## CODES

Everyone is hearing about codes these days. The management of the Northern Indiana Cooperative Association is operating under several of the codes due to the diversification of their business.

Many of our customers are interested in knowing just what effect the observance of the various codes has on the customers of the mill. The various codes were put into effect to spread employment by reducing the number of hours an employee puts in a week, and to raise hourly wages to make up for the shortening of hours. Of course as a result of this action manufactured products as well as all kinds of raw material soon should advance in price. In fact the advance in price has been even greater than the advance in wages, and a lot of folks would like to know why.

The general codes governing each industry did not in any way attempt to fix prices. They were arbitrary in the setting of wages for employees. About the only provision made in regard to selling prices was that every thing be sold above cost or cost production. The code was then turned over to some representative organization representing that particular industry for administration.

Immediately the association to whom the code was given started a survey to find out the cost of production of the various products peculiar to their industry. Costs were figured out, and costs of distribution as well. It is generally recognized that the costs of production as well as the costs of distribution are higher in the larger centers of population than they are in such a community as our own. In fact there is a differential in wages for the various sized cities. The representatives from the larger towns seemed to predominate or at least were more influential in drawing up regulations to be followed by their industry. As a result of this, when an agreement was reached as to the price at which commodities would be retailed it was a higher price than the merchant in a small town was charging. This is particularly true with the Lumber Retailers. Each retailer of lumber must file his price at which he is selling retail, and dares not charge anyone any other

price than the one filed. The Lumbermen's Association worked out all of the prices and there was only one thing to do to keep out of trouble and that was to do as they were doing. So the Northern Indiana Co-Operative Association filed their prices and the price we filed is the same as all of the other yards.

Now for a brief glance as to how this will affect the customers of our mill. In the first place it will create a much larger net profit for distribution at the end of the year. This is not the will of the board of directors. The organization we have has always operated on a very conservation basis and has kept the cost of doing business as low as possible consistent with good service, and fair treatment of employees. There are several advantages in trading with the N. I. C. A. First the feed department is not working on a code. They are still working on the same small margin and giving the same good service as always. The coal department is still doing business in the old manner. The Building Material Department is under the code a. d. they are charging code prices.

There is only one advantage that can be had by a customer of the Building Material Department. He can become a stockholder and thereby participate in the profits of the mill for the season. A Co-Operative such as ours is the only way around paying a code price for building material, for at the end of the season the stockholder will receive his share of the profits. The N. I. C. A. is owned by customers, practically all farmers, and is honestly trying to serve them. It is only by sticking together that we will be able to effect a saving. It certainly is gratifying that there has been a substantial increase in the volume of business of the mill each year. It shows that customers are appreciative of the service offered, and this is being shown also by the increased number of stockholders. It is generally recognized that the greater volume of business done by your mill the less is the overhead and the handling charge per unit of merchandise handled. The Northern Indiana Co-Operative Association is honestly endeavoring to handle the highest quality merchandise in all of its de-

partments, and is keeping the prices as low as any competitor. We invite your continued patronage, and assure you the best of service and materials.

## SPECIAL NOTICE

We have leased the floor space in the Old Mentone School House for storage purposes.

Due to the fact that it seems impossible to keep people (especially children) out of the Building we ask the parents to impress upon their children to stay out of the building.

We trust this notice will bring results and that it will not be necessary to prosecute.

Northern Indiana Co-Operative Ass'n.

## New Ingredient Used At Mill

Mallinckrodt Iodide Mixture is now on sale at the Northern Indiana Co-Operative Association. Mallinckrodt Iodide Mixture is now being used in all Banner Mashers and is obtainable at the Co-Op Mill for use in private formulas. Many tests have proven this to be the best and most economical method of putting Iodine into feeds.

It is a free flowing, non caking and finely powdered product, thus assuring a smooth, even flow of Iodine into the mixture that will distribute thoroughly through the mixture of ingredients.

## NOTICE

The annual meeting and election of officers of the Mentone Egg Producers will be held Friday evening, March 9 in the Mentone Public Library.

## Buy Manure Spreader At Your Own Price

On Saturday March 10th at their opening day for farm machinery the Northern Indiana Co-Operative Association will sell one or more new manure spreaders at auction at two o'clock.

Come to the Co-Op. Mill at two o'clock and buy the spreader at your own price, also remember two farm implements will be sold on sealed bids during the day, and that choice of axes, shovels, forks, scoops, etc., will be given away free at the drawings at 1-30, 2-30 and 3-30.

## Halderman Now With Co-Op Mill

The Board of Directors have selected Kenneth Halderman, who was raised on a farm in the Mentone Community, and later worked at the carpenter trade in Oklahoma and Fort Wayne, as foreman over the Farm Machinery, building material and some other merchandise departments. Kenneth has for the past five years been with Fleck and Sons.

He comes to the association with the well wishes of a large host of friends in the Mentone trade area, who believe his selection assures the success of the farming machinery department and the continued success of the other lines that will receive his attention.

## MENTONE NEWS

Mrs. Minor Mollenhour who has been quite ill is some better.

Charles Cole who is attending the School of Aviation in Chicago spent the week end in Mentone.

Miss Doris Flenar spent Saturday and Sunday with her grandparents, Mr. and Mrs. Wesley Flenar.

The four weeks revival meeting at the M. E. Church closed Sunday night. This was a very successful campaign. Fifteen persons united with the church Sunday morning. The pastor Rev. J. Harvey Brown was assisted by Russell Christler a student of Taylor University.

Miss Gertude Hipsher and her mother entertained the following guests on Sunday, Mr. Russell Christler of Middlebury, Ind., Mr. and Mrs. James Hipsher and son of Wabash, John Hipsher, Miss Avis Underhill, Miss Doris Wilttrout and Darrel Underhill.

### IN MEMORIAM

In loving remembrance of Fred L. Busenburg who died Feb. 28, 1933.

