WITH THE SICK

As there are a number of people from our community and nearby communities who are in the hospital. recovering from operations, injuries and illness, we are listing them all in one column.

Mrs. Broda Clark was taken to the Woodlawn hospital a week ago Wednesday evening suffering with a bronchial infection. She was given oxygen until Sunday and was able to return home on Tuesday.

At the Woodlawn hospital at the same time were Freddie Griffis, Pierre Ferverda, Tommy Adams and Franklin Miller who were recovering from herniotomies. Lon Barkman is there suffering with infection of the jaws. Mrs. J. D. Long is still in the hospital recovering from a fractured leg.

Andrew Hall came home from the McDonald hospital on Wednesday after spending 12 days there suffering with virus pneumonia.

Walter Wilson is in the Murphy Medical Center suffering with two broken legs he received last Wednesday morning at Union, Michigan while loading logs. One log got loose from the skid while loading and rolled back pinning Walt against another log.

Harry Vernette, of east of Mentone, is improved after being quite ill for two or three weeks.

Mrs. Willis Cowen is at the home of her parents, Mr. and Mrs. Dewey Whetstone, after suffering painful injuries to her left leg Sunday afternoon at the home of her brother, Lowell Dee Whetstone. Mrs. Cowan was riding on the back of the tractor, which was being driven into the garage by her brother. She started to fall and caught hold of Lowell Dee to save herself. This threw him off balance, and in trying to keep his position on the tractor, the steering wheel was pulled around, which threw Mrs. Cowan off and in front of one of the rear wheels It passed over her left leg, injuring the muscle from the pelvis to the heel. X-rays taken at the Urschel clinic disclosed no broken bones.

Bill Fisher has been quite sick since last week.

Frank Carles was taken to the Mc-Donald hospital Sunday for medical treatment.

Mrs. Delbert Seneff was taken to the ing after being injured in a tractor Argos Saturday morning.

The Daily Vacation Church School. now in progress at the Methodist church, will continue through next week with a closing program for parents and the general public on Friday night, June 11, at 7:30 p. m.

THROUGH NEXT WEEK

BIBLE SCHOOL TO CONTINUE

Attendance on Tuesday was 73 and on Wednesday 86. C. O. Mollenhour took moving pictures of the children and teachers on Wednesday morning. These pictures will be shown at the Friday night program. The children will bring canned food, soap, soup, etc. for a relief package to be mailed to Europe. A sound motion picture was shown Wednesday on Pygmies of Africa. The picture to be shown Friday is on the Philippines.

Teachers and helpers are Mrs. Ruth Urschel, Mrs. Lois Davison, Mrs. Arvilla VanGilder, Miss Rowena Lackey, Mrs. Helen Mollenhour, Miss Doris Snider, Miss Ware, Miss Bonnie Emmons, Mrs. Martha Irwin, Mrs. Raymond Lash. Paul I. Irwin is the pastor

It is not too late to enroll your children.

FIRE ALARM SYSTEM IN-STALLED AT CO-OP. MILL

An automatic fire alarm system was installed in the Co-Op. Mill this week. Both top floors and the two cupolas are wired to a siren with fused wires and if this circuit is broken the siren sends out its warning. Any unusual amount of heat anywhere along the circuit will set off the alarm.

accident. Mr. and Mrs. Seneff reside on the Mrs. James Gill farm. Mr. Seneff was gone and Mrs. Seneff decided to finish a small amount of plowing. While going up a small incline, the tractor upset on her, pinning her underneath. She was able to free herself and call for help, but not for some time. A knee bone is fractured, and she is receiving transfusions.

Mrs. Walter Suter was brought to reside in the Harry Burden property the All-Star games must support the west of town.

Kenneth Horn underwent an ap-Woodlawn hospital last Friday even- pendectomy at the Kelly Hospital at tributions at each game. Games start

MEMORIAL DAY SERVICES WELL ATTENDED SUNDAY The Memorial Day services held here

ews

Sunday under the auspices of the Mentone American Legion Post, were well attended and very appropriate. A memorial plaque was unveiled at

the cemetery by the Mothers of World War II group of Mentone.

FORT WAYNE PEOPLE IN-JURED IN ACCIDENT HERE

Mr. and Mrs. Samuel Rhoades, of Fort Wayne, are recovering at the Murphy Medical Center at Warsaw where they were taken in the Johns ambulance following an accident six miles west of Mentone about 11:30 Sunday morning. The driver lost control of the car and skidded on loose gravel. Mrs. Rhoades suffered a fractured nose and jaw, a deep laceration on her right eyelid and other cuts and bruises about the body. Mr. Rhoades received fractured ribs and minor lacerations.

LEGION ERECTS SIGNS

The Mentone American Legion, Post No. 425, has erected highway safety signs at Mentone, Palestine, Burket, Beaver Dam, Talma and Tippecanoe.

HIGHWAY DEPT. MARKS STREETS

The State Highway boys were in town the forepart of the week repainting the parking zone lines. We note, too, that they decided to give us angle parking on the south side of Main street again.

ALL-STAR GAMES SCHEDULED: Harold Nelson, who is in charge of game scheduling for the Mentone All-Stars reports future games as follows:

June 11, Akron News here. June 12, Martindales at So. Bend.

June 18, No. Manchester here.

June 25, Argos here. July 2, Steven Oilers, Plymouth, here.

July 3, Warsaw AA at Warsaw.

July 5, Marion Rens, here.

Philip Blue is manager of the Allher home from the Kelly hospital in Stars and he and "Macy" state they Argos on Wednesday afternoon in the are picking on some of the best teams Johns ambulance. Mr. and Mrs. Suter in the area this year. Contributions at

entire softball program here and fans are urged to be liberal with their conat 8:15.

JULY "FOURTH" CELEBRA-TION HERE JULY FIFTH

Committees from the Mentone Lions Club are busy making arrangements for the big fourth of July celebration to be held here on Monday night, July 5th. Leo Valentine is general chairman of the event, and it is announced that there will be a kiddies' parade. softball game, fireworks display - and the boys have something up their sleeves on a little secret entertainment. "They ain't talkin', " but they indicate it will add to the evening's hilarity, etc.

PARKER

Mr. and Mrs. Rex Parker are the parents of a six and three-quarters pound daughter born Sunday evening at the Woodlawn hospital. The new daughter has been named Paulette Sue

REED - BROWN WEDDDING

At high noon Saturday, May 29, Miss June Brown, daughter of Mr. and Mrs. Clarence Brown, of Mentone, was united in marriage to George Reed, Jr., son of Mr. and Mrs. George Reed.

The ceremony was performed by Rev. S. M. Hill at his home here.

Mr. and Mrs. Reed plan to live on the Reed farm north of Mentone.

Both of the young people are graduates of the Mentone high school.

CLUB CALENDAR

CHEST X-RAYS-June 9, 9 a. m., to 12 noon and 1 p. m. to 3 p. m., at the school building.

HEALTH FACTS FROM YOUR NEW SOCIAL SECURITY STATE BOARD OF HEALTH ACCOUNTS FOLLOW GRADUATION

70,560 X-Rays Taken

An increase of approximately 50 per cent is shown in the number of chest x-rays taken since January 1 in Indiana in group x-ray screening programs as compared to the same period a year ago, according to Dr. Merle Bundy, director, Division of Tuberculosis Control, Indiana State Board of Health.

The number of x-ray films taken in 40 Indiana counties by two mobile units and one portable x-ray unit from January 1 to May 7, is 70,560. The x-ray surveys were made in cooperation with the local Tuberculosis Associations upon the request or approval of the local medical societies and health officers.

"They were made with about equivalent equipment in the field which indicates the local people are more willing to take advantage of this service which aids in the discovery of tuberculosis in the early stages," Dr. Bundy pointed out.

"Our units are scheduled throughout the remainder of the year with almost 40 percent of the time in 1949 I already spoken for." Dr. Bundy concluded.

"About 42 students and recent high school graduates are applying for original social security account numbers a week. At the same time about 20 students and former students are applying for duplicate numbers," Gerald Kelver, Manager of the Elkhart Social Security Administration Field Office announced today.

"The Social Security number is the worker's 'insurance policy' with the Federal government," Mr. Kelver explained. "Upon obtaining a social security number, an account is set up under which all wages earned under the program are credited. Students are urged to show their social security cards to their employers, so their wages may be credited under the correct number and name.

"If the worker has lost his social security card, he can get a duplicate immediately by sending or bringing the lower stub of his card to the social security field office. Duplicate cards should be applied for promptly, as many employers won't employ a person until he shows his social security card.

"If both parts of the card have been

lost, the worker should apply for a duplicate card, and not a new number. "Workers in Elkhart, LaGrange and Kosciusko counties should contact the Elkhart office of the Social Security Administration, located in Room 222 of the Equity Building for information concerning their Social Security accounts," Mr. Kelver concluded.

THE NORTHERN INDIANA CO-OP. NEWS

persons and turned down an additional 5,356 men and Women who applied for driving permits, according to an announcement by Thomas E. Bath, Secretary of State, and Commissioner of Motor Vehicles.

State safety officials who report a 17 per cent drop in the accident rate during the corresponding first quarterly period attribute a portion of the safety improvement to the new driver licensing program inaugurated this year. Mr. Bath explained that the process by which driver permits are renewed during the month of the birth enables the motor vehicle bureau to maintain a close check on operators with poor driving records.

"Before the year is over," the Secretary of State said, "we hope to have taken off the highways a majority of the 4 percent of the drivers who are responsible for 30 per cent of the accidents on Hoosier highways."

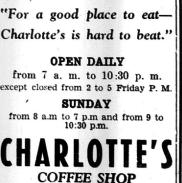

License applications refused because the new licensing setup disclosed the applicant as incompetent or unfit to drive totaled 1.124 Mr. Bath declared. An additional 3,905 driver permits were taken away by the Safety Responsibility Division for a variety of reasons including court convictions, accidents, physical disabilities, etc.

The Driver Examining Division granted 43,766 licenses during January, February and March, but 5,356 potential drivers were rejected by the examiners for incompetence behind the wheel. The examiners also granted 8,631 permits with restrictions which are shown on the driver's license before it is mailed to the applicant from the central issuance bureau in Indianapolis.

Prior to 1948, driving permits were issued promiscuously in Indiana, Providing traffic safety investigators with one reason for Indiana's low position in driving safety in the United States.

Ladino clover, if not pastured until the second year, can support 500 to 600 growing chickens per acre under favorable conditions. It is also excellent as a pasture crop in permanent yards for adult birds, according to Purdue dry pasture in July and August need University poultrymen.

Daily milk production per cow in Indiana was 17.8 pounds, a slight increase over the 1947 figure of 16.9 pounds according to information received at Purdue University from the Bureau of Agricultural Economics, U. S.D.A. The average production was 16.3 pounds for the 1937-46 average. A high of 18.4 pounds of milk per cow was reached in 1946.

Moonlight Rainbows Rainbows can be formed by moonlight just as they are formed by sunlight, but the colors are very faint and difficult to distinguish.

Wednesday, June 2, 1948

High producing cows need other feed in addition to pasture. Approximately one-half of the winter grain ration should be fed, Purdue University extension dairymen say. Cows on short grain, silage and even hay if their production is to be maintained.

Cost of Transportation The cost of transporting all food products adds about 10 per cent to the price consumers pay, and the expense of moving fruits and vegetables rapidly enough to avoid excessive waste makes up 30 per centof the final price charged for those classes of foods. One of the agricul-tural research projects approved for immediate action is an investigation of ways to cut food transportation costs.

Enjoy Ice Cream

Diabetics now can enjoy ice cream. A new Wisconsin law sets standards for a special ice cream sweetened solely with saccharine.

IN WEEVIL DAMAGE

Prevention of "weevil damage" to the new crop is possible if the granary is cleaned out before early summer and spraved with DDT. Glenn E. Lehker, Purdue University extension entomologist points out that nearly all cases of "weevily" grain can be traced to unclean bins.

The insects which infest stored grain in the Middle West do not fly to the fields and lay eggs in the growing crop except rarely in southern Indiana. This being the case, any infestations which occur, likely, come from insects which remain from year to year in the granary

Lehker makes the following suggestions for safe storage of grain in the farm bins:

1. Before the new crop is harvested all old grain and feed is removed from storage bins, and the bins swept thoroughly.

2. The bins and all other parts of the building where grain residues collect are sprayed with DDT. Care should be taken to spray behind bin linings and between partitions.

3. A 50 percent DDT wettable powder is used at the rate of two pounds in five gallons of water and applied at the rate of one gallon to each 300 square feet.

4. Harvest should be delayed until the grain is mature and dry. The moisture content should be below 14 percent and preferably 121/2 to 13 percent.

5. Grain should be stored as free as possible from broken kernels, weeds, the two directors, who serve two years.

stems, and other foreign material.

6. The granary should always be kept clean, and sprayed each spring with DDT.

7. Sacks of feed should not be kept near the granary.

LIBRARIAN TALKS TO

LIONS CLUB MEMBERS

Pearl Lackey, Mentone librarian, spoke before the Lions Club Wednesday evening and gave a very interesting account of how the library is helping the school children of Mentone, Beaver Dam and Atwood.

Ordinarily one is not aware of the service a library, or an active and interested librarian, is doing for a community, or the many ways in which it helps supply information to business and industry as well as citizens and students.

At the election of officers, the entire slate submitted by the nominating committee was elected to serve the coming year. They were:

President, Jack VanGilder.

First vice president, Delford Nelson. Second vice president, George Black. Third vice president, Richard Manwaring.

Secretary, Philip Lash.

Treasurer, Eugene Marshall. Tail Twister, M. O. Mentzer. Lion Tamer, Dale Kelley.

Board of Directors, Elmore Fenstermaker and Robert O. Jones. (Roland Ferverda and M. O. Bryan continue on the board for the coming year).

The new officers take their positions the first meeting night in July and serve for a period of one year, except

CARD OF THANKS

We wish to thank the firemen and all who helped during the grass fire at our home Sunday.

Mr. and Mrs. Simon Snyder.

CARD OF THANKS

I want to thank all those who have brought flowers, cigarettes, etc., and visited me while in the hospital. WALTER WILSON.

