Stop and Go Driving Costly to Motorist

The stop-and-go of modern urban traffic driving is a costly matter to the motorist, according to studies made by the engineering department of the Chicago Motor Club.

A preliminary report indicates, for instance, that when a motorist drives 25 miles per hour and is forced to make five stops each mile, his gasoline consumption increases about 34 per cent. At 30 miles an hour increased consumption is about 40 per cent and at 45 miles per hour increase is about 52 per cent.

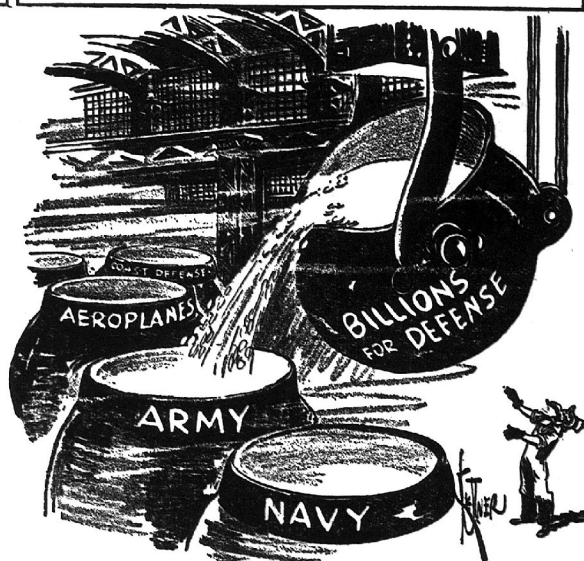

Then there's the matter of tire wear. It has been calculated by engineers at Iowa State college that the making of one stop every 10 miles increases tire wear up to 40 per cent. Calculating the cost of tires at \$15.00 each, every stop costs the motorist about two cents.

The club's engineers point out that motorways, which would prove highly economical to every motorist, and the total of the economies effected would soon pay the cost of the proposed transport system.

UNDERGOES TONSILLECTOMY

Clayton Holloway submitted to the removal of his tonsils Monday morning, August 5, at the McDonald hospital.

Mrs. Elizabeth Clark Succumbs Tuesday

Mrs. Elizabeth Clark, aged 91, expired Tuesday evening, July 30, at the home of her son, E. D. Clark, five miles southwest of Akron. She had been ill for the past five years suffering from complications. The deceased was born in Fulton county, near Mentone, and had resided in that vicinity her entire lifetime.

Surviving relatives are: three sons, E. D. Clark, of southwest of Akron; Emmett Clark, of near Palestine, and Charles Clark, of Silver Lake; 18 grandchildren; 27 great-grandchildren; two brothers, George Nellans, of Mentone, and John Nellans, of Tippecanoe; one sister, Mrs. Elvina Robinson, of Argos. One son, one daughter and her husband preceded Mrs. Clark in death.

Funeral rites were held Friday afternoon, August 2, at the Mentone Church of Christ, of which she was a member. Rev. J. F. Johns, of Indianapolis, officiated and interment was in the Mentone cemetery. The Johns funeral home, of Mentone, was in charge of services.

Byron Linn Uninjured As Car is Demolished

Byron Linn, Mentone garageman, miraculously escaped injury Sunday morning, July 28, about 6:30 o'clock, when a car approaching from the opposite direction sideswiped and completely demolished his DeSoto, on U. S. 30, 12 miles east of Fort Wayne.

According to reports, the other driver, who was starting to pass another car, did not see the Linn automobile because of a slight fog, until too late to avoid the collision. Mr. Linn's auto was wrecked beyond repair, while the other car received damage in the front. Skid marks made by the other car measured 143 feet, and were allegedly the result of excessive speed. The driver was arrested and fined in Fort Wayne for reckless driving.

Insurance covered damage done the Linn car.

Two Minute Sermon

By
Thomas Hastwell

THE BLIGHT OF SELF PITY: The book of Job is one of the most interesting books of the Old Testament. It contains the story told in an interesting way of Job's struggles to keep and to prove his faith in God. It is interesting to me because I think it epitomizes so aptly the struggle through which many men and women of today go in working out the problems of their relationship to God. One of the most applicable of the lessons found in Job comes when he turns his mind from his own afflictions and troubles and misfortunes to the needs of others. At that moment his view of life changes. Because of it he was blessed in every way with twice what he had before. How many of us instead of being thankful for the blessings we already have, fret and worry and complain for those things we do not have. If, like Job, we would forget self, cease feeling sorry for our selves, we, too, would be blessed. The things that we have, however small they now appear, would become a generous abundance.

Nothing that comes in this world is quite so completely satisfactory as a good rain just when needed.

Meeting Happy for World War Rivals

Once Shot at Each Other on Belgium Fields.

ST. JOHN, N. B.—Across the knee-deep muck of the shell-plowed field in Passchendaele ridge in Belgium, Private A. H. Morrison of the Twenty-sixth battalion, Canadian expeditionary force, and Private Henrik Biermann, 157th regiment of the German army, plugged away at each other with machine gun and rifle.

