OF INTEREST TO SCHOOL STUDENTS

As the summer is waning and summer vacation is drawing to a close our minds turn from the old swimming pool and other sports back to the text book and school days. It may not sound very interesting now but when you look back in after years you will all admit the years in school were the best years of your boyhood and girlhood. School has its ups and downs but what doesn't?

I'm sure no one is ever sorry for the years they spent in school. Now this year the Co-Op News is planning big things for the school. The first thing is to be able to publish this paper every week and we want the school to have a big page and have it full everytime. But what we need is more advertising. You students spend a great deal of money in this town during the eight months of school on books, School supplies, athletic equipment not to mention what your parents spend on clothing and all kinds of food for lunches. If the business places you spend this money with either at home or in out side towns does not advertise in this paper call his attention to the fact that it is a paying investment. Also that it will help you get your school news every week. Interesting essays and compositions that are produced in the school, all sports and social activities maybe a joke now and then and the honor roll each month are among the things that will be interesting material for your page.

MENTONE NEWS

Mr. and Mrs. Fred Rush and daughter, Frances and Dale Plew motored to Jonesboro last Sunday where they spent the day with Mr. Rush's uncle and family, Mr. and Mrs. Beru McKeever.

The Lions Club is sponsoring transportation and chaperons to The Worlds Fair for children between the ages 9 and 15 who have no other means of attending. They have been in touch with the State Police and will have police protection to and from Chicago.

The mill buys wheat, oats, corn,

Honor Newlyweds With Dinner
Mr. and Mrs. Charles Davis entertained Thursday evening, July 20, with a 7 o'clock dinner at their home. The occasion was in honor of the wedding of their son, Earl to Miss Edna Ruth Powers of Rochester. Those present were: Mr. and Mrs. Lon Walters and daughters Margaret and Cleo and son Harold, Mr. and Mrs. Harry Clymer of Rochester, Mr. and Mrs. Earl Davis and Mr. and Mrs. Charles Davis and family of Warsaw.

WILL OPERATE FULL TERMS

Mentone and Harrison Schools Will Not Need State Aid

The Mentone and Harrison township high and grade school is one of the few in Indiana which will not be crippled this year because of financial difficulties. In fact, the teaching force has been expanded and increased by George Myers, township trustee. Dale Kelley is principal of the school.

Trustee Myers and Principal Kelly issued the following joint statement: "Mentone and Harrison township will have a full term this school year. Our teaching force is increased by two. Joseph Kintzel will teach vocational agriculture and Miss Rosalind Mentzer will be the vocational home economics instructor.

"By being economical in administration, the last two years, the school has built up enough surplus in the various funds so that the school can operate the full term this next school year of 1933 and 1934 with the two additional instructors.

"Economics were made in teachers' salaries with a 20 per cent wage reduction and transportation costs were reduced by rerouting of the 14 school bus routes.

"We will be able to operate without reducing our teaching force even if Harrison township does not receive the \$600 state aid on the ratio of pupils as required by law. up4a fsa.

BIRTH

Mr. and Mrs. Floyd Clingerman of Tippecanoe are the parents of a son born July 27. The new arrival was named Jack DeWayne.

CHILDREN VISIT WORLD'S FAIR

Mentone Lions Club Will Sponsor Trip for about 200 Children to Century of Progress.

In keeping with the purpose of Lionism, the Mentone Lions Club is sponsoring a children's trip to the Century Of Progress Exposition in Chicago. The date has been set for Friday, August 4th.

The committee in charge has made the following arrangements. At 4:30 A. M., all are to assemble in front of the Big Drug Store. There the children will be divided into groups of ten each. An adult chaperon will be assigned to each group. Each child will receive a badge bearing his name and other information that will keep him from getting lost.

The journey to Chicago will be made in buses, escorted by the Indiana State Highway Police. On arrival at the grounds, the various groups will go where they wish. Each chaperon will be responsible for a particular division. At a certain time in the evening all will assemble at an appointed place and the return trip will be made in the same manner as the journey there.

When this action was first proposed at the Lions Club, it was thought that the response would not be large.

The result has been most surprising. Already the original space has been taken and additional buses will be well filled. Not a detail will be overlooked in making this a safe, interesting and profitable trip to America's greatest Exposition.

It is the hope of the Lions Club that this trip will be of value to the youth of our land. The club exists not for personal profit or gain, but for service to humanity.

Building Another Addition to Coal Bins

As the original bins have proved too small workmen have been engaged the past week in the construction of an addition to them. As soon as they are completed they will be filled with coal that is ready for market. When buying coal remember the Co-operative Mill.

Unique Party at Mentone

Members of the Psi Iota Xi sorority were entertained in a very unique manner Friday evening, July 21, at Mentone. Guests garbed in pajamas arrived at the home of Miss Eunice Reed, which was made into a summer resort. "Registration," Check Your Wraps" and "Information" departments were to be found in the reception room. Four tables of bridge progressed in the "South Lobby," with Mrs. Nellie Reed receiving the prize for high score and Effie Winterrowd second prize.

Candies were placed at each table in clever brown paper canoes, with miniature ships forming bridge tallies. Following the bridge game, guests "checked out" and took a taxi tour.

They followed direction given on maps to various points in Mentone and returned with souvenirs from their trip.

The guests were then taken to the beautiful garden of Miss Thais Greulich, which was arranged as a beach. A large sandwich stand was placed in the center of the yard. Japanese lanterns were used as artistic lighting for the garden. A sand bucket filled with refreshments was given each guest. After they had roasted weiners over a large bonfire, guests were seated on pillows around a beautiful pool where they ate their lunch from their sand buckets. A clever consolation prize was awarded to Mrs. Reed.

Those enjoying the clever affair were: Misses Thelma Harris and Helen Jontz of Warsaw, Effie Winterrowd of Indianapolis, Mesdames Nellie Reed, Helen Huffer, and Elizabeth Myers and Misses Rosella Busen burg, Rosalind Annabel and Margaret Mentzer, Kathleen Anderson, Bernice Bowen, Frances Clark, Mary Jane Borton and the two hostesses.

W. F. M. S.

Mrs. Ed Kesler was hostess to the W. F. M. S. last Friday afternoon. Mrs. Ed Kesler is a charming hostess and has a beautiful home and with Mrs. Guy as program leader needless to say we had a very profitable and enjoyable session. Delicious pie and coffee was served during the social hour. Everyone present registered appreciation.

Mrs. Cora VanGilder, Mrs. George Myers, Mrs. Nottingham, Mrs. F. R. Burns, Mrs. Fred Swick, Mrs. C. O. Mollenhour and Miss Rosalind Mentzer spent last Friday visiting Camp Logan, Dewert Lake a Fort Wayne Girl Scout Camp.

The mill buys wheat, oats, corn.

SHE GETS RESULTS

One of our lady readers acting upon our suggestion of a few weeks ago wrote her New York egg receiver, stating the good qualities of Co-Op. News advertising, and the result is the one-half page advertisement of the Greater Butter & Egg Co., Inc. in this issue. We certainly thank this lady for her cooperation in this matter and trust that many more will do likewise.

Firms who spend money advertising in order to get new customers are usually more reliable than firms who do not advertise, as they cannot afford to pay out money to get new customers and then neglect to give them the best of service. If you are thinking of making a change in New York receivers we urge you always consider the advertisers in the Co-Op News when making the change. The Greater Butter & Egg Co., gives good references and in their advertisement make a very strong appeal for your business.

Now let some more of our reader friends write their egg receivers and note the improvement in your Co-Op. News.

Mr. and Mrs. Voukin of Chicago are visiting Mr. and Mrs. Frank Vernetto. Miss Vernetto Snyder who has been visiting in Chicago return with them.

Indians Knew Only Crab Apple

The wild crab was the only apple known to the Indians before cultivated varieties were introduced by the whites. It is an excellent "keeper" and after being buried or cached under ground over winter it is considerably toned down in astringency.

JUST TOO MUCH

The tidal wave of money shortage had caught the old bookmaker and landed him, high and dry, in the workhouse. But the ruling spirit still swayed him, and he started a "book" inside.

A friend asked him how he was getting on, and he shook his head sadly. "The business is too much for me, and I shall have to get a clerk," he replied. "I can reckon two to one in cigarettes, or four to one in an ounce of tobacco or a quarter of tea, but when it comes to working out eleven to eight on a suet dumpling—well, I'm done."—Tit-Bits Magazine.

A Regular Knockout

"Speaking about boxing," said Brown, "I've got a brother-in-law who's boxed about 50 chaps up to date, and not one of 'em has been seen since!"

"He must be a terrific hitter," remarked Smith.

"Quite a gentle fellow," Brown pointed out. "He's an undertaker!"

Necessary Preliminary

Clara—Now that you know Tom wasn't out with another girl as you thought, why don't you make it up with him?

Sara—Why, he hasn't even attempted to beg my forgiveness.—Stray Stories Magazine.

A Scientific Question

"Nothing is ever totally lost or destroyed," said the professor of physics. "In that case," said the simple and frank person, "how do you explain the fact that everybody loses umbrellas and you never meet anybody who has found one."

