Winners Are Named In Garden Contest

The winners of the "Better Lawns and Gardens" contest sponsored this summer by the Mentone Lion's club were decided last Tuesday and announced by the committee in charge.

After inspecting many attractive lawns and gardens, the committee composed of Chauncey Mollenhour, chairman, Charles Manwaring, H. V. Johns and Ray Riner awarded Mrs. Martha Welch, of Mentone, first prize. Cash prizes for second and third were also given Tucker's Dairy and Jennie Thomas respectively.

In comment, the judges stated that the number of well-kept lawns made naming the winners a difficult problem, and that they are planning to hold a similar contest next year.

At 4 o'clock, Wednesday afternoon, Sept. 25, 6 members of the Mentone Fire Department extinguished a grass fire which was rapidly spreading towards the woods on the Frank Meredith farm, southwest of Mentone.

Mr. and Mrs. Sam Leech spent Saturday afternoon in Rochester.

Fertilizer Prices Low Despite War

Contrary to the sharp advance in price of fertilizer during the last World War, demands of the present war and national defense program have not so far boosted the cost of fertilizer to the farmer.

"New developments in science and technology such as the production of synthetic nitrogen have reduced production costs and prices," says the United States Department of Agriculture in a report which also points out that according to 1910-1914 average the price of fertilizer is considerably lower than the prices of most commodities bought by farmers.

Farmers in the eastern part of the United States in 1939 spent on the average only 4.4 cents of each dollar of farm cash income for fertilizer. If the price of fertilizer had been the same as in 1929 it would have taken 5.8 cents, while if farmers were paying 1920 prices their fertilizer purchases would have taken 8.2 cents of each dollar.

Even though the price paid for fertilizer has declined substantially during the past 20 years, the amount of plant food contained in a ton of fertilizer is now 9 per cent greater than it was in 1920 and 40 per cent greater than in 1920. Fertilizer has also been improved in quality in other ways.

COW'S 'FUTURE' IS PRICE GUIDE

Animal's Age and Productivity Are Important Items.

By DR. GEORGE TAYLOR

(Extension Dairyman, New Jersey College of Agriculture, Rutgers University.)

When buying cows, farmers should consider not only the purchase price but also the age of the animal and the anticipated future period of usefulness.

From the standpoint of maximum milk production, the dairy cow reaches maturity at about five years of age. From this point on, age exerts little influence on the amount of milk produced until the animal reaches 10 to 12 years of age. However, many cows develop udder and breeding troubles before 10 years of age, which terminates their period of usefulness.

The market price of grade dairy cattle is usually the highest at three to four years of age. At this age the heifer has completed one or two lactation periods, thus making it possible to ascertain her general dairy qualities. At three years, the cow has the best part of her productive period of usefulness ahead. After eight years, her market value begins to decline even though she may be at her best in milk production.

On the average, in grade herds in the United States, a cow is milked between five and six years. The replacement rate in this country is considerably higher than in many European countries. Cows in Danish dairies, for example, complete approximately seven lactations compared to five for herds in the United States.

As a basis for a decision as to when a cow is no longer profitable, milk production records as well as breeding records should be kept. Inferior producers and diseased animals should be disposed of regardless of age. High producing cows that continue to be regular breeders should be kept in the herd until they are at least 10 to 12 years old.

Inexpensive Confection Being Made From Whey

"Wheyfers" are an inexpensive new chocolate-covered confection to satisfy America's sweet tooth recently developed by the bureau of dairy industry.

Wheyfers are a light, brittle, porous candy made from the whey, which is a waste product in the manufacture of cheddar or Swiss cheese. The new candy is not cooked but is dried hard and crisp.

Its unusual light porous quality is the result of whipping air into sweetened condensed whey.

To make the new candy, sweet pasteurized whey and sugar are evaporated together under vacuum to a thick smooth consistency, and then whipped until light and fluffy. Chopped nuts and cooked cereal to take away any salty whey taste are added. Then the mixture is rolled out in a thin layer and dried. Cut in small wafers the candy is dipped in chocolate to keep it from absorbing moisture and becoming sticky, or crystallizing.

