## SCOUT TROOPS REREGISTERED

The national office of the Boy Scouts of America has issued charters to the following institutions authorizing them to continue the use of the Boy Scout program for another year:

Chamber of Commerce of New Paris, Troop 7. Scoutmaster, Eldon Evans; Assistant Scoutmasters, Ernest Litweller and Dale Swart; Troop Committeemen, Ross Immel, Chairman, E. M. Hoover, J. G. Whitehead, E. E. Miller, and Chester W. Rock.

Woman's Relief Corp of North Webster, Troop 8. Scoutmaster, Rev. J. S. Denbo; Troop Committee, Dr. L. A. Laird, chairman, G. R. Rodabaugh, Cornelius Werle, and Earl Gerard.

Scouts Club of Mentone, Troop 12. Scoutmaster, Maurice Greulich; Assistant Scoutmaster, Hardy Songer; Troop Committeemen, Dr. E. D. Anderson, chairman, Dale Kelley, Elmer Fenstermaker, Richard Greulich, and Charles Manwaring.

St. Mark's M. E. Church of Goshen, Troop 23. Scoutmaster, Chester Carpenter; Troop Committeemen, Roy Spotts, chairman, Rev. C. W. Anderson chaplain, and Morris Herring.

### THIS AND THAT

October 6 has been designated as Boy Scout Day at Notre Dame University. Scouts will attend the Notre Dame-Texas football game. Approximately 500 scouts from this area attended last year and an equal number are expected to attend again this year.

October 6 has also been designated as Scout Day at Purdue University. An extensive program has been arranged.

Mrs. Dale Wallace who suffered serious injuries in an automobile accident about two weeks ago is slowly improving.

Rosalind Mentzer attended a Home Economics meeting at Culver last Saturday. She returned home with Mrs. Helen Steinbaugh of Plymouth and spent the week end.

## SLAIN MAN WAS BROTHER OF MRS. EMMA BLUE AND OF ORVILLE SARBER, MENTONE

William F. Sarber, killed Sept. 17, at Vallejo, Cal., by a thug, was the son of Dr. William E. Sarber, a pioneer physician who practiced medicine at Palestine, southwest of Warsaw many years ago. Dr. Sarber died on a farm one and one-half miles east of Palestine many years ago. His slain son was employed as night watchman when attacked by the thief who hit him on the head with a piece of concrete. He died within a few hours. Sarber was not a brother but a distant relative of Sheriff Sarber, the murdered Lima, O., sheriff.

He was a brother of Mrs. E. A. Blue and Orville Sarber, both of whom live at Mentone and are his only surviving relatives. Burial was made in Carquinez cemetery, Vallejo, Cal.

—Warsaw Times

## LIBRARY NOTES

You will find the following new books at the Public Library:

Oil For The Lamps of China—Hobart  
Best Short Stories of America for  
1934—O'Brien

Best Short British Stories for 1934  
—O'Brien

### Fiction

Tarzan and The Lion Man

—Burroughs

The Outlaw—Brand

Always Tomorrow—Ayers

Murder in The Calais Coach

The Nine Taylors—Sayer

Man Lost—Stringer

The Greater Courage—Pedler

The Library is opened P. M. from 1:30 to 5:30. Tuesday and Thursday at noon for the benefit of the country school children and Tuesday, Thursday and Saturday evenings.

Librarian

Mystery of the Disappearing High Heels! Read the Surprising and Unusual Solution to this Queer Case in The American Weekly, the Magazine Distributed With NEXT SUNDAY'S CHICAGO HERALD AND EXAMINER.

## LOCALS

John W. Matthews of Warsaw and Robert Hogue of Greenfield, Ind., both of Purdue University were at Bourbon on Wednesday judging the poultry exhibits at that place. Mr. Matthews and Mr. Hogue are Juniors in the University.

Mr. and Mrs. Con Sarber, Mrs. Mary Sarber, Mrs. J. E. Rush and Esther Farry all of Detroit, Mich. attended the funeral of Sam Nelson held at Rochester Friday afternoon.

Mr. and Mrs. Porter Brown and daughter Maralyn of Warsaw, Mrs. Broda Clark and Miss Frances Clark attended the Century of Progress last Sunday.

Mr. and Mrs. Elmer Welch moved to Elkhart Saturday morning where Mr. Welch will resume his job at Conns Factory.

Shirely Ellen Ward, daughter of Mr. and Mrs. Rea Ward remains seriously ill.

Mrs. Lelan DeWitt and son of Converse have been entertained at the M. E. parsonage the past week.

Miss Grace Lesley and Miss Mildred Temple of Convoy, Ohio spent the week end with Miss Thais Greulich.

Mr. and Mrs. Don Walker and son Richard of Chicago are visiting Mr. and Mrs. Merl Smith and family. Mrs. Smith and Mrs. Walker are sisters.

Mrs. Jennie Thomas has returned from a short visit with friends in Argos.

Miss Vernette Snyder left Wednesday evening for Toledo, Ohio where she will attend college.

Mrs. Orpha Blue is making her home in the rooms above Mentzer's Store.

Kathryn Judd of Akron and her mother Mrs. Lloyd Rickle were in Warsaw Friday.

Miss Kathryn Snyder spent the first part of the week in Bloomington visiting Miss Margaret Mentzer and her brother Alfred Snyder.

Mr. and Mrs. F. R. Burns and daughter Jean and Mrs. Amanda Busenburg took last Sunday dinner with Mr. and Mrs. Vause Polen who have the State Road Cafe in Winamac.

## MINERALS AND VITAMINS FOR POULTRY

The story of minerals and vitamins is the most interesting and fascinating part of poultry nutrition. A German scientist several years ago found that chickens and animals could live a much longer period if they had no food than if they were fed a ration entirely lacking in minerals. These minerals are not only needed for the building of bone and tissue, they are necessary in digestion and the very life process.

The story of the vitamins reads like a novel. They are mysterious in their nature. There is no chemical test for them yet. We know them by their presence or their absence in feed. They are health giving substances and without them life will perish. The chicken's body is 3.5 per cent mineral. Of the dry matter 8.5 per cent is this material and 35.5 per cent of the dry matter of the egg is composed of it. The most important minerals are calcium, phosphorus, sodium and chlorine. Chemical analysis also show potassium, magnesium, iron, copper, and silicon. This long list of chemicals need not give us serious concern for most of them are found in the common feeds that we use in poultry rations.

