon as the flattened bandit could get to his feet, he joined his companions. A passing police squad gave chase and fired several shots, but the robbers escaped.

Braspenick recovered his whisky samples.

## Youth Sells Dog So He Can Buy \$2 Tag for It

Montreal.—Ovide Joyal was summoned to court for having no license for his dog. When he appeared he triumphantly flourished a new tag.

"Why don't you put it on the dog, where it belongs?" asked the recorder.

"I had to sell the dog to get the two dollars for the license," replied Joyal.

The speechless judge waved Joyal out of court.

## Catnip Traps Lion

Great Falls, Mont.—Want a mountain lion rug for your parlor? It's easy to get one. Just drag out the old catnip. A trap, baited with catnip, fish oil, anise oil and other scents, trapped one near here. Mr. Mountain Lion sniffed around, stumbled into the trap—now he's a rug.

## SWEARS VENDETTA BUT GANG GETS HIM

### Sought Vengeance for Murder of Father; Is Slain.

New York.—Salvatore Monacino was a boy of five when his father was murdered by enemies in the crowded lower East side. As he grew older Salvatore learned to understand the story of how his father was lured out to the night and killed. He swore a blood oath—a vendetta—against the slayers of his father.

It was 25 years ago that the father died. Recently the body of Salvatore Monacino, thirty, of Newark, was dumped from an automobile into the gutter in Brooklyn.

He had been bound with sash cord, his feet drawn up behind his back with the cord around his neck, so that he strangled himself by his own struggles.

To the policemen who found the body, trussed up and still warm, it looked like another "racket murder."

Well dressed and wearing a new chinchilla overcoat, with \$8 in his pockets, Monacino obviously was not the victim of robbers.

His finger prints revealed he had a record—arrested in 1933 on a charge of possessing counterfeit bills, sentenced to 18 months in federal prison.

When detectives went to the relatives and friends of the slain man they were told the story.

Back from the penitentiary a few months ago, Monacino had told acquaintances he had learned, in prison, who killed his father. Before large groups of people, it was said, he had boasted:

"I know the man who shot my father; I'm going to get him."

Detectives went away with the belief that persons responsible for the death of the father had killed the son to protect themselves.

## Wingless Hen Flourishes

Painesville, Ohio.—A five-months-old Rhode Island Red hen, born without wings and only about half the size of other chickens hatched at the same time, is a special favorite in the coops of Mike Marano. The fowl is in perfect health.

## Same Bulb Glows 26 Years

Fort Worth, Texas.—An electric light bulb has burned continuously for 26 years in the hallway between the stage and dressing rooms at the Palace theater.

## Pig and Kitten Pals

Union, Maine.—This little pig is content to stay at home and sleep with its newly-acquired friend. Because the little pig was not as strong as the rest of the litter James Griffin, its owner, built a separate pen in a horse stall. A kitten visits the stall each day for its meal, then the two crawl into a box and sleep it off.

## Poultry medicine at the Co-Op mill.

The mill buys wheat, oats, corn.

## JUST VARIETY

The test of good charity is in human results.

Many talk like philosophers and live like fools.

Everything in nature goes by steps, nothing by leaps.

If you say it with flowers, say it adequately. Don't stint.

Now, if doctors' bills were as illegible as their prescriptions!

The well bred man keeps his beliefs out of his conversation.

A wife is a person who lets you tell it and then she tells it right.

True history is the record of the progress of the human spirit.

"Humanitarian" is a modern word coined to express a modern idea.

Youth goes out into the world to find what he can bring back from it.

A genius is one who seems a wonder because he was born on third base.

Youth takes its fun where it finds it; and is an adept in finding it in trifles.

One's morals may be what they may; but at least his public behavior should be decent.

One can be humorous about himself, but doesn't like other people to be so about him.

Some think they don't like buckwheat cakes. Reason: They never tasted any good ones.

Wearing of campaign buttons is about out of fashion—until we get a riproaring campaign.

Don't mistake the rapping of the wolf's tail on the porch floor for the knock of opportunity.

Edison used to say that those who sleep longest know least. However, Mr. Edison didn't sleep long.

There is one cure for serious sleep walking: A chain and padlock that fastens the sleeper to the bed.

## Orchids Grow in Sand

Orchids, usually associated with South American tropics, grow wild in the sand dunes of northern Indiana, a few miles from Chicago. With the discovery of a new species recently, the number of kinds of orchids growing in the dunes is 26, according to the associate curator of the herbarium of the Field Museum of Natural History.

## Wise Old Hubby

Mrs. Fussbody—It's so hard to choose between these hats. I wish you'd offer a suggestion.

Her Husband—I think the one you've already decided on is by far the better one.—Detroit News.

## Altered Relationship

Boss—My wife heard that I took you out to dinner the other evening.

Secretary—Well, what does that make me?

Boss—That makes you my former secretary.—Kansas City Star.

## Saving Time

Poet—I wish to submit a poem of mine.

Editor—All right, but I'm very busy now. Won't you please throw it into the waste basket yourself?—Pathfinder Magazine.

## Tells How to Prolong Life of Good Cows

Five years is the average profitable milking life of a good cow, according to the U. S. D. A. records.

"Which is just another way of saying that a man operating a twenty cow dairy is, on the average, obliged to bring in four new cows each year, either as heifers he has raised or through the purchase of cows or heifers," declares W. R. Arends, prominent dairy advisor, in a general statement to American dairymen.

"Only five years seems a mighty short span of usefulness," says Arends, "and there's no getting around the truth of it. At the same time there is no reason why that comparatively brief period should not be extended several years, and save dairymen thousands of dollars. The fact is, this very thing is being accomplished every year in more and more herds, simply by recognizing the things that make frequent replacements necessary and taking definite steps to put a stop to them.

## Replacement Factors

"In general, there are several reasons why dairy cows must be replaced. The U. S. D. A. states them to be: first, low production; second, udder trouble; third, sterility; fourth, abortion; fifth, tuberculosis. The Dairy Herd Improvement Association Records agree that more cows are eliminated because of low production than any other reason. This is as it should be. Cows that are not well enough bred to produce sufficient milk to pay their way, should be replaced even though they are healthy and in good condition. Strict adherence to this rule would go a long way toward stepping up net profits and increasing the general herd average as well.

"But that's not the whole story behind the present five year limit. There are other greatly responsible factors to be found in udder troubles, breeding failures, and cow diseases. Udder troubles are traced directly to the health and condition of the cow. If she is in prime condition these troubles seldom occur.

## New Bulletin Offered

"For those who are interested, there is available a bulletin titled 'Profitable Cows' which can be had for the asking. It describes fully a proven program for effectively handling dairy cattle in a way that will successfully eliminate costly cow troubles and prolong the milking life of good cows. This program was worked out in collaboration with many reliable herd owners and after a series of experiments at the Purina Experimental Farm. To obtain this bulletin, write the Educational Division, Purina Mills, St. Louis, Mo."

## Municipal Job

"I hear your brother's working."

"Yes."

"How long has he been at it?"

"Three months."

"What's he doing?"

"Six."

The mill buys wheat, oats, corn.

FRANCES RUSH PLEW, Secretary

## LATE WALKING IS INFERIORITY SIGN

There are no signs of superiority in children who take their first steps before they reach fifteen months, according to a study made at the University of Pennsylvania.

But those children long retarded in walking, especially after reaching the fifteen-month period, which is considered the average to begin walking, are significantly inferior as a rule, the results of the study suggest.

Conducted by Dr. Miles Murphy, assistant professor of psychology, the study is based on the records of 712 children brought to the psychological clinic during a period of five years. Of these, a total of 350 had been diagnosed as normal by psychological examiners, and the remainder as feeble-minded.

The records show that of the normal children, for whom the average age of walking was 14.99 months, approximately 20 per cent started to walk before they were one year of age; approximately 60 per cent between twelve and seventeen months, and the remaining 20 per cent at eighteen months or later.

