AIR TRAGEDY TAKES PLACE ON LABOR DAY

Pilot's Body Badly Mutilated by Explosion

An air national guard plane, enroute from Sioux Falls, S. D., to the Cleveland air races, carried its pilot to a flaming death nine miles northwest of Warsaw shortly after noon Monday.

The plane was a North American P-51. Popularly known as a "Mustang" it is one of the fastest ships now flown by the army. The same model captured some of the major prizes in the national races held at Cleveland.

First Lieutenant Allen E. Christianson, 25, of 1318 North Dakota Ave., Sioux Falls, was the pilot. His body was blown to bits in the explosion which followed the crash. The plane disintegrated.

First Thought Transport

First calls from near Atwood had it that a passenger transport had crashed. Sheriff Ray Henderson, City Officer Lester Ball and Fireman Ray McCarty left immediately, followed closely by two resident state police officers, Wallace Manrow, of Warsaw and George Coon, of Leesburg. Approximately a dozen other state police units, including Ligonier post Lieutenant Blaine Schang, also arrived to maintain order and guard the crash scene. Police Chief Roy Adams, off duty at the time of the call, arrived and assisted.

All available ambulances were sent to the scene when it was still believed that a transport ship had crashed.

Dr. Orville Richer, coroner, appeared on behalf of the county, but turned the investigation over to army officers.

At the scene of the crash on the Pete Graber farm, northwest of Atwood, hundreds of sight-seers gathered, causing police to rope off the immediate crash area.

The plane made a hole in the mucky ground, 30 feet long, twenty feet wide, and eight feet deep, where it struck, nos down.

Numerous Eye-Witnesses.

There were numerous eye-witnesses to the crash. All seemed to tally with the fact that the ship was flying in formation with others, just about the cloud level at 3,000 feet. Observers heard one engine sputter, then saw the plane falling through the clouds.

MAN INJURED IN ELEVATOR FALL

Benjamin Hively, 56, in Hospital

Benjamin Hively, 56-year-old janitor of the Lake City Machine Shop, Mentone, was in critical condition Wednesday at the Murphy Medical Center.

Hively, whose home is on route 2, was injured Tuesday afternoon in a freight elevator accident.

Murphy Medical Center attendants said Wednesday that Hively had a severe skull fracture, a deep cut upon the head and numerous minor bruises and lacerations.

His employers said Wednesday that they were still attempting to determine what caused the elevator to crash. It had recently been inspected.

Clayton Holloway Escapes

Hively and Clayton Holloway, of Mentone were ascending in the elevator when it jammed in the shaft from an unknown cause. The lifting device continued to operate. With the elevator stuck, it pulled the heavy supporting timbers down from above.

As the elevator and debris fell to the bottom, Mr. Hively was thrown violently into a two-by-four timber, receiving a serious skull fracture.

Mr. Holloway, more fortunate, received only minor bruises.

The Reed ambulance rushed Hively to the hospital in Warsaw.

Company officials were trying to locate a special nurse to be in constant attendance at the injured man's side.

MARRIAGE LICENSE

A marriage license has been issued by the county clerk to:

Guy Sheldon Baker, 22, Burket farmer, and Marilyn Kiefer, 17, daughter of Mr. and Mrs. Henry Kiefer, Burket.

HIGH SCHOOL SPORTS

The first ball game will be at Silver Lake, under the lights, at 8:00 p. m., Friday night, September 5. Many of the boys have been playing together all summer at the local diamond and have held up their end fairly well in stiff competition. The nucleus of the High School team will be largely these boys and a few few others who are showing promise of good playing.

MENTONE PEOPLE PLACE AT FAIR

Mentone was represented in the placings at the judging of the 4-H livestock exhibit at the Warsaw Fair by Miss Elinor Rose Norris, who took third prize with her Hampshire gilt and third with her pen of Hampshire barrows, and by Waster Hamilton, who took third with his Chester White entry.

In the 4-H baking exhibit, Elaine Dunnuck won second. In Junior Clothing, Eleanor Rose Norris won third place.

The Mentone livestock judging team composed of Forest Dunnuck and Floyd and Lloyd Thomas, took second place and the Mentone dairy judging team, composed of Forest and Kenneth Dunnuck and Billy Reed, took fifth place.

In the women's culinary department, Mrs. Isabelle Hively won first for her exhibit of white bread and first for her exhibit of beef rolls.

Very favorable reports were received of the high school boys who acted as officials for the second softball game Tuesday evening. John Davis, Junior High School, was announcer and David Cooper, Sophomore, was score keeper.

ALL-STAR NEWS

Friday, September 5, the Muncie A. C. will present their colored outfit for your approval. They were beaten out in the state softball finals recently. They were led by the famous Bob White who will pitch part of the game.

Friday, September 12, will ring down the curtain on the regular season. Our guests for the evening will be Warsaw A. A. Most of our fans have seen Fritz Wolfmerman pitch and he will be on the mound again for the A. A.

Peter Horn, of Rochester (formerly of Mentone) and Ida Coplen, of Mentone were united in marriage Tuesday P. M., September 2, by Rev. Silas M. Hill at his home. They will make their home in Rochester.

Mr. and Mrs. Howard Repke, of South Bend, Miss Jo Lynch and Miss Ellen Peters, of Congress Park, Illinois, and Mrs. Frances Kaiser of Knox were callers in the Tom Haimbaugh home last Sunday.

UMMEL-KELLEY

Ate the home of Mr. and Mrs. Vere Keley, Warsaw, their daughter, Fluelia, was united in marriage Sunday afternoon to Eldon Ummel, son of Mrs. Edith Ummel, of Claypool. White tapers in candelabra lighted the improvised altar where gladioli and asters formed the background as Rev. Daniel Slaybaugh, of Akron, read the vows of the double-ring service in the presence of the immediate families of the couple.

Preceding the ceremony a program of music was presented by Miss Joyce Perry, pianist, and Mrs. Richard Whittenberger, vocalist. "Clair de Lune" and "I Love Thee" were played by Miss Perry and Mrs. Whittenberger sang, "My Hero" and "Because."

A gown of white sharkskin was worn by the bride, as she entered with her father. The full skirt was attached to the fitted bodice which was styled with a high neckline. Matching mitts complemented the cap sleeves. Lace edged her fingertip veil which was held by a Juliet cap. A purple orchid centered her colonial bouquet of white roses satin ribbons. Her only ornament was from which fell a shower of white

ABOUT 275 TEACHERS OF KOSCIUSKO COUNTY ATTEND JOINT INSTITUTE

Approximately 275 teachers attended the first joint institute and workshop for Warsaw and Kosciusko county school instructors, held Thursday at the Warsaw High School Building.

Rev. Avery Miley, of the Warsaw Christian Church, gave the invocation as the institute opened in the auditorium Thursday morning. Rev. Robert Hall, chaplain at the Indiana State Prison in Michigan City, then addressed the teachers with this story, "The House by the Side of the Road."

The teachers spent the remainder of the morning by meeting in special group sessions in the building. They paused briefly for dinner and then heard Rev. Hall give another address, "Sermons in Stones," to open the afternoon program. Following this address, special group meetings were held again.

Homar Rodeheaver and Katherine Carmichael, of Winona Lake, presented a musical program during the morning session.

SCHOOL NEWS

From the first grade to the twelfth all the pupils of the Mentone school seem to be fitting into the routine of the new school year and, on the whole, seem happy to be at work again.

Mrs. Eileen Fenstermaker, teacher of the first grade, reports that thirty-nine boys and girls are starting their education this year and are now learning the rules of the school and how to color and paste. In a few weeks, they hope to be regular school children.

The numerals displayed at the front of the room, the letters of the alphabet along the blackboard and the long table holding large picture books, with George Washington overlooking all, provide a studious atmosphere to help them in their task.

In the first three grades, after strenuous play of the lunch hour, the children were quietly resting their heads on their desks, in preparation for the work to come.

Miss Wreatha McFarren has nineteen boys and seventeen girls in the second grade this year, with two new boys in the group: Jimmy Lee, from Michigan and Jimmy Collins, from Leesburg. All thirty six pupils seemed happy and contented in their cheerful room. There are dainty voile curtains at the windows, growing plants at the sills, and a curcus border at the front of the room. All along the back

of the room are illustrated poems of Robert Louis Stevenson and along one side are illustrations of the familiar nursery rhymes. In the sand table, Mopsy, Flopsy and Cottontail are playing while Mr. MacGreggor looks on.

In the third grade room, Mrs. Pauline Buck reported seventeen girls and eighteen boys enrolled, including three new pupils: Shirley Hively and Sharon Hively from Burket and Lloyd White from Cincinnati, Ohio. The children are proud of their pretty books and pictures and their pretty new curtains which they are keeping carefully in a box until the windows are washed so they can hang them at the windows.

Mrs. Trella Tombaugh is teaching the fourth grade this year and has enrolled forty students. Dale O'Brien from Ohio is a new fourth grader. They have been very busy getting acquainted with their new books, telling stories of what they did this summer and finding seats to properly fit each boy and girl.

Mr. Art Witham in the fifth grade room is very proud of his fine group of twenty-four boys and twelve girls. He is expecting this energetic group to make a new record in scholarship for the fifth grade this year.

We are very happy to welcome our new sixth grade teacher, Miss June Aughinbaugh, who formerly taught at Etna Green school. She has thirty two boys and girls in her room including Jack Smalley, who attended the

Warsaw school last year. A new history has been added to the list of books this year and the students are beginning at once on their stiff course of study for the year.

In the high school we have two new teachers: Mr. Loren Burt, graduate of Manchester College, who will coach and teach Mathematics and Physical Education and Mrs. Mary Blickenstaff, also a graduate of Manchester College, who lives at Akron where her husband is High School coach and who will teach music and Physical Education.

Mrs. Huffman will teach Home Economics and Health, Mr. Huffman, English and Latin, Mr. Lash Agriculture and Biology, Mr. Law Commerce and History, Mr. Bevington Health English and Geography and the principal, Mr. Dale Kelley, will teach Mathematics and Physics.

Miss Elma Catell is making her home at the Katy Bair home of Bourbon.

FLUCTUATION SEEN IN HOG SITUATION

Demand for pork continues strong and market supplies during the next six to eight weeks will be relatively light, Prof. R. H. Bauman, Purdue University agricultural economist, says. Hence, both the demand and the supply situation puts a strong undertone under the present market. It seems likely that prices will increase some, seasonally between early August and October.

The 1947 spring pig crop of 53 million head was one percent larger than the 1936-45, 10-year, average. As those pigs start reaching the market in late September or early October, hog prices likely will decline seasonally into December and January due to larger supplies of pork being available and also to greater supplies of beef. Normally, the decline from the fall peak of hog prices to the winter low is between 20 and 25 percent. The decline is expected to be this much or more this year, Bauman pointed out.

The level of hog prices in 1948 will be largely determined by the general business situation. Although this is uncertain, some readjustment and realignment of the price structure is expected to take place, with hog prices in 1948 at a lower level than in 1947 but not drastically so.

The corn-hog ratio in 1948 will largely depend upon the outcome of the present corn crop. In case there is considerable soft corn this fall and a scarcity of corn next year, the ratio may be unfavorable. With only a reasonable amount of soft corn and a corn crop as large as the Aug. 1 government estimate, it appears that there will be at least an average corn-hog ratio during the first two-thirds of 1948, especially if the nation is able to maintain a fairly high level of employment. Conditions appear to justify breeding about the normal number of sows this fall for spring farrow, in the estimation of Purdue agricultural economists.

GETTING THE BEST OUT OF YOUR PEACHES

This year peaches are plentiful so insist upon the best . . . and tree-ripened peaches are the best. They give full rich flavor. They have the most vitamin content, and the maximum amount of sweetening. Miss Anna P. Ranier, extension nutrition specialist, Purdue University, explains that tree-ripened peaches require more attention in picking and handling to have a superior product. They are picked oftener and handled much more carefully than peaches that are picked before completely ripe.

Of course, delicious flavor is reason enough for eating peaches. On the nutritive side Miss Ranier adds that the tree ripened peaches offer a fair amount of vitamin A. In addition, they contain a small amount of vitamin C. And it is a fact, states Miss Ranier, that the yellow peaches contain 30 times as much Vitamin A as the other kinds of peaches.

Give those tree-ripened peaches the best of care. Handle them carefully to avoid bruising. Spread the peaches out in a cool spot until they are to be used. Miss Ranier explains that those dark spots caused from packing will usually disappear if the fruit is canned immediately. Let peaches that are a little on the green side ripen at room temperature.

To keep sliced peaches from turning dark and unattractive, either peel just before using, or sprinkle the cut fruit with a little lemon juice.

