## THE CO-OP. NEWS NOW A WEEKLY

When this community was without a newspaper the Co-Op. News was put in the field that we of the community might remind ourselves and tell the world of this communities greater accomplishments and superior advantages over any other spot on this revolving sphere.

Our churches, schools, civic organizations and business places needed such a voice and now want it each week. This will require lots of advertisements and news items, which we believe will be forthcoming.

We plan on taking steps soon to change this publication from third class matter to the class of Newspapers that are called second class mail by the post office department. This will make the paper still more valuable and attractive as an advertisement.

Including, passed the church, schools, civic and business leaders of the community we are of the opinion the publication now needs and is ready for a weekly newspaper. Therefore in response to answers to our query regarding the venture, we are ready to announce that with this issue we become a weekly newspaper, which we dedicate to the good of the community.

Miss Jessie Rush is the editor of the publication, and everything pertaining to advertising, news items or articles for publication will be under her supervision.

For the present Miss Rush will be at the Country Print Shop each week day except Friday in the interests of the Co-Op. News.

## Clayton Clutter Speaks.

State Police Officer, Clayton Clutter of Mentone, was the principal speaker at a safety meeting of Elkhart county school bus drivers, held Saturday morning at Goshen. All school bus drivers were requested by the county superintendant of schools to attend.

## Mentone and Vicinity Recognized by Tours From Three States

The vicinity of Mentone has been signally honored this year by the visitation to the community of the 9th Annual Ohio Poultry Tour, the Annual Michigan Poultry Tour, and the numerous county poultry tours from our own state.

The Michigan State Poultry Tour visited our community on July 14th. This tour was led by Professor Moore of Michigan State College. Along with him were Professor Sheer and Professor Connolly and about forty-five prominent poultrymen from their state. Among other places, they visited the Northern Indiana Cooperative Association.

The Ohio Poultry Tour spent July 28th in our county visiting the Silver Lake Egg Farm and Hatchery, the Merkle Poultry Farm, Masa Nelson's, the White City Egg Farm, Creighton Brothers, and the Northern Indiana Cooperative Association. They had lunch at the Mentone schoolhouse. This group was headed by R. E. Cray, Extension Poultryman, Ohio University, and his assistant, C. M. Ferguson.

Several county poultry tours have also visited a few of the poultry farms of our county. They all find the Northern Indiana Cooperative Association an interesting place and marvel at the strides that have been made by this organization during the last five and one-half years.

The big egg show put on by the poultrymen of Mentone also stimulated a lot of outside interest in our poultry section. During this show we attracted visitors from six or eight states, some as far east as New Jersey.

## Rock Phosphate Being Added to Line of Fertilizers

For many years the farmers throughout the corn belt have been using rock phosphate as a source of phosphoric acid in building up the soil. The state of Illinois through its agricultural department has promoted a plan of soil improvement by emphasizing the importance of legumes, lime, and rock phosphate.

The phosphoric acid contained in rock phosphate is not so readily available to the soil as the phosphoric acid contained in acid phosphate. However, phosphorus is available to the soil over a period of many years serving as a permanent improvement to the soil.

A ton of rock phosphate contains about twice as much plant food as a ton of 16% acid phosphate. The usual application is from five hundred pounds to one ton per acre to be broadcast on plowed ground and disced in or applied to the prepared seed-bed and harrowed in. If drilled in for wheat, smaller applications may be made—two hundred to four hundred pounds per acre.

The Northern Indiana Cooperative Association is stocking rock phosphate for the first time. Although this product is new in our community, they feel the farmers will recognize the importance of this plant food in working out a plan for permanent soil improvement. The price per ton is much less than most fertilizers.

## SODALES CLUB

Mrs. Elanore Manwaring was a lovely hostess to the Sodales club Friday, Aug. 28. All the members were present except two. Five tables of rook progressed with Turl Nelson having highest score and Golda Mollenhour second highest. Mrs. Maurice Greulich and Mrs. George Nye were guests.

**Maeterlinck's Drama**  
Maeterlinck's dramatic works are characterized by mysticism and symbolism. He created the so-called static drama.

### Europeans Explored Ohio

Ohio was explored by Europeans in the latter part of the Seventeenth century. It was the pioneer state of the old "Northwest Territory"—which embraced also what is now Indiana, Illinois, Michigan, Wisconsin and the northeast corner of Minnesota. It was the battleground of the Indian tribes. The French explorers tried hard to get a foothold in this rich territory. They planted leaden plates at the mouths of the rivers and sought to back up these claims to sovereignty. John Bull later set himself up as master of all this region, says Pathfinder Magazine, and in 1774 the British parliament passed an act annexing Ohio to Canada.

### Rembrandt Fooled Public

The famous Dutch painter, Rembrandt, being at one time hard up for money, gave out that he was dead and his paintings, finished and unfinished, would be sold at auction. Crowds flocked to the auction to buy some of the last works of so famed an artist, the most trifling work fetching handsome prices. When the people found the trick out he was never esteemed or trusted again.

### Rise and Fall of Styles

In Queen Anne's reign, at the beginning of the Eighteenth century, it became fashionable for women to appear on London's streets in their nightgowns, a fashion which came to a quick end when a woman was executed in a garment of this description. Another example of negative prestige killing a new fashion was the sudden disappearance of "bloomers" in 1851, when a London brewery dressed all their barmaids in this costume.

### President's Cottage, W. Va.

The President's cottage at White Sulphur Springs, W. Va., was built in 1816 and restored in 1932. It was the summer home of Presidents Tyler, Van Buren and Fillmore. The building houses the Old White Museum, containing memorabilia of the Springs.

## Getting Ready to House the Pullets

By Hobart Creighton

The time of year has again rolled around when poultry men are housing or getting ready to house their crop of pullets. If one has a fine, healthy flock of pullets at this time of year, he has whipped ninety percent of his poultry troubles. If the flock is contaminated with worms, it is advisable to give them a treatment. An individual treatment is generally regarded as best. Iodine vermicide is usually considered one of the best worm remedies. It is more difficult to administer and the remedy itself costs more money. It does not throw birds off production and seems to stimulate rather than retard egg production.

One should be very liberal with feed at this time when the birds begin production. Self feeding grain as well as mash is considered a good practice. The grain may be fed equally as well by hand if the feeding is in the hands of one who has had experience. Shelled corn, wheat and oats, each fed in separate hoppers, make a very good grain ration. When one combines this method of feeding grain with feeding Banner Laying Mash in open hoppers one's feeding problem is simplified. Some people feed condensed buttermilk and wet mash. Some get along equally well without it. A liberal feeding of milk, however, is considered a very good practice.

One of the principal losses sustained by poultrymen all over the country is that of cannibalism. Various methods have been taken to reduce these losses and the last few years poultrymen have resorted to mechanical devices. The most favored of these at this time is the Pikkard. These appliances are placed on the beak of the bird in such a manner that they do not interfere with the bird eating and at the same time prevent one bird from picking another. Many poultrymen are equipping their pullets with these Pikkards when the pullets are placed in the laying house.

One other important consideration at this time of year is the renovation

tion of the hen house. It is considered the best practice not to put a new crop of pullets in a building with old hens. This is because any difficulty which might have existed with the old hens in the past year is likely to be passed on to the new crop of pullets.

The laying house should be vacated, cleaned thoroughly, scrubbed, rinsed, and disinfected. Many people take advantage of the time the house is vacant to do any necessary repairing. A leaky hen house is not only a nuisance so far as the operator is concerned but at the same time makes it very difficult for one to get the best results from his birds. In disinfecting the laying house after it is thoroughly cleaned, many are using Cresol compound mixed with water. About a gallon is used to forty gallons of water. Some are using heat. This is applied by means of the commonly called fire gun or oil burner. After the house is thoroughly cleaned, disinfected, and repaired and filled with a good crop of healthy pullets, well fed and cared for, the owner begins to feel a sense of satisfaction for all the hard work he has done during the summer to raise his pullets. With advancing egg prices pullets that are producing well at this time of year are beginning to make their owner money.

The people of our community are indeed fortunate in being able to ship their eggs cooperatively to New York thereby receiving from five to ten cents a dozen more than our poultry competitors not many miles distant. The heavy concentration of poultry in our community also enables a distribution of high quality feed at a lower price than is paid in most parts of the country. Even though feed prices are high, good poultrymen are looking forward to this fall and winter with high expectations.