## Word "Sinister" Latin for the "Left-Handers"

The word "sinister," whose modern meaning is evil or malign, is simply Latin for "left hand." It was once believed that left-handed persons were generally wicked. But, as Dr. Charles L. Macallister points out in the Lancet, experience does not confirm this view, though it has been discovered in some countries that the percentage of left-handers among criminals is greater than among law-abiding people.

It would seem that stammering and left-handedness go together. Doctor Macallister mentions several cases of left-handed children who began to stammer only when an attempt was made to convert them into right-handed writers, thus causing a confusion in the brain which brought on stammering.

## Chemicals Purify Waste Paper

A new method for chemical purification of waste water, the iron-carbon-dioxide process, has been developed by German chemists, according to Chemical and Metallurgical Engineering. In this purifying process the waste water is treated with carbon dioxide in the presence of metallic iron, whereby iron is dissolved as iron bicarbonate. The dissolved carbon dioxide is then expelled from the water by strong aeration, the iron bicarbonate is oxidized and the hydroxide coagulated with the impurities in the water.

## Hotel Made of Glass

The first all-glass hotel ever constructed in this country has been opened near Doncaster. Designed on modern lines, even the chimney pots are made of glass. It has a flat roof and the exterior of the building is faced with shell-pink and turquoise-blue glass with a base of black. Floors, walls, table tops—all are made of glass. A portrayal of Doncaster Races, exquisitely etched into the glass, is a feature of the lounge.—Pearson's Weekly.

## English Favor Bright Shirts

The Englishman likes his shirts with more color in them than Canadians, judging by reports on the demand for shirts in the United Kingdom which have reached the industrial department of the Canadian National railways. The English buyers want cloth of from 60 to 70 per cent color and 30 to 40 per cent white. In Canada the proportions are reversed.

## Rabbits Like Salt

There's nothing better than salt for pepping up the daily diet, rabbits have decided. Until recently it was not known that they even liked salt. But when an experimentalist grew wheat in salted soil the crop had no sooner been harvested than in swarmed rabbits and ate the stubble to the roots. Wheat stubble in neighboring unsalted ground was left untouched.

## Not in Sight

Wife—Did you notice anything in particular about that Mr. Jones?

Husband—Yes, his whiskers and mustache.

Wife—What was there so particular about them?

Husband—Why, he didn't have any.

## Historic Precedent

"Nero fiddled while Rome burned," said Mr. Growcher. "But that's no excuse."

"For what?"  
"Our cook playing the piano while the turkey scorches."

## Ought to Be a Law

"How did you like Switzerland?"

"The scenery there is lovely, I hear."  
"Not so bad, but you can't see much of it because the mountains get in the way."

## Army "Iron Rations" Listed

"Iron rations" for the British army are to consist of an eight-ounce cake made of cocoa, cocoa butter, milk, proteins and sugar, which is said to be sufficient to keep a man alive 48 hours.

## Oh, Oh

"Was this picture of your husband taken before you knew him?"

"Yes. It was taken during the honeymoon."—Detroit News.

## Feminine Ambition

"Have you any ambition beside wanting to look beautiful?"

"Oh, yes—I want to be told I do."

Usually in small colonies.  
Wild parrots nest in hollow trees.  
Parrots Nest in Hollow Trees

Electric Welding, Blacksmithing & Grinding

We have a Portable Welder and are prepared to go anywhere to repair machinery of all kinds. WE GUARANTEE OUR WORK. GIVE US A TRIAL.

A. D. SMITH, Proprietor.

## "Bible" of Chippewa Indians

The "Bible" of a Chippewa Indian tribe of Minnesota, 119 glyphs of picture writing characters on birch bark parchment has been translated by Dr. Albert B. Reagan, Brigham Young university, Provo, Utah. It shows their chief god was Mekwa, who guided good Indians to the happy hunting grounds, while sinners, lacking guidance, took the wrong trail and landed in the underworld.

## World War Draft Registration

The first registration, on June 5, 1917, was for men between the ages of twenty-one and thirty, inclusive. The second, on June 5, 1918, was for those who had turned twenty-one after the first registration. The third, August 24, 1918, was for all those between the ages of eighteen and forty-five, inclusive, who had not registered on the previous occasions.

## Dice Long in Use

There seems to have been no period of history and no nation in which some form of dice has not been used. They are pictured on early Egyptian monuments. Those excavated at Thebes are almost identical with the ones in use today. Their use is attested by laws regulating the games played with them in ancient Greece and Rome as well as in most later European countries. The invention of dice is attributed to Palamedes, who lived about 1244 B. C., but the use of cubes with numbered sides for gambling purposes is probably much older.

When rain becomes too abundant on the Gold coast of Africa, the native magician goes up to his roof and with a knife or other implement threatens the rain till it stops.

## FINDS BANKS WILLING, BORROWERS CAUTIOUS

**Prominent Writer Refutes  
Statements Bankers Are Re-  
fusing Sound Loans — De-  
scribes Reasons for Reduced  
Volume of Credit.**

FIGURES supplied by typical, well-managed banks in different parts of the country show that a high proportion of all applications for loans have been granted in the past year or two, says Albert W. Atwood in a recent article in *The Saturday Evening Post* on "The Idle Dollar." Excerpts from Mr. Atwood's article follow:

"Frequently banks state that as high as 90 per cent of all such applications are granted and for from 60 to 75 per cent of the amount asked for. Allowing that the bankers make these figures as favorable to their own case as possible, it seems strange that we are told again and again that banks are not lending at all.

"If we take into account the whole class of regular bank borrowers, the plain fact is very few want to borrow yet. For the word 'borrow' is merely an other name for the word 'debt,' and we face a great world-wide drive to get out of debt.

"An experienced small-city banker, asked if banks were lending freely enough, wisely replied: 'The really good borrower does not wish to borrow now. In fact, I think our customers are making a remarkably fine showing in paying off their loans, especially loans of long standing.'

### The Shrinkage of Credit

"Or if we think of business concerns rather than of individuals, it is conservative to say that those able to maintain high credit ratings have been mostly the ones able to maintain ample cash resources and, therefore, least in need of credit. As prices and cost, felt many concerns found themselves with plenty of cash because of the shrinkage in operations. Cash resources were still further swollen by reduced dividends and smaller inventories made bank borrowings still less necessary.

"Expressed in another way, banks cannot expand credit, they cannot make loans, unless there is a demand for the same. Fundamentally, the business transaction makes the loan the loan does not make the transaction. It is a mistake to try to force upon business organizations funds which they do not need. Under the circumstances the 'idle dollar' is a natural and proper enough phenomenon. A demand for credit is difficult to create artificially and there is always danger in so doing.

"Banks must be liquid enough at all times to pay depositors. The idea of a commercial loan is that it represents a self-liquidating process in business. If the banker makes only those advances that are inherently sound, and selects his maturities wisely, he will have in coming funds to meet demands.

### Government Lending

"As everybody knows, the Govern-

ment has vast lending agencies, for home owners, farmers, and the like. These have nothing to do with the subject of this article, except that all such Government operations would be impossible if the banks did not lend the Government money for the purpose.

"No one can set a time when borrowing will be resumed. But it will come when men once more feel that conditions are sufficiently settled to warrant them in taking chances, in entering upon deals, and in trying to make money."

Mr. Atwood says that it may be that the banks are overcautious now, just as they were overconfident in 1929, but calls attention to the fact that until a little more than a year ago banks were failing "partly because they had loaned too freely, and were being criticized right and left for precisely that fault." He adds:

"Indeed, the banks which had been cautious in their lending policy came through the crisis safely. Under such conditions it is utterly useless to criticize banks for not making loans. After the experience they had for several years, especially in 1932 and 1933, it is only natural that they should relax their requirements very slowly and gradually.

"Unfortunately, many of the applications for loans are not from people who want temporary banking accommodation for three or six months and are quite able to meet their maturity dates, but are from those who really need permanent capital. They are busted and they want someone to stake them to a new start. What they really seek is a partner to furnish them with long-time capital. But depositors insist upon being paid on demand, and, therefore, it is a grave question whether banks should tie up their funds for any length of time."