Our lips cannot tell how we miss him

Our hearts cannot tell what to say  
God alone knows how we miss him

In a home that is lonesome today.  
Mrs. Fred Busenburg and daughters

### WARSAW BRANCH MOVED TO NEW LOCATION

The Warsaw branch of the Northern Co-Operative Association moved Thursday into a building at the corner of Washington and Pike streets. It is believed that this move will make it more convenient for many farmers who enter Warsaw from that direction. The same complete stock will be carried as before and you will receive the most courteous treatment, efficient service and a hearty welcome when you stop at the Northern Indiana Co-Operative Association in Warsaw at the corner of Washington and Pike streets.

### WANTED

Second hand Feed Bags in good condition, bring in what you have. Also Beef Hides, Horsehides, Sheepskins and Wool. Cash paid at value. Can use a few cords of good dry body 18 in. stove wood. Harmon Faxton, 309 N. Tucker Street, Mentone, Indiana.

### FOR SALE

Team of mares weighing 3000 lbs. Would trade for good pair coming two year old colts. Ivan Mahoney 1 1/4 mile south of Burket.

### METHODIST CHURCH NOTES

There will be Special Revival Services at the Mentone Methodist Episcopal Church. Church beginning on Sunday March 4, and continuing on Palm Sunday, March 25. Rev. E. E. DeWitt will be the Pastor, Evangelist and Rev. F. A. Shipley from Bourbon, Indiana will have charge of the Music and the young peoples work. A cordial invitation to one and all to attend these services.

### MILL OFFICE REMODELED

The office of the Northern Indiana Co-Operative Association has recently been redecorated and rearranged. We feel that the change will make it possible to give the customers better service more promptly as the arrangement is much more convenient for both customer and clerk. Visitors are always welcome and we invite you to come in and see the new improvements.

The mill buys wheat, oats, corn. Poultry medicine at the Co-Op. mill.

## Egg Marketing

Ship your eggs to us! We have a place for them. We pay within 24 hours  
In business 107 years

## MENTONE NEWS

Mrs. Frank Vernet is reported on the sick list.

Mrs. W. W. Warner spent Friday afternoon in North Manchester.

Mr. and Mrs. Murray Thorn was in South Bend Thursday on business.

Mr. and Mrs. Frank Scott and family have moved from the Matthews farm to a farm east of Burket.

Rev. and Mrs. J. E. Smith, of Edgerton, Ohio, took last Sunday dinner with Mr. and Mrs. Frank Carls.

Rev. and Mrs. V. E. Squibb spent Wednesday evening at the home of Mr. and Mrs. Ronald Goshert.

Mrs. C. W. Krathwohl who has been visiting in Racine, Wis., for a couple of weeks returned to her home last week.

Mr. and Mrs. M. O. Mentzer and family spent Sunday in Mishawaka, the guests of Mr. and Mrs. C. H. Kern and family.

Mrs. Alva Creviston who submitted to an operation at the McDonald hospital a short time ago has returned to her home, and is rapidly improving.

### Larger Ostrich Eggs

Fossil ostrich eggs have been unearthed from desert sands in several parts of China. Estimated to be a million years old, the eggs are nearly six inches long, much larger than ostrich eggs of today.

### Cord of Wood

A cord of wood consists of or is equivalent to a pile closely stacked, eight feet in length, four feet in breadth and four feet in height. This is true whether the wood is in four-foot lengths or whether it has been sawed and split before purchasing. This is true in most states, but in Minnesota the law provides that a cord shall mean 110 cubic feet when stacked or 100 cubic feet when thrown loosely.—Washington Star.

## FRENCH MISSION TO SEEK CAMP OF MOSES

The French archeologic mission returned recently from Palestine has announced that a motor road now leads to the summit of Mount Nebo, the Palestine mountain, whereon Moses is supposed to have died as he contemplated the Promised Land. Tourists now may speed at a mile a minute up a splendid road to look over the Land of Canaan, contrasting with the heart-breaking climb of Moses, who spent a week on the journey.

The French mission made such satisfactory progress in its excavations atop Mount Nebo that it was decided to send another mission as soon as work can be resumed. It is hoped that some trace of Moses, or of his camp, can be found.

Thus far not a single piece of evidence has been found to confirm that portion of the Bible story. Atmospheric and climatic conditions have changed the country east of the Jordan and, while it may have been a rich plateau in Moses' day, it is comparatively poor land today.

According to native legend, Moses buried on top of the mountain an inscribed stone with instructions and lessons for his followers. Thousands of stones were dug up, but none bore even a suspicious mark. It is for such a stone that the Franciscan mission is looking.

## Ostrich Flesh Proves to Be Really Good Eating

Ostriches are now being bred on a large scale at the Moscow zoological park, not because of any noticeable revival in the feather market, but because some one has discovered that the flesh of these birds makes fine eating, says a writer in the Detroit News.

Through use of incubators and a method which is described as forced breeding, officials of the park have been able to obtain a yield of 15 to 18 chicks a year from each pair of adult ostriches. When fully grown they weigh 100 to 135 pounds.

The ostriches appear to endure the cold climate of Moscow surprisingly well when it is considered that their native habitat is in a semi-tropical country. It is believed that the thick layer of fat beneath the skin that serves as insulation against too much heat at home protects them from the cold in the rigorous climate in which they now find themselves.

In addition to the work that is being done at Moscow it is planned eventually to breed large numbers of ostriches in the southern steppes of the U. S. S. R.

### Navy Always on Duty

The navy is always on duty, subject to call toward any part of the world. Its officers are in constant training, not only in the technique of naval operations, but in international law and the customs that govern the intercourse of governments. Its men learn much of foreign lands in their cruises and thereby become better Americans.

## TO 'H

# Opening Day Farm

FOR 

WE HAVE D

# Saturday M

As a day for introducing our Farm Machinery to the public, therefore  
tone Trade area to spend part or all of that day as our guests.

Representatives from the Oliver and John Deere Houses will be here to assist in acquainting the farmers with these lines of machinery, much of which will be here in stock by that time.

**DO NOT FORGET TO REGISTER,**

**YOU MAY GET A PRIZE.**

We want all of the farmers in this territory who plan on purchasing any farm machinery or equipment this season to learn about our lines before buying anything, any place, at any price. Therefore we have set aside Saturday, March 10, as a special day for showing this machinery to all who will come. Visitors are always welcome, but you will be doubly welcome on this opening day. All guests will be registered, and a name drawn from registration box at 1:30, another at 2:30, and another at 3:30. The farmers whose names are drawn will each receive worth-while prizes, so make sure you are registered and you may be one of the lucky three.