That was some 22 years ago. At the closing exercises in the tiny country school at Glen Falls, three miles from this city, Trustee-Secretary A. H. Morrison presented little golden-haired Olga Biermann with first prize for general proficiency in Grade I, while her father, Henrik Biermann, looked proudly on.

"This is one of the results of peace that dictator nations would destroy," was Biermann's comment.

Biermann is one of the colony of Danes who have cleared land in the Glen Falls district.

Morrison is a well-known musician in St. John, organist, pianist, and musical director of the Rotary club.

Both veterans got a real thrill out of the ceremony. The child, innocent of the deeper meaning of the incident, twinkled her deep blue eyes, smiled and accepted the prize. It was a story book.

Sees After Nine Years; Finds World Different

KANKAKEE, ILL.—Nine years of total blindness failed to make Mrs. Schuyler D. Burson of this city forget fashions and styles. Her first words upon walking down a city street after an operation restored her sight were "My Goodness, but skirts are short this year!"

The skirts and wedge shoes worn by women this season left her completely bewildered. Streamlined autos, developed since she became blind, looked "just like bugs" to her, she said. The operation was performed at Mennonite hospital in Bloomington early in April.

"My husband looks just as he did nine years ago—just a little fatter," she said. "I wouldn't know my chil-

dren, though. One of them is 19 years old now and the other is 15. How does it all seem? Why, it's just like going into a different world or being born all over again."

Grocery Bill Settled After Lapse of 20 Years

SEATTLE, WASH.—When Paul Ringseth closed his general store in the central Alaska mining town of Livengood 22 years ago, he marked off as "total loss" nearly \$25,000 in unpaid bills.

But he reckoned without Tony Zuber, a miner, who, with a partner, had a joint debt of \$600 on Ringseth's thick ledger.

After years of endeavor, Zuber finally tracked down his benefactor who now operates a Seattle grocery.

"Zuber called me up and said he wanted to pay his share of the joint bill," Ringseth disclosed. "He gave me \$320 and I gave him a 'paid in full' receipt. It was as simple as all that."

Wyoming Compromise

The ultimate in congenial compromise has everybody in Wyoming satisfied about the 1940 state road maps. 11 Towns Show Gain By Census Figures

Eleven of the 14 corporate towns in Kosciusko county showed gains in population, according to the 1940 census figures released by James O. O'Donnell, of Logansport, district census supervisor.

Burket dropped 25.6 per cent; North Webster went down 17.5 per cent and Atwood fell off 14.6 per cent. Of the towns in the county showing gains, Winona Lake led the list with a gain of 59.9 per cent. Etna Green was next with an increase of 13.7 per cent, with Warsaw, the county seat and largest town in the county, third in gain with a percentage of 12.4.

The population for the entire county was placed at 29,438, a gain of 7.3 per cent over the 1930 figure of 27,488.

The comparison of census figures for 1930 and 1940 follow:

Town	1930	1940
Atwood	315	270
Burket	425	216
Claypool	382	423
Etna Green	371	422
Leesburg	371	387
Mentone	704	728
Milford	869	891
North Webster	416	343
Piercetown	878	892
Sidney	182	192
Silver Lake	442	470
Syracuse	1,190	1,330
Warsaw	5,730	6,439
Winona Lake	454	726

Judging strictly from population figures there was no change in the standing of the first seven towns. They rank: Warsaw, Syracuse, Piercetown, Milford, Mentone, Winona Lake and Silver Lake. Milford's gain, however, pulled it up within one head of Piercetown, and the sensational rise of Winona Lake left it only two heads behind Mentone.

Mr. and Mrs. Brown Entertain Friends

Mr. and Mrs. Arthur Brown entertained friends with a beautiful lawn party, Friday evening in honor of Mr. and Mrs. Willis DeRyke, of Jackson, Illinois.

Those present were Mr. and Mrs. George McKrill, of Warsaw; Mr. and Mrs. Isaac Kesler, and son Miles, of near Mentone; Mr. and Mrs. Elmer Rathfon, Mr. and Mrs. Everett Rathfon and daughter, Mrs. Emma Pontius and the guests of honor, Mr. and Mrs. Willis DeRyke.

Refreshments were served on the lawn by the hostess.

Conservation Club Releases Pheasants

On Monday morning, July 29, the Mentone Conservation club released at 25 different places, 182 8-week-old pheasants, which had been reared by Jimmy Sarber and Dick Kern. The boys set a very good record by only losing 18 of the 200 birds.

Tuesday morning, July 30, the Mentone club drained one of their ponds, releasing 11,000 black bass minnows into the Tippecanoe River. These were the best bass minnows ever taken from a local pond and were the most uniform in size, ranging from 3 to 6 inches. The blue-gill pond is yet to be drained.

The club is sponsoring the sending of 3 boys to the Boys' Conservation Camp, which is being held at Beaver Dam Lake, August 4-5-6-7. Those attending are Eugene Sarber, Miles Igo and Carl Whetstone.

County Conservation Clubs Send 54 Boys to Camp.