Sweetened condensed whey, the chief ingredient of this new candy, is cheap and simple to prepare, keeps well, and is easy and convenient to use. It is excellent for making chocolate fudge, caramels, taffy, and various mixtures for the center of chocolates.

U. S. Farm Families Are Really 'Well Fed'

Farm families are the best fed population group in the country. This statement was made by Dr. Louis Stanley, chief of the bureau of home economics in the department of agriculture, Washington, D. C. On the other hand, according to the most recent report, village families are the poorest fed, with city families falling between the two.

The difference lies, it seems in the amount of "protective" foods eaten. Farm families consume an average of about 60 per cent more milk, 15 per cent more butter, and 25 per cent more leafy, green and yellow vegetables than small city families, a diet rich in protein, vitamin A, iron and calcium.

Most farm families owe their excellent diets to home production of generous quantities of protective foods. Every household should learn what foods and how much of each is required to furnish a fully adequate diet, decide what to buy, what to raise, and what to can and store for out-of-season consumption.

Tying Fleeces

Binder twine may be good for hanging up seed corn or pinch-hitting for shoe laces but, use of sisal and heavy jute is a splendid way to get a discount on wool prices when used to tie up shorn fleeces. These twines shed loose fibers into the wool and go through the manufacturing processes as defects in the finished product. Being of vegetable origin, sisal and jute fibers do not take dyes in the same degree as wool, causing trouble in colored fabrics.

One Big Auto Ride

The 25,260,000 autos in America are quite sufficient to take every man, woman and child in the country riding at the same time.

The World Series

Two Minute Sermon

By Thomas Hustwell

NO PLACE FOR A LAZY MAN: When I was a boy I remembered my father saying to me: "Son, there are many references in the Bible that tell of God's forgiveness for a sinful man, but there is no record anywhere that he ever forgave a lazy man." I've thought of that a good many times since then. As I have observed men in the forty and more years since I first heard the expression I am convinced that the statement is true. I can think of nothing more worthless than a lazy individual. He is of no value to himself, his family, his community or the church. He never produces or creates anything. There was never a frontier conquered by a lazy man, a home built, a city built or a business built. He lives upon the toil of others. He takes, but gives nothing in return. There is nothing in God's word that commends the lazy man or promises him any reward. There are many instances where the diligent man is praised and industry approved. This is a world made by creative work, whose institutions are maintained and preserved by toil and industry, and there is no place in it for a lazy man.

Our observation and experience is that the desire common to most men is that they might be able to get up on any and all occasions and make a good speech that would bring the house to its feet. But stop to think, there is only one man in a hundred thousand that can do that.

Disregard for Signs Factor in Accidents

Disregard for warning and caution signs along the state highways continues to be a factor in many of the accidents reported, T. A. Dicus, chairman of the State Highway Commission, pointed out recently.

Failure to stop before entering a preferential highway; disregard for caution signs at hills and curves, and similar failures on the part of motorists to take advantage of the warnings which have been posted for their protection, contribute to many accidents. Every sign along the state highways has been placed to convey some specific message to the motorist, giving him information about his route or warning him of some possible hazard ahead.

Observance of these signs is important at all seasons of the year but especially so during the coming weeks when thousands of motorists will be on the highways to enjoy the autumn scenery.

A CHECK-UP!

Mentone Contains Necessary
Essentials for Growth, Shown
by Nation-wide Poll.

In a nation-wide survey to determine the factors necessary to sustain rural communities against the drain of larger nearby communities, these were noted as essential in the order of their importance—a bank, a newspaper, and a movie theater. Next, a community building, a Chamber of Commerce, a garden club, and a small park development. Such was stated recently in a neighboring newspaper, the Syracuse-Wawasee Journal. The surpassing requisite, however, is an active universal civic spirit. The unselfish desire to serve or do ones bit for the development or improvement of the community. This may be accomplished in a number of ways—giving some time to a civic enterprise counts as does the patronage of home industries.