### Sealed Bids on Two Implements

Another novel feature will be the placing on sale of two farm implements, upon which sealed bids will be received all day until 4:00, p. m., at which time the bids will be opened and the highest bidders will receive the implements.

### Attractive Prices During the Entire Day

Unusually attractive prices are to be named on many articles for this opening day. Many farmers have announced their intentions of coming in for the entire day, so they can make a complete study and learn all the facts about different tools and equipment they need this season.

### Lunch Will be Served at Noon—Free

The Northern Indiana Co-Operative Association is going to serve lunch, (perhaps hot dogs) at noon to all farmers who attend both morning and afternoon sessions.

Saturdays are always big sale days at our plant, with hundreds driving up to the loading platform, grain dump, coal bins and lumber shed; therefore we request those visiting our machinery demonstration to park their cars where they will not be in the way of the regular customer traffic.

Come, be our guests, Saturday, March 10, see our merchandise and ask your questions about it. Men will be here competent to answer them, and our association will make you welcome.

Mr. and Mrs. Isaac Horn spent Thursday in Warsaw, on business.

Mr. and Mrs. John Minear and Mrs. Amanda Busenbarg, of Warsaw, spent Thursday in Mentone.

Mr. and Mrs. D. E. Ailer spent the week end in Mentone, the guests of Mr. and Mrs. L. L. Latimer.

Mr. and Mrs. Orvil Taylor and family have moved from the Eaton farm to a farm west of Akron.

**FOR SALE:**—Chicks from big type White Leghorn Stock. Custom hatching, 2½c per egg. Forest Kesler

Mr. and Mrs. Russel Huffer and daughter Margurite, took last Sunday dinner at the home of Mr. and Mrs. Fred Sirguy.

Attorney T. F. Fitzgerald and Dr. Saunders of Burket, motored to Michigan City Friday, on business concerning an-inmates compensation.

Mrs. D. B. Lemler, Mrs. Bert Ames, Mrs. Homer Woodcock, Mrs. Victor Bowers, Mrs. James Hatfield and son Jimmy, of Bourbon and Rev. and Mrs. S. M. Hill, of Fort Wayne spent Thursday with Mr. and Mrs. F. D. Lemler and daughter, Phylis.

### Uses Feathers for Whistle

Many hunters are under the impression that the woodcock's whistle is made by the bird's throat. This has been proved not to be the case. If one examines a woodcock it will be found that the outside or end three feathers of each wing are very narrow and entirely unlike the other wing feathers. It is these three feathers whipping rapidly through the air that cause the "whistle" when the timber doodle flies.

### Earth Original Time-Keeper

The earth is man's time keeper. As it spins on its axis once in 24 hours the stars pass across the heavens. For centuries it was thought that this rotation was constant but in 1693 it was found to vary.

### Proposed "E Pluribus Unum"

Benjamin Franklin, John Adams and Thomas Jefferson first proposed the use of "E Pluribus Unum" (One from Many) on the great seal of the United States on August 10, 1776.

### Crater in Lake Seen From Air

A new crater formed in the old lake bed on White Island, off the coast of New Zealand, has been discovered by an aviation party. A large column of sulphurous smoke was issuing from it, the action of which was as violent as in the old crater, which has been active for several years. The island has undergone great change since the disastrous eruption in 1914, which caused the loss of a number of lives. What appeared from the air to be molten sulphur could be seen pouring over the ledge of the old landing and discoloring the sea for a great distance. The large gannet rockery, once busy, was deserted. The aviators report it was impossible to fly directly over the island owing to the sulphurous smoke. White Island is 40 miles from Opoitiki, New Zealand.

### Gospel Verses Cut Into Ship

On the banks of the Wade river, N. Z., is being constructed one of the strangest craft ever made to ply the sea. It is the Gospel ship Ysabel, and is built by L. Beavis, who plans to sail it personally. He has measured everything by span of the fingers, and has kept a Bible handy while working, writing or cutting a text from the gospel on every timber of the vessel. The figurehead represents an angel holding an open Bible. The Ysabel is 41 feet long and rigged as a barquentine. The timbers were cut and shaped with an axe, saw and plane and a chisel made out of an old file. Auxiliary power will be supplied by a hand-driven propelling device invented by Beavis.

### Hoarders Since Ancient Times

All sorts of ancient beads, cut to resemble an eye, found on the sites of old cities of Mesopotamia, are treasured by modern natives of the district as charms against every sickness and evil spell. It is difficult to obtain these charms, even at considerable price, says a returned traveler. Banded semi-precious stones, such as agate and sardonyx, are prized as the most powerful. Natives of this region have been antique hoarders since ancient times.

### Too Difficult

May—So Ann's divorced her parlor magician? Couldn't he pull enough rabbits out of his hat to keep the pantry filled?

Belle—Yes, but he couldn't pull enough hats out of his pocket to keep her wardrobe filled.—Kansas City Star.

### Nobody Home

Mrs. Dull—The cake recipe Mrs. Smith gave me is too expensive to use. The eggs cost too much.

Maid—How many does it call for?

Mrs. Dull—Eighteen; the yolks of nine and the whites of nine.

### So Runs the World Away

Blinks — Times certainly have changed.

Jaaks—I'll say. We used to see odd things in a dime museum, now we buy them in a dime store.

The mill buys wheat, oats, corn.

### Vigor Personified

### YEAST FOAM EGG MASH

Made by N. I. Co-Op. Ass'n. will put your birds in fine condition to produce MORE EGGS, HEAVIER EGGS, BETTER IN EVERY WAY.

Eggs produced on Animal-Poultry Yeast Foam Mash Feeds are being sold as Yeast Foam Health Eggs. They are a thicker, heavier egg and go much farther in baking than ordinary eggs.

These yeast feeds build and maintain the vitality of the birds which means better results, better health all down the line. Try them and be convinced.

