A Free Publication

Names To Be Removed From The Mailing List

At the time we started publishing the Co-op. News about fifteen months ago our main object was to furnish this locality with an advertising medium in which the merchants as well as ourselves could advertise their wares.

We have now about one thousand on our mailing list who regularly receive the paper twice a month, which we know is the largest circulation any Mentone paper ever had.

It seems that the local merchants do not wish to advertise in the Co-op News, preferring to use handbills and post cards, which they claim bring greater results and are preferred by their customers to newspaper advertising. To be sure the merchants know their business and we cannot blame them for using advertising methods that bring the greatest returns for the money spent—that simply is a matter of business.

However, we know that our advertising has brought us business especially from the farmers but from the village inhabitants we cannot expect a great deal of business as the majority of the items handled by our organization are used by farmers only. The gross cost of publishing, mailing and postage on each issue is about \$40.00, or four cents a copy, and as fully ninety-five percent of our advertisements, as well as our own, are directed to poultrymen, stock men and farmers, it does not require a very wise man to see that mailing our paper to every family in the village of Mentone is a losing proposition to us and dropping the greater portion of the town list and increasing our farm list is simply a matter of good business. Consequently immediately after this issue is published the Mentone list will be gone over and the names of all who are not stockholders, regular advertisers or patrons of the mill will be dropped.

We are very sorry that we have to do this but we do not feel that we are called upon to donate one hundred and fifty dollars a year to a cause that does not bring in any result. In revising the Mentone list should we make an error and remove

a stock holder or patron of the association the same will be gladly rectified if reported to the mill and any new patrons will be added without charge. Anyone who is not a stockholder or patron can have their name placed on the mailing list for \$1.00 per year, which is just about the actual cost of publishing and postage.

In conclusion will say that as practically all of our advertising is directed to the farmer the honorable thing is to see that the advertiser gets what he pays for.

The Publishers.

Girl Scout News

Arbor Day! May 4! Everyone out to the first Arbor Day ever to be celebrated here. This striking event will take place at the School house at two o'clock. The program will be given by the Girl Scouts and your presence will be appreciated.

We are glad to be able to state that other troops have been started in this community after the beginning of the Mentone Troop which was the initial one. At present Burket is planning a troop which we hope will be as great a pleasure to them as our troop is to us. At our last meeting we were honored by the presence of Mrs. Cliff Eherenman and Mrs. W. C. Davis from Burket, who were interested in organizing a Scout troop.

Eight of our Girl Scouts, Mrs. Mollenhour, Mrs. Myers, and Mrs. Swick of our troop committee, Rosalind Mentzer, our leader and her assistant Eileen Mollenhour went over to Burket Monday April 23, to advance the interest in their troop. The meeting was held for the Mothers and their daughters interested in Scouting. Miss Mentzer spoke about Scouting in general.

Then the mothers who had accompanied our troop each gave a short talk telling something of what scouting had meant to their daughters. The Girl Scouts gave a demonstration of their horse shoe formation, folk dancing and good night circle.

During the summer months the Scout meeting will be changed from Thursday evening to Tuesday afternoon from two to four o'clock.

Tuesday afternoon the girls will work on their Tree Finder Badge.

Mentone High School Commencement

(By Evelyn Smith)

The class of '34 has broken all previous records. This class is the largest to ever be graduated from Mentone High. We are all proud of this class with its thirty-two members who have proved themselves worthy of receiving the diplomas.

At eight o'clock on the evening of April 19, the Seniors left behind them the joys and sorrows they had known at school and received proof of their ability to enter the world of competition.

The commencement was held at the Baptist church which was filled to capacity. Everyone seemed interested in the school and class. As the parents came in they were led to the reserved seats by the Junior Class Ushers. This section was roped off with ropes of blue and silver, Senior colors. A motto which read "Out of School Life into Life's School" was hung in a prominent position, above the platform and the front of the loft was decorated with ferns and plants. Then suddenly into this gay atmosphere came the strains of beautiful music. Everyone instantly became quiet to listen to the lovely music played by Mrs. Snyder and her orchestra. Soon the orchestra struck up a march which proclaimed the entrance of the graduates. Everyone was hushed and expectant. In filed the graduates escorted by Pauline Swick and Leo Lynn, officers of the Junior Class. How lovely the graduates looked! The girls wore gowns of every beautiful hue and the young men accented the pleasing effect in their stylish and appropriate suits. The Seniors were followed by the members of the faculty, the speaker, Mr. Myers and the county Superintendent.

Mr. Kelly introduced the speaker, the Rev. McMichaels.

Rev. McMichaels theme was "Moriarty is On Third Base". He compared the graduation day to third base in a base ball game; the Seniors have not reached home yet. They have not arrived home yet. They have not arrived to the place that counts up a score for their team. The parents have made a sacrifice hit

when they batted so that their sons and daughters could reach third base. Now it is up to the boys and girls themselves to get "home" (or success). To accomplish this they must have health, education and character.

Miss Rosalind Mentzer, the president of the Psi Iota Xi Sorority, presented the award given to the boy and girl of the class who throughout the four years of High School work, had maintained the highest average. This year the awards was given to Ruth Rush and Jack Bush.

Mr. Kelly then presented the class to Mr. Lewallen, County Supt., and recommended that they be graduated.

The diplomas were then presented by the County Superintendent to the following graduates: Vadis Elich, Wilma Grass, Arlena Janke, Georgia Jones, Margaret Lynn, Serita Kring, Ruby Molebash, Jaunita Newell, Ruth Rush, Doris Shewman, Gladys Shoemaker, Kathryn Snyder, Helen Vandermark, Ethel Witham, Mary Whetstone, Letha Yantiss, Guy Altenburg, Leonard Baker, Kenneth Barkman, Jack Bush, Charles Carter, John Doran, Harold East, Chauncey Emmors, Richard Greulach, John Miller, Rex Remy, Woodrow Shirey, Edward Smelser, Alfred Snyder, Junior Whetstone and Deloise White.

NOTICE

It has been erroneously reported that our organization has been availing itself of the facilities of the Mentone School Building for the purpose of serving meals to the Lions Club without paying for this privilege.

We wish to correct this report as our organization has paid to the Trustee the rental fee, as agreed upon, for each and every time that the building has been occupied by the Lions Club.

Go Forward Class of the Methodist Sunday School.

Piano Lessons:—Thirty-five cents. June Aughinbaugh.

W. F. M. S. MEETING

The Womens Foreign Missionary Society will meet with Miss Cora VanGilder Friday May 4. Mrs. Dr. Taylor is the program leader for the day. A good attendance is urged.

Mystery of Caroline's Double Kidnaping. Tied to a Tree Trunk and Left to Die. A True Life Tragedy in The American Weekly, the Magazine Distributed With NEXT SUNDAY'S CHICAGO HERALD AND EXAMINER.