INHERITANCE TAX DUE

A state inheritance tax of \$215.17 is due in the estate of Elmer E. Meredith, it has been determined in circuit court. Net value of the estate has been placed at \$35,892.12 and transfers outside the estate at \$4,050. Heirs include the widow, Bertha E. Meredith; a son, Roy E. Meredith, and grandchildren, Marcia R. and John R. Meredith.

SPOTLIGHT TOURS

A motor trip to Vincennes in Knox County, Indiana is to convert the automobile into a time machine transporting its passengers back to the settlement of the Northwest Territory ear-P. O. Box 253, Plymouth, Ind. J2p | ly in the 18th century, according to the touring bureau of the Chicago Motor

Wednesday, June 2, 1948

Historical landmarks, memorials, old homes and public buildings that are outstanding examples of early American architecture, and vestiges of Indian civilization before the days of the white man carry the visitor through many stirring events of major historical significance, extending from the arrival of the French in 1732, through the Revolutionary War period, to the brink of the Civil War.

Four o fthe largest Indian mounds in Indiana flank Vincennes to the East and the south. Sugar Loaf Mound on State highway 61, one half mile east of the city limits, is the most picturesque. Pyramid Mound, about a mile south, not only is the largest, but it is exceptional for the symmetry of its conical shape.

Harrison Mansion, at Park and Scott streets, houses an exibit of pottery, skeletons, arrowheads, necklaces and other primitive Indian parphinalia excavated from Pyramid Mound. Built in 1804 by William Harrison, the ninth president of the United States, the mansion is a museum of local history

Occupying part of the site of Fort Patrick Henry, erected in 1732 by the French, George Rogers Clark Memorial is a 201-acre plaza commemorating in statuary and murals the exploits of George Rogers Clark in the Revolutionary War.

Near the Clark Memorial is Lincoln Memorial Bridge, with Lincoln Trail Monument on its western approach. The Lincoln family crossed the river at this point in 1830 when they moved from Spencer County, Indiana, to Sangamon County, Illinois.

Excellent specimens of early American architecture are Old Cathedral on Church Street, the finest structure in Indiana when it was erected in 1828, and Bonner-Allison Mansion, 5th and Main streets, built in 1842. Abraham Lincoln was a frequent visitor at the mansion.

Rocks That Burn

Sulphur springs, near the Idaho-Wyoming border in Caribou county, Idaho, is so highly charged with sulphur that the rock around it will burn with a steady flame.

Building New Porch Steps IF your porch has wooden steps that are in poor condition, it may pay you to replace them with new concrete steps rather than undertake repairs. Concrete steps last almost indefinitely and constitute a permanent improvement to a house. They also are safe, since they do not become slippery in wet weather.

Constructing forms for the steps should be easy for anyone handy at farm or household repairs. The simple illustration below gives a clear idea of how it is done.

Either 1-inch or 2-inch lumber is satisfactory for forms. They should be so built that the vertical distance between steps is about 7 or 7½ inches and the tread width of each step is approximately 10 inches. It is important that the forms be laid on ground that is level and firm.

Proper mixture of the concrete is essential. Recommended mixtures may vary with climates, so it is best to follow closely the directions of the cement manufacturer or your dealer. This procedure should produce concrete of a rather stiff consistency and containing sufficient mortar to make a smooth surface. When the concrete has hardened sufficiently in the forms to hold its shape, the forms may be removed. Uneven spots then can be filled and troweled smooth.

New Air Rides

THE GREATEST TIRE ACHIEVEMENT IN 20 YEARS!

Air Ride or Air Wing Tires replace 6:00 x 16 and 7:00 x 16 tires. 24 pounds pressure.

MORE AIR AT LOWER PRESSURE GIVES "FEATHER-SOFT" RIDING COMFORT—You float along on 8% less pressure, for the luxury of a "feather-soft" ride.

FLATTER, NARROWER TREAD MAKES STEERING AND PARKING EASIER—You'll be amazed at the new steering ease Federal Air Wings bring to your car. The narrower, flatter tread gives you effortless steering.

August always has been the No. 1 vacation month, but July rapidly is catching up in popularity with American sportsmen. A recent nation wide survey of active sportsmen disclosed that 19 per cent of those contacted had selected August, 18.7 per cent picked' July.

And more and more sportsmen are selecting winter monthes for treks to distant fields — some to the southland after fish and others to scattered places for upland and big game. From September through December 24.3 per cent will hit the trail.

Where are the sportsmen going? The largest group, 17.5 per cent will travel to Canada for summer fishing and fall hunting. Illinois, Michigan and Indiana will get 17.2 per cent. The west north central states (Minnesota, Iowa, North and South Dakota, Nebraska and Missouri) will draw 19.7 per cent of the sportsmen, and the mid-Atlantic states will get 8.4 per cent, with New England the choice of 8 per cent.

And how will they travel? The automobile, whether of pre-war vintage, or a new 1948 model, will carry 86 per cent, the train 5 per cent and all other modes of travel (bus, airplane) will carry nine per cent. Mostly there will be four to a party (27 per cent), with two next in line (25 per cent) and three tagging along with 14 per cent. If you're planing a summer or winter vacation, we don't know what your family budget will handle, but 61 per cent of the sportsmen contacted in the survey will spend between \$50 and \$250, 18 per cent will spend between \$300 and \$500, and 8.4 per cent will nick the bank account for between \$600 and \$1600.

And, quite a few of the boys—girls like "roughing it" for their vacat-

PHONE 4 on 134

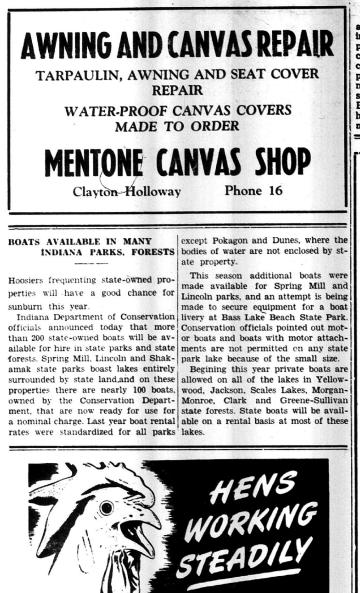

Wednesday, June 2, 1948

ions. A total of 21 per cent plan on camping out. But the largest group (50 per cent) will enjoy the comforts of cabins, and 14.5 per cent want the added comforts of hotel living.

Anyway you add it up, there will be more vacationists this year fishing the trout streams, bass lakes and coastal salt water areas than ever before. The United States is a nation of fun-loving sports-minded citizens, and that's the way it should be. So best of luck on your vacation.

HIGHLIGHTS ANNOUNCED FOR PURDUE FIELD DAY

Major attention at the Purdue university Soils and Crops Farm Field Day, to be held there Tuesday, June 29, will be focused on improved varieties of wheat, oats, legumes and grasses, fertilization studies, alfalfa breeding and 2,4-D demonstration of weed control. The field day is expected to attract more than 2,000 persons, Dr. N. J. Volk, head of the department of agronomy said.

0

Plans are being made to conduct the visitors on field tours which will be organized at frequent intervals between 8 a. m. and 10:30 a. m. (DST). Purdue staff members in the departments of agronomy and plant pathology will discuss the improved wheat and oat varieties as well as the newer grasses and legumes on the tours. Plots of ladino clover, alta fescue and the brome grasses, all forage crops, which have attracted the attention of progressive farmers in recent years will be observed in the morning.

Additional features will be the studies on early ripening wheats resistant to leaf rust, stem rust, loose smut and mosaic; weed control in corn and soybeans; high nitrogen fertilization on small grains and several alfalfa breeding plots.

An afternoon program will be presented by members of the university staffs, in the farm grove.

The Soils and Crops Farm is situated at the east edge of Lafayette at the intersection of the bypass of state road 52 and state road 26.

W. S. C. S. MEETS.

The Woman's Society of Christian Service of the Methodist church, met at the home of Mrs. Walter Lackey on May 26th. The meeting was opened by song 117, "Bringing in the Sheaves." Prayer was offered by Mrs. Rae Ward. Our Purpose was given by Mrs. Glenn Snyder and Mrs. Ward led the pledge. The call to worship, song 139, "Now the Day Is Over," was played by Mrs. Paul Irwin. Mrs. Clayton Goodwin gave the devotion topic, "The Whole Creation is Our Lord's." Prayer was offered by Mrs. Goodwin and the song, "The Church by the Side of the Road," was sung. Mrs. Jack VanGilder gave

a reading, "The Country Church." The topic, "The Rural Church," was

discussed with Mrs. Pauline Riner as leader. The program ended, following a round table discussion, with singing, The Church in the Wildwood."

Refreshments were served by Mrs. Mary Johnson and Mrs. Everett Long. The next meeting will be June 23 with Mrs. Glenn Snider.

RED CROSS COLLECTIONS

The county Red Cross collections so far total \$10,196. Franklin township, headed by Robert O. Jones and Mrs. Max Nellans of the Psi Iota Xi sorority collected \$485.30. Harrison township headed by Charles Hammer and the Psi Iota Xi sorority collected a total of \$574.30. Sewart township, headed by Mrs. George Parker, collected \$248.10.

Indiana will have the opportunity to enter the National Cherry Pie Baking Contest in February, 1949, if a state 4-H Home economics demonstration this summer should place in the A group at the annual state home economics demonstration contest which will be held at the State Fair, according to Miss May Masten, of the state 4-H club office.

CARD OF THANKS

Neighbors came to the Andrew Hall farm May 24 and disked, harrowed and planted twenty-two acres of corn. Those helping were; Ed Severens and his hired man, Jake McClone Jr., Fred Rush, Harvey Irwin, Howard Bib-ler, Roy Koser, Orla Grubbs, Harry Sullivan, Kenneth Goodman and Dean Nellans.

Mr. and Mrs. Hall desire to thank them so very much and take this op-

It is common experience to meet someone who claims that it doesn't matter what a person believes, religiously, so long as he is sincere in what he does believe. It is a serious delusion; and rather strange how intelligent men and women can accept such a theory, yet many do ac-cent it cept it.

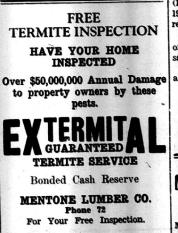

To maintain such an attitude of indifference towards matters re-ligious or otherwise, is very inconsistent. It places error on a par with truth, and there is no purpose in knowing the truth if error will give us the same result. We see at once the folly of such a disposition; for it discourages research, stiffes investigation, and impedes progress. Why anyone should wish to maintain an idea in religion, he would never tolerate toward any other matter, does seem strange. It shows, in principle, that such a person isn't entirely honest.

All who ignore the laws of force and gravity endanger their own lives and the safety of others. In the eyes of the judges of our land, ignorance of the law is no excuse. If it doesn't matter what we believe religiously, then God is a God of confusion, and the pagan and the cannibal are as near right as the Christian of equal zeal. The foolish-ness of such folly!

Saul of Tarsus was a sincere religious man worshipping God ac-cording to his conception of the scriptures, yet at the same time he was "chief of sinners" (I Tim. 1:15; I Cor. 15:9).

WELCOME TO THE CHURCH OF CHRIST

Sunday dinner guests at the Gran - | ville Horn home were: Mr. and Mrs. Howard Clipp and son, of Elkhart; Mr. and Mrs. Clarence Horn and family, of near Rochester; and Mr. and Mrs Howard Horn and family, of Mentone. SWIMMERS SOON TO ENJOY WATER AT STATE PARKS

Beaches and swimming pools at several state parks are scheduled to open for the season on the Memorial Day week-end.

Indiana Department of Conservation officials announced, May 27, it was planning to open the Shakamak, Lincoln, and Spring Mill beaches and the McCormic's Creek and Brown County park swimming pools by Memorial Day, May 30.

Swimmers will have to wait until about the middle of June to enjoy the three upstate park beaches at Bass Lake, Dunes and Pokagon.

Bathhouses are available at all state park beaches and pools. Red Cross water safety instructors and senior Red Cross lifeguards will be on duty at all places.

Improvements at these bathing spots since last summer include expansion of bathhouse capacity at Pokagon and Dunes; additional sand on beach at Shakamak; and additional showers and toilet facilitiess at Bass Lake. If material becomes available, a new permanent diving platform will replace the float at Pokagon.

Last summer 364,000 swimmers enjoyed state park pools and beaches.

FORMER MENTONE LADY IN OREGON FLOOD

Mrs. Frances Wainwright Dederick, daughter of Mr. and Mrs. Charl Wainright, on road 30 west of Warsaw, telephoned her parents Monday advising that she escaped from the flood waters at Vanport, Ore., but lost all her personal belongings.

She is a telephone operator-or was at Vanport and was sleeping when there was a knock on her door. She arose, dressed hurriedly and just as she reached a point of safety on higher ground, looked back and saw the building she had just left move away in the rushing waters.

Rev. and Mrs. John Knecht left Mon-Sid Dick, of Talma, while driving his day morning for Minnesota where Rev. Knecht will be the speaker at two W. S. W. S. Conventions, and other churches. They are expecting to return June 12.

MENTONE THE EGG BASKET of the MIDDLE WEST

PUBLISHED EVERY WEDNESDAY BY THE NORTHERN INDIANA CO-OPERATIVE ASS'N. OFFICE OF PUBLICATION, WEST MAIN STREET, MENTONE, INDIANA Entered as second-class matter November 18, 1936, at the post office at Mentone, Indiana, under the Act of March 3, 1879. Mentone, Ind., June 9, 1948

Volume 17, Number 52

STIFF SCHEDULE FOR MENTONE ALL - STARS

Harold Nelson, who is in charge of game scheduling for the Mentone All-Star softhall team has really arranged a tough schedule for the Mentone boys this year. He has gone out of his way to bring some of the best known teams of the area to Mentone this summer.

The home schedule is:

- June 11-Akron News.
- June 18-North Manchester All-Stars.
- June 25-Argos "Burkett's" July 2-Steven's Oilers, Plymouth.

July 5-Marion (Colored) Rens (4th of July Celebration.)

July 9-General Electric, Ft. Wayne. July 10-Goshen All Stars.

July 16-Cozy Theatre (Colored), So. Bend.

July 23-Zollner Reserves, Ft. Wayne July 30-Wheatley Center American

Legion (Colored), Ft. Wayne. Aug. 6-Model Engineers, Huntington.

Aug. 7-Warsaw AA.