Kosciusko County Conservation Clubs this year are sponsoring the enrolling of 2 boys from each of the 27 clubs in the county, to the outdoor camp on Beaver Dam Lake. A total of 54 boys, between the ages of 14 and 18 are attending the camp.

The camp, held at the Ivan Warren farm on the north bank, from August 4-7 inclusive, will be under the instruction of teachers in conservation work. Six classes will be held during the day.

This is the first school of this kind to be held in this state and the clubs are anxious to have the support of all of their members.

ORDINANCE NO. 111

The Board of Trustees of the In-
corporated Town of Mentone, Kosci-
usko County, Indiana, met in a
special session at the Town Hall on
July 29th, 1940, at 12:45 o'clock p.
m. The members present were: Mer-
vel A. Smith, Charles L. Manwaring
and Max Smith.

SECTION NO. 1

It was determined by said Board
of Trustees that the paved portion of
State Highway No. 25 that lies with-
in the Corporation limits, shall be
widened to the following specified
measurements. From west edge of
Corporation to State Highway No. 19
it shall be widened by 11 feet on the
north and 12 feet on the south. From
State Highway No. 19 to Interurban
tracks it shall be widened 13 feet on
the north and 12 feet on the south.
From Interurban tracks to east Cor-
poration limits, it shall be widened
16 feet on the north and 6 feet on
the south.

SECTION NO. 2

It was also determined by said
Board of Trustees that all property
owners shall construct a curb accord-
ing to specifications furnished by
city surveyor, along State Highway
No. 25 from West edge of Corporation
to East edge of Corporation.

This Ordinance shall be in full
force and effect from and after its
passage.

Passed by Board of Trustees, July
29, 1940.

Attest:
Raymond S. Bare,
Clerk-Treasurer.

**State Highways Show
13.6% Traffic Gain**

An increase of 13.6 percent in traf-
fic on the state highway system in
June as compared with the same
month in 1939 was reported today
by T. A. Dicus, chairman of the
State Highway Commission. The in-
crease was measured by automatic
traffic counters located along roads
in various parts of the state.

June was the fifth consecutive
month to show an increase over the
same months in 1939. January, 1940,
was the only month where traffic
movement was under the 1939 fig-
ures, registering a drop of 3.5 percent.
For the first six months of 1940,
traffic movement on the state high-
way system has averaged approxi-
mately seven percent over 1939.

There is an old saying that we never
miss the water till the well runs
dry. The same applies to soil conser-
vation, also. No one in this country
could be interested in soil conserva-
tion until the soil in many sections
became so depleted in fertility that
it could hardly earn the taxes.

It is perhaps frivolous to refer to
the several thousand persons killed
each year by being run down by
automobiles as a "bumper crop."

The British Isles have not been in-
vaded in 900 years.

For many years tomatoes were re-
garded as highly poisonous and were
called "love apples."

The British Isles must import a
minimum of 25,000 tons of food daily
in order to live.

Fertilizer Supplies Assured Despite War

In contrast to the acute shortage of fertilizer materials suffered at the beginning of the last European war, the present purchasing season for fertilizer finds the country prepared with adequate supplies for this year's crops.

"At the beginning of the last World War an immediate deficiency of nitrogen carriers occurred," said Charles J. Brand, Executive Secretary and Treasurer of The National Fertilizer Association. "There was an almost total absence of potash. Although there was plenty of phosphate rock, there was a shortage of sulphuric acid needed to make superphosphate.

"When war disrupted shipping from 1914 to 1918, nitrogen materials for fertilizer became scarce, as we were once bound to Chile for nitrates," said Mr. Brand. "Today, we not only have adequate shipping service from Chile, but our country is the third largest producer of synthetic nitrogen in the world, and the largest producer of ammonium sulphate. The shortage of sulphuric acid during the last war was due to the heavy requirements of munition manufacturers for processing their goods. Improved methods of munition makers no longer require sulphuric acid. This leaves an adequate supply for use in making superphosphate.

"In 1914 we were entirely dependent upon Germany for potash. Today, we produce at home over 60 per cent of the potash we use and have sufficient reserves to care for our entire needs. In addition to this, French, German, Palestinian, and Spanish potash are available."

Prices farmers pay for fertilizer are now lower than before the World War; prices they pay for all commodities average 22 per cent higher.

Knitting Smithy

Knitting dresses, socks, sweaters, and mittens for his family is the hobby of Thure Karlstrom, a blacksmith at the shipyards in Quincy, Mass. Considered one of the best male knitters in the country, Karlstrom not only supplies his own family with clothes, but also has augmented his income by knitting more than 40 women's suits for neighbors. His proudest accomplishment is the ski sweater he made for his daughter Norma in less than a day.

OVER 200 AUTO PARTS ARE MADE OF RUBBER

How much rubber would you guess goes into the building of an average automobile, exclusive of tires and tubes?

The chances are you would be quite a bit off, since from 50 to 80 pounds is required for the 1940 automobile, according to the Chicago Motor club.

