Lumber Buildings Being Erected

New buildings are being erected at the mill of the Northern Indiana Co-Operative Association to house their new stock of lumber and building material which they are adding to their other lines.

Regardless of the depression, here is an association that pays full dividends, expands its business and has been increasing its volume of business every month since it was organized.

Wedoubt if there is another business in this part of the state that can match the record of this association.

Annual Inspection

Beta Epsilon Chapter of Psi Iota Xi held their annual inspection Friday, April 28, at the Argonne at Warsaw.

At 6:30 a 3 course dinner was served at a long table which was attractively decorated: the blue china with gold linen, blue tapers, bouquets of daffodils and nut cups fashioned like ladies bonnets in blue and gold truly carried out the sorority colors, turquoise blue and gold.

Immediately following the dinner Kathryn Nelson and Margaret Mentzer were initiated into the sorority with unusually impressive service.

Inspection was then conducted by Miss Eloise Lewton of Decatur, the Northern Province chairman, at which time the future charity work of the organization, also the program of the National Convention which is to be held at Kokomo in June, were discussed. The oxygenaire which were placed in different hospitals in the State were reported to have already saved many lives.

Those present were: Miss Eloise Lewton, Decatur, Eunice Reed and Emma Mae Copeland of Angola, Thelma Harris and Helen Jontz of Warsaw, Bernice Bowen of Akron, Frances Clark, Mrs. George Clark, Mrs. Devon Eaton, Thais Greulich, Mrs. Emory Huffer, Annabel, Margaret and Rosalind Mentzer, Mrs. George Myers, Kathryn Nelson, Mrs. Robert Reed and Mrs. Curtis Riner.

The mill buys wheat, oats, corn.

Memorial Day

Arrangements are being made for the observance of Memorial Day, May 30. Rev. DeWitt, pastor of the M. E. Church will deliver the address. Full program will be in our next issue.

Piano Lessons (twenty-five cents)
June Aughinbaugh.

Heavy Rain Fall Tops All Records

The heaviest rain storm in this vicinity that has occurred during the memory of the oldest inhabitants was witnessed Sunday night when the downpour amounted to over three inches in less than an hours time. Back yards and cellars were flooded, and at times during the storm hail fell of such size as to break many windows.

Human Blood Weight

The public health service says that the blood in the human body is usually about one-thirteenth of the body weight and requires from one to one and a half minutes to circulate through the entire body.

HOW

TO DRILL HOLE THROUGH GLASS, A SIMPLE TRICK.—The apparently difficult task of drilling holes through glass is, in reality, a very simple matter.

Take any good piece of steel wire, file to the shape of a drill, and then hold it in a flame till it is at a dull red heat; then quench or temper in metallic mercury. A piece of good steel, thus treated, will bore through glass almost as easily as through soft brass.

In use, lubricate with oil of turpentine in which camphor has been dissolved. When the point of the drill has touched the other side put the glass in water, and proceed with the drilling very slowly. If not possible to do this, reverse the work turn the glass over and drill very carefully, from the opposite side.

By proceeding with care you can easily drill three holes through glass 3-16 inch thick ¼ of an inch apart.—Wisconsin Agriculturist.

Grand Chapter Of The O. E. S.

Members of the Grand Chapter of the O. E. S. convened at the Murat Temple in Indianapolis April 27 and 28 for their 59th annual session. Mr. Frank G. Laird addressed the session with Brother Wood, Grand Master, responding. Following is a report for the year of 1932: 83,000 Memberships, 2140 Initiated, 5288 Affiliated, 94 Reinstated, 918 Deaths, 1646 Demitted, 1914 Suspended, 14 Expelled, 484 Chapters. The officers elected were Worthy Grand Matron, Rose L. Malcolm; Worthy Grand Patron, A. C. Wood; Grand Secretary, Mrs. Blanch Regett; Grand Treasure, Mamie Conrad of Warsaw; Grand Associate Matron, Hazel T. Coats; Grand Associate Patron, Harry E. Emmons; Grand Conductress, Josephine Brown; Grand Associate Conductress, Mary Frances Price.

Class Party

The Go Forward class of the M. E. Sunday School met with Mrs. Van Gilder Friday evening. After the business session a pot luck supper and social time was very much enjoyed by all. Fourteen members were present. The next meeting will be held with Mrs. Fay Bunner May 26.

Smallest of Birch Family

The white birch is the smallest and least widely distributed of the birches in eastern North America, says Nature Magazine. It is rarely more than 40 feet high, and its trunk seldom becomes greater than 18 inches in diameter. Its branches often clothe the stem nearly to the ground with their slender lengths, and their ends divide into numerous dark brown wiry branchlets on which the leaves, in fall, are a shower of gold.

Plant Follows White Man

The common plantain weed springs up wherever the white man goes. The seeds are too heavy to float in the air, and just why it goes with the white man nobody knows. The North American Indians called it "White Man's Footsteps" because of this peculiar circumstance. It is a genus of the herbaceous plants, which include five British species, and is not native to this continent.—Grit.

GETTING TO WORK

"If our unemployed workers were suddenly set down empty-handed in an undeveloped and fertile continent," writes Professor Frank D. Graham of Princeton in a recent book, "they would not starve, but would immediately proceed to organize the work providing for their own wants. This would be so obviously the appropriate thing to do that no one would for a moment question its wisdom, its practicability or its economic soundness.

"When, however, we have every facility for bringing the work of hand and brains to full fruition, when we have men and equipment in abundance, when those of us who are employed and productive can help bear the common burdens, we balk and hesitate, raise objections and end in apathetic refusal to do anything but hope."

Yes, this is a queer state of things. Even so, there are communities here and there that still show some of the resourcefulness of the American pioneer age. In Dayton, O., as a Chicago investigator recently reported to his incredulous city, one-eighth of the unemployed "returned to self-support simply by setting to work to produce to meet their own needs." Starting with liabilities of about \$5,000, they now have assets of about \$50,000.

Work is still available for the intelligent and courageous, it appears, even without government help. There are resources left, natural and human. It is still possible for the unemployed to employ themselves.

Free Talkies

Beginning with Thursday May 4, the Mentone Business Men will sponsor free talkies each Thursday nite through out the summer.

Road Through Home

A century ago there were many instances where a public right of way passed through an occupied residence. One such old manor was standing until recently in England. A champion of public rights used to make an annual pilgrimage to this house and walk in the front door and out of the back.

OBITUARY

Allen, son of Jacob Long and Jane Amanda Dunlap Long, was born on April 7, 1866, on a farm in the Big Foot neighborhood southwest of Mentone. He died at his home in Mentone on April 11, 1933, aged sixty-seven years and four days.

He was the youngest son in a family of ten children, six brothers and four sisters. Three brothers are living: John D. of near Tiosa, Andrew of Owensboro Kentucky and Alonzo of Newcastle Township in Fulton County. In addition he leaves to mourn his loss his wife, Jennie Cook Long, a son Harry of Michigan City, Indiana, a daughter, Mrs. Owen Gaines of Whitley County, Indiana and two grandchildren, Ralph and Kathryn Long.

He was a member of the Bethel Baptist Church and of the Ancient Order of Gleaners, Talma Arbor. Until he moved to Mentone in 1916 most of his life was spent in the Big-foot neighborhood.

For the thirty-two years preceding his last illness he was connected with the local telephone company. His work for the company has taken him throughout the surrounding communities where he has made a host of friends.

Although he still felt that he yet had much to live for he realized the uncertainty of this earthly life and recently expressed that he held no fear of death. He knew how he had lived.

CARD OF THANKS

We wish to thank our friends and neighbors who so kindly assisted us with their sympathy and kindness during our late bereavement.