Aug. 13-No. Manchester All Stars.

Aug. 20-Martindale's Insurance, So.

Bend Aug. 27-Cozy Theatre (Colored), So

Bend.

With a schedule like that above, one can expect some real All Star games this season. The softball association hopes for a good attendance at every game and expects generous contributions at each game. No charge is made at any softball game, and a collection is taken only at the All-Star games. This collection is the only means the association has of maintaining the field, paying expenses, etc., other than what is donated by interested individuals and organizations.

MRS. CURTIS RINER ELECTED SCHOOL ATTENDANCE OFFICER

Mrs. Curtis (Pauline) Riner, of near Mentone, was elected as county school attendance officer at the regular June meeting of the county board of education at the court house Monday afternoon.

Mrs. Riner will succeed Mrs. Bernie (Dora) Summey, who was a candidate for re-election, on August 1, when the new one-year term starts. Both have been candidates for the past three years. Mrs. Riner succeeded Mrs. Summey in 1946 and Mrs. Summey was elected last year.

BROTHER OF LOCAL PEOPLE DIES AT HOME NEAR PLYMOUTH

John F. Melton, aged 76, died at 6 p. m. Tuesday at his farm home, northeast of Plymouth, as the result of a heart attack. He had been in poor health for the past two or three years.

Mr. Melton was born in Seward township, Dec. 8, 1872, the son of Frank and Sarah Melton. Before moving to Marshall county 20 years ago he resided in the Mentone and Burket vicinity. He was married to Belle Rankin, at Burket.

Surviving relatives include a daughter Mrs. Cleo Hoffman, of Los Angeles, California, and a son, Irvin Melton, also of California; one granddaughter; one brother, George E. Melton, and a sister, Mrs. Mary Vandermark, both of Mentone.

The Reed funeral home is in charge of the arrangements for the services, The services will be held at the funeral home Friday afternoon at two o'clock, with Rev. S. M. Hill officiating. Burial will be in the Mentone cemetery. (No reply has been received from the son and daughter in California. Later word may make some alterations in the hour of the funeral services).

EASTERN STAR TEA

Sunday afternoon from 2:00 to 4:00 a tea honoring Eileen Fenstermaker, Grand Esther, of Indiana Grand Chapter O. E. S., will be held at the Masonic Hall. The public is invited and all Eastern Star members are urged to be present.

VACCINE FOR NEWCASTLE

Dr. F. R. Beaudette, poultry pathologist of the New Jersey Agricultural Experiment Station, will discuss his new discovery, Newcastle vaccine, on the National Farm and Home Hour, Saturday, June 12 (NBC, 12:00 noon CDST). Speaking from the NBC New York studios, he. will be interviewed by Samuel H. Reck, Jr., extension editor of the New Jersey College of Agriculture

Dr. Beaudette has studied more than a hundred strains of Newcastle virus in an attempt to cut down poultry losses from this disease, sometimes running as high as 50 to 70 per cent in stock under four weeks of age.

MINISTER RESIGNS Rev. Zane Mason, pastor of the First

Baptist church at Mentone the past eight months, Sunday read a mes of resignation to his parishioners. The resignation is reported to be effective after Sunday, June 20th.

BIBLE SCHOOL PROGRAM AT METHODIST CHURCH

An interesting program will be presented at the Methodist church Friday evening at 7:30 p.m., according to an announcement made by the pastor, Paul I. Irwin.

Memory work, handcraft, choruses, moving pictures of children, and pre-sentation of certificates will highlight the program. Parents and friends are urged to see the display of hand work. The program will be dismissed in time for the ball game.

Auxiliary Post No. 425, held their annual election of officers Tuesday evening, with the following being elected to serve during the coming year:

1st Vice President-Louise Kinsey 2nd Vice President-Arvilla VanGild-

Treasurer-Juanita Paulus. Chaplain-Ethel Wagner. Sargeant-at-arms-Geraldine Smith. Historian-Orpha Blue. Members at large-Vadis Ward, Bernice Jones and Mary Ann Stanford. Following the business session, de-

INTERESTED IN ANOTHER **JINGLE CONTEST HERE?**

Schlussel & Waldman, of New York City, telephoned this week and announced that they would conduct another jingle contest if the readers of the Co-Op. News were interested in competing for the prize money. Last year several readers received \$10 rewards. If you are interested, write to Schlussel & Waldman and state your desire for another contest.

Subscription-\$1.50 Per Year MARION RENS TO PLAY

HERE ON JULY FIFTH

The Marion Rens, the colored team that has appeared at Veterans' Park at Mentone on several former occasions, has consented to furnish the competition for the Mentone All-Stars at the Lions Club "4th of July" celebration to be held here on July 5th. Funny Mr. Hill, we are told, will be on hand to help entertain the fans. He will be remembered as the colored version of perpetual (mouth) motion that didn't know anything about playing softball-yet he let two strikes go by with nary a move of the bat, and then "tapped" the next one way out in the green grass of the outfield. And then to end the game, made a long catch way out in the field and then threw the ball into the catcher, right over the plate and two feet off the dirt.

Mistah Hill, we'll be waitin' for you.

TO GRADUATE FROM I. U.

Miss Ruth Lash, daughter of Mr. and Mrs. Raymond Lash, will be a member of this year's Indiana University graduating class. There will be 2,051 members in the group.

Ruth will receive her B. S. degree in education.

TOWN RECEIVES CHECK FROM CIGARETTE TAX SURPLUS

Mentone town officials this week received a check of \$330.71 from the distribution of the five million dollar surplus from the state cigarette tax fund. The funds are earmarked to be used on highways or streets.

MISS JUANITA BAKER GRADUATES

Miss Juanita Baker, daughter of Mr. and Mrs. Oscar M. Baker, of R. 2, Warsaw, received her A.B. degree at Marion College, Marion, Ind., at commencement exercises there Monday. Her parents attended the graduating ceremonies. Miss Baker has been assist-ing as an instructor in the music department of the college.

Grain prices may decline to support

A hungry cow is never comfortable. G. A. Williams, Purdue University extension dairyman says that providing a pasture program is the most important step in making a cow comfortable. Pastures should provide from 100 to 150 pounds of forage daily per cow in addition to water if she is to have comfort essential for high production.

Wednesday, June 9, 1948

What is the most popular fresh water game fish with American anglers? More fishermen try for crappies, bluegills and other small fish, and if these are classed together under the "panfish" heading, they would rank first. But of the larger fresh water gamesters, the largemouth bass is head and shoulders above the others in popularity. And the reason is simple: The largemouth is found in each of the 48 states and at least four of the border provinces of Canada that annually draw large numbers of American fishermen to their streams and lakes.

Maybe other species are more fun to fish for than the largemouth, but doubt that the merits of any fish we are greater. But, regardless of this argument, the largemouth bass is a "close-to-home" fish, wherever you live, and by sheer numbers outrank the others, consequently the No. 1 rating.

Second in popularity, at least geographically speaking, is the smallmouth bass, found in 40 states and six Can- and Mrs. Earl Davis and family, of adian provinces.

rainbow trout fall in line next. Brook ies are found in 34 states and eight Canadaian provinces; 35 states and six provinces are the locale for brown trout. Thirty-six states and five Canadian provinces offer rainbow trout fishing.

The walleye, known by almost as many different names as the number of states in which it is found, finds the water of 29 states and four provinces suitable to its taste. Northern pike are scattered throughout lakes and streams of 21 states and four provinces. Hard to please habitat is the lake trout (this fish likes his water just 40-45 degrees). Lakers are found in 17 states and eight provinces. And the muskellunge is another species that has difficulty in selecting proper quarters for this species is found in only 11 states and two Canadian provinces.

If you're planning a fishing trip this summer, selecting a spot will be simple, if the largemouth is the fish you are interested in. And, it's not too difficult planning a trip for smallmouths, or brook, brown or rainbow trout. But, if you are determined to outwit a muskie or tangle with a lake trout, your field of operations is more or less limited.

Mrs. Myrtle Davis entertained Mr. Brook, brown and Tippecanoe, at her home Sunday.

Insects on Bikini Atoll

Studies of the insect populations of Bilgini atoll indicated that the insect population might be termed "normal" for islands of that general area and that no structural anomalies were observed which might have been caused by the blast or radiation effects. Continuing stud-ies of drosophila cultures, taken in living form at Bikini island, thus far have not revealed genetic ab-normalities in excess of normal variability, according to A. C. Cole Jr., of the Bikini scientific resurvey staff.

THE EVERFAITHFUL CLUB The Everfaithful Club had quite a surprise awaiting them this club day June 3. Instead of the hostess, Mary Mollenhour entertaining the group at her home, she took the members to the home of her daughter, Velva Rogers, who now resides near Rochester. Everyone enjoyed visiting Velva's new home and it also made an adventure for the club.

Business was conducted by Mabel Nellans, July 1st.

Nelians and the trip committee made its report. The remainder of the afternoon was spent in playing Travel. Prizes went to Frances Marshall for rolling prize, Helen Black first and Fro Tucker consolation.

Lovely refreshments were served to sixteen members and one guest, Mrs. Phyllis Yelder.

The next meeting will be at the home of our club president, Mabel Nellans, July 1st.

KOSCIUSKO COUNTY'S REPUBLICAN NOMINEE FOR INDIANA GOVERNOR

THE HOBART CREIGHTON FAMILY. (Seated, left to right) Mrs. Creighton, Martha,

Mr. Creighton. (Standing, left to right) Josephine, Edward, Barbara.

Hobart Creighton, of near Mentone, is one of the strongest candidates to be considered at the Republican con-vention to be held Friday, June 11th. Mr. Creighton, one of the nation's largest poultrymen and speaker of the Indiana House of Representatives, has been putting on a concerted campaign for the republican nomination for governor of Indiana. Evidently all the announced candidates for the nomination are capable individuals, but Mr. Creighton's record in this respect cannot be surpassed. However, ability isn't always the yardstick by which-some political men measure a candidate-patronage oftentimes is much more attractive. If Hobart fails to secure the nomination it will likely be because he has refused to compromise with corruptive interests.

Lon Barkman, who has been confined to the Woodlawn hospital in Rochester, has been removed to his home here. Mrs. O. C. Montgomery, who has been ill with a blood clot for the past six weeks, is able to set up in a chair. Mr. and Mrs. Ralph Smith, of Rochester, were callers at the home of Mr. and Mrs. Harry Wenger Monday evening.

Christian Science board of Directors Monday urged Christian Scientists, in annual meeting in Boston, to work strongly and actively for the defense of free governments throughout the world.

Rightly conceived, the directors told the annual meeting of the Mother Church, democratic government is something more than an aggregation of legislative acts and legalized rules of conduct.

"It is the orderly unfoldment of the moral character and spiritual integrity of its citizens," the spokesmen for the worldwide Christian Science movement affirmed. As such, they said, free government rightly merits active defense of its sacred purpose, in addition to the pious declarations of allegiance to its outer form.

Mrs. Cleo Teeter, of Plymouth, was the week end guest of her mother, Mrs. L. W. Hatfield. Mr. and Mrs. Paul Miller, of Rochester, were Sunday guests of the former's parents, Mr. and Mrs. Fred Miller.

Mr. and Mrs. Victor Tobey spent Saturday afternoon in Rochester.

Mrs. Thurl Alber spent the week end in Chicago.

Mrs. Paul Scott and son Eugene spent Saturday afternoon in Rochester. Harry Case is seriously ill at his home here.

Miss Ruth Barr has returned to her home here after spending a couple of weeks in Ashville, N. C.

Mr. and Mrs. V. C. Tobey spent Sunday in Lucerne with friends. Mrs. Nancy Warren and Mrs. Cleo

Kallenbeck spent Saturday afternoon in Rochester.

Mrs. Joe Little spent Saturday afternoon in Rochester.

Mr. and Mrs. James Walsh and family, of Chicago, spent the week end here at their farm.

Mr. and Mrs. Verde Brockey called on Mrs. O. C. Montgomery Friday evening.

Mr. and Mrs. Lou Grove, Miss Ruth Barr and Mrs. Charles Good attended the circus at Rochester Saturday evening.

Lon Walker has returned to his home here after spending the week end in Cincinnati, Ohio and Indianapolis.

Mentone the guest of her mother, Mrs. and Mr. Blue a son at Madison.

Esther Borton.

John Lewis has returned to his home here after spending some time in Dayton, Ohio.

Mr. and Mrs. Estil Fish of Douglas, Arizona, will arrive in the near future to spend some time here as the guests of her two brothers, George and Bill Coplen, and also her sister, Mrs. Harry Wenger.

Miss Shirley Overmyer is the guest of her grandparents, Mr. and Mrs. Walter Overmyer, of near Richland Center, for a few days.

Mr. and Mrs. Loren Kramer were the guests of Mr. and Mrs. W. A. Dick Monday evening.

Mr. and Mrs. Harold Myers, of Elkhart, were week end guests of Mr. and Mrs. Robert A. Calvert and family.

Mrs. John Hatfield and daughter, of Chicago, are the guests of Mr. Hatfield's mother, Mrs. L. W. Hatfield.

Charley Shock made a business trip to Logansport Monday.

Jimmy Utter, small son of Mr. and Mrs. Wilbert Utter, has been dismissed from the Woodlawn hospital at Rochester.

Mrs. Rus Eckert of Indianapolis, will arrive Wednesday or Thursday for a visit with her grandparents, Mr. and Mrs. C. M. Walker.

E. E. Jones and C. O. Blue will leave by auto Saturday for Wisconsin. Mr. Mrs. W. A. Dick spent Tuesday in Jones will visit his son at Palmyra

COMFORTABLE BOSSIES

FILL THE MILK PAIL

Making the dairy cow comfortable during the summer months will help, her to fill the milk pail twice every day. G. A. Wiliams, Purdue University extension dairy service, says that a study of the reports of Indiana's 72 dairy herd supervisors shows that many herds have lower milk and butterfat averages during July, August and September than at any other season of the year.

Williams lists four good summer

IT DOES MAKE A DIFFERENCE

Suppose someone should say; "Wean the baby on milk or tea. Shine your shoes with black or white polish. Put new tires or old on your car, it doesn't make any difference, it's all the same! Drink arsenic or pop. Go to church or don't go. It doesn't make any difference."

