A FEW SUGGESTIONS FOR HAY FEVER VICTIMS

The Midwest produces more ragweed pollen than any other area in the United States.

This is hardly a comfort for the hay fever sufferers who must cling to jobs, homes and schools during August and September. But for those who can flee Illinois, Indiana, Iowa and sister states by August 15, the Travel Bureau of the Chicago Motor Club suggests several locales where relief awaits.

Northern Wisconsin, upper Michigan and the Minnesota Arrowhead country are within comparatively easy reach. But they are mentioned with reservations, as southerly wind and adjacent farming country sometimes cause a considerable pollen invasion.

A sneeze is unknown in the wooded valleys and peaks of Washington and Oregon. This region is a perfect refuge. Other western states offer comparable relief. California is good although the orchards and fields of Southern California should be avoided. Montana, Wyoming, Idaho and Nevada bear very little pollen.

Utah and Colorado have a generally low pollen index although their principal cities, Salt Lake City and Denver, are not recommended for hay fever victims. Colorado is on the doubtful list also around Colorado Springs and Burlington.

Arizona and New Mexico are ideal, especially the former. The pollen count rises slightly, however, near Albuquerque.

In the East, Maine and New Hampshire in the north and Florida in the south are both recommended although the pollen count can vary in both regions. Augusta, Bar Harbor, Presque Isle and Houlton in Maine are usually good as are Concord, New London and others in New Hampshire.

The lower east coast of Florida, the Everglades and the Keys have not been thoroughly investigated but air tests at Miami and Miami Beach have been very favorable.

Peach Crop

4-H CLUBS TAKE THE LEAD IN RURAL RECREATION

The importance of providing recreation for the leisure hours farm folks have these days has become one of the major concerns of thousands of 4-H club leaders and members. During the past three years, a plan has been worked out whereby adults and youth interested in directing recreational activities in their clubs and communities can take a special course set up for that purpose.

This training and club participation has brought about through the National 4-H Recreation and Rural Arts program now in full swing in Indiana. Sponsor of the program, U. S. Rubber Company, is providing about \$29,000 for leader training clinics, clubs and individual awards.

Last year more than 10,200 young people and 6,400 adults attended these clinics. They receive instruction in group singing, dancing, games, sports, dramatics, handicrafts and many other activities.

While they are having fun, the 4-Hers are also working hard to make a good showing for themselves and their club. To encourage these endeavors, U. S. Rubber presents merit certificates to clubs and members; \$25 cash awards to counties; and Chicago 4-H Club Congress trips to eight national champions.

The 1949 State honors went to Aileen Hofman, of Fort Branch. Cash awards were won by 14 counties. The money is used for recreational equipment. Recognition cards were given to 1,562 members.

The program is being conducted in 47 states under the supervision of the Cooperative Extension Service.

THE SHORTEST WAY TO A GRAVEYARD

The shortest way to the graveyard is between parked cars.

Each year the parents of more than 2,150 U. S. children discover that fact.

To find out why American children are being killed off by automobiles the Chicago Motor Club recently made an extensive survey in Indiana and Illinois.

When the figures were tabulated the results showed that 17 per cent of the deaths and injuries among our children occur because they dart into the street from behind parked cars.

"Crossing the street from behind a parked car is usually the shortest route to the other side of the street," cautions Chas. M. Hayes, president of the Chicago Motor Club, "but it is also the shortest route to the graveyard."

"A motorist traveling 20 m. p. h. requires 42 feet in which to stop his car. This distance --- almost three car lengths --- is the minimum warning that a driver needs to come to an emergency stop while moving at 20 m. p. h. If the driver lacks ample warning such as occurs in instances where children dart out from between parked cars, a child's life is snuffed out."

Hayes then pointed out that there are four reasons why a between-parked-cars crossing is more dangerous than a corner crossing: 1. Visibility is poor for the driver and person making the crossing. 2. The crossing is unexpected. 3. Sufficient stopping distance is not allowed for the automobile driver. 4. The person making the crossing receives no assistance from safety patrols or police officers.

Eighty per cent of the drivers involved in fatal pedestrian accidents in urban areas were obeying traffic regulations according to Chicago Motor Club traffic engineers.

This indicated that in most instances children who pop out between parked cars are at fault.

What is the solution to this serious

problem which faces Illinois and Indiana?

There are two solutions. The first one concerns children. School safety education programs can do much to help children be better pedestrians. Safety habits formed in school are not enough. At home parents must stress safety, too. Oftentimes, parents, instead of teaching their children safe pedestrian practices, provide them with poor examples.

Frequently parents escort their children across busy streets showing little concern for oncoming cars or moving vehicles. By not being vigilant and observant other parents unwittingly ensnare their children in death traps. These malpractices on the part of parents only serve to undo the safety lessons which the children received in school.

The second solution applies to motorists. While driving through residential areas motorists should observe speed limits. Also by anticipating the impetuous actions of children motorists can avoid collision with them. When approaching a residential area where cars are parked on both sides of the street, motorists should drive with caution. Their cars should be steered as far to the center of the street as possible.

Everybody can help by teaching children to obey these 10 pedestrian commandments:

1. Obey your safety officer.
2. Don't walk out into the street between parked cars.

FRANKLIN "49"ER'S

The Franklin "49"er's girls 4-H club met at the home of Sandra Ballenger, July 17 at 7:00 p. m. The meeting was called to order by our president Pat Ballenger. The 4-H and allegiance pledges were led by Norene Bibler. The minutes were read by our secretary, Elener Norris and approved by the club. She also read the roll. Response to Roll call was "My Hobby". The winner of the mystery box was Elener Norris. Songs were led by Marilyn Rathfon. Our Health and Safety leader, Sandra Ballenger checked our posture. The club planned their Achievement Day for July 28 at Beverly and Carol Teel's.

Louise Ummel then gave a report on Junior Leader's Camp in which she mentioned that we give \$2 to send a boy and a girl to a foreign country. It was motioned and seconded so we will send the \$2. There were 10 members present and our 2 leaders, Mrs. Alden Jones and Mrs. Gerald Ballenger. We also had 3 guests, Mrs. Chester Ballenger and her daughter, Melody Jo, and Miss Beatrice Dorell.

Recreation was led by Sandra Ballenger. Refreshments were served by the hostess.

MENTONE MURMURS

by
DAVID and SALLY GOSSER.

Last Tuesday evening as Murmurs stood at the west gate of the ball park collecting entry fees to the tournament, he was aware of the most beautiful sky-coloring we have had for many days. Cardinals perched on the very tops of trees called their "wet year" and "potatoes." The cooling breeze was almost as gratifying as if it were blowing down some mountain heighth, and the cloud formations to the north were those which are usually seen in higher altitudes.

We do not need to go far afield to find beauty. Our own countryside abounds with it. The nights of almost-full-moon have been exquisite. Not even Shakespeare in his "Midsummer Night's Dream" could capture the rare filmy moon-gauze and lay it more gently over meadow and glen. The haze and fog that lay in the lowlands between the hills silvered as the moon rose out of its orange-horizoned orb and climbed above tree tops and across the lakes. It left chips of silver scattered across the pools of silent water. And yet beneath this serene and quiet pastoral scene Murmurs was aware that the heart throbs of youth beat like trip hammers that coursed the blood in tingling effervescent ecstasy.

The powers of nature—of God—will outdo all the man-made codes of ethics and morality. He truly sets the stage whereon we stride for our brief moment—and are gone. We in our foolish ways would stay His hand, but He will not be held back from His plans and purposes. How foolish we become in our age, to forget the power of nature which also is God's. We rant and rave against our youth, and continue to build obstacles of economy against them so that they dare not live the natural lives of love and marriage in their youth.

Divorce shall continue until we afford youth the opportunity to marry young and grow together as one personality, sharing both the joys and sorrows of maturing years without parental interference. Murmurs joins with Browning in saying, "God's in His heaven. All's right with the world." (It is some of the people who make it odious and difficult to live.)

Mr. Levi Henderson from Culver, Indiana visited at the home of Mr. and Mrs. Clarence Brown and William Brown on Wednesday.

The Chicken of Tomorrow

TODAY

THE MASTER MIX WAY

5 lb. broilers in 12 weeks!

You too can have the chicken of tomorrow, today—the Master Mix Feeding Way. Verne Steckley, Kendallville, Indiana hatcheryman, winner of the 1950 Indiana Chicken of Tomorrow contest reports:

"I was one of 49 entries with my Steckley's Cornish—New Hampshire cross chickens," says Mr. Steckley. "The fifteen cockerels which were entered in the contest were finished off in eleven weeks and five days at an average weight of 5.1 pounds and 4.7 pounds New York dressed. I did not baby my chicks, they were raised with 150 others. Out of the 100 chicks I started, 96 lived and they consumed only 3.3 pounds of feed per pound gain. I fed my own brand Stecco Broiler Mash Special, made with Master Mix Broiler Concentrate."

"My advice to broiler raisers, feed Master Mix Broiler Mash or your dealer's own brand Broiler Mash made with Master Mix Broiler Concentrate."

BAPTIST NEWS

The regular monthly business meeting of the joint board was held Tuesday evening at the church. The pastor and board voted unanimously to recommend to the church that they continue the morning broadcast of the morning service over WKAM from 10:30-11:30 each Sunday.

August 13 will be the first anniversary of the broadcast and it is hoped that many who have been listening to the program for the past year will be able to visit at least one of the services on that day. Some letters have been received this week from listeners who have written in telling of their hope the broadcast will continue on the air.

A Sunday School picnic will be held on August 16th for all in the church. A pot-luck noon dinner with games and time ball games in the afternoon will feature the day. Last year this event was held at the Rochester city park and a good time was had by all. All members and friends of the church are invited to come for the good time planned. Roland Ferverda and Royal Blue

have been named for the committee on games and Heston Creviston and Everett Besson on refreshments.