### Cultivation of Rice

The process of the cultivation of rice includes, step by step, the raising of the seedlings in the seed-bed, the puddling and preparation of the rice fields themselves, the after cultivation and irrigation, and lastly the harvest, thrashing and storage of the grain and straw.

### Suspicion of Others

He who is habitually suspicious of others is himself untrustworthy; and he who judges another is guilty of those very faults he condemns.

### Fine Legislators

Indiana will fine up to \$1,000 a member of the legislature who intentionally absents himself to break a quorum.

### Avenues of Trees Long Popular

Avenues of trees in straight rows, miles long, across forest or countryside, were popular in the 17th century in Europe.

### Feathered Legs of Eagle

The sea eagle, feathered to the knees, was first used as the U. S. emblem, but today the golden eagle, feathered to the toes, is employed.

### Bell-Ringing an Art

Few arts have greater scope and variety than that of bell-changing. The ringing of bells in church towers and belfries to create tuneful combinations. Although four bells will produce only 24 changes, eight bells will give 40,320, while twelve bells make possible 479,001,600 variations without a single repetition. —Collier's Weekly.

## Husband Jokes; Wife

### Yawns for 90 Days

Victoria, B. C.—After 90 days of continual yawning, Mrs. P. E. Wakellin, resident here, appears now to be recovering. The yawning attacks started last September when her husband cracked a joke. Mrs. Wakellin laughed. Then yawned—and for 90 days she continued yawning at intervals of four or five seconds. She is still yawning—but at longer intervals. Mrs. Wakellin has not lacked advice. She has received an enormous "yawn" mail and letters are still arriving at the rate of 40 a day.

## TOMB OF SAINT IS RIFLED BY BANDITS

### Vienna Church Is Invaded by Impious Robbers.

Vienna, Austria.—The tomb of St. Josaphat, a Roman Catholic saint, in Vienna's St. Barbara church, has been pilaged.

The glass shrine on the altar, containing the relics of the saint, was broken by burglars, and a heavy golden chain with a cross, the pious donation of Archduke William, was stolen.

Josaphat was a Catholic Basilian monk who became archbishop of Polock, eastern Poland, in the early sixteenth century.

In 1623 he was killed by rival Russian Pravoslavian priests in a fight from death when he was attacked by two gigantic Rocky mountain sheep while driving cautiously along an ice-coated mountain road. One of the animals lunged headon at the car and struck it a terrific blow, almost knocking it from the highway. One of the passengers in the automobile was knocked into Lord's lap, but no one was injured.

The tomb of Josaphat, who was beatified 20 years after his death and subsequently canonized, soon became the center of pilgrimage for Roman Catholic Ukrainians.

During the war between Sweden and Russia in the late Seventeenth century, which largely was fought in that region, the bones of the saint had to be moved frequently to thwart thieves and desecrators.

After the war they were restored to their original shrine in Polock, but did not remain there long.

When Czar Peter the Great, in his efforts to suppress an uprising of the Ukrainians, threatened to burn the relics of their national saint, a Prince Radziwill secretly transferred them in 1705 to Biala, where he founded a Basilian monastery and a church in honor of the saint.

There they rested for more than a century and a half in a beautiful silver coffin under the main altar.

The coffin disappeared during the Polish uprising against the czars in the early 60s of the last century.

In 1917 when the district was occupied by Austrian troops an old peasant appeared before the Austrian commander and told him that the saint's bones had been immured under the Biala church.

There they were found, but without the silver casket, and Emperor Charles had them transferred to St. Barbara's church in Vienna.

A wealthy Canadian family of French extraction by which the saint was held in particular veneration provided the new silver and glass case, and Archduke William, who was a pretender to the throne of Ukraina, gave the golden chain and cross which were stolen so recently.

## Talking Kettle Mystery

### Solved by Repair Man

Portland, Ore.—The ghastliest crime thriller of them all couldn't hold a candle to Portland's "mystery of mysteries." For instance:

Suddenly, in the dead of night, the lights would flicker, glow brightly for a few minutes and then slowly fade out.

The teakettle talked.

And worst of all, the washbowl in the bathroom whispered!

It looked like another "haunted house" was about to join the list, when a "radio doctor" saved the day.

He noticed a similarity between the teakettle's voice and the voice of an amateur radio operator next door. A check of the teakettle's conversation and the operator's broadcast verified his suspicions. A further check revealed the queer goings-on occurred only when the operator was transmitting on 80 meters.

The radio doctor's explanation was a bit technical, but left no doubt as to the cause of the odd incidents.

## Fighting Sheep Attack

### Auto on Mountain Road

Yellowstone Park, Wyo.—C. A. Lord, park engineer, had a narrow escape from death when he was attacked by two gigantic Rocky mountain sheep while driving cautiously along an ice-coated mountain road. One of the animals lunged headon at the car and struck it a terrific blow, almost knocking it from the highway. One of the passengers in the automobile was knocked into Lord's lap, but no one was injured.

## Radio Commencement Exercises

More than 200 widely separated chapters of the American Institute of Banking the educational section of the American Bankers Association, hold annually in September a simultaneous commencement exercise at which they listen to the speaker of the evening by radio. This is said to be the most extensive graduation ceremony held by any educational institution. The aggregate membership of the chapters, which are located in cities and towns throughout the United States, totals about 35,000 bank employees and officers. The graduates number each year more than 2,500, and total graduates are now over 25,000.

## The Business Outlook

NEW YORK The natural forces of recovery have demonstrated their strength and have a momentum which may reasonably be expected to carry the country into new high ground, says "Banking," the publication of the American Bankers Association, in its August issue. The momentary stimulation following the distribution of bonus funds to the veterans has practically died away and is no longer an important business factor. A certain degree of uncertainty arising from the national political campaign is unavoidable, the magazine says.

## Foreign Trade

The Commerce and Marine Commission of the American Bankers Association has made a report which shows that the foreign trade of the world for the year 1935 on the basis of its estimated physical volume was 78.9 per cent of the 1929 level. This was 2.1 per cent above the volume of 1934 and is the highest since 1929. The gold values of world trade were much lower due to the lower commodity prices in January, 1936. The combined index of 75 countries showed 35.7 per cent of the 1929 average.

**Diet of Japanese Beetle**

The Japanese beetle was introduced into the United States in larval form in earth around the roots of a plant from Japan. The adult beetle, which is about three-eighths of an inch long and about the same width, prefers to eat apples, quinces, peaches, sweet cherries, plums, grapes, blackberries, clover and corn. When these are not available, it attacks the foliage of shade trees and ornamental shrubs. The adult beetle is bright metallic green in color, with coppery brown wing covers. It flies easily; and has a voracious appetite. There is only one generation each year, five-sixths of the time being spent in the soil as egg, larva or pupa.

## FURNITURE STORE QUITS BUSINESS

Owing to the continued illness of I.F. Snyder, he disposed of his entire stock of furniture and fixtures at public auction on Friday of last week and Mentone is now without a furniture store.

This is the store that was conducted by the late L.P. Jefferies for so many years and was one of the oldest mercantile establishments in our village. It is very probable that our village will never have another furniture store as this line of business is fast disappearing from all small towns.

However this leaves vacant an ideal building in a good location for a good large general store, and we think that an establishment of this kind could be successful and of great benefit to the community.

## Mentone Wins First Ball Game

The Mentone Bulldogs won their first scheduled baseball game of the season from the Beaver Dam nine by a score of 4-2. The game was played on the home diamond. The program opened with the reading of the club collect which was followed by group singing led by Mrs. Hamlin of Etna Green. Talks were given by the first vice-president, Mrs. Edna Burns, the second vice-president, Mrs. Grace Weisert, and the county chairman of Child Welfare, Mrs. Orpha Blue. Mrs. Ida Scott gave a very inspiring talk on the work of the reading course of the E.O.S. She also related some interesting incidents of her vacation trip through the Rockies. Mrs. Bridenthall, county chairman of Federated Clubs, gave quite an instructive talk concerning the purpose and work of Federated Clubs. The program ended with a very comprehensive report of the state convention given by Mrs. Hamlin.

During the social hour dainty refreshments were served by the hostess. Those present besides the regular club members were Miss Edna Lower of Warsaw, Miss Anna Murdock of South Bend, Mrs. Eva Hall and Mrs. M. P. Bridenthall of Leesburg, Mrs. Good and Mrs. Hamlin of Etna Green, Mrs. Paul Smith, Mrs. Walter Bowers, Mrs. Emery Harrison, Mrs. Earl Shinn and Mrs. Irvin Nelson of Mentone.