## HOW ONE FARMER HELPED HIMSELF

A farmer accustomed to keeping records found that it cost \$16.50 to produce an acre of corn. His average yield was 33 bushels, selling for 50 cents per bushel. On this basis he was producing without either profit or loss.

A study of his costs indicated means by which the yields might be increased without proportional expenses. By making use of facts discovered at the Experiment Stations, the farmer secured an increased yield of four and one-half bushels per acre (37½ bushels instead of 33). By increasing the yield and holding down expenses, this farmer was able to make a profit of six cents per bushel.

### Canaanites Phoenician Stock

The Canaanites of Bible history were of Phoenician stock.

### Average Death Rate

Seventy out of every 1,000 individuals under one year of age die yearly, 6 out of 1,000 individuals from one to four years die yearly, but between the ages of ten and fourteen, of these about 1.5 individuals die yearly. The average death rate for all ages is about 11 per 1,000 per year.

## MOTHER'S LOVE PUTS AN ERRING SON IN JAIL CELL

**Forgets Adage Learned at Maternal Knee That "Honesty Is Best Policy."**

Chicago.—A quarter of a century ago James Craver, who is now thirty years old, learned the ancient adage "Honesty is the best policy" at his mother's knee.

For a long time James remembered. But the times have been hard with him and one day he forgot. He engaged that day in a burglary of the store of the Hagamann Jewelry company at 6904 Wentworth avenue.

With his loot he went to his mother's home at 205 East Seventieth street. Mrs. Della Craver, now sixty-seven, but alert in spite of her gray hair, found the box. Where, she asked, had James gotten the jewelry?

"A fellow gave it to me to keep for him," was the lame excuse.

### Mother Upholds the Law.

"No," said the mother, "that is not the truth. You have forgotten to be honest, but I have not forgotten that you must obey the law. Give me that box."

"What will you do with it?" James demanded.

"There can be no compromise with dishonesty," replied Mrs. Craver. "I shall take the box to the police and tell them you must pay the penalty for stealing."

Weeping, she handed the property to the Englewood police a little later. It was identified. The sorrowful mother explained that she was sorry she had been unable to bring her son with her.

"But he'll be in later," she asserted confidently. "When he thinks it over he'll see his duty. He comes"—there was a flash of pride in her blue eyes—"of honest people."

Eleven days passed. The police assumed that James Craver had fled. He had, but not permanently. Later Mrs. Craver walked into the Englewood station, and with her was James. She was weeping.

"It is awfully hard to do this," she said, "but there would be no peace for me if I knew he was still a thief at heart."

### Head High, He Enters Cell.

Sergt. Joseph Condon questioned the young man.

"I stole," he said, "because I was broke. I haven't had a job in four years, and I was drunk when I pulled the job. Now I have repented. I would rather make good with mother than with the world; let me pay the penalty and be clean again."

His head was high and his shoulders square as he was led away to a cell. Mrs. Craver wanted to go into the cell and stay with him, but the police refused. They sent her home in a taxi.

The mill buys wheat, oats, corn.

Poultry medicine at the Co-Op mill.

## TALKING LIGHT BEAM BEATS SIGNAL FIRES

Signal lights have probably been used since shortly after man discovered the use of fire, but leave it to modern science to add the magical touches. A beam of light which talks is quite a step from the old signal fires which blinked out their message in complicated codes, but like many wonderful scientific inventions it is quite simple. And it really does talk. Along a beam of light focused on a distant point can be sent a spoken message which can be received as clearly and plainly as a radio or telephone message. The beam of light takes the place of the telephone wires or the radio waves. Variations in the intensity of the light beam transmit the message in the same manner as the variations in the intensity of the electric current flowing through a telephone wire transmits that type of message. The message is spoken into a transmitter. A varying electric current is sent from there to the source of the light beam to which the variations are transferred. At the receiving end an electric eye catches the flickering beam and transfers its variations back to an electric current. From that point the method of reception makes use of the electro-magnet and the vibrating drum and is as old as the telephone.—Pathfinder Magazine.

## WILD ANIMAL LIFE WILL NOT DIE OUT

Recent news from Uganda suggests that in parts of tropical Africa official zeal for the protection of wild life can be carried too far, according to Xavier J. Van Wyk, African manager of the American Express company. A generation ago the elephant seemed doomed to extinction in Uganda; a late report of the game warden contains excellent evidence that in less than 30 years many herds have actually doubled.

The gorillas of the Kayonsa forest and the hippopotami, which frequent the shores of the Victoria Nyanza have also become more numerous, and the belief is expressed that long after other species of wild life have disappeared, the elephant, the hippopotamus and the buffalo will remain. In the remote regions the lion is generally plentiful, but there appears to be no need to accelerate unduly its exit from the country.

### Tax to Cross Eridge

A sidelight on Willemstad, Curacao, population is provided by a study of the tolls charged on the pontoon bridge which crosses the harbor. People wearing shoes pay one cent to walk across it, while those without shoes pay half as much.

### Diamonds Generate Electricity

Certain types of diamonds generate electricity when exposed to red or infra-red light. The action apparently is similar to that of the photo-electric cell, but the mechanism by which the charge is produced is obscure.

## MENTONE NEWS

Mr. and Mrs. Walter Craeger and Mrs. Doctor Harrison of Butler, Indiana were the guests of Mr. and Mrs. Hiram Mollenhour over Saturday and Sunday. Mrs. Craeger was formerly Miss Exie Mollenhour.

## Proper Care Makes Hens Pay Better

"Anything goes", is the casual attitude toward the average flock of chickens during every period of low egg prices. Just the most desultory feeding and management—enough to get by—seems to be the inevitable lot to which the layers are subjected.

Provide one nest for each four to five birds. Keep the nesting material clean and replace as often as necessary.

"Such a period and such a condition have long prevailed; but today things are different," says J. H. McAdams of the Purina poultry department. "The turn has come. Egg prices are advancing; getting higher and higher. Now there is the general feeling that the flock should be given the best of care and a sincere effort is being put forth to do so.

"This turn of affairs naturally brings up the question as to what is the most practical plan of feeding and management that will make it possible to get heavy egg production at this time of the year when eggs are money," McAdams says. "The answer is that there are a few fundamental rules which if followed will get the desired results—namely lots of eggs that cost little to produce and sell high.

"In the first place the hens should have a warm, dry, comfortable place to live and their laying house should be kept well ventilated, taking every precaution against sudden temperature changes. Overcrowding should by all means be avoided by allowing 3½ to 4 square feet of floor space per bird. A clean dry litter of straw or peat moss or similar material at least four inches deep, on the floor, will help keep the hens comfortable and healthy. The main thing is to have this litter always dry and clean.

"Plenty of feeding and watering space is also essential—at least three inches of feed hopper space for each bird in order that she may eat enough egg making material. Adequate nest space is also important. Eggs should be gathered three times daily. Nesting material must be kept clean and changed as often as necessary. The need for absolute cleanliness at all times in the laying house cannot be stressed too strongly. It is vital. Diseased, weak, or poorly developed birds should be culled out and done away with—also birds that persist in laying eggs of inferior quality.

"The question of egg production brings up the most important factor of

"all-feeding," says McAdams. "No question about it, eggs are made of feed and therefore feed is the foremost item in the plan. Feeding pullets and hens during the fall and winter is based on the principle of feeding all the mash that can be put into them and enough scratch feed to hold their body weight. The mash used should be a ration of known and proven egg making ability. It should be laboratory, experimental farm, and dollar

At least three inches of feed hopper space should be allowed for each bird in order that all birds may eat enough to supply their egg making requirements.

### Conservation Areas

Sanctuaries, reservations, preserves and reserves are the names used by states and local divisions as well as in original executive orders and acts of congress to designate such areas in setting them apart. Preserve originally indicated an area for protection of wild life and reserve designated an area for breeding game for hunting. Game refuge is the name preferred by the biological survey in referring to such government areas. — Pathfinder Magazine.

### Greatest Stellar Outburst

The greatest stellar outburst in the heavens occurred in 1572, when a new star appeared in the Constellation Cassiopea. It was so bright that it could be seen during the day. It was brighter than Jupiter or Venus. Its brightness diminished gradually, but it was a spectacular object for sixteen months.

