# The Northern Indiana Co-Op. News

Published the 1st and 3rd Wednesdays of Each Month by the Northern Indiana Co-Operative Assn.

Number 26.

Volume 2.

Northern Indiana Co-Op. News, March 6, 1935.

## New Duties for Managing Editor

M. Roy Rush, manager editor of the News, has assumed a more complicated position than he has ever held before. On Saturday March 2 he was granted the title of "Father" which may seem quite simple now but as the years pass it is sure to become more complicated. But we all know the old saying "Experience is the best teacher" and we all are for you.

We all feel certain if Mr. Rush fulfills his new position as well as he has his position connected with the Northern Indiana Co-operative Association the new daughter will grow into a fine species of womanhood. The Northern Indiana Co-Operative Association extends the most hearty of congratulations to Mr. and Mrs. Rush.

### Local Young Man Seriously Injured In Explosion

Jack VanGilder, of this city, was in danger of losing his sight because of a chemical explosion which occurred last Thursday at Manchester College. He is improving rapidly although at one time it was feared that the eyesight might be ruined but from present indications we are happy to say that it is thought he will fully recover.

VanGilder, a sophomore at Manchester College, is a well-known figure around the city and we are sorry to hear of this accident.

An incorrect report was spread abroad and was immediately investigated by the young student's mother and friends. According to a statement made by Mrs. VanGilder, the mother of the victim, Otho Winger, president of the Manchester College did not make the following statement: "The three youths were fooling with something they had no business with and the explosion was in no way connected with college work."

Jack VanGilder was not implicated in the theatre rush as was stated in the false rumor. Mrs. VanGilder also stated that although young VanGilder was in the chemical laboratory preparing tear gas without the supervision of the instructor he was not preparing the gas to carry out a college prank.

Two other students were in the laboratory at the time of the explosion occurred but they were working on

experiments of their own which were connected with their college work. One boy was only slightly injured by the violent explosion but Robert McCune was seriously burned on the arm. We hope to soon hear of Mr. VanGilders return to good health.

### Read The Ads

In the last few issues of the Co-Op News we have had a very faithful advertiser. This is none other than Don Burt, manager of the Burt's Shoe Store in Warsaw. Mr. Burt carries a nice sized ad and would be very much pleased if you would make a visit to his store and mention the fact that you saw his ad in the Co-Op News. We know that he appreciates your patronage and you will be cordially welcomed whether you buy or not.

### Attention Readers

The next issue of the Co-Op News will carry for sale and trade ads free of charge. This will be for the March 20 issue only. This offer is not available to business people.

### RECEPTION

The Church of Christ is sponsoring a reception or farewell party in the cafeteria room of the school building Tuesday evening March 12 for Rev. J. S. Johns and family, who are leaving soon for their new home at Sullivan, Indiana. There will be a pot luck supper at 7:00 p. m. The public is invited. Bring your own table service.

### Farm Wife Is Badly Burned In Explosion

Mrs. Russell Walters, 40, of Near Mentone Victim of Accident While Starting Fire

Prompt action on the part of Russell Walters, a farmer of Mentone saved his wife, Irene Walters, from death by fire at 7:30 o'clock Thursday morning when oil used to start a fire in the cook stove exploded, spraying Mrs. Walters.

Walters, who was in another room heard his wife's scream and rushed into the kitchen, tearing a part of her clothing off and wrapping her in a rug. Mrs. Walters, who is 40 years of age, suffered severe and painful burns on the arms, legs and hips. The skin being burned from the body in places.

### Hands Badly Burned

Walters, who is about 45 years of age, suffered severe burns on his hands and especially his finger tips because of rescuing his wife.

The finger tips were so badly burned that they were numb. The Walters are the parents of four young children and reside two miles west of Mentone.

Both Mr. and Mrs. Walters were taken to the office of Dr. George Taylor, where their injuries were dressed. Later they returned to their home and their recovery is expected.

The mill buys wheat, oats, corn.

Poultry medicine at the Co-Op mill.

### SURPRISE PARTY

A delightful surprise party was given in honor of Miss Doris Wilttrout on her sixteenth birthday Saturday evening February 23. The evening was spent in playing Bunco and other games. Miss Wilttrout received many nice gifts. Those present were Misses Louise Paulus, Frances Tucker, Marcella Leininger, Winifred Mollenhour, Judy Busenburg, and Messers Frank Smith, Gene Marshall, Deloise White, William Cook, Harry Brant and Lewis Meredith.

### WIND PLAYS PRANKS

A freak wind swooped down on the business portion of Mentone Monday night and took the tin roof off the Aughinbaugh building and demolished the east window in the Public Library building owned by Carl Myers.

### IN MEMORIAM

In memory of our beloved husband and father, Fred L. Busenburg, who passed away 2 years ago today Feb. 28, 1933. Loving and kind in all his ways, upright and just to the end of his days, sincere and true in his heart and mind, beautiful memories he left behind.

### WANT BABY CHICKS?

Do not overlook the advertisement of the Hoosier Egg & Fruit Farm Hatchery in this issue. The proprietor, Mr. Forrest Kesler is perfectly reliable, and any promises that he makes will be fulfilled.

# Northern Indiana Co-Op. Ass'n.

## THE FARMERS MILL

### PHONE 101 MENTONE, INDIANA

### FOR SERVICE AND QUALITY

Banner Mashers have been made Famous in the past few short years by thousands of Banner Mash feeders.

Banner Mashers are made up at our Mill every day in the week to insure each and every poultry producer (large or small) of getting fresh feeds at all times.

Banner Mashers are made with the finest Quality of Ingredients obtainable on the markets, today regardless of cost. The combination of really good formula's, Quality and freshness of feed stuff's such as the Banner Mashers are made of are bound to give the very best results.

The costs to you are so reasonable that you cannot afford to feed mashers that do not come up to the Banner Mash Standard Quality.

In the space below you will find many items useful to you on your farm and in your poultry house.

## PATIENT CONVICT SHOWS INGENUITY IN PRISON BREAK

**Spends Years in Preparation;  
Recaptured After Few  
Hours Freedom.**

Jackson, Mich.—Day after day, week after week, and year after year, Stephen Kaleman was serving out a life sentence for murder in the Jackson penitentiary.

He was a skilled workman and was assigned to the arts and crafts department of the grim prison. Outside was the free air; inside was drab monotony.

To win that freedom Kaleman needed tools. Surprisingly he began to take metals from the workshop; a bit of steel here, a bit of iron there. From them he fashioned crude but efficient drills and files, saws, and a hammer.

### Needs a Gun—Makes Him One.

A weapon was needed. Kaleman slipped out of the arts and crafts department a short piece of tubular steel. Night after night he worked on it until it was rifled. Another piece he made into a firing chamber. With a knife he fashioned a wooden stock and assembled the gun by attaching the barrel to the stock with stolen set screws.

Copper tubing formed the shells. Bullets he molded from lead. Match-heads and cellulose, soaked from the back of playing cards and some other highly combustible material became his powder. A solder cap impregnated with fulminate became a detonator.

After months, Kaleman was ready with his first plans. He took one man into his confidence. It was John Schultz, also serving life for murder. Together, they gained entrance to the basement through steel trap doors in the floor, used for drainage. Through a labyrinth of pipes, conduits, and electric cables they made their way to a concrete air shaft which led to the roof. They chiseled their way into the shaft through two sets of steel sheeting and the concrete.

### Fits Ladder of Steel.

Up the shaft at two foot intervals there were bolts holding the reinforcement for the concrete. Kaleman carefully fitted their threads to pieces of iron tubing he had stolen. Carefully he worked upward, screwing in the tubes as ladder "rungs" as he progressed at night and removing them each day to avoid discovery.

Forty "rungs" finally were ready. Schultz meanwhile was slipping twine out of the shop and weaving it into a rope.

Then all was ready. They wired the basement door shut, entered the airshaft, and climbed upward, slowly but steadily. Kaleman setting the bars on the way.

Schultz' rope was thrown over the edge of the roof and they slid down, outside the prison walls to freedom!

But an alarm had been sounded. Kaleman was recaptured by two

guards who had trailed him eight miles through the snow. Schultz was seized after a few hours freedom in the home of a farmer whose wife had suspected him when he applied for food. She had telephoned the prison while he ate.

## MENTONE NEWS

Miss Rosemary Guy spent Sunday with her aunt, Mrs. Willard Guy of Warsaw.

We are ready to serve you with your spring sewing. The Broadway Dress Shop.

Mrs. Ike Sarber of Fort Wayne, visited last week with her son, Mr. James Sarber.

