## THE EGG SHOW GREAT SUCCESS

Despite the short time in which the Mentone Egg Show was advertised, as was predicted, it turned out to be one of, if not the largest of its kind in the United States. The program on Wednesday evening and Thursday afternoon presented speakers and authorities on poultry equal to any in the whole country.

The largest banquet ever to be given in Mentone or surrounding towns was the main attraction on Thursday night. Following an afternoon of addresses by Professors Card and Moore of the University of Michigan and Dr. Parkhurst formerly head of Poultry Husbandry Dept. of England and entertainment by the WLS Entertainers, the evening program came to the banquet at 7:00.

Our 80 foot tables were placed on the playing floor of the gymnasium and attractively decorated. In addition there were the speakers tables. When the banquet was ready the ropes were removed and quickly 400 people sat down to await the serving of the food which was efficiently done by the ladies and gentlemen of the Harrison Center Church.

Favors of paper hats, balloons, whistles and pencils kept the banqueters happy. The affair carried much the suggestion of a metropolitan merry making.

Following the banquet the speaker of the evening, Joe A. Andrews, of Purdue was introduced by Hobart Creighton, toastmaster, and gave a short address on farm life and opportunities on the farm. Following the address the WLS Entertainers comprised of the Ozark Sisters, the Harmonica Boys and Tom Corwin, gave the evening performance which the audience of upwards of 1000 people appreciated in no small manner.

When came the awarding of prizes to the different classes of entries. And it appeared that a little child should lead them, for Lowell Knoop, a mere youngster had entered not only the best dozen in his class, but also took sweepstakes, entitling him to the rotating trophy in his class, the sweepstakes trophy and the \$35.00

bicycle as first prize in the class. Following the awarding of premiums the audience was dismissed from the biggest event of its kind ever held in Mentone.

Prize winners of the event were as follows:

Class No. 1—Commercial Class, White.

First prize, Lynn Culp, Warsaw; 2nd, Ora Beeson, Elma Green; 3rd, Mrs. Loren Mort; 4th and 5th, M. S. Kissingner, Piercetown.

Class No. 2—Farmers' Class, White

C. L. Teel, 1st, Mentone, \$10 and rotating cup; Mrs. Ida Blue, 2nd, \$8; Jerry Robbins, 3rd, \$6; Edward Kimes, 4th, \$4.

Hatcheryman's Class.

Hoosier Egg Farm, 1st, \$10; Ora Beeson, 2nd, \$5; M. S. Kissingner, 3rd, \$3.

High School Class.

Robert Eiler, 1st, \$10; Mary Alice Mosier, 2nd, \$8; Wayne Nellans, 3rd, \$6; Fern Rush, 4th, \$4; Tom Ebbinghouse, 5th, \$2.

Grade School Class, White.

Lowell Knoop, 1st, cup and bicycle; 2nd, James Beeson, Elgin watch; 3rd, Irwin Knoop, pen and pencil set; 4th, Dale Byrer, \$4; 5th, Avonella Blue, \$2.

Brown Eggs.

Ralph Tumbleson, Atwood, 1st, \$7.50; Mrs. Maude Vandermark, 2nd, \$5; Mrs. Ed Boggs, 3rd, \$3; Morris Dunnick, 4th, \$2; Mary Alice Long, 5th, \$1.

Sweepstakes, All Classes.

Lowell Knoop.

\*\*\*

Championship cups were donated by Creighton Brothers of Warsaw and Kurtin & Kurtin, New York, produce brokers. All the trophies are rotating and must be won by the same person three times before possession becomes permanent.

Largest egg prize went to Mrs. Herbert Anglin, Mentone on an egg weighing four and three-fourths ounces. Carl Eherneman, Burket, exhibited the smallest egg, so small no scale would weigh it at the show, and the freak egg prize went to Zeph Huffer, Mentone, on an egg that appeared petrified.

The prizes were awarded by Geo. Boone, freight agent of the Winona railroad.

It is expected that the egg show will continue to be an annual event, and judging from the interest shown this year, next year's show will draw the largest crowd ever to witness an exhibition of this kind. It was estimated that nearly 2000 persons attended the show while in session.

## O. B. Deaton Barn Burns Monday Night

Fire of undetermined origin completely destroyed the large barn on the O. B. Deaton farm north-east of Meitone about 9:30 Monday evening. Upon going to answer the telephone Mr. Deaton discovered his barn on fire. He rushed to the barn and released his horses which were tied in the barn. About 300 laying hens which were housed in the barn were destroyed. Considerable hay and fodder was also burned.

Some insurance was carried on the property. It is estimated that the loss was \$4000 to \$5000.

Assistance was rendered by neighbors and the Mentone fire department, which pumped water from a nearby stream and kept the fire confined to the barn. At present it is not known as to what the plans are as to rebuilding.

Mr. Deaton has been very unfortunate in the matter of fires inasmuch as this is the third barn he has lost by fire on this farm in the last few years.

### The British Empire

The British empire covers about one-fourth (13,290,634 square miles) of the habitable land surface. This does not include the Arctic regions. According to the best estimates the population of the British empire is more than 486,733,450, about one-fourth of the inhabitants of the world.

### Faith Without Works

The faith that does not throw a warmth as of summer around the sympathies and charities of the heart, and drop invigorations like showers upon the conscience and the will is as false as it is unsatisfying.

## FIRST SESSION OF EGG SHOW

The Mentone Egg Show sponsored by the Egg Producers of this section got under way as scheduled. In the afternoon of Wednesday exhibits of eggs were received and up until 10 o'clock Wednesday evening. Over 200 entries were made in the contest for the fine cash prizes and also the boy's and girl's class in which a \$35.00 bicycle and \$25.00 wrist watch were main attractions.

Promptly at 7:30 the program opened with a stringed quartet from Warsaw playing familiar popular selections. Following this F. L. Kesler acting as chairman of the evening session introduced Leon Todd of Purdue University, who spoke on "Practical Methods of Improving Egg Quality". Mr. Todd stressed the fact that to maintain the reputation of good egg quality, the quality must be maintained the year round. Now is the time of year when warm weather is approaching and will cause havoc with the eggs if they are not properly taken care of. He stated that if egg quality can be increased until there is a price differential of two cents per dozen it is well worth the effort in any flock. Mr. Todd with the aid of a helper gave several pictures through the use of slides illustrating his talk.