### Birds Are Fighters

Many birds use their strong sharp beaks as weapons, and others fight with their talons, even though they lie on their backs in the fray, to move their claws more freely.

## DRIFTWOOD

No greater crime than loss of time.

Choose a wife rather by the ear than the eye.

The fool wanders, the wise man travels.

None think the great unhappy but the great.

More have repented of speech than of silence.

The miser dies that fools and lawyers may live.

To be angry is to punish myself for another's fault.

If you'd be revenged of your enemy, govern yourself.

And all may do what has by man been done.—Young.

Truth, like a torch, the more it is shaken the more it shines.

Only way to enjoy individuality is for people to attribute it to you.

To be angry with a weak man is proof that you are not very strong yourself.

If you are bent on winning a new acquaintance to be a friend, lose an argument with him.

The good listener is the one who isn't thinking up a funny story while you are telling yours.

In this land of free speech, one is at liberty to criticize everything but children, mothers and dogs.

There would be no "financial wizards" if the people had more judgment. But why expect that?

If your party does nothing that you want done, vote the other ticket. Probably the other party won't, either.

The person who saves for a rainy day is likely to classify as a rain the next light shower that happens along.

Bees hardly can be induced to sting except in defense of the hive, as elsewhere they are intent on their work.

Many men like to say that they don't understand women; but there are many men who do, and they usually make good husbands.

Whenever the per capita taxes are figured up, many people think no money at all comes out of them. They pay, all the same.

### How New Subs Get Names

The process of assigning names to the vessels being constructed under the terms of the Vinson naval bill has begun and the first honors went to six 1,300-ton submarines, the first of 30 undersea craft authorized by the act, in accordance with the navy policy

adopted in 1931 five of them were named for denizens of the deep—Pinna, Perch, Pickerel, Pollack and Pompano. The sixth vessel was given a name assigned to the first United States submarine, an experimental vessel authorized in 1893 but never completed. In 1896 the second Plunger was authorized and completed in 1900. She was taken to the Philippines aboard a steamer, served through the World war and was sold in 1922.—Pathfinder Magazine.

### Not All Princes Wealthy

Not all the princes of India are fabulously wealthy. Their incomes and territories vary tremendously. There are 662 of them and they range all the way from the Nizam of Hyderabad, who rules over a rich and populous state the size of Minnesota and has an annual income of \$25,000,000, down to the little fellow who rules over a poor village in the Simla Hills and has an annual income of only \$500.—Collier's Weekly.

### Children Sent to Prison

Although this country long ago accepted the principle that the child offender should be provided with educational and correctional advantages instead of being imprisoned with hardened criminals, many states still send youngsters under fifteen years of age to the penitentiary. A recent case in point was that of a boy of twelve sent to prison for life.—Freling Foster in Collier's Weekly.

### Many Kinds of War Gases

Undoubtedly the next war will be fought largely with poisonous gases. There are more than a thousand different kinds today—suffocants, sneezers, tear gases, nerve poisoners, blood poisoners and blisterers. Then there are the incendiary liquids and substances that are inextinguishable. In fact, one of them—thermite—burns more violently when sprayed with water or chemicals.—Collier's Weekly.

### Lick Observatory's Score

Four of the five moons of Jupiter discovered since the time of Galileo, 1610, approximately 4,700 double stars, as well as 29 comets have been reported from the University of California Lick Observatory at Mount Hamilton, reports a university bulletin. The observatory was established through the generosity of James Lick, a California pioneer of 1847.

### Protection

"So you always pay down?"  
"Yes, then I don't have to worry about paying up."

### Believe White Men Are Ghosts

Primitive natives in Australia believe that white men are ghosts of dead natives.

### Horse Traffic in London

Horse traffic at Tower bridge, London, comprises more than one third of the total.

### Bamboo Grows Fast

Bamboos grow to a height of 50 feet or more in four to six weeks.

## Junior-Senior Reception

The Juniors entertained the Seniors in the cafeteria room of the school house Tuesday evening, April 9.

What a gay sight! Girls passing through the halls arm in arm with the loveliest pastel shades and the young men gathered in groups talking and laughing but looking exceedingly well-groomed.

Gasps of surprise came from every one as they beheld the banquet room for the first time. How unusually lovely! The tables were formed in a V-shape. Two long lengths of table with one end closed forming a horse-shoe. Bowls of beautiful roses, the Seniors' class flower, were placed on the table and tables were lighted by candles. Large candles in holders were placed at various lengths along the tables and little individual candles were placed at each plate. The table was covered with white and against the white background the pink favors shown with startling beauty.

After a series of enraptured "ahs" the rush began to find their places. In front of each place was the Pink "M" representing Mentone. This initial held the glowing pink candles and beside the candles were little pink and white nut cups with banners waving over them. Printed on banners were the numbers "35", in honor of the graduating class. The places were found by very clever little cards with cunningly patriotic Mentone bulldogs painted on each.

A three course banquet was served by the Palestine Ladies Aid.

After the dinner Garth Underhill acting as toast master introduced Heslon Creviston, Senior Class President, Mr. Lewallen, Mr. Dale Kelley, Mr. Hardy Songer, Mr. Morris Greulach, Mr. Kintzel, Mr. Mervil Smith, Miss Rosalind Mentzer, Mr. Harold Lechrone and Herschel Teel, president of the Junior Class.

At the close of the banquet the toast master arose and announced that the guests of the Junior Class would be further entertained by seeing "Day of Reckoning" at the Rex Theater at Rochester. As the assemblage left the dining room each Senior girl was presented with a rose

## PSI IOTA XI

The Psi Iota Xi Sorority entertained the Senior Girls at a Pirate party. The guests were summoned to appear at the Pirates den with the warning "BEWARE". Upon arriving at the Den they were met in true pirate fashion by being held up by two tattooed, one eyed pirates, who advanced swaggeringly upon the bewildered Seniors and held them up before they had a chance to protect themselves. The guests were then blindfolded and tied together with ropes. They were herded into waiting automobiles and after a hectic ride over hazardous roads they arrived at the "Treasure Cave". The girls were prodded out of the cars and forced to "Walk the Plank".

After a trip to the dungeon they finally arrived on deck where the other pirates gathered. The girls then received the deck rules and their new Pirate names, swords and pirate costumes. Games were then conducted in pirate manner and after an unusually interesting evening was taken out for "grub".

What a ship! Greulach basement was decorated in a realistic, superb way. The seats were old kegs, and the tables were covered with red and white checked cloth. The only method of lighting was candles-stuck in beer bottles.

When "grub" was doled out, the loaves of rye bread were thrown on the tables with long flashing butcher knives pierced through them. Treasure chests filled with "piece of eight" and lumps of silver floating the pirate flag with the skull and cross bone insignia were presented to each guest.

## Patrotic Contest

The eighth grade of the Mentone Junior High School have begun a patriotic drive led by their teacher Mr. Mervil Smith.

The object of this drive is the making of American Creed posters and the winning poster will be displayed in the class room. The contest was started the third week of March and will end shortly before the close of school. The class has been divided in-

to six committees with each committee making one poster. It is a co-operative plan. "The American Creed Beginning" must be on the poster and the neatest, best designed poster wins the contest. The Committees are: Margaret Swick, chairman, Marjorie Long, Genevieve Krauter and Evelyn McClaran.

Douglas Kercher, chairman, Dale Black, Orval Secor, Charles Beatty and Junior Wallace.

Dale Wilttrout, chairman, Herschel Linn, Lewis Fawley, Donald Bayne and Junior Taylor.

Mary Mellott, chairman, Mary Deaton, Dorothy Decker, Elaine Sullivan, and Mary Jane Busenburg.

Geneva Horn, chairman, Betty Ellis worth, Esta Mae East, Freda Randall and Elwin Creviston.

Robert Eiler, chairman, Paul Vandermarck, Junior Gross, Herschel Schooley, and Paul Molebash.