Sophomore Class, ---- Richard Jones  
Freshman Class, ---- Justin Long

### Senior Class News

The Mentone Senior Class will present its annual class play March 14 at the Community Building, starting at 7:30 p. m. The play "Am I In-cluding?" is the mystery comedy of three acts, directed by Bob Hanscome and will prove very interesting throughout. Also entertainment between acts. Price 15c and 25c.

### The Trip to Michigan City Prison

The members of the Senior Class had the privilege of visiting the state prison at Michigan City Saturday February 10. We all met at the Drug Store and with our lunches under our arms, crowded into the large school bus driven by Arlo Freisner. Our civics teacher, Mr. Mervel Smith and wife accompanied the class.

As we arrived too early to go direct to prison, Arlo drove us down to the beach where we ate our lunches and explored the sand dunes.

We were admitted into the prison at 1:00 o'clock. We marched into the main building in twos conducted by two wardens, one leading and one at the rear, and were shown through the main buildings of the prison, including the Hospital, Mess Hall, The Exhibit Hall, Cell Houses, Dormitory, Store Houses and the building of Criminally insane. The brave members of the class were given the privilege of sitting in the electric chair. The warden told us there had been twenty-five electrocuted in that chair. Mr. Smith preferred keeping a few feet away from it.

After being conducted through the different buildings for about an hour, and no one being locked up, we were led out of the prison. Everyone was deeply impressed by what they saw of the life of a convict. The warden bid us all goodbye and asked us all to come back again sometime. Mr. Smith said that he hoped he would

never see any of us back only on friendly terms.

On the way home we saw the largest Studebaker on display at the Studebaker testing grounds near South Bend. All in all everyone had a very interesting trip.

\*\*\*

### Junior Class News

Upon the day that we studied the history of the Panama Canal, Mr. Smith gave a long talk on the evolution of the mosquito. There is really a very intricate connection between the canal and a mosquito. Come and join our class and we will gladly explain it.

Here's a problem for you to figure out. How does it happen that when the dollar goes up, it goes down. That's an absolute fact.

By all means read Goldsmith's "She Stoops To Conquer". Paul Smith and his Junior Literature class recommend it to any person and all persons who need and enjoy a laugh, because there are millions of laughs to the car load.

If any prosperous business man of Mentone wants to employ some proficient young stenographers for the writing of business correspondence please notify the beginning class in Typing because we are engaged in writing the five different styles of business letters and we absolutely know the ins and outs of such writing.

### GO-FORWARD CLASS PARTY

The Go-Forward Sunday School class of the M. E. Church met Friday evening at the home of Mrs. T. J. Clutter. There were fourteen present who enjoyed a very delicious pot luck supper. The remainder of the evening was spent in visiting. The next meeting is to be held with Mrs. Ernie Manwaring on March 30.

### BIRTHS

Mr. and Mrs. Willys Nelson are the parents of a son, born February 24. The new arrival was named Fredrick Allen.

## Boy Scout Drive

A drive for sustaining members of the Boy Scout movement was launched in ten communities on Monday. The communities participating and their chairman are: Goshen, S. A. Pence; Middlebury, Dan Franz; New Paris, A. F. Saylor; Mentone, Dr. E. D. Anderson; Bristol, V. V. Clarke; North Webster, Dr. L. A. Laird; Dunlap, B. F. Kindig; Silver Lake, A. R. Ramsey; Millersburg, George Juday; and Wakarusa, C. J. Gerber.

In Elkhart and Nappanee, Scout funds are raised through the community chests. McKinley Elliott of Middleburg is area campaign chairman. The district campaign chairmen are W. W. Mehl of Goshen; Myron Hilbish of Elkhart; A. L. Miller of Nappanee and R. O. Nusbaum of Warsaw.

Mr. Elliott has explained the purpose of the drive as follows:

"The drive has two purposes: (1) to enroll a group of citizens who will take a general interest in Scouting and give their moral support, and (2) to acquire enough money to operate the area council and make the best kind of a scouting program available to more boys.

"Scouting receives no government appropriation and is therefore dependent on the support of broad-minded citizens who appreciate its value. It is not a commercial organization and every cent received is expended to provide a better program for more boys. The highest type of men in America serve on its executive board and committees, and its business transactions are studied by a congressional committee each year." "All funds raised in the sustaining membership drive are used to promote scout work in Elkhart and Kosciusko counties. All expenditures are supervised by a committee of prominent local citizens who have the public's confidence.

## Girl Scout News

We are now taking the long long trail into the land of learning. Every one is up on her toes for we are Scouts and no Scouts wants to be called lazy.

At present we are engaged in earning proficiency badges. The Home Nurse and Minstrel badges are in the lead with the World Knowledge in the stage of discussion. Mrs. Oliver Teel is teaching the Home Nurse class and Miss Mentzer is teaching these ambitious young minstrels.

During the Scout meeting Thursday the Home Nurse's were taught how to make beds properly, how to take off and air the covers and how to air bedding. We had a very great number of difficulties to overcome (we still doubt the fact that they are

Mentone, Indiana

overcome) but we are progressing. Next week we will learn how to make a bed with a patient in it.

These merry young minstrels are absorbing their songs with a rapidity which makes some of us less ambitious Scouts ashamed. They have to learn Indian, Negro, Scotch, Irish, English and many other songs. They have already learned Red Wing (Indian) Home on the Range (Western) and several Southern favorites.

The Girl Scouts wish to express their appreciation for the \$14.00 from the W. C. T. U. Under the leadership of the Troop Committee we hope to use the gift to its best advantage.

A contest! and what competition! At the meeting, now, we have to pass inspection. Are your finger nails clean? Your hair combed neatly? Your tie tied properly? In fact we must be in perfect condition. As a reward for this neatness the patrol with the neatest girls gets to lead the way into the Horseshoe Formation. And is this honor? You just ask any girl if she doesn't want her patrol to lead the way into the Horseshoe. The answer will undoubtedly be an emphatic "yes".

## Action

In 1881, the first lawyer located at Spokane, Wash., and within four days of his arrival, had drafted a city charter and started the city off.