In spite of hot weather and vacations the average Sunday School attendance for June was 221 and for July 205. Miss Kathryn Lovell, new missionary to Brazil, was to fly this next week to Manaus for her first term on the field. Half her support comes from this church and half from the First Baptist Church of Dixon, Illinois. If you are not a member of any church in the community, this church invites you to attend any or all of its services.

STARVATION...

IN THE LAND OF PLENTY

For years, gulls around St. Augustine, Fla., have lived off the refuse thrown overboard from the shrimp fleet. But recently the fleet moved 500 miles down the coast.

Many gulls, unused to making a living as nature intended, starved to death. In our growing dependence upon government subsidy, we wonder if this might be a lesson. We wonder!

**FACTS UNCOVERED ON
CHILD DEATHS**

Six children in the U. S. die each day as the result of pedestrian-vehicle accidents.

In addition 10 of our tots are injured every hour from the same cause. How do children meet their doom on the streets? To find the answer to this question the Chicago Motor Club conducted a detailed study in Illinois and Indiana. Here are some of the facts which were uncovered.

Thirty-four per cent of Illinois and Indiana children were killed or injured

because they were playing in or near a roadway.

"Participation in sports or games near a street invites disaster," warns Chas. M. Hayes, president of the Chicago Motor Club.

"Children concentrate their minds on the game they're playing. They are not safety conscious."

"When a child is chasing a fly-ball in the outfield he is not thinking of automobiles traveling on the street. He is thinking of the cheers he'll get from his team mates for making a one-handed, leaping catch of the ball."

Children in the 1-5 year age group were most susceptible to accidents the survey showed.

Worst day of the week for the children was Saturday when 25 per cent more accidents occurred than on any other week day.

Chicago Motor Club traffic engineers pointed out that the heavy concentration of accidents is on Saturday because during the school year Saturday is a day off --- a time to have fun and relax. Why isn't Sunday as dangerous as Saturday? On Sunday children are tucked under the parental wings and driven out into the country where they are away from the streets. Supervision cuts down accidents.

Children in the 5-14 year age group encountered most of their trouble from 4 to 7 p. m. on week-days. This three hour period, the survey showed, accounted for 39 per cent of all accidents. When the children were under the control of school patrols they were safer. Again, supervision assists in saving the lives of our children.

What are the most dangerous months for Illinois and Indiana children? The vacation months --- June, July, August and September --- exacted the highest toll of deaths and injuries. These four months accounted for 44 per cent of all accidents involving grade school children.

Where do most children-vehicle accidents occur? The study showed that 49 per cent of the accidents happened within one block of the child's home.

From these facts we draw the first lesson in child safety: DON'T PLAY IN OR NEAR A ROADWAY. Mere repetition of this warning phrase is not enough. Parents must give it force by backing it up with admonitions and punishment. Tell Junior if he plays ball on the street he will have to come into the house. When he disregards your orders make him come in. You'll be disciplining your son --- and saving his life, too!

Civic and business groups can contribute to this life-saving venture by sponsoring playground contests. The idea of playground contests, developed by the Chicago Motor club, is simple. Cash prizes are offered for the best privately developed play area in a neighborhood. This stimulates the building of play areas. With sufficient play areas to attract them children will have no reason for playing in or near a roadway.

NOT JUST A POLISH!
NOT ANOTHER WAX!

DU PONT SPRAY GLAZE IS AN ENTIRELY NEW PROCESS

- ✓ It's new! It's different! It's Du Pont Spray Glaze—the most significant development in car care in years.
- ✓ Du Pont Spray Glaze is applied to your car by a new, faster method—with a spray gun under high pressure to penetrate every crevice and fill every pore in the finish. It gives your car a smoother, glossier coating than ordinary waxes or polishes.
- ✓ Du Pont Spray Glaze is not a paint nor a lacquer. It is a transparent material that brings out the beauty of your car finish and protects the paint with a hard, durable glaze.

The Spray Glaze process includes:

1. Washing the finish with Du Pont Car Wash.
2. Pre-cleaning with a special Du Pont Spray Glaze Cleaner.
3. Applying Spray Glaze.

Shines brighter — lasts longer — costs you no more.

CHURCH TO CELEBRATE
RADIO ANNIVERSARY

The First Baptist Church, of Mentone, will celebrate their first anniversary on the radio, on Sunday, Aug. 13. It is hoped by the members of the church that many who have been listening to the morning service for the past year will be able to come to one or both of the services this coming Lord's Day. On Thursday evening the church voted, without a dissenting vote, to continue the broadcast for another year. During the year several people have written in expressing appreciation for the broadcast but many have never written or visited the services. For this reason it is hoped a goodly number will be able physically to come to at least one of the services on Sunday. If it is necessary to have help on the steps or to bring a wheelchair, there will be plenty of men to help at the church. All who do not have obligations elsewhere are invited to these anniversary services on Sunday.

BAND CONCERT SATURDAY EVE.

The Etna Green band, under the direction of Miss Eleanor Reed, will play on Saturday evening for the band concert.

On Saturday evening, Aug. 19, there will be no band concert as the Mentone firemen are having their fish fry. Saturday evening, Aug. 26, the Mentone band will play.

SILVER LAKE WINS
COUNTY TOURNAMENT HERE

The Silver Lake softball team won the final game in the county tournament played at Mentone Saturday evening, by defeating the Warsaw Moose team four to five.

The scores of the final three nights of play in the tourney was as follows: August 3—

Moose	10R	4H	2E
Utter & Tridle	3R	9H	2E
Christian Church	5R	6H	3E
No. Webster	4R	5H	1E

Aug. 4—

Silver Lake	8R	6H	2E
Burket	3R	4H	0E
Moose	9R	7H	2E
Christian Church	4R	7H	1E

Aug. 5 (Finals)—

Silver Lake	5R	7H	1E
Warsaw Moose	4R	4H	2E

The Burket team, which remained in the tourney up to the final night, had the best record of the tourney for playing good ball. If my memory is correct, they didn't have an error chalked up against them in any game, and no other team in the tourney managed to go through a single game without at least one miscue in the field.

MAHONEY—SEE MARRIAGE

Mr. and Mrs. Howard Mahoney are at home at Palestine lake, following their marriage, which took place on Saturday evening in Warsaw. Mrs. Mahoney is the former Miss Elinor See, daughter of Mr. and Mrs. Warren See, and Mr. Mahoney is the son of Mr. and Mrs. Carl Mahoney, all of the Palestine community.

Rev. B. H. Truman read the double ring service at six o'clock Saturday evening at his home on West Market street. The attendants at the ceremony were Miss Carolyn See, sister of the bride, and Dick Boganwright, of Mentone, a friend of the bridegroom.

An afternoon dress of gray crepe with a floral print was worn by the bride. Her accessories were white and her corsage was of red roses. The maid of honor was attired in a pink crepe dress with a floral print. Her accessories were also white and her flowers were yellow roses.

Following the ceremony a reception was held at the home of the bride's parents at which sixteen close relatives and friends of the couple were present.

Mr. Mahoney is engaged in business as a technician, repairing radios.

MRS. CORA WILLIAMS DIES

Mrs. Cora Belle Williams, aged 82 years, six months and 28 days, died at 1:50 a. m. Wednesday at the McDonald hospital, at Warsaw, after a six months illness due to complications.

The deceased was born February 12, 1868, in Harrison township, to Joseph and Eliza Nelson, and had resided her entire life in this county. December 21, 1892, she was married to Wilbert Williams, who passed away in 1936. She was a member of the Mentone Methodist Church and the Royal Neighbors lodge.

MERCHANTS SPRAY CITY
TO COMBAT INSECTS, ETC.

Several members of the Mentone Merchants' Association gave Mentone a good spraying with an insecticide on Monday evening, as a possible aid in the prevention of polio. As in past years, they are indebted to Oliver and Clem Teel for the use of their orchard sprayer in doing the job. The Mollenhour tractor pulled the equipment, and the Merchants supplied the spray.

HOME FROM HOSPITAL

Mrs. Russell Eber returned to her home Wednesday afternoon after being a patient at the Woodlawn hospital since last Friday following minor surgery.

MERCHANTS WIN FIRST GAME
IN DISTRICT TOURNAMENT

The Mentone Merchants softball team, with Brockey's no-hit pitching, defeated the New Paris boys in the district softball tournament being held at Warsaw. The score was 2 to nothing, although a few New Paris boys did get to first on errors, base on balls and one batter was hit by the pitcher.

FIREMAN PLAN BIG SHOW
HERE AUGUST 19TH

The Mentone firemen are sparing no effort in arranging a program for Saturday evening, Aug. 19, that will be interesting to everyone. You'd be surprised with some of the ideas they are working on to make their parade of fire-fighting equipment novel and interesting, in addition to the bands, color guard, etc. that will be in the parade.

They have secured Miss Robbin Lee Howard, 8 year old piano protege to put on a performance. This little lady has appeared on radio and television networks and those who have heard her comment that she is certainly capable.

And a Jonah style fish supper—served from convenient tables and benches, will take the edge off your appetite while enjoying the evening's fun and entertainment.

The entire program is being put on by the firemen with the thought that any profits can be used to purchase additional fire-fighting equipment to be used for the citizens of the area. These firemen — and these are the words of your editor—do not hesitate to leave their work, their play and recreation, to go out and protect your home from fire, and pay little attention to the meager financial return they receive. This fish fry will give each of us an opportunity to show our appreciation to them for their fine work.