In an analysis of the above factors, it is seen that Mentone has a banking institution whose strength and character is popular throughout this area; a newspaper with a paid circulation two times that of the average circulation of a paper in a town larger than Mentone.

In the second group must be noted our city hall, which houses a completely equipped fire department with two pieces of up-to-date appa-

ratus, meeting rooms and the water dept.; also our community building, in which each year crowds gather many times to witness an athletic contest, entertainment, or educational program.

The local Lions club amply fills the place of a Chamber of Commerce in the promotion of any local project, together with many social groups which are always working for civic development.

Last, but in no means least, is the progressive business district, about which in itself a newspaper could be filled. Almost every day some modern feature, redecoration, a new product, is added by the Mentone merchants, always striving to serve the farmer or resident completely with quality merchandise.

All in all, Mentone has most of the advantages of a progressive, a prosperous and growing community, so, why not remember to be a booster and "Try Mentone First."

**STATE NURSERIES HAVE
17,000,000 YOUNG TREES**

An inventory of seventeen million young trees growing in the four state forest nurseries was reported today by Virgil M. Simmons, commissioner of the Department of Conservation. These trees will be used in reforestation, windbreak and woodlot plantings on public and private lands during the next few years.

This is the highest inventory reported by the state nurseries and will be further increased next year as a result of additional seed beds planted in 1940. Approximately seven million trees from the nurseries will be available for planting next spring. Orders for these trees are now being filed by the Division of Forestry.

Members of the Mentone Fire Department will inspect all business buildings one day this week, in coordination with Fire Prevention Week, observed nationally October 6-12.

Also, it was announced that any merchant, property owner or tenant who has an accumulation of rubbish or trash in his buildings, may have it removed by gathering it up, placing it along the street in front of his property and notifying Junior Whetstone.

A truck furnished by the fire department will remove it without charge.

Across the Back Fence

Bessie Bybee rushing along street like young school girl, with basket over arm. . . We've heard that there is a law these days against airplanes flying too low around town, so school children with those model airplanes (think as bugs) take warning—or are we wrong? . . . Jackie Blue always "fetches" dad home from barber shop for lunch. . . Annabelle Mentzer displaying cute little knitted coat she is making for niece. Lucky girl. . . Sure would like to know how Lola Tucker is always so fortunate to have at least one escort every day to and from school. To you who don't understand, the two handsome fellows are Bob Anderson and Carl Rush. . . Ralph Arnsberger calling at the top of his voice, "Board, Board for Chicago, New York and all points east," while pretty waitress Louise Wilson stood by laughing. Wouldn't be at all surprised if Ralph left us for a career as train announcer. . . 11 o'clock! How do we know? Why Betty Doran just went past, and she is always on time.

Not Allowed to Play, Boy Commits Suicide

CLINTON, IOWA.—Authorities expressed belief that Roy Hink, nine years old, had committed suicide by hanging because his mother, Mrs. John Wheeler, had denied him permission to go out to play.

The boy was found in the bathroom of his home here, hanging by an electric cord which was tied to a high water pipe.

Loses Sense of Touch, Seems Well

Doctors Puzzled Over Case of Indianapolis Lad.

INDIANAPOLIS.—Two years ago Charles Leonard's teacher in high school pinched him—and nothing happened.

The astounded teacher pinched him again without any perceptible reaction. Finally he was forced to switch to a verbal tack, and that was the first Charles knew of what was happening.

His failure to respond to the pinch also brought Charles to a more important realization—that although he was normal in every other respect, he had suddenly lost all sense of touch. A bit of frantic experimentation in which even a vigorous slap on the back was unfelt sent him hurrying to a physician.

Doctors are still puzzling over the strange case. Although Charles experiences some discomfort from his condition, it apparently is not dangerous. He seems well enough, has the complete use of all his limbs and physical processes, but he takes the coldest weather or even a sock on the chin with the traditional stoicism of Sitting Bull.