## Days of the Week

The seven-day week as a unit of time dates from prehistoric antiquity. Each of the days corresponds to one of the seven moving heavenly bodies then known. Sunday and Monday are named after the sun and moon; Tuesday was named for Mars (Tuesday in Norse); Wednesday, Mercury's (Woden's) day; Thursday, Jupiter's (Thor's) day; Friday, Venus' (Freia's) day, and Saturday, Saturn's day.

## Statue of Peter Pan

The statue of Peter Pan in a Toronto (Canada) park is a replica of the original Peter Pan, which stands in South Kensington gardens, London, England. The original statue is an attempt to catch in sculpture the Peter Pan of J. M. Barrie's conception of life.

## Opening Day Flashes

The weather was not as we would have ordered, however there was a large crowd from 10 o'clock to 4 o'clock and much interest was shown in both the John Deere and Oliver Hart Power lines of farm machinery and equipment. Many implements were sold during the day.

The coffee and hot dogs served from 12:00 to 2:00 made a hit with the crowd and the three cooks were kept busy as also were the many volunteers who carried the kettles of coffee and buckets of sandwiches into the Mill basement and Lumber Shed where the crowds were fed.

An effort was made to register all guests and the three drawings from the registration box proved interesting with George Nellans, Ray Ward and Cecil Long being the lucky men to receive the gifts. George chose an axe, Ray a five tine fork and Cecil a fine fork.

Sealed bids were received all day on both an Oliver and Syracuse Plow. Many bids were received and the check up in the evening showed that the Oliver had been sold to Harry Witham and the Syracuse to William Vernet. Truly both of these men received good plows at attractive prices.

Creighton Brothers were the highest bidders on the manure spreader sold at auction and that was another bargain on this day of low prices.

Many admired the 10X12 brooder house built from California Red Wood, permanent wood, as it is shown in large building construction and used where wood is exposed to the weather and when put to this use it outlasts all other woods even though unpainted. This house was especially priced for the day at \$53.00 and was bought by Lewis Ellinger.

The Methodist Ladies Aid kindly loaned us cups, saucers and kitchen utensils. Lake Trail Cafe furnished the silverware, George Butcher volunteered the use of a coal oil burning cook stove and this stove was the cleanest and easiest operated stove the cook ever used.

Clarks Store donated the coffee, the Rust Rite Brand that has been their seller for many years.

No accounts were kept therefore we cannot state who was the largest or smallest eater but witnesses insist the big eater honors belong to Ed Ward, as he disappeared with a bucket of 24 hot dog sandwiches, luckily the bucket was found on the job later in the day.

Our associations' Secretary was on the job all day handing out the New Stock Certificates to the Stockholders. The Secretary of States approval of the increased capitalization to \$50,000.00 having been received.

Several visitors expressed amazement.

## Political Announcements

Dear Mr. Candidate:

As the season for candidates seems to be upon us our minds are turned toward the Primary Election in May. As we have a circulation of 900 among the farmers and taxpayers of the township and county we feel that by placing a primary card in the Co-Op. News would be a very efficient way of reaching the many voters of the township and county. A card two inches by one column will be published the first and third Wednesday of each month until the Primary for \$1.50. Cash must accompany the order. Your copy must be in the office on Saturday previous to the day of publication.

The Co-Op News

\*\*\*

For Trustee Harrison Township. Subject to the decision of the Republicans at the primary on May 8th. Have been a resident of this township for nearly thirty years and believe I am familiar with the most of the problems of the taxpayers and administration of township affairs. Your support will be highly appreciated.

Mr. and Mrs. F. D. Lemler and daughter Phyllis, spent last Sunday with Mr. and Mrs. S. M. Hill, of Ft. Wayne.

### ROOF FIRES

The Mentone Fire Department was called to action twice Friday, March 9, on North Broadway in Mentone. In the morning they were called to the Clark home and in the afternoon they were called to the J. M. Preisch home. Both were roof fires and the damages were slight.

## Lights of New York

by L. L. STEVENSON

Since ships loaded with immigrants no longer race for quarantine to beat quota restrictions, the old turbulent days at Ellis island have vanished. With immigration at its present low ebb, in place of crowding and confusion, there is now more or less prosaic routine. The heartbreak and tragedy so often encountered there in the past are extremely rare now. Occasionally a stowaway, of a higher grade than the usual type of ocean hobo, is caught at the threshold of the New world and causes a bit of sympathy. There are deportees, of course. Being worsted in an encounter with a strange land would suggest tragedy. But as a rule, deportees are stolid and colorless. Some shed tears. But most of them face the future with a shrug of the shoulders or a puff of cigarette smoke.

Sometimes there is tragedy even now, however, tragedy which at first glance may have the appearance of comedy. For instance a recent occurrence—a father chasing two grown sons about an office in the administration building with desks, filing cases and chairs being upset in the pursuit. When the father caught one of the sons, he lashed him with a strap until his face bled. It developed then that the two sons wanted their mother, who was being detained at the island, admitted to the country. The father did not. And the reason why he wanted the mother of his two sons kept out was he is living with another woman.

The father and the two sons were finally placed aboard the ferry that plies between the island and the mainland. At the Battery, the sons appealed to two policemen. They searched the father. But he had thrown the strap into the bay. So the three went their separate ways. Incidentally, the Ellis island ferry, owned and operated by the government, provides the longest free ferry ride in the city. But the man at the gate at the Battery has to be convinced that the would-be passenger actually has business at the immigration station before he stands aside.

Well do I remember one late June day when I went down the bay in a government cutter to meet some one of importance who was returning from Europe and had to be interviewed. So many ships were waiting there that it seemed as if an armada had gathered in the Narrows. In fact, it looked as if a biscuit could be tossed from the deck of one ship to the other. Each ship was loaded with newcomers to America—material for the melting pot. They all passed through Ellis island which at that time was a great mill turning out potential citizens.

Used to watch immigrants also as the liners passed the Goddess of Liberty, wondering the while what their thoughts were concerning that symbol which undoubtedly told them that they were about to attain their goal. I never learned. Some of the newcomers gave the great green statue a glance. Others merely continued their conversations. If any ever lifted a hat, that was something that escaped me.