These young patriots are progressing rapidly and are doing remarkably well with their posters.

## O. E. S. To Bourbon

Mentone chapter Order Eastern Stars were guests of Bourbon chapter April 2, 1935, at Masonic Hall in Bourbon. It was the anniversary of their chapter and they honored Mentone chapter by inviting them to be their guests and to confer the initiatory work on two candidates. There were twenty eight officers and members from Mentone. During the social hour refreshments were served and a most delightful get acquainted time was enjoyed.

## JESSIE RUSH WINS CONTEST

Jessie Rush was judged winner in the local short story contest which was sponsored for senior girls by Beta Epsilon Chapter of Psi Iota Xi. This entitles Miss Rush to enter her story in the district contest which will include entries from various schools throughout the Northern Province. The title of the prize-winning story is "Mile stones" and deals with a tragic aftermath of the World War. Charlene Latham was awarded second place in the local contest.

## Pot Luck Supper

On Friday evening the parents of the first and second basket ball teams gathered in the cafeteria room of the school house for a pot luck supper in honor of the boys. A delicious supper was the main feature of the evening and all heartily enjoyed it.

Mr. Hughes, who has refereed with the boys a good many times during the past season honored the party with his presence and also favored them with a short talk. Others who addressed the crows were Dale Kelly, principal; George Myers, trustee; Hardy Songer, coach; the senior boys and several of the mothers.

## GUARANTEED

## MENTONE NEWS

Mrs. Cora Williams is improving very slowly.

W. C. Swihart has built a brooder house using Redwood siding.

Mrs. Eunice Bradway visited friends in Kokomo last week.

Mr. S. B. Stookey of Warsaw was in Mentone Saturday on business.

Mr. and Mrs. Irvin Snyder spent Thursday in Indianapolis on business.

Mr. and Mrs. Hardy Songer were in Lafayette attending a school meeting.

Mrs. Omer Igo, a former resident of Mentone, is remaining about the same.

Mr. and Mrs. Alva Shunk were the guests of their son Paul and his wife Sunday.

Mr. and Mrs. Alva Bowser spent last week visiting their daughter, Mrs. Will Guy.

Mr. and Mrs. S. M. Hill of Fort Wayne spent Friday evening with Mr. and Mrs. Fred Lemler.

For Advanced, unusual Dresses, Hats, Suits, Hosiery at prices that please. Smart Shop 111 E. Market St.

Mr. and Mrs. John Weissert spent Saturday and Sunday in South Bend visiting their son, Charles and family.

Dorothy Anne Condiff, daughter of Ruis Condiff, spent Saturday and Sunday with her grandparents, Mr. and Mrs. Lohrer.

Miss Kathryn Darr of South Bend visited with her parents Mr. and Mrs. Otis Darr of Burket, over the latter part of the week.

Mr. Robert Blue of Midland, Michigan spent the latter part of the week with his mother, Mrs. Orpha Blue, and brother, Sam.

Rev. and Mrs. Alexander and daughter Marlyn spent the week in Paducah, Kentucky visiting Mr. Alexander's parents.

Mr. Robert Blue, and Misses Rosalind and Annabel Mentzer spent the latter part of last week in Bloomington visiting Miss Margaret Mentzer.

Mr. Mahlon Mentzer, Mr. Homer Blue, Mrs. C. B. Cole and Mrs. Alvin Jones were in Valpariso visiting Mrs. Elizabeth Morgan, who is staying with her sister. Mrs. Morgan is very ill.

Mr. and Mrs. Will Guy entertained Dr. Drudge and family of Bremen, Mr. and Mrs. Willard Guy and daughter, Donna Peral, of Warsaw and Mr. and Mrs. Harry Smythe and son of Burket, Sunday.

CUSTOM GRINDING AND MIXING

### SENTIMENTAL SUE

The captain of an Atlantic liner was being continually pestered by a woman passenger who kept asking him what were the possibilities of seeing a whale.

"Don't forget to let me know as soon as one appears," she reminded him for about the tenth time.

"But, madam," asked the harassed skipper, "why are you so eager to see a whale?"

"It's the biggest desire in my life to see a whale blubber," she told him. "I think it must be so impressive to watch such an enormous creature crying."—Philadelphia Inquirer.

### SAFETY FIRST

Lady—Would you like some of my husband's old clothes?

Weary Willie—That depends, madam, does he discard from strength or weakness?

### Wet Wash

The class had been having a lesson on laundry work and the teacher was questioning the girls. "What is the first thing to be done when the washing is finished?" she asked, but every one was silent.

"Now come along," she said, "surely you know what your mother does when she has finished washing?"

"Please, teacher," answered one of the girls, "she takes the handle off the wringer so as the lodger can't use it."

### Home Boys First

Father—Son, can you tell me who the first man was?

Son—Sure. It was Washington, first in war, first in peace and first—

Father—No, no, you're wrong, Adam was the first man.

Son—Oh, if you're talking about foreigners, I suppose he was.—Capper's Weekly.

### He Meant Well

Uncle Charlie (handing his nephew a \$1 bill)—Now be careful with the money, Junior. Remember the old saying, "A fool and his money are soon parted."

Junior—Yes, Uncle Charlie, but I want to thank you for parting with it just the same.

New York has 11,250 buildings of approximately 400 buildings in this country more than 20 stories in height, half are in New York.

## HAULS DEAD BODY OF VICTIM AROUND IN AN AUTO TRUNK

### Michigan Slayer Who Went Joy Riding With Corpse Admits Guilt.

Kalamazoo, Mich.—The blithe manner in which Clarence Frechette, twenty-five, Michigan's notorious "flying bandit," went joy riding while the body of his employer he had killed for jealousy of a girl lay in the rear trunk of the victim's automobile was disclosed here.

Frechette was arrested at the California-Nevada line after driving 2,000 miles across country with the body of his victim, Robert Brown, twenty-four, Kalamazoo trucking contractor. Arrested with him in Brown's car were three unsuspecting passengers he had picked up along the road.

The ex-convict, a dapper 130-pound young man, said he shot Brown and stuffed his 180-pound body into the trunk after the contractor boasted of his friendship with Miss Grace Curran.

### Takes Girl Riding.

It was learned here that after the slaying Frechette returned to Kalamazoo and took Miss Curran on trips to Benton Harbor and Grand Rapids with the body of his victim in the rear trunk.

Miss Curran said she had known Frechette for about two months, but said she had only met Brown casually on one occasion and had not seen him since and could not have been the cause of the quarrel. By his story of the slaying, she said, Frechette "apparently is making an effort to paint his present circumstance with a glamor that does not exist."

Along with other confessions made to California police, Frechette admitted he was the "flying bandit" who was convicted seven years ago for slugging his flying instructor, Harry Anderson, with a hammer during a flight from Pontiac.

The ex-convict said Anderson "froze to the controls," but evidence given at the time of the trial was that Frechette landed the plane, though wrecking it, and then rifled it for valuables. He was sentenced to serve six to ten years, but was released after serving the minimum term.

### Stops for Holdups.

Frechette also confessed that on his way West he went to a dance in Salt Lake City, leaving the automobile and its ghastly cargo parked in the street outside the dance hall, and that he committed three robberies. He said he held up two drug stores and a restaurant in Denver, obtaining \$41 to help finance his flight.

From Elko, Nev., he sent a telegram to Brown's father, Roy Brown, signing it "Robert" and asking that \$30 be telegraphed to him at a Sacramento (Calif.) hotel. That telegram led to his arrest, for the senior Brown suspected his son had been slain and asked California police to be on the lookout for his car.

### I. F. SNYDER Furniture Store,

Telephone No. 48.

Mentone, Indiana.

Halted near Truckee, Calif., by border patrol police, Frechette still was his carefree self until one of the policemen pried open the trunk and stared into the lifeless eyes of young Brown. Pistols were shoved into the ribs of Frechette and his male passenger, John M. Rivas Salt Lake City miner. Rivas' wife and young son were along.

After first asserting he was Brown Frechette admitted his identity and confessed the slaying.