CLASS PARTY

The Young Peoples Class of the Palestine Christian Church held their monthly party Tuesday night, April 24, at the home of Margurite Huffer. A short business meeting was held during which we tackled the painful task of choosing an appropriate name for this active group of young people. The effort proved too strenuous, however, and as a result the work

was left in charge of a committee of three, much to the relief of all. The committee wishes to announce to the public that they will be most grateful for any helpful suggestions.

After the business meeting games and contests were enjoyed. In some of these we were forced to use our wits, some our knowledge, some our common ordinary "Horse Sence", and some our sense of touch, sight, hearing, smelling and last but far from least, our sense of taste!

This party boasts the largest attendance since we were organized last December. Out of the twenty-four enrolled, seventeen answered roll call, and we were all happy to welcome six visitors who had flattered us with their presence. Those present were our hostess, Margerite Huffer, George Houck, Grace Bulgar, Owen, Eldon, Genevieve and Scott Horn, Mr. and Mrs. Carl Mahoney and family, Jessie Rush, Gail, Miles and Richard Morrison, Fern Rush, Helen Krauter, Genevieve Krauter, Bernice Egolf, Anna Green and visitors, Ray Christian, Carroll Eiler, Doris Shewman, Katherine, Alfred and Robert Snyder.

First Steamboat Had Sails
The first steamboat that crossed the Atlantic in 1819 had sails for emergency use.

WORM INFESTED PIGS

Cannot be thrifty pigs. Twelve worms will consume the value of a pint of shelled corn every 24 hours.

Call in your local graduate Veterinarian and have him worm these pigs. After this is done, give them free access to corn and all the Banner Hog Supplement they desire.

BANNER HOG SUPPLEMENT

Is giving wonderful results in this territory and we desire that you give it a trial. Dr. E. D. Anderson, of Mentone, has a wonderful working knowledge of this feed and will be only too glad to give you his ideas as to its merit. Dr. Anderson is a very capable Veterinarian and dietician.

Northern Indiana Co-Operative Ass'n.,
MENTONE, INDIANA.

TWO JUDGING TEAMS NAMED

Will Represent County at Annual Round-Up at Purdue.

A county livestock judging contest was held for the vocational agriculture pupils of this county to select the teams who will go to Lafayette, as participants in the annual Purdue roundup judging contests. School pupils who entered in the county meet were from Warsaw, Pierceton, Syracuse, Mentone, Beaver Dam and Elletts Green.

The highest individual honors in dairy judging were awarded to Paul Lott, Richard Eller and Paul Gates, all of Mentone. Others who were selected to judge other livestock were: Elden Horn and Herbert Clingenpeel of Mentone and Philip Lash of Beaver Dam. These two judging teams will represent Kosciusko county at the club "roundup."

Six classes of hogs, horses, dairy cows, beef cattle and sheep were judged at the county meet. Following the judging the pupils wrote out written reports in regard to agricultural work.

Jericho's Predecessors

Excavations at the city of Jericho, 15 miles from Jerusalem, indicate that four different cities have occupied the site.

Ancient Wheels

Monuments show that the wheel as used by the ancient Egyptians and Assyrians usually had six spokes; those of the Greeks and Romans had only four. They were generally constructed of wood and sometimes had bronze or iron tires.

Volcanoes in Lake Superior

Two extinct volcanoes have been found below the waters of Lake Superior.

Canada's Forests

The forests of Canada rank second only to agriculture in their contribution to the nation's production.

Ancient Irrigation System

Constructed hundreds of years ago by Mayan engineers of the ancient Mayas, a storage and irrigation system in the Yucatan area is to be restored and put back into service by the Mexican government. The intricate network of underground canals is said to be superior to that of the ancient Egyptians. Reservoirs of the system were lined by the Mayan engineers with waterproofed stone and plaster, as were the aqueducts, branch canals and drainage channels. Thus enough water was stored during the rainy season for use during the rest of the year.

More Eskimos

Far from being a disappearing race it would appear that the Eskimos are on the increase. It was estimated twelve years ago that the Eskimo population in Canada was some three or four thousand. The recent census has revealed that there are now nearly six thousand and every effort is being made by the government to make their lot happy.

Change in Turkish Trousers

Gone are the romantic baggy trousers as worn by Turkish men. A new national costume for the peasantry has been devised along western lines. It will consist of trousers, waistcoat, and coat cut on the European model, and must be strong enough to last the wearer four years.

Blind, Deaf Wear Warning

Blind or deaf persons in Germany wear conspicuous yellow armlets, on which is a triangle with large, black dots, resembling the road sign for forbidden traffic. Autoists recognize the armlet as a warning to be careful in passing the wearer.

Britain Needs Many Trees

If England continues to plant forest trees at the recent rate, experts say, it will require 180 years to make up for those cut down during the World war, when four-fifths of its forests were depleted.

Rare Metal in Desert Land

Tantalum, one of the rarest metals known to science, has been discovered in desert land near the Aral sea.

NOW WINDOWS CAN BE MADE OF SUGAR

Windows of houses, motor cars and other transparent articles may be made from treacle, a sirup obtained from refining sugar. An English scientist has developed a method which may prove one of the most important inventions for many years. At the present time the world produces more sugar than it can use for food, and one of the great problems is to know what to do with the surplus.

The invention, as described in London Tir-Rits, is a process by means of which crude sugar in the form of molasses or treacle can be converted into a substance as hard and as transparent as glass. It has, moreover, the valuable property of passing the health-giving ultra-violet rays which are stopped by ordinary window glass. The material can be blown, molded, or rolled, just like glass.

Though some people may be disposed to regard the idea of sugar windows as a joke, the invention is really no more amazing than others which have produced substances of great utility from unlikely materials. The buttons on your coat, for example, are probably made from milk. The shiny dials and knobs of your radio set are made of a material derived from carboic acid.

Salvage Wool in Waste

Waste clothes and rags can be turned into textile fibers for a second use by a carbonization process that recclaims all the wool, says Popular Mechanics Magazine. Vegetable matter, such as cotton and linen, is destroyed by hydrochloric acid fumes, but wool is undamaged. When a wool suit is held in the fumes a short time the cotton stitchings are reduced to brittle carbon compounds and the suit falls in pieces. Old clothes that have been dried carefully are placed in a huge air-tight cylinder, to which the fumes are admitted. In four hours the smartest suit is reduced to a pile of woollen cloth without a trace of cotton or linen fiber. After cooling, the rags are given a vigorous shaking in a machine called a duster. A grinding machine completes the operation by ripping each bit of cloth into fibers to use for new cloth.

The mill buys wheat, oats, corn. Poultry medicine at the Co-Op. mill.

Insects Converse in Notes

Ferret out your insect pests with a radio microphone! It can be done, according to an Oslo (Norway) professor, who has devised a special microphone that will make insect noises audible to the human ear by amplification through a loud speaker. Insects "converse" in notes so high that the human ear cannot hear them, but the super-sensitive electronic tube can do so and amplify them to audibility. There is a theory in some quarters that bees actually "broadcast" to one another on short waves even beyond the ultras, thus accounting for the fact that reconnoitering bees are shortly followed in "bee line" toward a source of honey by the bees of a hive in spite of the fact that the scout may be far out of sight of ordinary hearing.