History of Poles Obscure

The Poles are ethnologically a branch of the Slavs. Their original history is obscure. The first historical Polish ruler, Mieczyslaw (900-992), became a convert to Christianity, and Poland took rank as one of the political powers of Europe. He was succeeded by his son, Boleslas I (992-1025), who extended his kingdom beyond the Oder, the Carpathians and the Danube. He was recognized as king by the German emperors.

Oil Fields' "Christmas Tree"

"Christmas tree" is a term applied to the manifold pipe connections, gate valves and other fittings, otherwise known as the "control head" that is screwed or flanged to the tops of the well casings.

Place of Revels and Tragedies

The Tower of London, as one historian has phrased it, was "the home of England's stoutest kings, the grave of her noblest knights, the scene of her gayest revels, the field of her darkest crimes." Behind it stretch 800 years of authenticated historic life, 1,900 years of traditions. Compared with other palaces and prisons and fortresses of Europe, the most famous historic edifices of the continent appear as things of the present day.

U. S. Has Best Polo Mounts

Polo players in the United States, together with the United States Polo association, have gradually acquired the best polo mounts in the world from England, Ireland, Argentina and Australia. Texas, California, Omaha and Oklahoma have produced many fine polo horses.

Use of Metric System

The metric system recently adopted by the A. A. U. for track and field could not be extended to swimming because nearly all the pools in the United States are either 25 or 50 yards in length and could be altered only at a great expense.

Find Forgotten Mine

Turkish engineers have discovered by accident in the River Aras, near Kaghisman, a mine that had been forgotten for 300 years and is said to contain auriferous lead worth millions of dollars.

A BANK REFLECTS THE LIFE ABOUT IT

**Loans and Investments on
Which Condition of a Bank
Depends Determined by
the Kind of Business
Surrounding It**

POLITICAL and popular misapprehensions toward banking are due to little else than failure to realize that it is what the people themselves do that the condition of banking reflects, and that banking cannot of itself reflect events and conditions other than those that actually originate from surrounding circumstances. Francis H. Sisson, President of the American Bankers Association, says in an article in Forum Magazine.

The character of an institution's notes and investments indicates whether it is in the farm regions, a manufacturing center, a mercantile neighborhood or a great financial district, he says, and furthermore, besides identifying the institution as to its locality, a study of its notes will equally clearly indicate the economic conditions surrounding it.

"If a farm district bank's note history shows that its loans rise and fall with the normal cycle of production and marketing of the products of the region, it may be taken as an index of economic good health for the locality," he says. "But if, over a period, the loan volume shows a dwindling trend it may mean a region that is losing ground,—becoming exhausted or being robbed of business by another community. Or if a large proportion of the loans are not paid at maturity but are chronically renewed, or if stocks or bonds or real estate have to be taken as additional security, these too have economic significances, reflecting perhaps crop failures, over production or inefficient, high cost farming methods in a highly competitive national or world market, such as wheat. Inevitably all these facts are reflected in the condition of the local banks.

City Banks, Too

"If the loans of a bank in a manufacturing or merchandising field show a smoothly running coordination with production and distribution they, too, mirror a healthy economic situation. Or there may be here also signs that reflect growing unfavorable conditions, such as excessive loan renewals, over enthusiasm and therefore over-expansion of credit extended to makers or dealers in particular products, and similar circumstances. Similar conditions apply to banks engaged in financing the activities of the securities markets.

"The foregoing is merely suggestive of the infinite aspects of the life outwardly surrounding the banks which form and control their internal conditions. Although these facts seem obvious enough, the discussions and criti-

cisms that have raged about the same often appear to set them apart as somehow separate from the lives of our people, casting forth a malignant influence upon agriculture, industry and trade from forces generated wholly within themselves.

"The truth of the matter is that the fate of the banks is inseparably interwoven with the fate of the rest of the people and of the nation. What happened to the country happened to the banks and what happened to the banks is in no way different or detached from what happened to the people. They are all part of the same pattern, of the same continuous stream of events. No one element in that stream can be called the cause of business depression.

"If the banks caused trouble to some of our people it was because they were irresistibly forced to pass on troubles that came to them from other people. These troubles impaired the values of their securities and customers' notes—and rendered some unable, in turn, to pay back to other customers their deposits that had been properly used to create these loans and investments. Unless these truths are kept continually in mind there is no such thing as approaching an understanding of the banking problem or of properly safeguarding the very heavy stake of the public in that problem."

The Bank as a Rebuilder

In place of a 3 per cent loss on an investment of \$40,000 a large New York savings bank is now getting 6 per cent profit on an investment of \$80,000, because it had the good business judgment to spend \$40,000 in modernizing a group of 40-year-old tenement houses on the lower East Side which it was forced to take over on mortgage foreclosure, says an article in the American Bankers Association Journal. A year or two ago the owner, who had always kept up his mortgage payments, began to neglect the property. It became run down and the tenants began to leave.

The bank remodeled the buildings completely, putting in an oil-burning heating plant, incinerators and other modern changes, with the result the buildings are now entirely rented, and there is \$14,000 a year coming in instead of several thousand going out. At that rate the improvements will pay for themselves in three years.

This same bank has done 15 other renovation jobs similar to this, and all have proved profitable. The bank has its own architects and is employing seven painters who are kept busy continuously.

Birds Hard to See

The English woodcock, when sitting on its nest among dead leaves, would often be overlooked if it were not for its bright eye, which stands out like a brilliant black diamond. When the ringed plover stands still on the stones of the seashore it is practically invisible at a distance of 30 yards, and its near relation, the Kentish plover, is even more difficult to detect.

The mill buys wheat, oats, corn.

DOES A RISING MARKET INTEREST YOU?

Farm lands are going up. Get in while the getting is good. A home and a business for the price of a home.

What is your preference? The corn belt of Ohio and Indiana? Tobacco and blue grass of Kentucky? Or the cotton and live stock of Tennessee?

The Secretary-Treasurer of your nearest National Farm Loan Association, will assist you in your selection. Or write to us for descriptive pamphlet listing these farms. We will be glad to help you to get a good farm at a very low figure, one that will greatly increase in value.

Mentone

Indiana

WORLD WAR BY "YARNS" LIEUT. FRANK E. HAGAN

She Liked That Mule!

During the great German retreat of 1918 a detachment from the Twenty-seventh division, New York National Guard troops, was detailed to evacuate civilians from the recaptured villages still under German gunfire.

Since only the aged, the children, and the infirm were left, this was a difficult and a dangerous job. It was necessary to use force on many of the old peasants to make them leave their homes, the New York troopers learned. Often, evacuations were made under shell fire.

One day an ambulance drove up to a receiving station established for these evacuated civilians. The officer in charge noted a commotion and saw that the chauffeur was experiencing difficulty in discharging his load. The sound of puffing, wheezing and swearing came from the ambulance in gusty outbursts. Soon, a final heave, and the driver emerged from the back of his car, clutching a donkey.

"Hey," shouted the officer. "What's the idea of making this ambulance a truck for live stock? There isn't enough transport for humans."

The disgusted driver pointed a shaking finger to an aged crone who was leading her donkey away.

"Listen," said the disgusted driver with a fine disregard for military etiquette, "you try some time to evacuate the old madam yonder without taking the donkey. Say," he added confidentially, "I battled with her an hour while Fritz was knocking her out of the town. She never would leave without that mule, so I brought him along."

(© 1930, Western Newspaper Union)

Salmon Oil

The virtue of cod liver oil is its richness of the vitamin D, which is the one which prevents rickets, but its flavor has always worked against its use in the nursery. It was always difficult to get children to take it and some were invariably made sick by it. It has been discovered that the oil derived from the salmon packing factories of the Pacific is just as richly endowed with the vitamin D as the cod product.

Species of Magnolia

There are 35 species of magnolia, both evergreen and deciduous, chiefly native in North and Central America, the Himalayas and eastern Asia. All types are noted for their beautiful flowers, which range from white to pink, purple and rarely yellowish. The family was named by Linnaeus, the famous Swedish botanist, in honor of Pierre Magnol, director of the botanic garden at Montpellier, France, from 1638 to 1715.

Letters Sent by Rocket

Letters have been sent by rocket from the top of an Austrian mountain to a village one mile below.

Farthest North and South

The city of Miami, Fla., is farthest
south and Bellingham, Wash., is far-
thest north in the United States.
There are other places that are farther
north or farther south, but none as
large as the two cities named. Both
have populations over 20,000.

Dogs and Dogs

"A good dog," said Uncle Eben, "fol-
lows his master through privation. It's
de pet dog dat yaps an' gets de best
of everything."

Capitals Named for States

Oklahoma and Indiana are the only
states in the Union whose capitals de-
rive their names from the states—
Oklahoma City and Indianapolis.

Bayberry Candles

Bayberries were used for candles in
Colonial days. Candles made of bay-
berries did not bend easily nor melt
in summer like tallow candles.

Marks Important Happening

A monument at Mukilteo, Wash.,
erected by the Daughters of the Amer-
ican Revolution, commemorates sign-
ing of a treaty in 1835, when Indians
ceded what is now all of northwestern
Washington to whites.

Whistles to Help Fliers Land

A way of using high-pitched whistles
to enable an airplane pilot to know
where the boundaries of an airport are
located in foggy weather, and so to
make a blind landing, has been devel-
oped.