But anyone knows that doesn't make sense. Tea is too strong for a baby-white polish on black shoes sure would make a mess-old tires would wear out before new ones. Everybody knows a little arsenic would kill a mule. But so many people stop right there and say that whether you go to church or not is your own business, and it doesn't make any difference in the long run. That, too, is nonsense.

We are here for a purpose. God has put us in the driver's seat behind the wheel. We are responsible for own own lives. The Bible says, "that the way of man is not in himself: it is not in man that walketh to Jer. 10:23). So we had better find out how to steer direct his steps." -what road to take-or we will meet a tragic fate-another casualty on the highway of life. We know there will be a life after death,-an everlasting life. Wouldn't it be foolish if we didn't try to find out about it? It is possible to find ourselves standing at the left of the Judge' instead of the right!

WELCOME TO THE CHURCH OF CHRIST

dairy herd management practices:

An adequate water supply is of first importance. No matter how much feed is given a cow, she must have water if the feed is to be utilized efficiently. Three to five pounds of water is required for each pound of milk produced, in addition to the water supplied in the feed. Building a few rods of fence may make water accessible to the herd at all times.

Overgrazing of pastures is one of the serious problems of grass management. By destroying the top growth of grasses, overgrazing starves the roots and without roots, grasses havelittle opportunity to grow and reproduce. However, Sudan grass can be sown after corn planting is completed. If one acre is allotted per cow, this pasture will carry a cow for six to ten weeks during the season of the year when permanent pastures are dormant and unproductive.

Shade is essential. Due to the large amounts of feed consumed in the daily production of milk, surplus heat must be radiated from the cow's body. Unlike horses, cows perspire very little and can only pant to regulate body temperature.

If a fly repellant is used after milking, the cow will have protection and consume more feed before mid-day than if disturbed by flies and is a more contented cow when turned to pasture.

INDIANA FARMERS BUILD 2.000 FARM PONDS IN TWO YEARS

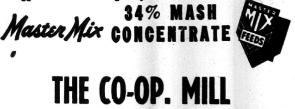

More than 2,000 Indiana farm ponds have been built during the past two vears, according to OUTDOOR INDI-ANA, official publication of the Indiana Department of Conservation. The article points out that these are farm ponds alone. Figures are not available for the number of lakes built for recreational and other pur-

many, which is not surprising when the advantages of such bodies of water are considered."

OUTDOOR INDIANA'S views on man-made lakes and ponds are summed up in the June issue as "A Farm Pond is More than a Hog Wallow.' To quote: "Water stored in farm ponds in times of plentiful rainfall for use in times of drought is now a common practice, and pasture land, not the water supply, has become the limiting poses of which there have been a great factor in stock raising. Among the hills

Turn your grain into more eggs. Feed hens not just grain but a complete laying ration you can make with Master Mix 34% Mash Concentrate and your grains. Your hens will get the extra proteins, minerals and vitamins lacking in grain alone. With a laying ration that's "right" you'll get more eggs in return for the grain you feed.

of little Ohio county there are a total until October 31. Bag limit on frogs is of 524 farms and 300 ponds." Other material in this month's is-

sue of OUTDOOR INDIANA includes an unusual article which should appeal to both the country boy and the city boy-"A Business Man's View of Conservation." Rounding out the magazine are such subjects as forestry, stream pollution, conservation clubs and our number one Hoosier game bird, the bob-white quail,

Hoosier anglers were reminded today by the Indiana Department of Conservation that the season on all bass and pike opens Wednesday, June 16. This means, of course, that game fish-protected by law since May 1again may be legally caught at any time after midnight on the 15th. Bag limits are six bass and six pike

per day. Minimum legal length is 10 inches for wall-eyed pike and all species of bass, but there is no size limit on northern pike.

With the abrogation this year of the closed season on panfish, only bass and pike have enjoyed the law's protection since May 1. The trout season will close September 1.

Conservation Department officials also pointed out that the 1948 frog season opened today (June 10) and runs Wednesday, June ., 1948

25 daily.

Beginning June 13, minnows can be seigned legally for the remainder of the year. Retailers of minnows and persons possessing 500 or more minnows must have a special \$10 license. June 13 also is the open season on mussels, for which clam diggers must have a special license. Fees for these mussel licenses, which are available at the Division of Fish and Game in the State Library Building at Indianapolis, are \$2 for Indiana residents and \$15 for non-residents.

BOWSER-KERCHER

-----Indiana State Library

x

In a double ring ceremony performed at 10:30 last Saturday morning, June 12, at the Methodist church, Eileen Kercher, daughter of Mrs. Dove Kercher, was united in marriage to David Bowser, son of Edward Bowser. The ceremony was read by Rev. Paul I. Irwin.

The bride was lovely in a blue taffeta dress, with a matching blue veil. She carried a Colonial bouquet of red roses and white sweet peas. For the "something old" the bride wore a string of pearls which had belonged to her aunt: "something borrowed" was handkerchief brought to her mother from Paris by a brother; the something "new" and "blue" was the wedding gown.

Jean King was maid of honor. Her dress was of pink marquisette and satin and she wore a matching headband. Her bouquet was of pink roses and lavender sweet peas.

The church was beautifully decorat ed with baskets of garden flowers by Mrs. Ora McKinley.

Earl Brunner, Jr., was best man.

Mrs. Paul Irwin presented an organ prelude of "With Someone Like You," 'Indian Love Call,' and "Living for Jesus." An uncle of the bride, London Imhoff, sang "Because" and "Through the Years," accompanied by Mrs. Imhoff.

traditional Wedding Marches The were played by Mrs Irwin on the Hammond organ.

Following the ceremony a reception was held at the Kercher home, where Mrs. Kenneth Shoemaker and Mrs. Wayne Bowser served at the refreshment table. A beautiful three-tiered wedding cake, topped by a miniature bride and groom, centered the table.

The bride and groom left immediately after the reception for a short wedding trip.

The newlyweds are both graduates of the Mentone High School. Mr. Bowser is employed at the Manwaring Leghorn Farm and Mrs. Bowser at the Mentone Lumber Co.

Mr. and Mrs. Harry Davis and daughter of Silver Lake and Mr. and Mrs. Howard Horn and family were Sunday guests of Mrs. Myrtle Davis.

Ms. Earl Meredith was a visitor at the homes of Mr. and Mrs. Alva Clinker and Mrs. Zora McFarland near Akron Sunday.

REPUBLICANS CHOOSE HOBART CREIGHTON AS THEIR NOMINEE FOR GOVERNOR

Kosciusko county citizens were filled with pride Friday night when it was announced that a native son, Hobart Creighton, had received the republican nomination as a candidate for governor in the coming November election. This, we believe, is the first time this honor has been bestowed upon one of our citizens.

The battle for nomination, watched by many local and county citizens, was one where sportsmanship was attempting to combat the combined forces of political prestige and trickery. The Jenner group managed to get the rules committee to establish methods of procedure favorable to their sidebut they were a few votes short on the first ballot. Other candidates for the nomination, realizing the futility of continuing their campaigns for the nomination, urged their supporters to transfer their support to the Kosciusko county man. This brought victory to Mr. Creighton on the second ballot.

The Co-Op. News, and the association which it represents, extends the best wishes of its readers and citizens for Mr. Creighton's victory in the November election.

This week, delegates at the democratic convention, nominated a former governor, 65-year-old Henry Schricker, to oppose Mr. Creighton in the election.

SHOEMAKER-BOGGS

Miss Nancy Ann Boggs, daughter of Mrs. Harry W. Boggs, Warsaw, was married June 12 to Byron Leron Shoemaker, son of Mr. and Mrs. Elmer S. Shoemaker, Silver Lake, the Rev. S. M. Hill officiating and the Rev. R. C. Plank assisting, in the Warsaw Methodist church. The bridegroom is a student at Manchester College. The bride was graduated from Manchester in 1947 and has taught the past year at Burket.

GRADUATES

Mr. Carl Rush was a member of the graduating class of Purdue University June 13. Carl received a B.S. in mechanical engineering. He has accepted leaf ones in a patch of lawn about one a position as junior petroleum engineer foot square. Few people find a four- with the Stanolind Oil and Gas Co., in the vicinity of Houston, Texas, and is Eaton, Shirley Igo, Mitzie Meredith, to report for work July 1.

TEMPERANCE SPEAKER AT THE CHURCH OF CHRIST

Mr. Allen Kraft, representative of the Indiana Anti-Saloon League, will be the speaker at the evening services of the Church of Christ, Sunday, June 20. Mr. Kraft is a most interesting and enthusiastic speaker. The public is urged to hear this man in his message on the temperance question.

MISS JEANNINE BLUE MARRIED SUNDAY AFTERNOON

Miss Jeannine Blue, daughter of Mr. and Mrs. Peter Blue, became the bride of Rex Yazel, son of Mr. and Mrs. Clyde Yazel of Etna Green, at three o'clock Sunday afternoon at the First Baptist church of Mentone. Rev. Zane Mason performed the double-ring ceremony before the altar, which was beautifully banked with baskets of flowers with seven-branch candelabra on each side. Mrs. Paul Perkins, pianist, accompanied Mrs. Ralph Baker, sister of the bride, who sang, "Always" and "Because

The bride wore a street length dress of white wool crepe with white accessories and a corsage of pink roses and white sweet peas. The maid of honor, Miss Eleanor Lantz, wore a street length dress of powder blue crepe, with white accessories and a corsage of pink roses. Harold Yazel, brother of the bridegroom, was best man and Mickey Eaton and Lee Edwin Norris were ushers to the 150 guests present at the beautiful ceremony.

A reception for about 55 guests was held in the bride's home, after which the couple left for a short honeymoon trip. They are now at home in Etna Green.

TO GIVE RECITAL

Mrs. Maude Snyder will present her piano and voice students in a recital at the Methodist church on Friday. evening, une 18, at 8:00, to which everyone is cordially invited.

The following students will present the program: Jackie Blue, Marita Tucker, Patsy Parker, Sherry Shoemaker, Martha Creigthon, Marilyn Rathfon, Mary Louise Summy, Lily Norris, Carol Ann Dickey, Sue Ann Fleck, Sandra Witham, Reed Riner, Nancy Ware, Mary Ellen Bryan, Carol (Continued on back page)

Hobart Creighton

CARROLL-LEININGER

The Rev. and Mrs. Kennth A. Leininger of College Springs, Iowa, announce the marriage of their daughter. Jane to Richard Carroll, son of Mr. and Mrs. Lee Carroll, of Coin, Iowa, May 23.

The bride is the granddaughter of Mrs. William Leininger, and Mrs. E E. Wideman of Akron. Mrs. Leininger and Miss Ann Leininger of Rochester attended the wedding.

BORTON

Barney Keith Borton made his arrival on June 15, at Woodlawn hospital, weight 8 pounds, 3 ounces. Mr. and Mrs. Keith Borton of Palestine are the proud parents. Mr. and Mrs. Barney Miller of Texas are the maternal grandparents and Mr. and Mrs. Austin Borton of Akron are the paternal grandparents.

MRS. MCKINLEY IN THE CLOVER Mrs. Ora McKinley was virtually "in the clover" the other day when she found five 4-leaf clovers and three 5leaf clover in a lifetime let alone five at one time.

THE NORTHERN INDIANA CO-OP. NEWS

GRASS SILAGE

Kosciusko county farmers may be "having in the rain" this summer. The growing popularity of grass silage is the result not only of its high feed value, but also because of its practical tions and feeding grass silage. The auaspects, one of these being that silage can be made in any weather, as long as farm machinery can work on the land.

Dr. W. A. King, dairy nutritionist and author of the new circular, "Grass Silage," No. 333, of the Purdue University Agricultural Experiment Station, says that it is one of the most feasible methods of preserving forage nutrients such as proteins, carbohyd-

rates, minerals and vitamins. With excellent alfalfa silage, liberally fed, little or no protein supplement is

needed in the cow's ration.

The circular discusses cutting grass silage, preservatives, silo rceommendathor recommends cutting for silage purposes, at one-half bloom stage for legumes and grasses and late milk stage for cereal crops. Information on moisture content and length of cut is also given.

The general types of preservatives, acids and sugars for acid fermentation and methods of using the preservatives are included. Molasses is the most po**OUR RETAIL OUTLETS** PERMIT US TO PAY HIGHEST MARKET PRICES FANCY QUALITY EGGS

HOME ECONOMICS MEETS

Mrs. Howard Horn of near Mentone ssisted by Mrs. Harry Sullivan, entertained the Mentone Home Economics Club Wednesday afternoon, June 9. After all participated in the opening, little Miss Horn gave the meditation by singing one verse of "Was That Somebody You."

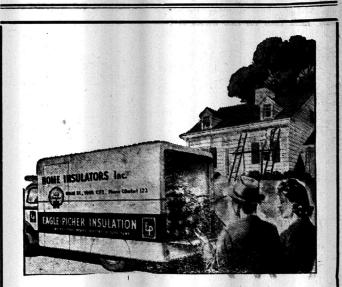

All joined in singing the song of the month, "Stars of the Summer Night," after Mrs. Cloice Paulus read the history. Mrs. Linus Borton read our health lesson, which was "safe use of elect-ricity." "Color in the home" was the lesson given in a very interesting way by our Home Demonstration Agent, Miss Marjorie Moore, and President Mrs. Roy Salman gave the report of the

County Presidents meeting.

Mrs. Harry Sullivan received the mystery package and articles sold in the auction were purchased by Mrs. Bertha Meredith, Mrs. Silas Hill, Mrs. Earl Smith, Mrs. Raymond Weirick and Mrs. Fred Swick.

Twenty eight members responded to roll call by mentioning "my best hour hold investment." Four guests were also present.

Library of Congress The Library of Congress was established in 1800, with an ap-propriation of \$5,000 for purchase of books and for fitting up a room in the capitol to house them. It serves primarily members of congress, government departments and the public.

You, too, will be happy to have an Eagle-Picher Certified Insulation job installed in your home by competent workmen with the most modern equipment available.

No wonder our many customers say "Our home is much cooler in summer and warmer in winter.'

BIG FIVE-RING RAILROAD CIRCUS TO EXHIBIT IN THIS VICINITY

One of America's biggest railroad circuses is headed for this vicinity and will exhibit at Warsaw fairgrounds on Thursday, June 24, with performances at 3 and 8 p.m. This is the Dailey Brothers Circus, fastest-growing of the tented enterprises, and a five-ring aggregation presented under the longest big top on the road this year.