There are more than 200 rubber parts in cars today, and on some deluxe models as high as 300. As recently as 1925, new cars had only an average of three pounds of rubber parts per car.

PAVEMENT "BLOWUPS" BOOST MAINTENANCE

Maintenance costs on the state highway system have been increased in recent weeks as a result of numerous pavement "blowups" caused by sudden changes in temperature, T. A. Dicus, chairman of the State Highway Commission, reported recently.

Usually the "blowups" occur when a light shower strikes the hot pavement, causing abnormal expansion of the pavement sections. It is estimated that each "blowup" costs from \$75 to \$100 for labor and materials for repairs. Thirteen of these blowups were reported in a five day period, with more than fifty occurring in July.

CHURCH OF CHRIST INSTALLS AIR CONDITIONING SYSTEM

Rev. Vincent has announced that people will not be able to use the hot weather as the excuse for not attending church, as the Mentone Church of Christ has made arrangements to air condition the entire building. This is something new in this community and has been planned for the comfort of the people who attend this church.

REPORT FOREST FIRES INCREASING IN STATE

Reports of fires sweeping through dry grass and woods have increased during the past month as a result of high temperatures and lack of rain. Virgil M. Simmons, commissioner of the Department of Conservation, said recently.

Many of these fires have started from lighted matches or burning tobacco, tossed into dry grass or vegetation by careless hikers and motorists.

The seizure, by Russia, of the three small Baltic nations, Estonia, Latvia and Lithuania, has caused Hitler some real concern. It is believed that this is the thing that has delayed Hitler's blitzkrieg against England. Hitler fears Russia more than he does England. He does not fear the military strength of Russia so much as he does Sovietism. He knows that if the war drags into the winter, the people of Germany, France, Poland and Czechoslovakia

may be faced with hunger. If they are, even Hitler may not be able to hold them in line. They may easily become converts to the Red philosophy. Stalin is dictator of the Reds and would perhaps extend his authority over all the Reds in Europe.

Mr. and Mrs. Roy Ailer, of Tiosa, visited Thursday evening with Mr. and Mrs. J. D. Long.

J. D. Long spent Thursday on his farm near Tiosa, Ind.

INTERESTING FACTS

According to figures released by the New York State Life Insurance and Labor Departments, the home is more dangerous than the highway. Last year motor vehicle accidents resulted in 2400 deaths in New York, while accidents in the homes resulting in death totaled 3,200.

The government mints at Philadelphia and Denver were recently put on a 24-hour basis and the San Francisco mint on a 16-hour basis. This has never happened before in the history of the United States Mint. Three reasons are given: an improvement in business conditions, the extra demand for coins because of slot machines, and the extra demand for coins caused by the "defense taxes."

The group of skyscrapers in New York City known as Rockefeller Center occupies 12 acres of land owned by Columbia University. The Rockefeller Center pays an annual rental of \$3,000,000 a year until 2015, when all the buildings will revert to the university.

EVERY HOME IS BUILT AROUND ITS WINDOWS

Sponsor of Famous World's Fair
Home Points Out Importance
of Good Windows

By W. Wadsworth Wood, Director,
National Small Home Bureau

New York City.—Few people when they build a new home, seem to realize the importance of windows. Yet every

W. Wadsworth Wood

home is built around them. This is literally true in two different ways. First, the frame of your house is actually built around its window openings. Take a look at a home under construction sometime. Notice how the framing timbers around every window opening are doubled.

Windows Determine Wall Space

Second, the arrangement of your rooms, the arrangement of your furniture, is all done around the windows. Available wall space is largely determined by windows. On the outside the architectural harmony is largely determined by the placing of grouping of windows.

Thus you see how important windows are just from appearance alone. But appearance, important as it is, is only half of the story.

Here are some of the other things that a good window should do:

Keep cold air out. Keep warm air in. Keep cool air in. Keep hot air out. Keep insects out. Keep dirt and dust out. Work freely under all condition without rattling. Provide ventilation when open. Be watertight when closed. Let light in. Give clear view out. Add beauty to your home. Harmonize with your style of architecture.

No other architectural feature in a house must perform so many functions.

FARM TOPICS

SAFETY ON FARM IS 'HOMEMADE'

Rural Families Operate on
Own Responsibility.

By M. G. HUBER

(Agricultural Engineer, Maine
Extension Service.)

Safety on the farm is largely homemade. One of the reasons for so many accidents on the farm is that farm families operate largely on their own responsibility. For city people at work or at home there are numerous safety precautions, and someone to enforce them. But the farmer to a great extent must be his own safety engineer and almost entirely his own disciplinarian. S. H. McCrory, assistant chief of the bureau of agricultural chemistry and engineering in the federal department of agriculture, gives these reasons for the farm being a fertile field for accidents: Much work is done by individuals at some distance from others so that an accident may be serious because help is not at hand. Frequent changes in work and machinery used, which may mean unfamiliarity with equipment and less accuracy of movement. Under the pressure of summer work there often are long hours in the field and chores done in a hurry after dark—both conducive to accidents.