FRIENDLY NEIGHBORS MEET

The Friendly Neighbors Home Economics club met at the home of Mrs. Everett Beeson Thursday afternoon, August third, with Mrs. Monroe Ro-

mine as assisting hostess.

At the opening of the meeting Mrs. Monroe Romine led the group in singing "America the Beautiful." The pledge to the flag followed.

The vice president, Mrs. Richard Greulach, Jr., presided during the business session due to the absence of the president, Mrs. Ernest Studebaker, who was attending the Purdue conference.

This Is
**Your Paper
Printing News
Is a Duty**

By William R. Nelson

MANY readers of newspapers are mistakenly reluctant to report newsworthy events about which only they know the facts. To some it apparently is embarrassing to tell the paper about social affairs in their homes, visitors, information received in letters, or other equally newsworthy items.

Telling the paper about news, whatever its nature, whether large or small in importance, should not cause embarrassment, and will not if rightly regarded. In fact, giving news to the home town newspaper might better be looked upon as a social and civic duty one owes to the community. Certainly the newspaper will receive it in that way.

Newspapers cannot afford to maintain staffs large enough to actually hunt out every news item they publish. All must and do rely upon voluntarily supplied news tips and items for a large part of the news they publish.

But there is another way to look at it that is equally important. Whenever you invite guests into your home you are honoring them. When they accept they are honoring you. To acquaint the community with such incidents is a gracious action which your guests and the community will fully approve.

Even information received in letters, excepting of course the confidential and purely personal, is news if the writer is known by others.

On those occasions when sickness, accidents, or other personal troubles occur, the community will want to know about them so it can respond accordingly. To neglect or refuse to give such information deprives your neighbors and other friends of opportunity to show their interest and friendship.

One of the main reasons why people like to live in smaller communities is the greater number of friends they make. One of the surest ways to make friends is by giving news to the home town newspaper.

Next time you entertain, have guests, receive news in a letter, there is illness, or some member of your family experiences disappointment or success, tell the paper about it. If you have never done so before you will be surprised and pleased by the glow of satisfaction its publication will generate.

**VETERAN TRAINING PROGRAM
STARTED AT MENTONE SCHOOL**

A veteran farm training program, under the GI bill, has been started at Mentone with 21 students now approved. Maynard Johnston, of Bellvue, Michigan, is the instructor, and he is well qualified for the work, having received his master's degree at Michigan State at Lansing and has been teaching this type of course the past five years. Mr. Johnston, with his wife and two daughters, hope to locate in or near Mentone.

Night classes of two hours duration will be held two evenings each week, but most of the training will actually be accomplished on the farms. The program is under the supervision of

the Mentone school system, with Mr. Johnston a member of the local teaching staff, but the government will reimburse the school for all expense involved.

Mr. Walter Kent, new principal of the Mentone school who is now living in the home recently purchased from Ora McKinley, also announces that a revision of the unit system by the state makes it possible to add one more teacher at Mentone, and Miss Elwanda Jordan, a graduate of Indiana University and presently residing at Anderson, will teach art in all 12 grades and assist in teaching high school English. She is a native of El Paso, Texas.

Registration for the 1950-51 school year will be on Friday, Sept. 1, but

class instruction will not start until the following Tuesday, Sept. 5.

Mr. Kent spends much of his time at the school these days and parents or students who may wish to confer with him are extended an invitation to visit him there.

FILE CLAIMS FOR SOCIAL SECURITY AT AGE OF 65

"Wage earners over 65, who have stopped work, should not delay filing claims for old-age and survivors insurance benefits because they fear losing expected increases in the amount of benefits payable when the new social security bill now in Congress becomes law," Gerald Kelter, Manager of the Social Security Field Office at Elkhart, warned today. "People who file now will get the old rate until the new provisions become law, and then will automatically have their benefits raised," Mr. Kelter explained.

Dr. and Mrs. Dan Urschel and Charles will leave next Tuesday evening for their annual trip to Minnesota and upper Michigan. Dr. Urschel will be absent from his office from August 16th to September 18th, but either Miss Mentzer, Miss Sullivan or Mr. and Mrs. Abbey will be available at all times to take care of routine office matters, and obtain records or X-ray films as needed.

HEALTH FACTS FROM YOUR STATE BOARD OF HEALTH

Births in Indiana during the first six months of this year showed a slight decrease as compared to the same period a year ago.

The birth rate for the first six months per 1,000 estimated population is 22.3 with a total of 43,328 births; 23.1 for the same period in 1949 with 44,922 births and 22.1 with 43,035 births for the first six months of 1948, according to figures released today by Verne G. Robinson, statistician, Indiana State Board of Health.

TODD'S POULTRY DRESSING PLANT

The death rate per 1,000 estimated population for the first six months this year revealed a slight increase as compared to the corresponding periods in 1949 and 1948. This year's rate for the 6-month period is 10.6 with 20,509 deaths as compared to 10.3 with 20,034 deaths for the first 6 months of 1949 and 10.4 with 20,168 deaths for 1948.

The mortality from diseases of childhood was generally low. There were no deaths from scarlet fever; 14 deaths from whooping cough as compared to 15 and 16 for the same period in 1949 and 1948; 7 deaths from diphtheria as compared to 13 in 1949 and 8 in 1948 for the same period.

"Poliomyelitis caused eight deaths as compared to 5 and 4 for the same period of the two years previous but this is not indicative of an increase of the incidence of poliomyelitis as some of these were among persons contracting the disease in the previous year. The incidence of poliomyelitis is definitely less this year so far with 50 reported cases as compared to 272 cases for the same period a year ago." Mr. Robinson pointed out.

Measles had its ups and downs during the three year period with 13 deaths for the first six months of this year; 9 for the same period in 1949 and 31 for the first six months in 1948.

MENTONE MURMURS

by
DAVID and SALLY GOSSER

It was the intriguing cry of the auctioneers that sounded from the corner of Main Street last Saturday afternoon. Passers-by slowed down, turned the corner, paused to hear him say, "One dollar, who'll make it a dollar-fifty? A dollar-fifty, who'll make it two? Do I hear two? Two? How about a dollar-seventy-five then? who'll make it a

dollar-seventy-five? That's it, lady, I like you. How about two dollars then? Do I hear two? No? It goes to the lady in the green hat. Your name please. Mrs. Hickleguber? Did you say Miss or Mrs.? Mrs.; why, I knew it all the time."

This was the first public auction Murmurs ever attended. He has, of course, heard of them, but his folks never attended any when he was a lad, and in later years he's been too busy to consider them. They are highly fascinating, he admits, and he hopes to listen in on more of them in the near future. He didn't come away without doing a

little bidding on his own. A china cup and saucer, not the flying kind of saucer, but real China china, the kind that lets the light through but is not quite transparent. Translucent is the word for it.

Who knows what the future holds in store for light, so, an old fashioned oil lamp was obtained for a quarter. It had oil in it; all that was needed was a match. Table linen went pretty high, and likewise the bedding, but Murmurs came out of it with a pair of pillows and a table cloth.

The fascinating part of the sale was the ever-increasing crowd that milled

about and sweltered under a freckle producing sun. The ladies were in the majority, and although they sought the shade whenever possible, they didn't let a little sun interfere with the excited bidding on the bedding, towels and aprons.

Auctions are the meccas for collectors and antique dealers. It may be the place where rare buttons are found, salt and pepper shakers, pictures and dishes, glass, china and pottery. On the cupboard shelves at the parental home of Murmurs in Pennsylvania are some antiques purchased since Murmurs has left home. It was quite a surprise to him when he learned that his mother has acquired the hobby of collecting antiques, although he remembers some well placed applauses to his bottom side when he had carelessly handled family heirlooms. It may have been such carelessness that made the hobby a belated one on the part of his mother. Now it is with some misgivings that Murmurs returns to the scene of his childhood taking along three robust active Murmurettes. Mother is forewarned and forearmed. Cupboards are locked and other breakables are placed beyond the reach or grasp of inquisitive and exploring youngsters.

If Murmurs ever takes to collecting rare dishes, it will not be until he is past the age of having grandchildren coming home to visit.

RETURNS FROM SUMMER CAMP

Mrs. Dan Urschel and Charles returned from upper Wisconsin on Monday, where the latter has spent two months in a Y. M. C. A. camp. Mrs. Urschel's parents, Mr. and Mrs. P. A. Williams of Muncie, accompanied them on the trip.

The boys at Charles' camp do a great deal of canoe tripping during the summer, so Charles has persuaded his father to attempt a week's trip in the

Canadian border lakes, north of Duluth. Inasmuch as Charles wore out his dad on a two day's similar trip last year, there would appear to be some question about the duration of this effort.

Dr. Urschel's secretary wonders if, inasmuch as the editor of this paper is also a canoe enthusiast, it might be more sensible if he and Dr. Urschel went on a trip together, and allowed their younger and definitely more vigorous sons to do most of the work.

"Beneficiaries and workers who may be covered under the new proposed Social Security Act are asked not to contact the field office at the present time, because of the large number of people who will find it necessary to call at the field office for other reasons," Gerald O. Kelter, Manager of the Elkhart Social Security Field Office asked today.

"Those employees and employers who will be covered by the new proposed act are requested to obtain their applications for Social Security numbers from their local post offices, and to mail the applications to the Social Security Field Office.

"Beneficiaries who are already receiving payments under the present Old-age and Survivors Insurance Program of the Social Security Act are urged not to contact the field office regarding an increase in their benefits, since the increase in benefits will be automatic, and will be sent to them by the Treasury Department for the first month the new provisions of the amendments to the Social Security Act become effective.

"If additional information is received regarding the new proposed law, readers will be advised of the provisions in the law through the press and radio. Mr. Kelter estimated that approximately 5,000 self-employed persons in this area would be covered by the proposed law, and that approximately 2,000 persons would be entitled to benefits, who previously were not able to meet the eligibility requirements under the present law.