For easy peeling, Miss Ranier says dip the peaches in boiling water a minute or two, then quickly into cold water. Skins will slip easily then.

Adding a pinch of salt to cooked fruit enhances the flavor. And the last "peach" tip from Miss Ranier is that cooking peaches in light sirup helps keep them firm.

CORN, SOYBEAN FIELD DAY TO BE HELD SEPT. 12

Farmers throughout Indiana and adjoining states are expected to attend the annual Purdue Corn and Soybean Day announced for Friday, Sept. 12 at the Soils and Crops Experiment Field just east of Lafayette.

Recently launched fertility studies on heavy applications of fertilizers, and especially of nitrogen for corn, will be reviewed in the forenoon tour of the experimental plots. Much interest among farmers who are practicing heavy fertilization has been aroused, and effects of the practice on various crops in the rotation, particularly, corn and soybeans, will be shown.

Newer forage and chemurgic crops as well as the old stand-bys, hybrid corn and soybeans, always inspire much interest among farmers. The widely certified varieties and promising new ones will all be inspected by field day visitors.

Results from experiments dealing with the disposition of straw following grain harvest, which has been particularly heavy for the last two years will stress the importance of its removal if clover is to be saved. These and a number of other experiments will be covered in the eleven stops on the forenoon tour. Fifty staff members will serve as instructors and guides for this session, and others will participate in an afternoon program following a picnic lunch, served in the grove of the experimental field. One feature will be a discussion of problems of handling Indiana's corn crop which promises to be very late and high in moisture.

LATE SUMMER SEEDINGS USE LEGUMES - GRASSES

Farmers who failed to get legumes and grasses seeded last spring because it stayed too wet to sow oats as the nurse crop, may still seed grasses and certain of the legumes, say

the Purdue University extension agronomists. Making such seedings for hay and pasture purposes next year are particularly important because of a prospective grain shortage, especially corn.

Alfalfa alone or in a mixture with grass, such as timothy or brome, is the best legume to use at this late date, where the land is sufficiently limed, fertilized and well drained. A small seeding, one-fourth to one-half pound, of Ladino clover per acre, may be included in the seeding. A good mixture to use is composed of eight pounds of alfalfa, two pounds of timothy, and Ladino clover, one-fourth to one-half pound, per acre. The alfalfa seed should be inoculated if neither alfalfa or sweet clover have been grown previously on the field. The seeding should be shallow, one-half to one inch deep, on a firm seed bed. A cultipacker is a good tool to use in covering seed.

Seedings should be made by September 1 in southern Indiana and by Aug. 20 in central and northern areas. Common alfalfas from the northwestern states to Oklahoma in the south are generally winter hardy. "Oklahoma approved origin" common alfalfa is very similar to Kansas common.

Veterans of all wars and their dependents seeking information on benefits provided them by law made 23,669,000 visits and 9,173,000 telephone calls to VA offices during the twelve months ending June 30, 1947. Veterans Administration contact representatives assisted them in preparing 7,225,000 applications for all types of benefits that the VA administers. In June a survey showed that nearly one-third of all questions concerned education and job training, and 18.4% questions were on insurance.

TOWNSHIP NEWS

Miss Ruth Barr is confined to her home on account of illness.

Mr. and Mrs. Ralph Chapman will move in the near future to their farm which they purchased from Ora Horn recently.

Mrs. Lon Walker, of Indianapolis, is the guest of her husband, Lon Walker.

Mr. and Mrs. Ralph Hatfield and Mrs. Cora Bryant spent Labor Day in Mishawaka as the guests of Mr. and Mrs. David Bryant and family.

Mr. and Mrs. O. C. Montgomery and Lavoy made a business trip to South Bend, Friday.

Miss Norma Walker spent the week end in Indianapolis.

For the past two Monday nights there have not been any free movies. Mr. and Mrs. W. A. Dick, Mr. and Mrs. Roy Ailer, Mr. and Mrs. Harry Clymer and Mr. and Mrs. Frank Arter attended the funeral of Allen Dille at Mentone, Wednesday afternoon.

Mrs. Roberta Calvert has returned home here after spending the past week in Mishawaka with relatives.

Frank Arter, who suffered a light stroke Wednesday afternoon, is somewhat improved. There will be a show here on Monday night, September 8, if the weather permits.

Mr. and Mrs. O. C. Montgomery and Lavoy spent Thursday evening in Warsaw.

Elza Thompson spent Saturday evening in Rochester.

Mr. and Mrs. Charley Green spent Saturday in Chicago where they attended a baseball game.

Mr. and Mrs. Verdine Brockey were guests of Mr. and Mrs. Lou Grove Monday evening.

George Coplen spent Saturday evening in Rochester.

Mrs. Olin Wagoner is spending some time in Michigan for relief from Hay Fever and Asthma.

Sid Dick and Devon Eaton were business visitors in Mentone Friday evening.

Mr. and Mrs. Gilbert Gruenberg and family have returned to their homes in Gary after spending the Labor Day week end at their cottage.

Mrs. Harold Myers and family returned to their home after spending a few days in Mishawaka as the guests of her husband, Harold Myers, who employed there.

Mentone people felt right at home at the State Fair this year. Among those present at the fair were the following: Mr. and Mrs. Cooper and son, David; Mr. and Mrs. Claire Greulich, Mr. and Mrs. Harry Gibbel and son, Mr. and Mrs. Jess Newell, Mr. Pete Borton and his nephew, Mr. Harold Yazel, Mrs. Edith Darr, Mr. and Mrs. Raymond Weirick, Mr. and Mrs. Harold Nelson, Mr. and Mrs. Mars Tucker, Mr. and Mrs. Herschel Nellans, Mr. and Mrs. Devon Tucker, Mr. and Mrs. Chester Ballinger, Mr. and Mrs. Gerald Ballinger, Mr. and Mrs. Fred Lemler, Mr. and Mrs. Wayne Bowser. All reported a fine fair.

Miss Richards points to the Shades, located near Crawfordsville, while Miss Thomas is pointing to Indianapolis, geographical center of the state. Both girls are employed by the Indiana Department of Conservation which is sponsoring the statewide subscription campaign.

"Save the Shades" gifts may be made at any bank. Checks may be mailed to "Save the Shades" Indianapolis.

REGISTERED HOLSTEIN-FRIESIAN COMPLETE PRODUCTION RECORD

Four registered Holstein-Friesian cows in the dairy herd owned by Raymond Vail, Syracuse, Indiana, have recently completed official production records in Herd Improvement Registry Test, The Holstein-Friesian Association

of America announced recently.

Highest producer of the four was Bess Burke Ormsby Ona Fobes with a record of 517 pounds of butterfat and 18,796 pounds of milk. The record was made in 365 days on 2 milkings daily and at the age of 5 years 4 months.

Second highest producer was Paul Farm Banostine with 510 pounds of

butterfat and 15,091 pounds of milk, made in 286 days on 2 milkings daily, and at the age of 6 years 6 months.

The other high producers were: Romeo Daisy Mae who, at the age of 7 years 3 months made 447 pounds of butterfat and 12,318 pounds of milk in 365 days on 2 milkings daily.

Romeo Korndyke Ima who, at the age of 4 years 3 months made 432 pounds of butterfat and 12,546 pounds of milk in 335 days on 2 milkings daily.

Testing was supervised by Purdue University in cooperation with The Holstein-Friesian Association of America.

EXAMINATION FOR TELEPHONE OPERATORS' POSITIONS

An examination for filling Telephone Operator positions at basic annual salaries of \$1,954 and \$2,168 was announced today by the U. S. Civil Service Commission. Vacancies are in Washington, D. C., and nearby Virginia and Maryland.

To qualify in the examination, competitors must pass a written test. In addition, they must have had from 6 to 18 months of experience as a telephone operator, the amount required depending upon the type of experience they have had and the grade of the position for which they are rated. Detailed information is given in the examination announcement.

Information and application forms

may be secured from the U. S. Civil Service Commission, Washington 25, D. C., from most first- and second-class post offices, and from Civil Service regional offices. Applications must be received in the Commission's Washington office not later than September 23, 1947.

HERD CLASSIFIED FOR TYPE

Wilbur D. Ward, Syracuse, Indiana, has recently had his herd inspected and classified for type. The Holstein-Friesian Association of America announced. The inspection was conducted by W. A. Weeks, north Clarendon, Vermont, one of the eleven officials appointed by the Association to do this work in the United States.

Among the animals classified in this herd, 2 were designated "very good"—the second highest score an animal can receive; and 5 scored "good plus".

The type classification, combined with a production testing program, is used as a means of proving sires and locating outstanding brood cow families in an owner's herd.

There is no pasture that provides as much late fall and early spring grazing as rye. Many successful dairymen plan to sow a field each year. Balbo is an especially desirable variety since cows can be allowed to graze until milking time without producing off-flavors in milk.

PEACE THROUGH TRADE IS WORLD AIM OF ITO

By MAX SUETENS

Chairman of the Preparatory Committee of the International Conference on Trade and Employment

GENEVA, Switzerland—First in London in 1946, then at Lake Success early in 1947, and since April here in Geneva, hundreds of economists and technicians drawn from 17 countries held more than 600 meetings to evolve a "constitution" for an International Trade Organization (ITO).

The obvious questions arising are: what is the idea behind ITO? Why is ITO considered an essential part of future international relations? What will be the functions of ITO when it does come into existence?

The general purpose of ITO will be to apply in the commercial and economic sphere of international relations the same principals of peaceful discussion and settlement of differences which other parts of the United Nations machinery provide for dealing with political differences.

Speaking at Baylor University in February 1947, President Truman put it this way:

"The Members of the United Nations have renounced aggression as a method of settling their political differences. Instead of putting armies on the march they have now agreed to sit down around the table and talk things out. . . . This is the way of international order. It is the way of a civilized community. It applies with equal logic to the settlement of economic differences."

ITO, the President went on to say, "would apply to commercial relationships the same principle of fair dealing that the United Nations is applying to political affairs. Instead of retaining unlimited freedom to commit acts of economic aggression, its members would accept a code of economic conduct and agree to live according to its rules."

It is for the purpose of working out these rules that the experts were working during the past 11 months. Brought together under the auspices of the U.N. Economic and Social Council as "the Preparatory Committee of the United Nations Conference on Trade and Employment," they represented 17 countries, each of which plays an important part in international trade. The result of their labor—a draft ITO "Charter"—emerged last week as a 100-page document. After being circulated to governments all over the world, the charter will be discussed at the World Conference on Trade and Employment, which will open at Havana on November 21, 1947.

It is hoped that the World Conference, to which all Members of the United Nations—as well as many non-Members and the occupying authorities of Germany and Japan—will be invited automatically, will adopt the draft charter and so provide the means for bringing ITO into operative existence.

ITO, nonetheless, is not likely to begin operations before the summer of 1948, and no recommendations as to its site have as yet been made. This delay is inevitable, for ITO, both in its general purpose and in its day-to-day impact on national economies, will

ABOUT THE AUTHOR . . .

An expert on world trade and economics, Maximilien Richard Leon Marie Suetens has long been a familiar figure on Belgium's delegations to international economic conferences.

For months the 56-year-old diplomat had a vital role in shaping the form of the world's most ambitious international economic agency—the International Trade Organization (ITO).

Max Suetens

His key job was that of Chairman of the Preparatory Committee of the International Conference on Trade and Employment, which was meeting in its second session in Geneva. The fruits of the Committee's work will be reviewed this fall in Havana, when ITO will be set up.

As background to Max Suetens' knowledge of world economics are more than 10 years as Director-General of Foreign Trade in the Belgian Foreign Ministry. In addition, he attended every important economic conference held under League of Nations jurisdiction and had an important part in the recent formation of an economic union of Belgium, Luxembourg, and The Netherlands.

Mr. Suetens was born in Lierre, studied at the Military College in Brussels and served as an infantry officer in the first World War.

influence long-established commercial and trading policies. Time will therefore be needed by the parliaments and legislatures of the prospective member countries for a very thorough examination of the terms of the charter and of the concessions that may have to be made by each country in order to

World Trade Charter in the Making

Calling on U.N. from Geneva, where they had been working with hundreds of other technicians to draw up a constitution for the International Trade Organization (ITO), U.N.'s top economist David Owen (left) and Max Suetens, President of the Geneva Conference, are shown at Lake Success discussing portions of the world trade charter with Hector McNeil, United Kingdom Delegate to U.N.'s Economic and Social Council, which received a report on the ITO.

receive the benefits of membership. That such concessions may be necessary in order to achieve the aims of ITO is shown by a quick glance at the draft charter itself:

"Realizing the aims set forth in the Charter of the United Nations, particularly the attainment of higher standards of living, full employment and conditions of economic and social progress," members of ITO pledge themselves "to promote national and international action . . . to assure a large and steadily growing volume of real income and effective demand, to increase production, consumption, and exchange of goods and so contribute to a balanced and expanding world economy."