By actual count, Dailey Brothers Circus has 25 elephants, including the smallest in America-a baby recently arrived from India with a shipment of other circus wild animals; a huge wild animal menagerie exhibited in connection with the main show and at no extra charge; scores of circusdom's fore most stars of the air, the rings and the hippodrome track: trained lions, tigers, bears, more than 100 fine horses including the blue ribbon winning stallions, "Major," "Lipstick" and "Black Diamond;" cowboys and Cheyenne Indians and other features which travel on the circus train of twenty five double length railroad cars.

The circus will bring a galaxy of inches of rain. At the Conservation Depretty and talented girls in hazardous aerial, acrobatic and bareback riding presentations and features a costly wardrobe to highlight the majestic new super-spectacle, 'Bengal." The Dailey Brothers show features popular prices and advertises them plainly in every area it plays.

MONTH OF MAY STARTED WET. BUT ENDS DRY

Although Indiana crops were threatened by drought conditions during the latter part of May precipitation for the month was almost normal, according to state government researchers.

The Indiana Department of Conservation's monthly water resources report points out that heavy rainfall in the early days of May evened up the later dry spell. Precipitation averaged out over the state, the report stated, except in the northwest corner of Indiana, where rainfall totalled between 50 and 100 percent above normal.In the Valparaiso-Laporte area, a May 10th cloudburst produced more than three

precipitation was checked at barely below normal.

showed the average level of lakes rose partment's principal north and south only slightly, but heavy rains in the gauging stations-Marion and Shoals- early part of May caused the lakes in that area to approach the highest level in many years. During the month, the ground waters gradually declined.

THE NORTHERN INDIANA CO-OP. NEWS

IBRARY

Because of the lack of available historical records of our town and because we have had requests for these early records, we are going to assemble all the material we can obtain relating to the early history of our community. All material submitted to us will be published in the Co-Op News through the courtesy of Mr. Cullum. It will then be clipped, sorted, and filed in the Mentone Public Library, where it will be available to anyone wishing to read or copy it either now or in future vears.

If you know of some interesting incident in the early history of our community, please write it out and bring or send it to the Mentone Library.

EARLY POST OFFICES IN KOSCIUSKO COUNTY

basis of this article is the (The March 12, 1941 issue of the Warsaw Daily Times which was loaned to us by Mr. Lloyd Rickel of Mentone. The Times obtained their information from the postoffice department in Washington, D. C.)

The first postoffice in our county was established at Leesburg when this territory which is now Kosciusko county was still a part of Elkhart county and was known as Turkey Creek township. The first postmaster of Leesburg Mr. John B. Chapman, was appointed April 23, 1834.

February 11. 1837 a postoffice was established at Warsaw with the appointment of Jacob Baker as postmaster. That same year. March 21, A. M. Perrine was appointed postmaster of a new postoffice in Milford and on July 24 a new postoffice was established in Syracuse with appointment of Henry Ward as postmaster.

During the summer of 1837, by act of the Indiana Legislature, the territory now known as Kosciusko county was detached from Elkhart county and became a new county. Leesburg was at that time the chief town in the new county and was a strong contender for the location of the county seat. In fact, the first term of court held in the new county was at Leesburg.

However, the projected Pittsburgh & Fort Wayne Railroad through the center of the county and the consequent creation of the village of Warsaw soon changed sentiment in favor of locating the county seat at Warsaw since Warsaw was located in the center of the county. (Center Lake in Warsaw is reputed to have been so named by a surveyor for the projected railroad because it was the exact geographical center of the new county.)

The postoffices now in operation in Kosciusko county not already mentioned were established in the following order:

Claypool, Oct. 26, 1841, Joshua Caldwell, postmaster.

North Webster, June 14, 1848, T. G. Boydstom, postmaster.

Etna Green, June 14, 1849, William Taylor, postmaster. Pierceton, Nov. 17, 1853, Lewis Keith

ostmaster Silver Lake, (under the name of Silver Lakeville) was established May 10,

1854, Jacob Paulus, postmaster. Atwood, Nov. 23, 1864, Ira N. Hovey postmaster.

Wawasee(under the name of Cedar-Beach) Aug. 21, 1879, John T. Riddle, postmaster.

Sidney, July 26, 1882, E. Radcliffe, postmaster.

Burket, Sept. 25, 1882, A. A. Kistler postmaster.

Mentone, Dec. 6, 1882, John Johnston, postmaster.

Winona Lake (under the name of Eagle Lake) Dec. 31, 1889, Fred Beyer, postmaster.

Rural free delivery service was started in the county in 1899 with two routes driven by Milo James and William McCarter.

DISCONTINUED POSTOFFICES (Details supplied by Mr. Fred Swick and Mr. Clark Ernsberger.)

Nineteen other postoffices were es tablished during the early history of our county, but they were all discontinued later on. Among these Beaver Dam postoffice was established in 1844 with Samuel Rickel (grandfather of Lloyd Rickel) as postmaster. Sevastopol postoffice was established in 1858 with William Dunlap (also a grandfather of Lloyd Rickel) as postmaster. Palestine postoffice was established under the name of Tipicanunk in 1838 with James Woodden as postmaster.

Oak Ridge postoffice, located east of Mentone on what is now the Abe Whetstone farm, was established in the 1870's. In 1882, the postmaster was Mr. John Jonhston (an uncle of Levi Jefferies who also operated a store at Oak Ridge, December 6, 1882, Mr. Jonhston moved his store and the postoffice to Mentone and located where Mrs. Yocum now lives.

Another postoffice was established near Mentone in the 1870's. It was named Yellow Creek and was located on the land which is now occupied by the homes of Mr. Fred Swick and Mr. Truman Yong. Yellow Creek postoffice was a part of the small village called Little Chicago. There was in the village a M. P. church, a drug store, Billy Hire's blacksmith shop, two sawmills, three dwellings, and a general store operated by Mr. Allen Blue. When Mentone was built, the business buildings at Yellow Creek were moved to Mentone

The M. P. church was also moved to Mentone and occupied the site now owned by Mr. Ray Rush. Later, it was abandoned and sold. It was moved across the Nickle Plate railroad and is now occupied by Tommy Stanford's garage.

In the 1860's a Star Route was created and operated by horses and a hack between Warsaw, Palestine, Oak Ridge, Sevastopol and Beaver Dam. This hack carried both mail and pas- details is one of many interesting

sengers. From Oak Ridge postoffice, the mail was carried to the Yellow Creek postoffice by a man on foot. The Star Route was abandoned with the building of the Nickle Plate R. R. and the founding of Mentone and Burket.

RECORD OF MENTONE POSTOFFICE

(Listed first is the name of the postat that time.)

John Johnston, Dec. 6, 1882, where Mrs. Yocum lives.

A. C. Manwaring, Oct. 24, 1883, where Farmers State Bank is now located. C. E. Doane, April 8, 1884, same lo-

cation. Lewis S. Clayton, Sept. 1, 1885, Dr.

Urschel's building. W. C. Wilkinson, May 18, 1889, where

Wade Whetstone operated his tailor shop for many years.

Unie Clark, June 22, 1893, same location.

John G. Owen, Aug. 27, 1896, same location.

Austin Milburn, Aug. 2, 1897, site of new Lake City building.

John Frank Bowman, Feb. 14, 1907, same location.

Lloyd Dunlap, Aug. 30, 1913, east of present location of telephone office. Earl Shinn, March 23, 1922, where

print shop is now located. Lloyd Rickel, June 16, 1934, corner

of Main and Broadway.

LON WALTERS RETIRES. FROM CO-OP. OIL STATION

A. A. Walters, who has served as tank truck driver for the Co-Op. Oil Station the past 12 years, has given his resignation and plans to take life a little easier for a while. Lon has made many friends while making his calls among the farm folks of the vicinity, and it is with regret that he realizes that his work will no longer take him on these friendly visits. However, he has truly earned a little relief from this strenuous occupation, and we are glad that he has chosen to allow himself more leisure time to enjoy more of the pleasures this world affords before the complications and ills of old age prevent him from participating in his love for travel, fishing, hunting, etc.

Vern Weiger, who has been an employee of the Cooperative for some time, will take Lon's place helping Claude Gates operate the two tank wagons.

Shower cabinets complete, aluminum sides. Special \$49.50. Peterson's Hardware, Mentone, phone 125.

IMMORTAL PITCHER IN

JUNE RURAL GRAVURE Cy Young, the immortal pitcher who won 511 major league games in 22 years of diamond history, now occupies himself on the farm of a friend near Peoli, Ohio. His picture and other

BEES SWARM ON KOHR "CAR"

Monday a swarm of bees decided to rest a while on Howard Kohr's famous Chevy coupe while it was parked near the Hill & Lemler store. Elmer Quier, seeing the bees, got a cardboard carton, coaxed the queen inside and most of the swarm followed her in it. Elmer now has a swarm of bees housed ready for production.

Reports from Howard indicate that the paint job on his Chevy wasn't materially damaged by the bees.

DEWEY FLYING HIGH TODAY.

Dewey Whetstone, one of Mentone's most determined fisherman - and a man fully experienced in the artcame off of Caldwell lake this morning acting as if he had a couple of outboards hitched onto his shirttail. He caught a bass weighing almost four and one-half pounds, and that's something to really brag about in this part of Indiana.

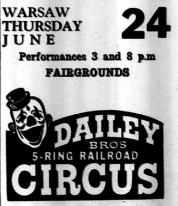

For Father, next Sunday, cigars, cigarettes, tobacco and lighters.-Denton's Drug Store

HEALTH FACTS FROM YOUR STATE BOARD OF HEALTH

NEW TWIST OF POLIOMYELITIS

The annual cycle of poliomyelitis has taken a new twist in Indiana this year,

THE NORTHERN INDIANA CO.OP. NEWS

according to Dr. Robert Serfling, dictor, Division of Public Health Statistics, Indiana State Board of Health. The average annual low point occurs during the week ending March 20. A comparison of this year's reported cases with those of the past five years re-veals a greater number reported in 1948 since the usual annual low period A total of 15 cases is reported for this

year for this period in comparison with an incidence since 1943 of three, two, six, two and two cases for the same time. In 1947, an unseasonable higher frequency of reported cases was in the early part of the year.

"During the summer months the in-

ually rises and so we are keeping a close check on the disease," Dr. Serfling "For a good place to eat points out. "The comparison of the Charlotte's is hard to beat." annual low period is made as a guide for the current observation of the 1948 season."

Dr. George M. Brother, director, Bureau of Preventive Medicine, Indiana State Board of Health, points out that it is conjectural whether or not this presages a higher incidence of poliomyelitis for the coming months.

WHAT LIES AHEAD?

We all know that there will be a life after death. Yet so many of us jump off at the deep end without knowing anything about what is in store for us.

If we decide to buy a new suit or hat, we shop around and visit one store after another. If we want to take out an insurance policy we start looking around and reading ads. We consult the Prudential agent and compare his rates with the Metropolitan man's... But when it comes to everlasting life, we just close our eyes and hope for the best.

Maybe you don't believe there is a hell—and maybe you're wrong. Suppose you should wake up some day and find yourself in hell! It isn't a very pleasant thought, but then all truth isn't pleasant. A man needs to have an operation. He doesn't like the idea very much, but nevertheless it's the truth; and unless he has the operation, he will die. Yes, there are some things we just have to face and it would be quite a jolt if you were to wake up on the other side of the grave to find you had spent life "barking up the wrong tree."

Are you living in a fool's paradise? There is such a thing. Take the people of France, for instance. They lived there until they suddenly woke up and found Hitler's troops goose-stepping down the main streets of Paris. They had thought their armies were unbeatable. Until the last they thought France could not lose. They were surprised and stunned.

How can you be sure you won't some day get a like uncomfortable surprise?

WELCOME TO THE CHURCH OF CHRIST

MANY INTERESTING POINTS FOR SUMMER VACATIONISTS

Vacation-bound motorists who have not selected their travel destinations as yet should not overlook the well developed system of state parks and recreation areas in Illinois and Indiana.

Accomodations are available at and in the immediate vicinity of the state parks but should be reserved in advance during the vacation period. Facilities for tent or trailer camping are also available in some of the parks. Recreational facilities consist of boating, fishing, swimming, horseback riding and hiking.

Indiana has fourteen state parks, the largest of which is Brown County State Park. Located south of Nashville on State Highway 46, it is one of the most beautiful state parks in Indiana. Meals and accomodations are available at the Abe Martin Lodge in the park with twenty cabins for short stays.

Indiana Dune State Park has a 3mile frontage on Lake Michigan and is located about 10 miles west of Michigan City on State Highway 49. Room reservations can be made at the Dunes Hotel and Pavilion with facilities for tent and trailer camping.

Scenic beauty for tourists will be found at Clifty Falls State Park near Madison. Indiana. Overlooking the Ohio River Valley. the park is cut by the deep gorges of Big Clifty Creek and small tributary streams. Excellent accomodations are offered at Clifty Inn located in the park. Areas for camping are available also.

One of the most successful pieces of historical restoration in the country-Spring Mill Vilage-is in Spring Mill State Park, 3 miles east of Mitchell, Indiana. A frontier trading post founded about 1815, the village includes the reconstructed saw mill, the post office and many of the original residential buildings. Spring Mill Inn is one of the newest and best of the state park inns.

Turkey Run State Park, 2½ miles north of Marshall, is noted chiefly for its geological formations and rugged canyons formed in the glacial period. It is traversed by Sugar Creek which abounds in black bass, crappies, rock bass and other fish. Accomodations are available at Turkey Run Inn.

WIRING OUTSIDE AND INSIDE ELECTRICAL REPAIRING FIXTURES & APPLIANCES FOR SALE

Try this simple test

Throw a handful or two of salt to your bogs. If they are getting enough, they'll ignore it. If not, they'll relish it a signal to give them salt free choice. Most hogs don't get enough salt. Yet, like all livestock, they need it. It is tankage and other meat by-products, hogs need additional salt. Today, when hog rations are balanced largely with vegetable proteins, low in salt, the need is even more acute.

Suit Stimulates Dig

Livestock need salt for its sodium and chlorine — sodium for complete, economical digestion of fars and car-bohydrates; chlorine for hydrochloric acid to convert feed proteins into body tissue. Salt is the most essential mineral.