He found that in spite of improvements, farm machinery is a top hazard in farm work. The older hazard of animals, such as unruly bulls and kicking horses, is next. Last year, in Kansas, more than half of the accidental farm deaths were caused by machinery and animals.

But in checking hundreds of accident reports, he also found that most of them were caused by carelessness—by haste, by the use of makeshift repairs, by taking chances, by using machinery without guards or with guards removed.

The suffering, the loss of time and the actual cash cost of these accidents shows the need for avoiding them. It has been shown time and again that the well-ordered farm, with well-ordered activities, is good insurance against accidents.

Poultry Pest Control

Will Increase Profits

Lice and mites know all the tricks necessary to put a poultryman's books into a maze of red ink, but an entomologist at Michigan State college knows how to take care of the pests.

Two treatments a year, fall and spring, are recommended, although

commercial poultrymen find that it often pays to take necessary precautions more frequently.

Remember that lice live on the birds and that mites inhabit the coop and the roosts, for this means that two separate treatments are required.

A simple control for mites after a coop is thoroughly cleaned is to spray the interior with half crankcase oil and half kerosene. The spray must penetrate cracks and crevices and cannot be applied with a paint brush.

Lice are controlled by treating the birds. The simplest method, says Dibble, is to place a thin line of nicotine sulphate on the clean perches just before roosting time. The body heat of the birds releases the nicotine which penetrates the feathers. This treatment must be repeated in 14 days but it will kill most all forms of lice. The repeat treatment is necessary to kill those that hatch from nits or eggs present at the time of the first treatment.

New Types of Plants Are Disease Resistant

Agriculture department scientists have opened new fields of adventure and exploration in the development of new type plants.

Their discoveries have been worth billions of dollars to American farmers. One of the most recent of these points toward the development of a disease resistant tobacco through the crossing of American types with others.

Not all plant scientists work over test tubes and microscopes in big office buildings. The department sends men all over the world in search of new kinds of plants. Others work in fields to adapt plants to American soil and climate.

Bureau of plant industry scientists returned four years ago with native tobaccos collected in Mexico, Central and South America. Many of those were crossed with American-type tobaccos and the result has been amazing even to the scientists.

Rural Briefs

Lightweight barley can be fed profitably to hogs, it is pointed out by the South Dakota experiment station.

Family vegetable gardens are called "the most valuable area on the farm" by leading home economists.

Of the 13 minerals, required by the animal body, salt is the only one generally lacking in the farm animal diet.

Easily Distinguished Colors

The national bureau of standards says that red, green and blue lights are of all triads the most easily distinguished by the eye, day or night. The field against which a light is viewed affects its visibility importantly. For good visibility a light should be brighter and of different hue than any neighboring portions of the field against which it is viewed.

Two Minute Sermon

By

Thomas Hastwell

**MODERN DAY JOB'S COMFORT-
ERS:** There are many fine lessons in
the book of Job that fit into today's
scheme of living. The book of Job is
often overlooked by many readers of
the Bible but to me it is one of the
most interesting because it deals
with wholly human values. Job lost
his riches, his home, his family, his
friends and became sorely afflicted
with loathsome boils. His wife turned
against him and urged him to curse
and renounce God. Three of his
friends came to him and spent much
time in the effort to persuade him
to turn from God. In the depth of
his misery everyone deserted him—
everyone except God. God alone re-
mained with him. How true today.
When we lose our riches and misfor-
tune overtakes us, how promptly
many we once called friends are to
desert us and to condemn us and to
blame us. They have little use for
us now that the things that once at-
tracted them, the money and the
social position are gone, but God
does not desert us. Even though we
lose everything he is still with us.
Riches, social position, nothing mak-
es any difference with Him, only
that we, like Job, remain true to
Him.

Friday Is Named Homecoming Day

Friday, August 23, the third day of the annual Mentone Fair and Livestock Show will be set aside as Homecoming Day. This day, observed for the first time this year, will be continued as a feature of succeeding fairs.

All former residents of here and pupils in the Mentone school will find hosts of their childhood acquaintances on hand to welcome them and to talk over old times on Homecoming Day.

Local people who are in contact with former Mentone residents are asked to call or see George Clark, chairman of Homecoming Day, and invitations will be sent to all whose addresses are obtained.

Plans are under way to make this a day to look forward to each year. So, draw a ring around August 23 on your calendar and be on hand to reminisce with the school mates or neighbor whom you haven't seen for years.

FIRE DESTROYS LARGE BARN ON MAHLON JEFFERIES FARM

The 40 ft. by 50 ft. frame bank barn on the Mahlon Jefferies farm, northeast of Mentone, was completely destroyed by fire early Monday morning, August 12. The local fire department was called out at about 2:15 and worked until 5:15 to save nearby buildings.

Several tons of alfalfa and clover hay, wheat, oats and straw, estimated at \$1,000, were lost, as were 150 to 200 chickens which were housed in the barn.

It was thought that spontaneous combustion was the cause of the fire. The loss was partially covered by insurance.