## Set Date for State Corn Husking Contest

Dave Thompson, Indiana editor of the Prairie Farmer, announced Nov. 6th had been selected as the date for the Indiana state corn husking contest near Marion, the winner of which will compete in the national contest in Licking county, Ohio, four days later.

Announcement of the date was deferred pending the setting of the date for the national contest, which had to be moved from Missouri to Ohio because the drought had ruined the field selected in the former state.

Two fields on the Bartel farm, near Marion, which were planted especially for the state contest, are in good shape, Mr. Thompson said, and no transfer of site is necessary in Indiana.

County contests will be held prior to the state contest. The winners qualifying for the state meet, won last year by Lawrence Pitzer of Fountain county, who was third in the national contest won by 26-year-old Elmer Carlson, of Audubon Co., Iowa.

## Mentone Boy Wins At State Fair

Pack Plant, for scoring ability of stock. He also won a special prize given by the horse and mule association of America. A medal also was given him for high scoring of sheep.

The attendance record at the fair was broken on Labor Day by a record of 110,431 paid admissions.

## TALMA LOSES TO MONARCHS

A large crowd of fans attended the Base ball game at Talma, Sept. 6, when the Talma Boosters lost a heart breaking game to the A. C. Monarchs. This colored team from South Bend, defeated the Boosters by

a score of 5-4. This was the first defeat for Talma this season. The visitors scored three runs in the first inning while the Boosters failed to score until the second inning when they scored two runs. The score was tied 3-3 in the fifth inning. Barkman pitched the first eight innings but Creighbaum finished the game for the Boosters.

The Argos Merchants of Argos, Ind. will come to Talma for a return game with the Boosters soon.

## Animals Increase in West

Antelope, deer, elk, moose and mountain sheep, long threatened with extinction, have been staging a comeback. In our national forests there has, says the Scientific American, been a general increase in the last several years in the numbers of these game animals, according to a report from the forest service. The last estimate shows an increase of about 600 in the number of antelopes in Western national forests during the preceding twelvemonth. This brought the total to about 15,000. Deer increased by about 100,000, bringing the total to 1,040,000. Elk increased from 15,000 to 120,000, and the count of moose went up to more than 8,000. Mountain sheep increased to 13,000, but mountain goats decreased slightly to 17,900.

## Fishing for Hens

Fishing for hens with improvised line and bait, is the method devised by a native at Dundee, Natal, for "poaching." A farmer in the district discovered that his prize Rhode Island Reds were gradually disappearing. He informed the police. A native was later arrested not far from the farm with five fowls in his possession. In his pocket was a long piece of string with a mealie (Indian corn) fixed on one end. The man had apparently thrown his line and "bait" in the farmyard, and when the fowl had swallowed it he quietly pulled it in, seized the chicken, and removed the mealie for use on another occasion.

## PLAN HUGE LINERS FOR U. S. SERVICE

### Ships Would Revolutionize Transatlantic Travel.

New York.—Two "super-cabin liners" for the American merchant marine—ships of such size and speed that they would revolutionize transatlantic travel as it is now known—have been designed and their construction proposed by Paul W. Chapman, banker and former president of the United States lines.

As designed by Chapman and his associates each ship would have a displacement of 100,000 tons, a length of 1,250 feet, a beam of 144 feet, a cruising speed of 34 knots with 4 knots reserve power and would accommodate 10,000 passengers, exclusively cabin class.

#### First Time Designed.

Ships of this magnitude have heretofore existed only in the dreams of the shipping world, but have never yet been built or even, as far as is known, designed.

As compared with the French liner Normandie, now the largest ship in service, these proposed vessels would be roughly 20 per cent larger in all specifications except speed, and would carry more than 100 per cent more passengers. They also would be larger than the Queen Mary, England's latest giant of the seas, now nearing completion.

If put into operation in the North Atlantic they would compete with all passenger ships except the largest and fastest luxury liners, and because, as proposed, they would make weekly sailings, crossing the ocean in four days at a standard rate of \$50 per passenger, the doom of the smaller passenger ships might easily be seen.

#### Demand for Liners.

Chapman said:

"The great demand today is for ships like these. They must be built, and they will be built by some one. The question is, shall we, who contribute 85 per cent of the transatlantic passenger traffic, construct them first, or let some foreign nation do it?"

The cost of constructing and equipping both ships, estimated at \$100,000,000, was suggested by the Chapman organization to be advanced by the federal government, to be paid back to the government by the operating company which chartered the vessels in annual payments of \$10,000,000 for ten years.

### Riddle of Delphi Oracle Still Baffles Solution

Delphi, Greece.—The riddle of the oracle here, which was known throughout the ancient world for its prophecies, remains unsolved, although excavations and research in the ancient city have gone on for more than 40 years.

According to the story of the origin of the oracle, its site was discovered by a goat herder, who found his herd crying and prancing wildly about a

chasm from which issued a stream of intoxicating air. This cavern has disappeared in modern times, or else never existed.

Many archeologists today hold to the last theory, despite records left by the ancient geographer Strabo and the Greeks themselves. Some, on the other hand, believe it was filled in with debris after the temple connected with it was demolished, toward the end of the Fourth century. Another theory has it that the cavern was closed by an earthquake.

Scores of travelers visiting Delphi to see the ruins continue to search for the chasm, basing their hopes on ancient writing about the procedures before the oracle gave its prophecies. According to these records, the priestess in charge did not prophesy until she had breathed the air of the chasm and became intoxicated by it. A priest then took down her words, later putting them into verse. Thus the message of the oracle was given out.

### Unique Clock Found in Hawaii Was Queen's Gift

Honolulu.—Recent discovery in Hawaii of an extraordinary clock given by Queen Liliuokalani to a church in 1890 recalled days when Hawaii was a monarchy rather than an integral part of the United States. Liliuokalani was the last royal ruler of the islands, now American territory.

The royal gift is a round wall clock, 32 inches in diameter. Figures around the outside of the 24-inch dial are numbered 1 to 31, telling the day of the month. An eight-inch dial above the center tells the hours and minutes, but instead of the numerals the 12 letters in the queen's name record the hours. Another dial gives the phases of the moon. A still smaller dial indicates years and leap years. The complete device is operated by a single spring.

### British Expedition Will Hunt Cleopatra's Temple

London.—Efforts to trace remains of Cleopatra's temple, which the Egyptian queen built in honor of the birth of her son, will be made by a British expedition which will leave for Luxor shortly.

Oliver Myers, leader of the Sir Robert Mond expedition of the Egypt Exploration society, also hopes to get further information about an incident of civilization at Armanet, which, it is believed, was connected with that of the peoples of the south Sahara, as far west as Timbuctoo.

#### St. John Died of Old Age

Tradition states that St. John died of extreme old age at Ephesus in Asia Minor, between 90 and 100 A. D.

#### "Wildcat" Oil Wells

Among oil men a "wildcat" is an oil well drilling operation in new or undeveloped territory, or "out among the wildcats." The driller is known as a "wildcatter."

Ray Middleton sold a new Ford V-8 to Mr. and Mrs. Geo. Fligal Monday of last week.

#### No Rifles at Bunker Hill

Although the so-called Kentucky rifle, a highly accurate weapon within the limits of its range, had been in use in America since 1730 and was employed to some extent by colonial soldiers in other battles of the Revolutionary war, it is recorded that there was not a single rifle on the field at Bunker Hill, observes a writer in the Chicago Tribune. All guns were smoothbores, those of the British muskets, those of the Americans either old, heavy Queen Anne's muskets, Spanish fuseses, antiquated French pieces, or home-made weapons. Very few of the Americans had bayonets.

#### Forbidden Fruit

Coco de mer is the real Forbidden Fruit of the Bible. According to tradition, Adam and Eve had their Garden of Eden in the Seychelles, which lie between Africa and India.

## Former Mentone Woman Expires

Mrs. Lydia Zentz, 86, a former Mentone resident and daughter of Mr. and Mrs. William Clark, early pioneers of Kosciusko county, expired of pneumonia early Tuesday morning Sept. 8, at St. Joseph hospital, Ft. Wayne.

She was born January 6, 1850 near Milwood in this county and about ten years ago left Mentone to live with her son, Arthur Zentz in Ft. Wayne. Pneumonia terminated a long period of illness. She was seriously injured in a fall down a flight of stairs a few weeks ago and had not recovered when she was taken to the hospital.