The Roman Empire

It cannot be said that the Roman
empire sprang out of Greece or out of
Grecian territory. There is no doubt
that Greek civilization and Greek cul-
ture had an important influence in the
growth and development of Rome. The
Roman empire at its greatest extent,
about 117 A. D., included all Greece.

Chinese Maids Work

In China young women are working
in government offices, in the various
professions as teachers, lawyers, doc-
tors, dentists and scientists beside the
most intelligent leaders of the newer
republic. They are competing with
men in every field and demonstrating
an astonishing capacity for industry,
application and social usefulness.

MODERNISTIC

He—What I want is a home-loving
little wife.
She—Well I love dancing and matinees
and motoring. Home-loving, eh?
Isn't that a new fad?

A Satirical Gardener

"Do you read much fiction?"
"Yes. I take a lot of magazines that
tell me what a fine garden I can make
in my back yard."

New Treatment for Roundworm

You can't expect to make a profit from birds
infested with worms. Use this new way to kill
Roundworm. "Black Leaf" Worm Powder mix-
ed in mash. Easy, economical and convenient.
No handling of birds.

Single Treatment Does the Work

No toxic effect on birds. Doesn't interfere with

MENTONE NEWS

Mrs. Lide Williamson who has been quite ill is somewhat improved.

Jack VanGilder spent last week with Karl Stookey of near Leesburg.

Miss Violet Rothenberger of Evansville is visiting with Miss Kathryn Nelson.

Mr. and Mrs. James Sarber spent Saturday in Chicago attending the Worlds Fair.

Miss Julia Ann Busenburg is visiting with Mr. and Mrs. Fred Masters of Indianapolis.

Mrs. Amanda Busenburg is visiting friends and relatives in Rochester and Logansport.

Mrs. Davison of Marshall, Illinois is visiting with her son and family, Dr. and Mrs. F. B. Davison.

Mr. and Mrs. Irvin Nelson and daughter, Kathryn and son Robert and Miss Violet Rothenberger spent Wednesday in Chicago attending the Worlds Fair.

Mrs. Cora Wheeler, Mrs. Esther Fulghini, Mrs. Joe Ferry and daughter and Miss Ethel Kites of Dallas Texas are visiting with friends and relatives in and around Mentone.

Mr. and Mrs. Edwin Whistman and daughter Louise of Western Springs, Illinois spent Wednesday night and Thursday morning with Mr. and Mrs. C. O. Mollenhour and family.

In the last paper it was stated that Rev. J. S. Johns had sold his share in the Barber Shop and some got the impression that he would not be in the shop after that. Rev. Johns will still be in the shop same as before.

Mr. and Mrs. E. Schooley of Indianapolis Mr. and Mrs. Edward Stevenson of Frankfort, Mrs. Cora Irvin and Mr. Lewis Irvin of Bourbon spent the week end with Mr. and Mrs. S. A. Guy.

Mr. and Mrs. Frank Aurand and daughters of Chicago spent a few days last week with Mr. and Mrs. Jack Hudson. Mrs. Bessie Hudson who has been visiting in Chicago returned with them.

The Misses Annabel Mentzer, Rosalind Mentzer, Kathleen Anderson and Margaret Mentzer left last Wednesday morning for Tomah, Wisconsin where they will spend a week visiting with Miss Mildred Anderson.

Among those from Mentone who spent last Sunday in Winona and heard Rev. Lew Hill were Mrs. L. M. Fife and family, Mrs. Cinninger and family, Mrs. Elsie Minear, Miss Lova Bush, Mr. and Mrs. Alva Creviston, Mr. and Mrs. H. E. Nottingham, Mr. and Mrs. Charles Shuman and daughter, Doris and Ruth Rush.

GIRL SCOUT NEWS

The Scouts are at present engaged in the different nature fields. During one Scout meeting we went on field trips and studied the cultivated plants, trees and shrubs.

Thursday evening Mrs. Clark took a number of the girls up to Lackey's Hill to study the stars which are another "field of nature. We studied the stars of the first and second magnitude and learned about the various constellations. Do you think that you could find the Corona, the Eagle, the Northern Cross, the Archer, or Cassiopea's Chair in the sky? Well just try it some evening, it is extremely interesting.

At 5:30 Friday evening the girls of the Poplar Tree Patrol were hiking up Little Crow River to Bortons woods. They took their supper with them and spent the evening hunting and studying insects.

At the Scout meeting Wednesday we learned how to use the compass and how to tell directions when we are lost. After playing a compass game we were divided into two groups.

One group acted out the story of "Goldenlocks and the Three Bears" while the other group gave the story of "Little Red Riding Hood." Don't you wish you could have seen Little Goldenlocks when the three bears found her in the little bears bed or Little Red Riding Hood when the wolf was going to eat her up?

SOMETHING TO REMEMBER

As we do not charge anything for this paper our readers should bear in mind that we cannot afford to employ someone full time to collect news items. Miss Rush is at the Country Print Shop each Saturday and will be glad to receive and write up any items that you may bring in and if brought in on those days they will surely appear in the following issue.

When the last edition of the Co-Op News was printed there were several news items brought in on Tuesday and as a result there was no room for them and of course they were left out. We hope that all of our readers will remember this and get all items intended for publication in at the office on the days that Miss Rush is here to receive them. We want all the news but feel that we are doing our full share in giving Mentone and surrounding country a paper at no subscription charge. In order to make the paper better we must have more cooperation both from the readers and advertisers.

The Publishers.

The mill buys wheat, oats, corn.

Poultry medicine at the Co-Op mill.

Shower for Newlyweds

Mr. and Mrs. C. Firmen Eckert of Atwood, who were recently married, were given a surprise shower Friday evening July 21, at the home of Mr. and Mrs. Walter Eckert of Atwood. The bride and groom were presented with many lovely gifts. Following a social evening, ice cream and cake were served.

Guests of the evening were: Mr. and Mrs. Fred Decker and family, Mr. and Mrs. M. W. Thorne and son, Robert, Mr. and Mrs. George Brant and daughter Mary, Mr. and Mrs. Harry Maier and family, Mr. and Mrs. Arnold Casner, Mr. and Mrs. Beryl Yeiser and son Doyle, Mr. and Mrs. Charles Casner, Mr. and Mrs. Merle Nelson and daughter, Doris Jean, Mr. and Mrs. Lloyd Miner and family, Franklin Morgan, Harland Freeman and William Burt all of Atwood; Mr. and Mrs. Jack Riner and son, Jack Keith of Mentone, Mr. and Mrs. Cl. de Casner and daughter, Mr. and Mrs. Dallas Anglin and son, Tommy and Wendell Vining of Etna Green.

Smallpox Known to Egyptians

Judging by the skin of an Egyptian mummy, dating back to about 1,200 B. C., the disease known as smallpox was known to the Egyptians.

WEDDING

Page-Deamer

The marriage of Miss Dorothy Deamer, daughter of Mr. and Mrs. M. F. Deamer of the Talma Community and Homer R. Page was solemnized at 11:00 a. m. July 19th, at the Grace M. E. Church in Rochester. The Rev. Thurman Mott of Middlebury performed the ceremony in the presence of 85 friends and relatives. A reception for the bridal party and relatives followed at the home of the bride's parents.

The bride given in marriage by her father, wore a gown of white satin and a bridal veil of silk net and lace. She carried a shower bouquet of brides roses. The bride also carried a borrowed point lace handkerchief which her mother had carried as a bride, bringing to mind the verse.

Something borrowed, something blue,
Something old and something new.

Miss Isabel Ferry, cousin of the bride and maid of honor wore a gown of Eleanor blue and carried Johanna Hill roses. Miss Zena Morris of South Bend wore a pastel green gown and Mrs. Arthur Brown wore rose. Both carried bouquets of Briarcliffe roses and larkspur.

Mr. David Deamer brother of the bride was best man and the ushers were Mr. Robert Creamer of Lorain, Ohio and Mr. Herman Jones of Rochester. Miss Gwendolyn Yunker of Howe, Indiana and Miss Frances Clark gave a recital preceding the ceremony. The Bridal Chorus from Lohengrin was used as the processional, Wedding March by Mendelssohn as the Recessional and during the ceremony the Psi Iota Xi song was played.

The bride is a graduate of Talma High School, Depauw University and is a member of the Mu Phi Epsilon and Psi Iota Xi sororities. For the past three years she has been Music and Art Supervisor in the Rockport, Indiana schools.

The bridegroom is the son of Mrs. Alma Page of Rockport and is a graduate of Evansville College, received his Ph. D at Boston University and is now pastor of the Trinity M. E. Church.

Mr. and Mrs. Page are now making an extensive tour of the Eastern states. They will be at home after Sept. 1 at 210 So. 4th St. in Rockport.

Among the guests from this place were Mr. and Mrs. Arthur Brown, Mrs. Elmer Rathfon, Mrs. Broda Clark, Mr. and Mrs. William Deamer, Mr. James Gill, Mrs. Mack Tucker, Mrs. Emory Huffer, Mrs. Curtis Riner, Mrs. Devon Eaton, Mrs. Robert Reed, Miss Eunice Reed, Miss Thais Greulich, Miss Kathleen Anderson, Miss Kathryn Nelson and the Misses Annabel, Margaret and Rosalind Mentzer.