Mrs. Adeline Shoup has returned to her home in Warsaw, after visiting her sister, Mrs. Charles Shafer.

Mrs. Howard Kohr visited with her parents, Mr. and Mrs. J. M. Tillman, of North Manchester, Tuesday.

Mr. Fred Swick, of west of Mentone, spent last week visiting his daughter, Mrs. Adrian Little, of Huntington.

Mrs. Linden Blue, who accompanied Mr. and Mrs. C. L. Manwaring on their southern trip, has returned to her home in Denver, Colorado.

Mrs. William Cook is visiting with her nieces and nephews and friends at South Bend. Mrs. Cook expects her visit to extend over a period of three weeks.

Mr. and Mrs. Harold Reichart and son of Nappanee and Mrs. Burt Ames, Mr. Victor Bowers, Mrs. D. B. Lemler and Mr. and Mrs. Homer Woodcock of Bourbon spent Thursday in Mentone, visiting Mr. and Mrs. Fred Lemler.

Mr. and Mrs. Chester Manwaring returned Wednesday, February 20, from the south. The trip was extended over a period of six weeks, and they greatly enjoyed their vacation in Sarasota, Miami, Naples and Orlando, Florida.

## NOTICE

Bring your spring sewing to the Broadway Dress Shop.

### The Laziest People

The Okavango natives of Southwest Africa are said to be so lazy that they do not seem to care whether they survive "lean" years or not—so long as they do not work. Their "labor-saving" devices include: Poisoning water to catch fish quickly; chopping or burning down trees to get fruit; and burning grassland to drive away wild animals. The Okavango natives should be able to grow and store sufficient foodstuffs to carry them through two or three years of drouth, but that they are too lazy and indifferent to do so.

## Murderer Is Convicted and Hanged in 3 Hours

Vienna.—With all the speed it could summon, justice has disposed of handsome Alois Gaidasch, twenty-one.

Three hours after a special court had sentenced Alois to death for the murder of his father, he was hanged.

Even then, the proceedings might have been quicker, but Alois kept fainting, and the Austrian law requires that the condemned man shall be conscious when the noose tightens.

Gaidasch killed his father during a quarrel in which his father forbade him to continue a love affair with a married woman. Gaidasch used a crowbar, which, it was established, he premeditatedly hid in his home.

When he had killed his father, he hid the body in a loft, and invited his woman friend to spend the evening at his home. The next day he told his neighbors that his father had gone abroad. But the body was discovered and he was arrested.

Before his execution Gaidasch bequeathed all his possessions to the woman.

## Young Farmer Strangles Vicious 7-Foot Eagle

Helsingfors.—A young farmer at Leppavirro, North Finland, was seriously hurt when he was attacked by a huge eagle on a lonely country road at night.

He was riding home when the giant bird swooped down on his horse.

The terrified animal succeeded in shaking itself free and the bird flew off and hid behind a bush at the roadside.

The farmer, who was powerfully built, dismounted and approached the bush, and when he was a few feet away the eagle left his hiding place and flew at him.

Man and eagle struggled desperately, and eventually he managed to strangle it—but not before it had ripped all his clothing to shreds and badly lacerated his body. And both arms.

The eagle was later measured and had a wing span of seven feet.

## Woman Ties Money to Toy Balloon; It Flies Away

Helsingfors, Finland.—Having sold her cow for \$25 at the Helmeveden (central Finland) market, a peasant woman tied the string of a toy balloon, which she had purchased for her child, around the money.

Bumped against in the seething crowd, the unfortunate woman inadvertently released the string; the balloon rapidly disappeared in the sky, bearing the money with it.

### Oil to Quell Waves

During heavy seas oil is used to quell the waves, thus making the launching of life boats possible.

Thick vines over an arbor hold moisture. Most woods soon rot. Use California Redwood.

## The Future of California Redwood

Redwood is the prominent building wood of the future. Its qualifications are convincing. Any building material that is amazingly durable, naturally fire retardant, strong, free from any marked tendency to check, split or warp, requiring no preservative, readily available and moderate in cost, must be so destined. And in addition to being essentially practical, Redwood is one of the most beautifully grained and colored woods imaginable. Artistic, for interior and exterior trim, it has also found its place in the handsomest homes throughout the country.

NATURE made California Redwood an ideal surface to paint, stain or enamel. There is no important commercial wood on which paint looks better or lasts longer.

For those places where there is constant exposure to rain and weather California Redwood proves its superior qualities. Ease of working is conducive to better workmanship. The unusually low factor of shrinkage means freedom from warping, so that joints stay tight, and siding stays flat. Natural durability prevents deterioration from decay.

**"Sequoia Brand" Redwood is Manufactured by the Mills of the Redwood Sales Company, San Francisco, Calif.**

### It Can Be Done

One of the great contributions of the American idea to the world is the proven fact that people of every nation under the sun can live together in the same country without fighting.

### The Curfew Bell

The Curfew bell originated in England. It was instituted by William the Conqueror. The bell was rung at 8 p. m., when all lights were extinguished, the fires raked up and covered and the people of the Kingdom retired to bed. The practice lasted for many years.

### Replacing Worn Money

A constant stream of used paper currency and worn coins runs from the banks into the treasury and is exchanged for newly made and minted money. The exchange amounts to millions a day. A \$1 bill, for instance, rarely is in circulation more than six months before it goes back to the treasury to be replaced by a new one. The old paper money is destroyed. The coins are melted down and reminted.

### Portland Stone in England

On the Isle of Portland, in England, there is found a yellowish white limestone which is common as a building material. Portland cement, which was invented in England in about 1845, was so named because when set it resembled portland stone.

### Hay Fever Hereditary

It has been found that heredity and civilized living make people more susceptible to hay fever.

### Volatile Coal in Kentucky

The highest percentage of volatile coal is mined in Breckinridge county, Ky. The coal is 62 per cent volatile.

### Washington Leads in Lumber

Since 1904 Washington has held first place, except in 1914, among the lumber producing states, and in 1926, its peak year, produced 7,546,000,000 feet or one-fifth of the entire cut of the United States.

### Birthstone Months

January, garnet; February, amethyst; March, bloodstone; April, diamond; May, emerald; June, agate or pearl; July, ruby or carnelian; August, sardonyx; September, sapphire; October, opal; November, topaz; December, turquoise and lapis lazuli.

### Where Old Festival Continues

At Aix en Provence, France, was instituted the first Roman garrison in Gaul. The church of Monte Sainte Victoire, near by, perpetuates a victory of Marius. Every April 24 there is a procession from Bauvenargues to the mountain to light a bonfire. This, the festival of Marius, is one of the oldest still existing.

### Could Teach Ancestors

"I reverence the wisdom of my ancestors," said Hi Ho, the sage of Chinatown. "Yet my more modern experience will enable me to teach them much when I meet them again."

### The Habit of Pickin'

"I wish life could be simplified," said Uncle Eben, "so dat we could go back to pickin' on de old banjo, 'stead of everybody pickin' on everybody else."

### Social Order Wanted

All governments have always tried to realize some ideal of social order, and to prevent departures from some generally accepted standard of civilized life.

### Power of Electric Eel

Not only does the electric eel possess the unusual power of giving an electric shock, but apparently it is able to regulate the power of the current it releases.

### Hair Form

Hair form, or its amount of waviness, varies vastly among all races instead of being characteristic of each, as was formerly supposed, reported Madeline Kneberg of University of Chicago. She found hairs from a single head may have many different cross-sections, including circles, ovals, ellipses, kidney shapes, triangles, and prismatic forms.

### Streets Named for Trees

Although Panhandle (Texas) is a prairie town with no natural tree growth, 16 of its 52 streets were named for trees.

### Prevalence of Diphtheria

Diphtheria has been present continually in nearly every civilized country ever since the widespread epidemic in the middle of the Nineteenth century.

### Color of Wild Turkey Meat

The meat of the wild turkey's breast is lighter colored than the dark meat. It is not quite so white as the breast of the domestic turkey.

### As Hi Ho Sees "Humility"

"Humility," said Hi Ho, the sage of Chinatown, "is often the disguise of an arrogant spirit waiting to gather strength for a conflict."

### First Iron Vessel Built in U. S.

The U. S. S. Wolverine was the first iron vessel built by the United States navy. She was launched at Erie, Pa., in 1844, as the Michigan. Her name was changed to Wolverine on June 17, 1905. She was constructed by Stack house & Tomlinson, Pittsburgh, Pa., between 1842 and 1844. Her length (B. P.) was 164 feet, 11 inches; beam, 27 feet; mean draft, 9 feet; displacement, 685 tons.