She was the widow of the late Solomon Zentz, and she is survived by one son, Arthur Zentz, of Ft. Wayne, and six grandchildren, Gladys Pletcher, of Warsaw; Marie Burer, of Ft. Wayne; Charles Zentz and Dorothy Zentz, of Ft. Wayne; J. Rupert Lehman, of Crown Point, Indiana; and Madeline Klein of Niagara Falls, N.Y. She is also survived by one sister, Mrs. William Guy of Atwood, and a number of other relatives and a great number of friends. For the last several years she has made her home with her son, but prior thereto she and her family lived for a great many years here in Mentone. She was a member of the Mentone Methodist Episcopal church and the Order of Eastern Star of Mentone.

Due to the Methodist church being under repair the funeral was held at the Reed Funeral Home at two o'clock, with Rev. DeWitt officiating. Burial was in the Mentone cemetery.

## WEDDING

On Saturday, Sept. 5, Miss Vera Marie Kurtz of Kendallville, became the bride of Mr. Lewis Foor Jr. of Mentone. They were accompanied by Mr and Mrs. Lewis Foor Sr. The newly-weds took a short wedding trip and returned to Mentone Tuesday evening, Sept. 8. They have taken an apartment on N. Tucker St.

## County Ranks First in Poultry 4th in Milk

Kosciusko county ranks fourth among Indiana counties in the production of milk and number of cows milked, according to a report released Friday of last week by the Bureau of Census.

Kosciusko county, which holds the record for the production of poultry and eggs in the state, is not far behind in milk produced.

## Kosciusko County Team Wins Match

Here is further proof that Kosciusko county is a producer of exceptional horses. A team of horses weighing 3200 pounds and owned by Truman George, Milford and E.M. Ulmer of Etna Green, took first prize of \$50 in a horse pulling contest at the Van Wert, Ohio, fair last Tuesday, Sept. 8. A total of 15 teams were entered in the contest including the state champion team.

The team owned by the Kosciusko county men pulled a total of 6,835 pounds the required distance of 27½ feet to beat the champion team of Ohio by one foot. The team was entered in the light-weight class for teams 3200 pounds and under. It was driven by Claude Thomas, well-known Etna Green farmer. The team will be entered in the Kosciusko county fair at Warsaw in two weeks.

## REA In This County

The Whitley County Rural Electric Membership Corporation, Columbia City, has contracted for a total of \$416,000 to build 383 miles of line which will serve 1,203 customers in Whitley, Allen, Huntington, Wabash, Kosciusko, and Noble counties. This supercedes a previous loan contract for \$84,000. Wholesale power will be purchased from the Columbia City municipal plant.

## Octopus a Food Favorite

Jelly-fish are relished as food by both the Chinese and Japanese. Octopus, squid and allied sea creatures also are food favorites in many parts of the world.—Gas Logic.

## No Alligators

The outstanding feature of animal life that will be most often noted by the visitor to Porto Rico is the absence of the alligator, crocodile, common toads and rabbits, generally linked to tropical climates, and the scarcity of snakes.

#### Lime Juicers

Lemons are grown in this country; limes are not—at least not enough to supply the demand. And yet there are enough people in the United States who like lime drinks to justify the importation every year of five or six million pounds of the little, greenish-yellow fruit from the West Indies and other foreign lands. The reason limes are not home-grown is that they require a warmer climate than lemons and other citrus fruits, although they are grown to a limited extent in frost-free sections of Florida and the Keys. Specialists in the United States Department of Agriculture have recently developed a cross between a lemon and a lime which seems to be harder than the lime and full of acid juice. They have named it the "Perrine" and it may be suitable for home-garden culture in the warmer parts of Louisiana and Texas as well as Florida.—The Country Home.

#### Smallest British Church Closed

England's smallest church has been closed with the exodus of the congregation. It stands in the middle of a thick wood on the Pownall estate at Wilmslow. Built of wood and stone, the church is 15 feet long, 12 feet wide, and 14 feet high, and until recently had an organ, a pulpit, pews for 12 people, and stained glass windows. The late Henry Boddington, of Manchester, a founder director of the Ship Canal company, built it of stones gathered from ancient temples all over the world.

#### New Teeth for Whale

Workmen engaged in restoring a whale for exhibition purposes at the Santa Barbara Natural History museum were not to be daunted when the big sea mammal was found to be minus a number of teeth. False teeth were made to take the place of those that were lacking.

### OUR VOICES CHANGE AFTER WE EAT MEAL

When is your voice normal? Practically all the time, most people think; yet, actually, one's voice varies in tone from minute to minute, states a writer in Tit-Bits Magazine.

Microphone engineers in Hollywood, worried because film stars' voices seemed to change unaccountably at different times of the day, arranged tests to discover the cause. They found that after a meal a person's voice varies tremendously from the pre-meal voice. In some cases the change was so marked that the recording engineers found that people unacquainted with the speakers thought, when the sound track was played over to them, that they were listening to two people speaking instead of one.

A further complication arises from the fact that, as the time since the last meal lengthens so the speaker's voice varies more and more in tonal quality. It is believed that at only one individually ascertainable time, somewhere midway between meals, is each person's voice at its normal pitch.

#### Relics of Hittites Found

What is believed to be the first step toward the discovery of the lost Hittites, who appear in the Bible as a great Imperial power, has been found in Asia Minor. In a 4,000-year-old tomb was discovered a Hittite statue of a bull, seven inches high

and inlaid with gold. The silver-smith's art is astonishingly modern, and indicates that the race was cultured rather than primitive as previously believed. The discovery has aroused great interest among European archeologists because previously nothing had been known of the Hittites' work except rock carving and a few potsherds.

#### In Futurity Races

In futurity races the dam is entered before the foal is born, or the foal is entered when a few months old. The race is not run until the foals are two-year-olds. The three important futurity races in the United States are: The Futurity, Westchester Racing association; the Pimlico Futurity, Pimlico, Md.; the Breeders' Futurity, Lexington, Ky.

#### Cat Guards Master's Grave

For seven months a tomcat has been guarding the grave of his master, a fishmonger at Rehau, North Bavaria. Unable to attend the funeral, the pet found its way to the grave, and since then from dawn to dusk it has sat there, spitting at all who approached. Frequently he has to be taken home at night by force for feeding.

#### Sixth of Montana in Forests

More than one-sixth, or approximately 25,000 acres, of the area of Montana, third in size of the states, is national forest land, says Gas Logis. One-fifth of Colorado, seventh state, and one-seventh of Wyoming, eighth in rank, are also incorporated in Uncle Sam's great outdoor playground.

#### Fever Bush

Fever Bush is a shrub, common in the northern United States, growing from 4 to 15 feet high. The bark is aromatic and a decoction is used as a stimulant in fevers. The berries are bright scarlet in autumn and occasionally have been used as a substitute for allspice. The shrub is sometimes called spicebush and wild allspice.

## J. E. S. LODGES INSPECTED BY GRAND MATRON

The annual inspection of Pierceton Mentone and Warsaw chapters of the order of Eastern Star was held Thursday evening of last week at the Masonic Temple in Warsaw.

A delicious dinner was served at 6:30 o'clock by the M. E. Calendar Club at the Masonic Temple. The dining room was very attractive with baskets of flowers and other decorations carried out the colors of the Worthy Grand Matron, green and orchid.

The Worthy Grand Matron, Mrs. Mary Frances Price, from Vincennes, Ind., was the inspecting officer. Other officers from the state were, Mrs. Magrane, Grand Esther, of Mishawaka, Indiana, and Mrs. Inez Annis, District Deputy, of Bremen. Other guests were from Mishawaka, Plymouth, Columbia City, Syracuse, Leesburg, Mentone, and Pierceton, numbering in all 150.

The opening ceremony was given by Pierceton, and Warsaw officers initiated two candidates, Mrs. R. A. Anglin and Mrs. Russell Knoop, with Mrs. Mildred Essig singing for the ceremony. Mentone officers gave the closing ceremony. Impressive and instructive remarks were made by the Worthy Grand Matron and other guests.

Approximately twenty five officers and members of the Mentone Order of Eastern Stars attended.