Feed Salt Free Choice

The best way to feed salt is to feed is fire choice. The best salt to feed is Morton's Free Choice Salt, especially developed for livestock, and now for-mulated to remain non-hardening under normal use and storage conditions. Ask your dealer for it by mame. Morton Salt Company, Chicago 3, III.

JOHN BEAN LANSING 4, E MICHIOS

Install a time clock on every farm in the nation and likely you would find that dairy farmers, as a group, work longer hours and fuller days, the year around, than any other class of farmers.

Though their work week is a long one, chare time has been cut, dairy drudgery lightened, and the dairyman's work made more pleasant and profitable through the use of modern dairy methods and modern dairying equipment

At the close of World War I, the majority of dairy farmers were still milking by hand, feeding cows by lantern-light, and spreading manure from wagon boxes a forkful at a time. Today, electricity, milking machines, rubber-tired manure spreaders, and other production equipment are taking the backache out of dairying and boosting milk production and profits.

The pictures shown here illustrate some of the ways new ideas and new equipment are lightening the dairy farmers work load.

BLUE RIBBON Canning Tips

Full shelves of canned delicacies like these and the "ohs" and "ahs" at our dinner table this fall and winter will be ample reward for the work we do now during canning season. Canning is an exact science, and following detailed directions to the letter is the big secret of blue ribbon winners at the fairs.

I am giving here a few tips on things that are important and a few that are new and may not be included in your canning book. Check your canning and freezing library and if it is not complete, I'll be glad to send any of the materials offered in the Bulletin Board.

Pick fruits and vegetables in top condition, handle carefully, wash thoroughly, be sure all equipment is clean, and can quickly. Even a little spoiled spot will ruin a jar.

Have a good canning book and follow instructions carefully. Be sure processing time and method is correct. If you do not have such a canning book, get one from your grocer, or see Bulletin Board below.

- Two of many important canning instructions are these which help insure a perfect seal.
 Before filling jar, examine top to see that there are no nicks, cracks, sharp edges, etc. After filling, wipe free of all seeds, pulp, etc.
 Test lids for seal as follows: When jars are cold, take a spoon and gently top the lids. If properly sealed, they will give a clear, ringing note, and be slightly concave (curved inwardly) caused by the vacuum inside.' If not properly sealed, the sound will be duil and low in key, in which case you have an apportunity to re-can contents and thus save your food. If food touches lid the sound will be duil, but not hollow or empty like unsealed jar.

YOU GET recipes for putting up all fruits and berries... tips on buying and storing... new ways of serving fruits.

YOU GET secrets of wonderful pickles, jams, jellies, juices, marmalades, etc.

*KARO is a registered trade-mark of Corn Products Refining Company, New York, N. Y.

Electric Fencing Can be PROFITABLE

Successful Electric Stock Control is being done. All the time-saving, labor-saving and material-saving advantages of Electric Fencing can be YOURS, too . . . if you refuse to skimp on any one of these items:

An Approved, Dependable CONTROLLER

This is a Surge Controller, approved by the Wisconsin Industrial Commission, built to deliver a stock stopping sting with the dependability of a light meter. Designed to prevent points sticking or corroding, sealed against weather and dirt.

2 A GOOD GROUND

An iron rod or galvanized pipe driven at least 7½ feet into the ground and connected to the controller with at least #8 copper wire clamped or soldered at each end.

3 An INSULATED Fence Wire

Not just some rusty wire fastened up with common porcelain-type insulators that let the stock get away during a heavy dew. Surge All glass insulators on wood posts or brackets may cost more—but they LAST, don't short-out in most bad weather, can be used time and again. Use smooth galvanized wire it's easier to move and work with—and DO make good splices and connections.

CELEBRATION AT

Mentone, Ind., June 23, 1948

MENTONE JULY 5

The Mentone Lions Club is again sponsoring a free celebration at Veterans' Park Monday evening, July 5. The program starts with a kid circus parade et seven o'clock and ends with a fine fireworks display. The evening's program also includes a softball game between the Mentone All-Stars and the Marion Rens, a colored team that has put on some mighty fine exhibitions of softball (and the usual antics of the dusky players) at Mentone.

The children's circus parade last year proved a very entertaining feature. The fact that only children participate, makes their creations, impersonations, etc. doubly interesting.

The program committee has arranged a surprise feature which they claim will be worth your while to witness.

The fireworks display is under the strict supervision of a state licensed operator that has had several years experience in arranging a display of awe-inspiring beauty.

LIBRARY HOURS

Tuesday, Thursday and Saturday afternoons from 1:00 to 4:30, and Saturday evening from 7:00 to 9:00.

UNDERGOES SURGERY

Annabelle Mentzer was able to return home on Tuesday of this week following major surgery performed the previous Tuesday at Memorial Hospital in South Bend.

CHEST X-RAY REPORT

Over 900 people took advantage of the facilities offered by the mobile xray unit this past month and had chest x-rays.

This survey was sponsored by the County Tuberculosis Association.

CLUB CALENDAR

MENTONE HOME EC CLUB will hold a special tailoring lesson at the schoolhouse Thursday afternoon at 1:30. Each one is asked to bring her sewing kit and some small swathes of material. Mrs. Roy Cox will present the lesson.

FRIENDLY NEIGHBORS Home Economics Club will meet Friday, July 2, at 9:30, a.m. with Mrs. Frank Hudson, to go on a surprise shopping trip. All members are asked to be there to of his contribution to medical progress E go promptly at 10:00.

ANNOUNCE ENGAGEMENT Mr. and Mrs. Jake Gross of Mentone

are announcing the engagement of their daughter, Lois, to Harold J. Wagner, son of Mr. and Mrs. John Wagner of Union, Michigan. No definite date has been set for the wedding.

Miss Gross is a graduate of the Mentone schools and is employed at the Studebaker office. Mr. Wagner at- with Lloyd Tomas as an alternate memtended the Elkhart school and is employed at the Elkhart Packing Co.

CHILDREN'S DAY AT PALESTINE Children's Day program will be given at the Palestine Christian Church Sunday at 7:45 p.m. Everyone invited.

RETURN FROM MEDICAL MEET Dr. Dan Urschel and Denton Abbey returned from Chicago Tuesday evening after attending the annual meeting of the American Medical Association.

Dr. Urschel reported on the very interesting meeting of the international organization called the InterAmerican Cardiological Congress. This is composed of heart specialists from all of the countries in North and South America, and invited guests were present from most of the European countries except Russia and Germany. Speechcs were in English, French, Spanish and Portugese, with interpreters for all languages. Some of the speakers could speak several languages, and after giving a talk in one, they would summarize it in one or more additional tongues. It was a miniature United Nations, and sometimes presented some interesting features. A doctor from Egypt was introduced by an American Jew. Delegates were present from both Israel and the Arab states. In all, 31 nations were represented.

From a medical viewpoint, the most significant developments reported were in the field of heart surgery. An Argentine reported direct surgery on the valves of diseased hearts, the first time this has been done in this fashion. though a doctor from North Carolina has had one patient in whom he performed a similar operation.

Following four days on the Inter-American group, the American Heart U Association held its annual meeting. Dr. Urschel is a Founder member of the Scientific Council of this organization, having been selected because in the study of heart disease.

Subscription_\$1.50 Per Year ESTONIAN WAR REFUGEE WILL

SPEAK AT ETNA GREEN

MENTONE

THE EGG BASKET

of the

MIDDLE WEST

Mrs. Paul Truman of Plymouth, a war bride from Estonia, will be the featured speaker Sunday morning at the Etna Green Methodist church. Mrs. Truman will tell of her experiences as a girl growing up in the little Baltic country as it nestled uneasily for years between the shadow of the Russian bear on one side and the growing menace of Nazi Germany on the other. Estonia was one of the first countries to be swept away when war broke in 1939. She will tell of her experiences behind the hated Russian lines, of underground activities, of the turn of the tide of battle and the inundation by Nazi storm troopers, and the underground behind the German lines. Then the tide turned again and the Russians rolled back over her country, wave after wave. She will also tell of life in several displaced persons camps and of her final escape and marriage to Captain Paul Truman of the United States Armed forces.

Hers is one of the most amazing stories to come out of the terrible war years, and it is a great experience to be able to hear her.

In addition to the people of Etna Green community who will hear her, several have indicated they are coming from surrounding communities. The Atwood Methodist people are coming in a body.

HONOR REV. HILL

Sunday, June 20, the children, grandchildren and great grandchildren of Rev. and Mrs. S. M. Hill met at the home of Mr. and Mrs. Fred Lemler for a Father's Day dinner. There were 43 present, including his five children, Mrs. Earl Whitman of Chicago; Ellis Hill of Larwill; Mrs. George Krider, Columbia City; Mrs. Fred Lemler of Mentone and Mrs. John Knecht of Mentone. Sixteen of his 20 grandchildren, and nine great grandchildren were present.

Rev. Hill received a number of gifts which he appreciated very much.

Mr. and Mrs. Mead Haimbaugh of South Bend, Maurice Heimbecker, son Don, daughter Marjorie, of Detroit; Mr. and Mrs. Herschel Lehman, and Mr. and Mrs. Fred Hartman, sons Char-0 les and John, daughter Mary Beth, of

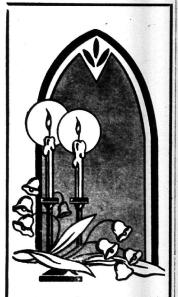

2 Warsaw, were Sunday dinner guests at 1 the home of Obe Haimbaugh west of 3 town.

University entomology department says that, however, with modern insecticides, it is very easily controlled.

The new insecticide, DDT, has prohornfly control, and its use will result in a great saving in milk and meat production at a relatively small cost. According to Davis, DDT wettable

powder, applied as a spray, is one of the most effective and inexpensive materials known. In general, a spray of eight pounds of 50 percent DDT wettable powder, per 100 gallons of water, applied at the rate of one to two quarts per animal, is effective and practical. Three applications per sea son are usually sufficient, the first one to be made at the beginning of the fly

BUY YOUR ENERGY CHEAPLY IN SPUDS, SAYS SPECIALIST

Potatoes are one of the cheapest energy foods, if properly prepared, states Miss Lois Oberhelman, extension nutrition specialist, Purdue University. Penny for penny, they have more energy giving value than any other vegetable. A heavy crop of potatoes this year gives homemakers the opportunity to use potatoes more frequently in meals at a savings.

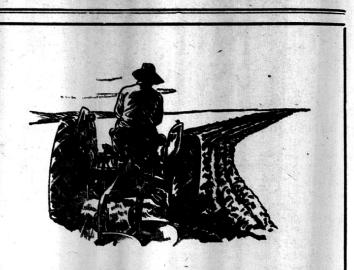

Many people shy away from potatoes because they 'think potatoes are fattening. It's not the potato that is fattening, says Miss Oberhelman, it's the gravy or fat that goes on top. One medium-sized potato has about 100 calories which is no more than an apple or banana, slice of bread, and only one-fourth tr half the calories of a medium-sized piece of pie.

The easiest and most nutritious method of preparing potatoes is to boil them in the jacket or to bake them. Research work has proven that of these two methods steaming in the jacket retains two to three times more vitamins B and C than baking. Frying, including French frying, or mashing may destroy most of the vitamins and minerals due to losses from peeling and destruction from water and air during cooking. Potatoes pack one-fourth of the daily vitamin C quota under their jackets, besides some B vitamins, iron and other important minerals and starch.

Peeling potatoes takes times, too, so even if they are to end up as parslied, mashed, creamed or fried potatoes time can be saved by boiling them in the jacket and then skinning them. Potatoes riced with their jackets on can save much time. The jackets will stay in the ricer.

ATTEND CONVENTION AT GARY

On Friday and Saturday, Mrs. Mott Bryan and Mrs. Harold Utter were delegates to the 49th convention of Psi Iota Xi. The Crown Point chapter was hostess at Gary. Beta Epsilon, of Mentone, received honorable mention for having done outstanding charity in the past year. This chapter, one of the smallest in the state, has 19 active members and spent \$32.20 per capita. This compares with an average of \$16.03 per capita spent by the other 74 chapters, many of whom have a membership of more than 80.

Of the \$611.75 spent by Beta Epsilon more than \$500 was spent locally. The remainder goes into a fund used to support Speech and Hearing Therapy in Ball State and Indiana State Tea-

chers' Colleges, and in Indiana Univer-

sity. For the second year a \$100 scholarship was given to a student in speech correction at Ohio State University.

In addition to the humanitarian projects, the sorority helps maintain the Hoosier Art Salon. Incidentally, the Salon has been invited to Washington, D. C., for a showing this summer. This is the first time an individual state has ever been so honored.

Another project of the sorority is the maintenance of the Indianapolis Symphony. Lately, this help has been extended to the Fort Wayne orchestra, and to other worthy symphonic groups in the state.

This is the second year in the last three that Mentone has received honorable mention for its outstanding charity work.

DON'T SAY Bread Say Holsum

UNBLEACHED **FLOUR** Gives It BA ANCED AV0

Early Writing Implement Earliest writing implement was probably the stilus, a pointed piece of metal, bone or ivory used to produce letters on tablets covered with wax.

HOWDY, FOLKS: Autos are what run 15 to 20 miles to the gallon and 60 to 70 miles to the pint.

٠

"My wife has run away with my best friend."

. ..

"Who was he?" "Don't know. Never heard of him!"

One gal to another: "My fiancee has been telling his friends he's going to marry the most beautiful girl in the world."

"That's too bad," said the second girl, 'after all this time you have been going with him."

. . .

No safety device has ever been invented to take the place of the one just above the ears.

And all you folks who have been coming here regularly for auto service, know that our service is tops—courteous and efficient.

WEVERETT MITCHELL

Firm Commentator, beard Monday through Saturday, Call-Sett a. m. on WMAG, Ghiago, 670 ar your dial Recently we devoted a column to farm mechanization and the man hours it saves, but we've set to thinking of the food our mechanical helpers save for us.

mechanical helpers save for us. Did you ever stop to think that the population of this country has increased by nearly a third since the end of the first World War? And that farm land planted to crops has remained about the same? Yet people are eating better than ever before. Much of the reason is that farmers are using mechanical power instead of horses and mules, and this use of mechanical power increases our food supply in two ways.

horses and mules, and this use of mechanical power increases our food supply in two ways. First of all, with power machinery, we can do more and better work in less time. And, as you know, that's important when we have had a long stretch of bad weather. Second, power machinery releases millions of acres that formerly were needed to feed horses and mules. That land now can be used to grow food for the nation (and the world).