Mrs. Allen Long
Mr. and Mrs. Owen Gaines
Mr. and Mrs. H. B. Long
and family

Obeying and Commanding

He that hath learned to obey will know how to command. -Solon.

No Possible Vacuum?

Millions of molecules of air are left in the best vacuum known to man after the most powerful pumps have taken out all the air possible.

Stand Firm

Be like the promontory against which the waves continually break, but it stands firm and tames the fury of the water around it. -Marcus Aurelius.

Wonders Grown Stale

If we could have looked out from some Egyptian point of vantage and seen the pyramids rising before our eyes how privileged we would have felt. So should we feel in seeing man wielding the materials of the earth to his advantage in modern skyscrapers. -Woman's Home Companion.

WHY

We Find Rest Is Possible Without Sleep

Undoubtedly habit has very much to do with the ability of an individual to sleep. Habits of going to bed too early or of eating irregularly and wrongly will complicate matters. He who is in the habit of waking at a certain hour and of thinking that he cannot go to sleep probably will continue the habit. Not infrequently an entire change of scenery and of routine will aid in correcting the condition.

"A distinguished physiologist," says a writer in the Journal of the Indiana State Medical Association, "has told us that he rarely or never sleeps more than two hours in a given night. He, however, rests quietly in bed for five or six hours of the night because he quietly and leisurely thinks about pleasant things that have occurred and are happening at the present time. He does not permit himself to brood over misfortunes or unpleasant situations."

"The lure of an attractive 'nestling thought' may enable one to pass hours almost as if they were minutes. The patient is not really asleep, but for all intents and purposes he is so. Probably his mind is no more or possibly even less active than in the case when he is dreaming a pleasant dream."

Why Unhappiness Makes Some People Truly Ill

A possible physical explanation for the fact that many people are made ill by being unhappy, rather than unhappy because they are ill, was suggested in a recent address in London by Dr. Langdon Brown, professor of medicine at Cambridge University. Says Dr. E. E. Free, in his Week's Science (New York):

"Like the majority of present-day physicians, Doctor Brown admits that he grew up in the purely materialistic school of medical theory which insists that every disease must have a physical cause. Experience has convinced him that this is not true. Purely mental distress may make a patient just as truly ill as a broken bone or a germ infection. Many people who have such mental illnesses are unwilling to admit this fact and manufacture for themselves symptoms which really are figments of the imagination but which spring from a desire to find a tangible reason for being sick."—Literary Digest.

Why "Braggadocchio" for Braggart?

Braggadocchio is the name of a character in Spenser's "Faerie Queene." He was valiant with his tongue, but a great coward at heart.

Rectitude

Do not rely on heavenly favor, or on compassion to folly, or in prudence, or common sense, the old usage and grain chance of men; nothing can keep you—not fate, nor health, nor admirable intellect; none can keep you, but rectitude only, rectitude for ever and ever.

MINERAL NEEDS FOR SWINE HERD

Interesting Experiments Are Made at Ohio Station.

The mineral requirements of pigs has been a subject of much experimental work and some controversy for several years. The Ohio station makes the following brief report on some work done to test out the effectiveness of several substances commonly used in mineral mixtures:

Feeding investigations with swine during the year included a test to study the effect of adding various minerals to the simple mixture of salt 1 part, limestone 2 parts, and raw bone meal 2 parts. This mixture and the various additional minerals were fed with a ration of corn and soy bean oil meal, which is known to be deficient in minerals.

Glauber's salts, which is a laxative, was fed at the rate of 10 pounds in each 100 pounds of the mixture. The salts did not increase the rapidity of growth but brought about a slight saving in feed for each 100 pounds of gain produced.

Wood charcoal, to the extent of 15 per cent of the mineral mixture, resulted in neither faster nor cheaper gains.

Potassium iodide, in the limited amount of .05 pound to every 100 pounds of minerals, proved to be beneficial. It is used as a preventive of goiter, and under some conditions seems to have a place in mineral mixtures for growing pigs.

Copperas, or iron sulphate, was used as a source of iron and fed at the rate of 2 pounds in each 100 pounds of minerals. The pigs receiving it made 2 pound more gain daily a head, and consumed 52.5 pounds less feed for each 100 pounds of gain than those on the same ration without the copperas.

Prevent Dust in Hog Houses to Aid Health

During winter months when hogs are more tightly housed, dust from houses with dirt floors becomes an increasing annoyance. Dust from the soil, the dried droppings, and old bedding rises as the hogs move about. It not only offends the nostrils of the man caring for the swine but can also become detrimental to the health of the hogs themselves.

Ventilation of houses does not always eliminate this dust. It is possible, in addition, to check the trouble at its source. Simply clean the floors before cold weather and pour old crank case oil over them. It does not require any great quantity. Merely enough to absorb the thin top layer of dust. As bedding is changed during the winter an additional small amount of the oil can be spread on the floor after the old bedding has been removed and before the new bedding has been put in.

The pig buys wheat, oats, corn.

How Wood Carving Has Declined

How old is the art of wood carving? Is a question that is answered by the simple statement that it is almost a lost art. Wood carving is one of the ancient arts. There are splendid examples of wood carving by the Japanese of the Eighth century. There are remnants of Scandinavian carving dating from the Ninth and Tenth centuries. They are in low relief and follow the same form of design as is found on Celtic stone crosses. Of the Norman period in England only a few isolated pieces remain. The Fifteenth century was productive of the finest quality and of the largest amount of decorative Gothic woodwork. Many churches were built during this period and some elaborately decorated. The most noticeable feature of the work of this period was that carving became flatter and tracery was extensively used. Since the Eighteenth century wood carving all over Europe and in America has declined.

How Egyptians Farm Salt

How salt is gathered on sticks in Egypt has recently become an interesting topic. Great tracts of land are used where sea water can be introduced. The sticks are planted in a formation at equal distance from each other. The sea water is allowed to enter and to cover the sticks completely. The locks are then closed and the water, thus standing, gradually evaporates. During this process the salt clings to the sticks and by the time the entire evaporation has taken place each stick has many inches of salt around it. The salt is then collected and the process repeated.

How Fast People Read

Such tests as have been made indicate that there is considerable variation, depending upon the nature of the contents that are being read, the type used, and other factors. Huey found that adults varied in the rate of reading silently from 2.5 to 9.8 words per second at their ordinary rates. When reading as rapidly as possible the rates varied from 3.5 to 13.5 words per second. Whipple and Curtis found that the time per word in hundredths of a second for normal silent reading, maximum silent reading, and skimming was 26, 22 and 14, respectively.

How Far South Eskimos Live

The Eskimos are inhabitants of the northern coast of the American continent down to latitude 60 degrees north on the west and 55 degrees on the east, and of the Arctic islands, Greenland and about 400 miles of the nearest Asiatic coast. They prefer the vicinity of the seashore, from which they rarely withdraw more than 20 to 30 miles.

How Watch Is Used as Compass

How the watch is used as a compass depends upon who is making this experiment with the watch. The woodsman's method of using his watch as a compass is to point the hour hand of the watch at the sun, which marks south as being half way between the hour hand and twelve o'clock on the watch dial.

WORLD WAR BY * * YARNS LIEUT. FRANK E. HAGAN

Too Late to Save Them

Armistice day is a day of "elevens." World war hostilities ceased on the eleventh hour of the eleventh day of the eleventh month of the year. To that series may be added one more eleven—the story of the 11 American soldiers for whom the Armistice came too late.

On the afternoon of November 12, an afternoon that was crisp and dry as if in mockery of the gloomy, wet days of the last fighting, surviving members of the Third battalion of the One Hundred and Third Infantry gathered around an open grave on the slopes of the Cote de Caures in the Meuse-Argonne region. In it, shoulder to shoulder as they had fought, lay the bodies of 11 American soldiers covered by an American flag.