In another sentence, later on, the Charter proposes that member countries "reduce tariffs and other barriers to trade and . . . eliminate discriminatory treatment in international commerce." This spearhead of the ITO attack is aimed squarely at the vast maze of trade restrictions and tariff walls which grew up in the period between the two World Wars and which, while they may have benefited certain countries temporarily, have universally tended to retard world-recovery and that attainment of a "higher living standard for all" to which the entire United Nations machinery is dedicated.

Mark the phrases — higher standards of living, full employment, increased production, consumption, and

trade—for these ideals are the very kernel of the ITO, and the key to its success or failure. These are economic conditions which, if achieved, will provide the ideal situation in which trade barriers can be reduced. In this way the threat of economic aggression will be stifled and a great new contribution will be made towards eliminating struggles between countries for wealth and power.

Soak Nuts

Shells and meats are more easily removed from pecans if nuts are soaked in salt water for several hours.

Our service is quick, our prices low, our food good.

We invite you to come in.

MENTONE CAFE

THE PRICE OF PEACE:

U. N. TO ASK \$38,700,000 FOR ITS OPERATIONS IN 1948

LAKE SUCCESS, New York—The world is going to be asked to pay some \$38,700,000—about \$7,000,000 less than New York City's Department of Sanitation spends in year—to keep the United Nations operating in 1948.

That figure pales beside the \$694 billion which the Allies paid for World War II, more than 20,000 times what U. N. proposes to spend next year.

A glance into the estimate-covered 163 pages of Secretary-General Trygve Lie's budget proposals for 1948 brings out the following picture of what is going to be done with the money:

The "town meeting of the world"—the 55-nation General Assembly which approves the budget—will spend some \$1,604,270 on its meetings and those of its committees and commissions. That includes \$220,000 to bring the delegates here and to take them back home; \$250,000 for transportation in New York; \$168,200 for wages for temporary staff; and \$640,000 to print special documents and for other miscellaneous expenses.

Of course, U.N.'s permanent staff of some 2700—on the job the year around—receives, like the employees of almost all businesses, the lion's share of the budget. In 1948, salaries and personnel administrative expenses will run about \$30,000,000. That includes, too, some expenses peculiar to an international organization, such as home leave for staff members who come from more than 45 countries to work at U.N. Headquarters here.

Various services, such as telephones and postage, office rent, supplies, transport and document reproduction, will take a \$2,464,000 bite out of U.N.'s funds. Payments for permanent equipment such as furniture, automobiles, a library and radio and recording devices, will use up \$839,000.

The last item on U.N.'s budget covers the expenses of two economic commissions, the contemplated government of the Free Territory of Trieste and advisory social welfare functions. The price of these services is estimated at \$2,330,000.

Some \$691,000 will be allocated to the International Court of Justice, which has its headquarters at The Hague.

Although the U.N. Budget is slight compared to war expenditures, officials are trying to pare it down still more with a survey of management practices, which is expected to save a sizable sum. However, on the other side of the books is the rapid increase of U.N. functions and the possibility that special investigations, like that connected with Palestine, may increase expendi-

tures beyond present estimates.

Nevertheless, the new budget estimate is only \$11,000,000 more than last year's which, because of the new work assigned the organization by its 55 Member Nations, proved to be insufficient.

The budget, at this moment, does not yet have the green light. It has still to be reviewed carefully by the General Assembly, the same nations which jointly contribute the funds for their ambitious peace-keeping venture, will then work out final figures.

U. N. REVIEW

The long-debated Balkan question has been approached from a new direction. The United States requested that Secretary-General Trygve Lie place "threats to the political independence and territorial integrity of Greece" on the agenda of the General Assembly

for its consideration.

The United States' action came after the Security Council was unable to agree on any resolution for settlement of Greece's complaint against her neighbors, Albania, Bulgaria and Yugoslavia. In its last meeting on the Balkan question, resolutions presented by the United States and by Australia failed to carry when Poland and the Soviet Union, whose concurring vote as a Permanent Member is necessary, voted against the measures. The course the Balkan case would take, U.N. observers pointed out, was not yet completely clear since the matter is still on the Council agenda. Under the U.N. Charter, the General Assembly may not take up a question when it is before the Security Council.

The Security Council unanimously recommended Yemen and Pakistan for Membership in U.N., rejected Albania, Eire, the Mongolian People's Republic, Portugal and Transjordan. Austria, Hungary, Italy, Bulgaria and Rumania were yet to be considered by the Council.

The draft of a charter for the International Trade Organization (ITO) has been completed in Geneva. The Preparatory Committee of the International Conference on Trade and Em-

Mrs. Howard Shoemaker GENERAL INSURANCE

ployment made public a 100-article document which would commit members of ITO to reducing trade barriers and ending economic discrimination, while leaving them protective devices for use during emergencies.

The Veterans Administration announced it will extend compensation payments to veterans discharged from VA Hospitals with arrested pulmonary tuberculosis, but who need more time at home in which to recover sufficiently to work without endangering their health. This permits payments to veterans totally disabled for two years from date of discharge from any VA Hospital while they are under close medical supervision. Previously the payments were reduced by 50% within six months of hospital discharge.

Cokeless Steel

Blast furnaces may cool off altogether as a result of a new cokeless steel making method developed in Russia. Shifted continuously between two smelting chambers at different regimes, the molten ore mass is said to turn into steel quicker and cheaper than in blast furnaces.

U.N. Facts and Faces EGYPT

The Kingdom of Egypt, occupying the Nile Valley—cradle of civilization in northeast Africa—is 386,000 square miles in area and has a population of about 17,500,000. Egypt borders on the Mediterranean in the north, the Anglo-Egyptian Sudan in the south, Libya in the west and the Red Sea in the east. The irrigated lands around the Nile Valley, which has been cultivated since the dawn of history, are rich with silt and produce a variety of agricultural crops, with cotton an outstanding export. Ancient Cairo is Egypt's capital and her King is Faruk I. Egypt is a member of the U.N. General Assembly and is represented at U.N. Headquarters by Mahmoud Hassan Pasha. Her flag is green, bearing a white crescent and three white stars.

ARTLEY D. CULLUM, Editor and Manager.

PRINTED IN THE MODERN PLANT OF THE COUNTRY PRINT SHOP

DRIFTING

By J. V. Dillman

LAST WORD FROM SAFFORDS

The last word we had from Walter Safford was a card addressed to the "Contrary Print Shop." I don't believe he realized just how much he was telling the truth. Though maybe it's me and not the shop.

CARD FROM CULLUMS

Just received a card from the Cullums. It was mailed from Keystone, South Dakota on September 1. He says the scenery is beautiful there (I suppose he means landscape). Also, he says, "Don't work too hard." I wonder if we should take that remark seriously.

Rumors were, recently, that Mr. Cullum's horse was causing him aches and pains in the lower extremities. I hope he remembers that when he stops at one of those ranches. He may need all of his good health and humor when he gets back.

TAKE THE DOG FROM THE BONE

I read a little story recently, I forget where, but it went something like this:

A certain gentleman had a dog which was doing its best to mangle a bone on the living room floor. Of course, the owner disapproved very much of such conduct and tried repeatedly to remove the bone from the room, but received only snarls and snaps from the dog. After much noise and many tries, the Missus entered the room and removed the dog. It was then but a simple matter to remove the bone from the room.

This may be called a fable, if you like. At any rate, the moral is: If faced with an evil, remove the dog first, and you won't get bitten when you take away the veil.

THINK FOR YOURSELF

In discussing a term paper I once wrote for an English Prof., I mentioned the fact that I didn't believe that the grade I received on that paper was received because the paper was well written, but that I may have received the better grade because I found that the Prof. had some rather extreme ideas, and that I made good use of that knowledge when I wrote the paper.

"Yes," said the man to whom I was speaking, "that is just the trouble with you and me and a lot of other people.

We write and say just what we think the teacher will like because we don't have the intestinal fortitude to stand by what they really believe."

I respect the opinions of the man who told me that and that statement suddenly made me start to think. He probably has forgotten that he ever said that but don't think I shall for some time to come.

I think the lesson is self-evident in this case. It would be nice if we all could cease playing hide-and-seek with our minds and openly stand up for our beliefs.

SKULE DAZE

It seems as if that dread day that most kids look forward to in horror has finally arrived. We see them daily meandering slowly in the morning in

the general direction of the school building and in the afternoons dashing in every direction.

I can readily sympathize with them, too, for it was only a few months ago that I was one of them. About this time of year, I begin to feel a longing to be in there with them again. It is about this time when one begins to remember the scrapes, worries and devilment that he got into most of the time. I would like to tell you about them, but cannot do so without encountering various frowns and looks of disapproval from parents and teachers alike for teaching their children such pranks.

I can also remember turning over a new leaf each month after receiving my report card, and promising to try to get a better grade in deportment if nothing else. I succeeded once or twice, too.

Then there was the time I had a crush on the second grade teacher—I never told her though. I really worked hard that year. There now, you modern teachers, is the secret to teaching success, "glamor."

The Indiana Farm Price Index, July 15, 1947, was 262 as compared with an index of 225 a year ago, it was reported by Purdue University and Federal agricultural statisticians recently. The index is based on 1935-39 prices as 100.

STRICTLY BUSINESS

by McFeatters

"We're having landscapes painted on the backs of our trucks so motorists can watch some scenery!"

by EVERETT MITCHELL

Farm Columnator, heard Monday through Saturday, 15-45 a. m. on WMAQ, Chicago, 670 on your dial.

WELL, it's silo-filling time again, and if some of you "early birds" are planning to start packing silage, you had better go out and give the silo a thorough going-over. If you find any places where the air can leak in, better do some repair work.

The upright silo needs protection around the doors, too. An easy and inexpensive method of sealing the silo is to unroll a strip of tar paper over the doors as the silo is filled. There's also a sealing preparation, made especially for this purpose, which can be painted on the inside walls.

The walls of a trench silo should be smoothed; this can be done by wetting them down and then scraping them smooth. You might remember that there will be less wall spoilage if the walls are soaked while the silo is being filled. This keeps the dry walls from drawing that very necessary moisture from the silage.

Every farmer knows that the most important principle in making good silage is to get all the air out of the silage. The normal weight of silage takes care of pressing the air out of the lower two-thirds of the silo. It's the upper third that farmers must worry about. The air will remain in this area, especially the last few feet, unless steps are taken to pack down the silage.

Since the old days, this has been done by tramping down the silage as it was packed into the silo, and it's still a good, time-tested method. If you use a trench silo, one way you can be very sure that your silage is packed as hard as possible is to run your tractor over the silage. The weight of the machine will really do the job.

The Veterans Administration announced that it is reducing the number of its supply depots in the United States from seven to four permanent stations. R. C. Kidd, Director of Veterans Administration Supply Service, said the new setup is designed to save money and to provide a more efficient distribution of supplies to hospitals and other VA installations. Indiana VA hospitals and offices will be serviced by the depot at Hines, Illinois.

Chaplain A. J. McKelway is the new chief of Veterans Administration Chaplaincy Service. McKelway is a veteran of Wars I and II.

Veterans seeking information on the Fulbright Act providing for study of law on student exchange basis, should contact the Division of International Exchange of Persons, Department of State, Washington, D. C. This is not a Veterans Administration project.

**REBEKAH LODGE CELEBRATES
50TH ANNIVERSARY**

The members of the Tipecanoe Foster Rebekah Lodge no. 546 planned a lovely celebration to commemorate their fiftieth anniversary Wednesday night, August 27th. The program was well attended by the public. Delightful refreshments were served by the refreshment committee.

The meeting was opened by Mrs. Ervada Cole followed by the audience singing "America." Rev. E. E. DeWitt then gave prayer. Mrs. Cole turned the program over to Bess McCoy who introduced the first number on the program, which was a vocal number by Bertha Wood, Fostie Sill, Ethel Lewallen and Laura Henker. Officers from the various lodges of the district were introduced as follows: P. G. Master-

Brother Maurice Curtis of Culver, D. G. Master-Brother Berkebile of Rochester, D. D. P.-Sister Ruth Werner of Rochester, District Chaplain-Sister Edna Warner of Culver and Rebekah Representative of Indiana-Sister Carrie Curtis of Culver. After the introductions Ethel Lewallen presented a vocal solo, and Rev. DeWitt gave a short talk. The Culver lodge was represented with accordion music consisting of Missouri Waltz, Red Wing, Peg of My Heart and music of fifty years ago. Members from Leiters Ford entertained with a vocal duet. A splendid reading was given by a member from Warsaw, followed with a solo from the Rochester lodge. Maxinkuckee favored the audience with a duet—"When Silver Threads Are Gold Again." A piano solo was given by Mrs. Laura Henker of Tipecanoe. Short talks were given by

each of the officers formerly introduced. All members who have been in for thirty-five years or longer were introduced as follows: Sister Anna Melser, oldest member; Sister Carrie Harsh, thirty-five years; Sister Lottie Kram, thirty-five years; and Brother Ellis Cormican, thirty-three years. Each of them was presented with a lovely gift by Sister Ruth Werner, followed with a short talk by her. A selection "Long, Long Ago" by the Tipecanoe Lodge preceded the retiring drill which was given by the Richland Center Drill Team. Tipecanoe's Noble Grand, Gertrude Baer and Vice Grand, Susan Morrical were introduced to the crowd. The meeting was closed with prayer by the D. Chaplain Sister Edna Warner.