BURKET ITEMS

Sunday dinner guests at the home of Mr. and Mrs. Briggs Francis were Mr. and Mrs. Ross Toole, and children, Martha and Phillip, Mr. and Mrs. Maurice Toole, all of Windfall, Ind., and Wilmer Toole, of North Carolina. Philip Toole remained to spend the week with his sister, Mrs. Briggs Francis.

Mr. and Mrs. John Irwin spent Sunday with relatives in Chicago.

Mr. and Mrs. Harold Williamson and daughter, Norma, were week-end guests of Mr. and Mrs. Clay Smith, of South Bend. Patricia Smith accompanied them home to spend the week.

Mr. and Mrs. Murray Rickle spent Saturday and Sunday in Milwaukee, Wisconsin.

While your reporter was driving down the road between Silver Lake and Burket last Monday morning, he chanced to spy the familiar figure of Rosebud Slim, itinerant mailbox painter who plies his trade in the northern parts of Illinois, Indiana and Ohio, trudging along between farm houses and pushing his heavily laden wheelbarrow in which he carries his painting supplies and meager personal necessities. Slim, who is almost a tradition in this section, always decorates those mail boxes that he paints with a red rosebud, a large replica of which is painted glaringly on the front panel of his wheelbarrow.

Hold Laird-Braddock Reunion Last Sunday

The 40th annual Laird-Braddock family reunion was held at the home of Mrs. Alfred Laird on Sunday, August 11, 1940. Members from West Lafayette, Rochester, Akron, Mentone, Bloomington, Tippecanoe, Angola, Bourbon, Plymouth, Fremont, Etna Green, and Hillsdale, Michigan, were enrolled for the day.

A very sumptuous dinner was enjoyed by everyone. The minutes and the treasurer's report were read and approved during the business meeting. Memorial and prayer was given by S. A. Laird. A letter from Mrs. Lucile Loughran, of Santa Clara, California, was read. Mrs. Alfred Laird conducted a missing word rhyme contest. Maude Laird conducted a roll response of facts of various counties of Indiana.

It was voted to hold the 1941 meeting at the home of Mr. and Mrs. Claude Barkman, of Mentone, on the second Sunday of August, as usual. Members joined in singing "Blest be the Tie that Binds" and benediction was given by Byron F. Laird.

They parted hoping to meet again in many more reunions.

Asked if he believed in the theory that it was possible to talk to departed spirits, a local man said he could not believe in it. It was just not compatible with the philosophy that one found peace in the hereafter. "Where could I find peace in the hereafter," he asked, "if my wife could go into a trance at any time and talk a leg off of me, with no chance of me talking back."

The senior class of 1930 held a party at the home of Miss Eileen Mollenhour on Friday evening. The house was beautifully decorated with flowers of several varieties carrying out the class colors of red and white. Delicious refreshments were served at midnight to the following class members and guests: Marjorie Baker, Beulah Kelly, Naomi Clark, Bernice Bowen, Kathleen Creiger, Mabel Sarber, Eileen Mollenhour, Frances Rush, John Mathews, Walter Fenstermaker, Edgar Igo, Clayton Holloway, Earl Beeson, Owen Horn and Donald VanGilder.

The Ever Faithful club held its annual picnic at Beaver Dam lake last Tuesday evening. A pot luck supper was enjoyed by all.

Mr. and Mrs. Mahlon Mentzer left the first of the week for a few days' vacation. Mr. Mentzer informed folks that their destination was undetermined, and that their plan was to follow the front end of their car and let it take them where it would.

Russell Regenos, who underwent an operation for osteomyelitis of the leg, at the McDonald hospital, at Warsaw, sometime ago, was brought home Monday morning.

Squirrel Hunters Slowed by Weather

The extended period of dry weather throughout most of central and southern Indiana is handicapping squirrel hunters who opened their season in the 69 counties composing the Southern Zone last Saturday, Virgil M. Simmons, commissioner of the Department of Conservation, reported today.

While reports indicate that squirrels are plentiful this year, more plentiful in some areas than in the past, the hunting will not be good until there have been several rains. During periods of dry weather the squirrels do not move much about, and the hunters have greater difficulty in moving through the woods without dry sticks and vegetation advertising their presence.

The open season for squirrel hunting does not start in the 23 Northern Zone counties until Monday, September, 2.

Two Minute Sermon

By
Thomas Hastwell

THE FINAL TEST OF A CHRIST-

IAN: I have heard many definitions
of a Christian man, a religious man.
some define a religious and a Chris-
tian man as a man who is a faithful
member of a church, who contribut-
es to the church and to missions,
who attends all services, and who
reads and studies his Bible. I think
that a good Christian should, and
perhaps would do all of these things.
They would be a part of his life but
I believe that a man can do all of
these things and still not be a very
good Christian. He can attend every
service, read and study his Bible di-
ligently, pray fluently, contribute
generously to the local church and
to missions, even to the tenth of his
income, and still not be a very good
Christian. In fact some of the poor-
est Christians I have known did all
these things in full measure. I think
the best test of a Christian is how
he treat his fellow men, those with
whom he comes in contact daily. If
he is little, and petty, and mean, and
hateful, and despicable, and dishon-
est, he is no Christian no matter
what his professions or his religious
practices are. If he is kind, consider-
ate, generous, charitable, courteous,
thoughtful, sober, industrious and
tolerant he rates high in my estima-
tion as a Christian. He is living
Christ in his daily life.