The previous day their comrades of the One Hundred and Third had found the bodies of the little group for whom the Armistice came too late. Its commander, Lieut. Herbert Peart, was sitting beside a tree, a bullet through his head. In one hand was a pencil. In the other was a piece of paper on which was written "Captain Cabot, 7:10 a. m. Am held up by machine gun fire on left. Have located four of them. Also on my right." There the message ended in a scrawl.

About him lay the bodies of his ten men. The roster of their names is typical of the cosmopolitan make-up of the A. E. F. They were the following: Corp. Leon DeBonville, Privates Charles Worth, Frank Khavikovski, J. McGiven, John Elliott, F. R. Snow, Albert O. Abraham, Charles W. Bar gall, William Whitney and Moses W. Neptune. They had died fighting together only a few hours before the Armistice was signed and a few hours after that event they were being buried together in the same grave.

Freedom

The gentleness of perfect freedom can only be won by the discipline of self-restraint. —Barnett

Real Heat

No furnace ever can make the house as hot for a man as his wife can when he's done something that simply burns her up. —Cincinnati Enquirer.

Seismic Angling

Savants at Tokyo university have discovered that an earthquake will make fish bite. It takes that sometimes, observes the unlucky fisherman. —San Antonio Evening News.

His Affliction

A teacher had told her class of youngsters that Milton, the poet, was blind. The next day she asked if any of them could remember what Milton's great affliction was. "Yes'm," replied one little fellow; "he was a poet." —Jokosmith.

MENTONE NEWS

Wren Coplen suffered a paralytic stroke last week.

Miss Frances Rush spent Wednesday in Warsaw on business.

Miss Jessie Rush spent the week end with Miss Annabel Long.

Mr. and Mrs. Bert Rush spent Wednesday in Warsaw on business.

Mrs. Ella Yilshman, of Niles, Mich., spent the past week with Mrs. Amanda Busenburg.

Miss Truth Swank, of North Manchester, spent the week end with Mr. and Mrs. Paul Smith.

Mrs. Paul Smith spent Thursday in North Manchester with her parents, Mr. and Mrs. D. F. Priser.

George Mollenhour who was seriously injured recently at the Mollenhour mill, is getting along fine.

One dozen baby 3x4 photos in folders, \$2.50; and we give an extra hand colored one free. Werner Studio, Warsaw.

Maurice Greulich and Dale Kelly left April 22, for Mississippi, where they will spend about a month on a vacation.

Mrs. James Lackey, Mrs. Cora Vangilder and Mrs. Allen Dillie attended the county Sunday school convention at Etna Green, Thursday.

Give Birds Good Care

Give the breeding birds a properly balanced ration and allow them free range in nice weather if you expect a large number of eggs that will hatch a high percentage of strong chicks.

Feeding Dry Mash

Three to four pounds of dry laying mash made crumbly by the use of milk or water adds to the palatability of the feed and can be given daily to each 100 chickens. Some prefer to give the wet mash at noon and others in the afternoon. Just when it is supplied does not make any difference in the results obtained. In using either lights or a crumbly mash or both every operator should feed daily 12 to 14 pounds of grain to each of his 100 hens.

Raise Turkeys Successfully

Turkey eggs can be hatched in incubators and the poults can be raised successfully with brooder stoves. Growing and mature birds can be yarded and kept away from contaminated soil.

Let All Eat at One Time

Have enough chick feeders so that all the chicks may eat at the same time. A reel-type feeder four feet long should provide for 100 chicks more than a week old.

The mill buys wheat, oats, corn.

Mr. and Mrs. F. D. Lemler visited with the formers sister, Mrs. R. K. Dump, in Nappanee, Sunday afternoon.

Mrs. Mary Sarber who is spending a few weeks in and around Mentone, has been redecorating the interior of her property on East Main St.

Mrs. Ruth Arnsberger and Mrs. Davidson spent a few days in Indianapolis last week where they attended the Grand Chapter of the O. E. S.

Mentone School Approved.

The Mentone and Harrison township high school has been granted a continuous commission for the first time in its history. Dale Kelly is the principal, and we congratulate him on this fine showing.

Motion of the Sun

The sun does not remain stationary in the heavens but has two kinds of motion. It rotates on its axis in 25 to 26 days. Together with the whole of the solar system, including our earth, the sun is being carried through space at the rate of 12 miles a second.

Fresh Air Essential

Fresh air is very essential for the laying stock. Houses should not be built to admit the fresh air through cracks, causing draughts. Arrange the ventilators so that the air can be changed in the house at will. One of the best ways of accomplishing this is to have the windows so arranged that they can be opened every day. In the winter an hour or less would probably be sufficient, but it is essential, even in cold weather, to allow the house to be purified by ventilation. For this purpose many persons are using burlap screens which give good satisfaction. Some breeders advocate the open scratching shed, where nothing but screen wire is between the outside air and the fowl as they are exercising during the day. Ventilation shafts have not given the best satisfaction.

HOW

FLOWERS FERTILIZE AND REPRODUCE THEIR LIKE.—The esthetic value of flowers to man is a topic best treated by the poet. To the biologist flowers are organs of reproduction among the highest group of plants.

At the center of a typical flower occurs the flask-shaped "pistil." Within the swollen base of this structure are small "ovules" which are destined to become seeds. Next come the brightly colored "petals," and beyond them the green "sepals."

Either wind or insects (attracted by the bright petals and seeking the "nectar" which the flower secretes) may transfer the pollen grains from the stamens to the sticky upper end of the pistil (of the same or of a different flower). The pollen grains then grow tubes which eat their way down through the pistil to the ovules. A male sperm which has been carried within the pollen tube fertilizes the female egg which is embedded in the ovule. The fertilized egg forms an embryo plant while the outer tissues of the ovule form the outer regions of the seed. Under proper conditions this embryo within the seed can grow to produce the mature plant.

MRS. ELMER VANDERMARK

SUCCESSORS APRIL 26.

Death claimed Mrs. Bessie Vandermark, aged 64, April 26th at 11:45 a.m. at her home west of Palestine. About one year ago Mrs. Vandermark submitted to an operation for the removal of a tumor and has been in ill health since. The Sunday night previous to her death she suffered a stroke of paralysis and a brain hemorrhage, from which she never regained consciousness.

She was born at Kalada, Ohio, and forty-seven years ago she was united in marriage to Elmer S. Vandermark who survives her. Beside the husband, one daughter, Mrs. Paul Summy of South Bend, one sister, Mrs. Will E. Davis, of Barket, and two grandchildren are left to mourn her loss.

Funeral services were held Friday afternoon at 2:30 at the Palestine Christian church, with interment in the Palestine cemetery.

Hour-Hold Hint

If liquid in which olives are bottled is thrown away when bottle is opened olives may be kept indefinitely if olive oil is poured over them after they are put back into bottle.

Deer Outruns Auto

When a Canadian motorist recently caught up to a deer, at a speed of 55 miles an hour, the animal managed to keep ahead of the automobile and finally turned off into the underbrush.

FOLLOW EIGHT "C'S" TO BETTER CHICKS

North Carolina Poultryman Gives Good Advice.

By C. F. Parrish, Extension Poultryman, North Carolina State College—WNU Service.

The eight "C's" for better chicks may be grouped as clean eggs, clean incubators, clean chicks, clean brooder houses, clean range, clean litter, clean feed, and clean management.

Right now poultrymen are entering their busiest season and are looking for the best methods to use in growing healthy, hardy chicks which will pay a profit. We do not know the best way to grow healthy chicks, but we do know a program to follow which will almost invariably make for success in the industry.