### Husband Kicks His Wife; Given Two Years in Jail

St. Louis.—Walter Dunne, a roofer, was brought into court on a charge of failing to support his wife and eleven-year-old daughter. A probation officer told the judge that Dunne had threatened to kick his wife when he caught her.

The judge admonished Dunne and said he would sentence him to a year in the workhouse.

"That's okay with me," Dunne said. Mrs. Dunne then took the stand and testified against her husband. As she left the stand, Dunne leaped up and kicked her.

Dunne promptly was given another year in the workhouse.

### Weather Bureau in Army Service

When the federal weather service was organized in 1870, it was made part of the United States Army Signal corps.

### First Crude Oil Pipe Line

The first crude oil pipe line was completed in Pennsylvania in 1865. It was four miles long.

### Birthplace of Minimum Wage Laws

Australia is the birthplace of minimum wage legislation, the first act having been passed by Victoria in 1890.

### Think It Over

The path of duty lies in what is near at hand, and men seek for it in what is remote.—Japanese Proverb.

### Japanese Superstitions

The Japanese are neither religious nor very superstitious, yet they still believe in evil spirits and resort to exorcising ceremonies. Some time ago one such impressive service was performed by Buddhist priests in the nation's chief railroad station in Tokyo in order to drive out a malignant spirit that was held responsible for a number of suicides, assassinations, derailments and other accidents which had occurred within the building.—Collier's Weekly.

### How Much Is a Billion?

If a man had begun saving \$400 a day 6,000 years ago and had never missed a day, he would not yet have amassed a billion dollars. It would take a man 15 years to count a billion if he could count at the impossible pace of 300 a minute, working 10 hours a day and seven days a week.—Capper's Weekly.

## WIFE BEATER IS FLOORED BY JUDGE; HE WILL BE GOOD

**Husband Admits His Guilt,  
Then His Honor Steps Down  
and Gets Busy.**

Vincetown, N. J.—Recorder William H. Grady of this town is a mild man of 175 pounds and the age of fifty. But he has the Grady inclinations.

Haled before him was John Senski, thirty years old, a 190-pound laborer. The warrant had been issued on the complaint of Senski's wife, Elizabeth, who complained that her husband had beaten and kicked her and had thrown their son, John, Jr., seven, violently against the wall.

"Well, now, what was I to do?" Recorder Grady said. "He had pleaded guilty to the charge. He admitted it was not the first time he had beaten his wife. Out here in the anthracite fields, when these fellows get through work, they say, 'Let's go home and throw the old woman around a bit.'"

### Had No Good Reason.

"When I asked him why he had done it, he couldn't give an adequate reason except that his wife and child deserved a beating every once in a while. 'Well, I thought to myself 'should I fine him the \$1,000 stipulated by law? He'd never pay that in his lifetime. Then he'd have to go to jail for a year in default of the fine.'"

"Well, I thought, 'I might have him withdraw his guilty plea and then I could hold him in bail for the action of the grand jury and get rid of the whole business like that.' But I knew that Senski couldn't post bail of 5 cents, so he'd have to be locked up until the grand jury meets and that ain't till April.

"So, your wife and child need a licking now and then, eh? I asked Senski, and he says 'Sure.' And so do you," I told him, and then I let him have it.

### Just Slapped Him.

"I was easy. I just slapped him." "How many times did you hit him, Judge?" the recorder was asked.

"Oh, quite a few times."

"Did Senski fall down?"

"Yes, he fell down, but he got right up again; that is, every time except the last time. He sat on the floor a few minutes while I told him he ought to be ashamed of himself. He promised he wouldn't do it again. And, you know, I don't think he will."

Mr. Grady retired from engineering three years ago after assisting Soviet Russia with its five year plan. He was expelled from that country in 1931 when his wife, Mrs. Eva Garrette Grady, made some cracks at Communism in a series of magazine articles called "See Russia and Die—Laughing."

## Mother Murders Her Son Without Knowing Him

Belgrade.—Out of the hills has come the story of a family tragedy suggesting the work of a Russian novelist. At

Oravitz a mother and her daughter killed and robbed a stranger at their inn—not knowing that he was their son and brother.

Peter Nikolaus left home twenty years ago to seek his fortune. He worked in Hungary, Rumania and other lands and amassed a moderate sum. He married and had one child. Recently he decided to visit his mother and sister, who kept an inn.

His wife and daughter stopped to see a relative living near and late at night he went over to surprise his mother. When he saw that she did not recognize him he pretended to be an ordinary traveler, took a room for the night, and went to bed.

Feeling himself at home, he took from his pocketbook a large sum of money which he intended to give as presents to his mother and sister and left it on the table beside his bed. He did not lock his bedroom door.

During the night his mother looked into the room and saw the money on the table by his bedside. She told his sister and between them they hatched a plot to kill him and take the money.

They entered the room, stabbed the sleeping man to the heart, carried his body out and buried it in the courtyard, taking all the money.

Next morning his wife came to the inn and introduced herself.

## Bold "Fugitive" Opens Up for "Great Big Cop"

Cleveland.—One shout, "I'm a policeman, open up!" and the "fugitive" walked out sheepishly.

The "fugitive" was the two-year-old son of Mr. and Mrs. Howard L. Hyde of suburban Shaker Heights. He had locked himself in the bathroom. After twenty minutes' pleading by the boy's mother to open the door, she called police for aid.

Patrolman John Brennan arrived, cleared his throat for his most authoritative bass, and shouted. The door opened instantly.

## Build Log Cabins for Stranded Rural Folks

Madison, Wis.—The log cabin of modern days, plus a few modern improvements, has been found most satisfactory for low-cost housing for northern Wisconsin's stranded rural population.

Timber now is being cut for the construction of 25 homes as an experiment next summer. If they fulfill expectations many more will be built. Forest products laboratory experts designed the new cabins. Split logs will be set upright, instead of laterally.

### Gathering Wool of Camel

The wool of the camel is neither shorn nor pulled. It's gathered by the Bedouins, by hand, in the spots where the camel caravans have rested the night before.

### Guiteau's Pistol and Confession

The pistol used by Charles J. Guiteau to assassinate President Garfield together with his confession, is the property of the National museum.

### Egypt's Calendar

Egypt's calendar of 365 days goes back to

### Owls Sun Themselves

Owls do not avoid daylight; they are fond of sunning themselves before they retire to sleep in the morning.—Pearson's Weekly.

### The Two-Sided Thing

As long as a thing is still a question it has two sides, but when science and logic have settled the issue it ceases to have two sides, and in doing so ceases to be a question.

### World's Smallest State

Andorra, the world's smallest independent state, is perched on a rocky ledge at an elevation of 6,000 feet with an area of 170 square miles and a population of 5,000.

### Pure Carbon

Pure carbon exists in three modifications—amorphous (charcoal, lamp-black, or coke), graphite, and diamond. Needless to say, the first form burns quite readily. The other two can be burned, but not under ordinary conditions. Compressed oxygen and a fairly high ignition temperature are usually necessary for their combustion. The heat given off in burning, however, is much the same for all three forms. The minerals or ash of coal contribute nothing to its heat value. The heat comes entirely from the oxidation of the coal's carbon and hydrogen, and chiefly from the former.

### Glove Making in Czechoslovakia

Gloves have been manufactured in Czechoslovakia for nearly 150 years.

### Hand of Great Apes

The hand of the great apes is more highly specialized than a man's hand, says an anthropological report, but man's foot is the more highly specialized.

### Odd Remedies Used

Toasted hawk, monkey's head, dried newts, and baked sparrow are some of the primitive "cures" still to be procured in some chemists' shops in Tokyo.

### Leave It Up to Enemies

"Tain' no use tryin' to destroy yoh enemies," said Uncle Eben. "If dey's as bad as you thinks dey is you kin let 'em alone to fight among demselves."

### Animals Conserve Body Warmth

In cold weather, men stamp their feet and blow on their hands to keep warm, whereas wild animals and birds seem to conserve their body warmth to best advantage by staying very still.

