## ANNUAL PICNIC

The second annual picnic of the stockholders, customers and friends of the Northern Indiana Co-Operative Association will be held July 4. The picnic which was held at Beechwood Park last year was a very successful event and we hope it to be even more so this year. If you know a stockholder, customers or friends of our plant who did not attend the picnic last year we urge you to see them and tell them of the enjoyable time you had there. Insist that they join us this year, and we feel sure they will think the holiday well spent. A complete program and where it is to be held will appear in the next issue.

## Miscellaneous Shower

On Thursday evening May 24, a large number of relatives and friends gathered at the home of the newlyweds, Mr. and Mrs. Robert Heighway and gave them a miscellaneous shower. Many beautiful and useful gifts were received. Those present were Mr. and Mrs. Charles Black, Mrs. Gus Mollenhour and daughter, Mr. and Mrs. Bernard Black, Mrs. George Black, Mrs. Omar Igo and daughter, Mrs. Ernest Igo and sons, Mr. and Mrs. Elmer Huffman and family, Mr. and Mrs. Floyd Tucker and daughter, Mr. and Mrs. John Judd, Mr. and Mrs. Dale Cook and daughter, Mr. and Mrs. William Dickey and sons, Mr. and Mrs. Ora Tucker and son, Aldene Spittler, Geraldine and Devon Tucker, Max Nellans, Mr. and Mrs. Orven Heighway and daughters and the honored couple Mr. and Mrs. Robert Heighway.

## BIRTHS

Mr. and Mrs. Mike Martino of South Bend are the proud parents of a seven pound girl, born May 15. Mrs. Martino was formerly Miss Ethel Rickle of near Mentone.

## Machinery on the Bum

Owing to a portion of our typesetting machinery getting out of order we were forced to set the larger portion of the type in this issue in ten point type. However we expect to have things in order so that the next paper will be set in the usual size type.

## PSI IOTA XI

The regular monthly business meeting of Beta Epsilon Chapter of Psi Iota Xi Sorority was held Friday evening at the home of Frances Clark. Mrs. Elizabeth Myers gave a very interesting paper on Modern China and Pottery. The following officers were elected for the ensuing year: President, Mrs. Helen Huffer; vice president, Mrs. Elizabeth Myers; Recording Secretary, Miss Thais Greulich; Corresponding Secretary Miss Annabel Mentzer; Treasurer, Mrs. Yoland Riner; Conductress, Miss Frances Clark.

Mrs. Helen Huffer and Miss Annabel Mentzer were elected delegates and Mrs. Elizabeth Myers Alternate to the convention to be held at Potowattomi Inn on Lake James, June 28th and 29th.

The next meeting will be held June 15th at the home of Miss Eileen Mollenhour with Miss Frances Clark assisting hostess.

America's Champion Good Man Who Went Wrong! Just One of the Many interesting Stories Appearing in The American Weekly, the Magazine Distributed With NEXT SUNDAY'S CHICAGO HERALD AND EXAMINER.

## Girls Chorus Broadcasts

The Riley Junior High School Girls Chorus of Logansport, Indiana under the direction of Mirabel Tucker broadcasted from W. L. S. Saturday June 2. The group spent the balance of the day at the Worlds Fair.

## PALESTINE NEWS

(Delayed from last week.)

Billy Shilling visited at the Charles Beeson home Sunday.

Mr. and Mrs. Turner Boggs and son spent Saturday night in Warsaw.

Childrens Day services were held at the Palestine Christian Church Sunday evening.

Mrs. Wilbur Judd and daughter called on Mrs. Floyd Blackwell Wednesday evening.

Quite a number from this vicinity attended the free movies at Burket Friday night.

Rev. and Mrs. J. E. Smith of Edgerton Ohio were entertained at the Russell Huffer home Sunday.

Mr. and Mrs. George Droud and Mr. and Mrs. Edsion Vandermark attended church in Sidney Sunday night.

Childrens Day Program will be held at the Palestine Methodist Church Sunday night June 10. The public is invited.

Mr. and Mrs. A. Armrod and son of Columbus, Ohio called on Elmer Vandermark and other relatives in Burket Sunday.

Mrs. Ernest Castleman of Huntington who has been assisting Mrs. Lyman Dunnuck in house cleaning the past week returned to her home Sunday.

About seventy-five members of the "Win One" class and the Married Peoples class met at the home of Mr. and Mrs. Jess Jones Sunday May 20. The married peoples class planned a surprise on their pastor, Rev. A. R. Noland whose birthday was the 22nd. At the noon hour a delicious co-operative dinner was served and not until they sang "Happy Birthday To You" did the pastor tumble; but he certainly was surprised. Richard and Louise Jones entertained the young people and they enjoyed themselves with a weiner roast. Mrs. Jones baked three angel food cakes in honor of Richard Jones and Mr. and Mrs. Noland. After games and visiting the guests departed to

their homes all having enjoyed the day and wishing the guests of honor many more mappy birthdays.

## MENTONE NEWS

Mr. David Ellsworth spent Friday in Warsaw on business.

Mrs. Fred Rush and daughters spent Friday in Warsaw on business.

Rev. and Mrs. DeWitt spent a few days last week in Converse where they formerly resided.

Wayne R. and Vernice Cox of Fort Wayne were guests of C. E. Cox near Mentone one day last week.

Mr. and Mrs. D. L. Bunner spent Decoration Day evening with Mr. and Mrs. Harry Oram in Warsaw.

Mr. and Mrs. Allen Blue Jr. and family spent the week end with formers parents, Mr. and Mrs. Allen Blue.

Mrs. Benjamin Blue and Mr. and Mrs. S. A. Guy were entertained at the home of Mr. and Mrs. James Blue Memorial Day.

Mr. and Mrs. Kenneth Plew of Warsaw spent last Sunday at the home of the formers parents, Mr. and Mrs. Albert Plew.

Mr. C. W. Shafer, Mrs. Bessie Manwaring and daughter, Jean, spent Memorial Day in Morocco the guests of Mr. Shafers mother, Mrs. Catherine Shafer.

Among those who attended the State Convention of the Lions Club in Marion Monday and Tuesday were: Mr. and Mrs. Kenneth Riner, Mr. and Mrs. F. R. Burns, Dale Kelly, Rev. Johns, Conda Walburn, L. F. Snyder, Elmore Fenstermaker, Charles Manwaring, Maurice Dudley and Chester Manwaring.

## "Hand-Me-Downs"

The term "hand-me-downs" is used in England as meaning "second-hand clothing, clothing that, for instance, passed from an older child to a younger child." In the United States, in addition to that meaning, hand-me-downs means ready-made clothing as distinguished from tailor-made clothing.—Literary Digest.

Beginning May 1st we will be located at 347 Greenwich Street.

#### MAY TEACH PYTHONS TO CATCH RABBITS

With varying success entomologists have been introducing insect enemies to destroy fruit and other pests for a long time; now an experiment in that line is to be made with larger animals. Australian farmers lose heavily every year by the depredations of wild rabbits, and plans without limit have been tried to destroy the rabbit pests without success.