NEWS?—PHONE 38

Miss Janet Rose Reed took second in horsemanship at the Auburn Horse Show. Janet was riding the Peavine Star owned by Owen Emmerick of Warsaw.

Mrs. Ivo Wagner is a patient at the McDonald hospital.

Mr. Ivo Wagner has resigned as Day Marshal of Mentone to take the position of Custodian at the Mentone American Legion Post.

The Anthony Nigo Chapter of the Daughters of the American Revolution will meet with the Tipecanoe River Chapter for a pot luck supper at 6:30 p. m., Tuesday, September 9, at the home of Mrs. Kurt Nellans. Mrs. Furl Burns, State Regent, and Mrs. McClellan, northern director, will be special guests.

Mrs. E. E. Wagner, who has been ill is reported much better.

KOSCIUSKO COUNTY LEADS IN WILDLIFE HABITAT RESTORATION

Kosciusko County is one of the leading counties of the state in having conservation-minded landowners and conservation clubs cooperating with the State Department of Conservation in restoring wildlife habitat. In 1941 the State started a project in restoring the habitat that our wildlife require. This project is made possible by the sportsman paying an eleven percent excise tax on all sporting arms and ammunition. The tax is collected by the federal government and allotted to the states in proportion to the number of hunting licenses sold and the total acres within the state. Each state matches the amount received by twenty-five percent.

Indiana has spent part of this federal aid money in restoring the food and cover that our wildlife require. The state takes a ten year agreement on areas from two to ten acres and furnishes the trees, shrubs and grains to be planted by the cooperating landowner or club. The landowner agrees not to pasture the area and the state assists in preventing pasturing by paying the landowner for any fence that may be required to prevent pasturing. The landowner agrees that the state may close the area as a Wildlife Refuge in which Hunting, Trespassing, and Dogs are prohibited; and that the remainder of his farm will be open to hunting as it has been previous to making the agreement.

In restoring the habitat on the areas set aside by the landowners, the state furnishes the trees and shrubs to be planted by the cooperating landowner or club. The trees furnished are: Red Pine, Black Walnut, Tulip Poplar, and Black Locust; the food and cover shrubs are: Coralberry, Mulberry, Winterberry, Bicolor Lespedeza, Dogwood, Multiflora Rose, Russian Olive, and Bittersweet; also Sorghum, Korean Lespedeza, and Sericea Lespedeza seed are furnished. The number of and species of trees and shrubs furnished for an area depend upon the present vegetation in the proposed area, the type of soil, and the desires of the landowner, which are all taken into consideration in restoring the ideal habitat for our wildlife. After the area has been established the state makes periodical inspections of the area and assists the cooperator in maintaining the area so it will develop into the type of habitat that will furnish the essential food and cover at all times of the year and in all kinds of weather.

Kosciusko County has thirty-nine areas set aside as Wildlife Habitat Restoration Areas at the present time, with the majority of them in the southwestern corner of the county and sponsored by the Mentone Conservation Club.

These habitats, consisting of a total of approximately 250 acres, are located as follows: 1, Ed Severns; 3, C. O. Mollenhour; 2, Chancey Tucker; 1, Sam Norris; 2, Ora Beeson; 1, Gus Mollenhour; 1, Conservation Camp at McClure Lake; 1, Bernard Black; 1, Jessie Jones; 4, Hobart Creighton; 1, C. L. Manwaring; 1, Lyndes Latimer; 1, Neva Teel; 1, Ed Surguy.

By this record, we believe that people are getting more and more conservation minded. Conservation should mean life itself to us; for, without water and our soil, there would be no life of any kind on this earth.

The last war destroyed untold amounts of our natural resources and now it is time for us to restore as best we can for our future generations.

The writer, looking at the map of Indiana, can see the black line of waste lands creeping northward. We should teach our youth these conditions and guard our future resources.

Effective September 1, 1947, American veterans will be eligible for repayments of tuition and other expenses they were required to pay personally while attending foreign schools under the GI Bill.

WEATHER CHANGES PREVAIL DURING JULY IN INDIANA

Hoosiers enjoyed—or deplored—an interesting variety of weather in July, according to statistics released recently by the Indiana Department of Conservation.

Scientific gadgets designed to calculate precipitation showed the rainfall in the South (at Shoals, for instance) was approximately one inch below normal while at Fort Wayne the reading was one-half inch above normal.

Temperatures generally remained below the July average, although several days were "scorchers" as most citizens will remember. The mean temperature at Indianapolis was 72.5 degrees, 3.2 below normal.

A wide local variation in precipitation occurred because scattered thunderstorms comprised most of the rainfall, but the readings averaged about normal throughout the state.

Knightstown was victim of the worst flash floods on July 14 and 15 when 5.14 inches of rain fell. A fierce storm produced serious wind and flood damage in an area between Knightstown and Salem. Flooding occurred almost entirely along small, ungaged creeks.

RELEASE 6,000 PHEASANTS IN NORTHERN TIER

Release of between five and six thousand full-grown pheasants in the northern tier of counties was announced recently by the Indiana Department of Conservation.

Donald R. Hughes, director of the Division of Fish and Game, said releases are being made in the northern 50 counties by Conservation officers. Average release is 120 birds to the county.

Hughes said the release represents a clean-up of the breeding stock from the Jasper-Pulaski and Wells County State game farms. The birds, hatched in the Spring of 1946, have completed breeding.

MILLION DOLLARS TO BE SPENT ON INDIANA PARKS

First phase of a million dollar improvement program is underway throughout the Indiana Park System, the Indiana Department of Conservation announced recently.

Kenneth R. Cougill, parks director, said work is already underway on some phases of the program authorized by the 1947 Legislature and that almost a quarter of a million dollars has already been authorized for expenditure by the Budget Committee and Governor Ralph F. Gates.

Improvement funds are allocated from the state Alcoholic Beverage fund.

The Budget Committee allocated \$49,350 for completion of restoration work on the Whitewater Memorial Canal between Metamora and Brookville. Other allocations, totaling \$190,300 were made as follows: Shakamak State Park (Sullivan and Greene counties), pave roads and parking area, \$10,000; Pokagon State Park (Steuben county), pave roads and parking areas, \$12,000; Lincoln State Park (Spencer county), bath house and refectory, \$30,000 and sewage disposal system, \$12,000.

Brown County State Park, pave road ("Y" to service area), \$20,000 and pave road around Lodge, \$4,800; Tippecanoe River State Park (Pulaski county), pave roads, \$10,000 and swimming pool for group camp, \$45,000; McCormick's Creek State Park (Owen county), pave roads to picnic area, \$5,000 and family cabins, \$20,000; Mounds State Park (Madison county), pave road, \$8,000 and boat house and boats, \$6,000.

Good Swimmer

A muskrat (musquash) can travel as far as 50 yards under water without coming up for air. His fur is nearly as fine and dense as that of a beaver. When treated and dyed it may be known as Hudson Seal, Wallaby, Velvet Cone, River Mink, Sealskin and a number of other trade names.

OUR CHURCH DOOR

To all who mourn and need comfort, to all who are tired and need rest, to all who are friendless and want friendship, to all who are lonely and want companionship, to all who are homeless and want sheltering love, to all who pray and to all who do not but ought, to all who sin and need a Saviour, the Mentone Methodist church opens wide its doors and in the name of Jesus the Lord, bids you Welcome.

"I VOTED TO CLOSE THE CHURCH"

"Last Sunday I voted to close the church; not intentionally, nor maliciously, perhaps, but carelessly, thoughtlessly, lazily, indifferently. I voted to close its doors that its witness and its testimony might be stopped. I voted to close the open Bible on its pulpit — the Bible that had been given us by years of struggle and by the blood of martyrs who died that we

might have it to read. I voted for our minister to stop preaching the glorious truths of the Gospel of Jesus Christ. I voted that the children of the Sunday School no longer be taught the stories of the Bible and no longer lift their tiny voices in singing.

Jesus loves men, this I know.

For the Bible tells me so.

and of the congregation to be stilled, I voted for the voice of the choir and the congregation to be stilled, and that they no longer sing in united praise,

Let angels prostrate fall:

All hail the power of Jesus' name

Bring forth the royal diadem,

And crown Him Lord of all.

I voted for every missionary of the church to be called home, every native worker supported by the church to stop preaching, every school and dispensary in its foreign missionary fields to close. I voted that its college close their doors and no longer bother to train its youth for Christian Service. I voted for every home missionary project to be abandoned, every influence for good and right and for truth in our community to be curtailed and finally stopped. I voted for the darkness of superstition, the degrading influence of sin, the blight of ignorance and the curse of selfish greed once again to settle their damning load on the shoulders of an already over-burdened world.

I voted for all this, I say, and more too — things that the human mind cannot grasp and the human tongue cannot find words to express. Carelessly, thoughtlessly, lazily, indifferently, I voted.

For, you see, I could have gone and I should have gone, but I didn't. I stayed away from church last Sunday."

Huge Flow

The Gulf Stream carries two billion tons of water a minute past Florida.

DESPISERS OF GOD

Earnest prayer and devout service to God are expected of His children. But we may worship God with zeal, earnestness and deep feeling, and yet despise Him!

Jesus said, "Not every one that saith unto me, Lord, Lord, shall enter the kingdom of heaven; but he that doeth the will of my Father which is in heaven. Many will say to me in that day, Lord, Lord, have we not prophesied in thy name? and in thy name cast out devils? and in thy name done many wonderful works? And then I will profess unto them, I never knew you: depart from me, ye that work iniquity." Matthew 7:21-23.

These people do many wonderful works in His name, are devoted and zealous, but show they despise God by failing to do His will. The apostles delivered this will of God to men; and when they reject or set aside the teachings of the apostles for the wisdom of man, they show that they despise God.

When we rely on other ways than that revealed in the New Testament, God rejects all the service we render and will despise us as unworthy of His love and pity. Devotion plus obedience to the extent of our ability has always secured the favor of God.

WELCOME TO THE CHURCH OF CHRIST

TIPPECANOE CONGREGATIONAL CHRISTIAN CHURCH

Rev. L. H. Hohenstien

Sunday School, 9:30 a. m., Orville Eizinger, Superintendent.

Morning worship, 10:30.

You are invited to these services.

FIRST BAPTIST CHURCH

Mentone, Ind.

You are ever welcome to this house of God.

Special music at each service

Workers Prayer Meeting 9:15 a.m.
Everyone welcome. Teachers and officers expected to attend.

Bible School 9:30 a.m.
Classes for all ages, including a nursery for the babies.

Morning Worship 10:30 a.m.

Young People's Fellowship 7:00 p.m.

Nellie Christian, President.

Evening Service 8:00 p.m.

Informal Gospel and Song Service.

Thursday Evening 8:00 p.m.

Prayer and Bible Study.

We are here not be ministered unto but to minister. May we be of help to you?

TIPPECANOE METHODIST CHURCH

E. E. De Witt, Pastor

C. C. Sarber S. S. Superintendent

The Sunday School at 9:30.

The Worship at 10:30.

We invite you to all of our services.

Ancient Tree

The oak tree originated about a hundred million years ago.

BENDER-MILLER NUPTIAL VOWS

Miss Marie Bender, daughter of Mr. and Mrs. William Bender of Bourbon, exchanged wedding vows with Gordon Miller, son of Mr. and Mrs. Orran "Buddy" Miller of Tippecanoe, Friday night, August 29, at 8:30 in a quiet ceremony in the Jerusalem Evangelical United Brethren Church, northeast of Bourbon. The impressive double ring ceremony was performed by Rev. E. G. Johnson before an altar banked with baskets of gladioli and zinnias.

The charming bride wore a light blue suit with black accessories for her wedding. In preference to flowers, her only ornament was a rhinestone pin which was a gift from the bridegroom.