MERRY MENTONETTE'S

ACHIEVEMENT DAY

Wednesday, August 2, the Merry Mentonettes and their friends met in the Methodist church social rooms for their Achievement Day. Mrs. Frank Leslie and Mrs. Giles Huffer judged the entries, and Mrs. Bill Summe and Suzanne Knoop judged the record books. The list of placings is not available to this reporter at this time, but ribbons will be mailed to their recipients in the near future.

Joyce Eller, of the Palestine club, demonstrated a "Wacky Cake." This was a very unusual cake, and Joyce gave samples, which were very tasty.

Mrs. Snellenberger gave a short talk before refreshments were served by members of Mentone's three home economics clubs, Merry Mollies, Jolly Janes and Mentone Home Ec.

Thursday morning at six o'clock, 36 members of the club met at the school house and boarded a bus driven by Mr. Dale Kelley. The group arrived at the Brookfield Zoo (Chicago) about 10:00 a. m., and immediately ate the picnic lunch brought from home. They had until 2:30 p. m. to see the sights of the zoo.

They left the zoo and drove to the Chicago Municipal airport, where they spent about an hour watching the activities of this busy place.

After supper in Dyer, Indiana, the group continued home, arriving in Mentone, tired but happy, at 8:30. This trip was given as an award for finishing a 4-H project by the Mentone Lions Club. Thanks, Lions! Also, thanks to the three home economics clubs mentioned above, for the treat enroute.

Accompanying the group were Mrs. Ira Moore, leader, Mrs. Robert Parker, Mrs. Lamar Anderson, Mrs. Marvin Romine, Mrs. Darrel Coplen, and Mrs. Harold Utter.

Members of the club who went were: Mike Boggs, Dickie and Ronnie Moore, Jackie Smythe, Timmy Utter, Ronnie Severns, Irvin Ferverda, Larry Joe Montel, Patty Parker, Lucy Coplen, Madeline and Joyce Anderson, Sue Borton, Sue Blackburn, Sue Shoemaker, June Romine, Janet Romine, Donna Lou Eaton, Beverly, Shirley and Donna Horn, Linda Horn, Elaine Goodman, Janet Reed, Sandra Witham, Lois D. Widen, Barbara and Luann Long, Mary Ellen Bryan, Betty Griffiths, Elinor Rush, Elaine Dunnuck, Leah Nell Lemler, Marita Tucker, Beverly Tinkly and Dorothy Christian.

Mr. and Mrs. George Borton and son Larry, of Huntington, spent Sunday with Mrs. Mae Borton and Mrs. Martha Welch.

Mrs. Samantha Norris, who has been confined to her home, on account of illness, is improving.

Mr. and Mrs. Stanley Newton and family spent the weekend at the home of Mr. and Mrs. Howard Newton and family of Hammond.

Mr. and Mrs. Noble Oyler and family and Jon Cullum spent last week at Goose Lake.

VETERANS WARNED TO COMPLETE BONUS PAPERS

The Korean situation has caused complexities in more than one governmental agency. The Bonus Division of the Indiana Department of Veterans' Affairs is prepared for its share of trouble, also, it has been announced by Orville P. Bray, Administrator of the Indiana World War II Bonus. Many of the veterans who are volunteering and receiving embarkation orders with reserve units have neglected to file for their bonus. This is the situation that the Bonus Division has feared since the outbreak of hostilities in Korea. If these veterans are given overseas assignments without having filed, the necessary delay in their correspondence with relatives and dependents to get their papers in order, might well cause them to lose their bonus by default since the deadline is only five months away. We of the Bonus Division would like to urge all veterans, their dependents and friends, to place special emphasis on filing for their bonus.

The Chicken of Tomorrow

TODAY

THE MASTER MIX WAY

5 lb. broilers in 12 weeks!

You too can have the chicken of tomorrow, today—the Master Mix Feeding Way. Verne Steckley, Kendallville, Indiana hatcheryman, winner of the 1950 Indiana Chicken of Tomorrow contest reports:

"I was one of 49 entries with my Steckley's Cornish—New Hampshire cross chickens," says Mr. Steckley. "The fifteen cockerels which were entered in the contest were finished off in eleven weeks and five days at an average weight of 5.1 pounds and 4.7 pounds New York dressed. I did not baby my chicks, they were raised with 150 others. Out of the 100 chicks I started, 96 lived and they consumed only 3.3 pounds of feed per pound gain. I fed my own brand Stecco Broiler Mash Special, made with Master Mix Broiler Concentrate."

"My advice to broiler raisers, feed Master Mix Broiler Mash or your dealer's own brand Broiler Mash made with Master Mix Broiler Concentrate."

FISH OF INDIANA

BLACK CRAPPIE
(Calico Bass)

DESCRIPTION: Although this fish is very similar to the White Crappie, a comparison of the following outstanding characters with those of the same species should enable one to distinguish one from the other without any difficulty. The Black Crappie normally has seven dorsal spines, occasionally eight, but rarely six. The dark markings on the body are not arranged to form dark vertical bands, but have an irregular mottled appearance suggesting printed calico. Body is much deeper in comparison to its length than is the White Crappie. The mottling is much sharper and presents a very dark appearance.

DISTRIBUTION: Found mostly in northern Indiana in deeper and colder lakes.

HABITAT: Is common only in lakes and the more sluggish streams. Prefers cold deep water, a fairly clean bottom and considerable amount of vegetation.

FOOD: Aquatic insects, worms and other fish.

STOCKING: Mostly new impoundments.

SPAWNING—PROPAGATION: Very similar to other sunfish. Simple to propagate in small hatchery ponds.

SEASON: At present a year round open season. This set by the Director of the Indiana Department of Conservation by Discretionary Order. Keepers, five inches.

BAG LIMIT: Twenty-five or twenty-five in aggregate with other pan fish.

PRISON SENTENCES
FOR JEWEL THIEVES

A little excitement was added to the regular routine of affairs in Mentone about 4:30 last Friday afternoon when it became known that two men had just stolen two trays of diamond rings at the Baker & Brown Jewelry Store.

Mrs. Arthur Brown, wife of one of the proprietors, was the only one on duty in the store, when two men entered. One was interested in a wrist watch band, and after some time, decided upon one and made the purchase. One of the men then wanted a drop cord and he and Mrs. Brown went out into the appliance part of the store, the second man remaining in the jewelry department. When this purchase was completed, both men left the store and headed west on Main street. Shortly Mrs. Brown noticed the rings were missing and started in search of the strangers.

The men had parked their auto at the Sinclair station where the tank was filled with gas, so a description of the car was available from the station men. The theft was reported to the state police, and they apprehended the men in record time. In much less than two hours the car was spotted at the intersection of roads 1 and 224, five miles north of Bluffton. The rings were in the automobile, along with several automatic toasters, an electric hand saw, new irons and fishing equipment, which the men later admitted stealing in Ohio.

Monday afternoon the two men, Wm. Dance, 30, of Cincinnati, Ohio, and James Bridewell, 30, of Newport, Ky., each received sentences of one to ten years at the Indiana State Prison at Michigan City, after confessing to the theft of the rings, valued at nearly \$3,000.00. They were sentenced by Everett Rasor, judge pro tem during the vacation of Judge John A. Sloane.

FIREMEN'S CELEBRATION
HERE SATURDAY NIGHT

The members of the Mentone Fire Department are busy this week getting everything ready for the big event to be held this Saturday night, August 19. There will be a parade, which will include all present fire equipment, in addition to bands, color guards, etc.

An eight-year-old child prodigy will entertain with her piano playing, and a regular Jonah Club style fish dinner will be ready and waiting for everyone that has an appetite big enough to stow away as much fish as the boys will put out to you. The only charge to be made, according to our information, is for the fish supper, so you should be able to spend an enjoyable evening here Saturday night without ruining a whole week's pay check.

MURMURS

by
DAVID and SALLY GOSSER

"Will there be any stars, any stars in my crown-?", which many folks have heard sung through the years, will be on the tongues of many more who are less familiar with it, but who have recently been made aware of it by the movie, "Stars in My Crown." Not all of us will agree with the theology of the song, but most of us will

admit that it lends itself well to good singing. This is in the list of songs which Murmurs' mother taught him, along with "O That Will Be Glory For Me," "Face to Face," and "The King's Business."

Many times when the lessons that we learned in our childhood are forgotten or laid aside, there creep thru the time-hardened consciousness of our minds the words and melodies we heard our mothers sing across kitchen sinks and hot coal ranges while they canned and preserved for hard winters the produce of the gardens. It may be that we recall those too few sacred

occasions when the families gathered around the reed organs or pianos to sing the familiar hymns of our faiths. There were no radios and television sets to blur the attempts we made at music, and we sang because it gave us a lift from the labors of the day. Toil-encrusted hands struck wrong notes and frequently missed the time, but our hearts and voices were lifted beyond the realm of mistakes.

Murmurs would be among the last to object to progress, but he admits that there are times that our radios and television sets become actual stumbling blocks to the development

of mind, soul, and talent. They may, on occasions, be instruments of inspiration, but like the folks who claim they can worship as well away from church on Sundays, they never are, or seldom are.

The theology of Protestant America has been molded more by the songs that have been used in the services than by the Bible and the sermons. Every great revival preacher has had an outstanding song leader, without which, the work would be less successful. Moody had Sanky, and Billy Sunday had Rodeheaver.

The sium mission posts and the Salvation Army attract the derelicts of human society through the music that is sung and played, for this encourages a reminiscence of better days, an awareness of unrealized dreams, lost ideals, and forgotten promises. These plow-points of music break the ground for the planting of the SEED.