### Head-Swapping Old Custom

Head-hunting in the Philippines is seldom a one-way transaction. Since the headless body of a fallen warrior is never claimed by his slayer, it is usually carried to his own village dwelling, where it is tied in a sitting position in a bamboo chair, pending negotiations between the villages for an exchange of captured heads.

## A Few Figures Worth Remembering

A gentleman of Toledo, O., named Silas E. Hurin, wrote to Senator Donahey, urging him to support United States entrance into the World Court. Senator Donahey sent an answer that surprised the Ohio gentleman, who sent it for publication to a weekly called The New Republic, telling the sympathetic editor that he considered Senator Donahey's reply "so much like mere piffle that it cannot be dignified by designating it as an argument."

Some citizens will find in Senator Donahey's reply exactly the answer that 90 percent of Americans would have liked to send. They will thank the New Republic for making it possible to give the letter fairly wide publicity. This is the senator's letter, and three cheers for him:

"If Great Britain made the payment due us on the war debt, it would cost her 4.1 percent of her budget. She says she can't pay us, but she is spending 13 percent of her budget on armaments.

"If France paid, it would cost her 2 percent of her budget. She says she can't pay us, but she is spending 27.4 percent of her budget on armaments. After the armistice was signed we loaned France more than a billion dollars and during the same period of time she loaned other European countries \$700,000,000.

"If Italy paid us, it would cost her 1.4 percent of her budget. She says she can't pay, but she is spending 33.1 percent on armaments.

"We spent \$12,000,000,000 on their war. We loaned them \$12,000,000,000 more. We conscripted 4,000,000 for their war. We shipped 2,000,000 across the sea. We shipped almost all in British bottoms, and paid Great Britain \$140 to \$180 for the transportation of every boy. We paid them to transport our boys to their war.

"A hundred and twenty-five thou-

sand of those boys never came back.

"We are paying \$800,000,000 a year interest on these debts that we contracted for them and that they now refuse to pay.

"If you subscribe to the greatest fraud of all time and condemn me for voting 'no' on World Court adherence, sign this statement and return it to me.

"VIC DONAHEY."

Burns Cured Without Scar

By use of the leaf of the tropical plant, aloe vera, severe burns have been cured without a scar.

## WARM BREEZES

"Well, Old Pal, spring is here."  
"Well, where's the chicken feed?"

## Hard Times

First Business Man—What time have you?

Second Ditto (looking at watch)—A quarter to.

F. B. M.—Quarter to what?

S. B. M.—Dunno. You see, times got so tough I had to lay off one of the hands!

## Probable Origin

Billy—Our Sunday school lesson told about some evil spirits that entered a herd of swine.

Father—Yes, did you understand it?

Billy—I was just wondering whether that was the way deviled ham got started.

## No Lagging Veteran

Betty on a visit to her aunt, being offered some left-over fragments, politely declined them.

"Why, dear, don't you like turkey?" Inquired her aunt.

"Only when it's new," said Betty.

## Experimental Publicity

"That man," said the hostess, "is a great inventor."

"Which kind of an inventor," inquired Miss Cayenne, "one who uses a laboratory or a typewriter?"

## Nothing Doing

"Thomas, I do not like calling my chauffeurs by their Christian names—what is your surname?"

"Darling, madam."

"Drive on, Thomas."

## What?

Teacher—Now, Robert, what are you doing—learning something?

Robert—No, sir; I'm listening to you.

## SPRING BUDS

Abandon not your old clothes till you get your new.

He that pelts every barking dog must pick up a great many stones.

Don't hurrah till you are over the bridge.

Silence may be golden, but smart partee is diamonds and rubies.

Some point the finger of scorn and others use their fists.

There never was a time when critics were not needed.

Individualism is the strength of the business world.

A wise man thinks before he speaks; a fool afterwards.

In all true growth the new rests on the old.

Owning property engenders a sense of responsibility.

There were just as careless drivers 30 years ago, but the horses had sense.

A second-rate mind is likely to dislike a first-rate mind when it can understand it at all.

Not all good writers seek fame. Some are ghost writers and write solely for money.

Even an electric chair becomes in time an antique. But who would buy it?

Those who don't try to climb the ladder of success perhaps have more fun.

Some of those who are silent martyrs may be merely thinking malicious thoughts.

We know a man who says half his joy in life lies in not piling up debts to pester him.

Everything in the world seems wrong to a sensitive youth of seventeen, and again when he reaches seventy.

### Odd Spots

Recently two very important scientific discoveries have been made. One is that under the state of Montana lies a vast glacier composed of various gases which have formed a natural refrigerating agent and frozen an underground lake. The other is that, suspended sixty miles above the North polar regions is a canopy of ice-particles. French physicists who visited Greenland say that it is the cause of many violent thunderstorms. In contrast to these is the huge subterranean fire which rages beneath a mountain in the state of Colorado. It started in a coal bed years ago, and periodically,

as the mountain is eaten away, it slips down till now it is 100 feet lower than it was ten years ago.—Tit-Bits Magazine.

### Fishy Currents

Ocean currents have now been so accurately determined and mapped, mainly by the method of tabulated drift-bottles, that it is reasonably possible to forecast good or bad sea-fishing seasons two years in advance. Fishes are dependent upon both vertical and horizontal currents. The first bring up essential foodstuffs from the depths, and the second not only convey the food to the regions the fish inhabit, but also carry the floating spawn and young fishes in certain well-defined directions.

### Peak Named for Edith Cavell

Mount Edith Cavell in Jasper National park, Alberta, is said to be the finest monument in the world to a woman. It is named after the British Nursing Sister who was executed by the Germans during the World war. The peak rises to a height of more than 11,000 feet and dominates the whole of the Athabaska river valley.

### Rats Stop Automobiles

On their way to a rubbish heap hundreds of rats crossed the highway at Loversall, near Doncaster, England, and caused a tie-up of traffic. Many of the rodents were killed before motorists could stop. Other drivers narrowly missed accidents on the slippery pavement.

### Snakes Kill Each Other

In a battle between a cobra and a mamba in London both were severely bitten, the mamba being the first to succumb, and the cobra dying while trying to swallow its dead enemy, each falling victim to the other's venom.

### Traffic Police Favored in Rome

A quaint custom, heartily favored by traffic policemen, is carried out each Epiphany day in Rome, Italy. On that day grateful motorists present gifts of all kinds to the traffic rulers.

### More Consideration

Diner—Say! Of all the vile, nauseous messes ever set before a man to eat—

Walter—Sh! You seem to think we're your wife.

### Learning Something

Dad—Well, Willie, what did you learn at school today?

Willie—Not to sass Billy McNutt.—Pathfinder Magazine.

### Oldest Dry Land Known

The Central Asia plateau is the oldest continually dry land known to science.

### Mona Island

Mona Island is a possession of the United States, in the Mona passage, a strait 30 miles long, which separates Haiti from Porto Rico. The island is seven miles long and two miles broad.

## He Had 14 Wives, Swindled Them All

Toledo, Ohio.—"I've had 14 wives—and I've taken 'em all for suckers."

Thus detectives revealed when seventy-five-year-old William J. Currier of Fort Wayne, Ind., pictured his operations to officers.

Arrested here for Miami, Fla., police, he was released when Miami authorities said they would not pay for his return. He had been sought five years on charges that he purchased eight new automobiles through finance companies, sold the cars and fled.

Recently suit for \$13,000, charging wrongful conversion of property, was filed against him by Monica Kehoe, Ohio State university student.

## TAKES HINT FROM SOLOMON'S AWARD

### Shell Shocked Soldier Given to Three Families.

Paris.—Confronted with one of the most poignant problems arising out of the World war—the case of a shell shocked and amnesia victim who is claimed as a lost relative by twenty different persons—the court in the little town of Rodez in the south of France adopted a solution reminiscent of the judgment of Solomon.

Selecting three claimants who seemed the most serious, the court ruled that "Private X" should live for three months in turn with each of them. A special commission named by the court will supervise the experiment and try to determine whether "Private X" shows any signs of recognizing the surroundings or supposed relatives. At the end of the nine months' period, the court will give a definite judgment regarding custody of "Private X" after consideration of the experts' report.