## MANY BANKS LONG LIVED

### In the United States—

168 Banks over 100 years old.  
2,472 Banks over 50 years old.  
10,391 Banks over 25 years old.

There are in the United States 168 banks that have been in continuous existence for more than one hundred years. There are 2,472 banks over fifty years old, while 64% of all the banks in this country, or 10,391, are twenty-five years old or older.

In other words, practically two-thirds of the banks in this country have come through several successive periods of depression and panic, including 1907, 1914, 1920 and 1929-33.

### The Oldest Bank

The oldest bank in the country, which is in Boston, was chartered February 17, 1784.

In the 64% of banks that are twenty-five years old or older is lodged a major portion of the banking resources of the nation. In commenting recently upon the stability of a great majority of the banks in the United States, Dr. Harold Stonier, Educational Director of the American Bankers Association, said:

"The fact that we have so many banks that have been in existence a long period of years is an eloquent tribute to the genius of American managerial ability, for no other country has experienced such wild gambling eras and resultant periods of business stagnation as those through which our country has passed at frequent intervals during the past century."

### Baltic-White Sea Canal

The 150-mile Baltic-White Sea canal, built by Soviet engineers, has 12 locks and 15 dams.

### Pay Bounty for Wildcats

Some counties in North Carolina pay a bounty of \$2 a head for slain wildcats.

### Fish With Needlelike Jaws

The needle fish, a deep-sea denizen, has its jaws elongated into needlelike points.

### "Through Course of Sprouts"

To be put through a course of sprouts means to receive a course of severe discipline, especially in former days flogging with switches or rods. The use of switches or rods probably led to the origin of the term, sprout in this connection.

### Effects of Common Cold

A person suffering from a common cold loses about 40 per cent of his efficiency, according to tests.

### Lone Star State

Texas was an independent republic from 1836 to 1845. Its flag bore a single white star—hence the nickname—Lone Star State.

### Debouching of Troops

In military usage debouching is the issuing of troops from out a narrow passage, wood, defile or any other roadway which has compelled them to advance in column or other narrow formation.

## MENTONE NEWS

Mr. and Mrs. Frank Meredith were in Indianapolis last Thursday on business.

Tommy, son of Alvin Tucker of Lafayette, is visiting with his grandparents, Mr. and Mrs. Ivan Tucker.

Bobbie and Donald, sons of Mrs. Reatha Herendeen spent Friday afternoon with Mrs. Olive Tucker of this city.

Mr. and Mrs. I. F. Snyder spent Thursday in Indianapolis in the interest of the Mentone Furniture and Rug Store.

For Sale:—11 head of shoats. Will weigh from 40 to 70 lbs. Priced right. 1½ mile south of Tippecanoe. Emanuel Horn.

Charles Carter who is attending school in Chicago spent the week end in Mentone with his parents, Mr. and Mrs. C. G. Carter.

Mr. and Mrs. Carl Underhill and daughter Avis and son Dearn of Huntington were in Mentone the latter part of last week.

Mr. and Mrs. Ruis Cundiff and family who have been residing in the Bert Rush property east of Mentone have moved to the Mahlon Jefferies farm.

Donald VanGilder of Indianapolis spent the week end in Manchester with his brother who is confined to the hospital there. Mrs. VanGilder has also been with Jack since the accident.

## BIRTHS

Mr. and Mrs. M. Roy Rush are the proud parents of an eight pound daughter born at their home west of Mentone, Mar. 2 at 11:00 a. m. The new arrival was named Eleanor Frances.

## Birthday Surprise Party

On Wednesday evening friends of Mr. and Mrs. H. V. Johns gathered at the Johns home and very pleasantly and successfully surprised Mr. Johns. Different party games were played throughout the evening. Those who participated in the surprise were Mr. and Mrs. Vere Kelley and daughter, Mr. and Mrs. Fred Swick and daughter, Miss Leona Leininger, Mrs. Miriam Craft and daughter, Mr. and Mrs. J. S. Johns, Mr. and Mrs. Earl Smalley of Warsaw, Mr. and Mrs. Russell Eber, Rev. and Mrs. Edward Alexander, Mr. and Mrs. Forrest Kesler and daughters and Mr. and Mrs. J. M. Preisch. All departed at a late hour wishing Mr. Johns many more happy birthdays.

## BOY SCOUT NEWS

According to a report issued by the Area Boy Scout Office, scout membership in the Pioneer Trails Area totaled 946 on December 31. This represents a net gain of 136 during the year. A total of 1169 were registered during the year.

Membership on December 31 is distributed as follows: Scouts 582; Scouters, 296; Cubs 61; and Cubbers, 7. Fully as many more persons are active in Boy Scout work in unofficial capacities such as members of parents' associations, mothers clubs and old scout associations.

Of the 582 Scouts 7 are Eagle Scouts, 19 Life Scouts, 39 Star Scouts 59 First Class Scouts, 152 Second Class Scouts, and 306 Tenderfoot Scouts.

Two hundred sixty seven merit badges were issued during the year. The most popular subjects are as follows: Scholarship 21; Firemanship, 19; Public Health, 15; Personal Health, 14; Swimming, 14; and First Aid, 13.

Four hundred sixty scouts and 60 scouters attended camp at one time or another during the year.

Scout officials expect to carry their total membership well over the thousand mark during 1935.

## Birthday Surprise Dinner

Friends of Mr. and Mrs. Russell Eber gathered at the Eber home and pleasantly surprised Mr. Eber on his birthday Feb. 24. At the noon hour a pot luck dinner was served to Rev. and Mrs. Alexander and daughter, Mr. and Mrs. Vere Kelley and daughter, Mrs. Forrest Kesler and daughters, Mr. and Mrs. Earl Smalley, Mr. and Mrs. H. V. Johns and son, Mr. and Mrs. Frances Kehoe and daughters, Mr. and Mrs. Herbert Carlyle, Mr. and Mrs. J. M. Preisch and Mr. and Mrs. Russell Eber. After enjoying a social time all departed wishing Mr. Eber many happy returns of the day.

## W. F. M. S.

The W. F. M. S. had a very delightful session at the Shafer-Manwaring home on Friday afternoon. Mrs. Rosa Kinsey had charge of the program and discussed Religious and Social Conditions in Japan. Rev. DeWitt led a very helpful devotion. Mrs. Bessie Manwaring discussed Religious Influence on Japanese Life. She also gave an interesting account of her southern tour. Delicious refreshments were served by the hostesses. The meeting adjourned to meet with Mrs. Dr. Taylor the last Friday in March.

## MENTONE WINS SECTIONAL CHAMPIONSHIP

The powerful home team won from Warsaw by a score of 32 to 20 thus annexing the Sectional title from Beaver Dam.

The Bulldogs romped into the lead early in the game after permitting Warsaw to get the first basket. In the first few seconds of play the stands were in an uproar for Mentone immediately followed with a basket tying the score. Warsaw surged again into the lead. The first quarter, however, ended with Coach Songer's quintet in possession of the comfortable lead of 13 to 5.

The Warsaw team refused to give up the fight. They returned to the game with the whistle and struggled valiantly but the fierce and brilliant opposition of the home team upset their efforts. The second quarter ended with a score of 9 to 19 in favor of the Mentone team.

The teams returned to the floor with new vigor and determination and the Bulldogs continued their flashy attack which added baskets to the rapidly gaining score. The Bulldogs piled up a 28 to 11 advantage over their opponents during this period. In the final quarter the Warsaw coach began substituting to speed up his team but even the new material could not frustrate the advancing home team. The final score was 32 to 20 with Garth Underhill and Kay Paulus leading the attack with seven points respectively and Walter Songer and "Red" Paulus tying for second place with six points each. Guido Shirey, speedy forward, added to the offense with two baskets and "Teaberry" Lynn made a sensational basket from beyond the middle of the floor during the time of his participation in the game.

A capacity crowd of fans filled the Armory and the Mentone team was cheered to victory by the entire Mentone fan population. The trio of yell leaders led the enthusiastic crowd, effectively proving their right to the berth.

Both Warsaw and Mentone romped through the semi-finals with one-sided scores. Warsaw easily won from Pirecton by a score of 53 to 14. Mentone humbled the Leesburg quintet by a score of 45 to 17.

Much credit is due the home team because of their team work. They display surpassing skill in both the offensive and defensive drives. Each player filled his position with expert skill and thus contributed to the power of the five.

Credit is also due Coach Songer for his brilliant coaching tactics. He has earned for Mentone the distinction of

being the best coached team in this region and earned many laurels for the team.