## Birthday Surprise

The children, grandchildren and great grandchildren of Mr. and Mrs. Albert Tucker surprised them at their home Sunday in honor of Mr. Tucker's eighty-seventh birthday. Fortynine were present to partake of the feast at the noon hour. The twelve-foot table positively groaned with the weight of the many good things to eat. There were two tiered birthday cakes, one of which was decorated with eighty-seven candles. In the afternoon there were several callers and ice cream and cake was enjoyed. There was also several floral expressions of congratulations. Those who were present to help Mr. Tucker celebrate were: Mr. and Mrs. Ivan Tucker and family, Mr. and Mrs. Leonard Summe and family, Mrs. Ida Huffer of Claypool, Mr. and Mrs. Arther Getty, Silver Lake, Mr. and Mrs. John Getty, Chicago, Mr. and Mrs. Una Tucker, Rochester, Mr. and Mrs. Maynard Summe and family, Mr. and Mrs. Boyton Garman and family, Claypool, Dr. and Mrs. Frank Tucker, Mr. Jake Kern, Mr. and Mrs. Ernest Igo and family, Mr. and Mrs. Dean Nellans and family, Mr. Darrel Tucker and daughter and Mr. and Mrs. Albert Tucker and son Rex.

Afternoon callers were Junior Whetstone, Lucille Stutzman and Annabel Long. The News joins the family in wishing Mr. Tucker many more happy birthdays.

## Wedding Anniversary

A surprise dinner was held at the home of M. and Mrs. C. B. Cole in honor of the 60th wedding anniversary of Mr. and Mrs. S. S. Mentzer. Those present were Mr. and Mrs. Mahlon Mentzer and daughter, Annabel, Mr. and Mrs. Chas. Cole, Mrs. Jane Blue, Mrs. Louise Morgan, Mr. and Mrs. S. S. Mentzer and Mr. and Mrs. C. B. Cole and family.

## Many Jobs For One Person To Handle

Few people realize the many positions held by Miss Jessie Rush, the editor of this paper. All she has to do is to gather news, re-write all articles for publication, solicit advertising, keep the books, collect all accounts, make weekly and monthly reports to the company and address, fold and mail each issue of the news. This she is supposed to do in three and one-half days. The other two and one-half days of the week she puts in operating the typesetting machine and feeding presses at the Country Print Shop.

Surely holding all these jobs at one time is enough to turn the hair of most anyone gray—but not so with Miss Jessie, as she is always "Red-e" to accept news items with a pleasant smile and thank you.

And by-the-way you can make her work much lighter and assist in making this a better paper if you will write up any news that you have and hand same in at the Country Print Shop, any day of the week—just state the facts and she will arrange it for publication. Give her a hand please, she is striving to give you a good paper.

## ECONOMICS CLUB

The Mentone Home Economics club held a very enjoyable meeting Thursday at the home of Mrs. Edith Darr, with the ladies of the Tippecanoe club as their guests. The meeting was called to order by our president Mrs. Eva Laird. After singing "I need thee every hour," and repeating the club creed, the secy's report was read and approved. Roll call was answered by scripture quotations.

Mrs. Pauline Weissert then gave the welcome address to our visitors which was responded to very graciously by Mrs. Maud Laird of the Tippecanoe club. A fine program was given by the visiting club after which home made ice cream and cake were served to about fifty members.

## HOG CHOLERA IN COUNTY

Warning to local farmers that outbreaks of hog cholera have been reported in Kosciusko county, near Mentone and Warsaw, and that steps should be taken immediately to protect all hogs, was received here today from the American Foundation for Animal Health.

Cholera travels so fast, and infection is often so bad, that immediate steps are necessary to guard against serious losses, officials warn. As this is the tenth year in hog cholera's ten-year cycle of virulence, the disease is expected to be in its worst form this season.

The bulletin urges local farmers to have their hogs immunized against cholera immediately, with protective serum. And at first signs of sickness, a veterinarian should be called, to inspect the herd and take what steps are possible to prevent further losses.

Farmers are also warned in the bulletin that only veterinarians should supervise immunization, disinfection, and other precautions against the epidemic.

They are also urged to keep out of neighbor's hog lots, and to prevent strangers, stray dogs or swine from entering thereon, as these often contribute to the spread of the disease.

### Mustard Oldest Spice

Mustard has been put to many uses that have nothing to do with ham sandwiches or corned beef. It is one of the oldest known spices, and among its earliest uses was its application to scorpion bites, which it was believed to make innocuous. A later generation made a cough syrup of mustard by boiling it with dried figs in strong ale. The custom of grinding the mustard seeds and sifting them to a fine powder, the form in which we use it so frequently, dates back to 1720, when an English woman known to history simply as "Mrs. Clements of Durham" made the experiment and found it tasty.

### Lakes Filled With Dust

American lakes have been known to develop mats of vegetable matter so deep and strong and so covered with wind-blown dust that they appeared to be solid ground. In one case, notes a writer in Collier's Weekly, a railroad line was constructed over such a surface and the mistake was not discovered until the first train ran over the track—and sank out of sight.

### Used Heat From Geysers

Indians in Yellowstone Park used to use heat of the geysers in cooking food.

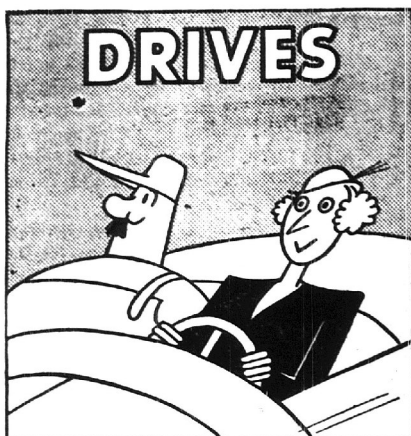

### Lake of the Sky

Lake Tahoe in California is 6,225 feet above sea level. This exceptional body of water, 23 miles long and 13 miles wide, is called the Lake of the Sky for two reasons. One is its lofty altitude and the other has to do with the remarkable manner in which the waters reflect the blue of the sky as well as the surrounding heights of scenic beauty.

### W. F. M. S. Convention

A number of members of the Woman's Foreign Missionary Society from Mentone attended the fiftieth annual convention of the Warsaw District, North Indiana conference at the Methodist Episcopal church in Pierceton, Wednesday. The program started at 9:30 o'clock with the president's processional which was followed by a hymn from the congregation. Several talks and reports were given and music was furnished by the Wesleyan Service Guide, Warsaw.

At the noon hour the Pierceton

ladies served a delicious one course luncheon to the assembled members almost three hundred in number.

In the afternoon several addresses were given. During the past year there has been an increase in membership and their pledge which they more than met last year is set at the same figure this year. Music for the afternoon was furnished by Pierceton and Kendallville. Officers were elected, namely, Mrs. Earl Greenwall, of Topeka, president, and M. S. Broda Clark, of Mentone, vice-president.

Mentone extended an invitation to the conference to hold their next

annual meeting here in the fall of 1937 and it was accepted.

At 6:00 o'clock there was a Standard Bearer banquet followed by an illustrated talk by Marie Adams.

Those attending from Mentone were: Mrs. S. A. Guy, Mrs. Walter Bowes, Mrs. Broda Clark, Mrs. Rosie Ainsey, Mrs. Jennie Cunningham, Mrs. Lizzie Morgan, Mrs. Lavina Shinn, Mrs. Bessie DeWitt and Mrs. Ethel snaffer.

**W. C. T. U. Convention**

The county W. C. T. U. convention was held at the First Presbyterian church in Warsaw with morning, afternoon and evening sessions. Mrs. L. O. Oyler, county chairman, presided. There were representatives from Syracuse, Winona Lake, and Warsaw present on Tuesday, Sept. 15.

Officers elected for the coming year are: President, Mrs. J. H. Whiteman; Winona; vice-president, Mrs. L. O. Oyler, Milford; co responding secretary, Mrs. Emma Bushong of Syracuse; recording secretary, Mrs. F. M. Patton, Warsaw; treasurer, Mrs. E. H. Williams, Warsaw.

Rev. J. H. Whiteman gave an instructive address in the afternoon on the subject, "Twin Evils and Who Pays." Mrs. Margaret Willard closed the afternoon session with a memorial service for Dr. Ricker and Mr. Heber, honorary members. She was assisted by Mrs. Trumbull, Mrs. Snellenger and Mrs. M. S. Livengood, who sang a vocal solo.

**Power of the Sun**

The power of the sun to cause sunburn is six times as great in summer as in winter, according to an authority.