Calcium needed in bone building and shell formation is abundant in oyster shell and in limestone. There is little evidence to show that either of these sources of calcium is superior. Oyster shell contains iodine and iodine is a desirable chemical in the poultry ration. If there is an advantage, it is in favor of oyster shell over limestone. These materials can best be self-fed the flock.

Phosphorus is needed in bone building. It is found in bran and alfalfa, but not in sufficient quantities. It must be added to the ration in another form but care is necessary in feeding it. Since it is needed for bone building, the best form in which to add it is the form in which it occurs in bone meal. It is one of the

FRANCES RUSH, Secretary

## THE POWER OF ADVERTISING

The governor of the Hudson's Bay Company returned lately to Montreal after making the arduous trip to the Arctic and back along the old fur trade route.

The fact that he was the first governor of the historic company to take the journey is less interesting than the tale he brought back.

An Eskimo living in the Far North saw an advertisement depicting a model in a stylish gown and noted that the price was \$25.

Going to the nearest trading post he tendered a valuable fox pelt in payment and ordered the article to be shipped to him.

The agent wondered why an Eskimo wanted to buy a woman's modish gown.

Then he learned that the would-be customer, on the evidence of his eyes, supposed that the woman and the garment went together, and what he was really trying to purchase was a wife.

The real point of the story, however, is not in its humor but in the well-known lesson which it repeats to business men—IT PAYS TO ADVERTISE.

When a remote aborigine observes an advertisement and endeavors to send his patronage to the advertiser, every one must admit that good advertising is still the best salesman, and that even local advertising may be very much more than a local force.

## A Lot of This Breed

The short-tailed shrew is probably the most numerous mammal in eastern United States, says Nature Magazine. It will be found in wooded lands, cut-over forests, fields and along streams, wherever the ground is soft enough to push aside for the erratic runways.

## PLANT NUTS, VINES AND SHRUBS TO AID WILD LIFE, IS PLEA

Washington, D.C.—This is a nutty story, but one that can help wild life to a great extent if sportsmen and others going into the great outdoors will follow its plea, officials of the American Game Association point out.

They urge that all start individual food-tree, vine and shrub planting campaigns. All one has to do is to carry along a few nuts or seeds or scions and plant the former or graft the latter. Then there will be plenty of nuts for everybody, including wild birds and animals.

The fall is the time to plant nuts. With walnuts, hickory nuts, hazelnuts, chinquapins, butternuts, beech-nuts and nearly all other kinds of edible nuts, all one has to do is crush the hulls and push the nut into the ground, either with the heel or stick a hole in the ground and then ram the nut down the hole. Nuts, for best results, should be planted four inches deep.

And where will one plant them? In the woods, along hedgerows, on the lips of lakes and streams, and wherever they will be of benefit to wild life without interfering with farm practices. Most land owners are glad to give permission for such planting.

Chestnut scions can be easily grafted to most any kind of deciduous tree, and they do especially well when grafted to rock or chestnut oak. Clarence Walker, assistant game protector, of Beavertown, Pa., who has been grafting chestnut scions to many kinds of trees since 1932, has had remarkable success, and bountiful crops of nuts are now beginning to appear. It is hoped that these chestnuts will produce a blight-proof tree, which will be the means of restoring the chestnut over its former range. The chestnut tree has been nearly wiped out by blight in this country.

The association also urges that one plant grapevines, haws, blackberry brains, honeysuckle, wild plum, persimmon apple, elderberry, mulberry, shadbush, spiceberry, sparkleberry, hawthorn, Russian olive, red cedar, cherries, mountain ash, dogwood, bittersweet, Virginia creeper, greenbriar and other food-producing trees, shrubs and vines. Many of these will afford cover as well as food for wild life, officials declare.

### Determining Turtle's Age

There is no sure way in which to determine the age of a hard-shell turtle. In most instances the plates are examined closely with a microscope and on these plates there can be noticed scale expansion. This scale expands as the turtle grows, leaving a ring of growth. These rings are counted the same as those of a tree.

### Is National Memorial

The Washington Monument society was founded in 1833. In 1854 the funds were exhausted when the shaft was only 154 feet high. In 1878 building was resumed largely through the appropriation provided by congress. Three hundred thousand dollars of the total cost of the monument was raised by popular subscription.

### Never Part of United States

Cuba was not considered a part of the United States. The treaty of Paris, December 10, 1898, provided for the temporary occupation of Cuba by the United States. This occupation lasted from July 18, 1898, to May 20, 1902. On the latter date, at 12 noon, the republic of Cuba was established.

### Annual Coin Tests

Trial of the Pyx, as the annual testing of the standard of the gold and silver coins in the English mint is called, is a custom of very ancient origin, and derives its name from the pyx or chest in which the coins to be examined are kept.

### Charity of Thought

You know that a little thought and a little kindness are often worth more than a great deal of money. This charity of thought is not merely to be exercised toward the poor; it is to be exercised toward all men.—John Ruskin.

### Full Moon's Duration

The full moon, astronomically defined, occurs when the longitude of the moon differs by exactly 180 degrees from that of the sun. As this condition is momentary, the moon is full for an instant only.

### Results From Inharmony

Actual ill health may result from marital inharmony, says Dr. Marie Winchell Walker, M. D., New York physician and psychoanalyst. On the other hand, harmony in marriage is a condition of healing.

### Horses Walked With Ski

Ski were used as an aid to walking in deep snow by the Scandinavians long before the Christian era. The ancient Armenians had their horses trained to walk on ski in the snow.—London Answers.

### Fire-Fighting Inventions

An extinguisher was brought into successful use in London in 1816. In 1837 William A. Graham applied for a patent for a similar apparatus in the United States.