Medical experts who studied the boy's history believe the condition resulted from a 220-volt electric shock he suffered when he touched a live wire. Doctors said a slight heart ailment which he has had since long before the appearance of his tactual paralysis appears to have no connection.

Doctors at Indianapolis City hospital indicated that a study will be made of young Leonard's case and that a report would be forthcoming when a satisfactory explanation is found.

The largest fresh water lake in the United States located wholly in one state is Lake Okechobee, Florida, which has an area of 700 square miles. It is about 40 miles long and 28 miles wide.

REPORT AVERAGE OF 51 ACCIDENTS DAILY ON STATE HIGHWAYS

An average of only 51 accidents per day on the ten thousand miles of state highways, including state maintained routes through cities and towns, was recorded during July and August when traffic volume is at a peak, T. A. Dicus, chairman of the State Highway Commission, said today.

One of the interesting features of the study was the fact that 1,082 of the accidents, approximately one-third of the total occurred on the 400 miles of highway routes which were maintained through cities of over 3,500 population. On state highways outside this group of cities, there was an average of one accident to 4.6 miles of road during the two months against an average of two and one-half accidents per mile of city streets.

Accidents reported on state highways during the two months showed a total of 102 persons killed in 85 fatal accidents; and 1,842 persons injured in 1,144 accidents. Four persons

were killed and 456 injured in accidents on highway routes in cities of over 3,500 population. There were 1,932 accidents in which only property damage was reported. 751 of which were inside cities of over 3,500 population.

Two Minute Sermon

By
Thomas Hastwell

WHEN THE BUGLE SOUNDS:
The Arabian horses are noted for
their beauty, speed, endurance and
obedience. When they are a year
old they are put into a corral with
others and their training begins.
They are trained to obey the notes of
the bugle, to stop at its sound. After
the period of training is considered
finished, the horses are put into a
corral and for a considerable period
water is withheld from them, until
they become famished with thirst.
The gate of the corral is then open-
ed and straight and true the horses
rush for the well known water hole.
As soon as they are well on their
way the bugle is sounded command-
ing them to stop. Some rush on un-
heeding, to quench their torturing
thirst, but some turn back to the
corral. Only those who turn back are
used to perpetuate the wonderful
line of Arabian horses. So it is with
men and women today. At God's
commands some turn back but others
rush unheeding on. Only those who
heed the commands and turn back
receive the reward that Christian
living can bring.

482 Pounds!

The heading on this story has probably excited your curiosity as to what, who, when and where? And those are the things that we are glad to tell you. According to a report from the Frozen Locker Plant Friday, they have sold 482 pounds of "Ma Shinn's" pure pork, lean sausage in the last seven days. In fact, the demand has been such that they are having trouble in keeping enough on hand to fill orders. It's made fresh most every day and seasoned to your taste. If you haven't tried it yet, be sure to get your order in right away, and then when you tell your neighbors how good it is, we can brag a little and say, "We told you so!"

CLEVELAND.—When James Wollwebber, 22, was picked up by police for violating his parole he asked to be placed in police lineups "so I can limber up a bit."

As a result he was identified by a restaurant employee as the robber who held him up for \$145 two weeks before.

Once Bashful Man On Hunger Strike

Persistent Swain in Long Siege to Win Blonde.

CLAYTON, MO.—Melvin F. Miller, 30 years old, a scissors grinder and self-ordained preacher, was on a hunger strike in the village lockup recently, his latest antic in a 12-year-old campaign to win the love of Edith Perkins, 31, a blonde stenographer.

He wasted the first six years of his courtship because of bashfulness. He said it took him that long to obtain courage to ask for a date. She went to church with him and refused to see him again. During the last six years he has been more courageous in his pursuit.

He was arrested last October and jailed for disturbing the peace, again recently for having chained himself to a tree for three days two blocks from Miss Perkins' home and, as neighbors complained, "barking like a dog."

"I haven't eaten in five days," he said, "and I won't eat a bite until she comes to see me and brings me food with her own hands," he said.