Singing churches are living churches, and a singing heart will keep alive through adversity a soul and mind beset with cares and tribulation. The hymns of your faith may serve you well in these days of uncertainty. Sing them often. Hum them at work and at play, and, like the concluding scene of "One Foot in Heaven," they shall lead you out into the sunlight of hope.

LIBRARY NEWS

We are coming to the season of the year when most people find time occasionally to read a good book and your librarian has been busy selecting varied and worthwhile books for every need. We have two new books with a great many beautiful colored illustrations on home decorating: one, put out this year by the "Homes and Gardens" magazine, pictures the work of the top decorators of the country. Another book "See America, put out by "Look" magazine, has large pictures of the things most worth seeing in America and we have two good books on the parks of America. A new book, "Sunset Crafts", describes easy to learn hobbies for those who are past the strenuous years and have enough free time to develop a worthwhile hobby. The book on trapping will interest many boys and "Sketching out dooors", and "Conversational drawing" should appeal to all who like to draw. We also have two good books on oil painting.

In fiction, we have several new Westerns. In heavier fiction, we have the "Way West", the story of those pioneers who followed the Oregon trail in caravans, many years ago. This book is written by Guthrie author of "Big Sky". In non-fiction, we recommend "Elephant Bill", a fascinating book describing the huge elephants used in the teak industry in Burma, and "The San Quentin Story", written by Warden Duffy who made so many improvements in prison management while he was warden at San Quentin.

While you are in the library, look over the new card catalog which is growing and becoming accordingly more interesting and useful. Our library was one of the few in the state which was not cataloged but we are correcting that as rapidly as possible. There are 7,000 books in the library, each of which must be studied, classified, and an accurate technical description written of the book. Then from 4 to 8 cards are typed for each book and put in the card catalog so that any patron of the library, by using the card catalog, may locate the book either by author, title, or by any of the main interests treated by that book. Between 30,000 and 50,000 cards must be typed and put in the catalog file to bring the catalog up to date and 500 to 800 cards must be made each month for the new books purchased. A good card catalog increases the usefulness of a library very much.

Stop in and get acquainted with your library. It is here to serve you.

Protect Machinery

If you protect your machinery you may be protecting your life. Many accidents are caused each year by machinery that has not been kept in good condition. All machinery and even hand tools should be thoroughly lubricated and make-shift repairs avoided.

NOTICE TO TAXPAYERS OF ADDITIONAL APPROPRIATIONS

Notice is hereby given the taxpayers of Franklin Township, Kosciusko County, Indiana, that the proper legal officers of said municipality at their regular meeting place, on the 29th day of August, 1950, will consider the following additional appropriations which said officers consider necessary to meet the extraordinary emergency existing at this time.

Special School:	
Fund 15 School supplies	\$ 200.00
Fund 18 Insurance	200.00
Fund 17 Fuel	300.00
Fund 14 Equipment	300.00

Total \$1,000.00

Taxpayers appearing at such meeting shall have a right to be heard thereon. The additional appropriation as finally made will be automatically

referred to the State Board of Tax Commissioners, which Board will hold a further hearing within fifteen days at the County Auditor's office of Kosciusko County, Indiana, or at such other place as may be designated. At such hearing, taxpayers objecting to any of such additional appropriations may be heard and interested taxpayers may inquire of the County Auditor when and where such hearing will be held.

Spring Burning

Spring burning does not control weeds. Weed seeds already are in the soil and burning makes an ideal seedbed for the weed crop.

Autumn Leaves

Little Jack Frost might as well get lost, for the vivid red and yellow autumn leaves are those colors all the time. Hidden by the great amount of green chlorophyll that is in leaves during the productive summer months, the brighter colors are disclosed when the chlorophyll is used up.

Lamb Crop

The early lamb crop is estimated to be 2 per cent larger than that of last year. If an increase is shown, it will be the first time in nine years.

"KIDNAPPING" WILDLIFE IS WRONG AND EXPENSIVE

Illegal possession of a fawn, which he kept on a chain in his back yard, proved costly to Leroy Watson, Indianapolis.

In a magistrate's court in this city he was fined a total of \$60.

The animal, which according to Captain Charles White and Conservation Officer Richard Pattman was about three months old, had grown so accustomed to human beings that it was as tame as a kitten.

Capt. White and Officer Pattman brought the tiny animal to the Conservation Building where it made the rounds of the different divisions, evincing no fear and accepting all hand-outs in the form of candy and peanuts.

It caused a minor traffic jam in West Washington Street when the officers were placing it in their car for the trip to Brown County State Park where, after it is reared to maturity, it will be returned to its native habitat. Children ganged up on the officers in attempting to pet the animal which seemed to enjoy the excitement it was creating.

Watson told the arresting officers that he obtained the fawn in Brown County sometime ago and brought it to his home in Indianapolis where he raised it on a bottle and kept it as a pet.

The Division of Fish and Game urges people not to pick up birds or animals which appear to be lost. Usually the mother is close by and witnesses with terrified eyes the unwitting "kidnaping" of her offspring. The mother knows far more about caring for her young than does mankind. Just leave wildlife alone in their native habitat, urges the Fish and Game Division. They will be better off than they will be in your home. Anyway such procedure is a violation of game laws and punishable by fine.

FIRE AT MEREDITH HOME

As evidenced at the Frank Meredith farm home Tuesday morning, one can never tell when, why or where a fire will start. This time an automatic washer started burning and smoking, causing considerable damage to the interior of the home even though the flames were under control by the time the Mentone fire department arrived.

PSI IOTA XI MEETS

Thirteen members and one guest, Mrs. Evans of Ames, Iowa, met for a social evening at the home of Mrs. Mervin Jones. Bridge was played with Mrs. Max Nellans winning first prize and Mrs. Maude Snyder, second prize. The door prize went to Mrs. Lyman Mollenhour.

Delicious refreshments were served by the hostess at the close of an enjoyable evening.

Broiling Temperatures

To get variations in broiling temperatures in an electric range leave the oven door partly open. This trick also keeps the heating unit on and prevents possible smoking. Or you can place the broiler pan at different distances from the heating element to vary the temperature.

Prepare to Fight Pests

Farmers can expect to face the usual hordes of insects and many destructive diseases on their crops this year. Entomologists and plant pathologists say that proper control with recommended insecticides and fungicides will protect these crops.

New York's Schools
New York state's educational system is one of the most comprehensive and progressive in the world. The state's common schools date back to the early days of the New Netherland, when a public school was established in 1638 in New York City.

Water Meters

Since water meters were universally installed in Los Angeles, the amount of water consumed per person has dropped from 280 to 132 gallons a day. Engineers point out that the 128 gallon daily drop represented waste and leakage.

The Chicken of Tomorrow

TODAY

THE MASTER MIX WAY

5 lb. broilers in 12 weeks!

You too can have the chicken of tomorrow, today—the Master Mix Feeding Way. Verne Steckley, Kendallville, Indiana hatcheryman, winner of the 1950 Indiana Chicken of Tomorrow contest reports:

"I was one of 49 entries with my Steckley's Cornish—New Hampshire cross chickens," says Mr. Steckley. "The fifteen cockerels which were entered in the contest were finished off in eleven weeks and five days at an average weight of 5.1 pounds and 4.7 pounds New York dressed. I did not baby my chicks, they were raised with 150 others. Out of the 100 chicks I started, 96 lived and they consumed only 3.3 pounds of feed per pound gain. I fed my own brand Stecco Broiler Mash Special, made with Master Mix Broiler Concentrate."

"My advice to broiler raisers, feed Master Mix Broiler Mash or your dealer's own brand Broiler Mash made with Master Mix Broiler Concentrate."

ATOMIC ENERGY EXHIBIT AT INDIANA STATE FAIR

The task of assembling the huge atomic energy exhibit for the 1950 Indiana State Fair will get under way next Friday (August 18) with David Lloyd DeJarnette, curator of the American Museum of Atomic Energy at Oak Ridge, Tenn., in charge of the operation.

Some of the heavy construction work is being done here. Purdue University and the Indiana University Medical Center also are preparing exhibits of their own to illustrate the research work they are doing in the field of atomic energy. But most of the exhibits will be assembled here after being brought direct from Oak Ridge on three of the largest type truck-semi-trailers available.

The entire exhibit will be open to State Fair visitors daily, from 9 a. m. to 9 p. m. (central standard time), without charge.

"Whether or not we understand atomic energy," says Mr. DeJarnette, "It will affect the lives of all of us and everyone should make an effort to grasp its possibilities."

Indiana University's part of the exhibit will show how the medical center uses the radiosotopes from Oak Ridge for research and treatment. Purdue will show their value in obtaining the maximum benefit from the use of fertilizer. And many of the Oak Ridge exhibits will illustrate the growing importance of atomic energy in various types of industry.

Arthur W. Vicinus and wife and two sons of Plainville, Conn. and Ancil Johnson of Warsaw and Mrs. Joe Johnson of Mentone spent Friday at the Clyde Johnson home.

Mrs. Arthur Brown, Mrs. Annabelle Rathfon, and Mrs. Madeline Bybee called on Mrs. Joe Boggs on Sunday afternoon.

Mr. and Mrs. Earl Shinn, Mr. and Mrs. Jack Shinn and Kathy spent Sunday at Gary visiting Mrs. Jack Shinn's parents, Mr. and Mrs. William Carew. They also attended the Chicago Fair.

Mr. and Mrs. Kenneth Shoemaker attended the wedding of Miss Pat Brock and Mr. Howard Shoemaker at Warsaw on Saturday evening.

This Is
Your Paper
What Is
A Newspaper?