## Please Don't Bother Your Neighbor !

*If you haven't a telephone of your own, go to a PAY STATION to telephone. Don't bother your neighbor who has a telephone. Your neighbor, no matter how much annoyed, hesitates to refuse the use of his telephone, but—*

*The vexation and annoyance exists nevertheless.*

*The telephone company suffers finally from the removals of telephones by subscribers, otherwise satisfied.*

*The community suffers thereby when a telephone is removed for this or any reason.*

*The use of the telephone is already universal. Let's all insist that constant users have their own telephones installed.*

*Let's put an end to the Moocher!*

#### War on Illegibility

Declaring that bad handwriting costs big stores thousands of dollars a year, the general manager of a leading store in London has organized a handwriting competition in which 300 schools will take part.

#### Valuable Glass

Bohemian glass is a potash-lime glass, particularly adapted for receiving cut and engraved decorations. Most of the specimens of old Bohemian glass are valuable because of the beauty of their decorations.

#### Richer by Comparison

A poor man said to a millionaire, "I am a richer man than you are; I have got as much money as I want and you haven't."—Related by Lord Grey, in Falloon Papers.

#### Worth Thinking About

"Some of us thinks we works too hard," said Uncle Eben, "wifout givin' enough attention to whether, maybe, we talks too much."—Washington Star.

#### Alligator Flesh Is Edible

Alligator flesh is white and tender, but it has a musky taste and is therefore not relished by most people. Some of the Indians were very fond of it.

#### Didn't Apply to Him

"It's the time for good boys to be in bed," said mother to Billy. "But mother," said the child, "don't you remember that I wasn't good today?"—Children.

#### Old Things Best

I want a sofa, as I want a friend, upon which I can repose familiarly. If you can't have intimate terms and freedom with one and the other, they are of no good.—Thackeray.

#### Prolific Ants

The white ant of the tropical country is declared to lay more eggs than any other insect, its record being 85,400 each day during the season.

#### Calls for Fine Scales

According to Doctor Kuhlmann, a Hamburg physicist, weights as low as one ten-millionth of a gram have been registered.

#### Mouse as Advertisement

A mouse that catches flies was the novel window display used recently by an automobile man in Sydney, Australia. Heedless of the large crowd watching him, the tiny rodent would dart from his hiding place in a corner and spring up the window pane or take a flying leap. He would always "get" his fly. He kept the window clear of all the buzzers, and the dealer says he was the best and cheapest attraction he ever had.

Arlo Frenzier has been suffering an attack of appendicitis.

#### Simple Cures for "Blues"

Deep breathing is recommended as a cure for those who get depressed. When the lungs are properly filled the brain gets its full supply of oxygenized blood and functions properly. That dispels the depressed feeling.

#### Canada's Natal Day

July 1 is called "Dominion day" because it was upon this day in 1867 that Canada came into being as a self-governing dominion within the British empire, its constitution resting upon the British North America act of 1867.

#### Voice Does Not Travel

The bureau of standards says that the voice does not actually travel over a telephone wire. The motion of one diaphragm controls an electric current which moves another diaphragm, thus reproducing the voice.

#### Sets Time for World

"Greenwich time," famed throughout the world, is determined by the movement of a certain star which arrives due south once every twenty-four hours.

#### Treatment for Braggart

There is this benefit in brag, that the speaker is unconsciously expressing his own ideal. Humor him by all means, draw it all out, and hold him to it.—Emerson.

## MINERALS AND VITAMINS FOR POULTRY

Continued from page one.)

minerals that will cause nutritional disturbances, if over-fed.

Rations for hens or chicks that contain 10 per cent or more meat scraps will contain ample phosphorus for normal growth. The addition of extra bone meal to the ration containing 10 per cent meat scraps is almost certain to cause enlarged joints, slipped tendons, and deformed bones. Chick rations in particular that contain 10 per cent meat scraps are certain to cause trouble if more bone meal is added.

Sodium and chlorine are badly needed by poultry, but fortunately these materials can be added in the form of common salt. It is customary to add 1 per cent salt to poultry rations. This is an adequate quantity but it must be thoroughly mixed. Large quantities of salt are extremely toxic to poultry and must be avoided under all conditions.

Mineral mixtures in a ration are not desirable unless the ration contains vegetable protein concentrates instead of meat scraps. If the ration contained such concentrates as soy bean meal as a protein supplement, then it would be necessary to add about 5 pounds of mineral to each 100 pounds of feed. This mineral mixture could be composed of 60 per cent bone meal, 20 per cent ground oyster shell or limestone, and 20 per cent salt.

The vitamins take their names from the letters of the alphabet. There is no chemical test for them yet, their biological effect on animals is plainly evident. Perhaps their action on the body is a combination of chemical and physical reactions.

Vitamin A is associated with the yellow pigment of plants called carotin. This pigment contains properties which when taken into the body of the animal is capable of forming this Vitamin A. The pigment xanthophyll does not carry this property and is not capable of producing Vitamin A.

Lack of Vitamin A causes a nutritional disorder in the fowl, popularly referred to as Nutritional Roup or more technically Avitaminosis A. Since Vitamin A is formed by the feeding of yellow corn, green feed, alfalfa, cod liver oil, and similar feeds, rations that are low in these materials are likely to cause trouble. This deficiency causes the formation of white patches on the lining of the throat, in the kidneys, and the eye.

Practical tests have shown that 40 per cent yellow corn in a ration with no additional green material will pre-

vent this disease. White corn rations with 8 percent alfalfa leaf meal will give normal growth and development. These determinations are for chickens. The requirements for turkeys are somewhat higher.

Vitamin B is found in the hulls of grain such as bran. While lack of it would cause nervous disorders, it is so abundant in the poultry ration, that we need not give it serious concern. There is little possibility of a ration being deficient in it.

Vitamin C found in orange juice and tomato juice is not required by poultry. They seem to have the ability to manufacture it in their livers.

Vitamin D, known popularly as the sunshine vitamin, is most important in poultry nutrition. This vitamin makes possible the use of mineral in the body, giving eggs of normal shell and bones of proper texture. Lack of it gives the condition comparable to rickets in children.

The theory of Vitamin D is that the ultra-violet rays of the sun falling upon the body causes chemical changes and the formation of the vitamin in the body. We also know that this health giving material may be formed in the body of fishes and stored in their livers. The use of cod liver oil and sardine oil is well known to poultrymen.