Now the government is to experiment with the python of India. Like the boa, the python is a large snake, and like it also a constrictor. It has no poison glands, and while its size is terrifying, the python is easily tamed, and by many of the natives venerated in a religious way. It is capable of swallowing a young antelope, and a rabbit would be a small mouthful for it.

The serpents reach the usual length of 30 feet, and while they ordinarily stalk their victims, they can make considerable speed, and can also throw themselves forward instantly a considerable distance.

It would be possible for a python to kill a child, and one naturally wonders whether in adopting the python Australia is not getting something more objectionable than the rabbit.—Columbus Dispatch.

The mill buys wheat, oats, corn.

**Cactus in Oklahoma**  
Seventeen species of cactus in Oklahoma have been catalogued.

#### Monkeys' Habitat

Most of the monkeys of the Americas are native to the regions in and near the tropics and avoid the higher altitudes although there are a few native to Central America. There is no native species to be found north of the Rio Grande.

#### Famous Carpets

A unique carpet, stained with the blood of the murdered Russian czar, Paul I, has been added to the Museum of Applied Arts in Leipzig. In 1782 the carpet was presented by the French king, Louis XVI, to Paul of Russia, who was then crown prince. Paul succeeded his mother, Catherine the Great, to the throne in 1796.

#### Colorado Mother of Rivers

Colorado is the mother of rivers, says Nature Magazine. From high mountains great streams radiate like the spokes of a wheel. One system reaches the Mississippi through the Platte and the Arkansas, another courses southward through the Rio Grande to the gulf, while a third flows westward through the Colorado to the Pacific. These rivers have fixed the routes of land transportation, the areas of irrigated agriculture, and the location of cities and towns.

#### SCIENTISTS STUDY STORKS' MIGRATION

Recent investigations have gone far toward solving the problem of the migration of storks. Since 1917, says Tit-Bits Magazine, upward of 110,000 storks from Denmark have been marked with a ring round the leg. Reports have been received concerning a sufficient percentage of these birds to trace their passage fairly accurately.

They appear to fly via Germany, Czechoslovakia, Hungary, and Rumania, and across the Bosphorus to Asia Minor. They certainly pass through Egypt, but whether they reach that country by flying over the water or over the land is not certain. They then continue their journey up the Nile, over the great lakes of Africa, to winter quarters in Natal or the Cape.

The journey of 7,500 miles takes just under two months. Oddly enough, the return journey is accomplished in about half that time.

Great numbers go farther than Denmark, but about 2,000 spend the summer there. Modern industrial mechanism, especially high tension cables, is fatal to many, but storks are known to live to the considerable age of thirty or forty years—if they are lucky.

The mill buys wheat, oats, corn.  
Poultry medicine at the Co-Op. mill.

#### Average Span of Life

On the average, women live to be older than men. The average span of life for a man is 56 years and for a woman 58 years.

#### No Weddings in Churches

Up to the time of the reformation, Christian churches throughout Europe were considered too sacred for weddings, and these ceremonies had to be performed just outside the front door.

#### Brazil Is Modern

So far as American nations are concerned, Brazil is an old country and a land of marked social customs and distinctions. It is democratic in ideas and modern. Few cities have boulevards which command such envy.

#### Venus and the Earth

The planet Venus is almost the same size as the earth, and is about 67,000,000 miles from the sun, which is a little more than two-thirds of the distance from the sun to the earth. The earth is 93,000,000 miles from the sun. At their nearest, Venus and the earth are about 26,000,000 miles apart.

#### Snakes Live on Eggs

The sole diet of a species of South African snake is eggs. It can tell without breaking an egg whether it is fresh or stale, and will turn away from a stale one. Its head is only the size of the tip of a man's finger, yet in a miraculous manner it swallows an egg whole.

## WOULD GROW HERBS IN BIG CITY PARKS

Many country people cling to the old custom of using healing plants instead of running to the drug store. They still prefer to brew a tea of herbs or make a plaster of juicy leaves or grind up a medicinal root to cure a simple ailment. City people and their children miss a great deal by not knowing anything about digitalis, for example, except that the doctor uses it as a heart stimulant.

The American Druggist, a magazine of the trade, is trying to persuade park commissioners in a number of cities to set aside a plot for the cultivation of pharmacy gardens. School children would be taught to recognize the leaves of the purple foxglove as the source of digitalis. They would learn how witch-hazel takes four years to ripen its seeds, and they would see colchicine bulbs, at 25 cents each, planted to produce colchicine at \$25 an ounce.

There are two or three dozen plants, sources of common drugs, which grow readily in any part of this country. The druggists have no idea of setting up commercial gardens which would rival their counters, but they sponsor the drug plots as interesting and instructive.

## Stork Has Costly Meal of Pet Shop Inhabitants

A stork exhibited in the window of a pet shop at Sofia escaped from its cage while the shopkeeper was absent and proceeded to feast upon its fellow exhibits. A large crowd watched the unique entertainment through the window.

First, writes a correspondent in the New York Times, the stork attacked a cage of white mice, snapping them up one by one as they emerged from the enclosed part. Forty mice were eaten.

Next a bowl of goldfish yielded about twenty of its inhabitants to the stork's appetite. The entire meal cost the owner of the shop about \$10, and when he returned he wrung the stork's neck.

The stork's parents had nested upon the roof of the shopkeeper's home in the provinces, and the youngster became so tame that it used to walk about the house. Several times it flew away, but always returned, so the shopkeeper decided it meant to bring him luck. He has changed his mind.

## Glass Eyes for Every Hour

After a survey of all England there has been found only one family in which every member makes glass eyes. It consists of the mother, her son, and daughter, who conduct a factory in London. The business has been in the family for more than 150 years. The members have made eyes for Prince Christian, son-in-law of Queen Victoria; Prince Ranji Singhi and General Booth. On a recent day the son was making an optic for the son of an Arabian sheik, and the daughter was completing a set for a wealthy bride. This consisted of one for morn-

ing wear, another, with large pupil, for afternoon, a third for evening wear, having a dilated pupil which responded to bright artificial light, and a fourth for sleeping use.

## The Kaleteur Cataract

In British Guiana there is a mighty river called the Petara. At one place, Kaleteur, the river makes a clear drop of 822 feet and at the foot of the cataract the waters of the Petara branch off in various directions. The Kaleteur cataract is the show place of British Guiana. Twenty-eight thousand cubic feet of water pass over the edge of the fall every second. This vast volume of water, properly applied, would be capable of furnishing four times as much power as is derived today by the harnessing of Niagara falls.

## "Canary" Outgrew Cage

A British cage bird publication tells the following story of an English bird lover who accepted a friend's offer to replace his pet canary that had died with one of his own breed. The bird arrived and was duly installed in the cage vacated by the dead canary, but, to its owner's astonishment, this "canary" grew so rapidly that it was soon too large for its cage. It finally became evident that the new pet really belonged in the barnyard and there it is now kept, where it helps to furnish its owner with fresh eggs for his breakfast.