Chemical Waterproofs Clothes

Treatment in a new chemical bath converts fabrics into waterproof material so that men's suits, women's dresses, hats and even sheer stockings may be made to shed water. So efficient is the process that a velvet dress or a man's suit can be immersed in a tub of water without getting wet. Not a drop of water is absorbed by the treated material. A flag with the chemical coating will not be affected by rain. In the aviation industry, the process will be used in treating the wings of a plane so that they will shed moisture, thus preventing the formation of ice. Fabrics immersed in the chemical are said to be unchanged in physical appearance.—Popular Mechanics Magazine.

Grapes Held Age Preventive

Live on a diet of grapes and raisins and the tartaric group of foods and eliminate those substances which bring old age. Thus declared a prominent English physician, at the recent harvest festival in Doddington, England. Today, he said, there was the dawn of a new life for the human race—a happier and longer life, a life free from disease and fuller in its capacity of brain and nerve power.

Well Trained

"Your mistress tells me, Jane, that you wish to leave us to become an attendant at a lunatic asylum. What makes you think you'll like it? What experience have you had?"
"Well, sir, I've been here three years."

Mother Knows

Little Boy—Mamma, what's a second story man?
Mother—Your father is one, dear. If his first story won't do he always has a second.—Kansas City Star.

Waste Not, Want Not

"Did ye hear about Sandy McCulloch findin' a box of corn plaster?"
"No, did he?"
"Yes—so he went and bought a pair of tight shoes."

Utah Has Many Birds

Beginning May 1st we will be located at 347 Greenwich Street.

MAPLE SYRUP TAFFY YARTY

Saturday, April 7th, the relatives, neighbors and friends of Uncle John Swick gathered about eight o'clock at the sugar camp in the woods on Uncle John's farm, about a mile west of Mentone for a taffy pull. There were forty-nine present to enjoy the festivities and hilarity.

Nearly one hundred eggs were boiled in one kettle and maple syrup in another. Several folks brought bread, buns, butter, salt, pepper etc. for a supper. Did they eat? Well, you should have seen them. The taffy came off at the proper time and such a scramble with hot wax was a sight to behold. After all had eaten and had plenty blisters to testify to their labors with taffy, short program was given.

Mr. John Gardinas was persuaded to sing in Mexican, his native tongue. John has a beautiful voice and the plaintive tones rang out in the dark of the woods, like a lover calling his mate. Then little Bobbie Mock sang several selections which showed unusual ability for such a little fellow. Miss Violette Shipley sang some Kentucky mountain songs and these were appreciated with ringing applause.

Since the camp fire was smouldering and the hour was growing late the gay party broke up.

Uncle John has farmed in this vicinity many years and made maple syrup almost every year. He is now eighty-five years of age, but young in spirit and enjoyed the party very much.

Those present to testify of the good time were: Mr. John Swick, in whose honor the party was held; Mrs. Martha Aikers; Mr. John Gardinas; Mr. E. C. Cox; Mr. and Mrs. W. C. Zelman and sons Carl and Wayne; Mr. and Mrs. Russell Walters and family; Mr. and Mrs. Lawrence Boganwright and family; Mr. and Mrs. Russell Norris; Mr. and Mrs. Silas Merridith; Mr. and Mrs. C. A. Fritz; Mr. and Mrs. Edward Kesler and family; Mr. and Mrs. Boyce Underhill of Marion, Indiana; Mr. and Mrs. Charles Emmons and family, also a guest; Mr. and Mrs. Cassel Whetstone; Mr. and Mrs. Alfred Mock and son, Bobbie; Mrs. Nellie Ball and family; Rev. W. A. Shipley and daughters, Violette and Anita.

Head Hunters

The head hunters, of which there are five tribes, are wholly subjugated, but some of them still practice their weird ceremonies, of which an enemy's skull forms the basis.

Boys Lead in Stammering
Eight out of ten cases of stammering among children are found in boys.

Shakespeare's Plays
William Shakespeare wrote 37 plays in all; of these 16 were comedies, 11 tragedies, and 10 historical.

Pigmies
The pigmies are a diminutive negro people of equatorial West Africa, having an average height of 4 feet 7 inches.

Finless Tail
The sea horse is the only fish which has a prehensile and finless tail equipped for grasping upright growths. This it uses in clinging to the seaweed which furnishes it protection from its enemies.

Mars, Jupiter, Saturn
Mars is 4,200 miles in diameter, and is about 141,000,000 miles from the sun. Jupiter is about 82,000 miles in diameter and about 483,000,000 miles from the sun. Saturn is about 67,000 miles in diameter and about 886,000,000 miles from the sun.

Some Snakes Hatch Own Eggs
Not all egg-laying snakes bury their eggs in the sand and let the sun do the hatching. The python is one that takes care of the incubating itself by coiling around the clutch until the young emerge. The pine or bull snake performs in the same manner.

Marriage Age in Turkey
The legal marriage age for women in Turkey is seventeen.

Carved Pyramid Sundial
The carved pyramid of Tenayuca, in Mexico, was used as a sundial by the ancient Aztecs.

Dustless Tomes
In this brave world of ours, not even the heaviest and most learned tomes are permitted to gather dust. A library in Washington is equipped with a suction device mounted on a cart so that it may be rolled from rack to rack to draw up the dust from the shelves and tops of books.

Kentucky an Indian Word
Kentucky is an Indian word variously explained as meaning "at the head of a river," "river of blood," "dark and bloody ground." Kentucky, an Indian hunting ground, was explored by Daniel Boone in 1769 and was settled at Harrodsburg in 1774. It was admitted into the Union in 1792.

Barnum's "Egress" Trick
One of the best stories told about Barnum was the way he would clear a tentful of spectators to make room for another crowd of paying customers. A hole would be made in the canvas and the notice stuck up, "This Way for the Egress," and the curious folk would pour out to see this unknown, strange bird.

FRANCES RUSH, Secretary

Political Announcements

For Trustee Harison Township
Subject to the decision of the Republicans at the primary on May 8th.

Have been a resident of this township for nearly thirty years and believe I am familiar with the most of the problems of the taxpayers and administration of township affairs. Your support will be highly appreciated.

C. O. EILER

FOR COUNTY ASSESSOR, Republican Ticket.

I will greatly appreciate your support at the Primary Election to be held Tuesday, May 8th. I am seeking the nomination for county assessor on the Republican ticket.

HARVEY McCLEARY,

Wayne Township.

Compass-Minded

The ringed plover, of Great Britain, points its four eggs exactly to the points of the compass. It is said.

THIS AND THAT

Wealth is of the heart, not of the hand.

Habits are at first cobwebs—at last, cables.

Don't want a great deal and you can be thrifty.

Mere force of will may often save a doctor's bill.

"The oyster never opens his mouth unless forced."