Cheap oils such as cottonseed oil have been treated by exposure to sunshine and ultra violet lamps with the hopes that Vitamin D properties might be imparted to them. These tests have been practically negligible in results. Feeds are being created in the same way, but nothing very prac-

tical in poultry feeding has developed from it.

The best manner of feeding cod liver oil to a poultry flock is a matter for some discussion. For baby chicks it can be most easily mixed with mash at the rate of about 2 per cent. For the laying flock, a popular method is to mix it with other feeds and to feed it as a wet mash. The method that follows is said to be more beneficial in increasing hatchability than any feed that can be fed:

2 pounds dry oats germinated or soaked

2 pounds condensed buttermilk or sour milk

¼ pint cod liver oil

This quantity is enough for the daily feeding of 100 hens. It should be started about December 1 and fed throughout the hatching season.

If you repair your brakes we carry a full line of genuine Lockheed brake parts and Lockheed fluid. Parts and labor prices gladly given at no cost.

## One ride is worth a thousand words

WHAT you hear and what you read about a car is important—but *one ride* is worth a *thousand words*. Test Chevrolet's Knee-Action on a bumpy road, where you can see for yourself what a big difference Knee-Action makes in riding comfort. This test will also acquaint you with the smooth, economical, valve-in-head engine, the positive, cable-controlled brakes, the bodies by Fisher, and the comfort of Fisher Ventilation. Go to your nearest Chevrolet dealer and make the Ownership Test. Chevrolet is satisfied to let you and the *ride* decide which car is the best for you.

## Mentone Lions Again Sponsor Calf Club

Russel Fleck was chosen for the second time to buy the Angus Club Steers for next years club. These fine steers which are even better than last years were purchased in Missouri. Parents are always welcome and urged to visit and view the steers to encourage the boys and girls in their work.

Etna Green is organizing a Steer Club and was glad to buy their steers through Mr. Fleck also.

The following list represents the boy and girl owner of the steer and his or her sponsor of the Lions Club.

Dale Tucker—M. C. Mentzer  
Dale Nellans—Floyd Tucker  
Franklin Nelson—W. A. Warner  
Philip Lash—W. R. Rush  
Paul Vandermark—C. Walburn  
Mary Deaton—I. F. Snyder  
Hope Deaton—Dale Wallace  
Welford Deaton—H. V. Johns  
Joseph Long—F. R. Burns  
Donald Boggs—K. A. Riner  
Dean Nellans—C. E. Goodwin  
Lola Fleck—M. Dudley  
Earl Rush—E. Fenstermaker  
Franklin Smith—C. W. Shafer  
Kenneth Romine—M. Manwaring  
Raymond Parker—Joe Kintzel  
Edgar Teeter—Dale Kelly  
John Ettinger—Fleck  
John Ettinger—R. E. Riner.

## BIRTHS

### Zartman

Mr. and Mrs. Lawrence Zartman are the proud parents of twin babies, a boy and girl, each weighing nine pounds, born Sunday morning Oct. 7 at their home near Warsaw. The mother will be remembered as Miss Ruth Decker. The new arrivals were named Violet Laurine and Larry Eugene. Mr. and Mrs. Harry Zartman of near Warsaw, and Mrs. Ben Decker of Etna Green are the grand parents of the infants.

See I. F. Snyder for Furniture and floor coverings. I will guarantee quality and prices.

## Meet at Mentone

The Kosciusko County Rural Letter Carriers' Association and Ladies' Auxiliary met in the Mentone School Building Friday evening, October 5, with Mr. and Mrs. Ray Rush as host and hostesses. After a delicious potluck supper the men and ladies separated for their meetings. These meetings proved to be very interesting. This was also election night in the Ladies Auxiliary. Mrs. Leroy Carr of Claypool, was elected for president and Mrs. Ralph Dewart of Warsaw, secretary. Mrs. Clyde Delano gave an account of their trip to and from the national convention which was held in Denver in August. Those present were: Mr. and Mrs. A. E. Woolpert of Chili, Mr. and Mrs. Ira Mast of Amboy, Mr. and Mrs. Bruce of Peru, Mr. and Mrs. Orville Moore of Akron, Mr. and Mrs. Harold Rogers of Mishawaka, Mr. and Mrs. Vern Yoder of Elkhart, Mr. and Mrs. Ross Immel of New Paris, Mr. and Mrs. Chester Overlease and daughter, Mr. and Mrs. James Fuller and Emory Cooper of Milford, Mr. and Mrs. Fred Self and Mr. and Mrs. Harry Cullers and family of Syracuse Mr. and Mrs. Clyde Delano and daughter of Pierceton; Mr. and Mrs. Ralph Dewart and family, Mr. and Mrs. James Howard and family, Mr. and Mrs. Basil Durbin Villmer and family of Warsaw, Mr. and Mrs. Orvin Miller and Mr. and Mrs. John Brugh of Etna Green, Mr. and Mrs. Leroy Carr and Mr. Beeman of Claypool; Mr. and Mrs. Carl Diehl and family of Le Mars, Mr. and Mrs. Artie Carr of Silver Lake, Mrs. Rose Morrison, and Mrs. Cunningham, Mr. and Mrs. Lloyd Rickel, postmaster and Mr. and Mrs. Ray Rush and family. The next meeting will be held in Pierceton in November.

## Attends Meeting

Among those from this territory who attended the Indiana State Poultry Association Annual Meeting at Purdue were O. E. Beeson, C. E. Leininger, Masa Nelson, Chas. Manwaring, Frank Merkle, C. I. Bashore, Hobart Creighton, and C. L. Manwaring. A very interesting and educational program was presented.

## Surprise Shower

On Thursday afternoon a group of friends of Mrs. Velma Nelson Vandermark gave her a lovely surprise shower at the home of Miss Leona Leininger. The afternoon was spent in playing Bug and other party games. Prizes were won by Beulah Kelley, Frances Rush and Isabelle Johns. Mrs. Vandermark received many useful and beautiful gifts. Dainty refreshments were served at small tables decorated with a tiny bride and groom as center pieces. Those present were Blonde Kelley, Winifred Swick, Doris Wiltrout, Mrs. Isabelle Johns and son David, Beulah Kelley, Mrs. Leona Eber, Mrs. Lenna Nelson, Doris Adamson, Frances Rush Mrs. Doris Copen, Mrs. Frances Nelson, Mrs. Mildred Fawley, Mrs. Allen Nelson, Mrs. Mina Nelson, Mrs. Myrtle Leininger, Leona Leininger, Marcella Leininger and the guest of honor Mrs. Velma Vandermark. Mr. and Mrs. Vandermark are making their home in Mansfield, Ohio.