By William R. Nelson

EVERY AMERICAN old enough to read is familiar with the home town newspaper. Yet, how much do the readers know about it? How well do they understand its problems and actions; its place in their lives, in the community, state and nation? Just what is a home town newspaper?

Dictionaries have varied definitions of "newspaper," but none contains the full meaning of the word. Even journalism's "Hall of Fame" editors have given widely differing definitions of what we in the United States call newspapers.

A home town newspaper, such as this one, is so many things, all of

them important, that it cannot be defined in a few words. It is similar to but still unlike every other business, profession, and institution in this community. Yet its services are so numerous and varied that it is a vital part of all of the others. And more, too.

The local newspaper is a mirror of its community; a clearing house for ideas; a library of local information; a market place; a sentry constantly watching over civic and official affairs; and a partnership in which the owners the advertisers, the readers and the community all have interests. In addition, it is a manufacturing plant for production of printed matter.

Unlike a foodstore, it cannot feed its community's people. But its advertising columns can nurture the food store.

It cannot render banking service, but newspapers have been banks' best protection against the damage misinformation or misguided interference might cause.

This newspaper does not practice medicine, but it can play a

vital part in preventing disease or the spread of epidemics. It is not a lawyer or a court, but it can prevent or correct injustice.

Neither the publisher, the editor, nor the other members of the paper's staff will claim superior status in the community. They admit only that the paper tries to do its job. But to the outsider, whether President of the United States or traveling salesman, when the mood and measure of this community is desired, the place to go for the information is the office of the home town newspaper.

FIREMEN BATTLE RAIN

The saying "It rained cats and dogs" would not be appropriate for the interference and inconvenience the inclement weather caused the firemen on Saturday night, but for those who worked "back-stage" it would sound like "It rained fish and more fish." Two hundred and eighty pounds of them were breaded and fried Jonah style to serve the five hundred and fifty patrons who thronged the street to eat their fill of the best fried fish in the whole midwest.

When the rain interrupted the festivity, the Frank Manufacturing Company opened their doors to let the firemen and patrons continue with the supper. The fourteen unit parade which was to be headed by the American Legion Color Guard was, however, hampered and hindered in the spectacular showing which had been so well planned for the evening. Mr. Chester Manwaring was pressed into service to voice the regrets for the Mentone Volunteer Fire Company that the program had been interrupted and hampered by the unexpected precipitation. He voiced for all of us, too, the sense of appreciation which we as citizens of the community should feel towards these men who at all hours and in all kinds of weather endanger their lives for the sake of our property and, in some instances, our lives.

The Street Fair and Fish Supper was sponsored by the firemen to purchase much-needed equipment that will make their work in the community more efficient. They appreciate the part that all patrons had in making the supper a success; and a special feeling of gratitude is theirs for all the help that was given them by every person who had a part in the program, from the planning of it to the moment when every scrap of paper was cleaned up.

A word concerning the program must include the praise and admiration the audience had and still retains for Miss Robin Howard, the eight year old pianist who performed so remarkably against the back-drop of passing traffic and playful children's voices. The variety of numbers she played exhibited her unusual skill of technique and memory. Those in the audience who have learned through painful hours of practice and exercises to play the easy piano numbers can appreciate this unusual talent of a "child-wonder."

TEEL - EIZINGER

The bride is the daughter of Mr. and Mrs. Orville Eizinger of R. R. 2, Bourbon, and Mr. Teel is the son of Mr. and Mrs. Clem Teel.

Baskets of gladioli, a lighted cross and lighted tapers in candelabra formed the altar decorations. During the ceremony Mrs. David Gosser played traditional wedding music including the hymn, "O Perfect Love."

A street length dress of white embroidered organdy worn by the bride was matched by her picture hat. She wore a corsage of pink and white gladioli.

Mrs. L. N. Cummings of Rochester, who attended the bride, wore a blue and white print dress and a shoulder corsage. Mr. Cummings attended the bridegroom.

FARMER'S DAY PARADE AT STATE FAIR TO BE LARGEST EVER

With more than 80 of Indiana's 92 counties likely to be represented, the annual Farmer's Day Parade at the 1950 Indiana State Fair on September 7 is shaping up as the biggest event of its kind in history.

This annual attraction, established in 1939, has become a traditional highlight of Hoosierland's gigantic agricultural exposition and Lieutenant Governor John A. Watkins again will act as master of ceremonies.

Twenty-five floats, 15 bands and the personal pets of more than 40 youngsters already have been entered according to Warren O'Hara, secretary of the committee in charge of the event, and many more entries are expected. The parade is not scheduled until the next-to-last day of the Fair, which opens this year on August 31, and additional entries will be accepted until the procession actually gets under way.

Cash prizes amounting to \$1,000 will be divided among the prize winning participants of the Float, Band and Pet divisions. Entries in the float division will emphasize the theme of "Greater Indiana Agriculture" and they will be judged primarily on how effectively they symbolize Indiana farm life and its products. Entered in the Float Division will be county units of the Indiana Farm Bureau, Rural Youth Clubs, and 4-H Clubs in addition to the Agriculture Department of Indiana and some commercial floats.

Youth organization bands from throughout the state have been selected to represent farm groups in their respective areas and they will be judged on the basis of marching ability and musicianship. Entries in the Pet Division are restricted to farm children under 10 years of age and their pets. The Hobby Division, a feature of last year's parade, has been eliminated from this year's program.

The parade invariably attracts one of the largest crowds assembled at any one time during the Fair, with the grandstand packed to capacity and thousands of other spectators lining both rails of the race track. The line of march will be from the assembly point near the northwest corner of the track, down the straight-away in front of the reviewing platform and around the east turn of the track. The parade will start at 9 a. m. (CST).

DU PONT SPRAY GLAZE IS AN ENTIRELY NEW PROCESS

- ✓ It's new! It's different! It's Du Pont Spray Glaze—the most significant development in car care in years.
- ✓ Du Pont Spray Glaze is applied to your car by a new, faster method—with a spray gun under high pressure to penetrate every crevice and fill every pore in the finish. It gives your car a smoother, glossier coating than ordinary waxes or polishes.
- ✓ Du Pont Spray Glaze is not a paint nor a lacquer. It is a transparent material that brings out the beauty of your car finish and protects the paint with a hard, durable glaze.

The Spray Glaze process includes:

1. Washing the finish with Du Pont Car Wash.
2. Pre-cleaning with a special Du Pont Spray Glaze Cleaner.
3. Applying Spray Glaze.

Shines brighter — lasts longer — costs you no more.

William Shakespeare

We know a lot about the work of William Shakespeare, regarded by many as the greatest literary genius the world has ever known, but there is a good deal we don't know about the man. There is no record of his birthdate, no definite knowledge of boyhood, no record of the "lost years" 1584 to 1592, and no portrait than can be regarded as an authentic likeness.

Whaling Grounds

Today the Antarctic waters south of 40 degrees south latitude are the world's last whaling ground of major commercial importance. In an effort to conserve the remaining whale stocks, international treaty regulates both the fishing season and annual catch there.

FISH OF INDIANA

WHITE CRAPPIE

DESCRIPTION: The sunfish like shape, large anal and dorsal fins of equal size and the six or seven spines make this fish different from all other Indiana species with the exception of the Black Crappie. The White Crappie has six, sometimes five, but rarely seven dorsal spines. The dark markings on the body are so arranged as to form vertical bands. It has a longer and less deep body than the Black Crappie. Through comparison of these characters the fisherman should have no difficulty in identifying a Black or White Crappie.

DISTRIBUTION: Common throughout the State.

HABITAT: Found in most all of the larger streams and in the sluggish waters of ponds and lagoons.

FOOD: Chiefly carnivorous. Lives on worms, crayfish and other fish.

STOCKING: This is one species that needs little help from man. Most stocking is done, however, in new impoundments.

SPAWNING - PROPAGATION: The spawning habits are very similar to those of other sunfishes. Can be propagated in large numbers in hatchery ponds.

SEASON: At present a year round open season. This is set by the Director of the Indiana Department of Conservation by Discretionary Order. Keepers, five inches.

BAG LIMIT: Twenty-five or twenty-five in aggregate with other pan fish.

FORTY-ONE HEAD OF PUREBRED HOLSTEIN CATTLE

The milking herd consists of 19 cows that run in age from 2 to 7 years old. 5 of them have been fresh in the last 2 months and balance have been averaging 2 cows per month in freshening.

Herd was started in 1917 with foundation cows from the Kline and Shilling herd of Culver and none but the best of Sires and high producing dams kept in building the herd. 5 heifers were kept out of this mating each year.

We have never been bothered with Mastitis or Abortion although we have never blood tested, but have everything vaccinated in the herd of 4 years or less. Cows are of the large type, well colored kind with nice udders and quarters, best of dispositions and not a bad quarter or udder in the herd.

TO MOTHERS OF LITTLE GALS FROM 5 TO HIGH SCHOOL AGE-

How does your daughter grow? With naturally curly hair? If so, we'll cut her hair in a style that will be trim and tantilizing. If not, we'll cut her hair to a perky length and give her a baby-soft permanent wave. No more putting it up every night or after every rainstorm. This plan is not only helpful to you, but good for your child. Most little girls are coquettes at heart. We'll wager a child who looks pretty as she can will be smart as she can - and happier - in school.

LIBRARY NEWS

New Books

We have a very good collection of books on child training for parents and teachers, including "Opening the Door for God", by Herman Sweet, "Let's Talk About Children", by Elizabeth Bradford "Our Movie Made Children", by Chittenden and "How to Help Your Child Grow Up" by Angelo Patri.

Are the democracies unknowingly traveling the totalitarian road? In answer to that familiar question, we have the book, "The Road to Serfdom", by Friedrich Hayek, a world-famous economist of Austrian birth, now a British

citizen, who is well qualified to write on this subject.