The bridal couple were attended by their mothers, Mrs. Bender and Mrs. Miller. Mrs. Bender wore a dress of blue printed sheer with a corsage of red gladioli. Mrs. Miller was attired in a dress of dove gray and also wore a corsage of red gladioli.

Others present at the ceremony were William Bender, Oran Miller, Mrs. Mel Zimmerman and Mrs. E. G. Johnson.

Following the ceremony, a small reception for the immediate members of the families was held at the home of the bride's parents. Ice cream and cake was served to the guests.

The happy newlyweds took a short wedding trip to Indianapolis where they attended the State Fair.

The bride is a graduate of Bourbon High School in 1939 and has been assisting her parents on the farm. The bridegroom graduated from Tippecanoe High School in 1937 and is employed at the Hoosier Egg and Fruit Farm near Mentone.

Mr. and Mrs. Miller are now at home to their many friends in their newly furnished home in Bourbon. Their host of friends wish them a long life of lasting happiness together.

You Need The Co-Op. Needs You

FLYING LESSONS

Reduced prices on the new Aeronca Chief.

MENTONE AIRPORT

"Chick" Herendeen, Opr.

Milk prices are now lower than usual as compared with other farm prices. The proportion of the milk going into manufacturing rather than fluid uses is rising, according to Purdue University agricultural economists. Thus dairy returns are expected to be less favorable than during the last few years due to lower milk prices and higher feed costs. Now is a good time to cull the herd closely and hold onto that whole milk outlet if you have it.

Keep young pigs out of old hog-lots; they get wormy there.

Sow's milk is more than 80 percent. Check pig scours at first indications. Give sow an ounce of baking soda daily water; a constant supply of drinking water is essential. In water for two or three days.

Dim Lights

Dim or low beam lights should be used in driving through fog, recommends National Highway Users conference. Bright lights do not penetrate the fog and the rays are reflected back into the driver's eyes.

Mr. and Mrs. Ralph Mollenhour and Mrs. D. C. Mollenhour, of Warsaw, are visiting in Alberta, Canada.

Miss Francis Clark is spending this week with her mother, Mrs. Broda Clark, because of the postponement of the opening of the school at Idaville, Indiana, due to an epidemic of polio.

The American Legion Auxiliary will meet next Tuesday, September 9, at the Legion Home. Special entertainment has been planned.

AIR CRASH . . .

trailing smoke in a spin. Gaining speed on the way down the ship burst into flames at 200 feet, crashed and exploded.

Residents of Atwood, three miles away, felt and heard the explosion, and thought it was thunder. Parts of the ship were scattered over a radius of one-quarter of a mile.

Harold Gay, a nearby resident, said: "I heard planes overhead and looked up. The motor of one of the ships seemed to sputter. I could see smoke in the clouds, then the ship, spinning down. It was trailing smoke. I heard the explosion when it hit here a few minutes later."

Starts Burning in Air

Argyle Rowland, who was quite close to the scene of the crash, said: "I saw this plane pull away from the others, dive into a cloud. It came out with smoke pouring from it and spinning. About 200 feet off the ground, the smoke turned to flames. It exploded with terrific force when it hit the ground."

Harold Ruff and Frank Houghton, along with several other persons, saw the crippled ship spinning down. All their stories tallied closely.

The ship appeared to have hit the ground in the attitude of a tail spin, nose down and heading slightly north-west.

Only the massive Allison engine, a few broken pieces, and some burning gas and oil, remained in the large hole.

Other pieces were blown hundreds of yards. One of the pilot's hands was found nearly 200 yards north of the crash, another 200 yards northwest of the hole.

Body Blown to Bits

Two hands, one foot and some very small pieces of flesh clinging to bits of the plane, were all that was found of the body. It had literally been blown to bits.

Sheriff Ray Henderson received a telephone call from Flight Officer Clancy, of Sioux Falls, S. D., who reported that a flight of seven ships had left Sioux Falls for Akron, Ohio, Monday morning. They stopped off at Chicago for fuel. The other pilots reported that Christianson dropped out of sight in some clouds near Atwood, Indiana, and was presumed to have crashed. The sheriff informed Clancy that the pilot was dead and officers from Baer Field, Fort Wayne, had taken charge.

LOCAL NEWS

Mr. and Mrs. Lloyd Miner and daughter returned Tuesday from Oshkosh, Wisconsin, where they had visited for the past week.

Mr. and Mrs. Dave Ellsworth, and daughter, Betty, are spending the first two weeks of this month visiting relatives in Kansas.

Thursday morning, Mrs. George Clark and Mr. and Mrs. Don Bunner,

enroute to Plymouth, Indiana, collided with a car driven by Mr. Vern Sponseller, of Etna Green. No one was injured, but the Clark car suffered considerable damage.

Dr. and Mrs. Max Blue and son spent Labor Day with Dr. Blue's mother, Mrs. Orpha Blue.

Mr. and Mrs. Morris Greulach spent Labor Day with their parents, Mr. and Mrs. Dick Greulach. Miss Thais Greulach returned with them to Fort Wayne where she is a teacher in the Harrison Hill School.

Miss Wanda Smith has entered training at a beauty college in Fort Wayne.

Mr. Earl Shinn, Mr. Jack Shinn, Mr. Charles Manwaring, Mr. Miles Manwaring, Mr. Richard Manwaring and Mr. Max Smith attended the National Air Races at Cleveland, Saturday, Sunday and Monday. They reported that the races were very exciting.

Mr. and Mrs. Don Bunner spent Labor Day vacation with their son and family at Fon du Lac, Wisconsin.

The Home economics club will meet with Mrs. Helen Weirick on Wednesday afternoon, September 10.

Rev. S. M. Hill filled the pulpit of the Baptist church both morning and evening of Sunday, August 30.

Mrs. Carl Blackburn, of Warsaw, R. 5, who was rushed to the Rochester hospital, August 17, in a critical condition was dismissed from the hospital, August 28.

(Continued from front page)

UMMEL - KELLEY . . .

the single strand of pearls given to her by the bridegroom.

Miss Wylan Becker, of Elkhart, who has been the roommate of the bride at Manchester college for the past two years, was her attendant. Miss Becker wore a gown of light blue taffeta fashioned with front skirt drape and bow at the back. Her mitts were of the same material and her net Juliet cap matched her gown in color.

Don Kuhn, of Beaver Dam, attended the bridegroom as best man. Mrs. Kelley the light blue dress which she chose pinned a corsage of pink roses to for her daughter's wedding. Mrs. Ummel, mother of the bridegroom, in a light blue dress of white floral print, wore a corsage of white roses.

At the reception immediately following the ceremony, Mrs. Leon Kelley, was assisted by Mrs. Don Kuhn and Miss Carol Mahoney in serving.

Upon their return from their wedding trip to southern Indiana, Mr. and Mrs. Ummel will reside in North Manchester, where they will be enrolled as students in Manchester college. Both are graduates of the Beaver Dam high school. Mr. Ummel received his discharge last May after serving in the army of occupation in Italy.

HIGH SCHOOLS READY TO PLAY

Softball Loop Will Start September 5

With the start of school Friday morning, county coaches were already

making plans for the opening of the county high school softball league, which gets underway Friday afternoon, September 5. The schedule was adopted at the teachers' institute Thursday, and teams have been grouped into two leagues, the northeastern and the southwestern.

Six teams comprise the northeastern loop. They are Leesburg, Milford, Syracuse, North Webster, Pierceton and Sidney. The southwestern group consists of Silver Lake, Burket, Beaver Dam, Claypool, Atwood, Mentone and Etna Green, a total of seven teams.

The schedule runs until September 26, with the final playoffs scheduled for September 30, and October 1 and 3. The two top teams in each league will qualify for the playoffs, with the southwestern league champion meeting the northeastern league runner-up on September 30. The northeastern league winner will meet the southwestern runner-up on October 1, and the two winners will then battle for the championship on October 3.

Play Starts September 5

The first teams to be in action will be the members of the southwestern loop. They will play Friday afternoon, September 5. On the following Tuesday all 13 teams will commence play, and league tilts will continue each Tuesday and Friday thereafter. All games are scheduled for four o'clock.

With Donie Wolferman returning to Milford High School, the powerful Trojans are heavy favorites to win their sixth consecutive county title. Wolferman has hurled brilliant ball during the summer, and it was either he or his brother, Fritz, who pitched Milford to championships from 1942 to 1946, inclusively.

Other teams have issued warnings that they will be out to stop the defending champs. North Webster, with Jerry Engle on the mound, will be a threat, as will Leesburg, with Don Lozier doing the potting. Both of these boys have been active in the Warsaw city leagues during the summer. Little is known about the other teams, but there will undoubtedly be several outstanding teams.

The county coaches association is led by president Bob Bushong, of Milford. Burton Niles of Leesburg, is vice president, and Corlyss LeCount, of Beaver Dam, is secretary and treasurer.

The regular league schedule is as follows:

Friday, September 5

Southwest—Claypool at Beaver Dam, Burket at Atwood, Mentone at Silver Lake.

Tuesday, September 9

Northeast—Pierceton at Milford, Sidney at Syracuse, North Webster at Leesburg.

Southwest—Atwood at Etna Green, Silver Lake at Burket, Beaver Dam at Mentone.

Friday, September 12

Northeast—Pierceton at Sidney, North Webster at Milford, Syracuse at Leesburg.

MILLION-MILE PILOT AT BURKET

The following was taken from the column, "Sky Writing," by William Mollenhour. His Column is published daily in the Warsaw Daily Times.

Did you know we had a "million-mile" pilot from Kosciusko county? Dean of the local airmen is undoubtedly Louie Meredith, hailing from Burket.

Meredith is a first-pilot and captain at American Airlines. In the flying game, these boys are the aristocrats of the business. They don't come any higher.

He has the honor of receiving American's merit award, for flying their passengers more than 1,000,000 miles safely.

Louie is the son of the late Orlando Meredith, was reared on a farm east of Burket. His mother lives in a town east of Burket at the present time.

He first started flying in Fort Wayne, went about it in a business-like manner and finished up on the west coast in an accredited flying school.

It was Louie, taking wee-ends off his work with American Airlines, who taught many of our early airmen around Warsaw to fly. He was the instructor for the group of clubmen who brought the first Porterfield here. Jack Menzie used to fly into Chicago, pick Louie up, so the rest of the gang could have the benefit of his instruction over Sunday. Then flew to work on Monday.

Louie is now on the multi-engine, Chicago-Washington-New York run, lives in Illinois. He is married to the former Ruth Leifer, cute little registered from north of Pierceton. They have three fledgling eagles who wait at home for this "Casey Jones" of the air to finish his round-trip to New York.

Yes, in every field, Kosciusko county has put forth leaders.

Southwest—Silver Lake at Claypool, Beaver Dam at Etna Green, Atwood at Mentone.

Tuesday, September 16

Northeast—North Webster at Pierceton, Sidney at Leesburg, Milford at Syracuse.

Southwest—Burket at Beaver Dam, Etna Green at Mentone, Claypool at Atwood.

Friday, September 19

Northeast—Leesburg at Pierceton, North Webster at Syracuse, Milford at Sidney.

Southwest—Silver Lake at Atwood, Mentone at Burket, Claypool at Etna Green.

Tuesday, September 23

Southwest—Atwood at Beaver Dam, Burket at Claypool, Etna Green at Silver Lake.

Friday, September 26

Northeast—Milford at Leesburg, North Webster at Sidney, Syracuse at Pierceton.

Southwest—Mentone at Claypool, Etna Green at Burket, Beaver Dam at Silver Lake.

DR. URSCHEL SPEAKS AT COLUMBIA CITY

Dr. Dan Urschel was the principal speaker at the September meeting of the Whitley County Medical Society on Tuesday evening, September 9. This meeting was held at Columbia City, and the subject for discussion was Brucellosis. Because this subject is of great importance in veterinary medicine (Bang's disease, contagious abortion), several local veterinarians were invited guests, including the president of the State Veterinary Association, Dr. Clark. Dr. Urschel discussed particularly the chronic phase of the disease as it affects human beings. This medical enigma is the source of much ill health, but it is extremely difficult to diagnose and treat.

The wide-spread interest in this subject is indicated by the extensive lecturing Dr. Urschel is called upon to do. He, with Dr. Neal Davis, of Lowell, pioneered in clinical research on this condition. Next week he is to talk to the 11th Council District Society at Peru (Miami, Wabash, Huntington, Grant, Howard, Carroll, and Cass Counties) and in October he is to address the State Medical Association at its annual meeting at French Lick.

REGENOS ON COUNCIL

Harley Regenos of Yellow Creek lake was named Tuesday to serve on the county council until 1949, to fill the unexpired term of Elmer E. Meredith of north of Akron, who died last week. Regenos will be councilman-at-large.