## Flowers to Supply Color

City officials of Edinburgh, Scotland, want all the color in Princes street, the business thoroughfare, to be supplied by nature. They have ordered all colored advertising signs removed from the street in order not to detract from the extensive flower beds on one side of the street, which are brilliantly illuminated at night.

The mill buys wheat, oats, corn.

## SPECIAL SQUAD OF POLICE TO HANDLE GOTHAM'S ALIENS

Foreign Born Criminals Keep  
Law Enforcing Officers  
on the Jump.

New York.—There are so many criminal aliens in this city that it has become necessary for the police commissioner to organize a squad that does nothing but look after them. And they have their hands full, too. In consequence of their efforts 504 persons were deported while 896 cases were investigated during 1932.

The criminal alien squad was not organized until three years ago, but in that time the effort has proved its worth. It has clarified the law for the officials, who easily determine what class of people may be returned to their native countries. In order to cope with the situation, the 20,000 members of the police force were combed to get linguists who can talk the language of the persons coming into these investigations.

### Who May Be Deported.

Just what criminals may be returned to their native countries as undesirable here is pointed out as follows by the commissioner:

Two classes of aliens are deportable—those legally in the country who have violated our laws and those who are illegally here.

The first group, despite the fact that they have obtained proper native passports and had them properly visined by the American consul, may be sent out of the country for violating the privileges granted them upon being permitted here. If they are convicted of a crime of moral turpitude within five years of their entry into the United States and sentenced to a period of over one year for this crime such aliens are deportable.

If after the five-year period has

passed they are convicted more than once of a crime of moral turpitude and in each instance, are sentenced to a period of over one year this makes them deportable. In this latter case both such crimes must have been committed after May 1, 1917, that being the date upon which this deportation act took effect.

The second group of aliens that are deportable are those who are illegally in the country. This is the class that the alien squad finds most active in crime. Their presence in the country in nearly all cases is because they have been unable to obtain the required visaed passport to admit them here legally.

### Many Ways of Entering.

The probabilities are that they were denied the visa by the American consul because for some reason they were considered undesirable immigrants in this country.

Such aliens resort to various means of entering the country illegally. They come by way of adjacent Canadian and Mexican borders; they ship as seamen and then desert the boat at an American port; they come as stow-aways, as temporary visitors, and also by making use of false documents. They, of course, are deportable alone on account of being here illegally, provided, however, such illegal entry occurred after July 1, 1924. If the illegal entrant is here before 1924 and engages in crime, he is then deportable because of his criminal activities, as before stated.

Numerous cases come to the attention of the alien squad of aliens permitted here for temporary visits and who disregard this temporary status and remain here.

## Find Lost Diamond Ring During Chicken Canning

Lancaster, Wis.—Unlike the person that killed the goose that laid the golden egg, and lost as a result a handsome income for the remainder of his life, Mrs. Ernest Johnson killed one of her roosters and recovered a valuable diamond which might otherwise never have been discovered.

Mrs. Johnson lost her engagement ring recently. She searched every where, but was unable to find it. At last she resigned herself to the belief that she never would recover it. The Johnsons own many chickens, and not long ago eight of them were killed and canned.

The gizzards had been set to one side and after the canning was done Mrs. Johnson started to prepare them for cooking. On opening the second she found her lost diamond.

### Michigan's Third River

The St. Joseph river is the only Michigan river that has any considerable drainage area outside the state. It is Michigan's third largest river.

### Must Take Chances

"Folks," said Uncle Eben, "sometimes git praised without deserving it and sometimes git blamed de same way. Looks like we jes' had to go livin' along, takin' our chances."

## New Treatment for Roundworm

You can't expect to make a profit from birds infested with worms. Use this new way to kill Roundworm. "Black Leaf" Worm Powder mixed in mash. Easy, economical and convenient. No handling of birds.

### Single Treatment Does the Work

### Human Inertia

Human inertia is much greater than we ever make allowances for.

### Insects Manufacture "Lac"

"Lac," a transparent, glass-like substance used in the making of shellac, is "manufactured" by small insects which swarm over certain trees in the tropics. The glandular excretion of the insects deposited on the twigs is one of the ingredients of shellac, and is also used in the manufacturing of billiard balls and phonograph records.

## SHIP IN ICED CARS!

Receivers report that eggs arrive in better condition when shipped in iced cars. Try this service at no extra cost to yourself.

## Mentone Egg Producers

### ACTOR PASSENGER IN "QUICK CHANGE" ROLE

Strange things sometimes happen in a train, writes the Paris correspondent of the London Daily Telegraph. People traveling from Paris to the west coast in a first-class compartment took notice of a fellow passenger owing to the immaculate style of his dress. He was a picture of correct attire.

About half an hour before the train was due to arrive the smart traveler left the compartment for a few minutes. When he came back it was difficult to see that he was the same man. He was wearing a torn hat, a dirty suit and down-at-heel shoes, while his shirt-front was soiled and his tie stained. The other passengers at first believed they had to do with a bandit. But the curious apparition reassured them. He explained that he was an actor at the Comedie Francaise, and that he was hurrying down to a coastal resort to play "The Beggar." The train was due to arrive only a few minutes before the play was to begin.

### Baloney Mightier Than Sword in Proper Hands

Partenkirchen, Bavaria.—A good, solid, hard, but elastic German sausage saved the life of Franz Baur, young son of a farmer in the Bavarian mountains, when he was attacked by an unknown assailant with a knife.

Franz, with a knapsack on his shoulder in which the sausage was stored away, came home from the market and was suddenly attacked by a man rushing from behind a shrub.

Franz pulled the sausage from his knapsack, brandished it like a sword, and knocked the assailant on the head so violently that he laid off and ran away.

### Hungry Dogs Are Heirs

Portland, Ore.—Hungry dogs of Portland got a break here recently when Circuit Judge Taxwell ruled valid portions of a will bequeathing \$19,000 to care for strays. A home for dogs is to be built with the money, according to the will.

The mill buys wheat, oats, corn.

WARSAW

### Longevity

Elephants may live to be two hundred years old; the tortoise, the crocodile, eagle, crow, parrot, pike, raven, and swan, one hundred; the lion and camel live to sixty; the goose, heron, pelican, ass, and stag fifty years; the sparrowhawk forty; the dog and horse about thirty; the tiger and leopard twenty-five; peacock twenty-four; cow, deer, hog, wolf, pigeon and rhinoceros twenty; ox nineteen; the cat, lark, and monkey eighteen; fox fifteen; salmon, sheep, fowl ten; rabbit nine; squirrel and viper seven; beetles and bees four years; wren three; spider one; toad twenty to thirty years.

## Girl Scout News

Are we growing or are we growing! Very much indeed, for we have just recently extended our ever open arms to welcome a new patrol into our midst. This patrol has christened itself "The Yaupon Patrol" a rather unusual and striking name! They have chosen Betty Ellsworth as their leader with Betty Jankee assistant.

At the meeting Tuesday afternoon the Scouts were engaged in making wreaths for the Soldiers Graves for Decoration Day. The Boy Scouts spent their energy by gathering materials for the wreaths.