No one can produce healthy chicks without clean eggs produced by hens that have been blood-tested and found free of bacillary white diarrhea. These eggs must be placed in incubators that have been thoroughly cleaned and dried before the eggs have ever been put into them. Then, every poultryman should be careful about the chicks which he brings to his place from some other breeder or practical poultryman. Only strong, clean chicks from disease-free stock should be purchased.

The next step is to have clean brooder houses and place these on ground where chicks have not been reared before. Good range is also important. It is wise to grow out the chicks on range where no poultry droppings have been spread and where some green crop has been planted. Clean litter on the floor is needed. Straw, shavings or peat moss is good for chicks. Sawdust is poor.

The dole system does not work in feeding chicks. Give them all they will eat in such containers as the chicks cannot foul or waste the feed.

Care and Marketing of Quality Eggs Important

Caring for eggs until they are marketed is an important step in producing quality eggs. It is pointed out. Methods of caring for eggs are outlined as follows:

1. Keep eggs in a clean cool place, free from all odors.
2. Prevent excessive evaporation of moisture from the eggs by covering container with a dampened cloth or sack while they are being held.
3. Clean soiled eggs with steel wool rather than wash them.

Suggestions for marketing eggs of quality are:

1. Market eggs at least twice weekly.
2. Secure an egg-candling chart from the United States Department of Agriculture, for which there is no charge, and learn to determine quality of eggs by candling.
3. Do not market an egg unless you are convinced that it is of good quality.
4. Pack eggs for shipping or delivery with the small ends down.

Get chick feeders at Co-Op. mill.

New Treatment for Roundworm

You can't expect to make a profit from birds infested with worms. Use this new way to kill Roundworm. "Black Leaf" Worm Powder mixed in mash. Easy, economical and convenient. No handling of birds.

Single Treatment Does the Work

No toxic effect on birds. Doesn't interfere with production. Odorless, tasteless, concentrated. A scientific control. Nicotine released in intestines. Kills worms, saves time, trouble and bother. Write for prices and free literature. Ask Your Dealer.

Mills and Johns repainted the front and interior of their barber shop this last week.

Mr. and Mrs. F. D. Lemler and daughter Phyllis visited Mr. and Mrs. S. M. Hill of Roanoke Sunday.

I will call at your home and give piano lessons. Phone 3½ on 171 Mentone. Mrs. Clara Eve Baker.

Charles Allen and Irene children of Mr. and Mrs. Dewey King have been ill the past week with the chicken pox.

Mr. and Mrs. S. A. Guy who have been spending the winter in Day Tona, Florida have returned to their home.

Miss Adaline Shoup, Mrs. C. W. Shafer, Mrs. Cora VanGilder and son Jack spent last Monday in Fort Wayne.

Mr. and Mrs. Don Adrain Bunner of Bloomington spent the week end with the formers' parents, Mr. and Mrs. D. L. Bunner.

Mr. and Mrs. J. A. Baker and family and Mr. and Mrs. Charles King visited Mrs. William Fissel of Granger last Sunday.

Ralph Ward who has been employed at the Co-op Mill is off duty at the present time on account of ill health. Dale Plew is filling the vacancy.

Unflattering Fact

If the average man had to sum up what he actually knows against what he thinks he knows he'd be very deep in the red. —Miami Herald.

Hospitality

Another thing we can get along without is people whose apparent ambition is to see whether their guests can talk louder than their radio. —Nashville Banner

Goddess of Retribution

Nemesis was the Greek goddess of retribution. She was supposed to allot to men their exact share of good or bad fortune. Thus she became the personification of divine retribution and retributive justice in general.

River of Milk

A milk white river, due to the water flowing over limestone and so becoming saturated with chalk, and a lake which generates soap from its alkaline limestone bed, are two of the curiosities of the island of Andros, one of the Bahamas.

It Troubles You

Sometimes it's easy to do a mean thing and get a big profit from it. It troubles you, however, and you never forget it. Months or years you'll think of it and cringe. It's much better to have some one else's poor opinion than to have your own contempt. —Grit.

Why "Bull" or "Bear" Market?

Although these expressions are generally supposed to be American in origin, research shows that both were used in England before the revolution. "Bulls" in market terminology are, of course, those who operate to raise prices, and drive up the market, while bears are those who work to depress prices, particularly through the device of "selling short"—selling securities they do not possess at a price lower than the prevailing one so that they may buy at the lower price in time for delivery. We probably say "bear" because of the old saying, "Selling the skin before you have caught the bear," or trading something you do not possess. The buyer is referred to as a "bull", perhaps for a euphonious distinction, or in allusion to the "drive" of a bull.

Why Wool Is Warm

It is the insulating quality of wool which makes it desirable as a protective covering rather than any inherent power to generate heat. Wool fibers in themselves offer little resistance to heat transmission. The "kinks" or "waves" which are so distinctive a characteristic of wool give it its protective qualities. These waves or kinks, of which the fibers have from 2 to 30 to the inch, give something of the characteristics of a coiled spring, and when the fibers are woven together tend to create a resilient fabric with innumerable tiny air pockets. It is this finely divided and trapped air to which wool fibers owe their qualities of warmth.

Why Say "Go to Halifax"

The weaving industry of Halifax, England, was carried on in the workers' cottages in earlier days and the "pieces" were spread out on the hill sides. Theft became so common that what was known as the Halifax law came into being. Under this law anyone stealing cloth to the value of more than 13 pence was liable to execution. In those days, therefore, to tell a man to "Go to Halifax" was equivalent to telling him to go where he stood a good chance of being beheaded.

Why It Is "The Netherlands"

"The Netherlands" means the low lands, the under lands, the bottom lands, the name referring, of course, to the country's peculiar topographical situation, considerable parts being below the sea level. It is by a mere convenience of speech that the country is "the lowlands" rather than "lowland." The official name is the Kingdom of the Netherlands.

Why Say "Giving Short Shrift"

"Shrift" in this expression refers to the act of shriving, the confession to a priest, particularly of a penitent and the consequent absolution. "Short shrift" was originally the short time allowed a criminal for confession before he was executed. Thence any summary dealing or quick consideration.

**Crossbred Hogs Led in
Gains Made in 18 Trials**

Crossbred swine led in daily gains
in 18 feeding trials at the Kentucky
station. This tallies with feeding tri-
als conducted by Evvard at Ames.
Gain figures secured at Kentucky are:
On 67 Berkshires, 1.38 pounds daily;
on 85 Durocs, 1.57; on 22 Poland
Chinas, 1.50; on 20 crossbreds, 1.6.
These figures are in no sense a re-
flection on the value of pure breeds, for
it is necessary to have two pure breeds
to produce crossbred pigs.

These results are not in accord with
those secured at the Illinois station.
Experiments carried on there for five
years show no evidence of faster or
more economical gains from cross
breeding. So, there's two for and
one against.

Live Stock Hints

Night stabling is to be recommend-
ed during the time horses are being
conditioned for spring work.

March and September are probably
the best months for the sow to farrow
that produces two litters a year.

There is a feeling that because
many people do not like lamb, the
feeding of sheep is a very precarious
practice. This sentiment should be
dropped.

It is a good plan to keep the ram
shut up in the barn during the day-
time. Give him plenty of good hay,
clean water and one and a half pounds
of grain per day, consisting of three
parts of oats to one of shelled corn.

Twenty-four years of hog prices
show that the highest yearly price
comes on the average in September
and the season's low price in Decem-
ber or January.

Recent tests at the Minnesota ex-
periment station show that spring
pigs weighing around 70 pounds when
put on full feed in June can be fitted
for market in approximately 90 days
by feeding them shelled corn and a
good protein supplement in self-feeders,
plus an abundance of green feed or
pasture.

Forests and Agriculture

Forests, aside from their timber
value, are necessary to watersheds, to
the prevention of erosion, the preven-
tion or retarding of floods. They help
to raise or maintain underground wa-
ter tables upon which agriculture is de-
pendent.