CLUB CALENDAR

Order of Eastern Star — September 15, 7:30 p. m. at the Masonic Temple.
American Legion — September 16, 8 p. m. at the American Legion Home.

LEGION AUXILIARY MEETS

The Mentone American Legion Auxiliary met at the Legion Home Tuesday evening, September 9. There were 29 members present and two guests.

The Misses Violet Friesner and Marilyn Tucker furnished the entertainment by singing several songs.

Refreshments were served by Nell Reed, Louise Kinsey and Juanita Paulus.

SILVER LAKE IS 13 TO 7 WINNER OVER MENTONE

Scoring in every inning, the Silver Lake Ramblers opened their 1947 southwestern league softball season by defeating Mentone high school, 13 to 7, at Silver Lake Friday night.

Bob Harris hurled for the Ramblers, giving up eight hits. His teammates collected 10 safe blows off F. Dunnuck and Vandermark, Mentone hurlers.

Williamson, shortstop for Silver Lake, had three hits to lead the Ramblers' attack. Dick Jontz and Wright each collected two safeties.

Mentone's batting attack was led by Dave Bowser, who had three hits in as many tries.

Condensed box score:

Mentone (7)—Grubbs, ss, 311; Emmmons, 3b, 420; Vandermark, lf, p, 411; Bowser, 1b, 323; Friesner, rf, 300; Molebash, 2b, 201; F. Dunnuck, p, 200; Lowman, 2b, 211; Coleman, lf, 201; Winter, ph, 100. Totals, 7 runs and 8 hits.

Silver Lake (13)—Harris, p, 500; Sells, lf, 511; Rider, 1b, 431; Jontz, 3b, 332; Kinsey, cf, 321; Wright, lf, 322; Roberts, 2b, 400; Williamson, ss, 413; Doub, c, 410. Totals, 13 runs and 10 hits.

Score by Innings

Mentone	012 112 0
Silver Lake	113 431 x

ENTERTAIN SUNDAY SCHOOL CLASS

Mr. and Mrs. Harry Sullivan entertained the Young Married Peoples Class, of the Church of Christ, in their home east of Mentone, Friday evening.

The main event of the evening was a movie of the Good Samaritan, produced and shown by Bro. M. F. Cottrell of South Bend. Local talent and scenic pictures were also shown. Refreshments were served by Mrs. Sullivan and Mrs. Glen Law.

Those present were: Mr. and Mrs. Lloyd Boyll and two sons; Mr. and Mrs. Glen Law; Mr. and Mrs. Herb Carlile and two daughters, Mr. and Mrs. Elgie Vandermark, Mrs. Dencil Walls, Mr. and Mrs. George Deamer, Jr.; Mr. and Mrs. Vance Johns; Mr. and Mrs. Delford Nelson; Mr. and Mrs. Howard Horn; Mr. and Mrs. Lester Bruner; Wayne Porter; Larkin Fields; and Mr. and Mrs. M. F. Cottrell and Mr. and Mrs. Ward Sullivan of South Bend.

CONDITION OF BENJAMIN HIVELY STILL IS SERIOUS

Attaches at the Murphy medical center reported Thursday that there is no change in the condition of Benjamin Hively, 56, of route 2, Warsaw, who was injured Tuesday in a freight-elevator fall at the Lake City Machine Co. plant at Mentone, where he served as janitor.

Hively suffered a severe skull fracture, a deep cut upon the head and numerous minor injuries and lacerations when the elevator fell to the basement. Hively and Clayton Holloway, of Mentone, were ascending in the elevator when it jammed in the shaft. The lifting device continued to operate, and the heavy supporting timbers were pulled down from above.

When the elevator and debris fell to the basement, Mr. Hively was thrown violently into a two-by-four timber. Holloway escaped with only minor bruises.

KOSCIUSKO EGG EXHIBIT WINNER AT STATE FAIR

The Kosciusko County Home Economics association and Miss Martha Pfahler, of Warsaw, emerged from state fair competition with fifth place awards, it was announced by Miss Marjorie Moore, county home demonstration agent.

The Home Economics association captured an \$80 cash award for an exhibit boosting Kosciusko county as "The Egg-Basket of the Middlewest." The food constituents of eggs and the use of eggs for decorative table effects were stressed in the display which was arranged around a large basket prepared by Mrs. Sherman Deaton, of Syracuse.

Miss Pfahler, daughter of Mr. and Mrs. John Pfahler, won her fifth place in 4-H club judging in the food preparation division. She won first place in district competition at Columbia City in July.

Another 4-H girl, Janet Carr, of Claypool, represented the county in the state fair dress revue.

Miss Pfahler, Patty Jones, and Jean Wertenberger, of Monroe township, attended the state fair girls' school. The first two plan to enter Purdue university next Tuesday.

LOCAL BUDGETS ARE APPROVED Adjustment Board Acts Monday

The county tax adjustment board Monday morning approved the budgets of all Kosciusko county taxing units without change and they were referred to the state tax board for final decision, it was announced by County Auditor Helen J. Kyle.

All seven members of the adjustment board were present, as follows: Mayor Frank O. Rarick, of Warsaw, chairman; Trustee Madison F. (Matty) Jones, of Syracuse, representing the county board of education, vice chairman; Dr. Otto C. Stoelting, of Syracuse, representing the county council; and Mrs. Ben Eagler, Mrs. Stuart Stokes and Fred Hendrick, of Warsaw, and Mahlon Mentzer, of Mentone, appointed by Judge John A. Sloane of the circuit court.

The budgets were discussed in general terms before the board took action. Included were the budgets of the county general fund and welfare department, the townships, the towns, the city of Warsaw, the Warsaw school and the libraries.

CELEBRATE SILVER WEDDING

Mr. and Mrs. Clarence Cotey, of Mentone, were honored Sunday afternoon at a party arranged by their daughters, Miss June Mae and Miss Rose Mary Cotey, in celebration of their 25th wedding anniversary. They were presented with many beautiful gifts. Dainty refreshments were served. The guests included Mr. and Mrs. Anton Echaradt, Mr. and Mrs. Ed Grimm, Mr. and Mrs. James McDowell, Mr. and Mrs. James Sherry and Mrs. Josephine Cotey, all of Chicago; Mr. and Mrs. Henry Frantz, of North Manchester; Mr. and Mrs. Lloyd Capes and son and daughter, of Laketon; L. L. Davis, of Warsaw; Mr. and Mrs. Howard Phebus and son, Max, of Tippecanoe and Mr. and Mrs. Arthur Brown, of Mentone.

Friends and relatives pleasantly surprised Elgie Vandermark on his birthday, Sunday. A potluck dinner was enjoyed by Mr. and Mrs. Jo Vandermark; Mr. and Mrs. Masa Nelson; Mr. and Mrs. Herb Carlile and family; Mr. and Mrs. Harry Sullivan and family; Mr. and Mrs. Lloyd Boyll and sons; Jennie Hall; Mr. and Mrs. Ray Eckert and family and Larkin Fields.

CONSTITUTION DAY TO BE OBSERVED SEPTEMBER 17TH

On September 17th, Mentone and the State of Indiana will observe the 160th anniversary of the Constitution of the United States — the best document yet devised to guarantee the freedom, independence and dignity of the human race.

A National Constitution Day Committee has sent plans into every state urging all citizens to join on that date in rededicating themselves to principles of the Constitution. National civic leaders are also asking active participation by all organizations and individuals.

Ralph F. Gates, Governor of Indiana, and whose state has for many years been a leader in commemorating Constitution Day, says: "We have come to more clearly understand and appreciate the great wisdom of our founding fathers who gave us this basic law.

"We all recognize, cherish and honor the Constitution as the cornerstone of our great union of free states, under which, with the guidance of God, will continue to grow and maintain its position of greatness in the eyes of the world.

"I urge all people — on this 160th anniversary of the signing of the Constitution — to cooperate in consecrating its memory, in dedicating themselves to upholding its principles, and in helping to bring about a world freedom as great and just as we have achieved under its great guidance."

This is a good time to review that preamble, which is as applicable today as it was when it was drafted in 1787. It is a good time, too, to ask ourselves these questions: Have we formed a perfect union, established justice, insured domestic tranquility, provided for common defense, promoted the

general welfare, and secured the blessings of liberty?

The United States, by its victory and by its power, has a great world responsibility. It has in its reach insuring the tranquility of much of the world and improving the status of mankind.

The contents of two warehouses at Rockford, Ill., consisting of approximately \$2,000,000 worth of such varied war surplus as automotive equipment, used clothing, and fire extinguishers, will be offered for sale September 10 through September 12 by the Chicago region of the War Assets Administration. Previously offered at a fixed price, the property, which may be inspected September 8 and 9, is being put up for disposal by the spot bid method as the quickest way of clearing the locations, Bruce J. Brown, regional director explained. The offering also includes 250 used kitchen ranges, which cost \$56,000.

WAA announced that it had awarded 77 surplus buildings at Camp Grant, near Rockford, Ill., to 14 bidders for \$13,487, making a total of 417 buildings disposed of for \$149,857. Priority holders purchased the other 340 buildings.

Hotpoint, Inc., of Chicago, has purchased two war surplus plants in Milwaukee, Wisc., for \$2,122,000, WAA revealed. The plants were operated during the war by the Allis Chalmers Manufacturing company to produce turbo-superchargers for aircraft. Hotpoint will use the plant for the manufacture of electric dishwashers and hot water heaters, attracting approximately 1,000 workers.

ANIMAL HEALTH TOPICS

SOW'S DIET IMPORTANT IN CONTROL OF PIG SCOURS

Swine producers are being warned to watch for signs of baby pig scours in their fall litters, especially during the first month after farrowing.

According to swine disease experts, scouring is not apt to prove serious if the pigs are vigorous and healthy and if correct measures are taken to control it. If, however, the pigs are in poor condition, the trouble may prove fatal.

Small pigs depend upon the sow for practically all of their nourishment and, therefore, the trouble lies in the sow's diet. If she is fed too much corn, her litter will almost invariably scour. Likewise, if she is fed at irregular intervals, causing an uneven flow of milk, the pigs may scour from overeating. Also, when sows are permitted to wallow in manure and filth, the pigs may scour from consuming this material while nursing.

In herds where this trouble occurs, veterinarians recommend that the feed of the sow be reduced about 50 per cent. If this does not correct the scouring within a few days, the sow should be taken off feed for 24 hours in order to reduce her milk production.

LIVESTOCK THRIVE ON DISTILLERY WASTES

Experiments with the use of distillery by-products as livestock feed are so startling that whiskey may become but a by-product of the distilling industry, according to the Journal of the American Veterinary Medical Association.

"Soluble wastes from the distilling process are becoming worth more than the whiskey itself and, needless to add, more useful," the Journal declared.

Cornstalk Fields Furnish Poorest Feed for Animals

Stalk fields furnish the poorest quality of feed that farm animals receive in this country, says the Journal of

the American Veterinary Medical Association, because when corn has ripened, its leaves have lost most of their nutritive value. The ears scattered about the field are soon consumed — too soon, declares the Journal — leaving a lot of rough, tough pickings that rate around zero as feed for milk cows.

Horses that feed on this material are left hard to recondition in the spring, and the low riboflavin content of the stalks may predispose them to attacks of "moon blindness," the Journal adds.

"Mystery" Deaths of Steers

Mysterious deaths of steers in feedlots can be traced sometimes to blackleg, according to a current veterinary report. The explanation is that producers today are sending relatively young steers to feedlots. Under this practice, the steers are old enough to have lost the immunity afforded by blackleg vaccination, but not old enough to have acquired the so-called age immunity that mature cattle have against this disease.

BABY PIG DISEASE

University of Illinois studies, reported in the current issue of the American Journal of Veterinary Research, offer new evidence of the need for keeping a close check on the food intake of baby pigs. The entire first week of life is a critical period, these studies showed, and if pigs do not get enough sustenance from the sow during this period, acute hypoglycemia may result, leading to extensive death losses. The exact cause of acute hypoglycemia is not known, but milklessness in the sow and digestive disturbances in the pigs have been found to be important contributing factors.

Sale of a former government-owned hemp plant at Darion, Wisc., to the Walworth Foundries, Inc., of Walworth, Wisc., for \$40,000 was disclosed by WAA. The corporation manufactures castings used by dairy and food industries.

NEWCASTLE TOWNSHIP NEWS

Mr. and Mrs. Robert A. Calvert, Mr. and Mrs. Charles Horn and Mr. and Mrs. William Utter spent Sunday in Michigan.

Miss Rosie Good, of South Bend, is confined to the home of her parents, Mr. and Mrs. Charles Good, on account of illness.