See I. F. Snyder for Furniture and floor coverings. I will guarantee quality and prices.

## OBITUARY

Shirley Ellen Ward, who was born Feb. 9, 1932 left us Oct. 1, 1934, after an illness of nearly eight weeks. She was the daughter of Mr. and Mrs. Rea H. Ward. Besides the parents she is survived by one brother, Rea Davis, two sisters, Margaret Ann and Lois Genevieve, one grandmother, Mrs. Ella Ward and great grandmother, Mrs. Martha Sell, besides the host of friends she so easily made.

### Expressing Our Thanks

Words are inadequate when we try to express our gratitude to our neighbors, relatives and friends who so faithfully and lovingly ministered to us during the illness and death of our baby, Shirley Ellen. However we want to try in this way to publicly express our heartfelt thanks to all of you.

Mr. and Mrs. Rea Ward and family

Those who attended the funeral of Shirley Ellen Ward from a distance

were Mr. and Mrs. Coy Ward, Mr. and Mrs. Bruce E. Ward and daughter Stellavon and Margurite, Mr. and Mrs. Dewey Kessler of South Bend, Mesdames Una Steele, Edsal Snyder, Wilbur Flowers, Thomas Vandervort and the Misses Helen Steele and Adelaide Milliard of Walkerton, Mr. J. Harvey Davis and daughter Helen Edrie of Angola, Mr. and Mrs. D. O. McComb, Mr. and Mrs. Albert N. Smith and children Willa, Norman and Victor, Mr. and Mrs. Homer Blaine and children, Mr. Dwight S. Davis and sons and Mr. Grant and Oliver Tyler all of Fort Wayne.

See I. F. Snyder for Furniture and floor coverings. I will guarantee quality and prices.

## Champion Hen

An International Egg Laying contest was conducted at Michigan State College in East Lansing Michigan. Creighton Bros. entered a Leghorn hen and won first prize. During the year the hen laid 307 eggs scoring 313.35 points.

## Rummage and Bake Sale Combined

The Ladies Aid of the M. E Church will hold a Rummage Sale and Bake Sale combined, Saturday 20th all day and evening at Aughinbaugh Store. All members are urged to furnish something for this sale.

Sec. Mary Borton.

## New Sound Equipment Installed at Madrid Akron

The Madrid theatre installed a complete new sound equipment this week and now they have a machine which is capable of reproducing sound wave from 50 to 20,000 cycles per second.

Although the human ear cannot detect sound waves up to 20,000 cycles per second, it is necessary to reproduce on this scale to get a perfect effect, or 1000 percent natural tone. The new equipment produces a very clear sound, with full base tones and sharpness in high tones.

See I. F. Snyder for Furniture and floor coverings. I will guarantee quality and prices.

## WHY

### Some Types of Aircraft Have Three-Blade Propellers

Many modern types of aircraft are equipped with propellers having three blades, rather than only two. The reasons for three propeller blades, relates a writer in the Kansas City Star, depend to a great extent upon the type of aircraft and engine.

In certain modern aircraft it is essential to use a three-blade propeller because the blades are considerably shorter than those of a two-blade propeller designed to permit a given engine to develop full power, for there would be danger of longer blades striking the ground at the takeoff. In addition, extremely high propeller tip speed, necessary in a two-blade propeller to develop full engine power, is not necessary in the propeller of three blades. High tip speed is excessively noisy and places undue stress on the propeller. In addition, full engine power is not developed so rapidly with the longer two-blade propeller as with the three-blade propeller.

The slower an airplane propeller can turn to do a given job, the less noise will result, along with the other important item of less engine speed and consequent less wear and tear and lower operating costs.

### Why Animals' Names Are Applied to Some Tools

Why are so many things, especially in engineering circles, called by the names of animals? It is not difficult to see why the long, tapering lifter of greater weights should be called a crane, although it might as fittingly be called a stork or an ostrich. As for the donkey-engine, it obviously does the "donkey-work," the smaller tasks ignored by the bigger engine.

Is the monkey-wrench so called because it deals mainly with "nuts," or because when open it bears some resemblance to the simian features? Horse power is the unit of strength in all civilized countries, and naturally arises from the fact that until recently the horse was the world's main means of traction. The carpenter's horse and the clothes-horse have evidently heavy burdens to carry, and the tailor's goose gets its name from the resemblance of its handle to the neck of that bird.

### Why Cupolas Are Used

Small, house-like buildings are seen frequently on top of barns in the rural areas. They are sometimes located at one end of the barn, and sometimes in the middle; but always they are on the ridge of the roof. Martins and other birds often build nests in them. The purpose of the small building on farm barns is for ventilation. It is called a cupola, and on the large hay barns, particularly in the northern states, it is a common method of construction. In most cases the cupola is merely a covering for a hole in the ridge through which air from the barn may circulate. In virtually all cases the sides of the cupola are constructed of inclined

boards. In modern construction, this cupola is connected with air shafts properly arranged in such manner as to control the ventilation, particularly in dairy cattle barns.—Kansas City Star.

### Why British Crown Was Remade

The gold framework was taken to pieces and reset to make it more secure. Among its famous stones are the Black Prince's ruby, which dates back five centuries; the pearl eardrops of Queen Elizabeth; the second largest part of the Star of Africa diamond, weighing more than 300 carats; the great sapphire from the crown of Charles II; the sapphire from the coronation ring of Edward the Confessor, and other symbols equally as historic. Besides these larger stones, there are 2,783 diamonds, 277 pearls, 16 sapphires, 11 emeralds and 4 rubies in the crown.

### Why Virginia Is Not D. C.

The citizens of Alexandria petitioned the congress for the retrocession of Alexandria county, Virginia, ceded to the national government for the national capital. The vote was 763 to 222 of the citizens and the petition was based on the grounds that no federal buildings had been erected on the Virginia side, nor were likely to be, and that the citizens were deprived of political and other rights, with no benefits. The act retroceding the territory was signed by the President July 10, 1846.