"Developing" Antique

A simple method to give an antique
look to a new gilt frame is to apply
the gilt with banana liquid and to ap-
ply over it artist asphaltum thinned
with turpentine. In the event that it
is desirable to show the high lights
bright, the asphaltum may be rubbed
off in places with cheesecloth before
dry.

A 10 Point Thrift Program

- 1—Buy Roof Dura and save that leaky roof.
- 2—Save 5 to 50 per cent by buying feeders and fountains from us.
- 3—Compare our prices on brooder stoves, before buying any kind, any time or place.
- 4—Buy coal that will burn satisfactorily in your brooder stove, we have it.
- 5—Buy open formula feeds that are made for customer's results and not for dealers profits, we make them.
- 6—Ask us about disinfectants for any purpose, and get our prices.
- 7—Cure those wormy or diseased birds—our poultry medicines are reliable.
- 8—Grade your own eggs, we have egg scales that are fast and accurate.
- 9—Insist upon quality ingredients in your mashers, kinds made to undersell will not produce money worth results
- 10—Remember Mr. Farmer you are writing your own pay check, its up to you.

OBITUARY

Lewis Owentin, son of Clarence O. and Blanche J. Eiler was born in Harrison township, Kosciusko County Indiana, July 13, 1923 and passed away May 8, 1933 at the home of the parents north of Mentone.

His death came as a result of a heart affection, with which he had been afflicted since birth and against which he had made a heroic but losing struggle.

He leaves to mourn his passing the parents, four brothers, three sisters and many other relatives and friends whose sorrow is made sweet by the knowledge that he had learned to love Jesus and when it was indicated to him that his recovery was not expected and that he was facing the crossing he expressed a complete confidence in Jesus and his salvation.

Funeral services were held at the Mentone Baptist Church, where the deceased had been a constant attendant, till his last few weeks when it was physically impossible. Burial at Harrison Center Cemetery. Rev. V. B. Squibbs of the Mentone Baptist Church conducted the services.

CARD OF THANKS

May we express our appreciation for the many beautiful floral tributes, the kind words and deeds, of sympathy and assistance rendered by our friends during the illness and passing of our son and brother,

Mr. and Mrs. C. O. Eiler and family

About Ourselves

It doesn't much matter what our lives are; but it does matter whether or not we live them finely.

There's the Rub!

An economist says that every man should have work to fit his brains. But think how many people would be unemployed permanently!—Exchange.

Sunshine

Those who bring sunshine to the lives of others, cannot keep it from themselves. There is something so penetrating about sunshine that it lightens not only the spot on which it falls, but all around, for light is stronger than darkness and good is stronger than evil. To be a bearer of sunshine to dark places is the pleasantest work in the world. —Exchange.

Benediction, Rev. Squibb.

MARRIAGE

FROST MEREDITH

The wedding of Rev. Thomas F. Frost and Miss Margaret E. Meredith was solemnized Tuesday, May 2, high noon, at the home of the brides parents, Mr. and Mrs. Orlando Meredith of near Buiket.

The impressive double ring ceremony was performed by Rev. Denbo of North Webster in the presence of about thirty-eight friends and relatives.

Mrs. Zelma Summe, sister of the bride sang 'At Dawning' and Mrs. Summe and Miss Dortha Groscup sang together 'I Love You Truly'. They were accompanied by Miss Marcella McGinly who also played the wedding march by Mendelssohn.

The bride was attired in a lovely white silk crepe dress and carried a bouquet of roses. Little Wanda Summe, niece of the bride was ring bearer. She wore orchid organdie trimmed in lace and carried the rings in a lily on a cushion that matched her dress.

Following the wedding dinner the young couple left for their newly furnished home at Cicero, Indiana, where Mr. Frost is pastor of the M. E. Church.

NOTICE

All parties owing services fees from my registered animals are requested to call and settle as some of these are of long standing. Hereafter a reasonable fee will be demanded at the gate, of those who wish service.

Silas Meredith.

POPPIES

Every year on the Saturday before Memorial Day thousands of Hoosiers wear little red poppies on their coats. Legionnaires and Auxiliaries are on the streets all day with baskets, pinning the little flowers on all passersby. Of course you know that the poppies are worn in memory of the men who lost their lives in the World War. That through the manufacturing of the poppies in our Indiana hospital we are providing the Key, unlocking the door of employment and mental peace to hospitalized World War Veterans who receive very little or no compensation from the government. That we are laying the foundation for the structure of our Rehabilitation and Child Welfare.

The Sodales Club will sponsor the sale of Poppies May 27. The following committee will have charge of the sale of Poppies. Wanda Davison, Ruth Ernsberger and Ottie Walburn.

MENTONE NEWS

Mrs. Royce Tucker spent Friday in Elkhart on business.

Quincey Jones spent Saturday in Mentone on business.

Mrs. Thomas Haimbaugh who fell down a cellar way Saturday suffered a number of severe bruises.

Notice change in banking hours at the Farmers State Bank in their announcement on back page.

Mr. and Mrs. A. T. Briggs of Greencastle were guests of Mr. and Mrs. S. A. Guy the past week.

Carlin Myers and Carl Underhill returned Tuesday from Kansas City where they have been transacting business.

Mrs. Clyde Lackey and son James, John Lackey and Mr. and Mrs. James Lackey attended the funeral of Marcus Wright at Grover Hill in Ohio on Wednesday.

Fetters

"Why should anyone make a fuss about a bad habit or two?" asks a reader. Habits which begin as cobwebs have a habit of ending as cables. Early correction spells freedom.

GIRL SCOUTS

In March a Girl Scout Troop was organized in Mentone under the leadership of Rosalind Mentzer and assistant leader, Mrs. George Clark.

According to the Girl Scout requirements a girl must pass her Tenderfoot Test before she may become a Girl Scout. The Investiture Service, a ceremony during which they get their scout badges and are received into the National organization will be held this Wednesday. Those receiving their pins are: Serita Kring, Georgia Jones, Ruth Rush, Mary Mollenhour, Margaret Mentzer, Pauline Swick Jean Manwarling, Lova Bush, Charlene Latham, Evelyn Smith, Alice Ellsworth, Mary Rush, Marcella Leininger, Eloise Kesler, Betty Lyons, Dorothy Nottingham, Lena Rush, Jean Burns, Marjorie Long, Louise Jones, Arvis Underhill, Mary Ellen Meyers, Betty Ellsworth, Lola Mollenhour, Jeanette Blue, and Mary Jane Busenbarg.

The Troop Committee with Mrs. Cora VanGilder chairman, Mrs. F. R. Burns, Mrs. Fred Swick, Mrs. Harl Nottingham, Mrs. George 2nd Meyers and Mrs. Chauncey Mollenhour, will be special guests attending the Investiture Service.

Early in the year a service was held to name the different Patrols of the Girl Scout Troop. The names are The Sacajawva Patrol, The Seven Sisters, The Raggle Taggle Gypsies, The Pocahontas Patrol, and The Poplar Tree Patrol.

Miss Rosalind Mentzer, Mrs. George Clark and Mrs. George Meyers attended a Leaders Training Course at Fort Wayne under Miss Alice Mokey of the National Staff last Tuesday.

The Troop went on a hike and a picnic supper Thursday, May 4. Many things were learned about building fires and camping out.

We are now beginning on our second class test, eleven have completed their signaling, and many their fire building test. The girls are also working on their different Merit Badges.

A number of the girls of this troop are planning on attending the Fort Wayne Girl Scout Camp at Dewart Lake for a week this summer.

MENTONE NEWS

Finger Waves, Babcock Beauty Shop.

Miss Fern Rush spent Friday with Miss Betty Lyons.