Was told of some young women who went motoring with a young man with whom they were only slightly acquainted. Stopping in front of a store, he asked if they would mind waiting while he attended to some business. He was gone some time and on his return they all went to a restaurant. During dinner, they learned that he was an undertaker and that the business to which he had attended while they waited was embalming a woman!

## THE OLIVER ROW CROP

## On Its Tip-Toe Wheels It Set a New Standard of Farm Power

The Oliver Hart-Parr Row Crop with its 18 horse power draw-bar pull, operating through its tip-toe wheels has set a new standard of farm power for row crop and diversified farming.

The wheels are narrow—the axle high—the equipment mounted so that you can work right up to the end of the row—but without disturbing the growing crops. Rear wheel brakes, that operate with the steering wheel give the Row Crop quicker, closer control.

The cultivating and planting equipment, in practically all cases, is mounted ahead of the operator, so that he always has a full view of the work. The ability of the gangs to both float and penetrate independently gives an evenness of planting and cultivation unknown in tractor work before. The tip-toe wheels give positive traction. They pack the soil so very little that a spike harrow completely removes their tracks.

Don't go into this season until you see it—the Oliver Row Crop—on its tip-toe wheels with complete equipment.

## DEFINES BANKERS' PART IN RECOVERY

- Head of American Bankers Association Assures the President of Confidence and Desire to Cooperate Among Bankers

WASHINGTON, D. C. -- President Roosevelt in his address before the NRA conference here on March 5 announced that he had received the following telegram from Francis M. Law, President of the American Bankers Association:

"On this your first anniversary please allow me in behalf of the country's banks to express our full confidence and our sincere desire to cooperate in your courageous efforts to bring about recovery.\*\*\* The banking structure of the country is sound and liquid and banks have never been in stronger position to function effectively. Conditions have improved to the point where it is no longer necessary for banks to be super-liquid.\*\*\* There is a definite call now for banks, not to extend loose credits or to make improper loans, but for a most sympathetic attitude toward legitimate credit needs and for a recognition of responsibility for their proper and vital part in the program of recovery."

### The Soundness of Banking

In an address before a recent trust conference of the association's Trust Division in New York, Mr. Law said:

"A depression cannot long survive a sound banking structure if the banking structure is responsive to legitimate needs and functions in a way that is virile and alive. The most cheering fact of the present situation is the knowledge that banks are in strong position."

"Recovery, even to the most pessimistic, is no longer a myth or a rumor, nor is it merely psychological. Abundant evidence and proof lie on every hand—tangible proof. With a return of confidence the wheels have begun to go round and a great many well managed businesses may look for a profit during this calendar year with fair assurance at least. For what has been achieved let us thank the President, who has labored with courage and patience and vision. Let us thank the Congress, whose members during the emergency have put the public welfare above partisanship. Let us thank one hundred twenty-five million of our own citizens who have refused to be stampeded, but rather who have kept alive the divine spark of faith and hope."

### Cause for Confidence

"We may reasonably expect that the recent action of the government in stabilizing the dollar will have a marked tendency to encourage industrial and other business commitments. Business men need not be so exclusively engaged in taking counsel of their fears now that uncertainty does not haunt them."

"Much has been said about the loosening of credit by banks. During the acute

period of the depression banks for the most part have not been lending normally, nor should they be blamed. With public confidence shattered the banker was properly concerned in liquidity, having in mind his primary obligation to pay off deposits. The situation has improved to the point where super-liquidity no longer seems necessary. Conditions have materially changed. Banks will desire, for every reason, to return to a more normal lending policy. This means a sympathetic attitude and a recognition of responsibility for his proper part in the program of recovery by the banker as he passes upon and meets sound credit requirements of business as it swings into and continues on the upward turn."

### Public Confidence Returns

Direct information indicates conclusively that the banking situation is showing definite and steady improvement, J. F. T. O'Connor, Comptroller of the Currency of the United States, said in a recent address. He pointed out that the decided drop which has occurred in money in circulation shows the public has largely ceased hoarding.

On March 1, 1934, the Federal Reserve Board reported that the volume of money in circulation amounted to \$5,355,000,000, which was a decline of \$1,077,000,000 since March 1, 1933. It was a drop of \$2,226,000,000, or over 29 per cent from the all-time peak of \$7,581,000,000 reached on March 13, 1933. About one-half the decrease, it was pointed out, reflected the return of currency from the public.

Money in circulation declined rapidly after the reopening of the banks in March, 1933, and has continued since to decline from week to week. "notwithstanding the increase in the demand for currency arising from enlargement of pay rolls and increase in the volume of retail trade," the Comptroller said, which, he added, "indicates a continued return of money from hoards as banking facilities were reestablished."

### About Bank Loans

"As for the charge that the banks will not extend credit, the first and obvious reply is that the banks themselves are made up of the very bone and sinew of the industrial, commercial and agricultural interests of the country. Bank directors, and, to a large extent, bank officers, are drawn from the business and farming population. If they do not feel at any given moment that it is wise to make a particular loan, it is more than probable that there are sound reasons for not making it," says an editorial in the Saturday Evening Post.

### Canada Likes Birds

Ten bird sanctuaries in Canada shelter more than 100,000 birds, including nesting elders, puffins, black ducks, shorebirds, gulls, and terns.

### Longfellow's Poems

In 1839, Longfellow's "Psalm of Life" and other poems were published in a volume entitled "Voices of the Night." This may really be said to be his first volume of poetry although a collection of juvenile poems was published in 1826.

## WIFE'S GRAVE LURE TO ESCAPED KILLER

Convict, Free Four Months, Visits Cemetery; Nabbed.

St. John, Que.—Stuart work by the local police in setting a watch over his wife's grave in the St. John cemetery, resulted in the capture of Adolphe Bonneau, alias Bernard, alias "Frenchy," convicted murderer wanted in Michigan.

He escaped four months ago while being taken handcuffed to start a life sentence in the state penitentiary at Jackson, Mich.

Two St. John constables arrested Bonneau at the farm of relatives near Ste. Anne de Sabrevois, pouncing on him while he sat at the kitchen stove in his bare feet.

The arrest ended two weeks of careful planning by Chief Morin. Every precaution was taken to establish the man's identity as the escaped convict. Because he was regarded as a desperate killer, plans were laid to catch him off guard.