**PIKES PEAK FLAT  
IN DISTANT PAST**

Famous Pikes Peak is merely a piece of level prairie standing on end. Twelve million years ago when man was still swinging through the forest by his tail, according to the evolutionists, the area near Denver, Colo., where the 14,000-foot mountain now stands was a level plain.

Pioneers with their covered wagons (had there been pioneers and covered wagons in that remote time) could have driven across it without suspecting that the prairie was soon to be pushed up into a lofty peak. That is the view of Northwestern university geologists.

Pikes Peak and its neighboring mountains have long baffled geologists seeking to determine their age and origin. An expedition from Northwestern university found the answer in fossil bones embedded in the peaks. They are the remains of animals that lived before the ice age. They indicate that the region was a flat, marshy plain at the time, but what mighty internal force shoved up the mountains is undetermined.—Washington Post.

**SCIENTIST'S BODY  
STORED SINCE 1841**

What remains of the man who discovered morphine has been lying in a dust-covered coffin in a small store-room next to a country church in Einbeck, Germany, since 1841 because there is not even a plot of ground for burial, says a correspondent in the Detroit Free Press.

Hopes for a decent tomb or perhaps even a monument are dwindling, for Einbeck is a poor town and appeals to the rest of the country have gone unheeded.

Friedrich Sertuerner is remembered only on an unobtrusive black tablet with gold letters, on the building in Einbeck where his studies finally led to the discovery of morphine. The tablet says, simply "Here lived and worked as a pharmacist from 1806 to 1809 Friedrich Sertuerner, Ph. D., the discoverer of morphine."

Meanwhile Sertuerner's coffin is gathering more dust.

**Meaning of "Valhalla"**

"Valhalla" is from the Icelandic and means "hall of the slain." In Norse mythology it was the abode of Odin in Asgard. Originally the realm of the dead, it became the warrior's Paradise to which only those who are slain in battle may go.

## Cruelty to Animals

Lawmakers all go to bat to suppress cruelty in any form to man or beast. All the states seem to retain the criminal offense of docking a horse's tail, although evil consequences may be avoided in Michigan by obtaining from a veterinary surgeon a certificate stating that it was necessary for the "health and safety of such horse." Many of these statutes are longer and more detailed than the murder statutes in the same books. Often, of course, a companion law is found making it a similar offense to crop a dog's ears "except where performed by a registered veterinary surgeon while the dog is under an anesthetic."

**Early Sign Languages**  
Thousands of years ago, in the Stone Age, it is supposed that cave dwellers communicated by signs. Tongue - gesturing often accompanied the effort of arm waving, and grunts were made in the struggle. In time, certain grunts came to be recognized without seeing the gestures, and speech slowly evolved.

**"Radio" From Latin**  
The word "radio" is derived from the Latin word "radius," and was used originally only as a combining form, as radio-activity, radio-conduction, etc. With the coming into general use of the radio-telegraph and of broadcasting, the word radio was generally accepted first as a verb and later as a noun.

**Early Gaspe Bay Visitors**  
According to certain historians, adventurers from Iceland and Greenland touched the Gaspe shores as early as the Twelfth century. It is said that when Cartier first took refuge in his little sloop in Gaspe bay in 1534 he found evidences that seamen from Greenland and Iceland had landed there three centuries earlier.

## Bankers Help Farmers

The conviction that 4-H Club work lays the foundation for sound citizenship and intelligent farming influenced a New York City bank executive to contribute \$500 to the Agricultural Committee of the State Bankers Association, to further 4-H Club activities in the state. "I am convinced that the work is so worthy, and is being so well handled that it should interest those who believe in building sound citizenship, as well as intelligent farming for the future," he said.

Unusual prominence was given this past year to agricultural work by the Tennessee Bankers Association. The Agricultural Committee report reveals hearty cooperation between bankers and extension workers. "Key bankers and county agents have been in closer contact than ever before," it says.

Georgia bankers have given both moral and financial backing to a Marketing Project sponsored by the Extension Service of the College of Agriculture, and activities the past year showed significant results. The phases of the Marketing program emphasized in the year's work are: The retail curb market; roadside marketing; miscellaneous marketing (suited to the locality); bartering (exchange of commodities or services with neighbors); standardized canned products for sale prepared in homes or canning centers.

## National Bank Growth

Comptroller of the Currency O'Connor announced recently that total deposits of the 5,374 national banks in the United States on June 30, 1936 the date of the last call made for statements of condition aggregated \$26,200,453,000. The figure is a new high record for national banks exceeding by \$1,340,998,000 or 5.39% the amount reported as of March 4, 1936 the previous high record. The current figures show also that deposits increased \$3,682,207,000, or 16.35% over the amount reported as of June 29, 1935 the date of the corresponding call a year ago.

**Quakes Raise Coast Line**  
Earthquakes, as well as wars, land purchases and treaties, have been known to increase considerably the size of a country, observes a writer in Collier's Weekly. In 1622 an earthquake in Chile permanently raised its coast and added more than 100,000 square miles to its land area.

**Dreams Considered Reality**  
Among some tribes still in a savage state dreams are treated as part of their objective experience, so that to be injured by some one in a dream is as though some one actually came to do injury and was so to be considered.

**Hurricane, a Cyclone**  
A hurricane is a true cyclone. with the currents of air spiraling inward in a counter-clockwise direction in the northern hemisphere and in a clockwise direction in the southern. Usually they are accompanied by heavy rain, thunder and lightning. On the outer edges of the storm, the velocity of the wind may be more than 100 miles an hour, but in the center is a dead calm. This belt of calm is responsible for many deaths. People mistake the lull for the end of the storm and emerge from shelter, only to be caught by the destructive winds in the rear.

**Early Duels**  
During the last century in many countries, a man who killed another in a duel was tried for murder and there were several executions. Among the early Germans the contrary practice prevailed. If the man vanquished in a duel survived his wounds, he was hanged! As early as 501, the German King Gun-debald decreed the duel as a proper method of settling disputes, and when a bishop remonstrated, he pointed out that the duel had its religious connotations because God would be on the side of the right in the contest.

**Rustic Names Survive**  
London is the city of contrasts. It has age and eternal youth, ancient pageantry and modernity, picturesque buildings contrasting with the new. Another curious aspect is that the greatest city of the world breathes the spirit of a country village in the majority of its important place names. Hatton Garden and Covent Garden are on the outskirts of the city. Curiously named countrified lanes are in the heart of the financial district—Love lane, Ivy lane, Water lane, Maiden lane and endless other rustic fancies.

## Any Improvements Made in Mentone

Coming into Mentone on Main St. from the east much evidence of improvement during the past summer is very noticeable.

First in view will be the large Co-Op. building, nearing completion. Next will be the \$8,000.00 rebuilding of the M. E. church which is well under way, and when completed will give that society a real modern church building. Then on West Main St. will be noted the remodeling of the Byron Linn battery shop and service station, making a good improvement in that locality.

Aside from these improvements there is much evidence of recent thinking to be seen. Mentone has no means been asleep during the past year.

## WEDDINGS

### Bickel-Cook

The parsonage of the First M.E. church in Fort Wayne was the scene at 1:00 p.m. Sunday, Sept. 20, of the marriage of Miss Kathryn Eleanor Cook, daughter of Mr. and Mrs. William Cook of Mentone, to Robert William Bickel, son of Mr. and Mrs. Rolland Bickel, 916 South 8th St., Goshen, Indiana. The Rev. R. J. Burns, pastor of the church read the service.

The bride wore a rust colored dress with black accessories and a corsage of gardenias. Miss Betty Howard of Los Angeles, Calif., was her only attendant. Her flowers were Talisman roses and she wore a light blue dress with black accessories. Robert Rutt, of Goshen, acted as groomsmen.

Mr. and Mrs. Bickel are making their home for the present at 916 south 8th St., Goshen. The bride is a graduate of Mentone high school. Mr. Bickel graduated from Goshen high school and is employed by the Western Rubber company.

### Pittman-Vandermark

Miss Maxine Pittman, daughter of Mr. and Mrs. William Pittman of near Mentone and Mr. Orie Vandermark, son of Mr. and Mrs. Joe Van-

dermark, of Burket, were united in marriage Saturday, September 19. Both are graduates of Mentone high school. The couple will make their home in Burket where the groom is employed with the produce company.