He who strives to do does more than he who has the power.

A man with a homely face is slower to get the swelled head.

Somebody has aptly said: Don't stir up trouble—just let it burn.

Rheumatics are people who have short circuits in their sockets.

The average woman knows how to manage her daughter's husband.

A man's idea of reform is to stop the government from wasting money.

About the time one develops the greatest skill, his vitality may give out.

If men bet on the horses of a merry-go-round, it would only be like roulette.

If a rabbit were as high spirited as a cat, it would refuse to be put in a silk hat.

Few people seem to care what we are here for, but thinking about it is an interesting pursuit.

Power is dangerous and to a great many people extremely disagreeable. They don't want power.

Why did Indians practice scalping? Because that's what they did with all other fur-bearing animals.

Weather doesn't interfere a great deal with the plans of the young, but it wrecks those of the old, be it hot or cold.

Tell your troubles to the doctor, the minister, the lawyer. Those helpful professions are instituted to listen to troubles.

Americans are not the only ones among the peoples to stand in line and take their turn. Democracy is pretty well spread over the earth.

The Samoyed Dog

In his native countries, the Samoyed dogs born in higher altitudes were always pure white, while those born farther south were of various colors resembling the Newfoundland. In winter, the color of their nose changes from black to brown—returning to black with the approach of warm weather.

New Treatment for Roundworm

You can't expect to make a profit from birds infested with worms. Use this new way to kill Roundworm. "Black Leaf" Worm Powder mixed in mash. Easy, economical and convenient. No handling of birds.

Single Treatment Does the Work

No toxic effect on birds. Doesn't interfere with production. Odorless, tasteless, concentrated. A scientific control. Nicotine released in intestines. Kills worms, saves time, trouble and bother. Write for prices and free literature. Ask Your Dealer. Tobacco By-Products & Chemical Corporation, Inc. Louisville, Kentucky
Member of N. R. A.

100 Bird Treatment \$1. Shipped postpaid if you mention your dealer's name.

ALSO PELLETS

For individual treatment of birds. A few free with Worm Powder.

YEAST FOAM EGG MASH

Made by N. I. Co-Op. Ass'n. will put your birds in fine condition to produce MORE EGGS, HEAVIER EGGS, BETTER IN EVERY WAY.

Eggs produced on Animal-Poultry Yeast Foam Mash Feeds are being sold as Yeast Foam Health Eggs. They are a thicker, heavier egg and go much farther in baking than ordinary eggs.

These yeast feeds build and maintain the vitality of the birds which means better results, better health all down the line. Try them and be convinced.

Chicago, Illinois.

Foreign Letter Received

Below is a letter received by the members of the Palestine Christian Church from the heart of Africa. It was written by Donald H. Baker, who some may remember as having given an address in Warsaw three years ago. This letter was quite interesting to the members and they thought it might be of interest to the community. You will note that the letter is dated Feb. 25 and it arrived in Burket, Indiana April 20. Following is the letter.

Disciples of Christ Congo Mission Congo Belge. W. C. Afrique Mondombe, February 25, 1934.

Dear Friends of Palestine Christian Church:

In these difficult times a common need draws us closer together and closer to Him who is our Leader. May we, Your representative, share with you as never before, our accomplishments and aspirations as we labor for His Church in Africa.

As you know in 1920 the Disciples pressed on into the heart of Africa and established their furthest mission post here at Mondombe, 1500 miles from the west coast and almost on the equator. At that time there was no other missionary organization, very few teachers and still fewer government officials in this vast territory. We were in reality working with an untouched heathen people whose knowledge, morals and social organizations were as primitive as their blacksmith tools and their earthen pots.

That the thirteen years of effort have yielded a rich harvest is shown by our forty-five out-stations with a preacher-teacher at each one, by the thousands of baptisms, by the number of boys who seek to enter our boys' house that they may live with us and may go to school, by the increasing thousands of annual medical treatments, evidence of a growing confidence in our skill and our motives, and most of all by the change in the lives of those who have been under the influence of Christian teaching.

Among these outstanding preacher-teachers is a consecrated young Christian who grew up in the mission school and later graduated from our Congo Christian Institute at Bolenge. He is working among the thousand workmen of one of the three big coffee plantations of our region. Among his activities are three schools daily, a large class of candidates for baptism, and the preaching and the direction of his church of several hundred members. Not content, they in turn conduct services each Sunday in a number of the nearby villages, and through their offerings contribute to the support of another teacher.

How we wish that the number of

such leaders were greater. It means years of schooling and patient training, and the constant and careful guidance of white missionaries. Unfortunately, our six stations plus the Institute, instead of receiving reinforcements last year, actually suffered a loss of four missionary families and four single women. We look eagerly for their return, though few of them know when travel money will be available.

Yet a huge untouched area lies beyond, unoccupied, awaiting another mission station or occupation by the Catholics. Patients constantly come to our hospitals, eight, nine or more days of travel seeking relief from their tumors and diseases. How they beg us for a doctor and teachers near their homes.

Our teachers constantly implore us not to cripple their work by reducing numbers. We say "But there is no more money." Naively they ask "When will your blacksmiths start making their coins?" It is difficult for them to understand world financial conditions, and that whereas a year ago we were receiving 36 francs for one dollar, we now receive but 22 francs. On top of a drastic cut in our appropriations from home you can readily see what this means to our work. Teachers have been reduced from 60 to 45, students from 60 to 30 and boys in the station dormitory from 75 to 30.

Confident that your prayers and efforts will be directed toward an unprecedented effort in the cause of Missions in these difficult times, and especially on Children's Day, we are,

Sincerely yours,
Lelia B. Baker
Donald H. Baker, M. D.

ATTENDS CONVENTION

About 30 members of the Christian Church at Palestine attended the sixty-seventh convention of Kosciusko County Council of Christian Education held at Spring Creek Church of the Brethren, Thursday evening April 26. The following program was given.

Song Service and devotions, Young People of Spring Creek.

Music, Spring Creek Mixed Quartette
Congregational singing of songs thrown on a screen (conducted by) Frank Saunders of Claypool.
Play, Young People of Mt. Pleasant Church.

Musical Program, Manchester College Students.

Duet, Rush Sisters of the Palestine Christian Church.

Dismissal, President of Council, Seward Poor of Etna Green.

Men one had the honor of having the largest delegation present.

Do You Get Yours?

It takes 2,100 pounds of foodstuffs a year to feed the average person.

Helen Wiley Is Now Mrs. C. Cole

From Bourbon News Mirror

A very pretty wedding took place last Sunday, April 22nd, 1934, at the home of Mr. and Mrs. Edward Wiley, when their daughter, Helen, became the bride of Mr. Charles Cole, of Chicago. They were attended by Miss Martha Wiley, sister of the bride and Mr. O. I. Britton of Chicago. Rev. Virgil E. Squibb, pastor of the First Baptist Church of Mentone, an uncle of the bride, performed the single ring ceremony, and sweet, little Mary Caroline Squibb carried the ring in a white lily. The wedding march from Lohengrin, was played by Mrs. Irene Squibb, the bride's aunt. The bride was charming in a gown of pale green satin and carried a bouquet of Talisman rose buds. The bridesmaid wore a gown of light blue satin and carried pink roses.