Miss Leah Kepler, of Argos, called on Mr. and Mrs. O. C. Montgomery, Sunday. Miss Kepler is a former resident of this place before moving to Argos twenty-nine years ago.

This place was without lights over an hour Sunday noon when the power went off.

Mr. and Mrs. Fred D. Barr spent the week in Sheldon, Illinois, with friends.

Mrs. Ralph Chapman is enjoying a week's vacation from her duties at the Woodlawn hospital in Rochester.

Mrs. Lon Walker has returned to her home in Indianapolis after spending the past week here as the guest of her husband, Lon Walker.

Mrs. Cora Bryant spent Friday afternoon in Rochester.

Mrs. Paul Scott, who has been confined to her home on account of illness, is able to be out and around.

Mr. and Mrs. Bud Barkman and daughter and Mrs. Morris Hibbs spent Saturday evening in Rochester.

Mrs. Gail Mathews and family, of

Inwood spent Saturday here with her mother, Mrs. Maude Kinsey.

Gene Pfeiffer and Ed King have returned to their home after a month's trip to California and other places of interest.

LaMar Pfeiffer, of Logansport, was the week end guest of his parents, Mr. and Mrs. Clarence Pfeiffer.

Bud and Norma Walker have returned to their home in Indianapolis after spending the past two weeks here with their grandparents, Mr. and Mrs. C. M. Walker.

Mr. O. C. Montgomery and Lavoy attended the All-Star softball game at Mentone, Friday evening.

Frank Arter, who suffered a stroke recently, is improving and is able to be out and around again.

Mr. and Mrs. Kermit Biddinger attended the State Fair at Indianapolis, Thursday.

Mrs. Maude Kinsey, Mrs. Charles Good, and Mrs. Charles Emmons are helping with the hot lunches which are being served to the pupils at the Talma School this season.

Mrs. Howard Mathews spent Saturday evening in Rochester as the guest of her parents, Mr. and Mrs. Richard Graves.

Mr. and Mrs. Edwin Clemens, of near Logansport, were the recent guests of her parents, Mr. and Mrs. Charles Holloway.

Mrs. Dana Starr, of Mentone, was the guest of her parents, Mr. and Mrs. Jim Hubbard, Wednesday.

Mrs. Charles Green and daughter, Louise, spent Saturday evening in Rochester.

Paul Scott made a business trip to Plymouth Wednesday afternoon.

Mr. and Mrs. Howard Daniels, of Chicago, spent the week end here at their home.

Mr. and Mrs. James Walsh and family, of Chicago, spent the week end at their farm here.

Mr. and Mrs. Herman Haines and son of Warsaw were the Sunday guests of his sisters, Misses Alice and Nora Haines.

Mr. and Mrs. Loren Kramer spent Saturday evening in Rochester.

Miss Bonnie Jean Hubbard spent the week end as the guest of her parents, Mr. and Mrs. Roy Hubbard, of near Tiosa.

Dr. and Mrs. Elmer Gilliam, of St. Joe, Michigan, were the guests of Mr. and Mrs. Lou Grove, Thursday afternoon.

Choosing Coffee

Freshly roasted coffee is superior to any other kind. To get your money's worth of coffee flavor, choose a vacuum-packed brand unless you are absolutely sure that the other package is freshly roasted.

Corn leaves are streaked with yellow or yellowish-green when there is a potash hunger. Edges of leaves are dry and scorched and these dead areas may fall out. Corn may lodge due to poor root development. Look for these signs later in the season, about earing time. Potash starvation indicates an advanced stage of soil exhaustion. Correction of this deficiency lies in application of potash fertilizers.

Building Number 401 at the Kentucky Ordnance plant, Paducah, Ky., together with all contained electric and steam generating equipment, has been sold to the Atomic Energy Commission, which will dismantle the equipment for use elsewhere, WAA announced. Sales price was \$315,440.

Transfer of part of the war surplus West Virginia Ordnance Works, Point Pleasant, Mason County, W. Va., to the West Virginia state board of education for use as an agricultural experimental farm has been approved by WAA.

Sheep production based on the production of top quality lamb meat is sound business.

Seed timothy, red top, fescue and brome grass in draws that will form sod waterways.

First Contacts

Steamships alone provided contact between Alaska and the United States when the territory first was opened by the gold rush of '98. Under an act of congress of May 26, 1900, the army signal corps built 1,740 miles of telegraph line in two years, and laid a cable in the sea from Sitka to Seattle, giving instant communication with remote areas.

Our service is quick, our prices low, our food good. We invite you to come in.

MENTONE CAFE

When You Choose Your Electric Water Heater . . . Be Sure to Select One Large Enough!

It is important to select an Electric Water Heater large enough for all your household needs so that you'll have a plentiful supply of hot water at all times and so that you can buy your electricity at night on the special low electric rate. No home is modern without abundant hot water, instantly available at the turn of a faucet. That is why you need an Electric Water Heater.

CONSTITUTION DAY . . .

In proclaiming September 17 as Constitution Day, Governor Gates again urges all the people of Indiana to join in rededicating themselves to the principles of the Constitution on this 160th anniversary and "in helping to bring about a world freedom as great as we have achieved under our great Constitution."

The State is fortunate in having a standing Constitution Day Committee which has the experience and qualifications to carry out the Governor's desire for state-wide observance.

The committee was formed a number of years ago. It is a voluntary group of people from all walks of life who believe that one of the best ways to preserve American liberty is to keep the meaning of the Constitution constantly before the people.

Every community in the county will do well to cooperate with the Committee by holding appropriate meetings and exercises on September 17th, anniversary of the occasion, in 1787, when the Constitutional Convention adopted the instrument and referred it to the several states for ratification.

It is a privilege and a responsibility of all school, civic, patriotic and industrial groups to cooperate in this program of rededication to our fundamental American principles.

The world is still in process, if the hopes and prayers of the people are realized, of making the essence of the American Constitution the world charter of the freedom for which the war was fought. Americans can do no less at this time than continue to demonstrate that they have found a superior way of life under the Constitution.

CHARTER OF LIBERTY . . .

In celebrating the formal adoption of the Constitution of the United States, which took place Sept. 17, 1787, the stress in recent years has been on showing that the great document was hammered out of the sacrifices of the common people.

Although it was formally drawn by delegates to the constitutional convention, it was written on a thousand battlefields as liberty-loving men through the ages fought off the tyranny of their oppressors.

Every guaranty in the Constitution was paid for by men who risked and suffered death in a long struggle to overthrow masters who ruled them by force and fear.

The Constitution converted into basic law the freedom thus dearly bought. It set the element of force over behind

the protection of liberty. It provides that this force can be directed only by men who govern with the consent of the people.

The anniversary of the adoption is a fitting time to read again, and to ponder long and thoughtfully, the preamble of the Constitution, which is as follows:

"We, the people of the United States, in order to form a more perfect union, establish justice, insure domestic tranquility, provide for the common defense, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity, do ordain and establish this Constitution for the United States of America."

In the light of long experience during which the Constitution has stood off the attacks of would-be tyrants, it is well to note that the founding fathers looked far ahead. They said in the preamble that they were resolved to "secure the blessings of liberty to ourselves and our posterity." How well they wrought is for posterity to judge.

And the judgment of posterity it that they did succeed in finding the perfect formula for organized government. Today humble men throughout the world are looking to it as the charter of liberty from which may be evolved a formula for universal and perpetual peace.

160 YEARS OF LIBERTY . . .

Constitutional government in the United States will be 160 years old September 17th. Out of the bitter struggle for independence, and equally bitter dissensions within the ranks of the original 13 colonies came the greatest document of freedom ever composed by man. The Constitution of the United States is the foundation on which the liberties and laws of our people rest. It is the framework around which we Americans have built the most productive, and the most powerful free government on earth.

It is the purpose of the National Constitution Day Committee to remind us of these oft forgotten duties. They seek to inspire us to rededicate ourselves to the great principles our Constitution embodies. During National Constitution Week starting September 14, this organization, which will sponsor programs through the aid of many public spirited and dedicated men and women, is planning an outstanding celebration. National radio hookups, prominent speakers, educational movies, school essay contests and other events

are being arranged.

The main attraction will be the featuring of the Constitution itself. Surely Americans will want to join together and give thanks for the precious liberty we now enjoy. For we must know that we are not free by accident, but by the valor, the insight, the vision and the sacrifice of those who came before — of those who won our liberty for us, and preserved it through the Constitution of the United States.

Constitution Not Invulnerable—

Need of constant vigilance to defend the Constitution is foremost in the minds of citizens of the United States as this year we commemorate its 160th anniversary. That basic document is adequate to meet changing conditions of the American government. It is not suitable to the alien ideologies a swarm of left wingers are trying to chisel into this cornerstone of freedom.

The Constitution has survived numerous hazards during the nation's history. It served during the transition from a group of colonies to a vast Federal domain. Its provisions were sufficiently flexible to cover the rivalry of the industrial North and the Agricultural South, climaxed by the Civil War. This Constitution followed the flag as the United States became a world power after the Spanish-American War.

Only when starry-eyed, swivel-chair theorists in our country began trying to make America over on a foreign pattern did the Constitution prove an obstacle. Then followed the attempted packing of the Supreme Court, designed to make the judicial branch of government, and with it the Constitution, subservient to executive mandate.

That danger persists. Germany provided the glaring example of supposed constitutional government perverted by Nazi excesses. The point is stressed in "The Road to Serfdom" that demagogues and dictators can maintain the pretense of democratic institutions while utterly destroying constitutional processes.

Enough red-blooded Americans remain to defend the Constitution against violence or revolution. But too many may discount the peril which already has rocked the highest court and menaced the basic guaranty of freedom.

The Constitution is not a shrine to be honored by due ceremony on the September anniversary. It is a bulwark of American liberty to be guarded from stealthy attack, that opportunities of the past may be assured for coming generations. Like the shibboleth of 1898, "Remember the Maine," let every loyal citizen rally to summons of a political crisis: "Watch that Constitution!"

"We must remember that what the United Nations can do is granted by its Charter. What the United Nations will do is entirely up to its member nations." — Warren R. Austin, United States Representative at the Seat of the United Nations.

Milk for Hungry Children

A pair of stevedores in New York loads part of a shipment of 3,000,000 pounds of dried milk destined for the hungry children of five war-devastated European countries. The shipment is the first by the International Children's Emergency Fund, which was organized last fall by the United Nations to provide at least one meal a day for youngsters who have suffered from six years of war.

U.N. HELP FOR CHILDREN STARTS WITH TONS OF MILK

WASHINGTON — Three million pounds of powdered milk are now on their way to children of five European countries, making the beginning of aid to children in war-stricken countries from the recently-organized International Children's Emergency Fund (ICEF).

Distribution of the tons of vitally-needed milk will begin in the first half of October in Albania, Austria, Greece, Poland and Yugoslavia, ICEF reports.

This first shipment, which cost nearly \$500,000, ICEF officials point out, is only the opening gun in the fight to arrest malnutrition among children and nursing and expectant mothers in 13 countries to receive ICEF aid this year. They are Austria, Albania, Bulgaria, Czechoslovakia, Finland, Hungary, China, France, Greece, Italy, Poland, Rumania and Yugoslavia.

The fund, which was set up by the United Nations last December, now has some \$20,000,000 on the credit side of its ledgers, with contributions from a number of governments still to be announced. A steady stream of special protective foods will soon be moving into the countries where children suffered most from the privations of war.

Thus far, the Fund has procured its supplies with the \$550,000 which was raised for famine relief from voluntary contributions in the United States a year ago by the United Nations Relief and Rehabilitation Administration (UNRRA). UNRRA, which has ended its work, turned the money over to ICEF.

Initial government contributions of \$15,000,000, appropriated by the United States Congress, and \$5,000,000, voted

by the Canadian Parliament, also are being used for the procurement of supplies. Contributions also have been announced by France, Czechoslovakia, Luxembourg and Norway. Australia and New Zealand are now considering the size of their contributions and all of the other members of the British Commonwealth of Nations are expected to support the Fund.

Even now, a working team, which includes Dr. Domingo Ramos, of the University of Havana, and Dr. Howard Kershner, of the United States, is visiting Latin American governments to explain the purposes of the Fund and to stimulate interest. Inter-American cooperation on behalf of European children was strongly recommended by the Inter-American Conference which met at Chapultepec in 1945, and ICEF officials hope that Latin America which generously supported UNRRA, will contribute not less than \$15,000,000 to ICEF.

Unsolicited private donations to ICEF have netted more than \$10,000, but a much greater contribution is expected as a result of the forthcoming United Nations Appeal for Children, which will ask the people of the world for relief contributions of one day's pay.