## Our School Column Can Not Be Beaten

The Editor-in-chief and her assistants are to be complimented upon their first effort in preparing material for the school page which appears in this issue. As a first attempt we do not believe that any school in this part of the state can compare with it.

It is well written, and composed of real interesting news and facts of interest to everyone, and we are certain that these young people comprising the editorial staff will receive many deserved compliments.

One thing is very noticeable, these young editors seem to grasp the fact that silly, wize cracks, such as "Jim makes eyes at Mary" etc., that so often clutter up school columns, have no place in real news, and often tend to lower the real value of the writings which are of merit, and if the editor-in-chief will continue to see that only real, live, interesting news, and topics of general interest get into the column, she will build up an interest in the page that will reflect great credit to her, her assistants, and the school in general.

## SPECIAL UNTIL NOV. 10

## New Scales Installed

The Northern Indiana Cooperative Association is installing a new set of scales just west of the lumber building. These new scales are twenty two feet in length—long enough to weigh any truck or car and trailer together. The work is being completed this week, for your early convenience.

## Pound Party

A large number of members and friends of the Palestine Christian church surprised their pastor, Rev. and Mrs. Norwood at their home in Milford last Tuesday evening. The surprise was in the form of a pound party, each family bringing a pound of something edible. The evening was spent socially and popcorn and candy was enjoyed.

Those present were Mr. and Mrs. Carl Mahoney and family, Mr. and Mrs. Ohmer Morrison and family, Mrs. Warren See and family, Mrs. Josie Smythe and family, Mr. and Mrs. Russel Huffer and daughter, Mr. and Mrs. Sanka Vorhis and family, Mr. and Mrs. Frank Carles, Mr. and Mrs. Joe Huffer, Mr. and Mrs. Alva Bowser, Mr. and Mrs. I. D. Fisher and family, Mrs. Ella Stickler, Mrs. Arvilla Fisher and Mr. and Mrs. Ed Huffer.

## A Pleasant Occasion

On last Sunday the following guests were entertained at the home of Mrs. Ella Wilson. Mrs. Nettie Blue, Greta Latimer, Mrs. Cora Williams, Mr. and Mrs. Charles Madeford, Mrs. Eunice Bradway and Mr. Thomas Whetstone.

At the noon hour a very delicious three course dinner was served after which the guests retired to the living room where many interesting conversations were enjoyed, one of which was the reminiscence of early days and activities of our little city Mentone. All in all it was indeed a pleasant occasion.

Mentone High School offers a number of curricula this year. In addition to the regular Academic course which contains all college entrance requirements, we have a Commercial curriculum, a Vocational Home Economics and an Agricultural curricula.

Academic—English, History, Language and Science.

Commercial—Reg. Ac. work, Book-keeping, Typing and Shorthand.

Vocational—Reg. Ac. Work, Agriculture and Home Economics.

In the following lines the writer is going to try to give the reader an idea of what is really going on in our different departments at school.

Our History department under the direction of Mervel Smith is steadily increasing in its knowledge of Ancient History, and also of early and later United States history. Mr. Smith made History a specialty in college and he also keeps the present events before his classes at all times.

In our English department with Paul Smith at its head we are learning Language, Grammar and Public Speaking. There has been much done in the direction of the latter especially. Public Speaking has not been a part of our school program for some time. It is offered to the Juniors and the Seniors and believed to be in very capable hands.

Our Mathematics department is supervised by Walter Fenstermaker. It includes Common Arithmetic,

Algebra and Geometry.

Mr. Kelley is our Latin instructor. He is very well equipped for this work, as he has had many years of experience in this particular subject.

Special attention should be given to our enlarged and improved music section. We now have a girl's glee club meeting each week. Our high school band meets for rehearsal twice a week, with individual instruction lessons daily.

A word should be added here in regard to Mr. Walter Bowers who is in charge of our Music and also of the Commerce in the school. Although he has been with us only a few weeks, he has our Music and Commerce in fine shape.

Our Agriculture is handled by Mr. E. G. Harrison, an able instructor who keeps the boys on their toes at all times.

We also have a new Home Economics instructor, Miss Margaret Langell, from South Bend. Miss Langell received her education at Purdue University. Many pupils were acquainted with Miss Langell through the 4H work which she supervised the latter part of the summer.

We have another new feature in our school life and that is a girl's Physical Education instructor. Miss Lehw is in charge of this work.

## SENIOR NEWS

Most of the Seniors enjoy immensely their positions in the "King Row", so to speak. We also enjoy many of our new subjects. The one especially referred to is Public Speaking, although Shorthand runs a close second. The former is something different from any course in English that we have ever experienced. It is a practical study of how to make your own particular self more able to influence others with your speech. We believe that this course will be very profitable as in almost every walk of life pleasing and forceful speech is a prime factor.

Shorthand is one of the most exasperating yet interesting subjects in school. It is hard to understand how little wiggles mean real words, but if done correctly they do. It also requires a lot of time and concentration which is good for any one even if he happens to be a Senior.

## JUNIOR NEWS

The Juniors think that they are doing remarkably fine so far this

year.

They are really beginning to know a little bit about typing. So far they have heard no complaints from any of the students except that they get rather tired sitting at a desk pecking at a typewriter when swimming would be more preferable.

On Tuesday September 22, the class chose its class ring. After much discussion a certain ring was agreed upon and of course the students either get what they like or like what they get. Nearly everyone of a class of thirty-six students is getting a ring. Probably in about six weeks we will see all those proud Juniors going to and from class gazing at the cherished rings.

## SOPHOMORE NEWS

The Sophomores wish to publish an interesting incident or accident (we'll let you decide) that occurred in English class the other day. The story goes thus: Herschel Linn was very busily engaged in study (?) when his chair which was tipped at a dizzy angle proceeded to go over backward. He picked himself up, then picked up the chair and proceeded to glare at the object responsible for his fall, (his back-door neighbor.)

## FRESHMAN NEWS

The bewildered Freshman have nothing to say for themselves except that they have lost three members, namely, Bonnie Cochran, Lavon Kurtz and Richard Schramm. They have gained Jack Manuel and Rosella McCutchen.

## EIGHTH GRADE NEWS

The eighth grade assembled Friday morning, September 4, glad that they were no longer the lowest class in the assembly. It was found that 3 members, Miriam Foster, Everett Schooley and Harold Blosser had left the class. Two new members, Rosemary Sanders and Ethel Sensibaugh have joined the class.

## SEVENTH GRADE NEWS

We of the seventh grade have a few new members in our class of 20, who were not here last year. They are: Grace Sullivan who came from Vincennes, Robert Sanders from Clunette and Clifford Scholl from Warsaw. There is only one that left us and that person is Jack Ring.

We want to say that we like the teachers upstairs fine.

A kitten caused quite a bit of excitement in the seventh grade agricultural class Wednesday morning. The kitten crawled in through an open window. It was ushered out and the class went back to work.

## SPORTS

The Mentone Bulldogs went down in defeat before the Claypool nine last Friday to the tune of 12 to 9. Both teams fought hard throughout the contest. The boys were well pleased with the large crowd and are looking for even better support in the future.

\*\*\*

Those aspiring for the position of Student Manager this year are Bobby Whetstone, Paul Horn, Lewis Blue, Carl Rush and Bobby Anderson, all members of the Junior High School.

The first laboratory work this year was canning tomatoes. The Freshman girls canned a bushel of tomatoes in three different ways. These three ways were used: Tomatoe juice, whole tomatoes and quartered tomatoes. The three methods used were: open kettle method, cold pack method and hot pack method. The girls successfully canned nineteen quarts from the bushel.

The Home Economics enrollment is as follows: Freshmen—fifteen, Advanced class—eight and seventh grade class—seventeen.

The Sophomore and Junior classes held a penmanship contest in their English class. Each wrote a copy of the same material and each paper was given a separate number. The papers were strung along the blackboard by wires and the balloting commenced.

The result of the vote taken was a tie between two Junior girls. However one person in the Junior class had not yet voted. This Junior was sent to the English room and when her vote was read, the results were as follows.

Winifred McCutchen, first.

Louise Jones, second.

Jean Burns, third.

The boys on the ball squad are: Rex Bu.h, Bill Cook, DeVon Hibschan, John Bayne Philip Bush, Harold Horn, Jack Shinn, Bob Tucker, Gale Black, Robert Eiler, Douglas Kercher, Orvil Secor, Dale Wallace, Dale Wilttrout, Marion Baney, Buddy Paulus, Dean Shirey and Donald Elick.