In the second se

we've learned that this has accounted for 30 per cent of the increase in human food supp.y. Better crops and livestock account for another 50 per cent of the increase. These are two good reasons why more people are eating better off the same amount of land.

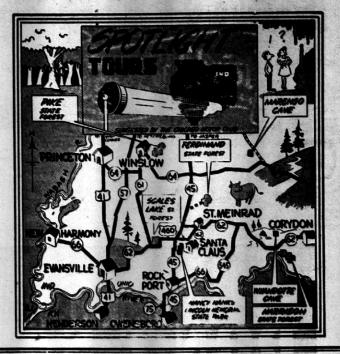

On a smaller but equally important scale, people are exting more eggs than they were a decade ago, and the increased noise in the poultry yard indicates that you re hearing more cackles than you were. Back in 1936 the average production per hen was 121 eggs a year, and 10 years later hens were laying 155 eggs annually. That's an increase of 34 cackles a year, mostly due to efforts of the hatcherymen to give us better chicks. Good chicks like good farm machinery, may cost a little more, but they keep your books in the black.

2,4-D DEMONSTRATION IS CHANGED TO MONDAY, JULY 19

The big demonstration of 2,4-D and

spray equipment display, sponsored by Prairie Farmer-WLS in cooperation with Purdue University, has been changed from July 13 to July 19.

The demonstration is to be held at Bunker Hill Naval Base, half way between Kokomo and Peru in North central Indiana. The date was changed a week be-

cause the dry weather in late May and early June set the test plots back. The July 19 date will assure visitors that both corn and weeds will have attained sufficient growth for a good demonstration.

Besides the demonstrations and equipment displays, the program for the day will include the WLS Dinner Bell program, talks by a number of prominent men, and personal appearances of many Barn Dance stars. Eveything except the test plots will be under cover, and there will be plenty of space for family picnickers who bring their lunch.

The Ham What Am Hams constitute approximately 19 per cent of the total weight and 29 per cent of the lean meat of the chilled carcasses of hogs weighing 225 pounds. About 29 per cent of the protein and 15 per cent of the energy value of the carcasses are in the hams.

Wednesday, June 23, 1948

If you want to buy a farm and don't have the cash to lay on the line, don't buy it. That is what Prairie Farmer says in its June 19 edition, pointing out that farm prices have continued to climb in 1948 and that there is real danger ahead.

Illinois, Indiana and Michigan land has doubled in price and is well on its way to tripling. Wisconsin land has not increased quite so fast, as it is up 69 percent from the 1935-39 levels.

NEW SCIENTIFIC GADGETS DEVELOPED FOR FARMS

A new department in the June 19 Prairie Farmer, called "From Laboratory to Farm,"tells about new things that have been developed for farm use.

A new photo-electric reflection meter to show leaf color in orchard trees so fruit growers can tell how much nitrogen fertilizer is needed, a way to make insulation sheathing board on the farm or in small towns, and a new portable vacuum cleaner for dairy barns are among the items described.

The Lone Star State

"Friendship" is the motto of Tex-as. The bluebonnet is the official flower and the state bird is the mockingbird.

TO HEAVEN BY DIFFERENT PATHS?

Perhaps you already are a church-goer. Perhaps you consider your-self a devout Christian. If you are, then you are to be congatulated and praised for your godliness in an age gone pleasure-mad. If you own Him in this life, you may be sure He will own you in the next.

Do you believe that yours is the right church? If you're a Catholic, what reason do you have for not being a Baptist, what reasons do you have for not being a Methodist? And if you're a Methodist, why aren't you a Presbyterian? Honest now, have you ever thought about that? Is it because you "inherited" your religion and go that way because your family has?—or are you one of those kind souls who say "It doesn't make any difference what church you go to; we're all headed for heaven, but by different paths"?

I wonder if Jesus would agree. He said: "Upon this rock I will build my church and the gates of hell shall not prevail against it." (Matt. 16: 18). Any church built by some man would be in competition with the church built by Christ. No man has any divine authority to build a church, and neither can any man improve upon the church which the Lord built. Christ did not build the sects, religious parties and denom-inations called churches in our country. Certainly he did not thus cause all such confusion after having prayed for the unity of all who believe. (John 17:20-22).

(To be continued.)

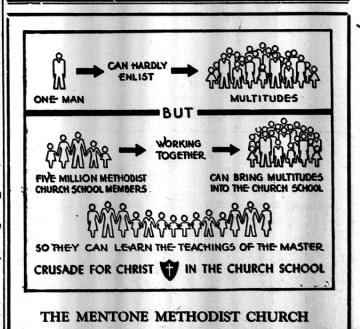

WELCOME TO THE CHURCH OF CHRIST

First Draft Law

First use of selective service devices in America was in the county of Bath, N. C., when Royal Gover-nor Hyde called all able-bodied men to the militia around 1710.

Also Break Necks According to J. Edgar Hoover, 85

to 90 per cent of the driving acci-dents in many large cities are caused directly by persons who break traffic laws.

In the last year traveling around the country we have run across several farmers who have a so-called "parking fee" for sportsmen desiring to hunt or fish on their land. Mostly these fees are designed to bring in revenue the same as selling corn or wheat or other farm products.

Many farmers feel, and rightly so,

that they have played an important part in producing the game or fish on their property and that they are entitled to get a certain price from harvesting the wildlife. Frankly, we don't blame them for this reasoning, especially if they have made an effort to provide food and cover for the game. And most sportsmen don't mind paying a small fee for a decent day's hunting or fishing.

Recently, however, we ran across the "parking fee" idea that had a new twist. On a fishing trip we ran into a farmer who charged twenty five cents for parking. We handed him a quarter and he dropped it into a bank made from a tin can.

our curiosity and we couldn't help ask: them for putting up "No Hunting" or

What's the special bank for?

'You know.' said the farmer. 'I don't mind a bit having you fellows park in my barnlot and fish that creek over there. Fish occasionally myself. But just as sure as shootin' some of my fences will be torn down before the summer's over and these quarters will be used to repair 'em."

Here was a farmer who welcomed strangers to his land even in the face of the fact that he knew that some of the more careless visitors would damage the fences, and possibly do other damage to his property. You won't find many farmers like him.

Most farmers after many experiences with careless hunters and fishermen The small fee, plus the bank, aroused have posted their land. We can't blame

'No Fishing" signs either.

We can all learn a lesson from the farmer with the tin can bank. We should be careful always to follow the rules of good sportsmanship—and these rules definitely include leaving a farmer's property as we found it exactly. And, it's a nice gesture to stop by the house on the way out, thank the farmer for allowing you to hunt or fish and share your game with him. Chances are he'll enjoy a dinner of rabbits or quail or fish; for, generally, his farm duties prevent him from enjoying the sport.

QUICK COOLING, HUMIDITY IS NEEDED FOR "AA" EGGS

Use of a simple cooling rack may earn an extra three to five cents on each dozen eggs. The opportunity for extra returns is in producing a high percentage of AA eggs instead of A grade eggs.

A cool room is not enough-quick cooling and high humidity are two necessities most frequently neglected, Purdue University extension poultrymen say.

Eggs can be rapidly colled in about 45 minutes if a fan is used to gently blow cool, moist air across eggs on a tray or in a wire basket. Incidentally, a fan saves extra handling of the eggs gathered in a wire basket, but without the convenience of electricity, a cooling tray can be second choice.

The cooling tray is constructed of 1x3 inch boards and can be made any convenient size, for example 2x3 feet. A cooling cabinet large enough for four egg cases has been designed by Purdue poultrymen. Slides on the open walls provide for two cooling side racks.

A sketch of the cabinet is shown in the May issue of Poultry Combings, available free from the poultry department at the University.

This cabinet is ideal for eggs from small flocks and works best where there is some circulation of air to encourage evaporation.

Wetting down the floor and walls each day is a good practice even with a cooling cabinet, but this wetting seldom furnishes enough moisture. Eggs keep best in air that has a relative humidity of at least 75 percent. The only danger from high humidity is that of mold, but ventilation and circulation of air will control mold.

FIRE CHIEF URGES RURAL FREE CELEBRATION AT FOLKS TO RETURN CARDS.

Arlo Friesner. Mentone fire chief, is urging all rural patrons to return the cards sent them recently. (One township will receive their letters in the near future).

The prime purpose of sending the letters to all rural residents was so that a complete file could be made of the location of everyone. The thought is that no delay will be encountered in trying to decide where a person lives if he should send in a fire alarm.

hen filling in the cards, be sure that the route to your farm is clearly shown - it may save you many hundreds of dollars damage if a fire should tart in your home or farm buildings.

Mr. Friesner reports that in the replies received so far, he has encountered a number of names that were new to him, and the directions given will now be available to direct the firemen to their place should the need arise.

Each card also carried a place for the farmer to designate whether or not he desired to contribute towards the purchase of a water-carrying vehicle. An answer to this question is desired but it us urged that no one delay returning the card because of his answer to this question. The important thing is that the fire department get a complete file showing the location of every rural citizen.

POTLUCK SUPPER

prise for all of us this year, and they Mr. and Mrs. David Bowser were insist the feature will be highly enthe honored guests at a potluck supper given by the Mentone Lumber Co employees at the Arlo Freisner home last Thursday night. COOPER-EATON

On Sunday afternoon at the home of Mr. and Mrs. Marshall Eaton, of near Palestine, the marriage of their daughter, Patricia Anne, to Andrew S. Cooper, of Rochester, took place. Rev. Grant Blackwood, pastor of the First Christian church at Rochester, read the double ring service in which the bride was given in marriage by her father. With her suit of powder blue she wore white accescories. Her strand of pearls was a gift from the bridegroom and her flowers were gardenias araanged in a corsage.

She was attended by Miss Louise Conkle, a schoolmate.

Eldon Shepherd, a technician at Woodlawn hospital at Rochester, served the bridegroom as best man.

After a honeymoon in Brown county the couple will occupy their home on Monroe street in Rochester. Mr. Cooper is engaged in the implement business with his father.

Mrs. Cooper is a graduate of the Mentone high school.

The guests who were members of the immediate families of the couple, and a few close friends, included Garwin Eaton, brother of the bride, Mr. and Mrs. Harry Cooper, parents of the bridegroom, Mrs. C. W. Thacker, aunt of the bride, Mr. and Mrs. C. I. Bashore, grandparents of the bride, and Mrs. Eldon Shepherd.

ATTEND FUNERAL

Quite a number of relatives from this place attended the funeral services Tuesday afternoon of Vernon L. Fields, 60, of Fort Wayne, held at the Klaehn funeral home. Rev. T. W. Chandler of Fort Wayne officiated. Mr. Fields died Saturday in the St. Joseph hospital following an automobile accident a week ago.

He had been employed at the Indiana Service Corporation for 17 years, as a foreman of building and grounds.

Those attending services were his mother, Mrs. Amanda Fields; Mr. and Mrs. O. Fields and daughter, Mrs. Enos Metheny of Tippecanoe; Mr. and Mrs. Merl Flenar, Argos; Mr. and Mrs. Clarence Horn, Rochester; and Mr. and Mrs. Howard Horn, Granville Horn and Mrs. Samantha Norris of Mentone.

sage from Col. Robert Rossow, superintendent of State Police, who warned that traffic, boating, swimming and flying accidents will kill or maim many holiday vacationers this week end 'unless each person makes liberal use of common sense, extra care and courtesy."

He offered several safety tips for the four-day holiday, beginning Friday:

 Be sure your automobile, airplane or boat is mechanically safe.
 Start earlier, don't hurry and ob-

serve all regulations. 3. Drive defensively; be alert for the

other fellow's mistakes. 4. Swim in obstruction-free water in

the sight of others, and not until an hour after eating. 5. Distribute the load evenly in boats,

don't stand up. Watch out for sudden storms.

6. Take the sun in easy doses. Wear sunglasses.

7. Fireworks are unlawful, and homemade pyrotechnics are dangerous.

8. In case of accident, ask the telephone operator to connect you with the nearest police or sheriff's department, or State Police post.

Col. Rossow emphasized motor travel as the greatest safety hazard this week end, due to anticipated heavy travel. July 4 holidays in 1946 and 1947 claimed 30 lives in traffic crashes in fourday periods each year, he said.

The Woman's Society of Christian Service, of the Methodist church met with Mrs. Glen Snider at White City, June 23. The program was as follows: call to worship by Mrs. Jack Van Gilder; hymn 154; devotion topic, "Whose Daughters Are Not Afraid," Mrs. Jack Van Gilder; program topic, "Women in the Paths of Service," leader, Mrs. Phillip Blue, with the following young ladies taking part: Barbara King, a daughter in the Netherlands; Mrs. Glen Snider, a daughter in Belgium; Jackie Blue, a daughter in India; Carol Peterson, a daughter in India; Betty Witham, a daughter in the Phillipines; prayer, Mrs. Ray Ward.

Refreshments were served by Kate Whetstone and Elizabeth Simco. There will be no meeting in July, and the next meeting will be with Mrs. Roy Maxwell on August 25.

Fast Aviation Growth

Aviation's amazing growth since the 1925 Morrow board report on air policy provides a yardstick of the importance of today's U. S. air policy investigations. Here's the picture—airline fares down 67 per cent; 4,000 times the pilots; 10 times the airports, and planes nearly three times faster than 1925. Today we have about 500,000 pilots, 6,000 airports and speed of 650 mph. About 16 million people paid 4.7 cents per mile airline fare in 1947.

Wednesday, June 30, 1948

"When you can't fish, Skish!" That's a new slogan created by Better Fishing, Inc., a national, non-profit organization exclusively devoted to the improvement of fishing.

Probably some of you have tried Skish, others possibly are not acquainted with the new game for fishermen; consequently, this column is being written to tell you a bit about the sport that was started in 1939 and has been making rapid strides since in popularity.

Skish is similar to tournament casting in that you toss your flies and plgs at "targets" instead of fish. It is different from tournament competition in that your regular fishing equipment is used in Skish, not the special gear that is considered a must for tournament work.