### Why Glass Is Whitewashed

Have you ever noticed that the glass roofs of greenhouses are whitewashed? The reason for this is to prevent the sun's rays from burning up the flowers. It not only shades the plants but reflects the sun. Black would be used, florists explain, but this would cut out too much of the heat from the sun and not allow enough light to reach the growing plants.

### Would Reach to Moon

Postage stamps printed at the bureau of engraving and printing in a single average year, if laid end to end, would reach from the earth to the moon, according to an authority. The line would exceed 200,000 miles, or eight times the circumference of the globe, and 25 different colors would be represented in the chain. Stacked in sheets of 100 stamps each, the annual stamp production would make 92 piles as high as the Washington monument. Eight hundred tons of paper, 430 tons of ink and 240 tons of gum are used in an ordinary 12-month period.

### Decommission

The term decommission is of recent origin. In application it has been limited almost exclusively to naval use with reference to ships, aircraft, or the like. In the navy a vessel is "put into commission" when, after completion or after repair, it has been fitted for sea service. Conversely, it is decommissioned when it has been officially taken off the list of vessels in active service.—Literary Digest.

## OBITUARY

Omer Nelson Igo, son of William and Leah Igo, was born in Edgar County, Illinois, Sept. 16, 1866, and passed away at his home near Mentone Oct. 1, 1934 at the age of 68 yrs. and 15 days.

When but a boy Mr. Igo went with his parents to Kansas to live. At the age of twenty he and another young man drove from Kansas to Indiana in a covered wagon. This trip was made in about eight weeks.

After arriving in Indiana, Mr. Igo worked for John Riley Black and on Oct. 16, 1890 he was united in marriage to Minnie Black, daughter of J. K. Black. To this union were born ten children, Mrs. Icie Taylor, Mrs. Floyd Tucker, Mrs. Roy Walters, Mrs. Elmer Hoffman, Ernest and Virgil Igo all of near Mentone. Lewis Igo of Globe, Arizona and Lillian and Edgar at home. Joseph Igo the oldest son passed away March 23, 1930.

Three brothers, George Igo of north of Mentone, Wilkin Igo of Alabama, Fred Igo of W. Virginia and several grandchildren also survive.

Mr. Igo served one term as trustee of Franklin Township, was very much interested in all county work and served sometime as County Councilman. He was a member of the Universalist Church.

## BIRTHS

### HORN

Mr. and Mrs. Fred Horn are the parents of a baby girl born at their home Oct. 3

\*\*\*

### WEIRICK

Mr. and Mrs. Rupert Weirick are the parents of a baby son born at their home recently.

### Vermilion Sacred Color

The color name "vermillion" is derived from the Latin "vermiculus"—translated "shining worm—or 30-fold color." Because of its brilliance, vermillion has always been used to signify divine power. The ancient Romans used the hue to color the faces of their statues of deities.

### Sound Sleep Is Restful

The Public Health Service says that a sound sleep at any time is restful. It makes no particular difference when or where it is taken, provided the sleeper is comfortable. Sleep in the daytime owing to disturbances may be less sound than during the normal hours for sleep at night.

### Our Friends

Granting that we both had the will and sense to choose our friends well, how few of us have that power. Yet there is a society continually open to us, waiting all day long, kings and statesmen on our bookcase shelves.—John Ruskin.

## Enough to Paint Your Bathroom For Only \$1.95

An average 6 x 6 bathroom can be completely rejuvenated by half a gallon of Satin Finish. And it costs only \$1.95. Easy to apply, fully washable, quick drying.

## A FEW IDEAS

Cultivating intimacy is the road to trouble.

Doubts plague us as much as they warn us.

Reason on love and you will lose your reason.

Vigilance is the price of liberty and of keeping out of wars.

The professional shoplifter isn't necessarily a strong person.

Wages of sin is that everybody reads about yours in the papers.

The roots of education are always intertwined with life itself.

It doesn't take a very bright woman to dazzle the average man.

Why are you so anxious that people should know what you think?

When a single girl asks a single man if he snores, the plot begins to thicken.

There is this satisfaction in a sales tax: You know that nobody is escaping it.

The law's business is not "to make a man behave," except in his relations to other men.

Get people's confidence and they will give you all of their money that you ought to have.

It is quite a trick to elude seeing too much—which might make one a witness in court.

Horrid things said by bridge players to bridge players keep people from learning the game.

Burlesquerie is good because it makes fun of foolishness instead of getting mad about it.

One thing, we are no longer compelled to read about people swimming across the English channel.

Most well-established friendships last till death. It is the greatest commendation that can be given to friendship.

Psychology of Orientals frequently appears queerer than that of the queerest owner of your own race that you know.

"All things come to him who waits"; but you have no idea what a lot of things (often unpleasant) come to those who don't wait.

### Catsapaw Lawsuit

From China comes this strange story of eastern justice. Four merchants acquired a supply of cotton, and to prevent damage by mice invested in a cat, each being the owner of one paw. When the cat met with an injury the owner of the damaged paw tied an oil-soaked bandage round the wound,

but the animal got too near a fire and the bandage caught alight. The frightened cat scampered among the cotton bales which were soon in flames, and the owners of the three good paws sued the owner of the injured one for damages. The judge decided against them. The cat could not use the lame paw, he declared. Therefore, the three good paws had caused the damage, and the owners of these paws had to pay for the loss sustained by the owner of the bad paw!—Tit-Bits Magazine.

### Fish With Hands

A fish with hands was recently found in South Africa. It is a repulsively ugly fish, shaped like a deformed dog, and possessing four human hands instead of feet; it was washed up on the beach near the aquarium at East London, South Africa. It weighed between 8 and 10 pounds and was muddy brown in color; it had a long tail and a cylindrical body. The local authorities say that the description suggests that the fish was a member of the Sargassum family—an ugly weed-loving species, whose fins, in the course of evolutionary processes, have developed into hands.

### The King's Bad Bargain

The king's bad bargain is the name bestowed on a civil servant who lives to enjoy his pension beyond the average limit, says Tit-Bits Magazine. According to statistics a male pensioner may expect to live fifteen years after retirement at sixty, while the average woman may hope to live until she is seventy-eight.