After the ceremony the couple left for Chicago where they will live at 1717 So. Mich. St. The bride is a graduate of the Bourbon schools class of '33. The bridegroom is the son of Mr. and Mrs. C. B. Cole, of Mentone, he is a graduate of the Mentone schools, a young man of fine character, a student of the Cress Wright School of Aviation, in

Chicago, and at present is employed by the Cribben Manufacturing Co., in that city.

Those present at the wedding, besides the parents of the bride and groom were: Mr. and Mrs. Samuel Mentzer and Robert Cole of Mentone, and Mrs. C. E. Wiltrout of Winona Lake.

We can not refrain from congratulating the groom, for his bride often has assisted the News-Mirror in various ways and we always found her lovely to be about the office. She is indeed charming, demure and methodical and will be an ideal wife. We wish them both unalloyed happiness during the whole of their life.

Girl Scout Regional Conference

Three members of the Girl Scout Troop Committee, Mrs. Geo. Myers, Mrs. C. O. Mollenhour and Mrs. Cora VanGilder and the leaders of the troop, Miss Rosalind Mentzer and Eileen Mollenhour attended the Girl Scout Regional Conference which was held in Peoria, Illinois, April 26 and 27. There were five hundred women present from Illinois, Wisconsin, Michigan and Indiana which comprises the great Lake Region.

The conference was held in the Marquette Hotel in Peoria. The Girl Scout program was discussed from every angle, camping, badges and awards, lone troops, finances, publicity, games and folk dancing and brownies. The discussions were led by members of our national and regional staff and much help and inspiration was received.

A Regional Dinner was held Thursday night. At this time we

were privileged to hear Mrs. Walter Cavanagh give a description of the inside workings of our national office which is located in New York City. Then our national president, Mrs. Frederick Edey was presented to the group. She paid a very lovely tribute to our founder, Juliette Low. It was her privilege to know Mrs. Low personally and her description was very inspiring. She reminded us of the courage and fortitude it had taken for Mrs. Low to go about the county helping organize Girl Scouts when it was something no one had ever heard of or even imagined. However due to Mrs. Low's perseverance and foresight, the Girl Scouts were organized and the result is the organization which we have today that stretches from Canada to the Gulf and the Atlantic to the Pacific with over 300,000 active members.

BAKE SALE

I am having a bake sale every Saturday at Clarks Store from 10:00 a. m. to 2:00 p. m. Special orders will be taken anytime before Friday. My list will largely consist of cakes, pies, cookies, cottage cheese, chicken and noodles, salads, butter and cream. Winifred Swick.

PALESTINE NEWS

Mrs. Henry Secore, who has been on the sick list is improved.

Miss Helen Vandermark is working at the Paul Wright home in Warsaw.

Mr. Joe Vandermark and Clyde Zerbe of South Bend were callers at the Edison Vandermark home Friday afternoon.

Bryon Eherenman who is staying with his daughter, Mrs. Turner Boggs remains about the same.

George Droud is on the sick list.

Five Former Winners Will Try Luck Again In Indianapolis 500-Mile Race on May 30th

INDIANAPOLIS, Ind.—Led by a youthful veteran driver who has twice won the annual 500-mile race and, who has been national automobile racing champion three times, five former winners will be back on the bricks of the Indianapolis Motor Speedway on May 30th.

Louis Meyer will lead the hurrying pack in quest of a portion of the \$100,000 in aggregate prize money. Meyer won the Decoration Pay event first in 1928 and repeated in 1933 to equal the long-standing record of the famous Tommy Milton who won in 1921 and 1923. Meyer was also national champion in 1928, 1929 and in the racing year of 1933.

An old familiar face which will be

new to many spectators this May day will be Peter De Paolo who drove to a record-breaking victory in 1925, setting a record of 101.13 miles an hour which stood for six years. De Paolo is racing to Tripoli, Africa, on a 10,000-mile round trip which will bring him back to Indianapolis in time for the race.

Fred Frame, consistent campaigner, winner in 1932, will be back for another try as will Louis Schneider who was victor in 1931. Schneider raced in South America throughout the winter.

From out of the past will come L. L. Corum, joint winner with the late Joe Boyer in 1924 for a come-back attempt.

WEDDING

Beltz-Moon

Calvin V Beltz of Mentone and Mrs Rhoda R. Moon of Tippecanoe on Wednesday, April 25, were united in marriage at the home of Rev. H. V. Deale at Plymouth. The single ring ceremony was performed. They will be at home to their friends after June 1 at the home of Mr. Beltz in Mentone.

Local Eggs Win High Honors

For the past several days there has been a display in the show window at Clark's Store, two lots of eggs, produced on the farm of C. O. Eiler, which were exhibited at the Annual Egg Show at Purdue University May 2-5 1934.

The eggs were entered in the High School Students Class by Richard Eiler. One dozen received 1st prize in this class with a score of 96.4% and a \$2.50 cash award, also second Sweepstakes cup.

The second dozen was awarded second prize in the same class with a medal as a prize and a score of 95.7%.

CLUB NEWS

The Mentone Home Economics Club held a very interesting meeting at the home of Mrs. J. M. Weissert on Thursday p. m. May 10. Members responded to roll call with sentiments honoring their mothers.

The leaders discussed the lesson received May 9 at Warsaw, after which the club members served the meal which they prepared according to the April lesson.

Five guests were present and several enrolled as new members.

Eggs Scrambled

Ninety thousand eggs were scrambled and cooked in one operation when a truck and a semi-trailer enroute from Indiana to New York city upset and caught fire on the Lincoln highway.

Two hundred fifty cases of eggs, each containing 30 dozen, were destroyed when the trucks wheels caught on the pavement edge while passing an automobile. The loss was estimated to be more than \$1300. Smoke and stench from the conflagration hampered traffic for hours.

Many local poultrymen whose eggs were on the truck are still waiting for their egg checks and the New York receivers are still waiting for the eggs, thus the 900 mile spread of egg wreck.

The mill buys wheat, oats, corn. Poultry medicine at the Co-Op mill.

MENTONE NEWS

Mrs. Yantiss is having her house re-roofed.

Mrs. Pete Grubbs has been quite ill the past week.

Mrs. Clyde Delano of Pierceton called at the home of her mother, Mrs. Rose Morrison Wednesday afternoon. Her daughter Margaret, who has been visiting Mrs. Morrison returned with her.

Chewing Mechanic Now Leaves Tobacco Home

INDIANAPOLIS, Ind. — J. W. "Jigger" Johnson, colorful riding mechanic, will leave his chewing tobacco in the pits when he rides in the 500-mile race this year. It almost cost his driver victory in a previous contest.