Actually, you don't even have to have water to start the sport: a few old bicycle or automobile tires tossed on the lawn is sufficient for a Skish range. Then get out your bass casting or fly fishing equipment, call a few fishermen friends over to your home and start shooting at the tire hoops. That's how simple it is to start Skish. Naturally, there is a set of rules to govern the sport, and this code has been nationally established to add uniformity to Skish competition. The rules are simple, however, and quite easy to conform to.

Skish has two big attractions, in our opinion. First, any sort of friendly competition among fishermen is grand sport; and second, work on a Skish range will prove valuable practice in sharpening your casting accuracy and the distance you can obtain with lures. This, naturally, will pay big dividends when fishing your favorite lake of stream. In addition, Skish work will teach you the proper balance to seek

Also have a good time.

in your equipment, the line that best fits your particular rod, the weight of lures that you can handle advantageously Skish truly is a sport for fishermen; we think you'll like it.

In organizing a Skish club in your community, it would be wise to write to the National Skish Board, Better Fishing, Inc., 509 South Wabash Avenue, Chicago 5, Illinois. You'll get all the dope on how to start.

BLIGHT CONTROL PROGRAM OUTLINED FOR POTATOES

Late blight may cause serious destruction of vines and tubers of latematuring potátoes which have been sprayed or dusted with DDT. This new insecticide greatly increases potato yield, partly by prolonging growth another ten days or two weeks. But this may expose late varieties or latematuring plants to ideal late blight weather that occurs late in the season, acording to Dr. R. W. Samson, Purdue University potato disease specialist.

Such losses from late blight occurred in many late-maturing potato plantings in Indiana last fall. Spores of late blight were then washed from green, infected vines by ground-soaking rains down through the soil to cause serious late blight tuber rot. Samson points out that most Indiana summers are too hot, too dry, or both, for this long-known cool, moist climate disease of both potatoes and tomatoes. September and October weather is often ideal for it.

Control involves maturing the potato crop before cool, wet weather of September and October, by earlier planting or early varieties where possible or by spraying with a fungicide.

A fungicide, such as Bordeaux mixture or the new Dithane, should be used with DDT every ten days after mid-July and August, and every five

days on green, luxuriant potatoes in 🛧 Buy Cooperatively — and Save!

THE NORTHERN INDIANA CO-OP. NEWS

PAGING FATHER DIONNE

Several years ago an ordinary expectant father in Canada ended up with a crib running over with girls and fame and fortune heaped upon his household.

Like the Indian when they struck oil on his land, things haven't been the same since.

It was a quick trip from obscurity, through embarrassment and into prosperity in five feminine packages, with a life annuity to a startled M. D.

Fame, fortune or prosperity soon surrounds a man with a disallusioning haze regarding his own ability and he starts wading in the gold fish pools trying to be a big shot. Many are just richochets on the social bald pate, but nerve-wracking, nevertheless.

Dionne has been in clover and feasting on the greener pastures these many years, but we never suspected him of infecting lawn grass until some local ladies started picking up four-leaf clovers by the dozens.

Last issue we had a news story of a lady finding a number of clover stems with more extra petals than a tandem bicycle - and this week Mrs. Devon Shipley sends us a bouquet of about three dozen of the four-leaf variety.

We're in the vitamin-pill dispensation today, and from here on out I'm going to check the specifications carefully to see that none stay at our place that contain any part of "new mown" hav.

Fame and fortune might be all right, but if quintuplets is a requirement, I don't believe I'd ever live to enjoy it.

RURAL YOUTH SCHOOL AT PURDUE JULY 12-16

The 20th annual Rural Leadership school will be held at Purdue University, July 12-16. The program will include daily forums on agricultural policy, state and local government, moral and social values and community cooperation, and talks on what is new in agriculture

There will be no registration fee and inquiries should be sent to Dr. J. E. Losey, Purdue University.

HEALTH FACTS FROM YOUR STATE BOARD OF HEALTH

Death Rates by Races The death rate by race of most childhood and other diseases, poliomyelitis, scarlet fever and typhoid, was greater in Indiana in 1947 per 100,000 population among the non-white than the white population, according to a provisional statistical summary released by Dr. Robert Serfling, director, Division of Public Health Statistics, Indiana State Board of Health.

No deaths from measles, poliomyelitis, typhoid fever or dysentery occured in the non-white poulation. The rate for whooping cough for the nonwhite of 5.2 topped the white rate of 1.3 with both races having a rate of 0.6 for acute rheumatic fever. The

death rate for diarrhea and enteritis of children under two years of age of 3.5 for the white race was higher than the 3.2 rate for the non-white group, but for children two years old and over, the situation was reversed with the non-white rate of 4.5 jumping the white rate of 1.5.

Cancer, diseases of the heart, cerebral hemorrhage, nephritis, pneumonia, influenza and diabetes mellitus had a slightly higher rate among the nonwhite group than the white. With a rate of 113.6, tuberculosis ranked higher among the non-white in comparison with the white race's rate 24.3. A sharp difference is also shown in syphilis deaths which is 35.1 for nonwhites and 9.1 for the white population

EARLY HISTORY OF

(The following records are based on Mentone Gazette, February 5, the 1885, information given by Clark Ernsberger, Mrs. Charles Biddleman, Mrs. Flavia Tinkey and Mrs. John Underhill

Early History of Harrison Township

Mentone lies, was organized on of March 8, 1838. The two first settlers were James Wooden and Andrew Sell, the territory. Benjamin Blue was the who built their log cabins in the town- first white man to locate within the ship in the spring of 1834. In 1836 eight township and what was later to be more families came into the township: Christian Sarber, Isham Summy, William Blue, Joseph Shively, Thomas Reed. John and Daniel Underhill and Thomas Romine.

The first school house in Harrison ownship was erected in 1838 with Hen-y Bradley as teacher. The first post-West, Jesse Myers, Richard A. Lee, MENTONE AND COMMUNITY township was erected in 1838 with Henry Bradley as teacher. The first postoffice was established in 1836 at the home of James Wooden. In 1949 an M. E. church was organized at the home of J. W. Dunnuck and in 1851 a log church was erected on Section 31.

Early History of Franklin Township

Franklin township, which is also oc-Harrison township, in which a part cupied by a part of Mentone, was organized in March, 1838, at which time eight white families were residents of the corporate limits of Mentone. Mr. Blue moved his family to a home built of bark that had been built by the Indians, and fires had to be kept burning at night to keep the hungry wolves

James Garwin, John Dunnuck and Prosper Nichols became residents of the township.

township.

Mentone was part of the eighty acres. purchased from the government by William Blue. It was next owned by Benjamin Blue, then by John Vantreese and later was purchased by John Morgan.

from John Morgan's widow. He also purchased 15 acres from Samuel Lee. About that time the Nickle Plate railroad was built and there was considerable agitation about the building of a new town and the choice of a suitable location. Some wished to build it farther west than Mr. Tucker's land and some wished it to be built farther ast

In May, 1882, Albert Tucker, founder of Mentone, surveyed the plat where Mentone is now located and laid out the town as far east as Morgan street. and west to Etna street, with the exception of the northwest corner of the town. (This corner was owned and + Today good will may starve te laid out by Jim Blue and was known as the Blue addition. Later, Phil Bow-

man bought land of the Chris Sarber heirs and laid out the Bowman addition

The first building erected in the new town was begun on September 5, 1882. William Kintzel was the first pioneer to erect a residence on the new town plat. His house was finished and occupied on Nov. 5, 1882. It was located on South Broadway, south of the Farmer's State Bank.

However, Mr. Kintzel was not the first person to live in the new town. There was already one dwelling house in Mentone when the town was laid out: (The old Morgan house which is now owned by Rev. Dewitt.) The first woman to live in Mentone was Mrs. Charles Biddelman of Sevastopol. Mr. and Mrs. Biddelman moved into the Morgan house and Mrs. Biddelman cooked for all the men engaged in building the new town.

The honor of being the first child born in Mentone is claimed by Charley Dillingham, son of David and Sarah Dillingham.

The honor of naming the new town belongs to Mrs. George Myers. One morning she happened to read a newspaper article about Mentone, France. The name pleased her and she made the suggestion that the new town be named Mentone and her suggestion was accepted.

(To be continued.)

death. Keep it alive with customer courtesy and careful advertising.

Prosper Nichols brought the first wagon to the township, and his daughter, Anna, was married to Hugh Bryant in 1840, the first wedding in the

but to minister. May we be of help to you.?

Buy Cooperatively - and Save!

ARE THEY ALL RIGHT?

ARE THET ALL RIGHT: It is not right, then, to say that we are going to heaven, but by dif-ferent roads. Suppose four of us wanted to go to Miami, Florida. One of us takes a plane due north-another starts westward on a bicycle-an-ther takes an eastbound train-and one of us gets a reliable road map. fills up his gas tank, and gets there in the surest possible way. There is a right way of doing things and you may be sure that Jesus Christ mapped out the right way and told men all about it. If the idea of four people starting off for Miami in four different directions strikes us as queer, how must it seem to God to see us struggling toward heaven -one believing that baptism is necessary to salvation, another believing it is not. One believing that we are saved by faith only... another that "by works a man is justified, and not by faith only... all this, after Jesus came to earth and told us just what was what about the whole thing. No-there are Catholics and Protestants-Presbyterians. United Bre-pher teaching all kinds of things. They can't all be right. If they agreed they could all unite; but they are all different and what's worse, they all claim to have the truth. It isn't enough to say, "My father's church is good enough for me."

It isn't enough to say, "My father's church is good enough for me." Suppose Paul had said that! No. Each man must make the quest for him-self. "Ye shall know the truth and the truth shall make you free."

(To be continued.)

WELCOME TO THE CHURCH OF CHRIST

Tight Vessels

Greeks and Romans were the first to find air-tight seals for vessels, plugging the mouths with cork and covering them with compounds of pitch, chalk and oil.

Care of Eggs An egg should never be kept for any length of time unless it is placed with the big end up in a suitable, well-ventilated container.

THE MENTONE METHODIST CHURCH

(Held over from last week)

Mr. and Mrs. O. I. Ailer had as their guest over the week end, Miss Ethel Savage of Elkhart, niece of Mrs. Ailer. Miss Savage returned recently from a trip to South America and showed pictures Saturday evening to the following guests: Mr. and Mrs. David Swihart, Mrs. Cora Bryant, Mr. and Mrs. Maurice Peterson and son Barry, Mr. and Mrs. John Alber, Mr. and Mrs. Frank Lee and family and Miss Carol Lee Eaton.

WEEDS!

Mrs. Cora Bryant has returned to her home after spending some time in West Virginia visiting relatives.

Mrs. Ralph Hatfield is on the sick list. Mr. and Mrs. Charley Green and

family and guest, Miss Barbara Dusenbury are enjoying a motor trip to New York and other places of interest. Mrs. Frank Arter and grandaughter,

Mrs. Ralph Chapman, spent Friday in Plymouth. Mrs. Phil Hartung of Rochester, and

Mrs. Raymond Bowers are assisting at the Green's Lunch Room this week. Mrs. Trusler of Warren has return-

ed to her home after spending a few days here as a guest of her daughter,

Mrs. Charles Good and family. Mr. and Mrs. Paul Scott and son

WEEDS!

Eugene spent Saturday evening in Rochester.

Mrs. Callie Dawson of Tippecanoe was a supper guest of Mr. and Mrs. C. M. Walker Sunday evening.

Mrs. O. C. Montgomery, who has been confined to her home for the past eight weeks, is improving and is able to be out in the yard part of the time. Mrs. David Swihart, who has been on

the sick list is improving.

Gene Overmyer, Leonard Staldine, and Joe Good spent Sunday in Culver.

James Good of Eikhart, and Miss Rosie Good of South Bend were guests of their parents, Mr. and Mrs. Charles Good, Sunday.

Mrs. Harry Sriver and Miss Carol Lee Eaton have returned to their homes

here after spending the past week at Purdue where they attended a 4-H meting.

Mrs. Ed Staldine and daughter Joyce and Mrs. Sam Deward have returned to their homes after spending some time in Kansas as a guest of their mother.

A large number of persons from this place attended the fireworks display at Rochester Wednesday evening.

at Rochester Wednesday evening. Miss Mary Louise Green is enjoying a vacation from her duties at the Moore Bros. office in Rochester.

Mr. and Mrs. Dibk Morris and family and Miss Shirley Overmyer attended the free movies at Tippecanoe Monday evening.

Devon Eaton and son spent Friday evening in Mentone.

Miss Julia, daughter of Mr. and Mrs. Cliff Bailey, who underwent a minor operation at the Woodlawn hospital in Rochester Tuesday has been dismissed and is getting along as well as can be expected.

Mrs. Fred Fore is reported to be quite ill at the home of her daughter, Mrs. Bud Barkman.

Carl A. Dick and lady friend of South Bend were guests of his father, W. A. Dick and Mrs. Dick Sunday.

O. C. Montgomery and Lavoy and Elzie Thompson attended the baseball game at Rochester Sunday afternoon.

AVOID EXCESSIVE

AMOUNT OF 2,4-D When weeds threaten injury to corn, as is the case in many fields where Canadian thistle, morning glory, smart weed and similar weeds are in eviddence, spraying with 2,4-D is advised by Oliver Lee, Purdue University weed specialist.

For a satisfactory kill of weeds of this type, three-fourths to one pound of 2.4-D is required per acre. As this amount is a heavier dose than corn may tolerate without damage, the applications should be made as far as possible between rows so as not to spray the top of the corn plant.

If a row crop type of sprayer is not available, an ordinary straight boom may be used to apply the spray in the recommended manner. The boom should be lowered so as to be level with the top of the corn. If the rows are 40 inches apart and the nozzles are placed 20 inches apart, the boom should be adjusted so that two nozzles are spaced between the rows.

Prof. Lee cautioned farmers against using excessive applications of 2,4-D on corn. Experiments conducted in 1947 indicated that small corn (six inches high) will not stand more than onehalf pound of 2,4-D per acre. However, as much as one and one-half pounds of 2,4-D can be applied on larger corn, especially if it is not sprayed directly at the top of the corn.

The weed specialist adds that some farmers think it necessary to spray the entire field when the weeds are only in scattered patches, but spraying only the patches is all that is needed in such a field.