The team is now both County and Sectional champs and the cry is "On to the Butler Field House!" The team meets Auburn in a game held there next Saturday.

## NOTICE

We wish to state that the magazine offer which appears in this issue will not be printed again. This will be your last chance to take advantage of this amazing offer.

## Girl Scout News

Amos Skeets

What is the deeper meaning of Girl Scout? Girl Scouting does not mean that we join this organization to have a good time nor because someone else joined and we did not wish to be left out. A girl becomes a Scout so that she might help others and serve her country and community.

A Scout meeting is not a gathering place for frolic. The services always comes before the fun and no girl can leave her scout career without remembering the solemn but lovely rites held at the beginning of each meeting.

The patrols line up in order of their respective ages. Then inspection is held. The patrols march into formation with exact precision and every face acquires the expression fitting the occasion. The horseshoe is formed for good luck and the flag bearers carry in the flags with the National Flag always on the right. The Pledge of Allegiance is given, the promise is repeated, and the laws are quoted. The Girl Scout laws, which are lived up to, are:

A Girl Scout's honor is to be trusted.

A Girl Scout is loyal.

A Girl Scout's duty is to be useful and to help others.

A Girl Scout is a friend to all and a sister to every other Girl Scout.

A Girl Scout is courteous.

A Girl Scout is a friend to animals.

A Girl Scout obeys orders.

A Girl Scout is cheerful.

A Girl Scout is thrifty.

A Girl Scout is clean in thought, word, and deed.

Then the horseshoe formation is brought to a close by singing "America the Beautiful". The formation is broken with dignity by the flag bearers marching out and the rest following.

Then the Captain gives the order for patrol meetings. Each patrol has a corner or gathering place and—woe be unto the patrol which usurps the other patrol's corner!

In patrol meetings the various

leaders have charge and the roll is called, the dues collected, and other patrol business is dispensed with.

Hurrah for the fun! After working the play begins. But is it play? Good philosophy is: To make work seem like play and thus get things accomplished with good cheer. In this way we keep the Scouts working valiantly all the time. We play leaf games; this teaches us the necessary tree lore. The folk-dancing gives the girls the useful grace of motion. We are taught cooking, bed-making, first aid, music, nature, etc. but we do not realize this valuable learning for we are doing it together and joking and playing while acquiring this knowledge.

"Time to break up!" This is sorrowful news, yet is it? We dislike to quit playing but we love the method in which our meeting is closed. Our good night circle brings us all into a closer union, a fellowship which we do not forget.

## Big Home Talent Production To Be Staged In Mentone

On March 7, 8, 9 will be staged for three nights at the Community Forum. A home talent reproduction of the Prairie Farmer-W. L. S. Barn Dance Program as given each Saturday night at the Eighth Street Thea-

tre in Chicago.

This great show will be under the auspices of the Harrison Center Home Economics Club and will be the biggest and finest Home Talent production ever presented in this part of the country.

A cast of 100 or more local people are expected to take part in this production and this large and splendid cast of Home Talent Artists from Mentone and from neighboring towns and from the country communities will be coached and directed by a skillful director from The Prairie Farmer-W. L. S. Radio Station in Chicago.

The Club have received special permission from The Prairie Farmer-W. L. S. Radio Station, thru their authorized representatives, to present this production of their Eighth Street Theatre Barn Dance Show. This undoubtedly be one of the greatest shows ever offered to the people of Mentone, and the surrounding community and there will be three gala nights at the Community Forum on March 7, 8, 9.

In this show there will be impersonations of all the famous Radio Stars of W. L. S. including Uncle Ezra, Lulu Belle, Georgia Gobel, Spenser, The Three Little Maids, Skyland Scotty, Linda Parker, Red Foley, and others.

## CARLIN MYERS PASSES AWAY

Was One of Mentone's First and  
Foremost Citizens

This prominent resident of Mentone, who was always known throughout Kosciusko county, passed away at 2:25 o'clock Wednesday afternoon at his home on North Tucker St. Death was due to erysipelas and followed an illness of one week.

Mr. Myers was born in Findlay, Ohio and came to this county 55 years ago, and resided for many years on the farm northwest of Mentone, now operated by his son, George 2nd Myers, trustee of Harrison township. The deceased retired from active farming a number of years ago and since then had been a prominent citizen of Mentone.

Mr. Myers was elected in 1912 and 1914 to serve as a member of the House of the Indiana General Assembly. In recent years he had been a member of the Mentone Library Board. He was also a member of the Masonic lodge at Mentone and the Elks lodge of Warsaw.

Surviving are the widow Flavia Myers, two sons, George 2nd Myers, and Carlin Myers, Jr. of Mentone; a sister, Mrs. C. L. Hayes, of Eagle Rock, California; three grandchildren, Mary Ellen Myers, daughter of Mr. and Mrs. George Myers and Patty Jean and Sally Elyane Myers, daughters of Mr. and Mrs. Carlin Myers Jr.

The funeral which was attended by many Mentone people and many friends from a distance was held at 2 o'clock Saturday afternoon at the Baptist church in Mentone, with the Rev. Yeager, pastor of the church, conducting the service. Burial was in the Mentone cemetery.

\*\*\*

Thus again death has removed one of our leading citizens. From the time that Mentone became a town "Carl" Myers was always a booster and enthusiastic worker in any movement for the benefit of the community, always standing ready to contribute both of his time and money to every worthy enterprise.

## BULLDOGS DEFEATED

Well we're back from Indianapolis, without the State title, but full of good cheer with the knowledge that we have a good team which never steps fighting even against heavy odds. The team with the excellent aid of Coach Songer is one of the most outstanding teams in the state. They play with perfect co-operation and without the usual "lone star". The boys have worked together long and industriously and have become famous for their dashing floor work and dexterous passing. These ten boys have gained for Mentone both Sectional and Regional titles but we are more proud of them because of their good sportsmanship which gives them strength to take both victory and defeat with equal grace.

Big Chief Songer still has enough scalps in his belt to insure him a very desirable standing among the "North-

ern Braves." He has managed his Bulldogs well, and now, at the close of the basketball season, we find ourselves, by his guidance, closer to the top than we have ever been before.

Coach Songer's big wonder five Assure you that they are quite alive, Though the State title took wings It's just one of those things, But Songer says, "Never say die!" The Tigers—they almost knocked silly And left Columbia City holding a lily. They don't mean to boast, That's the thing they hate most. But, don't think they've gone Daffadilly!

And that's just the way they feel about it. Although four of the big five are graduating, Songer has several bull-pups in the nest that have the making of real basketball stars. Here's hoping that next year under Coach Songer's careful guidance, they will attain the top round of the ladder.

## DR. HOSSMAN OF AKRON, DIES

Was Well and Favorably  
Known in This Vicinity.

Dr. W. E. Hossman, 65, for 35 years a practicing physician at Akron, Ind., died at his home in Akron Saturday night at 10:30 o'clock of heart trouble from which he had suffered for two years.

He was born at Indianapolis, but lived his life in or near Akron.

Dr. Hossman was a member of the Akron Chamber of Commerce and also of the Methodist church of Akron. He was a member of the Warsaw Knights' Templar.

He is survived by his mother, Mrs. L. L. Hossman, who is making her home in Warsaw with her daughter, Mrs. Robert Breeding; his widow; one son, Dewitte, of Detroit; one daughter, Miss Vile Hossman, of Boston, Mass., and one granddaughter.

Dr. Hossman had many friends in Kosciusko county around Mentone and Etna Green vicinity and also in Warsaw.

Funeral services were held Tuesday afternoon at 2 o'clock at the Methodist church in Akron with Rev. Miller in charge.

## BIRTHS

Mr. and Mrs. Garland Goodrich of Baltimore, Maryland are the proud parents of an eight pound baby girl. Mrs. Goodrich was formerly Miss Ruth Shunk daughter of Mr. and Alva Shunk of Mentone.

\*\*\*

Mr. and Mrs. Robert Hoover are the proud parents of a baby boy. The new arrival weighed 8 pounds and was named Don Robert. Mrs. Hoover was formerly Miss Senora Lyons.

## Inscription on Bismarck's Tomb

Bismarck died in Friedrichsruh on July 28, 1898, at the age of eighty-three. In his last words he expressed his devotion to his old emperor and his dislike of his new master by choosing the following inscription for his tomb: "A true German servant of the emperor William I."

**Beauty Sleeps 24 Years;  
Shocked at Lover's Death**

Johannesburg, South Africa.—Sleep has robbed Anna Swanepoel of Lichtenburg of more than half her life.