Miss Perkins, who can cook, learned at the home of her parents of Miller's strike. She was unsympathetic.

"Nuts," she said.

Miller weighs 210 pounds and is six feet tall. He described himself as "sort of a minister" for the Good Samaritan army.

When he chained himself to the tree Miss Perkins, notified by neighbors, summoned Constable Charles Adams, who found Miller in a pup tent beside the tree. One end of the chain was padlocked to his neck, the other to the tree. The keyhole of the padlocks were filled with cement.

Adams filed the chains, took Miller to jail, and asked Miss Perkins what charges she wanted to file. She said she didn't know and didn't care.

"But," she added, "if you don't keep him away from me, I'll take matters into my own hands. All I want is to be left alone. He's been bothering me for 12 years."

Miller said he would never give up his attempts to win Miss Perkins. "She said she wouldn't go out with me if I were the last man

on earth," he said. "Well, I'm not, so I figure that gives me a chance."

Miner in Quiver Seeks Ghost and Finds Bear

NORANDA, QUE.—A superstitious miner looked for a ghost and found a bear.

Abie Wile, employed by Golconda Mines in Duparquet township, heard strange noises emanating nightly from a spot close to the kitchen door where a pile of empty cans had accumulated. So one night he stayed up to investigate.

Eventually, the rattling and shuffling began, broken at intervals by the sound of a can striking a rock.

The ghost-laying Wile elevated himself from his hiding place and saw not Hamlet's ghost outlined against the eerie green of the northern lights, but a Canadian bear eagerly licking the interior of a tomato can.

Deaf for Over a Year, Girl's Hearing Restored

GRAFTON, W. VA.—Totally deaf for 13 months, 18-year-old Eloise Lockard fainted with joy when her hearing suddenly and unaccountably returned.

Miss Lockard's father, Police Captain A. E. Lockard, told how the family was spending a quiet evening at home with Eloise keeping abreast of the conversation by lip reading. Suddenly she asked a brother:

"What did you say? I believe I heard you."

He repeated the statement and Eloise collapsed.

Key in Other Trousers, Firemen Save the Day

BUTTE, MONT.—The versatility of the Butte fire department was demonstrated again, when a local resident advised them that in changing trousers he had left the key to the house "in the other trousers" inside and that the door locked itself automatically as he went out.

The fire department placed a ladder for the man, and he did his own "second story work" of entering the house and getting the key.

Burglars Crack Open Safe

Lead Pencil Invention

The earliest mention of what are known today as lead pencils appears in records dating back to 1565—not long after the discovery of the noted graphite mine at Borrowdale, England, in 1554. This mine furnished the material for the first lead pencils. The graphite was sawed into strips and fastened into wooden casings. In 1795 the Frenchman Conte improved the process by grinding the graphite and mixing it with clay, in order to produce grades of hardness and blackness.

FIRE PREVENTION WEEK . . . Oct. 6-12

October 6th to 12th was known as Fire Prevention Week throughout the nation. The purpose of observing such a week was not to reduce fires in the United States for seven days only, but the increased activities, the radio programs, the newspaper articles, served as a beginning, a foundation for thought and practice of fire prevention to last throughout the year. The maxim, "An ounce of prevention is worth a pound of cure," applies to the damage done annually by fire more than to any other thing.

A fully equipped fire department, while only in actual use perhaps once or twice a month, is the best insurance, the greatest asset, the most protection, that a community may have, with its upkeep, the smallest premium.

A volunteer fireman is always ready without thought of pay, to arise from a sound sleep, to leave a warm dinner, or his work, without hesitation to face any emergency that might arise. Many times this entails ruining a suit of clothes, shoes, or risking life to save another's property.

Also at regular meetings, new methods of fire fighting are studied and problems that might arise in the course of duty are worked out, another donation of a fireman's time.

So, it can readily be seen that the local fire department is an organization deserving the co-operation and support of all citizens of Mentone. Make the fireman's job easier and safer the next time he's called by not speeding to the scene of the fire. Don't follow the fire truck if you're not a fireman. Don't stand too close.