Two things he emphasized were to not top the cases with large eggs and leave small ones in the bottom, and to mark the eggs actually as they were, for the buyer cannot be deceived and the seller loses rather than gains.

Mr. Kesler then asked Hobart Creighton to introduce the next speaker and Professor Carrick of Purdue University gave an interesting talk on the influences tending toward egg size and profit in the flock from egg production. From a series of charts he demonstrated that egg size varies with the individual bird in different parts of the laying period. He also showed that the big job is with the hatcheryman and not with the average farmer in producing quantity of eggs, inasmuch as heavy egg production is a product of breeding more than a product of feeding everything else being equal. He emphasized that birds which have an earlier sexual maturity were the more profitable to raise. He also explained many terms used in the poultryman's language, such as intensity, pause, broodiness, etc. Broodiness, he said, was a product of breeding and for that reason could be bred into a flock or out of a flock according to the matings made. Again he emphasized that the problem of produc-

tion is with the breeder rather than with the feeder.

Ora Beeson was asked to introduce the next speaker and in so doing Mr. Beeson introduced Edw. Van Tassel of New York City as a descendant of Katrina Van Tassel, who had left Sleepy Hollow and gone to New York. That Mr. Van Tassel had left Sleepy Hollow there was no doubt for he is a wide awake merchant interested in better egg production to the mutual advantage of the farmer and the seller. Mr. Van Tassel stressed the reason why California Eggs dominate the New York market and he made it quite clear that quality in eggs counts. Packaging is one of the most important factors after quality and he urged that a system of attractively packaging eggs should be employed here at Mentone.

J. H. Busswell of Kalamazoo, Mich., was then introduced by Leon Todd, and gave a fine talk which held the audience even though the hour was late. He told one story which carried a lot of punch. It seems that in a certain insane asylum it was the custom to have one guard in charge of about twenty-five inmates while out on the grounds. To an observer it appeared peculiar that the guard was unarmed, carried no club and had no means of protection. Upon inquiring of the guard he said "Aren't you afraid these fellows will get together and gang on you?" To which the guard replied, "That's why they're here, they don't know enough to get together". The meeting was then adjourned until the Thursday sessions.

### Amazon Wide in Places

The Amazon is navigable for 3,000 miles, the distance between New York and London. In many places it is so wide that it looks more like a sea than a river. With its numerous tributaries it comprises the greatest river system in the world.

### First Pipe Organ

The first pipe organ in America was built by John Clemm, of Philadelphia and New York. In 1737. It was installed in Trinity church, New York city.

### Geysers Caused by Volcanism

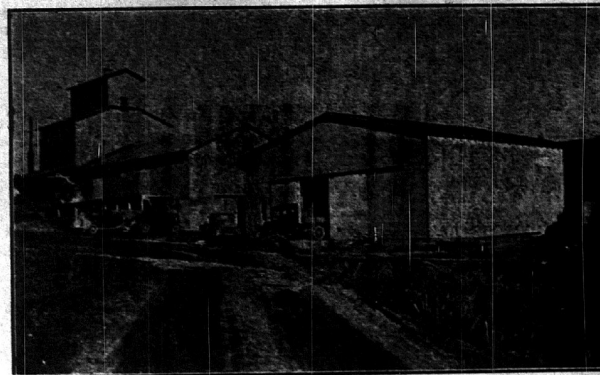

The geysers in Yellowstone National park were caused by volcanism. There has been no active volcanic action of the explosive type in this region since the Great Ice age.

### Jud. Funkins' Mistakes

Jud Funkins says every time he makes a mistake he finds it divided up among misguided folks who hope to profit by it.

### Red Strongest Color

Red may be seen at greater distances than any other color.

## PERSONALS

Mrs. Paul Smith and daughter Barbara, and Miss Elain Sullivan are visiting in North Manchester this week.

Mr. and Mrs. Rupert Weirick and family have moved to the William Brown farm south-west of Mentone.

Reward: To the finder of a purse that was lost at the egg show banquet Thursday night. B. A. Rush.

Mr. and Mrs. Elmer Darr and family have moved into the Laird property on North Broadway.

Mr. and Mrs. Earl Kern have moved into the home they recently purchased from Ira Campbell.

Mrs. Wade Whetstone has been ill at her home the past week.

For Sale: Timothy hay at the Eaton farm, north-east of Mentone. Mrs. Levi Eaton.

Mr. and Mrs. Frank Warren and Miss Maxine Wideman are visiting Mr. and Mrs. Stanley Wise, of near Fort Wayne.

Mr. I. F. Snyder visited his son Mr. Sheridan Snyder, of Grand Rapids, Michigan, over the week-end.

Mrs. Fred C. Rush and daughters, Jessie, Fern and Mrs. Dale Plew, and son Robert, spent Thursday afternoon in Warsaw.

Rev. and Mrs. Johns, former pastor of the Christian church of Mentone, and daughters Miriam and Sandra are visiting Mr. and Mrs. Vance Johns.

Mr. and Mrs. F. R. Burns and daughter Jean returned Friday from New York where they have been for some time.

The infant son of Mr. and Mrs. Emory Huffer was able to be removed from the McDonald hospital Monday, to their home east of Mentone.

Don and Bobbie Herendeen visited in Warsaw last week.

Mrs. Kenneth Riner returned Sunday, April 26, from Washington, D. C., where she was page of the forty-fifth Continental Congress of the National Society of D. A. R. She was one of the six pages from Indiana.

Mr. and Mrs. Songer and family spent last week-end in Veedsburg, Indiana visiting the formers parents Mr. and Mrs. Manford Songer.

### Belgian Heaviest Horse

The Belgian is the oldest and heaviest of draft breeds. It has been bred as a pure-bred draft horse since 1770 A. D. It is older by 25 years than the English thoroughbred. It was created and developed in Belgium. It is a descendant of the old Flemish war horse. Weight: 1,700 to 2,500 pounds. The type is broad and lowset; the musculature is powerful. Preferred color is chestnut. Browns and bays are frequent. Red and blue roans are common. The government of Belgium gives financial help to its breeders. Many importations have been made to the United States.