She fell asleep 24 years ago, when she was twenty and beautiful, and is still sleeping.

A great sorrow was the cause.

She was engaged to a young farmer in Lichtenburg, in the western Transvaal. They were very much in love and saw each other daily.

One day, in 1910, while out shooting wild duck, the farmer was accidentally shot dead.

When the news was broken to Anna the shock was so great that she contracted hysterical catalepsy, and fell into a death-like sleep.

After a while she was moved to Johannesburg sanatorium. Doctors could not awaken her.

She looks little more than a living skeleton, but when she fell into her long sleep she was a girl of striking beauty, with long golden hair.

She is fed four or five times a day with a tube.

Once in every six months or so she awakens into semi-consciousness, but is never able to say a word.

**Man Throws Lamp at  
Wife; Panic Costs Life**

Cincinnati.—One woman leaped to her death and two children were injured, one seriously, when a man became angry at his wife and hurled a lamp at her, igniting a bed. Nine other tenants in the house were rescued from the blazing structure by firemen.

The dead woman was Mrs. Louise O'Neil, thirty five, negro, who became panic-stricken and leaped from a third floor window. She died of a skull fracture and internal injuries. Police sought the man they believed threw the lamp.

**Silver Dollars in Bell**

Powhatan, Ohio.—A 600-pound bell, one hundred years old, made partly of iron and of silver dollars, is owned by Aaron Ramsey.

At the time the bell was fabricated, the pioneer Ramsey family gathered up 100 silver dollars and had them added to the materials to give a "silver tone" to the bell.

**BRIEF SQUIBS**

Nature's warning is always a blow.

It is justice that is blind; not fortune.

Utopia would be O. K. if it weren't for Utopians.

People who "go about doing good" can make mistakes.

Laugh at the world if you will, but don't whine about it.

It is hard to say just as much as is necessary and no more.

Are lectures ever delivered to men on how to rear their sons?

A simplified process for coating plastics with metal has been found.

It costs \$1,544.09 annually to light the Capitol dome in Washington.

If one can be well without health, one may be happy without virtue.

No one can brag casually. That it's bragging always shows through.

An old story that can make you laugh at each repetition really has merit.

One of the results of modern inventions is the speeding up of human activities.

When does the mind stop growing? When it isn't interested in the news of the day.

People who don't mind drafts don't seem to catch any more colds than those who do.

Many tricks as well as crimes have been perpetrated in the name of freedom in all ages.

Traveling is an education—education in how not to spend too much money traveling.

No one seems ashamed in after years that he once supported a "cause" proved to be sapheaded.

War is too often held up to youth as the highest of life, and its dangers used to form an appeal to the courage and chivalry of youth.

**Wrecks Start Island Boom**

Wrecking of two German steamers off a remote island of the Leeward group in the Indian ocean brought undreamed-of prosperity to the islanders. According to a report from Simba, wages skyrocketed from 10 cents a day to 50 cents, the thatched roof of every house has been replaced by an iron one, and old rush lights have been supplanted by hurricane lamps. A German cargo steamer ran aground on a promontory and its cargo was jettisoned. The 3,000 islanders salvaged the floating freight, and many got work at unheard-of wages. The Germans then bought water at two cents a gal-

**YEAST FOAM EGG MASH**

Made by N. I. Co-Op. Ass'n. will put your Birds in fine condition to produce MORE EGGS, HEAVIER EGGS, BETTER IN EVERY WAY.

Eggs produced on Animal-Poultry Yeast Foam Mash Feeds are being sold as Yeast Foam Health Eggs. They are a thicker, heavier egg and go much farther in baking than ordinary eggs.

These yeast feeds build and maintain the vitality of the birds which means better results, better health all down the line. Try them and be convinced.

lon and rice at \$10 a bag. A second German vessel, coming to the rescue of the first, also ran aground, had to jettison its cargo and hire more help. After the ships left the natives sold the "treasure" and are rich.

**Late Inventions**

France now has a machine which detects the presence and determines the position of a silent and cloud-hidden airplane; Germany is serving homes in one city with the first illuminating and fuel gas which is non-poisonous; and America has a motor-car device which enables the driver to attach or remove his tire chains by simply pushing a lever beside his seat. —Collier's Weekly.

**Dowager Queen Never Queen**

An unusual title was held by the mother of King Zog of Albania, who died recently in Tirana, the capital. It was "dowager queen," although she had never been a queen. The title was bestowed in 1928, when the national assembly elected her son Ahmed Beg Zogu, to be king of the Albanians.

**Simple Twist**

He—It doesn't take much to turn a woman's head.  
She—You're right. That one just turned and looked at you.—Pearson's Weekly.

**First Steamboat in St. Louis**

The first steamboat reached St. Louis in 1827.

**Trying Crime on High Seas**

If a crime is committed on the high seas the case is tried under the jurisdiction of the nation whose flag the ship flies.

**Great Tragedy of Civilization**

The great tragedy of modern civilization is to be found in the failure of material progress to satisfy human needs.

**Undignified to Work**

"My neighbor Hi Hat is a good enough fellow," said Hi Ho, the sage of Chinatown, "but he is afflicted by ancestors so distinguished that he fears it would be undignified for him to work."

**Ginseng Marketed in China**

Practically all of the ginseng raised in this country is marketed in China where the demand for it is greatest. It is used extensively in that country in the manufacture of medicines, while the fleshy part of the root is relished in soup by many Chinese.

**Founding of Oxford University**

Traditionally, the founding of Oxford university was by Alfred the Great, about 871, but the authentic origin was the result of a quarrel between Henry II and Thomas a Becket, about 1164, when the king forbade English clerks to study at Paris, and they returning, boomed the school at Oxford. The earliest document giving the school of Oxford the title of university was in 1201.

## Pygmies in Battle; Fat Man Is Victor

Macon, Ga.—Two pygmies staged a real marital battle as an extra attraction at a side show here. The little wife became irked over disposition of several presents given the couple, and the small husband returned blow for blow. Several persons of normal size tried unsuccessfully to stop the fight. Finally the show's 700-pound fat man stepped between the couple and restored domestic tranquillity.

## COLLIE KEEPS LONG VIGIL FOR MASTER

Command, "Wait for Me," Is  
Obeyed for 9 Years.

Rock Island, Ill.—Shep, a loyal Scotch collie, left the lobby of St. Anthony's hospital, returned the following morning. It was the first time Shep had left the hospital in ten years. In 1924 Shep's master, Francis McMahon, Erie, Ill., was taken to the hospital. The collie accompanied him. "Wait for me," commanded McMahon. The dog waited. Next day McMahon died. The dog still waited, a week, a month, a year, another year and so on until the present day. He generally sits in the same spot where his master commanded him to wait. Shep's vigil is futile. He does not know it, and so he waits, and waits, and waits, always eyeing the elevator door through which he last saw his master.

The great attachment of the human race for dogs was exemplified at Sewanee, Tenn., when professors, students, others gathered at a little grave as Fitz, campus pet of the University of the South, was buried. For seventeen years Fitz had been mascot, had attended hundreds of faculty meetings, chapel services, dances, fraternity pledgings, and other events. Fitz learned to understand something of French and German as well as of English. Fitz was a large collie, was brought to the university by a student.

While Fitz was considered a member of the "family circle" at the University of the South, a court ruling at Cleburne, Texas, held that dogs are not members of the "family circle." This plea had been made by James Gillock in a suit, but the court ruled against him, and ordered his two dogs sold to satisfy a judgment. Only one of the pets, Queen, a bird dog, was found, but she brought \$35 on the auction block.

## Hunters Lose Lives in Tragedy Amid Ice Floes

Cape May, N. J.—Two unidentified hunters lost their lives in a tragedy in Delaware bay, not far from here. They set out in a cabin cruiser, forced their way through comparatively thin ice, then dropped anchor off Dennis creek. Then they loaded guns, other hunting equipment into a small skiff, started out. Several hundred yards away from their cruiser tragedy head-

ed their way in the form of heavy ice floes. These floes were swept in by a sudden shift in wind. The hunters attempted to return to their boat, but were hemmed in. From shore, Fred M. Pepper looked on in horror. He knew what the ice floes could do. He summoned help. An airplane responded, as did a powerful coast guard cutter. Far out the hunters had just abandoned their skiff. It had been crushed to bits. As the plane droned overhead the doomed hunters leaped from one ice floe to another. For three hours this kept up, with rescuers powerless to help. The plane could not land. The cutter was still too far away. Finally just as the cutter came in sight the two men, exhausted, frozen, slipped from the precarious floes, disappeared under water.