At a former meeting Miss Mollenhour had charge of the troop during Miss Mentzer's absence. During this meeting we worked on both the first and second class badges. Also we played "Cat and Rat" and some bright Scout innocently asked if "Cat and Rat" was the same game as "Cat and Mouse"!!!

Some of the Scouts contributed to community service by selling poppies for the American Legion. We did fine! And we wish to thank you people for the kindness and consideration you gave us. Perhaps you would enjoy knowing that we sold 600 poppies and have \$34.19 to our credit.

Work, work, work! and yet play, play, play. What a mix up Scouting is. Garden Badges, Home Nurse, Health Winner, Minstrel, all these badges are yet to be wooed and won by the struggling young Scouts. But we'll get them! You watch and see.

On Decoration Day we met on the Town Square at one o'clock. With the Spanish American War Veterans leading followed by the band, the parade was started. After the band came the World War Veterans and the Lion's Club followed by the Girl Scouts and Boy Scouts in their colorful uniforms (Are those boys ever proud of their new uniforms, but we sure don't blame them)! The Scouts in their marching order made a pleasant picture. Now we ask you if Mentone's two Scout troops aren't a credit to the town and something for everyone to be proud of? At the Church the Girl Scouts sang "Tenting on the Old Camp Ground." After the Services the procession marched to the cemetery where the Soldiers Graves were decorated.

## 2nd Annual Picnic

The second annual picnic of the stockholders, customers and friends of the Northern Indiana Co-Operative Association will be held at

### Beechwood Park, Hoffman Lake, July 4th.

This article will be YOUR invitation and we urge all who read it to come. All are to come with well filled baskets and TABLE SERVICE FOR YOUR FAMILY. Coffee and cream will be furnished by the association.

## A Base Ball Game

Between the Board of Directors and the stockholders is scheduled for the forenoon. In the afternoon there will be a speaker, who has not been chosen, special music and other entertainment is available.

Don't forget the place and date. Beechwood Park July 4. Come and see if the Directors play ball as well as they direct.

### A BALL GAME WORTH SEEING

#### A Real Battle Scheduled For Mentone Fans on Next Sunday.

Base ball fans will have a chance to witness a real base ball game at 2:30 p. m., Sunday, June 24 on the home diamond, when the slugging LaPorte Coalers cross bats with the Mentone club. The visiting LaPorte Coalers are one of the outstanding base ball teams in Northern Indiana, and are coming down here loaded, to give our boys a good drubbing. On this occasion they will feature "Lefty" Veller, former ace in the pitching staff of the Indiana University, and he will be ably assisted by the reliable catcher Margo.

The Mentone team back of the

superb pitching of "Bill" Blue, with "Nute" Nellans on the receiving have defeated every team which they have come in contact this season, but are fully aware of the fact that they will have to play some real ball if they are going to defeat the visitors. If you enjoy a good ball game you should not miss this contest as it is sure to be full of thrills from start to finish.

In order to secure this game with the Coalers the home management has had to post a substantial guarantee and an admission charge of 20c will be made. This is a game that you will want to see, so do not forget the date, Sunday, June 24th, at 2:30 p. m. at Mentone.

#### FOR RENT

My Modern House and Garage on East Main Street, Mentone. Phone 1 1/2 on 17 Burket, Indiana or see Bert A. Rush.

### BIRTHDAY PARTY

Mrs. Elva Sea was very pleasantly surprised on Thursday evening by the members of her Sunday School class. After enjoying a number of jokes and contests, delicious refreshments of cake, fruit salad and lemonade were served. Music was furnished by Walter, Betty and Junior Smythe. All departed wishing Mrs. Sea many more happy Birthdays. Those present were: Mr. and Mrs. Marion Guy, Mr. and Mrs. Edd Huffer, Mr. and Mrs. Frank Carl, Mr. and Mrs. Alva Bowser, Mr. and Mrs. Emmet Clark, Mr. and Mrs. Russell Huffer, Mr. and Mrs. Fred Rush, Mr. and Mrs. Sanky Vorhis, Mr. and Mrs. Edmund Sea and son Bobby, Mr. and Mrs. Warren Sea and two daughters, Mr. and Mrs. Riley Fisher, Mr. Joe Huffer, Lewis Eaton, Mr. and Mrs. Roy Sloan, Mrs. Josephine Smythe and children and Mrs. Elva Sea.

### Undertakers Meet

The undertakers and their wives of Kosciusko and Whitley counties held a joint meeting Wednesday evening in the Mentone School Building. At 6:30 those present enjoyed a bounteous banquet after which a business session was held. The committee composed of L. P. Jefferies, H. V. Johns and Robert Reed of Mentone. Orchestra music was furnished by Mrs. Maude Snyder of the Warsaw Conservatory and a general good time was had by all.

#### SEWING

We are prepared to do all kinds of sewing. Also made to order dresses. Come in and see our yard material. The latest weaves and patterns for stylish frocks. The Hradway Dress Shop.

Remember picnic, July 4th.

# HOW--- AND ---WHY?

By "A Man About Town"

**WHY IS IT**—That business in nearly all small towns is on the downgrade, while business houses in the larger cities are reporting a large increase in sales?

**HOW IT'S DONE**—Pick up most any city newspaper, and you will note that it consists of about two-thirds advertising—their merchants realize that in order to get business they must go out after it—and when they quote a price on any article they are quite certain that it is a real bargain and that no competitor can offer a lower price. The city merchant long ago realized that war-time profits were a thing of the past, and that reasonable profits in keeping with present conditions were in order. And following these lines he has been drawing trade from the small towns to the city in a much greater volume than ever before, and unless the merchants of our small towns wake up and get busy, the business activities of villages of 800 population or less, will be reduced to a couple of gas filling stations.

\*\*\*

**WHY IS IT**—There is not more local advertising in the Co-Op. News? The business men of Mentone surely want and need the trade of the farmers. The News goes into the homes of nearly every farmer within eight miles of the town and should be a good advertising medium, and especially so, since it is published by the Co-Op's, who are quite strong in this locality. Experience has shown that goods of value properly advertised will sell, the price being right—however no amount of advertising will sell an article of 90c value for a dollar.

The Jefferies furniture store has been about the only local merchant that has advertised regularly in the News for some time, and we have noticed that they have been selling furniture not only in Mentone but also in neighboring towns. To be sure we do not claim that the advertising alone was the cause of these sales—but their policy of meeting prices of outside competition, together with high quality of merchandise, up-to-date service and consistent advertising had a great deal to do with these sales. And it is quite common to hear the remark "Jefferies is sell-

ing rugs and furniture at bargain prices."

\*\*\*

**HOW COMES**—That there is so much of the local trade going to the outside towns and mail order houses? There can be but one answer to the question. These outside concerns advertise for their trade, they offer the goods at a less price than they can be had at home. People of today are buying where they can get the most value for their money, and free entertainments, prizes or lotteries have little or no effect in drawing trade so far as purchasing necessities is concerned

\*\*\*

**WHY IS IT**—That the Co-Op. Mill, which started during the worst depression in history has been able to build up an annual business of about \$114,000.00 per year, with fair prospects of this years business going over the \$150,000.00 mark?