Mentone, Indiana

Mentone Defeats Studebakers Also Winona.

Sunday July 30, the Mentone Boosters took the strong South Bend Studebakers into camp to the tune of 2 to 1.

Creighbaum who is getting in shape to continue his tryout with the Leagues went the route for the "Boosters" allowing only 4 hits and striking out eleven men.

Last Sunday Winona's team of All Stars selected from the best of the surrounding towns came to Mentone. The Boosters had no trouble in beating them 8 to 2.

Next Sunday Huntington Techacts a team that finished among the first three in the first half of the Indian-Olio League will be here.

This team is considered by many to be equal to or better than the South Bend Studebakers. Come out next Sunday and see another real ball game.

Sunday School Picnic at Park

About 75 Palestine people met at the Warsaw City Park Sunday, July 23, where they held their annual Sunday School picnic. At the noon hour a bountiful picnic dinner was served, following which swimming and boat riding were enjoyed.

FAMILY REUNIONS

The Shatto Cousins annual reunion will be held at the Pittman Grove, 3 miles south of Etna Green, on Sunday, August 6th, 1933. All the cousins are expected to be present. Lucinda Jones, Secretary.

The Laird-Braddock family reunion will be held at the residence of Mr. and Mrs. C. J. Braddock, 329 N. Line St., Columbia City, Indiana on Sunday August 13th, 1933. We hope to see your smiling faces on that date, J. F. Laird, Secretary.

The Coplen & Severns annual family reunion will be held at the home of Charley Coplen, on Sunday, August 6th, 1933. All of the families are expected to be present. Ralph Severns, Secretary.

Valuable Chinese Pottery

Peach blow ware is the most valuable of Chinese pottery. It belongs to the Chinese potteries which are transmutation glazes embracing a type of flame color. These glazes differ from red to a delicate pink, which is peach blow. Peach blow products have realized prize amounts in sales.

Like Beautiful Mountain

"A new responsibility," said Hi Ho, the sage of Chinatown. "Is like a mountain beautiful in the distance, yet often difficult in the ascent."

Reduced Prices In State Fair Tickets

The Indiana State Fair Board has seen fit to make substantial reductions in the general admission charges to the State Fair, September 2nd to 8th.

Under the new regulations the adult prices will be 50c until 6 p. m. and 25c after 6 p. m. Children will be admitted free on Saturday, Sunday and Tuesday, September 2, 3, 4 and 5. All other days the charge for children will be 25c at any time. Automobiles will be charged 25c at all times.

A bargain in State Fair tickets has been arranged for those who act in advance of Friday, September 1. If \$5.00 worth of tickets are bought in advance at one time, the charge for same will be at the rate of 25c each. These tickets are good at gate for either person or car.

For instance, if you have a family of say three members who wish to attend the fair, and your county agent, your employer or one of your friends bought \$5.00 worth, which will be 20 tickets (which is the smallest amount that he can buy at this rate) you can buy from him for your family and your car for one whole day and night of the fair for only one dollar.

These new admission tickets are very popular and it is the suggestion of the Board of Agriculture that you get your friends together and plan to take advantage of this bargain, or that you place your order with your county agent at once so that he may purchase tickets for a large number in your community and secure these special rates for you.

What Knocking Indicates

In a man, as in an automobile, knocking is an indication of lack of power.

City of 1,700 Years

A Pagan city, Weissenburg, which was founded when the Germans first smashed through the Roman fortifications, celebrated its one thousandth seven hundredth birthday.

Good Comparison

Jud Tunkins says a man that writes political platforms sometimes reminds him of an ad writer with an unreliable line of merchandise.

N. I. C. A. Employees All On 8 Hour Day

WE DO OUR PART

The Northern Indiana Co-Operative Association is co-operating full heartedly with the National Industrial Relief Association movement and have increased the wages of the men employed at their plant and have put them all on an eight hour day.

Half of the force report for work at the usual time and quit work two hours early. The other half begins two hours after starting time and quit at the regular closing time.

This change in schedule gives us the full working force but six hours during the day and the management can assure you prompt service if you plan your trips to the plant so as to have your work done during the hours the full crew is at work.

There Will Be An Indiana State Fair

Contrary to the many rumors and reports that there will not be an Indiana State Fair this year, Mr. E. J. Barker, Secretary of the Indiana State Board of Agriculture, says that it has been definitely settled that there will be a fair, and present indications are that September 2-8 will produce the greatest Fair Hoosiers have ever witnessed.

There will be \$81,936.00 offered in premiums and purses. Grand Circuit races will be run throughout the week.

Almost Lost Art

"De truth," said Uncle Eben, "is hard to find out, an' when de gets it, few people know what to do wif it."

California Base Ball Team Here

Saturday August 26

The traveling team from the California school of Base Ball under the direction of the former Boston catcher Jess Orndroff will play the Mentone Boosters here Saturday, August 25, at 2:30 p. m.

This team will be made up of players that have been coached by such stars as Ty Cobb, Tris Speaker, Charlie Root, and others.

The team comes here from Chicago and will be the only game played in this section of the state.

All ball players as well as fans should not miss a game of this kind. See how your own boys compare with players that are being prepared to enter the league.

Co-Operative Mill to Have Suggestion Box

The directors of the Northern Indiana Co-Operative Association have placed a locked box in the feed mill office for stockholders and customers to drop suggestions in.

Anything you can suggest that would be beneficial will be appreciated. Write your ideas and drop them in the suggestion box.

Board of Directors

CIDER MAKING

Tuesdays, Wednesdays, Thursdays and Fridays at my Mill near Athens.
Frank A. Moore

Banana Industry

The banana industry had a modest enough beginning. At first there was Friar Tomas de Berlanga, who took a banana plant from Gran Canaria, to Santo Domingo in 1516. The schooner Reynard is said to have carried 30 bunches of bananas to New York in 1804, the magazine, Fortune, relates but the venture was not pursued. In 1805 there was an attempt to ship bananas from Panama to the United States, but it was abandoned. The first successful effort to ship bananas from the tropics to markets in the United States came when Capt. Lorenzo Baker, a Cape Cod sailing master, picked up a lot of bananas at Port Morant, Jamaica, for 25 cents a bunch and sold them in New York 11 days later for \$2.50 and \$3 a bunch.

PSI IOTA XI

Members and guests of Beta Epsilon Chapter of Psi Iota Xi were entertained Friday evening, at a bridge party at the home of Miss Bernice Bowen of Akron. Miss Frances Clark of Mentone was assisting hostess.

The Bowen home was beautifully decorated with many late summer flowers.

After refreshments, prizes for high bridge scores were awarded Mrs. Carl Myers, Miss Rosalind Mentzer and Mrs. Robert Reed.

Members present were: Mesdames Jack Riner, Devon Eaton, George Clark, George Meyers, Emory Huffer, Robert Reed, Misses Thais Greulich, Kathleen Anderson, Annabel Mentzer, Rosalind Mentzer, Margaret Mentzer, Kathleen Anderson, Eunice Reed, Bernice Bowen and Frances Clark.

The guests were: Mrs. Carl Meyers, Lakewood, New York, and Mrs. Ira Anderson from Delaware, Ohio.

Federal Reserve Act

The first federal reserve act was introduced into the house by Carter Glass in August, 1913, during Wilson's first administration and was a Democratic measure, though 38 Republicans and Progressives in the house and seven Republicans in the senate voted for it with the Democrats. It became law in December of that year. The sponsor of the bill in the senate was Senator Robert L. Owen.

Rides 63,648 Miles for Mail

More than 60,000 miles have been ridden on horseback by a settler in a remote part of New Zealand in getting his mail in the last 34 years. Twice weekly he has ridden from his bush farm in the Whangamomona district to the nearest post office, nine miles away. This makes 36 miles a week, 1,872 miles a year, and 63,648 miles in 34 years.

Gold Production

Gold production figures for 1931 show California to be the leading state, followed in order by Alaska, South Dakota, Colorado, Utah, Nevada and Arizona. While occasionally pure gold in the form of nuggets is found, most of the gold is extracted from quartz or other gold-bearing ores. The largest gold nugget discovered was the "Welcome Stranger," weighing 2,520 ounces, found in Victoria, Australia, in 1860.

tone.

Mrs. Con Williamson of Burket
spent Friday forenoon in Mentone on
business.

Mr. and Mrs. Paul Smith are mov-
ing into the apartment in the Tele-
phone building.

Mr. and Mrs. C. E. Goodwin are
spending a few days in Wanatah
visiting friends and relatives.

Mrs. Cora VanGilder and sons Jack
and Donald spent last Sunday in
South Bend visiting Mr. and Mrs.
Earl Stookey.

Mr. and Mrs. Howard Teel of Wa-
bash visited their parents, Mr. and
Mrs. Lon Borton and Mr. and Mrs.
Strotter Doran Sunday.

Mrs. S. A. Guy spent last Tuesday
in Chicago attending the Century of
Progress Exposition.

Miss Beulah Busenburg spent the
week end with her mother, Mrs.
Marie Busenburg.