Dr. and Mrs. F. B. Davison attended the Diamond Jubilee Convention of the Indiana Dental Association which convened in the Claypool Hotel May 15 and 16 at Indianapolis.

Gives Him a Trimming

"Now, if I were only an ostrich," began a husband at the breakfast table as he picked up one of his wife's rolls, "then—"

"Yes," interrupted his wife, "then I might get a few feathers for that old hat I've worn for three years!"—Tit-Bits Magazine.

IMPROVEMENT?

She—You big brute!

He—And only yesterday I was a little shrimp!

Tragic Hero

"You said that man was a tragic hero, but he does not look like an actor."

"He isn't an actor. It is real with him—he has 10 unmarried daughters and his fourth wife."—Lustige Koelner Zeitung.

Out of the Frying-Pan

"Really, Johnny, your handwriting is terrible. You must learn to write better."

Johnny—Well, if I did, you'd be finding fault with my spelling.—Watchman-Examiner.

Question of When

"A wise man may change his mind."

"My boy," replied Senator Sorghum, "the greatest of all wisdom consists in knowing when to change your mind."

Lots of Recreation

Junior High Miss—Aren't ants busy little things? They work all the time and never play.

Junior High Mister—Yes, but every time you go on a picnic they're there.

Class in the Kitchen

Lady—Have you been accustomed to having a kitchen maid under you?

Cook—In these days we never speak of having people "under us," but I have had colleagues.

Fish Not Hatched From Eggs

Guppy-fish are born alive instead of being hatched from eggs. Others are the Embiotocidae or surf fishes of the Pacific coast of North America; many of the Cyprinodontidae or top minnows, which are common in most fresh water streams in this country; many sharks and rays found mostly in tropical waters, and many of the small aquarium fish.

44 LEGISLATURES CUT STATE COSTS

**More Than \$200,000,000 Was
Lopped From Budgets.**

Washington, D. C.—Legislatures in 44 states which met this year cut tax-payers \$5,875,230 in salaries and effected savings estimated at more than \$200,000,000, a survey revealed.

The salaries were paid to 6,587 legislators. Incidental expenses for legislative sessions bring the total above \$11,000,000. In four states—Kentucky, Louisiana, Mississippi and Virginia—no legislative sessions were held.

Twenty-four states paid legislators on a work-day basis ranging from \$3 to \$15 per day. The larger figure is paid in Arizona and the lower in Kansas, Michigan, and Oregon. The remaining twenty states paid their representatives a set amount a session, ranging from \$200 for New Hampshire to \$3,500 for Illinois and \$3,000 for Pennsylvania.

Legislative experts computed that \$100,000,000 had already been saved to taxpayers, although 32 legislatures are still in session, making additional reductions.

Favorite methods of making savings were consolidating and abolishing state bureaus and commissions, reducing salaries of employees retained and slowing up expenditures such as road-building and construction of state institutions. When the entire legislative session is completed, experts estimated that the present figure would be at least doubled.

New York's legislators plan to save \$20,000,000, Oklahoma \$15,000,000 and Iowa \$6,000,000.

Efforts to increase declining revenues constituted one of the problems before legislatures this depression year. Typical means of expanding receipts were through passage of sales, gift and inheritance taxes.

New Spanish Justice Is Slow, Records Indicate

Madrid.—Justice moves unusually slowly in Spain and there are persons who have been under arrest since the proclamation of the republic, April 14, 1931, without trial.

The principal prisoner of this type is Gen. Damaso Berenguer y Fuste, premier of Spain from January 28, 1930, to February 11, 1931. He is held in connection with the "responsibility" investigation of the execution of Capt. Fermin Galan and Garcia Hernandez at Jaca in the December, 1930, republican uprising. Berenguer has been held on various occasions in the Madrid military jail in a castle at Segovia, and has also been allowed to remain under arrest at his home, where he now is.

In their cells in the Madrid jail still are the three Miralles brothers, ardent monarchists, who were arrested during the excitement around the ABC building on May 10, 1931. On that occasion a mob attempted to burn the monarchist newspaper. Police

and civil guards intervened. Shots were fired. Two persons were killed. Various monarchists were arrested and all eventually released except the Miralles brothers, although there are no definite charges docked against them.

Police Arrest Woman, 71, as Reckless Driver

Pueblo, Colo.—Police Judge C. V. Marmaduke isn't so sure that it is all the "younger generation" when it comes to joy rides.

Officers arrested H. R. Newhouse, sixty-nine, and Mrs. Ellen Ogden, seventy-one, and charged the couple with drunkenness. In addition they charged Mrs. Ogden with reckless driving.

Officers said the automobile driven by the elderly woman narrowly avoided crashing into a police car, and did finally collide with a parked automobile.

Wife Investigates; Is Knocked Out by Burglar

Stockton, Calif.—When Charles H. Huston arrived home early in the morning, he found his wife unconscious on the floor with a swollen jaw. When she regained consciousness she related that, hearing a noise, she arose to investigate and encountered a burglar, who struck her. She had been "out" for about fifteen minutes, she estimated.

Twins Make Perfect Grades

Jonesboro, Ark.—A pair of twins at Jonesboro State college made straight "A" grades last semester. Mildred and Madeline M Jors, nineteen-year-old girls, maintain their exact similarity in dress, appearance and character.

Mothers Baby Rats With Her Kittens

Henryetta, Okla.—An ordinary black and yellow speckled house cat has adopted two rats to raise along with her brood of four kittens at the Miracle Sweet Feed mill here.

E. A. Croom, part owner of the mill, found a nest of young rats in the building. Intending to furnish a wholesome meal for the mother cat and her four young ones, Croom placed the baby rats in the cat's pen.

Instead of devouring them, however, the sympathetic cat promptly began to mother them.

Pets Hard to Raise

Chameleons are said to be hard to keep in captivity, some of them refusing all food during the winter. Their food consists of insects, meal worms, chopped meat and raw egg, with plenty of water in small low receptacles. In spite of all care, they are unlikely to live more than a few months in captivity.

WORLD WAR BY * * YARNS LIEUT. FRANK E. HAGAN

The Corpse That Came Back

Battery D of the One Hundred and Twenty-fourth artillery, thirty-third division, was moving up toward the front by train from Besancon. During the night journey a horse became frightened, broke its halter rope and proceeded to make things lively in that car for all concerned. Private McAllister tried to catch the horse, whereupon the wild-eyed animal planted its heels in Private McAllister's chest, gave a mighty push and Private McAllister went sailing out through the side door into the night.

It was some time before the accident was reported to the major who stopped the train and sent telegrams back, directing searching parties to look for the corpse and give it proper burial. Eighteen hours later Battery B passed that way and saw the body still lying along the track, whereat there was much indignation at the negligence of the French who would allow the body of an ally to lie uncared for.

But that night a bedraggled soldier appeared in Battery D's camp, staggered up to Lieutenant Plantz and saluted. "Sir, my name's McAllister," he said. "I have the first sergeant's permission to say that I didn't go A. W. O. L. A bloody horse kicked me out of the car. I kinda got hurt and stayed in the ditch all night, but I flagged a troop train this morning and came in. And, and, lieutenant, (and here the speaker's tone was abjectly apologetic) I'm sorry about it but I couldn't help it. I sure tried to take care of it, but I didn't know the horse was going to boot me. I'll sure pay you for it, lieutenant." "Pay me for what?" asked the puzzled officer. "Why, you see, when that bloody horse kicked me out the door and I landed in the ditch I broke the globe on your flashlight," replied Private McAllister. (© 1933 Western Newspaper Union)

MARRIED

Wagner Holloway.