**HOW IT WAS DONE**—They started out, not to see how much profit they could make, but how much first-class merchandise and up-to-date service they could give for a dollar, and at the same time pay the eight per cent dividend and operating expenses. How well they have succeeded needs no comment.

They have established such a reputation for low prices and square dealing that it is no longer necessary for them to make quotations in their advertising, because every farmer knows that any item handled by them is sold as low, and in most cases much lower than the same article could be had elsewhere. They have always been consistent advertisers, and backed up every claim made in their announcements, and as a result have had a good steady growth every month since organization.

\*\*\*

**HOW IS THIS**—We believe in advertising and stand ready to back up our conviction with the following offer:

To any merchant in Mentone who handles food products and is willing to pay \$3.00 per week for advertising, and will quote prices on standard food products as low as quoted by merchants in neighboring towns, and follow our instructions in the preparation of his advertising, we will agree, that if at the expiration of eight weeks, if he does not add a sufficient number of new customers and increase his trade sufficient so that the profits are double the amount of the advertising bill, the "Man About Town" will pay the whole amount of the advertising bill and the advertiser will not owe one penny. This offer holds good for one firm only. Now if you are game, come on.

The Man About Town.

## Black Leaf 40

**Kills Lice**

"Black Leaf 40" which has been used successfully over 20 years as a spray to kill insects on gardens, flowers and orchards has been found equally effective in killing lice on poultry.

**NO HANDLING OF BIRDS**

Cost is reduced—No work—Just paint tops of roosts lightly. The fumes kill lice while flock roosts. If your dealer does not handle send \$1.00 for trial package.

100 Bird Treatment \$1. Shipped postpaid if you mention dealer's name.

**HOW**

TO TELL SPEED OF WIND  
BY RELIABLE SCHEDULE.—  
Every one has wondered at some  
time approximately how fast the  
wind was moving. If you can just  
feel it on the face is it blowing a  
mile an hour, ten or twenty?  
When it blows down trees is it  
blowing forty, fifty or seventy-five  
miles an hour? In answer to many  
inquiries the weather bureau has  
devised a guide to wind velocities  
that anyone can use, given in the  
table below:

1 mile an hour—Smoke rises ver-  
tically.  
1 to 3 miles an hour—Causes  
smoke to drift, but will not stir a  
weather vane.  
4 to 7 miles an hour—Can be felt  
on face, moves weather vane, rus-  
tles leaves on trees.  
8 to 12 miles an hour—Keeps  
leaves in constant motion.  
13 to 18 miles an hour—"Moder-  
ate wind," raises dust, moves small  
branches.  
19 to 24 miles an hour—Small,  
leafy trees sway gently, tiny waves  
on inland waters.  
25 to 31 miles an hour—Moves  
large branches, whistles in tele-  
phone wires, makes it difficult to  
hold umbrella open.  
32 to 38 miles an hour—Sets  
whole trees in motion, is difficult to  
walk against.  
39 to 54 miles an hour—Is a  
"gale," which at 46 miles an hour  
breaks twigs on trees; when  
stronger causes some structural  
damage, blowing off loose shingles.  
55 to 75 miles an hour—Is a  
"whole gale," uprooting trees and  
causing major structural damage.  
Inland gales, reports the weather  
bureau, greater than 75 miles an  
hour are seldom experienced ex-  
cept under special tornado condi-  
tions.

**FOR REFLECTION**

Quick returns make rich merchants.

Getting out well is a quarter of the  
journey.

Keep your temper; no one else  
wants it.

Between trust and distrust lies the  
safe road.

Improve your time and your time  
will improve you.

He who swells in prosperity will  
shrink in adversity.

Most girls prefer an heir in a castle  
to a castle in the air.

A wise man thinks all he says; a  
fool says all he thinks.

Truth needs not many words, but  
a false tale, a large preamble.

If one is not certain he can tell a  
funny story, let him tell it short.

Usually, as to those who disapprove  
of you, you don't care if they do.

A friend that listens to your trou-  
bles and is interested is truly a friend.

If one is high-tempered, he may be  
a good executive, but it wears him out.

There is too much friction in bridge  
to make it agreeable to some tempera-  
ments.

Oh, that men should put an enemy  
in their mouths, to steal away their  
brains.

We still see "the grand manner"  
in a man; but it takes good clothes  
to put it over.

A man who is fair and honest  
doesn't harp on it. He lets you take  
that for granted.

Nature behaves as naturally in your  
makeup at eighty as it does at twenty;  
and as relentlessly.

If one wouldn't wear a soiled shirt,  
why shouldn't he be as particular  
about his suspenders?

Complete civilization will come  
when every bedroom has a bathroom  
as inevitably as it has a bed.

**Freak Trees in N. Y. Park**

In Prospect Park, New York, is a  
freak in trees that the casual stroller  
is not apt to spot, says the Brooklyn  
Eagle. Hidden away in the woods near  
the Quaker cemetery are four trees.  
What sets them apart from other  
trees in the park is the fact that they  
have grown together in pairs and,  
even stranger, in strange pairs. One  
pair consists of a beech and a cherry.  
The other pair is a locust and a beech.  
Save for the locust, all are flourishing,  
though in the course of their 75 years  
matters have become rather compli-

cated, so far as their offshoots are  
concerned. For instance, a branch  
from the cherry tree has grown  
through its companion beech and  
projects about 20 feet. To add to the  
complications, one spike of the ceme-  
tery's old iron fence runs right through  
the cherry tree, but when and why  
that took place nobody knows, not  
even the old caretaker, because it hap-  
pened so many years ago.

**Invented Gatling Gun**

Gatling gun is a rapid-fire machine  
gun invented by Richard Jordan Gat-  
ling, an American. He conceived the  
idea in 1861 and succeeded in perfect-  
ing a gun that would discharge 350  
shots per minute in 1862.

**Water Buffalo Abandoned**

Oriental water buffalo imported to  
Hawaii more than twenty years ago  
for use as farm animals, and then  
abandoned, have reverted to wild  
ways on Molokai Island.

**Psyllium Seed**

Psyllium seed comes, for the most  
part, from British India and France.  
While the plant, *Plantago psyllium*,  
grows wild in India and westward into  
Europe and northern Africa, it is un-  
der cultivation in France.

**Diphtheria**

Diphtheria attacks ten per cent of  
the children born each year before  
they reach the age of fifteen.

## THE BIG ONE THAT GOT AWAY

The first big story of a fish that got away was reported by Vance Johns early Saturday morning. As summed up from the facts that our Sherlock was able to pick up, Holmes was able to make the following deductions: The time was about 12:01½ a. m., Saturday, June 16, 1934; place Yellow Creek Lake. Johns had just made his second perfect cast, when the bait was taken by the largest bass that was never caught in this part of the state—presumably the one lost by Kinney Riner last year—the fish put up an awful scrap and after breaking all the lines that Johns had in his tackle box, Mr. Big Bass drew off to a nice little nook at the edge of the lake for a quiet breakfast, leaving his would-be captor completely exhausted with a disabled boat in the center of the lake. There were many more of our local sports who took up the chase for this same fish, but none of them reported any results, so we presume that Mr. Big Fish is yet in Yellow Creek Lake.