Mr. and Mrs. F. R. Burns left Sun-
day evening for Lake George where
they will spend a short vacation.

Mrs. Bernice Chandler and daugh-
ter of Mishawaka spent the past
week with Mrs. Amanda Busenburg.

Dr. and Mrs. T. J. Clutter and Mr.
and Mrs. Clayton Clutter are spend-
ing their vacation in northern Michi-
gan.

Mrs. R. A. Merley and son Gene of
Lafayette spent Saturday at the home
of her parents, Mr. and Mrs. H. L.
Hire.

Mr. and Mrs. Clarence Lemler and
daughter Regina of Fort Wayne
spent Thursday with Mr. and Mrs. F.
D. Lemler and daughter Phylliss.

Miss Mildred Anderson arrived Sat-
urday evening from Tomah Wisconsin
to spend a short vacation with
her parents, Dr. and Mrs. E. D. An-
derson.

Mr. and Mrs. Albert Plew and Mr.
and Mrs. Otto Mock and son Gene of
North Webster spent a few days last
week in Madison where they attend-
ed the Plew reunion.

Century Pens and Pencils for
school. \$1.00 to \$7.50, Joseph Baker,
Jeweler.

children of Lakewood, N. Y. arrived
at the home of Mr. and Mrs. Carlin
Myers last Sunday. Mr. Myers re-
turned same day while Mrs. Myers
and children will stay for some time.

Among those that spent Sunday at
the H. L. Hire home were Mr. and
Mrs. W. H. English of Fort Wayne
and George Jefferies of Mentone, Mr.
and Mrs. J. Scheidy and daughter
Lily of Lafayette and Harvey Hire of
Indianapolis.

Poulson Home at Beaver Dam Destroyed By Fire

The home of Harve Poulson at
Beaver Dam which also housed a
grocery store and barber shop was
completely destroyed by fire which
started shortly before 9 o'clock Sun-
day evening, August 6. Defective
wiring caused the fire. The loss is
estimated at \$3500. The Poulson
home which is better known as the
former home of John Engle is situat-
ed just a short distance from the
Beaver Dam School House. The mem-
bers of the Poulson family were gone
when the fire started. Neighbors did
not discover the blaze until the house
was a mass of flames. When the
neighbors arrived they were able to
save but three chairs from the burn-
ing Poulson home so intense was the
fire. Mr. Poulson plans to rebuild
his home.

BIRTHS

Mr. and Mrs. Bert Craft are the
parents of a daughter born Tuesday,
August 15, at the McDonald hospital.
The new arrival was named Sandra
Jane. Mrs. Craft was formerly Miss
Miriam Johns.

Doesn't Waste His Own

Very often you think a young fellow
is throwing away his money. You
might be mistaken. It is generally his
father's money.—Florida Times-Union.

Original "Blue Streak," or Sharp-Shinned Hawk

The origin of the expression "going a blue streak" is hazy but for a practical demonstration of what the term implies, the sharp-shinned hawk, or little blue darter, can give it. When he spies a broiler, quail or other careless feathered luncheon wandering far from shelter, this real chicken hawk can give a good imitation of Capt. Malcolm Campbell's Blue Bird but with a square meal in view, not for the purpose of setting world speed records.

One of the speediest hawks, the sharp-shinned, is also regarded by authorities as one of the most destructive to poultry, game and other beneficial birds. Although measuring but 10 to 12 inches in length, with a wing spread of about 22 inches, this little blue darter, says a publication of the United States Department of Agriculture, "is very partial to chickens and often almost exterminates early broods which are allowed to run at large. No birds, from the size of doves, robins and flickers to the smallest warblers and titmice, are safe from its attacks."

The More Game Birds foundation, an organization of nationally known business men and sportsmen, puts the sharp-shinned hawk as the leading wild life gangster. In its booklet, "More Game Birds by Controlling Their Natural Enemies," the foundation declares: "The sharp-shinned hawk is second in its destructive habits only to the Cooper's hawk and goes hawk as a game bird enemy and should be controlled at all times."

Know-Nothing Party Was Result of Immigration

The Irish famine and the revolutionary movements in Europe in 1848 and 1849 were the causes of a great migration to the United States. The Know Nothing party, which arose shortly thereafter, was in large part a reaction or protest against this increase in the foreign born population.

It was a secret political party or society, variously known as "The Sons of '76," "The Supreme Order of the Star Spangled Banner" and the American party. Because of the secrecy and the answer which members are said to have made to all inquiries concerning its activities—"I don't know"—it came to be known popularly as the Know Nothing party.

It advocated a policy of "America for the Americans" and favored a 21-year residence qualification for citizenship. From 1834 to 1857, partly due to the dissolution of the Whig party, it carried elections in seven or eight states and figured in the national campaign of 1856. By 1860, however, it had entirely disappeared.

When Hair Turns Gray

Many authorities believe that hair turns gray because the hair follicles where it is born no longer furnish the oxidizing agent that oxidizes the pigment. Others think that the color is

still there, but is hidden by air bubbles which form to take place of the shrinking hair cells. These give the hair its gray appearance, and when enough of them have formed they make it white. Although opinion on what turns hair gray is divided, and nobody has been able to satisfactorily explain how hair can suddenly turn white over night from terror or grief we know that the first gray hairs to appear in a scalp are bigger and stronger than the rest. We also know that in extreme old age the hair grows thinner and finally becomes fine and short like those on the scalp of a baby.

When Balloons Carried Mail

During the siege of Paris in 1870, 55 balloons carrying mail rose from the beleaguered city, and 47 of them landed safely beyond the encircling German lines. It has been estimated that 100,000 letters were sent out of the capital in this way. The first balloon was the so-called Neptune. It left Paris, September 23, 1870, and carried 250 pounds of letters. The second was the Citta di Firenze, of Italian construction, with 300 pounds of mail, and the third was nicknamed the United States, "because it was composed of three small bags, tied together." The fifth balloon, unnamed, was brought down near the German lines, and both armies fought for its cargo, consisting of postcards, stamped at 10 centimes.

World's Largest Cross

Stolberg, a tiny city in the Hartz, with the Stolberg palace, is little known outside Germany, but it possesses two distinctions. One finds here the largest collection of funeral sermons in the world, comprising 20,000 volumes of eulogies delivered in the Seventeenth and Eighteenth centuries, and on the outskirts of the city stands the world's largest cross, on the "Josephshöhe," at an elevation of 1,886 feet, erected more than a hundred years ago in the form of an observation tower 124½ feet high.

The "Tow Bug"

The "tow bug" is also known as the cigarette beetle, and is found in stored tobacco and other stored products, such as the tow in overstuffed furniture. The larva is a white, fleshy, tiny grub. The adult is one-sixteenth of an inch long, brownish, its head bent back under its thorax. The larvae feed here and there through the food substance, and the beetles make small round holes in emerging. There are several generations annually under suitable conditions.

When "Cowboys" Were Robbers

During the Revolutionary war the term "cowboy" was applied to robbers, usually of cattle and sometimes of other property, who infested the roads east of the Hudson river between the British and American lines. They professed to be Tories. A similar band, professing to be Whigs, called "skimmers," plundered wayfarers in the same period and in the same places.

ONE BAD EGG

Costs you more in profits than you'd pay for the laying hen's yearly supply of Nopco XX. And Nopco XX, because it puts into your feeds a standard, dependable amount of Vitamin D, brings you more eggs, better interior quality and harder shells. The Vitamin D content of ordinary straight cod-liver oils varies—it's standardized in Nopco XX. The Association's mill will mix it in your feeds.

WORLD WAR BY * * YARNS LIEUT. FRANK E. HAGAN

"And a Little Child—"

"The British have no sense of humor? Nonsense!" says a former member of the American Intelligence service. "Listen to this one!"

A veteran company, recuperating from the terrific effects of a long siege of hard fighting, had a new captain assigned to replace a popular officer who had been killed.

Imagine the disgust of the seasoned warriors when they saw their new commander—a headless schoolboy, quite immaculate, fresh from a "ninety-day" school of military instruction.

When the infant reviewed his command for the first time, giving them some orders in his piping voice, a deep bass rumbled out from the rear rank—"And a little child shall lead them!"

The captain blushed, he stuttered; he made a very poor exhibition. The veterans were overjoyed with their victory until next morning. It was then they found on the bulletin board the following notice:

"All company will report at 7 a. m. with complete equipment for a twenty-mile hike. And a little child shall lead them—on a d. d. good horse."

(Copyright, 1933, Western Newspaper Union)

"TENTED CITY" AT STATE FAIR SEPT. 2-8, 1933

The Indiana Board of Agriculture recognizes the need for a convenient camp site for farmers and their families who desire to take an outing and spend two or three days or a week at the Indiana State Fair. With this in mind arrangements have been made for a very comfortable and economic camp site or "tented city" just outside the grounds, at the east entrance. Parties coming from a distance can secure accommodations here under ideal camp conditions at a very nominal cost. Good fresh water, well lighted grounds, clean cots and bedding, tents that will not leak, and police protection are all provided.