For the thoughtful reader we also have two very worthwhile books: "A Guide to Confident Living", by Norman Peale and "The Mature Mind", by H. A. Overstreet. These two books help the reader to evaluate himself and point out definite ways in which we may develop maturity both in ourselves and in children.

For those readers interested in other countries, we have three very good books. "My Indian Family", describes the experience of an English woman whose daughter married a Prince from India. "Land of the Good Shadows",

written by an Eskimo woman now living in Indianapolis, gives an unforgettable picture of life in Alaska. "Bride in the Solomons", by Osa Johnson tells Mrs. Johnson's experience with the headhunters of Africa.

We have some very fine fiction. "Root Out of Dry Ground", and "This, My Brother" by Argye Briggs and "The Enduring Hills", by Janice Giles picture the lives of the people living in the remotest sections of our country. "Never Dies the Dream", by Margaret Landon is a fine story of a missionary's unselfish life in Siam. Margaret Landon is the author of "King of Siam".

Two books which have made very popular movies are: "Father of the Bride", by Edward Streeter and "Stars in My Crown", by Joe Brown.

When you have some problem to solve ask your librarian to look in the Library Pamphlet file for material to help you. There will be found information on many subjects such as the

following: Care of rabbits, Hog feeding, Diseases in cattle, United Nations, Information on State Police and traffic rules and many other subjects. This file contains over 4,000 pamphlets and clippings, all assembled during the last two years and contains up to date useful information on many subjects. It may be useful to you.

BIRTHDAY GATHERING

MRS. ROBERT NOTTINGHAM

CANADIAN ENTRY RECORDS CONTINUE TO BE BROKEN

Records for entry of American motorists into Canada continue to be broken.

The touring bureau of the Chicago Motor Club reports that the volume of traffic entering Canada from the United States during the first 6 months of 1950 was more than three per cent heavier than for the same period last year. Traveler's vehicle permits issued

during the first half of 1950 totaled 592,369. The six-month figure for 1949, the previous record year was 573,076. In 1948 permits numbered 503,960 for the same period.

Number one reason for this continued upsurge in auto travel over our northern boundary is easy to find: more people are vacationing in automobiles. According to a recent estimate 85 per cent of vacationing Americans are now using an automobile.

The ease and informality of Canadian border procedure also attract many who would refuse to face the red tape of the usual international boundary.

Necessary formalities take but a few minutes. Permanent residents of the United States do not need passports when entering Canada as tourists, but they are advised to carry identification papers. A tourist need pay no fees of any kind on his automobile, and his state license is valid for a lengthy period in every province in Canada.

Special customs regulations apply to travel on the Alaska Highway.

drop of untreated water magnified 400 times through a spectocom where it is visible to ten people at once.

A mobile chlorinator, which is one of the units used by the Board of Health for emergency purposes for water supply breakdowns, will also be exhibited, according to Bird Baldwin, who is in the charge of visual aids for the State Board of Health.

Proctor Puppets, of Springfield, Ohio, will again be featured with their hand puppets of the Punch and Judy type. Mr. and Mrs. Proctor who travel over the country with their puppets come to Indiana direct from the Iowa State Fair. This is not the first appearance of this popular feature at the State Fair as for over five years they have been an added attraction to the Board of Health exhibits, drawing large crowds with their health shows.

Blood typing will be demonstrated by the Indiana State Society of Medical Technologists as an added feature this year in the exhibits of allied organizations at the Board of Health building. Other features by these twelve exhibitors will be the taking of blood pressure, school lunches, nursing, polio, cancer, crippled children, heart, tuberculosis, dietetics, pharmaceuticals and mental hygiene.

The Chicken of Tomorrow

TODAY

THE MASTER MIX WAY

5 lb. broilers in 12 weeks!

You too can have the chicken of tomorrow, today—the Master Mix Feeding Way. Verne Steckley, Kendallville, Indiana hatcheryman, winner of the 1950 Indiana Chicken of Tomorrow contest reports:

"I was one of 49 entries with my Steckley's Cornish—New Hampshire cross chickens," says Mr. Steckley. "The fifteen cockerels which were entered in the contest were finished off in eleven weeks and five days at an average weight of 5.1 pounds and 4.7 pounds New York dressed. I did not baby my chicks, they were raised with 150 others. Out of the 100 chicks I started, 96 lived and they consumed only 3.3 pounds of feed per pound gain. I fed my own brand Stecco Broiler Mash Special, made with Master Mix Broiler Concentrate."

"My advice to broiler raisers, feed Master Mix Broiler Mash or your dealer's own brand Broiler Mash made with Master Mix Broiler Concentrate."

LIBRARY NEWS

School is about to start and the Library staff as well as the teachers are very busy making preparations. We will continue our weekly story hour for pre-school and first grade children as usual at 1 p. m. each Monday with volunteer story tellers. Please let us know if you would like to help with the story hour. The volunteers have been doing a wonderful piece of work and the children look forward anxiously each week toward that time. This is one of our methods of arousing the children's interest in good books.

Another method is the Library Unit plan. Each Scott Foresman Reader has a list of library books for each section or unit studied, which fit in with the lessons the children are studying. We study each reader, order those books and supply the teachers with the proper books as they are ready for each unit. The teacher then uses the books in presenting the lessons to the pupils as outlined by Scott Foresman. Afterward, the books are put on a study table for all the children to see and use. They afford very fine informational and inspirational material. We have purchased 800 of these books for all grades many of them non-fiction, at an average cost of about \$1.50 per book. We shall continue as our funds permit and as we are able to locate the books needed, hoping eventually to have most of the books listed.

Both Beaver Dam and Mentone Schools are served by the Mentone Li-

brary. The pupils come as a grade with their teacher to have their unit books described and presented, to hear a book talk on worthwhile books and to select books to take home for individual reading. The first grade at Mentone comes once a week for their story hour. The second, third, fourth and fifth grades at Mentone come every two weeks. Beaver Dam School brings about three grades per week, each child visiting the Library once each month. We also furnish the primary teachers with mounted pictures to correspond with each unit they are studying. There are about 500 pictures in the Library picture file, which we have cut out of old magazines. Many of them have been mounted on cardboard. We welcome any pictures you care to give us. We also read geographies and supply books pictures and magazine articles on the various countries to the teachers as needed.

For the high school literature classes we set up trucks of books for outside reading as the lists of required books are given us by the teachers. We especially commend our collections of Bible stories and our books on Crafts and Hobbies as each department is now well built up. Please encourage and help your child to make intelligent use of the library. It is his right and privilege and will help him to acquire a well rounded education. We are here to serve the children, in every way possible. Mrs. Earl Anderson is helping, part time, in the library this winter and will give one of the book talks each week. We know the children will be delighted to know this as they surely did

enjoy the reviews Iris gave last year.

NEW BOOKS

Amelia Hill's new book on complete table setting includes service, table etiquette and flower arrangement. The book is well illustrated. We have a book published by "Popular Mechanics" on interior painting and furniture finishing and repairing.

In fiction we have "Flood Tide" a new book by Frank Yerby. "Pocketful of Feathers" by Madeleine Myers is an example of a fine career fiction book for teen-age girls. The "Iron Doctor", by Agnes Hewes is the thrilling story of a young diver and his adventures while working on the foundations of the great San Francisco bridge.

Mrs. Melvin Cain is a medical patient at the Luthern Hospital at Ft. Wayne.

SIGNS OF THE TIMES

The multi-million dollar atomic energy show, featuring such things as radio active frogs and Uranium 235 is certain to garner honors as the chief scientific exhibit at the 1950 Indiana State Fair. Eighty-one years ago, however, in 1869, the Scientific Instruments Section was carrying such objects as portable gas works in operation, valuable inventions for artificial light and latest in coal oil lamps as its choice items.

INSIDE BOB HOPE

This is an article written on how I became such a brilliant success.

First I'd like to point out that my family was very poor. Honestly, the mice used to bring stuff to us. I had a deal with them. One piece of cheese for every ten traps I caught and sprung.

I remember one very hard winter. They cut off the lights, the gas, and the water. But we kept the telephone. As dad said, "I don't mind freezing, but we can't afford to miss out if they call us from 'Stop the Music.'"

At nine I visited my first saloon. My uncle wasn't there so in no time I'd been in my second saloon. I finally found him in the sixth saloon trying to sell them a television set. My uncle was always thirty years ahead of his time.

Then when I was eleven we moved into a log cabin outside of Cleveland, Ohio. We had a good home but Dad insisted the log cabin background would help us kids if we ever decided to run for office.

My Uncle helped me a lot with my education. He was a wizard with books. In fact he used to brag it would be a cold day in July before the bank examiners ever caught up with him. He was right. We had a cold day in July. Now I see him on visiting days.

Finally I told my father I wanted to leave home. I'll never forget it. He patted me on the head and told me that I'd go a long ways. And just to make sure he nailed the box car door shut.

I went to Chicago where I got my first break at an amateur night. Ah, that first dollar. I didn't spend it like some fellows would. No sir, I took that first dollar, put it in a little picture frame and wore it on my forehead.

It was about this time that I met Mabel. She told me about Broadway and that I should go. Then one night I met her brother and knew I should.

Then I began to get offers to go to Hollywood. The difficulty was that they all kept coming from people in New York. I decided to take Hollywood by storm.

I boldly told Paramount I was a new genius. They offered me a hundred dollars a week. So I ran around the block twice, came back and told them I was a used genius and they offered me five hundred.

I'll see you at the State Fair and I won't be entering the corn contest - it says here in awfully small print.