How Did They Do It?

In securing names of former Men-
tone pupils for Homecoming Day, the
school records of 1892 were brought
from their storage places and some
interesting facts found therein. One
of those show that the salaries of
school teachers in 1892 vary from
\$35 per month in the primary de-
partment to \$55 for the principal. C.
W. Sloan, principal, received \$55; W.
L. Fish, \$40; and Mrs. L. M. Taylor
and Mrs. C. M. Poffenberger receiv-
ed \$35. The school term was 128
days.

In looking over these records it is
brought to mind that homes were
established, families reared, taxes
paid and enough left to buy meat
and potatoes and perhaps a few sim-
ple luxuries. How did they do it?

Since the outbreak of the Euro-
pean countries are sending their gold
to America to keep it from falling
into Hitler's hands. Gold has been
coming in so fast—as much as 400
million dollars in one week—that
vaults in New York became crowded.
The treasury department has made
arrangements to ship the surplus, 5
billion to the government vault at
Fort Knox, Ky. Strangely enough the
shipment will be made by registered

mail. The gold will be shipped in ten
special trains carrying 100 million
dollars each. These will be accom-
panied by a heavy armed guard. The
postage bill will total \$1,608,000.

It is estimated that each cubic
mile of ocean water contains 128-
000,000 tons of common salt.

Attend Birthday Party

Monday, August 19, Mrs. Marshall Goodman gave a birthday party for her small daughter, Ramona, who is 6 years old. Many nice gifts were received by the little hostess.

Refreshments of ice cream and cake were served to the following guests: Nila, David and Neil Montague, of Bourbon; Janet Rose Reed, Marjorie Mollenhour, Rex Borton, Jimmy Sarber, Carolyn and Edwin Kern, Judy Clutter, Jackie Ward, Elaine Goodman, and the little hostess, Romona Goodman.

Mr. and Mrs. Paul Jones and daughter, Mary Linda, spent Saturday and Sunday with the former's father, Vernon Jones.

1st Homecoming Day Shown Much Interest

Homecoming Day, observed August 23, at the Mentone Fair and Livestock Show, was counted a success, with 90 former Mentone school pupils and 37 visitors registering in the homecoming booth. The first person to register was Charles Dillingham, of Winimac. He was also the first baby born in Mentone. The oldest person registering was Allen Jefferies.

The 181 pictures of school pupils, the various school buildings and pictures of scenes along Main street in Mentone years ago, were contributed by interested local people. The oldest picture on exhibit was a picture of the old frame school house which was thought to have been taken in 1883 or 1884. In the background of this photo can be seen woods and an old rail fence.

A school record of the years 1891-1893 was also on display. It was recalled that Oscar Harding was the first teacher in the old school house. He was the father of Mrs. Stanley Boggs. It was also mentioned that Henrietta "Etta" Trish, mother of Wendell Willkie, taught school at Mentone in the 70's, before the town of Mentone was incorporated.

Stan Lash, of Mentone, claims the longest record of living in Harrison township. Monday, August 25, made 78 years.

An old horse drawn hearse, which was owned by L. P. Jefferies, was exhibited at the fair grounds, with an old fashioned coffin. The hearse was very ornate and beautiful in its day and drew much attention when brought from its storage place for the day. The black horses, Jim and Nell, which pulled the hearse years ago, were said to step very high, but when drawing an ordinary delivery wagon, they looked like a team of "old nags." The hearse was bought 40 years ago at a cost of \$1485, and was said to have been used at over 1200 funerals.

Mrs. Cora Bowen, booth attendant, stated that everyone seemed to enjoy meeting old classmates again and looking at the pictures.

FAWLEY REUNION HELD

The 23rd annual reunion of the Fawley family was held Sunday, August 8, at the home of Adam A. Bowen. The next reunion will be held the 3rd Sunday in August, 1941, at the home of Wm. E. Fawley.

Officers for the ensuing year are Miles Fawley, pres.; Wm. E. Fawley, vice-pres.; and Cora Bowen, sec-treas.

In an "exchange" is found this interesting fable. A mighty king was stricken with a strange malady for which his physician could find no remedy. Finally a soothsayer told him that if he wore the shirt of a happy man, he would find relief. With high hopes the king sent out his couriers and ordered them to search the country for his happiest subject. But alas! When the couriers found the happiest man, he had no shirt.

Industry Ready to "Keep 'em Rolling" for Defense

Graphic illustration of the way in which one of America's greatest industries gears its activities with the United States Army for national defense is found at Little Falls, Minn., where the greatest peacetime maneuvers in the history of the country are being held Aug. 3-Aug. 24.