The center of this strange legal tangle has been an inmate of an insane asylum since 1918. He originally turned up in a batch of returned prisoners at Lyons at the close of the war.

He could not remember his name or what had happened to him before being made prisoner. There was no way of identifying him.

For years no one claimed him until authorities appealed to the press. Stories were written about him. His photograph and descriptions were printed. Last, but not least, readers were reminded that the state owed him 300,000 francs about \$20,000 today—in pension arrears, and that naturally since he is incapable of managing his affairs the money would go to his legal guardian.

Almost immediately letters started pouring in from families who thought they recognized "Private X" as a lost son, brother or husband. Of all these letters, three seemed to the court to be worthy of consideration.

The three candidates are the Monjoin family who believe that "Private

X" is the son of Octave Monjoin and who was reported missing in action; Mme. Gensac, who declares that he is her son, Henri, missing since 1915; and Mme. Le May, proprietor of a tobacco store in the center of France, who says he is her husband, Marcel.

The Monjoin family started the litigation to obtain custody of the soldier, thus forcing a decision by court. Mme. Le May gave the court a very detailed description of certain marks on her husband's body which corresponded with those on "Private X."

## Dogs Bark for Aid as Their Mistress Drowns

Cleveland, Ohio.—A barking dog led neighbors to the body of Mrs. Ramona Reifsnider, twenty-seven, who drowned while bathing in her apartment.

A woman living on the second floor went to the basement, where she noticed water dripping from the floor above. As she passed the first floor again she heard the Reifsnider dog barking furiously. She entered the apartment and there found Mrs. Reifsnider drowned in the overflowing tub.

A burn on her neck and the presence of a 110-volt sun-ray lamp near by led police to believe she had reached for the lamp with wet hands while still in the tub. Police decided Mrs. Reifsnider had either lost consciousness from a shock or that it might have caused her to fall in the tub.

## Bear and Hunter Fight Grim Battle to Death

Kelso, Wash.—The isolated Barinof Island, Alaska, was the stage for a grim tragedy discovered by Curtis Barber of Kelso, employee of a United States government surveying crew on the island.

Barber came upon the skeletons of a giant Kodiak bear and a hunter. Apparently the bear had been fatally wounded by the man. The skeletons evidently had lain beneath a dense forest for many years. No one could identify the hunter.

### Pennies Pay for Wedding

The Dalles, Ore.—Earl Clarke and Juanita White bought their marriage license and paid the minister who performed the ceremony—with pennies, saved during all of last year for just such a purpose.

### 500 Abandoned Mines Sealed

Pomeroy, Ohio.—Five hundred abandoned mines in Meigs county have been sealed since last March by FERA workers. Their closing is expected to stop the flow of polluted water into streams.

### John Paul Jones' Sayings

Among the famous sayings of John Paul Jones besides "I have not yet begun to fight," were these: "I do not wish to have command of any ship that does not sail fast, for I intend to go in harm's way!" "I have ever looked out for the honor of the American flag." "I can never renounce the glorious title of a citizen of the United States."

#### Harbor Shaped Like Banjo

• Willemstad's harbor, Curacao Island, is shaped like a banjo, with a narrow neck for an entrance and a large circular basin for anchorage and wharf locations. The picturesque town is built on both sides of the narrow entrance channel and along the flanks of the basin. A pontoon bridge crosses the channel and is swung aside to permit the passage of ships.

First to Have Mother's Day  
Oklahoma proclaimed Mother's day two years before it was recognized nationally.

The Alumni banquet of Leiters Ford High School was held Saturday evening April 13.

Mrs. Minnie Deal of Warsaw has been employed at the Mack Haimbaugh home for the past five weeks. She returned to her home Sunday.

Mrs. Catherine Jefferies who had the misfortune to fall and break her hip last week is getting along fine. She is at the Emergency hospital in Warsaw.

L. A. Boganwright had the misfortune to have his sheep attacked by a number of dogs. Four were killed and five injured. The dogs were discovered by Henry Meredith who drove them away.

Mr. and Mrs. Rohrabach and Mrs. Roy Maxwell were called to Delphi last Sunday on account of the death of Mrs. Robert Trawin. Mrs. Trawin was a sister of Mrs. Maxwell and a daughter of Mr. and Mrs. Rohrabach.

## OBITUARY

Once again we are reminded that while we are in the midst of life we are in the midst of death. Thus it has pleased the Almighty to move from our midst, Mary Levon, daughter of Roy W. and Dora E. Goodman, who was born Sept. 9, 1912 in Mentone and departed this life March 20, 1935 at the age of 22 years 6 months and 11 days. She passed away at the home of her mother who so lovingly and tenderly cared for her the last three weeks of her life. On June 29, 1932 she was united in marriage to Charles William Blue.

She spent her entire life until the time of her marriage in and around Mentone. The last three years were spent in Warsaw.

She was a member of the Mentone M. E. Church to which she was loyal as long as she lived there. She was a member of the Evening Star Rebekah lodge 151 of Mentone of which she was Vice Grand at the time of her death.

Her school days were spent in Mentone except the last year which was spent Tippecanoe where she became a member of the 1931 graduating class.

She leaves to mourn her untimely departure, her devoted husband, Father and Mother, one daughter Patty, three brothers, Floyd of Gary, Marshall of Mentone, Vinson at home and one sister Emma Clutter of Mentone. A host of relatives and friends. One sister, Virginia, having preceded here in death three years ago. She was a loving wife and daughter always thoughtful of others. Our loss is her eternal gain; she is not dead, nor death; Can only take away the mortal breath, And life commencing here is but the prelude to its full career; And hope and faith the best assurance given, We do not live to die, we die to live.

Funeral services were held at the house and burial at Harrison Center cemetery with Rev. Burgess of Tippecanoe officiating.

### CARD OF THANKS

We wish to thank our many neighbors and friends who helped in any way to our comfort during the sickness and death of our beloved wife, daughter and sister. Also the beautiful floral offerings.

Charles Blue  
Dora Goodman  
Emma Clutter  
Floyd, Marshall, Vinson Goodman

## Girl Scout News

Amos Skeets

The Scouts were the guests of DeWitt and the Methodist Church Thursday evening at the revival meeting. The twenty one Girl Scouts present met in the lecture room and volunteered to sing in the choir. As church took up the girls filed in under the charge of Rosalind Mentzer, Captain and Eileen Mollenhour, Lieutenant.

A great number of Boy Scouts were present under the leadership of Maurice Greulich. Both Scout troops were in uniform.

Rev. DeWitt after extending cordial thanks to the Scout troops for attending then read from the Apostle St. Johns. The subject was about the blind beggar who, when he heard that Jesus of Nazareth was passing by shouted at the top of his voice "Lord, have pity on me."

## OBITUARY

Susan A. Manwaring, daughter of Elliott and Sarah Manwaring, born Sept. 19, 1864 on the farm one mile east of Mentone, she passed away April 5, 1935. She was united in marriage to Nelson A. Clay on April 16, 1884. To this union were born three children, Eric Earl who died at the age of two and a half years, Gladys Clay Nottingham of Mentone and Nina R. Clay of Stuebenville, Ohio. The greater part of her life was spent in Ohio at Old Fort, Mt. Vernon and Oberlin. Four years ago she and her husband returned to Mentone to be near her daughter Gladys and family who are living on the home farm. The last twelve years of her life was spent in constant care of and devotion to her father who died in November 1924 and her invalid husband who passed away July 1st. 1934.

She leaves to mourn her going two daughters and four grandchildren, but they mourn not as those who have no hope, for she taught them by her life and words to believe in Him who is the Resurrection Life. She was a loving and wife, the dearest and best of mothers, and her life was an inspiration to all who knew her and loved her. Her children rise up and call her blessed.

Officers for the following year were elected for the Beaver Dam Parent Teachers Association. They are as follows: Raymond Lash, President; Charles Leininger, vice president; Mrs. Kinder, treasurer; Mrs. Charles White, secretary. After election of officers entertainment was furnished by the school.