Salmon Hatch in Fresh Water

The salmon hatches in fresh water, in clear lakes and cold streams of the Pacific northwest. As soon as sufficient growth is reached, the small salmon make their way downstream to the ocean. There they live until the spawning season, when they return to the stream or lake of their birth. It is on the return trip to fresh water that the salmon are caught and packed into tins. For at this time they are at their best—fat, healthy.

Blamed on Vitamin "A"
Lack of vitamin A is suspected as the cause of stomach ulcers.

THE PRICE OF BUSINESS SPEED

Banking Institute Speaker Says That Bank Failures Followed Business Failures

CHICAGO, Ill.—Many appear to think that failures occur only to banks, but the complete story of business shows that failures of American banks have followed the failure of business enterprises, and have not been a cause of those failures, Dr. Harold Stonier, National Educational Director of the American Bankers Association, declared in a recent address here before the American Institute of Banking.

"It is true that we have had more failures in our banks than in the banks of a number of other countries," he said. "It is also true that we have had more failures in drug stores, grocery stores, railroads, and in every other type of business enterprise. At the same time, it must be said that we still have left after all our failures, more drug stores, more grocery stores, more railroads, and more banks than any other country."

People do not realize, he said, that we have in excess of 108 banks which have been in existence over a century and we have more than 2,000 banks which have been in existence over 50 years.

"In other words, we have more banks over 100 years of age than any other country—we have more banks over 50 years of age than any country in the world," he declared. "The American banking system has not fallen down—it is not in danger of decay. Such failures as it has experienced are due to the price we pay for too rapid development of business enterprises, but that is the American spirit."

1932 DECREASES U. S. WEDDINGS, DIVORCES

Census Officials Cite Job Scarcity as Reason.

Washington.—Cupid has been hit by the depression, but his bitterest enemy, divorce, has suffered even more.

The bureau of the census has disclosed that the third year of the depression, 1932, saw a sharp decrease both in marriages and divorces.

The bureau gave no reasons, but officials express their belief that unemployment, reduced earning power, and lack of confidence in the immediate future were responsible.

Marriages in 1932 totaled 981,759, the bureau reported, compared with 1,000,791 in 1931, a decrease of 7.5 per cent. The decline began in 1930 with a drop of 5.9 per cent.

Divorces were 160,720 in 1932, compared with 183,644 in the previous year; the decrease was 12.7 per cent, while the 1930-31 decline was 4.1 per cent.

There were in 1932, the bureau stated, 7.9 marriages for every 1,000 persons in the country's total population of 124,822,000, as compared with 8.5 in 1931 when the population was 121,070,000. At the same time, there were 1.28 divorces for every 1,000 of population in 1932, as against 1.48 in 1931.

Viewing Figures by States.

In arriving at the national percentage decrease in the number of weddings, the bureau found the declines in various states ranging from a drop of 43.5 per cent in Iowa to only 0.8 per cent in Texas.

In ten states the bureau found increases in the number of marriages. These gains were attributed inferentially by the statistical census officials to eluding stringent marriage laws by skipping across a state to the nearest person in a more liberal neighboring state.

"All ten states," the bureau said, "adjoin those in which recent changes made in the marriage laws require from three to five days to elapse between the application for a marriage license and the issuance of the same."

The ten states with the rate of their increased wedding activity were Missouri, 3.5 per cent; South Dakota, 2.7 per cent; Nebraska, 0.6 per cent; West Virginia, 1.7 per cent; Mississippi, 5.1 per cent; Arkansas, 5.2 per cent; Oklahoma, less than one-tenth of 1 per cent; New Mexico, 6 per cent; Arizona, 1 per cent, and Utah one-half of 1 per cent.

For every divorce in this country during 1932, the bureau disclosed, there were 6.1 marriages. This represented a distinct gain for the marriages. Last year there were 5.8 weddings for every divorce.

Nevada Leads List.

Nevada, with its Reno, continued to lead the list of states in the ratio of divorces to marriages. Nevada reported nearly as many endings as be-

ginings of married life. There were only 1.8 weddings for every divorce in the state. New York and the District of Columbia, on the other hand, reported 21.4 and 35.3 weddings for every divorce during the year.

In Illinois during the year, the national slump in both marriages and divorces was reflected, although the decline in divorces was by far the heavier. Weddings in the state numbered 65,088, the bureau revealed, for a decrease of 9.1 per cent. Divorces totaled 11,745, declining by 15.5 per cent from the preceding year. There were 5.5 marriages for every divorce, and 8.4 weddings for every 1,000 of population in the state, as compared with 1.51 divorces.

Wisconsin reported 14,035 marriages during the year, for a decrease of 5.1 per cent from 1931. Divorces totaled 2,358 in the state, declining by 10.9 per cent. There were 6 marriages for every divorce and 4.7 weddings and 0.79 divorces for every 1,000 of population.

In Indiana, marriages numbered 36,105, dropping by 5.9 per cent, while divorces totaled 6,322 for a decrease of 13.1 per cent. For every divorce there were 5.7 weddings, while for every 1,000 inhabitants of the state there were 11 marriage and 1.93 divorces.

Woman Battles 20 Hours and Lands 400-Pound Fish

New York.—Mrs. Oliver C. Grinnell of New York and Bay Shore, with the help of Wally Baker, captain of her boat, the Oligrin, landed on rod and reel in the gray dawn off Fire Island, a 400-pound broadtail swordfish, after a battle lasting 20 hours. In making this catch Mrs. Grinnell, who is the holder of the women's Atlantic broad bill swordfish record, experienced her greatest offshore adventure and at the same time inaugurated the 1933 North Atlantic big-game fishing season.

Nine-Year-Old Writes and Reads 5 Languages

Dalhart, Tex.—Bobby Ryan, nine years old, can speak and read five languages. He was born of American parents in Manila, Philippine Islands, where he had a Chinese nurse. He acquired a Japanese nurse when his family moved to Yokohama and Tokyo. He learned the French and Spanish languages from books and conversation.

Cougar Won First Prize

Eugene, Ore.—A baby cougar won for its owner first prize in the annual pet show for local children.

Thackeray Home to Go

Thackeray house, in London, for many years the home of William Makepeace Thackeray, is to be razed to make room for a new building. Several of the rooms in this dignified Georgian house have remained almost as when the Victorian novelist entertained a distinguished literary and artistic coterie during his occupancy.

Explorer Tells of Three

Hours Spent in Volcano

To be lowered into the active crater of Stromboli, clad in an asbestos suit and wearing a helmet strong enough to resist falling stones, with a breathing apparatus to save him from asphyxiation, was the exciting experience of an explorer.

The rope with which he was lowered into the depths of the crater had to be asbestos-covered lest it should shrivel up like tow and let him fall into the inferno below. Yet he remained down for nearly three hours, actually leaving his rope and making observations on the crater's floor.

On returning from his hazardous expedition, he said: "It was like being in hell to watch the fury of the volcano. The boiling lava was reminiscent of the sea in a storm. Every now and then great waves rose and, exploding, hurled over the rim of the crater masses of burning lava, hundreds of big stones, and clouds of ash. On the floor were pits, ten to thirty feet deep, lava seething in them like boiling porridge. As the bubbles burst there was a crash, and stones and other incandescent material was flung aloft. The walls around me assumed black, red and yellow tints, while from great cracks poured sulphur vapor."—Tilt-Bits Magazine.

Mysteries of Human Ear Still Awaiting Solution

The mechanism of the human ear has been known during long ages, but the manner in which it conveys definite information to the brain is another matter. The world is still far from a final pronouncement, however learnedly one may speak of soundwaves striking upon the drum of the ear and establishing a vibration which is communicated to the brain by a row of white threads attached to a series of wonderfully articulated bones. That the threads, like the aerials which catch the flutterings of the ether bearing sounds across the oceans, and give them rebirth exactly as they were born thousands of miles away, to the last squeak of the clarinet or chirp of the piccolo; translate to human brains the meaning conveyed by the air vibrations which lap against the ear-drum or tympanum does not greatly help.

A writer says: "We call the threads nerves, but how the tympanum adapts itself by contraction and relaxation to the different pitch of sound without our will intervening we have no idea. We know only that it does."

When Windows Were Taxed

Bricked-in windows in many of the old houses in England are a reminder of the time when all windows were taxed. The tax was introduced in the reign of William III in order to defray the cost of the recolonization of silver. Many people objected to paying the tax, and it was to lessen the amount which could be demanded that they caused some of their windows to be bricked in. The tax remained in existence until 1851, when it was replaced by the inhabited house duty.

OLDFIELD OUT FOR NEW RECORD

See Him at the Indiana State Fair September 2.

Barney Oldfield, famous maestro of the speedways, has signed a contract with the Indiana state fair officials to attempt a new world's tractor speed record.

The first tractor race ever held in Indiana will be run at the state fair track Sept. 2. Barney Oldfield will drive the air-tired Allis-Chalmers tractor which holds the present A. A. record of 35.405 miles per hour.

Just 18 years ago Barney Oldfield last thrilled the crowds at Indianapolis state fair in a match race with Ralph DePalma. At the annual Indianapolis Speedway Race. He is always a colorful figure, with his genial disposition and cigar tilted at the Oldfield angle. His name comes to mind whenever racing is mentioned.