## 9 Convicted Dogs Die in Ohio Electric Chair

Columbus, Ohio.—Nine gangsters of dogdom have paid the supreme penalty in the electric chamber at the Columbus dog pound. All were killers, legally convicted. They had taken the lives of sheep, calves and other dogs.

For their last meal, the death row inmates had as much dog biscuit as they wanted.

A metal contact collar was fastened about their necks. Water was sprinkled on them from a hose to make that contact surer. A chain from the collar was attached to an electrical connection at the top of the chamber.

## Wasps Build Nest Out of Merchant's Money Hoard

Oslo, Norway.—A merchant here who had been hoarding for years a fortune in paper notes suddenly discovered the whole of his hoard gone. The bundles of notes were kept in an old suitcase, and when he opened the case he discovered that it was almost entirely filled by an enormous wasps' nest. The wasps had used almost all the notes to construct their nest.

## Jail Rats Wear Prison Garb

Allentown, Pa.—Rats in the Allentown city jail are "dressed up" in true prison style—with white stripes around their gray bodies. Police said that one of the prisoners paints the rats in his "spare" moments.

## Sheriff and Justice Fined

Rockville, Conn.—During a non-parking campaign, Sheriff Fred Vinton and Justice Fitch Jones found police tags dangling from the steering wheels of their automobiles. Both paid fines of \$3.

## Hole Made by Meteor

A mile wide hole in the earth north east of Fallon, Nev., long thought to be an old volcano crater is, instead, a hole made by a huge meteorite which struck the earth.

## Amazons Shoot Long Bows

Natives on the upper Amazon shoot with 7-foot bows, their arrows tipped with the teeth of animals and feathered for flight.

## Women Cannot Own Land

In Mexico women government employees are ineligible to ownership of land under the agrarian laws.

## St. Augustine's Stone Gates

Reminiscent of St. Augustine's three centuries of turbulence are the stone gates, erected more than 200 years ago, for a wall around the city. Lichen and moss mellow the two stone pillars 30 feet high.

## The Ghost Fish

The ghost fish belongs to the same family as does the electric eel. It has no dorsal fin at all, but possesses a highly developed anal fin which waves like a long flag and is believed to account for its owner's ability to swim backward as well as forward.

# EGG PRICES RECEIVED BY PRODUCERS—

## GET EXTRA EGGS WHILE PRICES ARE HIGHEST

Every egg that comes out of the nest during winter is worth two eggs at any other time of the year, according to J. H. Burrell, Purina poultry specialist. As proof he submits the accompanying chart which graphically illustrates the average rise and fall of prices over a 12 year period from 1921 to 1933 and the comparative trend for 1933-34.

Burrell says that the period from September to January of each year is a hen's money making time. The time for every producer to get all the eggs he can from his flock. "One thing is certain," he admonishes, "hens need plenty of feed to do a money making job because eggs are made of feed. The surest way not to get eggs in fall and winter is to skimp on the feed."

"But it's not alone the quantity—it's the kind of feed used that determines the number of eggs which will be put in the nests during this season of high egg prices. For there's a vast difference in the egg producing ability of feed. For instance, grain alone, no matter how liberally fed, will give only limited production because it just hasn't the ingredients to make a lot of

eggs. It needs the help of a laying mash.

"There are all kinds of laying mashes available which when fed with grain will give more eggs than grain alone. But here again there is a tremendous variation in the quantity of eggs produced by different mashes. This variation is best told by the results of a 3 year nation-wide survey covering 6,000,000 hens. These birds, which were fed on a laying mash developed at our Experimental Farm, averaged three dozen eggs extra per bird from September to January.

"Poultrymen in every section of the country furnished these records," says Burrell. "Large flocks, small flocks—all were averaged together for 3 straight years. The figures showed that the average production of each of these hens was five dozen eggs during the five fall and winter months when egg prices are highest. The average hen, according to the Bureau of Agricultural Economics, U. S. Department of Agriculture, lays only two dozen eggs during these same five months.

"It's time right now to do something about getting eggs from hens this season. Careful selection of a laying mash is the most important step toward producing lots of profitable eggs. This should be a mash of proven egg making ability—a feed that is known to have behind it scientific research and experimental work as well as an established acceptance by practical poultrymen!"

### Center of Adonis Worship

In the days of old, Gebel, the most ancient city in Phoenicia, was the center of the Adonis worship. There on the banks of the river Nahr-Al-Ibrahim, the river of Adonis, the women of Syria still lament the death of the beloved of Venus when in autumn the red waters from the hillside swell the stream.

### The Friend in Need

Jud Tunkins says the friend in need is one who tells you the truth when you are fooling around with bunco specialists.

### Homographs

Homographs are words identical in spelling but different in meaning, as bark, the covering of a tree; bark the cry of a dog, and bark, a kind of boat.

### Seedless Grapes

There is no record of the first production of seedless grapes. This type of grape has been grown for at least 800 years in Persia and for more than 2,500 years in China.

### More Twins in Denmark

Twins occur once in about 87 births in the United States, but in Denmark the proportion is once in about 63.

### Life in the Balinese

The women of Bali live mainly on rice and fruit with only a little meat now and then. Children run about unclothed until the age of five and play all day in the water. Nature has provided a perfect climate. There is always plenty of sun, and if the beach grows too hot the Balinese has only to go up the mountains to ensure a cool night.

Polly—It will take a better man than you to get me.—Stray Stories Magazine.

### Long-Winded

Doctor—Now, take a deep breath and say nine, three times.  
Willie (after inhaling)—Twenty-seven.—Tit-Bits Magazine.

## Elk Once Plentiful in East; Have Been Routed

When our country was first settled elk ranged over the plains and much of the eastern states, says Nature Magazine. They were gradually killed off or driven to take refuge in the foothills and mountains. They now summer in high altitudes, in forest and alpine meadows where they feed on succulent grasses and the tender leaves of herbs and trees, returning to the lower country only when the snows of winter make life at high altitudes impossible for them.

The largest herds now summer in Yellowstone park and the Jackson Hole country shelters and feeds many of them during the winter months. It is unfortunate that early settlers called the animal the elk. It is the counterpart of the European red deer and is the finest looking of our American deer. In late summer and early fall the bulging of the males may be heard

as they wonder through the upland forests defending their rights over the herd which is theirs. The fine antlers and light rump are unmistakable field marks. The spotted young, usually only one, although twins occasionally occur, are born in May or June.

### Tiny "Quakes" Aid Science

Miniature earthquakes, created by setting off small charges of dynamite, are helping scientists study deep-lying rock structures of the earth, says Popular Mechanics Magazine. Sensitive instruments record the "earthquakes." By studying the effects of these explosions it is possible to locate accurately underlying strata of rock as deep as 40,000 feet below the surface. The apparatus also is used to locate earthquake faults, to study the velocity with which earth tremors are propagated, to locate oil shale and to measure the depth of alluvial deposits. Dynamite charges vary from one to forty pounds. The explosive and recording instruments are carried on a special truck outfitted by scientists of the California Institute of Technology.

### Gorillas Protected

Steps are being taken to protect the gorillas in the Kaynosa forest of Uganda. They are so well liked that the game wardens want them to remain. Their number has doubled in the last few years and there are at least 80 of the awkward beasts in the forest. Wild tales about their ferocity are denied by the wardens.

### Camel Is Good Jumper

In a recent Arab gymkhana at Tel-Aviv, Egypt, a dusky rider made his camel jump through the "eye of a needle" by vaulting one man stretched between two benches, at the same time passing beneath another held horizontally by two others mounted on stools.

### Tribute to X-Ray

"The X-ray is probably the most important contribution to medicine of my generation," said Dr. David Riesman, emeritus professor of clinical medicine, University of Pennsylvania, recently, adding that, even so, the roentgen ray has its limitations.

### Skin Deep

His Ma—Jimmie, this pill has a sugar coat.  
Little Jimmie—I know, mamma, but the vest is awfully bitter.

### A Test of Friendship

Friend—I bought your book in Hamburg.  
Author—Oh, so it was you.

### Indian Tribes Left

There were originally more than 330 Indian tribes, but many fought each other out of existence, and there are only approximately half that number left.

### Body Comfort

Body comfort depends on the rate of loss of body heat. If the rate is too fast a chill sensation results, if it is too slow the person feels uncomfortably hot.