### The Divining-Rod

When the divining racket was at its height in the Middle ages, says Collier's Weekly, the dowers not only claimed that they could locate underground water, minerals and treasure, but also stolen property, missing persons, dead bodies and criminals. Furthermore, they not only used twigs and metal rods but also knives and forks, scissors, candle snuffers and even the sausage known as knackwurst.

### Oldest Species of Tree

The oldest species of tree in the world is the ginkgo, or maidenhair. It has existed essentially unchanged for more than 10,000,000 years. Moreover, the ginkgo grows very slowly, many trees having required as long as 75 years to mature and grow fruit.—Edith Pulver, New York City, in Collier's Weekly.

### Lunar Tides in Atmosphere

Tides are produced in the air by the moon. They are not as easily observed as the tides in the ocean which are due to the same cause but they can be detected if observations are carried over a sufficiently long period, says a writer in the New York Herald-Tribune. This is possible by the extensive records maintained at the Dutch observatories at Batavia, Java, for a period of more than 60 years. Temperature and pressure readings taken every hour are available. The lunar tides in the atmosphere cause changes in pressure and the alternate compression and expansion cause temperature changes.

### Highest Point in Michigan

The highest point in Michigan is Porcupine mountain, Ontonagon county, 2,023 feet.

## Free Movies Again For This Summer

Free movies will again be given in Mentone this summer. In the past good sized audiences have attended these showings.

It is understood that the proposition of free movies financed by the local merchants met with opposition in some quarters. It was said that some merchants felt the return on the investment was not substantial enough to justify the expense. Whether or not that is the case it appears that small town and city merchants fail to see the way in securing business.

If one will stop to think that in a given area, say 500 square miles of territory there is just so much business during the year, it then becomes a problem to centralize that business in one location, say Mentone.

Regardless of argument in the matter if it were not for two businesses conducted here, Mentone would be dangerously close to being a dead issue. These two are the Mentone Bakery and the NICA. The first named business is privately owned and the other is co-operatively owned, yet, both are highly successful. It then resolves itself into merchandising methods rather than set-ups.

We are not condemning free movies. Of themselves they are a fine thing. But as a permanent business getter they are much the same as using cough syrup for tuberculosis.

There are at least a half dozen groceries in Mentone, enough to supply a territory of 500 square miles, all doing some business and getting along. But in the territory served by Mentone, values and service have become a part of the lives of the people, and when the people feel that Mentone is offering these two things they will buy here regardless of movies, concerts or what have you.

It is time, although merchants here are offering values equal to those in many places, to think and think hard for some fine day another Burns will come to town or something else, with a lot of pep and then the argument as to whether the co-operative or the independent method is right will be of no consequence.

It is quite true that if either of the organizations mentioned were to cease for one week hundreds of people would notice the effect. Yet, there are many people who, because these businesses are successful, feel either a streak of jealousy or resentment. There will always be that class of individuals who are looking for some business to fail in order to say, "I told you so".

It is no idle statement that all the

bread sold in Mentone would not pay the salaries of the men who live here and work for the Mentone Bakery. Which means that Burns is going out after business and bringing money into this town to pay his men. We are not attempting to advertise either business mentioned but it appears to us that something is going to happen to make Mentone a great trading center, and those responsible for so doing will profit by their action.

## PSI IOTA XI

Beta Epsilon chapter of Psi Iota Xi sorority held pledge and initiation services for Mrs. Emma Clutter at the home of Mrs. Elizabeth Myers Friday evening, April 24.

After the initiation ceremony two tables of bridge progressed. First prize was awarded to Mrs. Elizabeth Myers and second to Miss Annabel Mentzer.

Other members present were Mrs. Louise Chinworth, Mrs. Lena Eaton, Mrs. Pauline Riner, Mrs. Milton Reed, Miss Thelma Harris and Mrs. Senora Hoover were guests.

Refreshments were served at the conclusion of the games.

## BIRTHS

A baby daughter was born Tuesday morning, April 28, at the Woodlawn hospital to Mr. and Mrs. Robert Reed of Mentone. The infant weighed six and one-half pounds and was named Janet.

## Seniors on Outing

The senior class of Mentone High School visited Indiana State Park at Turkey Run, Tuesday. They were accompanied by Mr. and Mrs. Arlo Fraizner and Dale Kelley, principal.

## ECONOMICS CLUB

The Mentone Home Economics Club met with Mrs. Linnie Vernetto on April 16, 1936, for a pot-luck dinner.

Roll call was answered by "Your favorite receipt." "Brighten the Corner Where You Are" was sung and creed repeated.

An invitation from the Beaver Dam Club, for Child Health Day, on May 7, was accepted. All members wishing to go are to meet at Lennier's store at 12:30.

The mystery package was won by Otis Swick.

Members to contribute to the auction for May are Linnie Vernetto, Helen Weirick and Lydia Sanders.

Twelve members, one visitor and three children were present. Next meeting will be with Mrs. Mabel Alexander, on May 21.

## Speed Kings to Aid Road Safety Drive

INDIANAPOLIS, Ind. — Speed kings will preach safety to motorists of Indiana this year.

Co-operating with the Governor's committee on public safety for the State of Indiana, T. E. "Pop" Myers, for 25 years general manager of the Indianapolis Motor Speedway, is enlisting the services of the nation's greatest race drivers to spread the message of sane driving among the general public.

"If the ordinary motorist observed the good judgment and courtesy that race drivers put into practice in the annual 500-mile race at the Speedway each May 30, we would have practically no trouble on our highways today," says Mr. Myers.

"Some people think that the race driver is tearing about the track, willy-nilly and in a hurry to get to the end of the competition, but such is not the case. The good driver knows exactly where he is going all of the time and how best to get there. He never passes another car unless he knows exactly what that car is going to do in the turns and he always moves over when another car wants to pass him, regardless how keen he is on victory. You never find race drivers in trouble on the highway because they know the danger of aimless driving and never do it. I am sure the boys can do considerable good in assisting in the public safety campaign now being directed by Governor Paul V. McNutt.

**Gannets, Large Sea Bird**  
Gannets, large sea birds, subsist on fish which they catch by plunging into the water with closed wings, often from a considerable height. Because they compete with the fishermen, when large flocks congregate over a fishing ground, some boats tow an imitation herring, made of wood, which the birds attempt to stun by a high dive—and break their necks.—Collier's Weekly

**Statue on Capitol Dome**  
The statue on the dome of the Capitol in Washington was modeled by Thomas Crawford in Rome, Italy, from plans approved by Jefferson Davis, senator from Mississippi, who was chairman of the committee on Public Buildings in 1850.