### Two Sides

"There are two sides to every argument."

"That's true," said Senator Sorghum. "But an argument is like a coat. There's a wrong side and a right side."

### Counting Them Up

Miss Pert—There are 300 reasons why I won't marry you.

Mr. Oldboy—Name them.

Miss Pert—Fifty years and 250 pounds.

### Pants Pressed?

"Have you ever appeared as a witness before?"

"Yes, your honor."

"In what suit?"

"My blue serge."

### It Soured Him

Sinkerton—Why do you argue so against compulsory education?

His Friend—My wife tried to make me learn how to cook my own meals.

### Learn Prayers From Birds

In India the hill mynas are particularly in evidence in the vicinity of religious temples. Nesting, as they do frequently, in the eaves of these temples they sometimes learn to repeat the prayers of the worshippers and it is even said that some illiterate natives learn to say their prayers by listening to those rendered by the mynas.

## New Treatment for Roundworm

You can't expect to make a profit from birds infested with worms. Use this new way to kill Roundworm. "Black Leaf" Worm Powder mixed in mash. Easy, economical and convenient. No handling of birds.

Ref.—Your Own Bank.  
Central Hanover Bank & Trust Co.,  
Greenwich Street Branch.  
All Commercial Agencies.

### Alma Mater

The usual pronunciation of alma mater, says Literary Digest, is al-ma-ma-tar—first a as in fat, second and third a's obscure, as in final, e as in prey. This is based on the older English mode of Latin pronunciation. The so-called Continental system is now largely followed in America in the teaching of Latin, and the Continental values of the vowels have replaced the English values. By the Continental system, the phrase is pronounced al-ma-ma-ter—first and third a's as in art, second a and e obscure. One sometimes hears alma pronounced in the English system and mater in the Continental. This mixture is incorrect.

### The Scottish Dog

The Scottie is one of the many breeds which shows the result of painstaking care in its gradual development in shape, size and coat texture down through the years. There was a lot of controversy over this little fellow back some years ago. One belief holds that the Scottie has come from the hard-haired Highland dog of Scotland, which has developed to be the Cairn terrier.

### Paprika Contains Vitamin C

A Hungarian scientist discovered paprika contains Vitamin C. It has been found that Georgia-grown pimientos (known to contain Vitamin C) are generously supplied with Vitamin A, perhaps as much as in cod liver oil.

### Labor Terms

A lockout consists of the refusal of an employer to furnish work for his employees and is used as a means of coercion. A black list is a list of persons considered deserving of adverse discrimination. A closed shop is one which employs only union men. It is closed against nonunion men. An open shop employs both union and nonunion men. A strike consists of the refusal of an employee to work unless his employer agrees to certain conditions.

### Owls Foretell Rain

When the hoot owls hoot from their holes in the ground it is time to move tepees away from the lowlands and rivers. Owls have holes in the ground in the prairies where the prairie dogs have dug them. If they emerge and hoot, that is a sign to the Cheyenne Indians that there are rains and floods coming.

### Ultraviolet Rays and Marble

Ultraviolet rays enable the art connoisseur to distinguish ancient marble from marble fresh cut and from ancient marble reshaped at a later date.

### Moral Turpitude

Moral turpitude is an act of baseness, villainy or depravity in the private and social duties which a man owes to his fellow man, or to society in general, contrary to the accepted and customary rule of right and duty between man and man.

## • Girl Scout News

By Amos Skeets

Have we had a good time or have we had a good time? Purdue University had their annual Scout Day on Friday, October 6. The Mentone Troop of Girl Scouts piled into the bus and went along. We rode through country that was so beautiful we held our breath spellbound. It is so hilly and wild near Lafayette and in the autumn the trees are touched with tiny daubs of red and gold. The road wound about through the hills and at times we could look down cliffs straight below us for several hundred feet. The timber has never been cut from these cliffs and the undergrowth is so wild and tangled that it takes us back to the days of our ancestors.

While passing through Logansport, "The City of Many Bridges," we were told that if we didn't behave better than we had been they would leave us at the Insane Asylum. And as we passed the Asylum our curiosity was appeased because they slowed down as they passed with the intentions of dropping off Avis Underhill, Betty Lyons, Lova Bush, and several other deserving ones, but knowing how anxious we were to see Purdue they became more lenient and passed on.

What noise! The best way to go on a trip like that, is to go to Clark's and buy out their supply of cotton batton. You need it! Such yelling, and shrieking and laughing. Glory be! One would far rather remain at Logansport. "Zits" also seemed to cause much entertainment and noise. There we innocent (?) Scouts sat and had to endure such things as having "zits" shouted in your ears every so often by some enthusiastic young "zister." It's a wonder we didn't land in the ditch but our driver didn't seem to have any nerves, thank goodness!

Then we crossed the Wabash! Such a river! Our state should be proud of that lovely expanse of water which inspired our state song. In the Southern part of our state the Wabash is very wide and blue with a more wild cast. The banks with their wooded beauty lend enchantment to the miles of the river.

We passed the "Old Battle Ground" a spot of unspoiled nature and went through the grounds of the "Old Soldiers Home". There we passed an old man whose valor had won him the right to his home. As Whittier says, he was "The Last Leaf Upon the Tree" but he commanded reverence.

What a narrow escape we had! My! My! We thought sure we were going overboard. Luckily for our families

(?) we did not, but we never before had such a thrill. We rode directly toward space. Certainly, there was no road but just a cliff. Well, our driver surmounted the difficulty by turning a corner! Ha.

Then came thrilling news! we were nearing Purdue! The great University of whom all good Hoosier children have heard. Our first sight of the University gave us an odd sensation. The campus life looks so exciting and beckons you on. We piled out of the car and ran up the steps of the Union Building to register. We were instantly in a crowd. Boy and Girl Scouts wondering hither and yonder and Students hurrying to a fixed place. We left Union and with our flags unfurled followed by Captain Rosie and Assistant Eileen. We tramped over the campus, now and then hailed by our Co-Scouts.