## Research Farm Stops Costly Cow Troubles

Breeding, Calving, Udder Difficulties Done Away With

There's a phase of dairy research very much to the interest of every herd owner, according to C. R. Perdew, herdsman at the Purina Experimental Farm. It's the plain everyday side of dairying that deals with and successfully eliminates costly cow troubles which, if neglected or taken for granted, frequently ruin good cows, increase replacement expense, curtail milk production, and greatly reduce profits.

Above, left—udder with a bad quarter; right—good, healthy udder with all four working. Cow troubles can be avoided by proper feeding during the dry, freshening and milking period.

"In the light of recent developments," says Perdew, "it's no longer necessary to tolerate such common cow troubles as breeding failures, calving difficulties, congested udders, lost quarters, and similar ailments around the dairy barn. They are unnecessary evils that can almost be completely controlled and done away with by a practical method of handling cows. That has been demonstrated beyond question by the experience of many leading dairymen and our research work here at the Purina Experimental Farm, where a close study of these problems has been made for the past 7 years.

"Anyone looking in on the Purina Experiment Farm," Perdew says, "will find, not a fancy or show place, but a farm in many respects like the average dairy farm. The herd is made up of grade cows, and the milk is sold on the St. Louis market. Seven years ago the foundation stock for the present herd was purchased. The yearly average production of these cows was 6800 pounds of milk per head. By proper feeding and management this has been increased to 12,146 pounds. Last year the herd led its cow testing association with a yearly net profit of \$57 per cow.

### Exceptional Breeding Record

"Udder, calving, and breeding difficulties have gradually disappeared from the herd. The breeding records show how the plan of handling and feeding, developed and used by the farm, wards off costly cow troubles. Through the past 7 years we have records on 422 conceptions. The records show that 77.96% of the cows conceived on the first service; 14.45% conceived on the second service; 5.45%

conceived on the third service; and 2.14% conceived after the third service. These figures total 100% and give the whole story.

"Udder trouble, another common cow complaint has been very conspicuous by its absence from the Purina dairy herd. Only 12 of the 208 cows in a four year test were sold on account of udder trouble. This was an average of only three cows per year. Two of these 12 cases of udder breakdown were injuries resulting from the udders being stepped on.

"It's this kind of everyday research work that has made it possible to develop feeds and a plan of feeding that can eliminate costly cow troubles from any herd, cut replacement costs, increase production, and step up the net profit of cows. Other leading dairy herds handled along similar lines have also been freed from these unprofitable factors, according to the records kept by their owners, whose reliability and knowledge of cows is unquestioned.

"The experience and information resulting from this dairy improvement work is now available to all dairymen in a booklet entitled 'Profitable Cows,' says Perdew. "The booklet can be had without obligation by writing to Purina Mills, Educational Division, St. Louis, Mo."

## BANKERS SUPPORT SOUND EXPANSION

By R. S. HECHT  
Vice President, American Bankers Association

**B**ANKERS universally recognize that the prime economic need of the nation is the stimulation of sound industrial and commercial activities

R. S. HECHT

and recent travels over a wide stretch of the country have shown me that they everywhere are making all effort possible to lend constructive financial support within the scope of their proper banking functions to promoting the expansion of business activity.

Frequently in times past when our country suffered from an economic depression and consequent unemployment on a large scale, the rise of some broad new industrial development, such for instance as a new industry like the automobile industry, has been a powerful factor in stimulating a return or an accelerated growth of national prosperity. Such a movement means the creation of new wealth, the employment of large groups of people on useful lines and as a consequence the production and distribution of sound, effective purchasing power, which is a form of wholesome economic stimulant that has none of the evils of monetary inflation.

### A New Force for Business Improvement

Perhaps we have at hand, if not the rising of a wholly new industry, a measurable equivalent in the potentialities of a widespread rebuilding and modernizing movement such as home renovating, plant remodeling, the putting of our railroads on a high speed air conditioned basis and other valuable developments in the construction field. The effects of such activities on employment and many lines of business would be most beneficial and I can repeat without reservation that we bankers are willing and eager to play our full economic part in any such constructive developments.

It has been made to appear that money has not gone to work because of the timidity of bankers rather than what is a true explanation, because business men have not had enough confidence in the business outlook to borrow the dollar from the banker and put it to work.

The basic requisite to the expansion of commercial bank loans is sound, normal business conditions on which to conduct sound, normal banking operations. The best business a bank can wish for is the opportunity to loan money to successful business men and manufacturers imbued with confidence to enter upon aggressive business enterprises and endowed with the ability to bring them to successful conclusions. Such loans mean business activity for the community, growing pay rolls and prosperity, and the banker wants to make them because to be identified with such activities not only means profit to him but, additionally, brings him the reward of good will in his community.

There is no better proof of the great desire of banks to take care of the short term requirements of the business world than to point out the abnormally low rates at which this demand is being supplied at the present time.

### Balinese Women Age Rapidly

European women may well envy those of Bali; but they have one small consolation. A Balinese woman is old at twenty-five and ugly at thirty. She is considered fit to dance in the temple only until she is eleven years old. When wrinkles come there are no beauty parlors to which she can run. Perhaps if there were she would not seek their aid, for the Balinese women have a secret mastered by few Europeans. They know how to accept fate cheerfully.

### Prince of Wales

An heir to the throne can become king of England without having been Prince of Wales. The title Prince of Wales is merely that enjoyed by the first born son of the British king. King George V. was never Prince of Wales, but came to the throne as the Duke of York, his elder brother having died before King Edward VII.

### Navajo Indian Territory

Navajo Indian territory in Arizona has increased since 1888 from about 3,000,000 acres to approximately 11,000,000 acres.

### Cuttle Fish Change Color

Cuttle fish change their color to harmonize with their surroundings.

### Port and Starboard

Few travelers seem to remember which is the port and which the starboard side of a ship. Port, as one faces the bow, is on the left side, starboard on the right.

### The Best Education

The best education is that which enlarges understanding and sympathy and promotes a freer, more candid and more continuous commerce between the individual and his world.

### Taxes in Canada

Canada, like other self-governing members of the British empire or Commonwealth of nations does not pay taxes to the mother country nor render other financial support, except by voluntary action.

### Forked Landing Net Old

The forked landing net is looked upon by fishermen, as new and up-to-date equipment. But according to records recently uncovered this form of fishing gear was used long ago by the Egyptians and then the idea was lost.

### Little History to Record

Emperor Marcus Aurelius, of whom it is said hardly a man who ever sat on a throne can be compared with for the natural gifts and graces of manhood, although ruling at the time Roman civilization was at its height, has little history and under him Rome had little history to record, either.

### Oldest Symbol

The fish is considered the oldest symbol of Christianity. When the pagans first became Christians they were afraid of being persecuted and put to death by those who still believed in pagan gods; so they invented a secret sign, giving it the form of a fish. When they wanted to make their new and beautiful belief known to each other and wanted to find out whether the man with whom they associated was pagan or Christian, they drew the sign of the fish in the sand, and if the person responded in the same way, they felt safe to speak of their new faith.

## LONDON IS CENTRAL POINT IN BIG TELEPHONE TRAFFIC

London is one of the world's great telephone centers. Apart from its own domestic system, serving 323,500 telephones, it is the hub of a network of lines extending over the country. In addition, calls are made from the trunk exchange in the Faraday Building in London over the continental circuits to all parts of Europe and over the radio circuits to almost the entire civilized world.

Long distance telephone service from London deals each week with approximately 450,000 toll calls, 80,000 calls over the inland trunk lines, 13,000 calls to the continent and 300 overseas radio telephone calls.

## MENTONE NEWS

Minnie Igo of near Beaver Dam is very poorly.

Kermit, small son of Mr. and Mrs. Earl Zent is not so well.

# CLARK'S

Mrs. Dale Plew of Warsaw, reporter for the Northern Indiana Co-operative News has been on the sick list for the past week.

Jack VanGilder has returned home from the College Hospital at North Manchester where he recovered from burns received in the college laboratory.

Mrs. Rose Morrison, who fell and injured her hip rather seriously last week while visiting the M. Roy Rush home, is reported to be getting along nicely.

We know now that spring is just around the corner, for we can look up any time and see the "three sure signs" Roller Skates, Pussy Willows, and Marbles.

Mrs. Huffer Millburn of Kokomo, Indiana, daughter of Mr. and Mrs. Frank Carles of near Palestine, visited with her parents Thursday and Friday of last week.

Mrs. Mack Haimbaugh who submitted to an operation at the Woodlawn Hospital last week, is getting along nicely, but will have to submit to another operation next week.

We wish to welcome Mr. and Mrs. Lewis Fore of Kendallville. Mr. and Mrs. Fore were former residents of this city and are now residing at the Darr property on North Tucker St.