Johnson, a short, wiry chap as nervous as a bucket of worms, will sit beside pilot A. B. "Deacon" Litz in the Decoration Day classic at the Indianapolis Motor Speedway on May 30.

It was back in 1931 that "Jigger" left off tobacco-chewing while at work. He was riding with Louis Schneider. Billy Arnold had been leading all day and setting his usual terrific pace. At 400 miles Billy went through the wall and shortly afterward Tony Gulotta, who had succeeded Arnold as leader, spun in the oil of the Arnold wreck and went out of the race. Shortly afterward Schneider found himself out front, headed for victory. He steadied down to a safe pace which would bring him in.

"Jigger," elated with the prospects, popped a nibble of tobacco into his mouth. Shortly afterward, a few drops of the brown juice smeared Schneider's goggles. It looked like oil.

"What's leaking! What's leaking!" screamed Schneider, reaching for the breaks, prepared to stop.

"Just my mouth," replied "Jigger."

Schneider's discourse on chewing tobacco immediately after the race was not recorded.

Capital of Finland

Helsinki is the Finnish and hence the official name of the capital city of Finland, formerly known by its Swedish name of Helsingfors. The city is located in the extreme south of Finland on the Gulf of Finland, immediately opposite Tallinn, the capital city of Estonia.

Deep Salt Mining

Salt is mined 400 feet below the surface of the earth and deeper; beds from 200 to 400 feet thick are found.

SATURDAY, APRIL 28.

AS to our financial standing, ask your own bank for references.

Beginning May 1st we will be located at 347 Greenwich Street.

Indians Played Football

The Ohio Indians played football before the dawn of the Nineteenth century, the men lining up against the women. Not allowed to touch the ball with their hands, the men had to catch and shake the women, and throw them to the ground if necessary to separate them from the ball. The men dared only to kick it once it was freed from the lady's grasp. It was not uncommon to see a herculean squaw struggling down the field holding firmly to the ball. At each end of the field were stakes six feet apart through which the ball was carried by the women or kicked by the men—for a touchdown.

First Use of Paper Money

Paper money has performed an important part in the history of these United States. Adopted as a matter of necessity, and not from choice, by the Massachusetts Bay Colony, in 1690, it was gradually issued by other colonies until in general use by all. It was the original intention of the colonies to have it equal current coin, but depreciation took place, followed by succeeding issues of paper money, until it became practically worthless.

Advances Cosmic Rays Theory

Exploding stars that burn with a fire equal to 100,000,000 suns for six days and then are reduced from a diameter of 500,000 miles to little spheres fourteen miles thick are the cause of cosmic rays, an authority states.

Long Hard Road

Unofficial claims have been made that Illinois State Highway 121, between Casner and Chrisman, a distance of 46½ miles, forms the longest straight stretch of hard road in the world.

Invention of Compass

The origin of the compass has been attributed consecutively to the Chinese, Arabs, Greeks and Etruscans, but it is not absolutely certain how far these accounts are correct. The invention of the compass was partly due to the discovery that a lodestone or a piece of iron which has been touched by a lodestone will direct itself to a point in a northern or southern position, depending on its position north or south of the equator.

Corn in China

Corn, native to American continents in the western hemisphere, was grown in China long before it was grown by the English settlers at Jamestown. A photostat copy of a Chinese book published in 1573 reports that maize or Indian corn, there called "imperial grain," had been grown in China for years, and that it had been introduced from the west by way of Tibet or Turkestan. The indications are that the Spaniards discovering maize in the New world took home the grain from South and Central America, that the Arabs carried it from Spain to Mecca, and that it then spread eastward through Central Asia to China.

When There Were No Chairs

Chairs did not come into general use until the Sixteenth century. Prior to that the chest, the bench and the stool were the seats of every day life.

Primitive Musical Instruments

More than 2,000 musical instruments made by primitive tribes are in the collections of the Smithsonian Institution.

First to Use Postmarks

According to the Stamp Collectors Fortnightly, the first postmaster to use postmarks in Boston was Tuttle Hubbard, a stepson of Benjamin Franklin's brother, John Franklin, who assumed the office of postmaster in 1756. He was the last of the Crown postmasters in Boston.

Edison as Newsboy

Thomas A. Edison was about twelve when he applied for and received the concession to sell newspapers on the Grand Trunk railroad between Port Huron and Detroit. In Detroit he had a daily wait from about 10 in the morning to the late afternoon, much of this time being spent in the Detroit public library. This work lasted from 1859 to 1862 when he was given a chance to learn telegraphy. He sold candy and fruit on the train, published a weekly newspaper and operated two stores with the aid of boy friends during this period. His mother died in 1871.

London's Largest Reservoir

London's largest reservoir, situated at Littleton, measures four and a half miles round its banks, and could provide ample anchorage for a fleet of battleships.

No Eggs Alike

The gullmoot stands alone among birds for the variety of coloration it achieves in its eggs. No two birds produce eggs alike, it is said. They may be almost any color from white, cream, brown, claret and red to any shade of blue or green and may be marked with spots or blotches in one or more different colors.

Daniel Boone

Daniel Boone was a man of culture. In his day, as in the present, disinclination to mingle in congested social haunts could not be interpreted as a sign of illiteracy. Lincoln was one of the men who depended on few books, but those the best that the human brain has produced.

Germans Prefer Goose Fat

Goose fat is highly regarded by many races. It is largely eaten in Germany in place of butter—particularly by Hebrews, as its use on bread, for example, is permissible with meat, whereas it is a violation of the Talmudic law to eat butter and meat together. It is also valued there, and elsewhere, for many culinary operations.

PALESTINE NEWS

(Delayed from last issue)

Miss Lissa Goshert remains in a very critical condition.

Mr. and Mrs. Edison Vandermark and son Paul spent Monday and Tuesday in Indianapolis.

Mr. and Mrs. Ray Wiltrout and daughter Doris, Mr. and Mrs. Edison Vandermark and son Paul, and Cart Shirey spent Friday evening at the Jess Jones home.

Sunday April 22nd the married Peoples Class of the Palestine M. E. church met at the home of their Sunday School Teacher, Hubert Shilling and completely surprised him. At the noon hour a cooperative dinner was served to about 35 guests. They all departed at a late afternoon hour wishing him many more happy birth days.

Invented Cellophane

Cellophane was invented by J. E. Brandenberger, a Swiss chemist, born in 1872. It was first manufactured by a French company. Candy boxes and cosmetics were among the first to appear in the transparent material.

"Black Leaf 40"

Kills Lice

"Black Leaf 40" which has been used successfully over 20 years as a spray to kill insects on gardens, flowers and orchards has been found equally effective in killing lice on poultry.

NO HANDLING OF BIRDS

Cost is reduced—No work—Just paint tops of roosts lightly. The fumes kill lice while flock roosts. If your dealer does not handle send \$1.00 for trial package. 100 Bird Treatment \$1. Shipped postpaid if you mention dealer's name. Tobacco By-Products & Chemical Corp., Incorporated, Louisville, Ky.