Local Gospel Meeting Is Well Attended

The gospel meeting now in progress at the Mentone Church of Christ, with Evangelist Edward J. Craddock, is well attended and great interest is being shown. Powerful messages are being delivered and an inspirational song service, conducted by H. V. Johns, is enjoyed by all.

These meetings will continue throughout the week, coming to a close with a big Sunday afternoon service. Many people are expected from a distance.

Mr. Vincent, the local minister stated that as Evangelist Craddock must leave Warsaw on the 4:42 train to Chicago in order to meet his next engagement, the meeting will close with afternoon services with no Sunday evening service.

The sermon subjects for the rest of the meeting follow: Tues., Oct. 15, 7:30, "A Young Woman's Confession?"; Thurs., "Wild Oats and First Fruits" (a special sermon for the young people); Fri., "Ten Great Questions"; Sat., "The Unpardonable Sin—What?"; Sun. morn., 10:30, "What is Your Life?"; Sun. afternoon, 2:30, "The Supreme Challenge to the Church."

Bible classes, taught by efficient teachers, assemble at 9:30 Sunday morning. The public is invited to attend any and all of these meetings to hear the gospel preached by this outstanding and brilliant preacher. His messages meet the needs of the day. Come!

Selecting A President

Nellans-Ulmer

One of the season's loveliest weddings was solemnized on Sunday at 6 p. m. at the home of Mr. and Mrs. Karl Ulmer, of one mile southeast of North Manchester, as their daughter, Miss Georgia Ulmer, became the bride of Max Nellans, son of Mr. and Mrs. Herschel Nellans of three miles south of Mentone. Rev. A. R. Eikenberry, professor of divinity, read the vows for the double ring ceremony.

Immediately after the ceremony the couple left on a trip and on returning after November 2, will be at home to their many friends at their newly purchased farm residence near Sevastapol. Members of the immediate families and a few friends attended the wedding.

Miss Ulmer, who was a candidate for egg queen in the Mentone show held last April, was formerly employed as a bookkeeper in the Indiana Lawrence Bank & Trust Co., North Manchester. Mr. Nellans is one of the county's leading poultrymen.

Dr. and Mrs. Urschel have returned to their home in Mentone after a two weeks' vacation trip.

J. M. Preisch, 37, Expires Suddenly After Operation

The entire community was profoundly shocked when it learned of the sudden death of John M. Preisch, 37, Wednesday, October 23, at 11:15 a. m. at the Murphy hospital, Warsaw. Death, due to embolism, followed an operation for hernia which he had undergone an hour and one-half before. He was still under the effects of anaesthesia when he succumbed.

Admired for his friendly smile and genial disposition, "Jack", as the deceased was called by his many friends, always had a cheerful greeting for everyone—patrons and business associates as well. He had been employed by the Co-Operative Association of Mentone for the past ten years and was in charge of the oil department.

Funeral services conducted by Rev. C. G. Vincent were held at the Church of Christ Saturday afternoon at two o'clock. Pallbearers were M. Roy Rush, C. G. Carter, Kenneth Barkman, Herschel Nellans, Herbert Stamates, Fred Aylor; and flower girls were Miss Betty Doran, Mrs. Geraldine Smith, Mrs. Geraldine Clark, Mrs. Fern Carter, Mrs. Mary

Hoosiers planning to hunt ducks, geese or brant during the open season which began October 16, must carry a Federal Duck Stamp in addition to their Indiana hunting license, Virgil M. Simmons, commissioner of the Department of Conservation, said recently.

less of age, must have an Indiana hunting license. Both the license and the stamp must be carried by the hunter.

Waiting Desert Death, Professor Alters Will

PASADENA, CALIF. — Awaiting death from thirst and exhaustion, Dr. John Elliot Wolff, 83-year-old professor emeritus of geology at Harvard university, calmly revised his will as he sat in his automobile stranded in the Mojave desert, where later his body was found.