The Better Hard Coal for Homes and Brooder Stove purposes. Northern Indiana Co-op. Ass'n.

Ruth Rush who is attending business college at Kokomo and Miss Evelyn Miller also of Kokomo is visiting the formers parents at their home north-east of Mentone.

Mr. and Mrs. L. M. Elick, Mrs. Ralph Ward and Mrs. Floyd Halterman spent the week end in Indianapolis the guests of Mr. and Mrs. Ward Brickley and family and attended the State Tourney.

The residents of Mentone and surrounding community are cordially invited to attend the Barn Dance Show at North Manchester, next Thursday, Friday and Saturday nights, March 21, 22, 23. The cast is under the direction of Miss Pat Griffith, who so ably directed your local Barn Dance last week.

## Bats Control Mice Hordes

Bats have long been believed inveterate enemies of mice, but it remained for the farmers of Nagckoros, a small Hungarian community, to test the economic value of this theory. Worried by the damage that mice were doing in their fields they erected a tower and installed several families of bats in it. The bats work with such a will that many farmers in Germany as well as in Hungary are now interested in bat breeding.

## D. A. R. GIRL Citizenship Project

The National Society of the Daughters of the American Revolution are conducting their annual Girl Citizenship project this spring.

Mrs. Harold J. Grimes State Chairman of the Girl Citizenship Project has ask the local Anthony Nigo Chapter to co-operate with the following plan.

There is to be a girl chosen from the Senior Class from every High School where there is a D. A. R. chapter, according to the following plan.

1—Each student in the Senior Class is entitled to vote on three Senior girls in the order in which they are believed to qualify as excell in the following qualities:

a—Dependability, punctuality, truthfulness, loyalty, and self-control.

b—Service, co-operation, courtesy and respect for proper authority and the right of others.

c—Leadership, imagination, command of the good will and respect of others and the bent to lead.

d—Patriotism, interest and pride in family, school community and nation and willingness to sacrifice self for them.

2—From the three girls receiving the highest number of votes, the faculty shall select one as the choice of the class.

3—The name finally selected from each Senior Class shall be sent to the State chairman.

4—The final selection shall be by lot at the State Council Meeting March 22, under the supervision of Mrs. Floyd McMurry, State Superintendent of Public Instruction, who very heartily approves this project, and the State Girl Citizenship Committee.

5—The girl, who is finally selected to represent Indiana, along with a girl from each of the forty-eight states, will be sent to Washington D. C. for three days, leaving home Friday, April 12, and returning Wednesday April 17, properly chaperoned with all expenses paid by the State D. A. R. organization, to enjoy a patriotic pilgrimage of interest and history in and around Washington.

The trip includes sightseeing trips to Mt. Vernon, Arlington, Library of Congress, the White House, Bureau of Printing and Engraving, Museums, Washington Monument, Pan American Building, Capitol, Folgar Library attending the opening of the U. S. Congress also the D. A. R. Congress.

After very careful consideration on the part of the faculty and the Senior Class of the Mentone High School, Miss Pauline Swick received the ap-

pointment from this school. This is indeed a great honor.

All of the local D. A. R.'s sincerely hope that Miss Swick's name will be the one chosen to take this trip from Indiana.

## Home Economic Club Meeting

Mrs. Russel Eber will be hostess to the Mentone Home Economics Club at her home on North Tucker Street Thursday afternoon, March 21. Lois Lemler will be assistant hostess.

The lesson on gardening and common garden pests will be given by the leaders.

## SODALES CLUB

The Sodales Club held their regular meeting at the home of Mrs. Conda Walburn Thursday afternoon, March 14, for a progressive game of rook. Mrs. Ethel Shafer won first prize with Mrs. Ruth Ernsberger receiving the consolation prize. The next meeting will be held March 28 at the home of Mrs. Goldie Mollenhour.

## AID MEE'S

The United Workers of the Palestine Christian Church met on Thursday, Feb. 7, with Mrs. Lillie E. Eaton of near Palestine. The day was spent in quilting and sewing. At the noon hour a bounteous co-operative dinner was served.

Following the dinner a business meeting was called by the president, Mrs. Surguy, during which various subjects were brought up and discussed.

Immediately following the business meeting Missionary and Devotional services were conducted by Mrs. Elva See. The Aid will meet again in two weeks with Mrs. Maude Hagan of Mt. Vernon, Ohio and Palestine for a day of quilting.

The members present were: Mrs. Nellie Judd and Shirley, Mrs. Arvilla Fisher, Mrs. Naomi See, Mrs. Jennie Sloan, Mrs. Maude Hagan, Mrs. Vide Horn, Mrs. Ellis Carles, Mrs. Edna Mahoney Mrs. Agnes Surguy, Mrs. Mary Huffer, Mrs. Nora Huffer, Mrs. Elva See, Mrs. Cora Vorhis, Mrs. Ethel Rush, Mrs. Hattie Clark, Mrs. Joy Miller Mrs. Marjorie Milburn, Marguerite Huffer, Frances Cochran, May Jane Nelson, Ruth Cutler, and the hostess Mrs. Lillie Eaton.

## Population of New States

Congress, in 1872, adopted a measure which declared a new state must have sufficient population to entitle it to at least one representative. At that time 121,425 persons was a sufficient number. However, later congresses admitted Nevada, Wyoming and other states, although their populations were less than this figure.

## Girl Scout News

Amos Skeets

Tuesday evening being election night the patrol meetings were unusually long. The Sacajawea Patrol is now being lead by Charlene Latham with Lova Bush assisting. The Gypsies have as their leaders Marcella Leininger and Betty Lyons. For the Pocahontus Patrol Mary Ellen Myers and Geraldine Nellans are the leaders. And the Yaupon chose Marjorie Long and Betty Ellsworth to lead them. Louise Paulus was elected Treasurer.

The elections being dispensed with, the stunts were in order. Each patrol was to give some feature with which to entertain the Boy Scouts, who were our guests for the evening.

Some of the girls were working on their Minstrel badge and decided to present a little playlet at this meeting. The play was a short sketch of a small family when a deaf aunt came to visit them. It was a rollicking playlet with the hard of hearing maiden aunt acting as chief comedian the plot was built around her queer trick of twisting the words into different meanings.

The Yaupon then lined up and gave the patrol yell.

The Sacajawea came next. Being a little short of material they substituted from another patrol. In the beginning their stunt was a football game between Mentone and Michigan City but odd to say, it soon developed that the players were playing base ball one minute, basketball the next, with football and other sports thrown in. The poor referee.

The Gypsy Patrol presented the old fable of the old hen and her baby chick. The pig, the duck and the goose held prominent parts in the little sketch. The hen found a grain of corn and asked the animals to assist her in planting it but it developed that they were very ill with the "tummy ache". Everytime she asked for assistance they refused to help so the hen and her chick did the work. When the corn was ready to eat, however, they were willing to assist but the wise old hen assured them that it would make their "tummy ache" worse.

The Pocahontus Patrol enlivened the evening by presenting the "Bulldog Band." The instruments were dishpans, sticks and oddities of every description. The glamorous music that issued from these instruments was almost unrecognizable.

Our guests, the Boy Scouts, then contributed to the entertainment. In one stunt the participants stood on one leg and proceeded to knock each other over. Then came the tug of

war! Two boys got down floor and a strap was placed their heads, then the struggle. With each boy trying to pull opponent across into his own territory. The elephant race was next on the program. Several boys lined up by pairs. Then the husky boy lifted the small one up. The younger boys got a good hold with their legs around their partner's waist and then swung down and grasped his ankles. The other boys then dropped on all four, and the race was on.

Goodnight circle was then formed and the friendship clasp was sent around. The "Taps" were sung and prayer to the "Great Scout Master" closed the meeting.

## Leading Chinese Tonges

Among the most important Chinese tonges in the United States are the (1) Long, the largest in the United States because its local chapters include well-to-do merchants; the Hip Sing, the Ming Gai Hong and the Hoy On—the two latter claim to have more than 2,000 years of history. Tong houses are located in San Francisco, New York and Chicago. The Hip Sing is somewhat similar to a labor union, combining the elements of a merchants' association, chamber of commerce, church, fraternal society, city judge and jury and public se.

## Glands Must Help Brain

The brain alone is helpless. It is assisted by certain ductless glands, two in particular—the thyroid and adrenal glands, according to an authority. The thyroid gland excretes thyroxin, which stimulates activity, particularly of the brain, and causes the hormones to circulate, while the adrenal glands, the brains of the sympathetic system, control the emotions. It is explained.