Bonneau was sought by Detroit police last spring for the slaying of a blind pig proprietor named Ruchter. Montreal detectives arrested him for the Michigan authorities, and he staged a collapse and a series of convulsions which puzzled the police medical staff and delayed his removal to Detroit.

Tried for murder, convicted and sentenced to life imprisonment, he was being taken to Jackson penitentiary with 11 other prisoners when he sawed the handcuffs from his wrist chains and leaped from the train.

The mill buys wheat, oats, corn.

## Kill in Vendetta; Youths Sentenced

Bastia, Italy.—As a sequel to a Corsican vendetta, two young shepherds, turned bandits, Pancrace Santoni and Baptiste Bartoli, have been sentenced to twenty years' penal servitude. Santoni, twenty-one, was sentenced two years ago to five months' imprisonment for theft and violence. One of the witnesses against him was a farmer, Delassus. Santoni swore vengeance.

Santoni and Bartoli watched the farmer's house. On the fifth day he opened his door. They shot him.

## Eagle Battles Turtle, Is Rescued by Hunter

Whitehall, N. Y.—A grim struggle between a bald eagle and a large turtle was recounted by Fred Braw, a hunter.

The incident, he said, occurred in the South bay region, near Diameter. He was attracted to the scene by the flapping of wings and the screeching of a bird. Upon arrival, he saw the eagle, weighing approximately ten pounds, rising and falling alternately to the ground. The turtle, a five-pounder, had one of the eagle's claws gripped firmly in its mouth.

For several minutes the eagle fought desperately to release the turtle's grip. Gradually it began to weaken. But Braw put an end to the struggle when he pried open the turtle's jaws with his hunting knife. The bird fluttered away.

## MERRY QUIPS

### On His Heels

Simpson—How much are they asking for your rent now?  
Timpson—About twice a day.

### Just Like a Man

He—Don't act like a fool!  
She—There you go—you want a monopoly of everything.

### The Usual Insect

Wife (hearing husband arrive home after hours)—Who is that?  
Husband—Er-hardly anybody, dear.

### Destroying the Evidence

Jimmie—What you doin'?  
Billie—Washin' the jelly off my hands. Ma's a fingerprint expert.

### Old Grouch Speaks

"Our first baby was a girl, and the second was of the contrary sex."  
"Oh, then you have two girls."

### Vanished

Sparker—Has Jones an automobile?  
Carker—Not a bit of it. He hit a telegraph pole yesterday.

### More Like It

Fortune Teller—I warn you; a dark man is about to cross your path.  
Motorist—Better warn the dark man.

## Kills Lice

"Black Leaf 40" which has been used successfully over 20 years as a spray to kill insects on gardens, flowers and orchards has been found equally effective in killing lice on poultry.

### NO HANDLING OF BIRDS

Cost is reduced—No work—Just paint tops of roosts lightly. The fumes kill lice while flock roosts. If your dealer does not handle send \$1.00 for trial package.

100 Bird Treatment \$1. Shipped postpaid if you mention dealer's name.

### YEAST FOAM EGG MASH

Made by N. I. Co-Op. Ass'n. will put your birds in fine condition to produce MORE EGGS, HEAVIER EGGS, BETTER IN EVERY WAY.

Eggs produced on Animal-Poultry Yeast Foam Mash Feeds are being sold as Yeast Foam Health Eggs. They are a thicker, heavier egg and go much farther in baking than ordinary eggs.

These yeast feeds build and maintain the vitality of the birds which means better results, better health all down the line. Try them and be convinced.

## Get Profitable Production FROM YOUR FLOCK

Murphy's Vig-O-Ray Egg Laying Mash contains everything your birds need to maintain health and weight and to produce lots of eggs. Vig-O-Ray Mash makes your hens lay because it supplies all the proteins, both animal and vegetable, together with minerals and vitamins that are so absolutely necessary for egg production.

Vig-O-Ray maintains healthy, vigorous flocks that lay day in and day out, month after month with no breakdowns in February or March as so often happens in high producing flocks.

No matter what feed you are using now—you will save money on your feed and make more money out of your poultry and eggs when you feed Murphy's Vig-O-Ray. It makes your hens pay you a good profit all the year around.

## Beavers' Dam Cuts Off Water Supply

Grand Marais, Minn.—When the water supply at the C. C. C. camp near here failed recently, investigation revealed that a newly built beaver dam had cut off the flow. Camp workers destroyed this dam, but the beavers promptly built it up again.

Capt. R. C. Sanders, taking a cue from the persistent animals ordered a man-made dam built by members of the camp so that the water might be piped to the camp from the resulting reservoir. This dam proved less sturdy than the work of the beavers and soon sprung a leak, but the beavers came to the rescue and built nine more dams before the conservation workers had finished their one. The combined effect of all this dam building was to turn the creek into a fair-sized lake.

## MENTONE NEWS

Mrs. Maggie Dillie is seriously ill at her home.

Miss Margaret Ann Ward has been suffering from an ulcerated tooth the past few days.

Mrs. George Arnsberger is being cared for at the home of her daughter, Mrs. Charles Medaford.

Mr. and Mrs. Kenneth Halderman have moved into the Verdo Smith property on North Franklin Street.

Mr. and Mrs. Virgil Hire who have spent the past few weeks touring the east returned to their home Tuesday.

Mrs. Dorothy Jacks has gone to make her home with her husbands' parents, Mr. and Mrs. Jacks, of Delphi.

Mrs. Alice Borton is at her home after spending most of the winter in Ligonier and Fort Wayne, with her sons.

Mr. McCray spent Thursday with Mr. and Mrs. Wade Whetstone and family. Mrs. Whetstone is the daughter of Mr. McCray.

Among those from Mentone who attended the State Basket Ball tournament were Mr. and Mrs. F. R. Burns and daughter Jean; Dale Kelly, Mr. Songer Maurice Greulich, Mr. James Gill and Mrs. Emory Hoffer.

### Giant Spiders

Giant spiders of Brazil have been known to devour rattlesnakes.

## BIRTHS

Mr. and Mrs. Noble H. Koontz of Bloomington are the proud parents of a son born March 1st. The new arrival was named Donald Eugene. Mr. and Mrs. Sam Kelly are the grandparents.