To "keep them rolling," Chevrolet, one of the largest suppliers of motor transport equipment to the nation's armed forces, has set up through one of its dealers, the Bert Baston Motor Co., of Minneapolis, a complete parts and service headquarters in the military reservation at Little Falls. More than \$10,000 worth of parts is maintained at this depot, where three service representatives are on duty 24 hours daily to service Chevrolet equip-

ment in use. The 85,000 troops in actual combat maneuvers will use 1,180 Chevrolet transport units, including officers' cars, reconnaissance cars, hundreds of trucks adapted to special uses, and military ambulances.

Upper left in the photo shows army transport crewmen servicing an ambulance. Upper right is the Chevrolet parts and service headquarters tent, where service experts are always on duty. Lower left is Lieut.-Col. R. F. Rossberg, of the Minnesota National Guard Quartermaster Corps. At lower center, an officers' car used by the major-general in command of the Little Falls encampment is being serviced. Lower right is an interior view of the Chevrolet parts tent, showing completeness of stock.

Better is little with fear of the
Lord than great treasure and trouble
therewith.—Proverbs 15:16.

There are already signs of trouble
brewing in the conquered countries
of Europe. The fire is smouldering
and will break out at the first in-
stant Hitler's vigilance is relaxed,
and when it does the fifth column-
ists and Hitler sympathizers will be
the first to go. There will be no
traitors back of the lines.

A newspaper does not print a
crime story until it gets into court
and becomes public property. Every
newspaper knows a lot of good stor-
ies that never get into court and
hence cannot be printed.

Fifty years ago there were no
automobiles. Operations were rare.
There were no radios or picture
shows. There was no grape fruit.
Milk shakes were the common drink.
Farmers came to town for their mail.
The popular diversion Sunday after-
noon was to go down to the depot
to see the train come in. Women
wore tight shoes and tighter corsets.
Skirts dragged the sidewalk. No one
swatted flies. Few houses had screens
on the windows. For a nickel one
could put a pair of tubes in his ears
and hear a phonograph record. Milk
was five cents a quart or six quarts
for a quarter. Bread was five cents
a loaf or six loaves for a quarter.
There was no relief program. Every
man supported his own family and
made provisions for his own old age.

Foreclosures were rare. Nearly every
one walked to church and all child-
ren walked to school. Perhaps this is
the reason there were fewer fore-
closures. Gasoline was used only for
cooking. The butcher thought noth-
ing of throwing in, without cost, a
liberal chunk of liver. Women's bath-
ing suits had long skirts and the
bathers wore cotton stocking. Wom-
en wore knee length shorts in the
peppiest chorus shows only.

When the feeling that we are
spending too much for the defense
of this country comes over you, just
take a good look at the conquered
nations of Europe.

One fellow says that it takes more
backbone to keep from signing a
fool petition than it does to keep
from going security on a poor note.

One of the weakest links in Hit-
ler's scheme is that he will not per-
mit his people or any of the people
he has conquered to hear the truth
ovr the radio. Time was when a
people could be kept in ignorance of
the truth but that time is past. There
are too many ways for a people to
learn the truth. Once they learn the
truth they discover what a sham
their leader is.

It is a smart man who has discov-
ered that it is better to work for
50 cents an hour when he can't get
more than it is to loaf at 75 cents
an hour.

Two Minute Sermon

By

Thomas Hastwell

THESE ARE THE ONLY REAL
RICHES: In the first verse of the
first Psalm appears the statement,
"Blessed is the man that walketh
not in the counsel of the ungodly,
nor standeth in the way of sinners,
nor sitteth in the seat of the scorn-
ful." There is contained, I think, in
this verse, and the several verses
that follow, a splendid philosophy of
life. On all sides we find evidence
that the man who follows this course
prosper, and the man who does not
follow it does not prosper. He may
not prosper in the measure that he
receives great material riches, but
he does prosper in that he receives
happiness, contentment and satisfac-
tion. Without these no life is really
happy, or content. Wealth, of itself,
cannot, and never has, brought hap-
piness. If it did bring happiness
those with wealth would all be hap-
py. The facts are they are not all
happy. True riches are only measur-
ed by happiness, contentment, and
the joy of living.

'Local' Lighting

Local lighting is a term used to
describe lighting fixtures placed in
positions where concentrated light
is desirable, such as over kitchen
sinks, kitchen ranges, work table,
or laundry tray. The term may
also be used in interior decoration,
where a fixture is placed in some
special position to throw light on an
object of art, a shelf of books or
in some cases on wall paintings.
Trailing electric cords are not only
unsightly but often hazardous, and
where no outlet is available to serve
a "local" lighting fixture one should
be installed.

MORE TOURIST TRAFFIC ON INDIANA HIGHWAYS

An increase in the volume of tourist traffic on the state highways throughout Indiana is indicated in reports received by the State Highway Commission during the past few weeks. T. A. Dicus, chairman, said recently. Normally tourist traffic—vehicles bearing license plates from other states—makes up about 20 percent of the traffic on the state highway system.

Much of the tourist movement again this summer is centered on the transcontinental routes but an increased number of "foreign" cars are