## Stuns Companion to Save His Life

Cairns, Queensland.—The life of a man saved in the interior of Queensland by a friend who had to stun him to attend to his injuries.

A South African engineer and scientist, Capt. A. J. Kenrick, and Leslie Shearsby, were traveling together in a motor lorry. Shearsby was struck by a low-hanging tree bough. The impact threw his head back, fracturing the spine near the base of the skull.

Captain Kenrick was forced to stun his companion before he could administer first aid. Shearsby was brought to a hospital here by wagon, lorry and airplane.

## DEVICE THAT SLEW 54 NOW IS DOOMED

Contraption at Connecticut  
Prison to Be Replaced.

Wethersfield, Conn.—Fifty-four times in 40 years the simple but deadly hanging machine at Connecticut's state prison has snuffed out the life of a convicted murderer.

But when the man doomed as its fifty-fifth victim "swings" the only such machine of its kind in the country is doomed to extinction.

Operated by a system of weights and pulleys, the machine will be replaced by the electric chair as specified by the legislature.

But it remains in the death house. Its temporary lease on life ending when John Siembroski, convicted of killing a New Haven policeman, pays the supreme penalty.

In 1894 the machine became the sole instrument for legal executions in Connecticut, replacing the gibbet.

Its most notorious victim was Ger ald Chapman, public enemy No. 1 of the early twenties.

When a doomed man enters the high-walled death chamber from the little door leading to the death cell, all he sees is the rope with its hangman's knot suspended from the ceiling. The rope passes through a partition. Here a mechanism connects it with a 900-pound weight which is held in check by a ratchet wheel. A small button on the floor controls the wheel.

But pressing the pedal gives no warning. The 300-pound weight falls to the floor with a hollow thud. The victim on the noose is jerked into the air and dropped with a jerk. The machine has never failed. It is calculated the machine breaks a man's neck twice. In contrast to usual hangings where a victim falls through a trap door.

## NO FOOLIN'! Uncle Sam KNOWS why Tydol is different

YOU can't fool your Uncle Sam. He found out that Tydol Gasoline also contained a special lubricant and carbon-solvent. So Uncle Sam

taxes Tydol twice . . . once as a gasoline and once for the lubricant it contains. But you pay nothing extra for Tydol, the lubricating gasoline that cleans up and speeds up your motor's valves . . . gives you more power and more mileage.

BUY TYDOL...THE LUBRICATING GASOLINE

**Former Winners Have Chance to Set  
New 500-Mile Race Records May 30th**

INDIANAPOLIS, Ind. — Four former winners are scheduled to start the 24th running of the annual 500-mile automobile race at the Indianapolis Motor Speedway on May 30 and at least two of them have the opportunity to make racing history.

Kelly Petillo, ex-truck driver who set a new average of 103.24 miles per hour in his victory drive last year, may be the first pilot to win successive races. The "King of the Ridge," a sobriquet the smiling young Italian picked up while driving a fruit truck over the difficult ridge route in California, will be a favorite in this year's race if he elects to step out as fast as he did last year.

Louis Meyer, only active two-time

winner of the Decoration Day classic, with victories in 1928 and 1933, may become the only three-time winner if he gets the fortunate wave of the checkered flag at the end of his day's work. A consistent but daring driver, Meyer is always a serious contender.

Wild Bill Cummings, winner in 1934, came within striking distance of first place last year, pulling in a good third. Most popular of the young drivers, he will carry short odds.

The veteran campaigner, Fred Frame, who won in 1932, is also scheduled to be present and can always be counted high up in the money if his motor holds together.

**Portrait of Franklin on Stamps**

The five-cent United States stamp of 1947 bears a portrait of Franklin after a painting by Longacre. All other stamps bearing portraits of Franklin are needles from hists.

**Discovery of Oxide**

French zinc oxide was invented by LeClaire, a French painter. Titanium oxide was discovered by Rosal, a French chemist working with Barton, an American chemist, at Niagara falls.

**"Skin of the Teeth" Exists**

The "skin of the teeth" really exists. It is a delicate membrane that can be separated from the human tooth enamel, which it helps to protect.

**Beau Geste**

Beau geste means beautiful exploit, beautiful feat or beautiful gesture.

**Invented Spun Glass**

Spun glass is the invention of the Venetians.

Poultry medicine at the Co-Op. mill.

**Don't Break the Mirror**

Breaking a mirror will bring misfortune.

**Early Dayton, Ohio**

There were only five families residing in Dayton, Ohio, when the town was made the county seat in 1803 at the same time the county was organized.

**"Hello Street"**

Surlwongse road, in Bangkok, is known as "Hello street" by the English colony there, as that is the greeting which the women who live in the street call out to every male passerby.

**Pompeii's Destruction**

At the time of Pompeii's complete destruction, A. D. 79, about 2,000 persons perished. It is believed that the entire population was about 20,000.

**Milton Did Not Earn Much**

The poet's greatest biographer, David Masson, says: "Until Milton was thirty-two years of age, if even then, he did not earn a penny for himself."

**Get the right finish  
for your Linoleum!**

Keeping your kitchen and bathroom linoleum in good condition all the time is an easy task, provided you have the right finish for the particular linoleum, and the proper instructions for applying it. We have both for you and will welcome an opportunity to show them . . . to help you make your linoleum last longer, look better, and always be easy to clean.

**New!**

**O'BRIEN'S LINOLEUM LACQUER**

The ideal finish for inlaid linoleum. This lacquer is of a new type, heavier in body, longer wearing and so perfectly clear that it will not discolor the palest linoleum pattern. Easy to apply, dries hard in 10 minutes. A quart covers a 10 x 12 kitchen.

**85c**  
per quart

**New!**

**O'BRIEN'S LINOLEUM VARNISH**

The ideal finish for printed linoleum or inlaid linoleum which has been previously varnished. Extra, extra pale in color, full bodied, long wearing, waterproof, dries hard in 4 hours and is very easy to apply. Covers 600 sq. ft. per gallon.