To Electrocute Bugs

A Viennese physician has perfected two inventions for electrocuting millions of insect criminals. The inventions will be invaluable in the tropics. The first is the creation in parts of a mosquito net of an electric field which is harmless to animals and mankind and uses practically no current, yet instantly kills every insect which comes in contact with it. The second invention is one to attract and electrocute the insects in the open. As it is usually the males which enter houses this apparatus will do special execution among the females.

Dog and Cat Plutocrats

Red, a shepherd dog of uncertain ancestry, and Peanuts, a cat whose ancestry is even more uncertain, recently walked the earth the richest couple in dog-and-catdom in Chicago. Red and Peanuts were made beneficiaries from a \$20,000 trust fund left by their mistress, Mrs. Alice Hunter, to provide her pets with the choicest bones. Upon the animals' deaths the money will be divided among the Anti-Cruelty society, a dog refuge, the Orphans of the Storm, and the Home for Destitute and Crippled Children.

Light Sheds Death

Cities having improved street illumination show a better record of automobile accident experience than those with inferior street lighting, according to a survey comparing the number of deaths and per capita cost of street illumination in 227 American cities, which have a total population of more than 40,000,000.

Whale Meat Extract to Be Sold

Whale meat extract promises to come on the market in Norway as the result of a new process for making extract for soups and other uses. The extract is taken from whale meat brought in by the Norwegian whaling fleet. Its cost of production is said to be 3 cents per pound.

More Study!

"What is your idea of money?" "I'm not prepared to answer," said Senator Sorghum, "I still have a lot of studying to do in the higher mathematics and psychology."

Pull a Gun

The mill buys wheat, oats, corn.

"L & M" Semi-Paste Paint

CUTS PAINTING COST

"L & M" PAINT is made of lead and zinc which are the expensive ingredients of a fine paint.

The lead and zinc are ground in only enough linseed oil to make a soft creamy semi-paste.

All you do is to stir in sufficient linseed oil to make it ready for use.

You save money because you do not pay the manufacturing and handling costs on the linseed oil as you do when you buy a ready-for-use paint.

EXAMPLE:

1 Gallon Semi-Paste Costs - \$2.45

3 Quarts Linseed Oil Costs - .68

Based on oil at 90c per Gal.

This makes 1 $\frac{3}{4}$ gallons of
Ready-for-use paint for } \$3.13

Cost Per Gallon - - - \$1.79

You stir the oil into "L & M" PAINT in three minutes
It has proven its economy and durability since 1852

On the market for over 80 years.

Longman & Martinez, Paint Makers, N. Y.

BANNER HOG SUPPLEMENT

Either fed in a self feeder, and ear corn free choice, or mixed with 700 pounds of corn and 200 pounds of middlings, makes a little pig ration that is hard to surpass.

Bring us 700 Pounds of Shelled Corn—

We will furnish 200 pounds of midds and 100 pounds of Banner Hog Supplement, to make you a perfectly balanced ration for brood sows and pigs. Brood sows receiving this ration from the birth of the pigs until they are weaned, assist materially in getting the pigs on an early market.

Free access to the above ration, produces a large milk flow in the brood sow. See us today in regard to this Hog Supplement. IT WORKS.

CAMEL TEST IN 1856 RECALLED IN TEXAS

Daughters of Confederacy Mark Site With Plaque.

San Antonio, Texas.—In a remote and still sparsely settled section of Kerr county, Texas, stands an old stone ranch house, in the shadow of which a simple ceremony recently revived an almost forgotten chapter in the military and economic history of the United States.

The old ranch house was not always such. Once it was the officers' headquarters building at Camp Verde, an important military post on the Texas frontier. Reputedly laid out by Robert E. Lee, later commander in chief of the Confederate army, but then a United States colonel of cavalry in Texas, Camp Verde became famous as the home of the government camel herd imported from the Levant during the administration of Jefferson Davis as United States secretary of war.

Crumbling ruins of the camel "khan," or pen, part of whose dome walls were sixteen feet high, remain near the ranch house as evidence of the experimental use of humped beasts from the Near East in American military and commercial transport.

Dedicate Plaque.

In the recent ceremony the United Daughters of the Confederacy, division of Texas, dedicated a bronze marker commemorating what is left of Camp Verde, whose hallowed walls are linked with the past presence of such men as the illustrious Lee and Albert Sidney Johnston.

History records that Camp Verde, or Fort Verde, as it also was called, was established as a military post on July 8, 1856. It is sixty-five miles north-west of San Antonio.

The old fort was captured by Confederate troops on February 28, 1861. As quoted in "Texas Camel Tales," written by Chris Emmett of San Antonio, Lieutenant Hill of the Confederate forces reported that among other things captured at the post were "eighty camels and two Egyptian drivers." Jefferson Davis, when secretary of war in 1855, obtained a \$20,000

congressional appropriation for the camels, and Maj. Henry Constantine Wayne, who went to the Levant for the animals, brought the first ship-load via old Powder Horn (Indianola), Texas.

75 Were Imported.

The first cargo of thirty-four camels—seventy-five were imported in two shipments—was unloaded on May 13, 1856, at Indianola, the Texas port which long ago was swept away by a gulf storm.

Although employment of the army camels actually included use in the pursuit of Indians, their outstanding uses were in Lieut. W. H. Echols' reconnaissance of the Texas Big Bend section (near the Rio Grande) with a camel train in 1859 and, prior to that, Lieut. E. F. Beale's camel expedition to California in 1857 to survey the "Great Wagon Road" over a southern route. Incidentally, the Southern Pacific railroad later was built practically along that route, and the advance of the steam locomotive was one of the developments that discouraged continuance and extension of camel transport. But during the Civil war camels carried Confederate cotton—two bales to the camel—to the Mexican border at Brownsville, returning with salt from salt lakes near the Gulf coast.

After the war private owners acquired the government camels, Bethel Coopwood buying sixty-six at \$31 a head at San Antonio in 1866. Use of the animals in private transportation enterprises, however, did not prove profitable. Eventually many of the camels found their way to circuses; others strayed off or were turned loose.

Moon Farming

Moon farming, says the United States Department of Agriculture, has no support from any scientific point of view. Most of the beliefs associated with moon farming are not based on the assumption that direct moon light is especially potent, but rather that the moon exercises some mysterious and occult power over mundane affairs. Even the light and heat from the moon are not sufficient to affect plant growth materially. The moon does not govern agriculture because it has no appreciable influence on any of the major conditions affecting the growth of plants.

Girl Scout News

The girls are all working fast and furious to get their First Class Badge. The last meeting we had map making. When you just say "Map Making" it doesn't sound very interesting but it really is very engrossing. We make them by the amount of paces we take to a certain place and by noticing what is on either side of us. This is where mathematics comes in good and several of us regret our forgetting them. (And we have to make our maps all by ourselves!)