### Gargoyle and Chimney Stolen

An antiquary living near Lyons, France, is reported to have confessed that he committed a novel theft. A gargoyle weighing 230 pounds, which disappeared from the famous Abbey of St. Antoine, near Grenoble, was found in his shop side by side with a stone chimney, which was also taken from the abbey. The gargoyle dates from the Thirteenth century. The man is stated to have admitted that he detached both pieces with a chisel and carried them off in a motor van.—Cincinnati Enquirer.

### Coconut Fighting New Game

With the closing of the only cockpit in Manabaja, in the Philippines, coconut fighting has become a craze. Heavy odds are placed on each coconut, and the country is searched for the toughest nuts. Street vendors are peddling them, getting high prices for the hardest. The game is played by placing the coconuts face to face, then driving or pushing them together until one cracks and is declared the loser. The gambling possibilities made the game popular.

### Old-Age Pensions

An old-age pension law has been passed by Ohio, bringing the quota of states with such laws in effect up to 26. In 13 of the states the applicant must have reached the age of seventy; in one state, sixty-eight; in the remaining states, sixty-five. This means that considerably less than one-third of the employed women of sixty-five or older in the country are covered by state pension provisions.

### How Battleships Are Named

Under existing statute laws our battleships and armored cruisers are named for states of the Union; our cruisers for cities. Torpedo boat destroyers are named for distinguished naval officers, for heroic enlisted men, for secretaries of the navy, and in a few instances for the United States senators and congressmen distinguished in the naval committees, and for distinguished inventors. Mine sweepers are named for the various birds. Submarines are designated by letters and numerals.

### How Thunder Clouds Form

In the summer period of long days and bright sun, great areas of the land are heated. Warm, moist air, rising from the ground, strikes the cooler up per air and forms cumulus clouds. The continued uprush of air causes electricity from friction to gather on the clouds. When two of the charged clouds approach each other, the electricity they contain tends to equalize itself and jumps the gap between the two clouds in a bright flash, which is lightning.

### How U. S. Ranks in Grape-Growing

Only Italy and France of the grape-producing countries of the world have a larger area given over to vineyards than the United States. The other important foreign grape countries are Spain, Greece, Persia, Germany and Russia. The principal grape-producing states of the United States, with their production in 1932 in short tons, are as follows: California, 1,882,000; Michigan, 71,775, and New York, 67,971.

### How to Test Diamonds to Detect Imitations

The diamond is of an allotropic form of carbon insoluble in all liquids, and infusible at all attainable temperatures and pressures. It is the hardest of all known substances, and therefore feels colder to the touch than glass and imitation stones. It has also a somewhat greasy feel. One test given is to use a fine steel file to test diamonds from imitations, glass or white sapphire. An accurate test is made by weighing for specific gravity, using accurate instruments in distilled water.

### How Gold Is Shipped

Gold is usually packed in small "herring" kegs holding about \$50,000 each or in boxes containing five bars valued at a total of more than \$40,000. Shipments are made either in bars or coins, the latter being more difficult to handle. After its removal from bank vaults the gold is loaded into cars accompanied by armed guards. Aboard the ship it is stowed in the bullion room, or strong room, and the purser is responsible for it. Armored trucks and guards await the shipments, the trucks being bullet-proof, with guards at the gun slits.

### How Long Animals Can "Sleep"

Land snails have been kept in dry containers for three years and were still alive. Trichina may remain surrounded by their cysts in living flesh for ten years. Frogs and toads have been reported to have been kept in this sleeping state for 30 years. Warm-blooded animals rarely sleep more than a few months.

### How Japanese Bow

It is difficult simply through the medium of words to describe the Japanese method of bowing. The hands are placed palm to palm, and, in the case of a woman, rest lightly as they move down the front of the skirt to the knees. The body is bent at the waist until the torso is parallel with the floor.

### Improvements

"How's your boy Josh doing with his music?"

"Fine," answered Farmer Cornotssel. "He traded off his saxophone for a ukulele, which is easier to play and can't be heard so far."

### His Fault

Magistrate—Why did you bite your husband's mother?

Culprit—"Twas 'is fault, your worship. 'E was always throwin' 'er in my teeth.—Cape Argue.

### Like Women Announcers

Rome.—Italy's most popular radio announcer is a woman—Signorina Maria Luisa Boncompagni. Most of the Italian announcers are women.

### Painful

"My wooden leg pained me terribly last night."

"How's that?"

"My wife hit me over the head with it."

**Another Idea About the Brain**  
It is seriously asserted that the brain is not the seat of mental activity. From experiments made during and since the war, certain eminent surgeons have concluded that the human mind is seated in some part of the body other than the brain, and possibly in the trunk. In support of this it is pointed out that many war-time operations were performed where all parts of the brain were removed without impairing the mental facilities. One expert has long held the theory that the solar plexus is the real center of mental activity.

**Mushrooms Profitable to Miner**  
Mushroom farming in an abandoned coal mine, started as a hobby, has been developed into a profitable business by an Ohio miner. By gathering his first crop in seven weeks after starting, this farmer has speeded up mushroom growth considerably. In four months, 14,000 pounds of mushrooms were picked from beds 500 feet underground. Two hundred pounds a day may be delivered to the market.—Popular Mechanics Magazine.

**Guiana Sees Bauxite Boom**  
British Guiana expects an increase in the demand for its bauxite as the result of the discovery by a British chemist that this material, if packed into the exhaust system of automobiles, will make the exhaust fumes harmless.

**Quinine Output Held Too Low**  
At least 44 times as much quinine as is produced is needed by the world today in the saving of lives. Twenty-six thousand tons are needed for the treatment of the 650,000 cases of malaria alone.

**Coal Miners' Institute Modern**  
Two sun rooms, with glazed folding doors, a library, bowling green and flower gardens, are features of a new institute for coal miners in Clifton, England.

**CHECKS OIL FIRES  
WITH WATER SPRAY**

The fire chiefs of Germany recently held a convention in Magdeburg. They saw oil fires put out with chemical foams, powdered sodium carbonate, carbon dioxide snow and carbon tetrachloride—all measures tried and true. After the applause had died away, out stepped Chief Stein of the home fire department. He would extinguish oil fires with nothing but water, he announced. And he did.

As might be supposed, Stein did something more than just turn the hose on an oil blaze. He is the inventor of a special nozzle which atomizes the water and spreads it out into a huge globular cloud. In a few seconds he put out dense smoky flames that arose from about three tons of burning lubricating oil and gasoline. In the intense heat the fine spray of water became a cloud of steam.

How does Stein explain his success? Within the watery cloud oxygen seems to be withdrawn from the burning mass while heat is absorbed by the droplets. Thanks to his nozzle, Stein can vary the size of his spray and the fineness of the cloud. It is this adjustability that makes it possible, he says, to precipitate fumes, smoke and explosive dust, and even to take the sting out of poison gas.—New York Times.