GLENN MILLER HONORED

When Tex Beneke and his band provide music for the nationally famous \$50,000 Horse Show at this year's Indiana State Fair, somewhere in the background there is bound to be a trombone on hand oiled and shined, but with no one playing it. The horn belonged to the late Glenn Miller who was lost in World War II, and is a tribute from Tex and the band for the famous Miller musical style they are helping to perpetuate.

The Chicken
of Tomorrow

TODAY

THE MASTER MIX WAY

5 lb. broilers in 12 weeks!

You too can have the chicken of tomorrow, today—the Master Mix Feeding Way. Verne Steckley, Kendallville, Indiana hatcheryman, winner of the 1950 Indiana Chicken of Tomorrow contest reports:

"I was one of 49 entries with my Steckley's Cornish—New Hampshire cross chickens," says Mr. Steckley. "The fifteen cockerels which were entered in the contest were finished off in eleven weeks and five days at an average weight of 5.1 pounds and 4.7 pounds New York dressed. I did not baby my chicks, they were raised with 150 others. Out of the 100 chicks I started, 96 lived and they consumed only 3.3 pounds of feed per pound gain. I fed my own brand Stecco Broiler Mash Special, made with Master Mix Broiler Concentrate."

"My advice to broiler raisers, feed Master Mix Broiler Mash or your dealer's own brand Broiler Mash made with Master Mix Broiler Concentrate."

AMERICAN TRAVEL IN EUROPE CONTINUES

American travel in Europe continues in high gear. The Travel Bureau of the Chicago Motor Club estimates that almost 400,000 Americans will have vacationed there this year.

The Korean war seems to be upsetting very few plans according to the motor club. The few cancellations which have been received on Atlantic air and sea passage have been picked up by others. A recent check showed that flights to Europe are at near capacity, while flights homeward bound are at 60 per cent capacity. Moreover, a new postwar record is being set in shipment of automobiles.

By May 30 of this year, more cars were shipped across for pleasure purposes than during the whole of 1948, the first postwar year that cars were transported as baggage. It is estimated

that 4,500 autos will be sent across in 1950.

The general increase in European travel, brought about by the Holy Year and by the continued postwar rise of interest in travel, is considered the main cause of the large number of automobiles being taken abroad. But the club credits two factors. With recent lifting of rationing in England and the Scandinavian countries, the only Western European countries where gasoline rationing remains are Spain, Germany and Austria. Here, visiting Americans receive special touring allotments.

And car operating costs are down. One can tour Europe on a daily average of five dollars for gasoline and one dollar for overnight garaging. The continent's highways are in good condition; wear and tear costs are kept to a minimum.

FAMILY DINNER

A pot-luck dinner was held last Sunday at the home of Mr. and Mrs. Pete Blue in honor of their son and wife, Mr. and Mrs. Royal Blue, as Royal is entering Bible School at Los Angeles, California this fall. The following were present: Mr. and Mrs. Paul Perkins, Mr. and Mrs. Ralph Baker and children Larry, Johnny and Sally Anne, Mr. and Mrs. Jack Slabaugh and daughters, Joann and Janet, all of Bourbon; Mr. and Mrs. Rex Yazel and daughter, Mary Sharon of Etna Green and James Baker of California and Mr. and Mrs. Royal Blue and son Dennis Royal. The afternoon was spent playing games, visiting and singing hymns. All departed realizing Royal's would be greatly missed by all, but wishing much success in schooling and in their service for the Lord.

HEALTH FACTS FROM YOUR STATE BOARD OF HEALTH

"Is my child ready for school?"

This is a question facing many parents these days so the Indiana State Board of Health has issued a few tips relative to preparing the child for a healthy school year.

Children, especially those entering school for the first time, should be given proper vaccinations and immunizations against diphtheria and smallpox. If the immunizations were given early in life, the child may be ready for a booster dose.

The child's eyes, ears, nose and throat should be checked and recommended defects corrected insofar as possible before the school year opens.

Not only must the child be ready for school but the school must be ready to keep the child healthy. School board members, trustees and other school officials should check the building for readiness for occupancy. Is it clean; have broken windows, desks and seats been properly repaired; are the window shades and floors in good condition the water supply safe; the toilets in good repair and is the heating system working properly.

The question the teacher must answer is "Have I had a complete medical examination during the past six months, including a chest x-ray?"

MEETING TO BE HELD

Maple Leaf Camp No. 2462 R. N. A. will meet in the home of Mrs. Lydia Rynearson at Leesburg Tuesday evening, September 5. Potluck dinner at 6. Please bring table service.

There will be conveyance for all. Cars leaving at 5 p. m.

COUNTRY NEIGHBORS

The Country Neighbors Home Economics Club met at the home of Mrs. William Rathbun. Mrs. LeRoy Norris, president during the business. The devotions were given by Mrs. Charles Shock. Mrs. Martin Notz sang the song of the month "The Loreley", in German and gave the history of this old German legend. Mrs. Clarence Pfeiffer also read the history of this song.

The annual auction was held and bidding ran high on home made bread, country butter, cottage cheese and

lovely cakes and pies. There were hand made articles and things too numerous to mention.

Several mystery gifts were received and several paid into the birthday fund.

Mrs. Allen Herendeen and Mrs. Frank Nellans were in charge of the entertainment. Prizes going to Mrs. John A. Teel, Mrs. Charles Shock and Mrs. Earl Zent.

Delicious refreshments were served to 18 members, two guests and several children. Mrs. Carl Zolman was co-hostess.

Plans are being made for guest day

at the September meeting at the home of Mrs. Ray Maxwell.

Keep It Quiet

Can't keep a secret. Then you need a few lessons from the Chinese, who kept the secret of the silk-making process from foreigners for 3,000 years.

Soil Conservation

Have steep or wet fields in sod, moderately steep or imperfectly drained fields in hay at least half of the time, and use the flatter and better drained fields for intensive crop production.

Poor Lighting

Faulty lighting is believed to be a factor in the figures showing that 95 per cent of all children have normal eyesight when they are born, but that 31 per cent need glasses by the time they reach post-college age.

LIONS CLUB NEWS

The first meeting of the Lions Club following recess of July and August will be held at the school building next Wednesday, September 6, at the regular time. A program which will be of interest to each and every Lion is prepared. Our guest speaker will be Theodore Knox of Larwell who will present character sketches and presentations in costume and dialect. He comes very highly recommended to us. You will not want to miss him and this first meeting of the month.

Rail Expenditures

Class I railroads, according to preliminary estimates, are expected to spend nearly 870 million dollars in capital expenditures for additional new cars and locomotives and for other purposes in 1950, a reduction of almost 31 per cent compared with 1949.

MENTONE MURMURS

by
DAVID and SALLY GOSSER

"Hi! Ho! Come to the Fair". Yes, its Fair time again, and time to loosen the purse strings so the young'ens can ride the ferris wheel, the merry-go-round, and bite at the "barkers" snares.

Grandmother and grand-daughter vie with each other in the pie and cake baking contests. Father and son strive for the awards on stock and grain. The 4-H and Home Economics Clubs display the hand-work of the past year, sewing, baked goods, hand-craft and arts, and home improvements. Farm machinery, domestic equipment and merchandise attract young and old alike. In and out of pavilions and tents pour the throngs who are attracted by the excitement of competition, exhibits, adventure and the thrill of the midway.

Cotton candy, taffy apples, bingo, chances on new cars, ring tossing games and the free shows of animal training and aerial acrobatics all take their toll of time and money. It wouldn't be a Fair without the weight-guessing artists, the lunch stands and the canned music coming from the merry-go-round where even the strains of "Whispering Hope" dented the voice-jangled atmosphere.

The light rain that fell on the County Fair Grounds on Monday evening didn't dampen the spirits of the "first nighters". In and out of the crowd wandered parents trailing youngsters who looked wonder-eyed at the galaxy of lights and color until like a dog on the leash they ran to the next point of interest, trailing the parents. Here and there rolled tots in strollers; and grandparents weakened by the insis-

tent demands for cotton candy or pop corn patiently wiped sticky fingers and smudged cheeks. Boys and girls, shouting to be heard above the clamor, ran and plunged through the strolling ambulating mob, separating children from parents, men laughing over the racy and suggestive introductions of the G String Follies, and the young folks who were inclined to hold hands.

Fair time is a wonderful opportunity to see America at work and play. Murmurs always enjoys the thrill of an excited crowd. When you attend the Fair this week, take time out to watch the reaction of the folks about you, how they enjoy the sheer pleasure of their children who in the highth of glory are riding real live ponies, hanging on for dear life to the merry-go-round, shrieking at the monkeys who have swiped their pop corn, and staring wide-eyed at the arialist and gasping when she slides to the toe hold and heel hold on the bar. Watch the faces of the accompanying young ladies whose escorts are tossing rings or pitching ping pong balls into fish bowls. See how animated and expectant they are, and then what disgust and disappointment they register when their escorts fail them.

Watch the barkers who time after time announce without variation the attractions they hold for you. The glamor and excitement of it all is gone from their faces, and like a broken record they mouth their wares, and look at you without seeing you. Their trade is the only trade they know or are able to turn to. They look "tired of it all". There is little convincing tone to the barker at the north-east corner of the Midway. In spite of all he offers he is not personally enthused, yet the reaction he and the girls get is amusing,

to say the least. The young blades moisten their lips with their tongues, and an eager exciting rapture sometimes un-wantedly steals across their faces. Some of them blush while the older men look on at the preview with worldly wisdom and perhaps smile. One or two may chuckle and look about to see if his amusement has been noticeable to his wife or a chance neighbor.

The most interesting part of the Fair is the people. And you and I are part of

this interest, for we, too, are the people. To our neighbors we may be as much a source of amusement and wonder, registering our joys and excitements, or like the barkers, we may be as lifeless and "dead-pan" as they appear to be.