On the afternoon of May 4 the Girl Scouts gave a program on the school grounds, celebrating Arbor Day. The public was invited and the Girl Scouts from Akron and Burket were also our guests. First on the program was a song "Trees" by Mary and Lola Mollenhour, Avis Underhill and Pauline Swick. A paper on the origin of Arbor Day was given by Lova Bush. Rev. DeWitt gave an exceptionally good talk on Arbor Day. Then came the planting of our tulip tree. The hole was already dug for us and Sam had provided us with two buckets of water. We had a bottle which Charlene Latham had prepared. In it was a paper on which was written all the names of the Scouts. The bottle was put in the hole with the tree. One of the girls held the tree upright and three of the girls started slinging dirt like professionals. After the tree was planted we sang a song and closed with prayer. At the present there is much question as to whether the bottle was broken by a stone in the dirt but we hope not anyway.

Church Built of Bones

Malta has the ugliest church in the world, the Chapel of Bones, in Strada Mercanti, Valletta. The architecture in this gruesome chapel is comprised of the bleached remains of those originally buried in the adjoining burial ground. The altar has a background of human skulls and crossbones and the arch above it is rendered in semi-circular rows of skulls.

Maine Recalls Old Trades

The business of manufacturing "shanks," or wooden reinforcing for shoes, was for a long time the most unique Maine industry. Another odd industry for Maine is the collecting of "knees" used in boat building for the construction of stems. This is really mining, as the knees are the long tap roots of the hackmatack.

Lake Champlain

Lake Champlain is chiefly in the United States, between New York and Vermont, but has its northern end six miles within the Canadian boundary within the Province of Quebec. Its extreme length from north to south is about 125 miles and its breadth is from 1/4 to 15 miles. Its total area is 600 square miles.

IF YOU WANT TO GET MORE FOR YOUR MONEY

Harry Hartz Makes Business of Racing

INDIANAPOLIS, Ind.—The best business man in automobile racing—Harry Hartz—will be back to take his cut at the \$100,000 in aggregate prize money at the Indianapolis Motor Speedway on May 30.

Hartz, who rode the bricks himself for many years, is expected to have one or more cars in the annual 500-mile race here.

Never first, but often second, Hartz drove himself in for \$40,000 in cash from the Speedway alone not counting the thousands made in prizes and accessory money.

Hartz retired from active competition shortly after the 1927 race following a leg injury received at another track. However, he owned the car which Billy Arnold drove to victory in 1930 and the winning Fred Frame car in 1932. His two cars failed to finish last year.

MENTONE NEWS

Alva Creviston is moving his old house away and preparing to build a new one.

Mr. E. S. Lash who submitted to an operation some time ago is slowly improving.

Rev. and Mrs. DeWitt spent a few days last week at their cottage at Webster Lake.

Mr. and Mrs. George Nellans spent Sunday at the home of Mr. and Mrs. Grover Tinkey.

Mr. and Mrs. Max Tucker spent last week end with the latter's father, Mr. James Gill.

Mr. and Mrs. C. E. Goodwin spent Mothers Day with the former's mother, Mrs. Jennie Goodwin in Whanatta.

Mr. and Mrs. Mont Snyder and family of Crystal Lake entertained the following guests to Sunday dinner, Mr. Fred Olds and brother Billy of Warsaw, Miss Jessie Rush of Mentone and Mr. James Guy of Chicago.

Wendell Anderson who is attending Indiana Medical School in Indianapolis spent the week end with his parents, Dr. and Mrs. E. D. Anderson.

Mrs. Pearl Blue of Chicago who has been visiting friends in Mentone returned to her home Sunday. Her granddaughter Elaine Sullivan returned with her.

A Century of Progress Souvenir Edition FREE with the Sunday Chicago Herald and Examiner of May 27th: Here is Just What You Will Want—a complete Daily Listing of Special Events for the Month and Many Photographs:

Blind Man Looks After His Own Vegetable Plot

Rochester, N. Y.—Undaunted by the fact he is totally blind, William Easton of Rochester supports a wife and six-year-old daughter. To do this he has turned jack-of-all-trades.

Most outstanding among his many efforts to keep the family larder full is his role of truck farmer.

Although hemmed in by the boundaries of his own small yard, Easton managed to raise enough vegetables this year to be the envy of the neighborhood. Unaided and entirely on his own initiative, he tilled the soil, laid out 20 rows of corn, planted tomato beds, and finally brought to fruit a bumper crop of carrots, beets, squash, and many other vegetables.

In his own way, he proudly "watched" the garden grow. Every morning he felt the tiny sprouts with his sensitive fingers.

His wife, who is partially blind, explained her husband planted the garden by means of stakes and cord, using these as a guide for his spade.

Indians Attend Tribal Dances in Limousines

Fairfax, Okla.—Osage Indians recently celebrated the sixty-first anniversary of their trek to Oklahoma to establish the Osage nation on the "bad lands."

Accidentally the "bad lands" turned out to be resting on rich pools of oil and the Osages became a wealthy nation.

Today, though many have squandered their wealth and much has been lost to unscrupulous whites, they still drive their large limousines to the tribal dances celebrating their march to the Oklahoma territory.

Science and Life

Science approaches the question of the meaning of life by way of its physical concomitants; philosophy from the point of view of consciousness.

Garfield's Famous Remark

James A. Garfield used the expression "God reigns and the government at Washington still lives," in addressing a crowd from the balcony of the New York customs house following the death of Abraham Lincoln.

**UNDER
THE OLIVER FLAG**

**The Oliver Trade Mark
Is Your Protection**

The Oliver Trade Mark is moulded into the metal of every genuine Oliver Chilled Share.

The trade mark is always clear and distinct if the share is a genuine Oliver. It is never blurred. It is never hard to read.

Oliver genuine Chilled Shares are made in the same factory where your Oliver Plow was made. The only way to get Oliver service from your Oliver Plow is to use a genuine Oliver Share.

We are authorized Oliver Dealers "under the Oliver Flag" and sell genuine Oliver shares.

First to Issue Stamps

The first ten countries to issue postage stamps were: Great Britain, May 1, 1840; Brazil, July 1, 1843; United States, August 3, 1847; Mauritius, September 21, 1847; France, January 1, 1849; Belgium, July 1, 1849; Bavaria, November 1, 1849; Sax'n, January 1, 1850; New South Wales, January 1, 1850; and Victoria, January 5, 1850.

Navajos' Weaving Art

The Navajos are believed to have learned their weaving art from captive Pueblo women about the middle of the Eighteenth century.

Navajos Have Prayer Rugs

The Navajo Indians have what are called prayer rugs. There is a custom among the Navajos of weaving into certain rugs sacred symbols with symbolic meanings. Other tribes have sacred objects which consist of pads or bundles containing a hodge-podge of symbolic articles.

Animals That Chew Cud

Animals that chew the cud are called ruminants, and the division of the animal world to which they belong is called the Ruminantia. Among the ruminants are the oxen, sheep, goats, antelopes, giraffes, deer, chevrotains, camels and their close relatives.