**85c**  
per quart

### Wild Bill Cummings Misses Lucky Seven

INDIANAPOLIS, Ind. — A big seven is a lucky number for Wild Bill Cummings but last year he tried to make it the "hard way."

In 1934, Bill had a nice big seven on his car when he drove it to victory in the 500-mile race at the Indianapolis Motor Speedway but by the very virtue of his victory, he lost his favorite numeral.

Car numbers are allotted at Indianapolis according to the championship rating of the drivers. Cummings being national champion earned and was required to use No. 1. The former Indianapolis bundle-boy was in a blue funk. He wanted his favorite No. 7 but Lou Moore voted that die't and couldn't switch it even if he so desired.

Bill eyed the tail of his car sadly as the official sign painter inscribed a two-foot No. 1 upon it. It was the number everyone would have been proud to carry but it didn't spell luck to Cummings. Then the whistle blew and the number artist went to lunch. Bill seized a small brush and at the base of the figure one, very small and faintly, he put "+ 6."

But, as the gamblers say, he was trying it the "hard way" and Bill finished third in the race last year but second in national standing. This year he must carry No. 2 with, perhaps, a small "+ 5."

#### Important Musical School

The School of the Netherlands, known also as the Belgian or Flemish school, which flourished about 1300, was the most important musical school during the last of the Middle ages.

#### Value of Eloquence

"Eloquence," said Uncle Eben, "is liable to deceive de man dat has it. He 'casionally 'magines folks is agree-to' wif 'im when dey's only keepin' quiet for fear of spollin' a purty talk."

#### Grave Creek Mound Largest

Grave Creek mound, a prehistoric earthwork near Moundsville, W. Va., is the largest of the conical type of mounds in the United States, having a basal diameter of 320 feet and a height of 70 feet.

## Kosciusko County Has High Rank

It was recently announced from Washington, D. C., that Kosciusko County stood second among the counties in the United States on poultry and egg production. This is an enviable honor and explains in part why the farmers of this county were not so hard hit during the past few years or as commonly called the depression.

In regard to position in the state of Indiana Kosciusko County was 30 per cent ahead of any of the others, putting her far in the lead.

There is not much doubt but that Kosciusko County will maintain her position of second place in the Nation, and it is not too much to expect that eventually first place honors will be ours.

No other place in the county can claim the position of being the egg center as can our town of Mentone, which logically gives us the right to claim our town as among the first centers of egg production in the United States. Why this has come about should be easily recognized. Perhaps the willingness of hatcherymen to help their customers has tended to grow more chickens. It may be the swapping of ideas among poultry raisers. An important factor could be an abundance of feeds suitable for poultry being grown here. Many factors have contributed, but it has been the cooperation of individuals interested in poultry production which has really turned the trick.

Cooperation is not a term of which to be afraid. Without cooperation and coordination one could not walk, talk or even live. Without cooperation of broadcaster and receiver radio would be of no value. And as long as we cared to mention, cooperation of forces would be the central part of any activity. Anyone who cares to know the truth and to reason logically can come to but one conclusion, that the principles of cooperation are sound.

With sound principles and proper administration a business should succeed.

We have located here in Mentone,

one of the great farmer cooperatives in the state. Its policies are formulated and administered by local men. So far it has been highly successful. It has kept thousands of dollars in and brought other thousands to this community. Cooperative effort in this community is no longer an experiment. Properly guided it has a tremendous force. Efforts of a cooperative nature whether in egg car, feed mill or what not, have put Mentone on the map where she should remain in ever larger and better type.

## LARGE CROWD AT FREE MOVIES

A large crowd attended the free movies last Thursday night. Main street was parked full through the business section. Tucker and Broadway as far as Jackson St. were also crowded with cars.

From all reports the show was a good one. Business for some merchants was better and for others worse. A check up on weekly sales would indicate whether new business really comes to town or old business changes itself from one day to another.

The News is really interested in making Mentone a great trading center. As we see it, the time is drawing nearer. Just how it will be done will depend on initiative individuals.

## Kosciusko County Medical Society

The monthly meeting of the Kosciusko County Medical Society was held at Mentone Tuesday evening, May 12. They were the guests of Doctor Clutter, Doctor Yocum and Doctor Taylor. A banquet was enjoyed at the Lake Trail Cafe. After the banquet they assembled in Doctor Yocum's office where Dr. McDonald gave an interesting talk on "Physiological Effect of Digitalis."

Those present were: Doctors Herendeen, Murphy, Baum, Ricker, Sanders, Schlemmer, McDonald, Anglin, Clark, Hoy, DuBois, Radcliff, Kress, Shoultz, Thomas, Herring, Clutter, Taylor and Yocum.

## NEW BUSINESS HOUSE TO OPEN

Mentone is to have another entrant in the business field. Mr. Malcolm Hire, son of our fellow townsman, H. L. Hire, has leased the building formerly housing the Ballard Drug Store, and will open up an implement, feed and paint store. We understand that he will deal in Minneapolis-Moline implements and Allied Mills feeds. We do not at this time know the brand of paint he will handle.

Mr. Hire has been for the past 15 years with the National Cash Register Co. However, like all hustling men he feels that a business of his own would be better to his liking, and that Mentone offers an opportunity in the lines in which he is engaging.

With his family he will live in the Jefferies property at the corner of Broadway and Jackson Sts.

The News wishes him success in his new venture.

## Agricultural Class Tests Seed Corn

Nearly 150 bushels of seed corn was tested by the Beaver Dam boys for thirty farmers of the community. A total of 14870 ears were tested out of which 8504 were dead leaving 1349 weak and 5017 good. Only 34 per cent of the corn tested good and should be used for seed.

The past winter proved to be a bad one for seed corn. Only two of these farmers had corn testing above 90 per cent and both of these selected their corn from the stalks and dried it by the furnace. All farmers selecting corn late and not using artificial heat in drying found their seed badly damaged by the cold and wet weather we had last fall and winter. All seed corn is badly infected with moulds of various kinds and should be treated with some good mercuric treatment before planting.

### Smallpox Once Expected

Until comparatively recent times smallpox was looked upon as an unavoidable affliction.

## THE CHEVROLET CAN TAKE IT

Anyone who witnessed the Chevrolet quality test on our Main street last Thursday evening surely is convinced that this popular car is built to withstand the most severe usage.