## SHORT AND SNAPPY

There is much loneliness in life, but many want it so.

A sermon should be long if the subject is important.

Good luck is seldom displayed on the bargain counter.

Crime is caused by ignorance—ignorance of common sense.

We all have seven or eight hours' vacation every day—sleep.

Charity is not giving away something that you don't want.

Romance remains romance so long as it is of no consequence.

After you get used to a silent man, he is pretty fair company.

A close-fisted man is often liberal in the use of his closed fists.

We don't want leisure except to work hard at what we like.

Snakes' eggs, if you know what they are, look nearly as horrid as the snakes.

Civilization consists primarily in control of the instincts, greeds and appetites.

Your moral support is about all the politicians will ask—if you will go to the ballot box.

A man who can't stand prosperity is one who thinks "What's money for except to spend?"

An interminable talker may dislike to do nothing but listen when the radio is speaking.

One commendable way of taking a rest is to refrain from attending to other people's business.

A hypochondriac is one who worries over a pain which another man gets used to until he's eighty-nine.

There are too many businesses of every kind, but what is one to do? Everybody can't raise chickens.

Some of the work that starts with a rush at 8:00 a. m. stops for two hours' loafing later in the day.

### Time Machine

It was Anthony's first ride in a railway train, and the succession of wonders reduced him to a state of hysterical astonishment. The train rounded a slight bend and, with a shriek of its whistle, plunged into a tunnel. There were gasps of surprise from the corner where Anthony was kneeling. Suddenly the train rushed into broad daylight again, and a small voice was lifted in wonder.

"It's tomorrow!" exclaimed the small boy.

### Sounds Like It

"She treats her husband like a man-dollin."

"What do you mean?"

"She is always picking on him."—Brooklyn Eagle.

### Old Stuff

Friend—What play are you doing now?

Producer—Hamlet.

"You are behind the times. I saw that in New York six years ago."

### Deduction

Lotts—Dobson's peculiar! Owns a car and owes me \$5!

Potts—Only five? How little he drives it!

## YEASTOMINERAL PAYS:—

Yeastomineral added to your poultry feed at the rate of two to three pounds per hundred will hold your egg production over a longer period of time. It will hold the vitality of your flock, produce better feathers, quicken the moulting period, and has a tendency toward the development of larger eggs.

When Yeastomineral is incorporated in the ration, it increases the hatchability of the eggs. Yeastomineral is a perfectly balanced mineral, carrying a large number of ingredients. One pound of Hoosier Yeastomineral is worth as much to a laying hen, as five pounds of a simple mineral.

### Many Live in Java

Java is thickly populated, the average being 725 people to the square mile. Rice is the principal food of this heavy population.

### Morro Castles

There are two Morro castles in Cuba, the famous Castillo del Morro at the entrance to Havana bay, which was constructed before 1600, and the Morro castle at Santiago on a promontory to the right of the bay, built by General Pedro de la Roca in 1640. There is a third castle of this name in Puerto Rico. El Morro is Spanish and means a promontory.

### Japanese in South America

More Japanese live in South America than in North America.

*America  
- here they are!*

To fill the record-breaking nationwide demand, Chevrolets are being produced at a record-breaking rate of

**4000**

units a day!

A GENERAL MOTORS VALUE

*Chevrolet*

DEALER ADVERTISEMENT

CHEVROLET factories are breaking records, trying to give America all the cars it wants. 4000 units a day are rolling off the assembly lines. In fact, more Chevrolets are now being produced than any other make of automobile in the world.

Naturally, Chevrolet is proud of the record its factories have made this year. Especially so, in view of the fact that the 1934 Chevrolet is not merely last year's model improved, but a basically new automobile throughout. Producing so many of these cars so early in the season, and producing them all up to Chevrolet high standards of quality, is nothing short of a real accomplishment!

Chevrolet takes this opportunity to thank the American public for the wonderful way it has received the 1934 Chevrolet car. And Chevrolet is happy to report, that with over 4,000 cars a day being built, dealers everywhere will soon be in a position to make immediate deliveries.

CHEVROLET MOTOR CO., DETROIT, MICH.

### OPENING DAY FLASHES

(Continued from front page)

ment at the quality of our Peet Moss, their dealers having convinced them a German Embargo made a good litter unobtainable.

Some were surprised to learn that we sell fencing and paints while others did not know we sold cement and lime.

An interesting display to many was the new type egg case which we have been selling for 32 cents as a temporary introductory price.

The fertilizer man was there with an interesting booth and some learned for the first time Camel Brand Fertilizer feeds the plant every day

from the time the seed is planted until the crop is matured.

In every way it was a great day, truly the weather was cold but the crowds came and gave us the largest days business we ever had in March. We appreciate the help received from our Mentone friends and give them much credit for the great day we had.

Every member of our organization was happy to entertain the friends of the Co-Op Organization and we want you to return early and often.

As we look back on our First Opening Day for Farm Machinery we are glad we did it but see better ways to conduct it in the future years. Cer-

tainly one big improvement for future consideration is a Lady Customers Department and have the ladies also our guests.

### FAREWELL PARTY

On Friday evening March 16, some of the friends and neighbors gathered at the home of Mr. and Mrs. James Longacre, and gave them a farewell party. Mr. and Mrs. James Longacre are moving on a farm north of Palestine. The evening was spent in visiting, refreshments were served consisting of pop-corn and candy. Those present were: Mr. and Mrs. Charles Shewman and daughter,

Doris and Mrs. Shewman's mother Mrs. Love of Akron, Mr. and Mrs. Elias Smith, Mr. and Mrs. Milo Howard and daughter Ruth, Mr. and Mrs. Mont Lohrer and daughters, Irene and Geraldine, Mr. and Mrs. Alva Creviston and sons Heston and Elwin and Miss Bethel Eller, all left at a late hour giving Mr. and Mrs. Longacre their best wishes in their new home.

### ROYAL NEIGHBORS

All Royal Neighbors and families are invited to be present March 31 at the hall. A fine program and a pot luck supper at 7:30. Oracle, Mary Borton.