The "Iron Horse" which he will drive is bringing in a new era in farm machinery. Its records, greater highway speeds, and usefulness as an all-purpose farm machine are made possible by the new Firestone low pressure tractor tires which enables it to pull three 14 inch bottom plows at the amazing speed of five miles per hour. The tires require only 15 pounds air pressure, allow large surface contact, give plenty of traction and years of service, reduce fuel and maintenance costs, and add riding comfort.

Two other tractors piloted by local drivers will compete against Oldfield.

Meaning of Name "Janice"

The name "Janice" is a form of the Hebrew name Jane, which means "God's Grace."

LUMBER MILLS BUSY AS PRICES MOUNT

Payrolls Increase and Production Shows Gain.

New Orleans.—Long faces in the southern pine lumber industry, which ranks second to King Cotton as the big shot of Dixie pay rolls, are brightening.

Employment has increased, prices have gone up, and the piles of lumber weathering in the mill yards have diminished.

After the stock market crash the industry, under urgings from the White House not to create unemployment by reducing manufacturing output, and assured that prosperity was just around the corner, carried on.

During 1931 the price of lumber, under the weight of piled up, unsold, unwanted lumber in mill yards, slumped rapidly. Operators of red their wares at lower and lower prices in an effort to move the product and raise cash to meet pay rolls, bank obligations and taxes.

In January, 1933, the Southern Pine association reported that for one week 17,971,000 feet of lumber were manufactured but only 17,985,000 feet shipped. Unfilled orders totaled only 16,013,000 feet.

Then the nation went off the gold standard and by May 27 the file of unfilled orders had risen to 43,056,000 feet, a clear gain of 26,043,000 feet, or almost twice the shipments of the first week of the year.

Shipments for the year to date, 512,922,000 feet, have surpassed production by 71,000,000 feet, including piled-up stocks by that amount.

The stock clearing, combined with the increase in unfilled orders, shows a total gain in business of over 100,000,000 feet.

During the week of May 27, the mills reported they shipped 38,541,000 feet, or more than the totals of the first two weeks of the year. During that same week, production was 26,863,000 feet, an increase which brought more employment and bigger pay rolls to be spent with the merchants.

Dramatic Fights to Save Wild Fowl Are Reported

Washington.—Dramatic stories of men battling frigid blasts and treacherous terrain to save thousands of waterfowl from starvation last winter are told in a report of the biological survey.

Fighting through icy weather, 20 to 40 degrees below zero, United States Game Protector Kenneth F. Roehen and helpers on foot and sled carried corn and wheat donated by farmers and sportsmen to selected feeding stations in southern Montana during a severe February freeze. There the grain was gobbled by thousands of half-famished wild ducks, most of them mallards.

Earlier in the winter Reservation Protector Hugh M. Worcester at the

Upper Klamath Wild Life refuge, Oregon, led a score of volunteers on a two-day trip which resulted in the saving of 1,200 ice-bound ducks and 100 horned and eared grebes. The birds were transported to pens at refuge headquarters for recovery.

Drilling for "Dry Ice"

Booms Fields in Texas

Midland, Tex.—A new type of drilling activity is booming in this section of Texas. The search now is for carbon dioxide gas wells which produce "dry ice."

Derricks are being erected in Mora, Harding, and Torrance counties. The northeastern part of the state already has several "dry ice" wells, which are proving to be better commercial assets than oil wells.

White Men Forb'dden to Fish on Reservation

Pocatello, Idaho.—There was weeping and wailing among sportsmen here when the Indian council at the Fort Hall Indian reservation ruled that white men could not fish there under any circumstances. As the reservation includes choice fishing spots, white sportsmen are pleading with Indians for a reversal of the order.

Antelope Has 59-Inch Horns

Cambridge, Mass.—Horns 59 inches long—within 5 inches of the world record—grace a mounted giant sable antelope which has been added to the rare animal collection at the Harvard museum of comparative zoology. The antelope was bagged by Prentiss Gray, of New York, in Portuguese Angola and presented by him.

"I Love Hubby" Club Cheers Up Spouses

Puente, Calif.—Long suffering husbands here were walking primrose paths following formation of "I Love My Husband club."

The club, sponsored by the La Puente Valley Journal, was established for the promotion of a more humane treatment of husbands.

The club never meets, and has no dues. The sole requirement for members is the practice of devotion to husbands.

Husbands are behind the club. "It's a great idea," said one husband. "We have a Mother's day and a Father's day, but the poor hard working husbands appear to be forgotten altogether."

Romans Had One-Way Roads

One-way traffic was used by the Romans in Pompeii. The traffic problem was bad then because Caesar's chariots jammed the Applan Way. In 1868 a semaphore arm signal was erected at the junction of Bridge street and New Palace Yard, London, and was illuminated by gas at night. All this was disclosed at a meeting of the Institute of Transport in London to prove that present traffic problems are not new.

"Black Leaf 40"

Kills Lice

"Black Leaf 40" which has been used successfully over 20 years as a spray to kill insects on gardens, flower-

ers and orchards has been found equally effective in killing lice on poultry.

Statue to Explorer Cook

A marble statue, 12 feet high, to Capt. James Cook the explorer, has been unveiled in Christchurch, New Zealand.

Too Much Concentration

Elementary psychology points to the fact that too much concentration on a given subject defeats its purpose. Every one who has had the experience of a good night's sleep upon a difficult problem knows how easily the work goes on when resumed. Often the solution which evaded one simply pops into the mind then. Exchange.

A Frankenstein

A Frankenstein is a person destroyed by his own works. The term is often erroneously applied to a monster. In Mary W. Shelley's "Frankenstein, or the Modern Prometheus," published in 1818, Victor Frankenstein is a young Swiss student who, while attending a German university, constructs a humanlike monster of materials obtained from cemeteries and dissecting rooms, and endues it with life by means of galvanism. The soulless monster, shunned by every living thing, is made frantic by unsatisfied human cravings, and commits atrocious crimes, finally inflicting a horrible retribution upon the man who usurped the prerogative of the Creator. The author of the book, who was the second wife of Percy Bysshe Shelley, gave the monster no name in her narrative, a fact which leads many into the error of referring to it as Frankenstein.

Court-Martial System

The court-martial system of trial, under which members of the Army, Navy and Marine corps are tried by officers of the service in which the offense has been committed, dates back to the time of Charles I of England. These courts, which also try violators of martial law, are referred to in the first mutiny act of William and Mary. In the American court-martial, a closer parallel to civil trial is attained than in the British system. The prisoner has the right to have an attorney and to present evidence and the court is always composed of officers of the same rank or higher than the accused. The drumhead court-martial, in which a prisoner was tried on the field, during the height of passion and with little or no opportunity to defend himself, has passed out and such trials are no longer sanctioned in the United States.

Premier Wood Destroyer

The termite is the world's premier wood destroyer. The damage it does to wooden buildings in the United States alone is estimated at around \$40,000,000 a year. No other insect or animal approaches it in damage to wooden property. Almost every sort of wood is attacked by it. Some woods are more or less resistant, but the only two termite-proof woods known are the teak of India and the poisonous manzanilla of the Virgin islands. The annual damage to wooden buildings in termite-infested areas is estimated at 1 per cent every year.

Poisons Easily Compounded

Many things can be changed from a harmless substance to a poison by merely changing the arrangement of the atoms therein.

Indians Made Maple Syrup

When the white man came to America, says American Foresters, he found Indians making sugar from the sap of the sugar maple tree. The Indians had developed every essential detail of the present process of producing maple syrup.

WEDDING—SHOWER

On Monday night August 14 about sixty friends and neighbors gathered at the home of Mr. and Mrs. Alva Shunk and gave their son Wayne and wife an old fashioned belling and Kitchen shower. Mrs. Shunk was formerly Miss Helen Griffith. One of the attractions of the evening was a moonlight ride to town with the bride and groom in a trailer being equipped with dinner bells, cow bells and sleigh bells. They received many beautiful and useful presents. All departed at a late hour wishing the newly weds many happy years together.

Process of Decalcomania

The process of decalcomania consists of transferring pictures to marble, porcelain, glass, wood, and the like, by gumming a film bearing a colored print to the object and then removing the paper backing of the film by aid of warm water, the colored image remaining fixed. The practice, or process, was known in Holland in 1700, and the revival in America seems to be placed somewhere between the years 1922 and 1926.

Mature Persons Learn Better

Mature persons up to fifty years of age learn most things better than pupils of high school age, says a director of vocational education at the University of California.

To Be Presented

By Mrs. Stone

"Just Folks in Books"

The members of Psi Iota Xi will have the pleasure of being hostesses at a tea to be held Friday, August 25 at 2:00 P. M. in the school cafeteria. Helen Seegar Stone will entertain with a talk on "Just Folks in Books." The characters in "Just Folks" are drawn from the books: "Obscure Destinies", "State Fair", "The Fountain", and "Human Being."

Mrs. Stone a member of the Kokomo chapter of Psi Iota Xi, has made a hobby of books and has given reviews and lectures before women's clubs, parent teachers' meetings and sororities of Fort Wayne, Logansport, Noblesville, Frankfort, Kokomo and many other cities. The local members of the sorority who have heard Mrs. Stone are enthusiastic over the unusually interesting and individual manner in which she presents her subjects.