The gruelling test that the driver put the car through surely demonstrated that the Chevrolet is not only perfectly built but that it is constructed of the very best material.

## HARRISON CENTER 4-H CLUB

The Harrison Center 4-H Club meeting was held at the home of Mary Alice and Helen Long on Tuesday, May 5, with seventeen members present, one visitor and our leader, Miss Shutt. There were elected officers as follows: President, Mary Mellott; Vice President, Mary Alice Long; Secretary, Wilma Mollenhour; Pianist, Beulah Nettrouer; Song Leader, Katherine Eiler; News Reporter, Barbara Creighton; Program Committee, Mary Alice Long, Dorothea Decker, and Alice Merideth.

We named our club the "Stitch and Chatter" club. After the meeting we went outdoors and played games. We all had a fine time.

The next meeting will be held at the home of Barbara Creighton on May 19.

Barbra Creighton.

## 4H CLUB

The Needle and Pin 4-H Club met at the Mentone School, Wednesday afternoon. We elected officers: Iola Tucker, president; Ella Jane Warner, secretary; Katherine Eiler, song leader; Avonell Blue, reporter; Iola Tucker, pianist.

After the election we went outside and played games. Our next meeting will be May 20th at the school house.

Reporter.

### Syracuse and Beaver Dam Boys Win High Honors in County Judging Contest

In the county dairy and livestock judging contests held Saturday, May 2, high honors went to Oliver Hibschman of Syracuse and Philip Lash of Beaver Dam in the respective contests. Teams entering the contests were from Etna Green, Mentone, Warsaw, Pierceton, Syracuse, Burket and Beaver Dam. About thirty-five boys were entered in the contests which were conducted by Leroy Norris of Mentone.

Winners in the dairy contest were: Oliver Hibschman, Syracuse; Albert Barber, Beaver Dam; Kenneth Nicoli, Syracuse; and Donald Shaffer of Warsaw. The first three represented the county at the annual Purdue Round-Up, May 6-8.

Winners of the livestock contest were: Phillip Lash, Beaver Dam; Junior Menzie, Pierceton; Gerald Engle, Beaver Dam; Donald Boggs, Mentone; and Albert Barber, Beaver Dam. The latter two tied for fourth place. The first three mentioned represented the county at the Round-Up in livestock judging. High honors in each class of livestock went to Leonard Swick, Beaver Dam, on horses; Phillip Lash, Beaver Dam, on sheep; Gerald Engle, Beaver Dam, on beef cattle; and Donald Boggs, Mentone, on hogs.

The dairy contest was held at the Charles Shock Farm near Rochester, while the livestock contest was held at the Stanley Boggs farm, Mentone for horses; Lyndes Lattimer farm, Burket for sheep; and Leonard & Griswold farm, Silver Lake for hogs and beef cattle.

### Rural Electrification Making Progress

The vigorous rural electrification movement of Indiana still keeps its pace. Cooperatives in two more counties have far exceeded the preliminary goal of 51 percent in obtaining signatures for membership. In Henry county the Rural Electric Membership Corporation had signed up 70 percent of the farmers. Routing of the lines is under way and line construction is expected to start in early summer, according to Charles Johnson of M. S. Summit, secretary of the county association.

In Vanderburg county the farmers held an all-day meeting at the Central High School in Evansville on March 9, and opened their campaign for memberships. Solicitors have been appointed in each township, and a series of meetings will be held to acquaint the farmers with the advantages of electricity and the terms on which it can be obtained under Federal loan through their local cooperative when formed.

It is understood that Fulton county has gone over the top in obtaining memberships, and according to the information given to us stands seventh in line of the twelve counties which will operate under the plan.

To those farmers who have had to buy their own lines in the past, the new plan now being used will be easily understood. The proposition is one which should appeal to every progressive farmer.

Norwegian Dialect Word  
Slatom is a Norwegian dialect word meaning zigzag. It is applied to that form of skiing.

### Rubinoff Holds World Record for Broadcasting

Rubinoff and his violin—and Chevrolet—are a combination that few, if any, radio listeners in the United States have not received in their homes via the air. The famous violinist and his Stradivarius, stars of the Chevrolet Musical Moments programs, have the distinction of going on the air from more broadcasting stations than any other program in the history of radio. Three hundred and seventy-eight stations broadcast Rubinoff three times a week, a total of 1134 fifteen-minute programs. That figures out at 283 hours, and if one week's programs were broadcast one after the other, day and night, it would require 11 days. The illustration shows Rubinoff, carrying his precious violin, posing with his car after a special appearance at Detroit.

## More and more people are buying the NEW 1936 CHEVROLET *because it's the only complete low-priced car*

People today want a car that's absolutely safe. And the 1936 Chevrolet is the safest car that money can buy, for it's the only low-priced car with New Perfected Hydraulic Brakes.

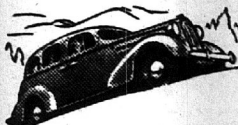

Wise buyers also want complete overhead protection . . . a Solid Steel one-piece Turret Top . . . the strongest top made. This feature also is exclusive to Chevrolet in the lower price range.

Genuine Fisher No Draft Ventilation is another comfort and safety feature which is found only on this one low-priced car. It scoops in breezes on warm days, and prevents drafts on cold days.

And when you're riding, you naturally want the smoothest and most comfortable ride known. That means the Knee-Action Gliding Ride! Only Chevrolet brings it to you at low cost.

It's sensible to save money, particularly when you can get the finest performance along with the saving. Chevrolet's High-Compression Valve-in-Head Engine—exclusive to Chevrolet in its price range—gives unequalled performance with economy.

Drivers prefer it for still another reason . . . Shockproof Steering . . . a feature which makes driving effortless. Follow America's judgment—buy a new 1936 Chevrolet—the only complete, low-priced car!