While funeral services were being held here, it became known he left a codicil to his will in the car pocket. The document substituted the name of a gardener for that of a previous employee, since deceased, to whom he left a small bequest. It was written on the back of an invitation to last June's Harvard commencement.

To make sure it would not be overlooked, he wrote on a napkin which he passed on the windshield of his car: "Last words of John E. Wolff, his will below." His body was found five days after he set out on a desert geological expedition.

Dr. Wolff several years ago gave the bulk of his estate to Harvard.

Two Minute Sermon

By
Thomas Hastwell

MONEY IS HUMAN LIFE: The Scriptures contain many lessons on the use and abuse of wealth. Whenever this is discussed in study groups and Sunday school classes the tendency seems to be to regard the misuse and the abuse of wealth as a practice confined to people of large means. Most people seem to feel that they do not possess wealth and consequently do not and cannot abuse it, or misuse it. For this reason this lesson often misses its mark. To my way of thinking the lesson applies to everyone regardless of his income, whether he is a wealthy industrialist, or stock broker, or whether he is a WPA worker. One can misuse and abuse a small income just as readily as he can a large income. The message of the lesson is not how much one does in dollars and cents, but how much one does in sacrifice and service. Money is human life. A dollar represents so many hours of life. The man of large means receives more in a day than does the man of small means and consequently should give more. The test is not the number of dollars

given, but the amount of sacrifice involved, and the spirit of the gift.

Conservation Club Holds Second Annual Fish Fry

The 2nd Annual Conservation club fish fry was held at the school building last Wednesday evening, with 139 members and friends present.

Ed Halterman won the raffle prize of an Ithaca shotgun. Ninety door prizes were also awarded.

Visual Defects

One-third of the applicants to drive school buses in five North Carolina counties were found to have visual defects. All except one of these rejected failed in two or more visual tests. Three applicants were found to be blind in one eye. Commenting on these figures, the Better Vision institute points out that there are 80,000 school buses in the United States and urges that in the interest of safety school bus operators should be given periodic eye examinations.

**J. M. PREISCH, 37, EXPIRES
SUDDENLY AFTER OPERATION**
(Continued from page one.)

Harvey and Miss Eva Laurien. Interment was in Oakwood cemetery, Warsaw. The Johns funeral home, Mentone, was in charge of arrangements.

Obituary.

John Morris Preisch, son of the late Emanuel and Maud May Preisch, was born April 1, 1903, at Lockport, N. Y., and passed away suddenly in a Warsaw hospital, Wednesday morning, October 23. The span of his life upon earth was 37 years, 6 months and 22 days. On September 24, 1932, he was united in marriage to Miss Mildred Goshert, of Winona Lake. He obeyed the gospel November 24, 1927, being baptized by our beloved J. S. Johns. The measure of "Jack's" faithfulness and devotion is best known to his Maker, Almighty God, who searcheth and knoweth the hearts of all men.

In addition to his wife, he is survived by two sisters and one brother: Mrs. Warren L. Guy, Westfield, Mass., Mrs. Marshall DeVaughn, San Francisco, Cal.; and Donald Preisch, Lawton, Okla. Many friends, neighbors and his fellow workers are deeply grieved because of Jack's passing. Jack had many fine qualities in his

character. He was industrious and efficient, kindly and courteous, cheerful and accommodating. He was a faithful and good husband, a loyal friend and a law-abiding citizen.

He was the first man employed by the Northern Indiana Co-Operative Association when it was organized and with the exception of five months, continued with this thriving local business concern until death removed him from his post as manager of the oil department. Jack will be greatly missed by this entire community.

Don't See Red

Most nocturnal birds are relatively color-blind to reds, and on the other hand, most birds that are active during daytime do not see blue very well, reports the Better Vision Institute. If a mixture of gray and blue grains are fed to chickens, the blue grains will be ignored until the gray kernels have been picked up. Feeding experiments with night birds have indicated that they cannot see reds very easily.