Though the object of this program is not primarily to make money, an admission charge of 35c is necessary to help defray expenses. Any amount received in excess of expenses will go toward the charitable enterprises for which the organization is noted.

We invite you to come.

Metal Plating Secrets of Egypt Are Revealed

Some of the secrets of metal plating as practiced in Egypt more than 4,000 years ago have been revealed by study of a small copper kettle in the Metropolitan Museum of Art, says "Popular Mechanics Magazine." The kettle and an accompanying basin, made about 2500 B. C., are regarded by a professor of Columbia university, as the earliest examples of chemically applied metal plating.

While cleaning the kettle, smooth patches like silver were found among rougher areas of a typical old copper color. Tests established that the base metal of both kettle and basin was copper and that the silvery plating was a thin coat of metallic antimony, with a small amount of iron as impurity.

The principle involved in application is actually electrolytic, but may have been accidentally discovered and applied. The professor says there is reason to believe that pickling baths containing vinegar and salt were used by the ancients for cleaning bronzes after discoloration from heating, and the addition of antimony and contact with iron may have been accidental at first, but was repeated intentionally when the results were observed.

That antimony was available in ancient Egypt is proved by the antimony sulphide found in the eyebrow paint used by Egyptian women. Two methods of application of antimony plating have been found each requiring only raw materials known to have been available in Egypt.

Giant's Causeway Result of an Upheaval of Basalt

The formation of the Giant's causeway according to geologists, is the result of an upheaval of basalt along the northern coast of Ireland which occurred during the Tertiary period. This has left a weird and unusual promontory of broken pillars in a series of cliffs which project into the North channel near Bengore Head, about eight miles from Portrush.

When the volcanoes of this district were in activity they sent out sheets of lava over nearly the whole country of Antrim and the adjoining parts of Londonderry and Tyrone. Their molten masses were poured out over the chalk that lies deep below and ages of erosion have left the cold and rigid columns seen today.

Within an area of several hundred square yards there are some 40,000 of these pillar-shaped rocks and they are cut as if by mathematical calculation. They range in diameter from 15 to 30 inches, most of them being six-sided, although some have five, seven, eight and even nine regularly formed sides. Some are 20 feet in height.

The Giant's causeway received its name from a legend that this group of basaltic rocks was once part of a bridge or causeway over which giants passed between Ireland and Scotland.

Parents Blamed

Fear is at the bottom of many cases of difficult upbringing of children.

GIRL SCOUT NEWS

"Hurrah! we're off! Where? Why to that Fort Wayne Girl Scout Camp at Dewart Lake. Come on girls, how about singing 'Hail, Hail, the Gang's all here?'" Lets see! This is Tuesday evening, isn't it? Wheel we get to stay until Thursday evening how about it? Are you kids going to take Archery, Swimming or Nature Classes? Well, I wish I could take them all. Hey, "Chid", do you know where I put my blanket roll? Thanks. Say Leshlie, what are you taking in your nose-bag lunch? Come on kids, let's sing our Camp Logan Song! Hey! Betty, I'll trade suckers with you. We must thank George Clark for 'em. What did you say Ruth? Oh, you want to sing. "Oh, won't you sit down"? It's OK with me start it, Peanie. Hey, you kids are making too much noise, Oh, Avis, start a yell for the Girl Scouts."

"Girls! Here's Camp Logan! Pile out! Bobbie is this your package? Here, Serita, give me a lift, Oh, Rosie what tent am I in? This one? Fine! Come on you girls that belong in this tent with me. How much time have we to unpack and clean up our tents?"

"Girls, there's the call for supper and am I ready for it! Get your nose bag quick! Are you kids almost through eating? Well, then let's sing. Say, isn't this lodge a nice place, though? It's fun to eat here."

"Isn't the camp-fire pretty? Some more songs? Sure I rather like to hear those legends they told about the stars. I think the stars make an interesting subject. Look! the camp-fire is dying down. What! Time to turn in! Is it that late already? Sh-h-h! Come to our tent for a pajama parade."

"Well, I think that parade was a success. Sh-h-h! here they come and we are supposed to be in bed. We're asleep, Rosie, so you needn't come in here. What! you don't believe us? What time do we get up in the morning? 6:45? OK. Goodnight."

"Hey are you awake? What time is it? four o'clock? The sun isn't up yet, come on, lets go over and wake the kids up!"

There, folks, is a brief sketch of the first night and early morning in camp.

Before breakfast we held our color ceremony and then we all trooped into the lodge hungry as wolves. After breakfast we were employed with Kamp Kapers and each tent was assigned tasks. Then our tents were inspected. After inspection we gathered together and planned stunts for camp-fire that night we were divided into two groups; each group was to give a program. Then we left for classes. We had the privilege of choosing Archery, swimming or na-

ture. Mrs. Annabel Gasaway from Warsaw was the swimming instructor. Those who already knew how to swim were taught how to perfect their strokes and those who couldn't swim were taught how to float and see under water.

In Archery, Rosalind Mentzer taught us the different parts of the bow and arrow and how to shoot at the target. Some of us were fairly successful.

Millie Clark had charge of the Nature Classes. The girls were taught the different trees, flowers, plants, and birds. The girls were also shown how bracelets and other articles could be made out of bass-wood.

The following girls swam fifty yards thus passing their swimming for their first class test: Betty Lyon, Louise Paulus, Bobbie Mollenhour, Mary Mollenhour, Mary Ellen Myers and Pauline Swick.

After the general swim, we were called to dinner where Mrs. Burns, Mrs. Myers, Mrs. Mollenhour and Mrs. Underhill provided us with a bountiful meal. We had as our guest that day, Miss Myrtle Foxford, local director of Girl Scouts in Fort Wayne.

After dinner came the rest hour followed by classes and another general swim. After retreat at five o'clock came the call for supper. At Sundown we put to sea in six boats. The rhythm of the oars was not quite in time with our songs, but we almost reached the island before time to turn back to our campfire.

One group then portrayed the Girl Scout Laws by shadow pictures using a sheet for the screen and the camp-fire for a light. The other group presented "The Sleeping Beauty". It was very comical to see the Prince come galloping up on his steed, waking the beautiful Princess and carrying her away. The shifting of the scenes and the passing of the years caused much merriment.

We then acted out advertisements. Our counselors and cooks presented a very good tire advertisement by arranging themselves into an old "fliver". One person represented the engine and crank, another the driver and the others were tires. The only trouble was that they needed Goodrich Tires, because the tires were continually blowing out causing the drive much annoyance.

There were more star legends; then Goodnight Circle and Taps.

The mosquitoes, the snappy air and anticipation of fun ahead awakened us early the next morning. The first days program was followed except that in the afternoon we went for a hike and explored the huge woods of Logan. We saw a humming birds nest and the Pioneer Camp.

After one last dip in the Lake, we ate supper, loaded bed-rolls into the waiting bus and sang farewell to the

lovely woods of Logan and the too friendly mosquitoes.

Our first experience in a real Girl Scout Camp has made us appreciate more fully the meaning of the Girl Scout Laws and the fun we had will always be a pleasant memory.

Girl Scout Scribe.

*** Girl Scouts from Mentone who camped at Dewart Lake last week were: Mary Ellen Myers, Ruth Rush, Mary Rush, Lena Rush, Pauline Swick, Lova Bush, Evelyn Smith, Willodeane Jankee, Charlene Latham, Mary Mollenhour, Lola Mollenhour, Mary Jane Busenburgh, Serita Kring, Georgia Jones, Avis Underhill, Jean Burns, Alice Ellsworth, Betty Ellsworth, Eloise Kesler, Marjorie Long, Frances Tucker, Jeanette Blue, Marcella Leininger, Louise Paulus, Betty Lyon.

When Education of Deaf Started

The first attempt to teach a deaf-mute recorded in the United States was Philip Nelson's in Rowley, Mass., 1679. From 1773 to 1776 there was a deaf boy in John Harrower's school, Fredericksburg, Va., but not until the early Nineteenth century was concerted action taken to educate deaf children. Francis Green of Boston whose deaf son was sent to Edinburg to be educated at Thomas Braidwood institution became much interested in the problem. With some ministers, he attempted a census of Massachusetts 1841, when 75 deaf was found. They then estimated 500 deaf in the United States and urged the creation of a special school.

Indian Mounds

The Indian mounds found through much of the Mississippi region are believed by many to be caches of Indian treasures. This belief, Smithsonian archeologists point out, is entirely without foundation. Many mounds were used for burial of the dead. Excavation often reveals cherished personal objects interred with the bones of prominent Indians. But such objects have no material value and are of interest only as they throw light on the pre-Columbian culture pattern.

The First Anesthetic

The first anesthetic was used only about 90 years ago; the germ theory of disease was proved only about 70 years ago; antiseptic surgery was founded only about sixty years ago; the first appendix operation was performed only about 50 years ago; the X-ray is only forty years old. At the beginning of the century cholera, smallpox, diphtheria, yellow fever, malaria and other diseases were scourges which swept the world intermittently, destroying millions of lives.

Still Good Fighters

French history records several instances of women fighting duels both with men and with members of their own sex—with pistols and with swords.