### ALL THESE FEATURES AT CHEVROLET'S LOW PRICES

GENERAL MOTORS INSTALLMENT PLAN—  
MONTHLY PAYMENTS TO SUIT YOUR PURSE

**\$495 AND UP.** List price of New Standard Coupe at Flint, Mich. With bumpers, spare tire and tire lock, the list price is \$20 additional. \*Knee-Action on Master Models only, \$20 additional. ## Boy Scouts Have Fine Year Planned

An extensive program of activities for 1936 has been planned by the Pioneer Trails Council, Boy Scouts of America. Some of the highlights of the program are as follows:

June 19 and 20 are the dates for the annual camporee when all scout troops of the area assemble for an annual encampment. An outdoor training institute is scheduled to be held at Camp Eagle on June 26 and 27. Courses of training will be offered in outdoor activities, nature lore, swimming and water activities, and woodcraft. The council at Camp Eagle will be conducted during the month of July.

From August 10 to 14 a patrol rallacamp will be held at Camp Eagle. Scout patrols from all parts of the area will come to camp with their own equipment and camp on a competitive basis. They will be judged and rated on their scoutcraft and campercraft efficiency. A number of select patrols will probably be designated to represent this area in the sectional camerall at Battle Creek, Michigan, from August 28 to 30. A cruise on Lake Michigan is also planned for Sea Scouts during the month of August.

District Rallies including contests and achievement displays are scheduled to be held simultaneously in all five districts of the area Saturday, October 28.

A delegation from this area will attend the Annual Regional Meeting at Milwaukee, Wisconsin on October 3rd.

A specialization training institute will be held on the afternoons and evenings of November 15 and 29. Courses of training will be offered in the various specialized activities of Scouting. Area rallio finals will be held on Saturday, November 21, in which winners of the two district rallios will compete.

Annual district council meetings will be held in the Kosciusko District on December 7; the Elkhart District, December 8; the West District, December 9; the Goshen District, December 10; and the LaGrange District, December 14.

The Annual area council meeting is scheduled to be held on January 11, 1937.

### Skin Charts Bodily Functions

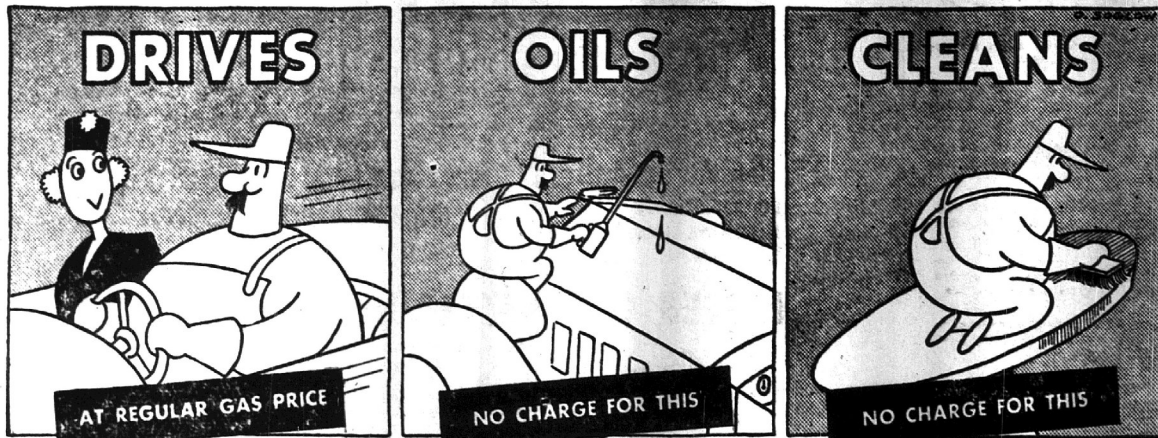

An important function of the skin is its power of excretion and of absorption. The skin is also an important means of protection to the entire body. In some conditions the skin may be regarded as a sort of chart which indicates changes in the general bodily functions.

## Northern Indiana CoOp. Association, Bulk and Retail Stations, Mentone

### Depression Demonstrates Soundness of Cooperation

Coming through the depression without a failure of major importance, cooperative associations of farmers have clearly demonstrated the soundness of the cooperative way of doing business, Dr. F. B. Bomberger, president of the Baltimore Bank for Cooperatives, recently declared:

"In spite of the fact that farmers' business cooperatives continued to grow steadily in numbers, volume of business, and general strength from 1920 to 1929, when prices of agricultural commodities were at a marked

discount in relation to prices for non-agricultural commodities," Dr. Bomberger said, "many persons failed to recognize the fundamental soundness of cooperation."

"Any doubt about its soundness now should be finally removed in view of what has happened since the economic collapse of 1929. In striking contrast to failures of thousands of banks and industrial and commercial enterprises of all kinds, the failures among farmers' business cooperatives have been relatively unimportant."

"There have been, of course, some failures among cooperatives since

1929. It would be almost miraculous if there were none. But such failures have been relatively few and in no case has there been failure of more than local importance."

"This seems to be very significant. In a period of such violent strains and stresses, the cooperative organizations escape with only minor injuries. Does that indicate that there must be something essentially sound in the cooperative way of doing business? It certainly seems so to me; and I believe that the experimental period for agricultural cooperation in the United States has now definitely passed. It can be accepted as

clearly demonstrated that any type of farm business can be carried on cooperatively successfully and with satisfaction to the farmers who constitute the organization."

### Japanese Marriage

Marriage in Japan is more than our contract between the two parties who are to live together. In Japan the marriage vow has to do with the ancestors and the bride marries the whole family and must learn to please them all. Japanese novels start where ours leave off, at the altar, and Japanese novels end with every member of the family understanding every other member and each attending to his own business.

EVERY HOME OWNER  
Should Know About

# T.T.O.

THE AMAZING NEW HOUSE PAINT THAT  
HAS REVOLUTIONIZED PAINTING  
STANDARDS

## PROVED 46% BETTER BY OFFICIAL TEST

T.T.O. MEANS THERMOLYZED TUNG OIL . . . and Thermolyzed Tung Oil is the latest development in the paint industry . . . a new "liquid part" for paint. Long ago paint experts recognized the vastly superior waterproofing and preserving qualities of Chinese Tung Oil, but certain natural peculiarities permitted only a small use of it in their products. Even the finest of spar varnishes and marine enamels contained only small per-gallon quantities and Tung Oil was never used in house paint. Now, by their patented Thermolyzing (heat treating) process O'Brien chemists have modified Tung Oil so that it offers an ideal vehicle for varnishes and enamels, and, above all, house paint!