**Tax Defaulters Were Flogged**  
Americans as a whole rejoiced at the overthrow of czarism in 1917, irrespective of what was to follow, for as late as the beginning of this century flogging was customary among the people when taxes due were not forthcoming. The birth of an heir to the throne inclined the last czar to such clemency that in a spirit of condescension he abolished such flogging.

### Talma Boosters Scalp Rochester Merchants

The largest crowd of the Base Ball season at Talma Sunday September 28th, saw the strong semi-pro Talma Boosters scalp the Rochester Merchants on the Talma diamond by a score of 5-3. Rochester scored three runs in the first of the 4th inning while Talma failed to score until the last of the 8th when they scored five runs to win the ball game. George Smith pitched the entire game for Rochester. Barkman pitched the first seven innings for the

Talma Boosters and Eddie Creighbaum pitched the last two, with Lyons behind the bat.

This makes twice this season that the Boosters have defeated the Merchants, the first time was August 30th on the Rochester diamond by a score of 3-4.

**Dedication Of  
Methodist Church**

(Delayed from last week.)

On Sunday morning, Sept. 20, at 11:00 o'clock the pastor, Rev. E. E. DeWitt, conducted a special service on the Methodist Church lawn at which time the corner stone of the church which was first laid in 1893 was resealed. This stone was moved to the west of its former position a distance of 22 inches; it was properly opened and a metal box taken therefrom and its contents examined there being several copies of the Mentone paper of an early date and also a complete history of the Methodist Church and also of the Baptist Church. The metal box was placed back in the stone with proper ceremonies and records of value and some Lincoln pennies were placed in the box along with the old relic.

A new tablet of stone was placed by the old corner stone with the following inscription; "Remade-1936 E. E. DeWitt, Minister." The stone was presented by the Minister in memory of his father and was accepted for the church by Raymond Lash, who is president of the official board and also the Board of Trustees.

**Birthday Surprise**

Mrs. Bert Rush was pleasantly surprised Monday night, Sept. 21, in honor of her 69th birthday, by sixteen of her children, grandchildren and great grandchildren. It was also the birthday of her only great grandson, Bobbie Plew, who was one year old. Mrs. Rush was presented with several lovely gifts and some beautiful floral offerings.

An abundance of home made ice-cream, fruit salad and several kinds of cake were consumed later in the evening. The birthday cakes were one three-tiered white angel food, decorated with pink candles and the other was a tiny white cake with one lone pink candle in the center.

Those present were Mr. and Mrs. Ray Rush and children, Virginia, Carl and Paul; Mrs. Jennie Cunningham; Mr. and Mrs. Fred Rush and daughters Ferne and Jessie; Mr. and Mrs. Roy Rush and daughter Elanore; Mr. and Mrs. Dale Plew and son Robert and Mr. and Mrs. B. A. Rush.

All left at a late hour wishing "Grandma" many more happy birthdays.

**Meeting of D. A. R.**

The Anthony Nigo chapter of D.A.R. held their first meeting of the season at the home of Mrs. Lydia Sanders. As the last meeting was held in June the business meeting was quite lengthy. There were thirteen members and three guests present. The program consisted of two papers, "The Courage of our Forefathers is Needed Today," by Mrs. Stanley Boggs and "Continental Hall" by Mrs. Edna Burns.

During the social hour the hostess served lovely refreshments to the following members: Edna Burns, Yoland Riner, Mary Boggs, Helen Brown, Dora Taylor, Ethel Nellans, Ernie Manwaring, Zedie Kesler, Wanda Davison, Bernice Rush, Orpha Blue, Emma Pontius and the hostess Grace Weiseert and Josephine Beeson were guests.

The next meeting will be held October 27, at the home of Miss Rosella Ford.

## Girl Scout News

The Girl Scouts met Wednesday night at the school building. After a care free summer we have decided to settle down to a hard winters work.

We worked out a new program which is as follows: Starting at 7:15 we have fifteen minutes for songs, games, hand craft, and folk dancing. At 7:30 we have inspection. Following this the horse shoe formation, during which we have the pledge, promise and laws. And at 7:45 each patrol has a reserved corner. The patrol leader checks the attendance and dues. Then plans business, and announcements are considered. From 8:00 to 8:30 we are given instructions on various things. From 8:30 to 8:45 we have recreation. We play games, practice dramatics, do folk dancing and sing songs. From 8:45 to 8:50 we have good-night circle. From 8:50 to 9:00 court of honor meeting.

The smaller Girl Scouts are working on their 2nd class badges. The older Girl Scouts are working on first class work and proficiency badges. Some of the principal badges are: Hostess, Dressmaker, Home-nurse, Landress, Minstrel and Pathfinder.

We are going to have a White Elephant sale in October, so be watching for the date of it in this paper. Girl Scout Reporter.

### Habits of Polar Bear

In his wild state the polar bear often spends whole seasons on drifting icebergs, swimming miles in quest of new hunting or fishing grounds and living upon fish or seal meat. The female brings forth her young deep in some ice or snow covered crevasses during her winter period of hibernation.

### Colonial Dutch Ovens

The early Colonial American Dutch ovens were round, square, or oblong, with an open front. The round variety was often fitted with a spit turned by a handle on the outside, to roast meat. Otherwise the ovens were used for baking. The open side was set close to the fire, to receive the full heat. Usually they were constructed of tin which gave them the name of "tin kitchen" or "Dutch kitchen." The bake kettle a covered receptacle on high legs to set over the fire, was sometimes called a Dutch oven.

### Used Squirrel Fur Garments

So plentiful were squirrels in early Ohio that garments made of the fur of these animals were as common as the raccoon coats on our campuses before the crash of 1929.

### Goldthread, a Plant

Goldthread (*Coptis trifolia*) is a plant of the crowfoot family. It has tufted stems, evergreen leaves, white flowers, and a bright yellow, threadlike, bitter rootstock, from which a tonic medicine is extracted. It grows in damp woods and bogs from Newfoundland to Tennessee and northward to Alaska.

### Ears Reveal Character

An ear of unusual shape or size indicates an unusual, or eccentric, character. Very small ears show brilliance in some one direction. Red and fleshy ears, states a writer in Pearson's Weekly, reveal a coarse and vulgar nature. Men with very thin ears are believed to be untrustworthy. Round ears set well forward belong to men active, fond of life, ambitious, and warm-hearted. Men who have fairly long ears, that lie well back against the hair, and have a large, loose lobe at the base, are thinkers, poetic, literary, somewhat dreamy individuals, but conscientious and kindly.

### Source of Ambergris

Ambergris, used in perfumery, is a concretion formed in the intestines of whales.

### Spiders Produce Silk

Spiders produce silk not only for webs but to protect their young, their eggs and themselves from wet and cold.

### Flag of the Vatican State

The flag of the Vatican state consists of two vertical stripes of equal length and width, yellow at the left and white on the right. The flag is charged with the insignia of the Papacy on the white stripe—triple crown, or tiara, over two crossed keys, one of gold and one of silver, tied with a red cord and two tassels.

### Plaque Honors Edgar Poe

In Ann street, downtown New York city, a bronze plaque commemorates the writing of "The Raven" by Edgar Allan Poe where the old Daily Mirror once stood.

### Early Military Music

Little is known of military music; however, before the Seventeenth century such music consisted mainly of fife and drum.

### Green Frog Common

The green frog is among the commonest of frogs and is often called the screaming frog for its cry is sharp, sharp and high pitched when alarmed.

### Lead Burning

Lead burning is the process of joining two or more pieces of lead by melting their edges and causing the metal to run together, forming a joint. In all lead burning absolutely clean surfaces are essential to good workmanship.

**HOOT MON!**

Was there ever a Senior class that didn't have someone who tried to grow a moustache?

Overheard in the assembly: "I don't think he's my type, do you?" It is reported that the Physics class was blowing soap bubbles the other day and cutting paper dolls.

Things we'd hate to see: Marcella Leininger on roller skates, Lowell Marquess with a beard, Sam Blue with his hair mussed up. A quiet assembly.

Nobody can slump in his seat like the Senior boys. It is an art that takes years to master.

Sudden idea: The reason America isn't bothered with wars and things is because the Americans know how to relieve the tension in their minds. For example, "Knock, Knock", or if you can remember, "The Music goes Round".

Study in concentration, Loah Jean Fleck chewing gum.