Cleland Wagner, son of Mr. and Mrs. Jonas P. Wagner, of Warsaw, and Kathleen Holloway, daughter of Mr. and Mrs. Glenn W. Holloway of this place, were married at the home of Rev. B. H. Truman, Warsaw, Monday afternoon, May 8, at 4 o'clock in the presence of several of their near relatives. The newly married couple will make their home on a farm near Mentone. The Co-Op. News extends congratulations.

No Mystery

By use of the X-ray, says a professor, it is possible to ascertain the size and position of the core of a golf ball. You can do the same thing after some players have taken one swing at it.—Philadelphia Bulletin.

How Cat Always Alights on Feet When It Falls

A cat which falls or springs from a height, great or small, always manages to fall on its feet. That, we all know. This wonderful feat is made possible by the way the muscles of the cat are arranged, and the quickness of the cat's instinct for bringing them into play.

No matter how a cat is dropped, it is able to turn over in the air; it can so twist itself that its feet shall come in contact with the ground. But the cat must be in health and vigor, or the feat cannot be performed.

Scientists say that if men could master the secret of the cat they also would be able to alight on their feet when falling. There is no reason why human muscles should not be as effective as the cat's.

Many have seen men dive head foremost from a trapeze, turn somersaults in the air, and land safely. Others vault over the backs of horses, whirling round in mid-air as they go, yet dropping safely on their feet.

The secret seems to be the quick working of the mind; at any rate, scientists state that the ordinary man would have power to do as the cat does if he made up his mind quickly enough. Cats are the superiors of ordinary man in this and one can only wonder at the unerring grace and accuracy with which they come safely to earth.—Montreal Herald.

How Locations Are Found

How film producers obtain the use of some of the magnificent estates used in many pictures is common knowledge to the motion picture people. In many instances this is accomplished through the agency of the Assistance League of Southern California, a charitable organization sponsored by Los Angeles society women. The league maintains a film location bureau. Owners who could not be induced to permit their property to be used for any sum, will consent when the charity aspect is presented. Through the Assistance league, the studios pay the owner a certain amount for each day's work on location. Of the total sum, one-third is donated to the day nursery run by the league, while the remainder may be turned over by the owner to some charity in which he is interested.

How Black Friday Originated

The panic caused by the attempt to corner the gold market by James Fisk, Jr., and Jay Gould culminated in Black Friday, September 24, 1869. These men bought all the gold in the banks of New York city, amounting to \$15,000,000. The value rose steadily to 163 1/3, though the speculators had aimed to carry it from 144 to 200. In the midst of the panic it was reported that Secretary Boutwell of the United States treasury had thrown \$4,000,000 on the market, and at once gold began to fall, leaving Gould and Fisk with \$11,000,000.

Briefly Told

Birds with bright plumage do not always make good pie.

Black Leaf 40

Kills Lice

"Black Leaf 40" which has been used successfully over 20 years as a spray to kill insects on gardens, flowers and orchards has been found equally effective in killing lice on poultry.

NO HANDLING OF BIRDS

Cost is reduced—No work—Just paint tops of roosts lightly. The fumes kill lice while flock roosts. If your dealer does not handle send \$1.00 for trial package.

Why Word "Ye" Makes Hit

Can anyone explain the connection between the churches and that entirely mistaken idea that you can produce an antique effect by tacking the letter "e" on to the end of a word? What is it in rectories and vicarages which responds so enthusiastically to the use of the word "ye" instead of the word "the"? Are there any statistics to encourage the "manse" to believe that more money can be raised at "Ye (Old English Faire)—which is a bazaar containing nothing in any way reminiscent of any period earlier than 1800 (with the possible exception of the bath buns)—than by calling it a sale or a bazaar or even a fair? Yet suggest as you will that the program should be written in the English of the Twentieth century, you will find that a "ye" or an "olde" has been slipped in somewhere. Can anyone say why the word "ye" has come to be regarded as having a light, humorous and money extracting value denied to "the"?—Manchester Guardian.

Why It Is "Muscle" Shoals

The dictionary allows muscle as a variant spelling of the name of this particular shellfish. And the persons who named the shoals, or the map makers who charted them, spelled the word that way. Whatever one thinks of the spelling, the correct name of the place, and the one by which it is designated in all of the government proceedings concerning it, is Muscle Shoals.

Why Capital Faces East

Why the National Capitol faces east, with so much of the city of Washington lying behind it, is the fact that at the time the Capitol was built it was faced east because the city was intended to be built in that direction. However, property advanced so rapidly in price that many citizens bought in the opposite direction for economy.

Why Blue Discharges Were Given

Blue discharges were issued to certain soldiers for various reasons, namely: Surgeon's certificate of disability, fraudulent enlistment by reason of minority and release from service through dependency. In a great many instances these blue discharges can be replaced with honorable discharges.

Why Banks Use Red Ink

The use of red ink by many banks, particularly savings banks, to note the interest is simply a matter of convenience, the interest being more easily distinguished from the principal sums by being written in colored ink. Any color preferred may be used, or it is not necessary to use a different color.

Why Firefly Has Light

Little is known about the luminosity of the firefly, but it is believed to be for the purpose of attracting the male, the female being far more luminous than the male. The light, it is believed, is due to chemical action, and is under the insect's control.

The mill buys wheat, oats, corn.

STROKE FATAL TO L. COPLEN

Funeral Services Held at Baptist Church Friday Afternoon.

Death claimed Lorenzo D. Coplen, 77, Wednesday morning of last week at his home in this village. Mr. Coplen suffered a stroke of paralysis a few days previous which was the cause of his death.

The decedent, a retired farmer, was a member of the Baptist church of Mentone. His widow, Etta Coplen, three brothers, Alonzo Coplen, Rochester; James Coplen, Rochester; F. Coplen, Mentone, and one sister, Mrs. Taylor, of near Mentone, survive to mourn his departure.

Funeral services were held Friday afternoon at 2 o'clock at the Baptist church, Rev. Squibb, officiating. Burial was made in the Mentone cemetery.

SCHOOL BOOKS TO COST LESS

Parents to Pay Average of 15 to 18 Per Cent Less.

Parents will pay an average of 15 to 18 per cent less for school books for high school children during the next five years.

The state board of education, sitting with the governor, chose the text books and to save money they readopted eighteen old books and selected only eight new ones.

How Cold and Warm Air Brings Thunderstorms

There are two kinds of thunderstorms, according to Dr. W. J. Humphreys of the United States weather bureau, who tells how to distinguish them. The difference in the two kinds of storms is wind. One kind of thunderstorm happens only when the day is more or less windy. The other kind happens only at times when there is little or no wind. Both kinds, however, are created by cold air above and hot, moist air below. The warm air rises into the cold air where the cold condenses some of the moisture in the rising air, causing rain, lightning and other storm features. Where the difference between the two kinds comes in is in how these strata of cold and warm air are provided. The windy kind occurs when winds drive an upper layer of cold air across a layer of warm air near the ground, while the calm type usually happens when heating of the ground by the sun creates a layer of over-heated air which then rises into the cold air because it becomes lighter.

Sudden Death of Mrs. Lucinda Black

One of the Oldest Residents of
Mentone Expires at Home
of Grandson.

Mrs. Lucinda Black, aged 86, expired Wednesday evening of last week, at the country home of her grandson, George Black, at Doran station, an interurban stop, south of Mentone. Mrs. Black suffered a stroke of apoplexy, from which she never recovered.

The deceased had lived in and near Mentone practically all of her life. Her husband, John Riley Black, predeceased her in death about 15 years ago. Two sons, Charles and Allen, of near Mentone; three daughters, Mrs. Omer Igo and Mrs. Nellie Heighway, of Mentone, and Mrs. Readie Rickle, of near Sevastopol; one sister, Mrs. Readie Lattimer, of near Burket are the survivors.

Funeral services were held at the home of Omer Igo, at 2 o'clock Sunday afternoon. Burial was made in the Nichols cemetery.