T.T.O. House Paint is one of the most improved products ever offered in the industry's history. It looks like enamel. It washes like glass. It wears like iron. In a severe competitive test made by the nationally known Pittsburgh Testing Laboratory T.T.O. Paint was judged 46% better than the average of seven of the best known, best made house paints in the country. On thousands of homes, in all parts of the land T.T.O. Paint is giving owners more painting satisfaction and painting economy than they ever before thought possible!

#### Hollow Post Stronger

The National Bureau of Standards says that if the post is short, say length equal to three times the diameter, there is no difference in the strength, but if the post is long, say length equal to 150 times the radius of gyration, the hollow post for a given length is stronger than the solid post because the radius of gyration of the hollow post is greater than the radius of the solid post if the weight per foot is the same for both.

#### Opportunity and Adventure

Next to knowing when to seize an opportunity, the most important thing in life is to know when to forego an advantage.

#### Thoughts, Dreams, Emotions

The world's activities are largely the result of the world's thoughts, dreams and emotions.

## CORRECT DISPLAY OF THE FLAG

Certain fundamental rules of Heraldry govern flag display. We should remember first that the National Flag represents a living country and hence is itself considered a living thing; second, that the Union of the Flag (the blue field) is the honor point; and third, that since the right arm is the sword arm, the right is consequently the point of danger and similarly the place of honor.

1. The Flag should be displayed only from sunrise to sunset.

2. It should be hoisted briskly and lowered slowly and ceremoniously.

3. The Flag should never be allowed to touch the ground or the floor or to trail in the water.

4. The Flag should be displayed at homes, along streets, at places of business, etc., on National and State holidays and on historic and special occasions, e. g.,

New Year's Day, Jan. 1.

Lincoln's Birthday, Feb. 13.

Washington's Birthday, Feb. 22.

Inauguration Day (every fourth year).

Easter Sunday, variable.

Mother's Day, second Sunday in May.

Memorial Day, May 30.

Birthday of the Flag, June 14.

Independence Day, July 4.

Labor Day, first Monday in September.

Columbus Day, Oct. 12.

Navy Day, Oct. 27.

Armistice Day, Nov. 11.

Thanksgiving Day, last Thursday in November.

Birthday of the State, date of admission.

State Holidays, proper dates.

5. The Flag should be displayed on every fair day on the flag-poles of all public buildings, Federal, State, county and city, at every school house during the sessions of the classes, and on all office buildings, hotels, and places of business throughout the country.

6. The Flag should never be displayed with the Union down except as a signal of distress.

7. The Flag must never be used as drapery in any form whatever. Bunting should be used for the purpose.

8. No object or emblem should ever be placed on or above the Flag; no lettering of any sort should ever be placed on the Flag.

9. The Flag should never be used in any form of advertising. No advertising signs should be fastened to a pole from which the Flag is flying.

10. No other flag or pennant should be displayed above or to the right of the Flag.

11. When flown at half staff, the Flag is first hoisted to the peak of the staff and then lowered to half staff. Before lowering the Flag for the day, it is again raised to the peak and then lowered. On Memorial Day, the Flag is displayed at half-staff from sunrise until noon and full staff from noon until sunset.

12. When used on a speaker's platform the Flag should be displayed above and behind the speaker. It should never be used to cover the speaker's table nor to drape over the front of the platform. If flown from a staff it should be on the speaker's right.

13. When a number of flags are grouped and displayed from staffs, the Flag of the United States should be in the center or at the highest point of the group.

14. When it is displayed with any other flag against a wall or in the open, from crossed staffs, the Flag of the United States should be on the right, the Flag's own right, and its staff should be in front of the other flags.

"A thoughtful mind, when it sees a nation's flag, sees not the flag, but the nation itself."—Henry Ward Beecher.

## Sorority Entertains

On Tuesday evening May 12, the members of Psi Iota Xi Sorority entertained with a lovely Mothers Day Dinner at the Hotel Hays in Warsaw. The welcome to the mothers was given by Mrs. Elizabeth Myers, and the response by Mrs. Flavia Myers. After singing the Psi Ote song Mrs. Zeth Huffer returned thanks. Each of the mothers were given a rose at the close of the dinner.

A theater party was enjoyed at the Strand. Those present were: Mrs. Anna Mentzer, Miss Annabelle Mentzer, Mrs. Pauline Riner, Mrs. Casner, Mrs. Helen Huffer, Mrs. Senora Hoover, Mrs. Perry Hoover, Mrs. Elizabeth Myers, Mrs. Flavia Myers, Mrs. Lucile Myers, Mrs. Gibler, Mrs. Louise Chinworth, Mrs. C. G. Madeford, Miss Thelma Harris, Mrs. John Harris, M. S. Emery Anderson and Mrs. Zeth Huffer.

## Missionary Society

The Missionary Society of the Palestine Christian church met at Mrs. Elizabeth Longacre's Thursday afternoon, May 14. After the business meeting presided over by Agnes Surguy a cooperative dinner was served. Nora Huffer in charge of the meeting called upon Edna Mahoney and

Agnes Surguy who gave two very interesting papers on missionary work.

Those present were: Nettie Bowser, Ella Charles, Edna Mahoney and daughters Mildred and Carol; Nora Huffer, Manta Bear, Frances Plev and son Robert, Clara Vorhis, Edna Jones, Ethel Rush, Sola Cook, Ferr Rush, Louise Jones and hostess. abeth Longacre.

## MARRIED Mollenhour—Watkins

Announcement is made of the marriage of William Mollenhour, son of Mr. and Mrs. Kenneth Mollenhour, of Warsaw, and Miss Alice Watkins, daughter of Mr. and Mrs. Harry Watkins, also of Warsaw. The wedding took place at Crown Point, Indiana, on March 8th.

Both the bride and groom are graduates of Warsaw high school with the class of 1934. Mrs. Mollenhour has been employed at the Warsaw Public Library for the past one and one-half years. Mr. Mollenhour is enlisted in the United States Army at Fort Benjamin Harrison, Indianapolis, Indiana.

## R. R. Fare Based on Weight

As late as 1904 Colorado had a way that based its fare on your weight instead of the distance you wanted to travel. So every time you made even a short trip, you had to be weighed, the ticket-seller had to calculate the price on his scratch pad and frequently, by the time the transaction had been settled, your train had left.—Elizabeth Munch, Oakland, Calif., in Collier's Weekly