**Sound Films May Tell  
Ills Through the Voice**

Analysis of the tracks of the human voice on sound films is said to give a clue to the identification of the disease of the nervous system known as disseminated sclerosis.

This is indicated, says Popular Mechanics Magazine, by work carried on in a London hospital and reported recently.

The vowel "ah" in a normal voice appears on the sound film as a series of spiky protuberances, in groups, each beginning with a sharp upward jerk. The upward jerk is the result of a jet of air from the glottis, and the distance from one upward jerk to the next gives the period of laryngeal action. This period changes slowly and never suddenly, meaning that the muscles controlling the tension for laryngeal action are well coordinated.

In patients suffering from the condition called ataxia, the upward jerks follow one another at irregular intervals. There are several diseases which can produce this state of irregularity of speech, disseminated sclerosis being one, and by means of the sound film, the abnormality which leads to its identification can be observed when the unaided ear cannot detect it.

**Origin of Slang**

Slang is not of recent origin if Dr. William H. Davis of Stanford University is right in his deductions. Doctor Davis, who is said to be in favor of the use of slang because it adds color to the language, believes that "fighting tooth and nail" and "going between the eyes" originated back in the days

of the cave man. Of course, "draw a long bow" and "shot his bolt" must have had their origin back in the days of chivalry while "flash in the pan" and "quick on the trigger" came a little later with the invention of firearms. So the modern generations are merely carrying on by coining such phrases as "Where's Elmer" and "Come up to see me sometime."—Pathfinder Magazine.

**Popular Old Proverb**

The proverb, "Blood is thicker than water" is frequently ascribed to Sir Walter Scott on account of his use of it in "Guy Mannering," but it was common in the Seventeenth century and Scott probably borrowed it.

**Jade Difficult to Value**

Of all valuable stones jade varies the most in price according to color and workmanship. And jade is probably more difficult to value than any other precious stone. Most of the jade comes originally from the mines in Burma. Great blocks may be seen lying on the quays for shipment to China, where it is cut by workmen who know the secret of finding the perfect pieces of purest color. The Chinese are supposed to have maintained the monopoly of jade cutting on account of their patience and their extreme appreciation of the beauty of the stone. The most valuable jade is of a rare emerald color and translucent.

## MENTONE NEWS

Remember picnic, July 4th.

Don't forget the Annual Co-Op. Picnic July 4.

We will be looking for you at the picnic July 4th.

Mr. William Forst of Warsaw spent Saturday in Mentone.

Mr. L. P. Jefferies is reported quite ill at this time.

Come to Beechwood Park July 4 and see Frank Carls steal bases.

Mrs. Ella Bennet of Warsaw called on friends a few days last week.

Invite your friends and neighbors to the Annual Co-Op Picnic July 4.

Clayton Clutter is attending the summer term at Indiana University.

Mrs. Robert Reed and Miss Betty Lyon spent Friday in Warsaw on business.

Let us make this picnic one long to be remembered. See announcement on first page.

Mrs. George Nellans left Monday to visit her sister, Miss Alice Funk in Anderson.

Mr. and Mrs. D. L. Bunner spent Sunday in Chicago attending the Olds Fair.

Mr. and Mrs. George Nellans spent Sunday with Mr. and Mrs. Grover Key and family.

Rev. and Mrs. DeWitt left Monday for Anderson where they will visit relatives for a few days.

Miss Thais Greulich is attending the summer term for special work at Northwestern University.

Special music will be one of the items of interest on the program at the Annual Picnic July 4.

Come and see the directors play the stockholders in a base ball game at the Co-Op. Picnic July 4.

Come and enjoy the day at Beechwood Park July 4 with the Northern Indiana Co-Operative Association.

Mrs. Oliver Teel attended the Tri Kappa picnic supper Thursday evening in Warsaw at the Bolinger home.

Mrs. Cora VanGilder and son Donald attended the Leesburg High School Alumni Banquet in Leesburg Friday evening.

Mrs. Davison arrived in Mentone last Monday to spend the summer with her son and family, Dr. and Mrs. Davison and son.

Miss Rosalind Mentzer left Wednesday for Lafayette where she will take special work during the summer term at Purdue University.

Remember picnic, July 4th.

Mrs. James Sarber is reported on the sick list.

Mary Esther Smith, daughter of Mr. and Mrs. Merl Smith is ill with the measles.

Miss Ella Jane Warner, daughter of Mr. and Mrs. Y. W. Warner is ill with the measles.

Mr. Abe Brockey who suffered a stroke Thursday morning is in a very serious condition.

A good time is assured to all who attend our picnic on July 4th. Be sure to be there.

Rev. DeWitt has been returned to Mentone to the complete satisfaction of all the parishioners.

This is your invitation to attend our picnic on July 4th. See announcement on first page.

Mrs. Edna Burns and Mrs. Yolande Riner attended D. A. R. meeting in Bourbon last Tuesday evening.

Miss Anna Myers and Mrs. Otto Weimer of Rochester spent last Tuesday in Mentone on business.

Mr. and Mrs. Squire Myers and family of Meadville, Pennsylvania are visiting relatives and friends in and around Mentone.

Mrs. Eldon Mow of McKeese Port, Pennsylvania and Mrs. Etta Mow of Rochester spent Wednesday evening with Mrs. Golda Babcock.

Mr. and Mrs. John Vokoun and Mrs. Leona Snyder and daughter Vernetta spent Wednesday in Plymouth visiting Mrs. Mary Vernetta.

Mr. Dale Wallace, Miss Freda Sullivan of Rochester, and Mr. and Mrs. F. Snyder made a business trip to Fort Wayne Thursday afternoon.

NEWSPAPERS:—See Jack Shinn for your Sunday Herald & Examiner and Sunday Tribune. Have them delivered or call at the house for them.

Mr. I. F. Snyder of the L. P. Jefferies Furniture Store took two customers to Indianapolis last week. They both came home well pleased with their purchases.

Mr. and Mrs. John Vokoun of Chicago, Mr. and Mrs. Charles Byers and daughter Mary Frances of Fort Wayne spent a few days at the Vernetta home during the death and burial of Mrs. Frank Vernetta.

Mr. and Mrs. O. D. Morrison and family of Athens, Ohio visited the former's mother, Mrs. Rose Morrison. Tuesday Mrs. Morrison accompanied them to Wawasee Lake where they are visiting with Mr. and Mrs. Clyde Delano.

Remember picnic, July 4th.

**UNDER THE OLIVER FLAG**

**The Oliver Trade Mark Is Your Protection**

The Oliver Trade Mark is moulded into the metal of every genuine Oliver Chilled Share.

The trade mark is always clear and distinct if the share is a genuine Oliver. It is never blurred. It is never hard to read.

Oliver genuine Chilled Shares are made in the same factory where your Oliver Plow was made. The only way to get Oliver service from your Oliver Plow is to use a genuine Oliver Share.

We are authorized Oliver Dealers "under the Oliver Flag" and sell genuine Oliver shares.