We marched in a body to the Home Ec. Hall. And beheld the things those girls had done, also their equipment. The buildings at college are marvelous, some old, some new, but the new ones beholding the old ones with the envy for their dignity and meaning, and the old one's scornful of the frivolousness of the younger ones yet admiring their up-to-dateness.

Our tour over the camps caused us tremendous excitement. And while standing in a deserted hallway we were startled almost out of our wits at the loud peal of a nearby bell. Do they ever ring those bells loud, though! We regained our natural cheerfulness and soon found ourselves in a room of natural history.

What a shock! We came through the door and there stood several dinosaurs and other skeletons! We gazed admiringly at the various collections scattered in the cases all over the room. Birds! By all means, some birds whom we can never hope to see but birds having such lovely plumage that we could hardly draw ourselves away to be hold the snakes, stones, seals, arrow heads and other fine collections. After enjoying several other buildings we hurried over to the Women's Dormitory. What a lovely building! The dining room is splendid with its private tables shining gloriously from their polish. This dining room seats one hundred and twenty-five people. Then hurrying into their living room we were amazed at the perfectness of it. The rugs are soft as down and the furniture holds open its arms to receive one. The fireplace stands ready to warm one and the grand piano wishes to rest one with its glorious music. The cute little reception room off the hall makes one wish they were receiving callers, then and there. We hurried upstairs and

beheld the splendor of the girl's rooms. How cozy they looked! We also went out on the sleeping porch and remembering this was Saturday, we were highly amused to see one real lumpy bed which, upon closer examination, held a lazy but very sleepy college girl. We could sympathize with her however, for we had been routed out of bed entirely too early. From here we followed our guide to the basement where we beheld the room where the girls washed their hair and dried it by electricity also we ran into the laundry room where two girls were pulling up washing machines and had a big pile of clothes ready for their labors. In the basement they have a mammoth room, empty at that time except for the piano and the fireplace where they held their parties. Our guide then took us to the infirmary where one invalid held full sway. She had hurt her leg and the nurse took care of her. The infirmary was clean and comfortable and just the thing for a sick person with its adjustable beds. Regretfully leaving the Dorm we went to the woman's Gym and stared wonderingly at its wonders. Such mammoth basketball floors! The archery targets! The ropes and pads for acrobatic stunts! Well, college is wonderful, we decided, but not all fun for here and there we saw students spralled on the grass studying diligently on their lessons.

We hurried back to Union to lunch. The cafeteria at Union is simply grand, and afterward we rested peacefully in the luxurious chairs in the Lounge.

Then we lined up for the parade. We were supposed to have fourth position but after being examined by the watchful eyes of the parade director, we found to our joy that we were the only troop of Girl Scouts entirely in uniform and therefore, they advanced us to the envious position directly behind the leading Boy Scout Band. The flags and banners flying in the breeze, the spirited music played by the Scouts, the erect carriage, and the perfect keeping in step reminded one of "The Spirit of '76" or rather "The Spirit of Young America." We marched proudly up to the football field and took our reserved seats.

The turf on the field held our fascinated eyes and the Purdue band played for our enjoyment. Suddenly we uproariously rent the air with our voices, for here came the Purdue team! They practiced and we cheered; then the Rice U. team appeared and welcomed them enthusiastically. The game began! Most of us had never had the pleasure of seeing a football game. At first it looked rather funny to see some one with

the ball get knocked down and for everyone to pile on top of him, but gradually our amusement changed to interest. We listened intently to what the microphone had to say about each play and soon caught on to the hang of it. We were disappointed that Purvus had a bad ankle and could not play but we became very interested in Cartier and others. Back and forth the two teams went, suddenly a forward pass would be thrown or some one would draw back to punt. Then came the half. The Purdue band played and the snappy, brilliant, military uniforms attracted our attention, with much marching and parading they formed the word PURDUE. The Purdue yell leaders are marvellous acrobats! In the next half Rice made a touchdown! For the majority of us it was our first touchdown, and were we ever thrilled! In the last two minutes of play another Rice touchdown was made and the punter drew back for his kick. He made it and we crowded out of the stands as the final whistle blew to join the crowd in making for the gate.

We enjoyed our trip, and Purdue was very kind to us which we appreciated. The Scouts also thank those who helped us in every way to make this very interesting trip.

### Definition of Calorie

A calorie is the unit by which the heat or energy-producing value of food is measured. Only carbohydrates, fats and proteins are considered in analyzing foods from this point of view, since water, minerals and vitamins provide neither heat nor energy.

### Department of Labor

Originally the bureau of labor was a part of the Department of the Interior. In February, 1906, the bureau was transferred to the Department of Commerce and Labor. The Department of Labor was established separately by act of congress approved March 4, 1913.

### Ranks of Nobility

In a coat of arms, rank is indicated by the coronet, a peculiar form of which exists for every rank of nobility. Helmets also indicate rank, since particular forms were assigned to the various grades of the greater and lesser nobility.

### Diphtheria

Diphtheria was first accurately described in 1765, but the bacillus of the disease was not found until more than a century later.

### Getting Advice

"De trouble about good advice," said Uncle Eben, "is dat a man is liable to git to enjoyin' de fact dat somebody is worryin' about 'im."

### Chinese Jade

"Chinese" jade does not come from China. It is a product of India.

## Grocery Department

We aim to carry a complete stock of staple and fancy groceries of Standard Brands only. You will always find our prices as low, if not lower than other stores charge for the same quality of merchandise, and whenever it is possible for us to secure a bargain in a first-class article we stock it and pass the saving on to our customers.

Our business has shown a nice increase and we have every reason to believe that our efforts to furnish the people of this vicinity with first-class goods at a low price are appreciated by our many customers.

## Our Meat Department

We handle the Swift Brand of meats, and do not believe that their quality can be surpassed. We sell on a very close margin of profit, and you will find that meats purchased from us will cost you no more than you are paying for an inferior grade. If you have not tried our meats, a trial will convince you that the Swift Brand cannot be beat—and the line of print dress goods at very reasonable prices.

## Make Our Store Your HEADQUARTERS

When in town, we are always pleased to have you call whether you wish to buy or not. Remember we have a nice line of print dress goods at very reasonable prices.

LITTLE ELF BRAND IS A GUARANTEE OF QUALITY