How Pictures Are Classified

In the cinema, the different types of pictures have been classified variously. For instance, the Film Buyers' chart classifies them as follows: War and Air, Westerns, Mexican, Outlaw, Mystery Plays, Sea, Sports, Circus, Animal Adventure-Travel History, Marriage Family-Parental Devotion, Comedies, Musical Comedies Operas-Operettas, Underworld, Cabaret and Stage, Society Dramas, College, Thoughtless Youth, Newspaper, Racial, Hollywood, Wall Street, Royalty, Navy and Military.

How "Who's Who" Are Made

The standard of admission of notables into the publication called "Who's Who," divides the eligibles into two classes: (1) Those who are selected on account of special prominence in credible lines of effort, making them the subjects of extensive interest, in inquiry or discussion in this country and (2) Those who are arbitrarily included on account of official position—civil, military, naval, religious or educational.

How Much Government Costs

The late President Calvin Coolidge in the Saturday Evening Post, said: "The total cost of national, state, and local government was \$13,048,000,000 in 1929, a raise from \$2,919,000,000 in 1923. This was a difference in per capita cost from \$30.24 to \$107.37." Of the 1932-33 national budget 72 per cent of estimated expenditures was for war debts, war pensions, or defense.

Matter of Placing

Juxtaposition means "a placing close together, either side by side or in apposition." Contraposition means "a placing opposite."

THE LAST RESORT

A man whose son was an applicant for a position in the civil service, but who had been repeatedly "turned down," said: "It's hard luck, but Bill has missed that civil service again. It looks like they just won't have him, that's all."

Friend—What was the trouble?

Man—Well, he was kinder poor at spellin' and geography an' he didn't do too well in arithmetic.

Friend—What's he going to do about it?

Man—I don't know. Times are not so good for us, an' I reckon he'll have to go back to school teachin'.

Commercial Mystery

"These are wonderful trousers I'm wearing."

"They look very ordinary."

"But the wool came from Australia; English merchants sold it to a Scottish factory; it was woven in Saxony; made into a suit in Berlin, and—"

"Nothing so wonderful about that."

"No, the wonder is that so many people can get a living out of them when I have not paid for them."—Die Woche.

ACCOMPLISHED

"Hasn't Miss Oldgirl got searching eyes?"

"Well, I don't wonder at it, she has been looking for a husband for twenty years."

Different Situation

Strolling through a field with his sweetheart, Elmer Hamstring spied a vicious bull rushing madly toward them. Quick as a flash Elmer beat a hasty retreat.

Sweetheart (when they reached safety)—Why, Elmer, you were afraid and you said you would face death for me.

Elmer—I know I said that, sweetheart, but that bull wasn't dead.—Chelsea Record.

Sweet Forgetfulness

"Now, girls," said the restaurant manager, "I want you all to look your best today. Add a little extra dab of powder to your cheeks and take a bit more care with your hair."

"Why, what's the matter?" asked the head waitress. "Butter bad again?"

"No," said the manager, "the beef's tough."—Humgrist Magazine.

THREAT WRITERS HIT BY NEW LAW

Severe Penalties Inflicted on Conviction.

Chicago.—Effective use of the law passed by congress following the kidnapping and murder of Charles Lindbergh, Jr., which defines the mailing of threat letters as a felony, resulted in the conviction of one youthful Chicagoan and the prompt prosecution by federal authorities of an Evanston gardener, both of whom confessed writing letters demanding money and threatening death to members of prominent Chicago families.

The convicted youth, Walter J. Radavicius, eighteen years old, 914 West Eighteenth place, was sentenced to serve five years in the federal reformatory at Chillicothe, Ohio, by Federal Judge John P. Barnes. He had written a series of letters, demanding a total of \$18,000, to A. Weston Armour, Laurence H. Armour, and A. Watson Armour III.

Mrs. James A. Patton of Evanston, widow of the wheat king, was the intended victim in the second case. She received five letters, all demanding \$50,000 and threatening death if she failed to comply. From Axel Peterson, fifty-two years old, 1212 Elmwood avenue, Evanston, who is married and the father of three daughters.

The entrapment and arrest of Peterson, who then made a complete confession, was one of the greatest achievements of the Evanston police department in many years.

Peterson told Chief Freeman that he needed money to meet a mortgage on his home. This was later denied by his wife, who expressed amazement at what her husband had done.

Next day he was taken to the federal building. His bond was set at \$100,000 pending a formal arraignment. Assistant District Attorney Edward A. Fisher announced that he would be indicted soon and tried immediately afterward.

The attempt of young Radavicius to extort money from members of the Armour family was balked by a trap set by the Chicago police. Radavicius was not caught at the time, but when he realized he had narrowly escaped arrest he hid for several days in a railroad yard, then decided to surrender.

Dog Carries Puppy Two Miles for Aid

Columbus, Ind.—The loyalty of one dog to another was proved here when Shep, a large shepherd owned by Thomas McClure, carried Felix, a five-month-old spitz owned by David McClure, two miles after an automobile had broken Felix' leg.

As the dogs trotted along, Felix bounded into the street and was struck by an auto. Shep picked Felix up with his teeth. He carried him home, where the fracture was treated.

BASE BALL

Mentone Boosters 6, Laketon 2
Laketon with a nice ball team
came over Sunday and were defeated
by the score of 6 to 2.

The visitors allowed the home
team to get the jump on them in the
first inning. Pitcher Butler of Lake-
ton was a little wild to start, and his
support wobbled some. Mentone
took advantage of this temporary
flight and pulled a little daring base
running, and the result was three
runs. After the bad start the Lake-
ton boys played nice ball.

Geo. Smith was on the mound for
the Boosters, and breezed through
eight innings allowing only three
hits and one run. He pitched a
heady game, not allowing the visit-
ors to get a toe hold very often.
"Bill" Blue, the young High School
pitcher finished the game and did
very well also.

Nellans and Miller led the batting.
Each collected two nice hits that
helped along the scoring, for the
home team.

The 1933 team will be known as
the "Mentone Boosters." They look
at this time as if they will develop
into a stronger aggregation than last
years successful team. The addition
of the three Smith Bros. have bol-
stered up both the hitting and de-
fense. With Ray Smith we may look
like a cough drop manufacturer but
the opponents will find that it is a
ball team also.

Next Sunday the new Silver Lake
team will be here. They claim that
the team they have this year will
stack up with the best. They re-
cently defeated Laketon.

The home schedule is very heavy
with the best teams in Northern
Indiana. If the support of the local
fans come up to expectations, such
teams as the Hammond Indians, So.
Bend Studebakers, Fort Wayne
Colored Giants, will be seen here.

Ocean Cables

When laying cables sufficient slack
cable is paid out to insure that it will
follow the contour of the floor of the
ocean and actually lie upon the bed
at all points. The outside diameter of
the ordinary deep-sea type of cable is
about 1 inch.

Jokes and Eras

You get a fine slant on the social
background of an age if you just
know its conception of what jokes can
be told in the parlor. -Detroit News

ington Star.

Picture Forgotten 50 Years

After gathering dust in the cellar
of the Leeds art gallery, of Leeds,
England, for more than 50 years a
large picture has been found during
a renovation of the gallery. It shows
the martyrdom of St. Sebastian and
is believed to be the work of a Span-
ish master of the Seventeenth century.
It was exhibited in Leeds in 1875 and
afterward presented to the city.

Lucky Emblem

To decorate a horseshoe to keep as
a souvenir; Gild with gold paint; and
fasten above the door of your room,
taking care that the opening points up-
ward as this is supposed to "hold your
luck."

Mistakes

A life is great not by the measure
of few mistakes, but by splendid mas-
tery over all mistakes.