**Northern Indiana CO-OPERATIVE ASS'N. MENTONE, INDIANA**

**OLIVER**

### Announcement Party Is Held

Friday evening the Misses Eileen Mollenhour and Frances Clark entertained at the former's home in Mentone complimentary to Miss Mabel Sarber. The Mollenhour home was attractively decorated with numerous bouquets of garden flowers. The main feature of the evening was bridge, with Mrs. Nellie Reed winning first prize and Mrs. Elizabeth Myers, second. Delicious refreshments were served at individual tables. At each place there was a tiny envelope, which when opened, announced the engagement of Miss Mabel Sarber

and Leroy Norris, both of Mentone. The following guests were present: The Misses Annabel Mentzer, Eunice Reed, Kathleen Anderson, Margaret Mentzer, Bernice Bowen and Marjorie Bradway all of Mentone, Helen Jontz and Thelma Harris of Warsaw and Isabelle Farry of Rochester and Mesdames Lucille Myers of Meadville Pennsylvania, LaVerne Clutter, Elizabeth Myers, Pauline Riner, Helen Huffer, Helen Brown, Nellie Reed Yolande Riner of Mentone, the two hostesses and the honored guest.

Remember picnic, July 4th.

The mill buys wheat, oats, corn.

## In Memory of Mother Vernette

Hannah Frances Rice, daughter of William and Lydia Rice was born in Licking County, near Utica, Ohio, November 16, 1845, and departed from this life at her residence in Mentone, Ind., June 9, 1934 at the advanced age of 88 years 6 months and 23 days.

In 1853 at the age of eight years she came with her parents and two sisters to Indiana and established a new residence in Franklin Township, Kosciusko County.

Here she grew to womanhood and was united in marriage to Franklin Vernette on September 5, 1867. This couple moved to their farm in Marshall County and traveled lives high way together for nearly 66 years until the passing of her husband August 8th, 1933. For the past 20 years they were residents of Mentone where they enjoyed the fruit of their years of labor.

Ten children were born unto them, four having passed to the great beyond. Those left to miss the departed mother are, Sarah E. Bybee, William Vernette, Ethel E. Laird, Viola M. Vokoun, Bertha L. Byrer and Leona B. Snyder. Also 8 grandchildren, 9 great grandchildren and many other relatives and friends.

She united with the Sycamore Chapel Church of Christ during the ministry of Thaddeus S. Huston about the year of 1890 and remained true to the faith until called away.

Thus again we are reminded that they who live must die, passing through Nature to Eternity. Gods hand touched her and she slept. There is no death for the thing we call death is but another sadder name for Life.

We will be looking for you at the picnic July 4th.

### Former Resident Passes Away

David Elmer Ailer, aged 63 years died at his home 1 mile south of New Paris, Saturday morning of last week. The widow Mrs. Daisy Ailer and one brother survive to mourn his loss.

Funeral services were held Monday at the Baptist church in Mentone, Rev. E. E. DeWitt in charge. Burial in Mentone cemetery.

Remember picnic, July 4th.

### BAKE SALE

I wish to call to the attention of my customers the change of time for my market. I will be at Clarks Store from 9:00 a. m. to 12:00 p. m. beginning Saturday June 30.

Winifred Swick.

## Commissioned Lieutenant

Leroy Norris of Mentone, who will be commissioned as second lieutenant in the Officers' Reserve Corps of the United States Army June 14, will receive two weeks of active duty training at Fort Knox, Ky., starting June 17, it was announced here today. All Reserve Officers Training Corps graduates at Purdue University this year, who requested active duty training this summer, will attend Fort Knox or other military posts in their own corps areas. Of more than 130 asking such training, 110 will be ordered to Fort Knox.

Those attending the Officers' Reserve Corps camps will be quartered in tents near the R. O. T. C. camp, where 158 Purdue junior R. O. T. C. students will be stationed for a six weeks training period, starting June 17.

Remember picnic, July 4th.

### CARD OF THANKS

We wish to express our most sincere thanks for the many acts of kindness extended to us during the recent illness of our son, Leo.

Mr. and Mrs. Ray Lynn and Sons.

Among those from Mentone who attended the Indiana University Commencement in Bloomington last Monday were Dale Kelly, Mr. and Mrs. A. I. Nelson, Mr. and Mrs. M. O. Mentzer and daughters, and Dr. and Mrs. E. D. Andersin and son Robert and daughter Kathleen. Members of the graduating that were from Mentone were Kathryn Nelson, Beulah Kelly, Wendell Anderson and James Mentzer. Mr. Mentzer was graduated with high honors.

Remember picnic, July 4th.

### Good "Beaver Money"

During the heyday of the fur trade many years ago, beaver skins passed as money. They had an established rating across the continent and as far east as the Atlantic coast of approximately four dollars for a average raw skin, says Nature Magazine. Following the transfer from hand to hand of the skins themselves other currency such as small stones or bits of metal, each bearing a crude drawing of a beaver and the initials or mark of a well known trader and representing an actual skin lying in some storehouse passed freely among traders and Indians.

### Jet Found in Three Countries

Jet, the metal much prized for mourning jewelry and for rosary beads and crosses, is found in Asia Minor, France and Great Britain. In France the deposits are large and many persons find employment in producing the mineral. An imitation is made from ebonite, a hardened rubber, and from glass.

**UNDER  
THE OLIVER FLAG**

**A New Kind of Plowing  
with a New Kind of Plow**

Put an Oliver No. 218 Big Base Plow into a field of standing cornstalks or sweet clover. When you have finished plowing, you will not find a stalk left above ground. Everything will be buried—completely.

The Cone Moldboard of the Oliver Big Base turns the soil completely over, crumbling it and burying all trash. It adds fertility to your soil through quick decomposition of organic matter, and combats weed and insect pests. Organic matter in the soil helps hold valuable moisture. Plow for profit with the Big Base Plow, under the Oliver flag!

There are three sizes, the No. 318 (3 bottom), No. 218 (2 bottom) and the 1 Base Sulky. Ask us about them!

**Northern Indiana  
CO-OPERATIVE ASS'N.  
MENTONE, INDIANA**

**OLIVER**

### Arabs Skilled Workmen

The Arabs were practical artificers and manufacturers. They fashioned beautiful objects from gold, silver, copper, bronze, iron and steel. In the famous Damascus blade they produced something that only modern alloy steel can match. In the treatment of textile fabrics the modern manufacturer finds it hard to surpass them. They processed leather, dyed cloth and manufactured paper.

### Smoke Meant Death

The "no smoking" sign once meant a lot in the countries of the Caucasus mountains. In Dagestan the act was punishable by death.

### Bulls Don't Know Colors

As far as is known, bulls have no perception of color. The action of waving a cloth infuriates the bull. Many bulls are extremely vicious and will attack any moving person.

### Constitution's Figurehead

The original figurehead on the old ship Constitution was a carved figure of Hercules. Since the ship first sailed the high seas six or seven different figures and scrolls have been successors to the Hercules. The original figurehead was carved by Messrs. Skillings of Boston. It was a full-length figure of Hercules with his club poised over his right shoulder.