The ICEF staff at present numbers fewer than fifty employees and small field missions are being set up to work in the assisted countries. As a matter of policy, the Fund uses the contributions from various donor countries for the purchase of supplies in those countries and, wherever possible, works through established procurement agencies.

News Briefs

France Gets Poll Aid Through World Court

THE HAGUE — France has enlisted the aid of the President of the International Court of Justice, whose headquarters are here, in polling the 4200 inhabitants of a Franco-Italian border region on whether they want to join the French Republic.

At France's request, Jose Gustavo Guerrero, Court President, nominated three impartial observers who will attend a plebiscite in the Tende-Brigue district, along the French border in a mountain district rich in water power.

The Tende-Brigue District, which has historical roots in Roman times, was awarded to France under the Franco-Italian peace treaty. However, the new French Constitution prohibits addition of new territory unless the inhabitants consent. France, therefore, will hold a plebiscite, which was not mentioned in the treaty, six months after the pact takes effect.

The three observers, who will ensure that the plebiscite is conducted with complete impartiality, are citizens of The Netherlands, Switzerland and Sweden.

U.N. Moving to Control Traffic in New Drugs

LAKE SUCCESS, New York — A new threat to the now-effective international control of narcotics — drugs born in scientific laboratories for medical use — is nearer elimination after action by the United Nations Narcotics Commission.

The Commission, reviewing the illicit use of amideone and demerol, recently-developed synthetic narcotic drugs which were administered during the war, branded control of the products as urgent. The Commission proposed that the Economic and Social Council, its parent body, bring the drugs under existing, effective international agreements, which up to now have dealt mainly with natural products, such as opium.

Survey Finds TB High in Greece

ATHENS — Tuberculosis, the result of hunger and crowded living conditions in this war shattered country, is striking hard at the population here and in Salonika, a field mission of the Interim Commission of the World Health Organization (WHO) finds after a survey.

The internationally-sponsored mission has found that three out of each 100 persons examined have been attacked by TB. The mission is introducing the latest anti-tuberculosis measures and is working with the Greek government in setting up better public health care.

Analyzing 80,000 reports on 150,000 individuals who were X-rayed, the mission points out that only a very small proportion of diseased persons "are known to be receiving any form of therapy."

However, some hope of arresting the "white plague" is seen in the report which states that "46 percent of the cases requiring treatment were in a stage where therapy, promptly applied, has extremely good chances of curing the patient."

In Athens, the report showed, 732 new cases were discovered in a survey of 34,000 people, a rate of about 2100 cases for every 100,000 persons. In the United States, in 1945, the rate of newly-discovered tuberculosis was only 89 per 100,000, while in England it was only 122.2 per 100,000.

The WHO mission conducted its examinations by mass X-ray at centers in Athens and Salonika with the cooperation of the Greek government. The mission is headed by Dr. J. M. Vine of Australia.

The WHO field mission also reported that a program of spraying DDT to stamp out malaria in Greece has reached to "every accessible malarious village."

FAO Survey Sees Only Fair Crops in Poland

WARSAW — One of Europe's most important food producing areas will produce only fair to good crops this year, the ten-man international mission of the Food and Agriculture Organization of the United Nations (FAO) reports here in a preliminary survey.

The mission, studying food and agricultural conditions at Poland's request, recently studied the region between Warsaw and Gdansk and Olsztyn, which includes much of the former German territory of East Prussia.

Farm buildings and draft power are scarce in former German areas, the FAO group reports, and only part of the fields are being utilized. A shortage of cattle exists in damaged sections, including former German areas, the mission indicates.

Double Question Faces UN as India Forms 2 Nations

LAKE SUCCESS, New York — What happens in an international organization when two nations appear where only one had been before?

The United Nations was faced with that question recently when British India became two independent countries — the Dominion of India and the Dominion of Pakistan — overnight.

Which nation, observers pondered, was to take India's former place as a Member of the United Nations and other world organizations? Or were both new nations to be Members?

The answer to the question is symbolized by a new saffron, white and green flag — that of the Dominion of India — which is now flying in front of U.N. Headquarters here. But before the answer could be given there were several steps.

The representative of Pakistan in the United States asked whether his country was not automatically a Member of the United Nations. Acting Secretary-General Ivan Kerno replied, that the Dominion of India took over British India's former position in U.N. and that Pakistan would have to apply for membership separately. The legal opinion cited international law and precedent, such as the severance of Belgium from The Netherlands in 1839 and the Irish Free State from the United Kingdom in 1922. It was then able.

that the Dominion of India's membership was affirmed.

Almost immediately Pakistan set the membership machinery of the United Nations into motion with an application addressed to the Secretary-General. The application was referred to the Security Council, which unanimously recommended to the General Assembly that Pakistan be admitted to membership.

The final step will come this month when the General Assembly votes on the question. The membership of Yemen, also approved by the Security Council, will also come before the 55-nation General Assembly, which meets at nearby Flushing Meadow.

Airman's Guidebook Published by ICAO

MONTREAL — the first of a series of manuals, covering the air routes of the world and containing information needed for aerial navigation, has been published here by the International Civil Aviation Organization (ICAO).

The newly-published manual covers the North Atlantic Routes, now among the world's busiest. It describes the navigational, communications, search and rescue, meteorological, and other facilities for aircraft flying over the North Atlantic Ocean.

The North Atlantic Manual and others to be published later will be kept up-to-date with a continuous service of the newest information available.

U.N. Facts and Faces EL SALVADOR

DR. JOSE ANTONIO QUIROS

The Republic of El Salvador, a mountainous country on the Pacific shore of Central America, has about 13,000 square miles and a population approaching 2,000,000. El Salvador borders on Guatemala in the west; Honduras and the Gulf of Fonseca in the north and east; and the

Pacific Ocean in the south. The climate ranges from tropical on the 160 mile coastline to temperate on the mountain slopes, location of important coffee plantations which are the country's economic mainstay. El Salvador has been represented in the U.N. General Assembly by Dr. Jose Antonio Quiros, Foreign Minister and Delegation Chairman. Her flag has blue stripes at the top and bottom with a center stripe of white, containing the country's coat of arms.

U.N. Review

The Security Council has finished its discussion of the question of fighting in Indonesia with the passage of three resolutions. The council first adopted a joint Australian-Chinese resolution providing for the supervision of the cease fire orders of The Netherlands and Indonesia by the career consuls of the Member Countries of the Security Council in Batavia. The vote was seven in favor with four abstentions. Next the Council adopted a United States resolution, by a vote of eight for with three abstentions, which called on the Council to offer its good offices to the parties in the dispute. The third resolution, presented by Poland and adopted with ten favorable votes and one abstention, called on the Indonesian Republic and The Netherlands to adhere to the cease fire orders of 1 August.

The controversial issue of the "veto" — the U.N. Charter rule requiring unanimity of the five Permanent Members of the Security Council for action — has come before the Council for discussion. Eight months ago, the General Assembly had asked the busy Security Council to discuss the question. Taking up the matter, the Council,

after the initial debate, referred it to its Committee of Experts for further study.

A full-scale international attack on food problems began in Geneva with the opening of the third session of the Conference of Food and Agricultural Organizations of the United Nations (FAO). Delegates from 39 nations and observers from seven others were attending the meetings, which was opened three months earlier than usual to deal with urgent food problems. In early sessions, Australia, Finland and Siam were admitted to membership.

Program of Coming United Nations Meetings

11 September

Second Annual Meeting of the Board of Governors of the International Bank for Reconstruction and Development to meet at Washington.

Second Annual Meeting of the Board of Governors of the International Monetary Fund to meet at Washington.

16 September

NEW LEAVE POLICY FOR G. I. STUDENTS

The Veterans Administration's new leave policy on G. I.'s going to college is expected to speed up between-semester subsistence payments to some 35,000 veterans enrolling in Indiana colleges and universities this fall, VA officials in Indianapolis said recently.

The new leave policy, effective September 1, 1947, will introduce a system of unbroken subsistence payments to veterans who previously were certified from semester to semester. In the future, veterans will remain on the subsistence payment rolls a year at a time, providing there is no more than 15 days between terms.

Veteran students will be put on subsistence rolls from date of enrollment until 15 days after close of each semester, thus providing final payments to those students who enter the next semester. The leave will be charged against their entitlements. No leaves other than the 15-day extension will be authorized by the VA, with the exception of scholastic leaves offered by colleges to other students.

The 15-day leave will be granted to all veterans upon enrollment. Those who do not want the leave must notify the VA in writing at least 30 days before the end of the semester or school year. In the past, students were taken off the subsistence rolls at the end of the normal school year and those who continued their studies during the summer had to be recertified for further subsistence payments.

The new regulations will eliminate considerable paper work for the colleges and the VA. It applies only to veterans studying in institutions of higher learning under the GI Bill.

The second Purdue University Short Course and Hatchery School conducted by the university poultry department will be held at the Purdue-Marratt Agricultural Center in Indianapolis, October 20 to 31. The first short course was held early in August at the university. Further information can be obtained from the poultry department.

HEALTH FACTS FROM YOUR STATE BOARD OF HEALTH

Chest X-Rays

More than 13,000 persons took advantage at the Indiana State Fair of the free screening chest x-ray offered through the co-operation of the Indiana State Board of Health and the Indiana Tuberculosis Association.

"Four times as many people had chest x-rays this year as last year," Dr. Merle Bundy, director of the Division of Tuberculosis Control, Indiana State Board of Health, said recently. "The total for last year was 3,019. For four days, a total of over 2,000 x-rays were taken each day this year..."

"The attitude of the people was different this year," Dr. Bundy said. "They were eager for the x-ray while last year they were reluctant to go before the machines. We were gratified with the response of not only the Indianapolis people but of those throughout the state and other states. We had visitors from Canada, Michigan, Florida, Illinois and California."

"Results of the screening tests will be mailed out within four to eight weeks and persons will be notified through their full-time health departments or local Tuberculosis Associations. If there are any suspicious findings, the individual will be notified to see his family physician."

"The screening test at the State Fair was an educational program to acquaint as many persons as possible with this case-finding procedure," Dr. Bundy pointed out. "The units operating at the Fair are available to local communities upon the approval or request of the local medical society and health officer."

Never leave the ground bare any longer than necessary. Vegetation is important over the winter.

LOCAL CITIZEN ON WLS BROADCAST

Pictured here are some of the participants in the Thursday Prairie Farmer Air Edition Broadcast conducted at the Wisconsin State Fair by Gladys Skelley, Modern Homemaking Editor. The program was transcribed and aired at 6:15 p.m. that evening. Among the participants are winners in a flower arrangement contest conducted in the Prairie Farmer-WLS exhibit tent. Shown left to right are Miss Skelley; Mrs. Emil Witte, of Watertown, Dodge County, Wisconsin, first prize winner; Mrs. Leo Ritger, of Hartford, Washington County, Wisconsin; Mrs. Walter Ferrell, of Mineral Point, Iowa County, Wisconsin, second prize winner; Mrs. Leo Adams, of Akron, Kosciusko County, Indiana; and Mrs. Maurice Ducklow, of Oconomowoc, Waukesha County, Wisconsin.

Milk cattle use more farm labor in Indiana than any other crop or livestock enterprise. Next in order are corn, poultry, and hogs, according to the Purdue University agricultural economists.

The average size of commercial farms is tending to increase. The increase in number of very small part-time farms is keeping the average size of all farms, as defined by the census, from changing much.

CONSTITUTION DAY SPONSORED BY NATIONALLY KNOWN CITIZENS

September 17 is the 160th anniversary of the adoption of the Constitution of the United States — the most perfect document yet written by men for the government of men. The program for this year's nation-wide observance is being formulated by a National Constitution Day Committee headed by Samuel R. Harrell, Indianapolis, director of the National Foundation for Education in American Citizenship.

The national general committee, sponsors of this year's commemoration, includes: Hon. Herbert Hoover, formerly President of the United States; Admiral Chester W. Nimitz, Fleet Commander, U. S. Navy; James A. Farley, formerly Postmaster General and Chairman Democratic National Committee; Will H. Hayes, formerly Postmaster General and Chairman Republican National Committee; Lewis B. Schwellenbach, Secretary of Labor; Mrs. Roscoe E. O'Byrne, President General National Society Daughters of American Revolution; Earle O. Shreve, President United States Chamber of Commerce; Hon. Ralph F. Gates, Governor of Indiana; Miss Sally Butler, International President Business and Professional Women's Clubs; James R. Shotwell, Director Carnegie Endowment for International Peace; Arthur T. Vanderbilt, Dean New York University School of Law and Past President American Bar Association; Robert L. Johnson, President Temple University; Charles W. Armstrong, President Kiwanis International; Roscoe Pound, formerly Dean of the Harvard Law School and Eugene Pulliam, Publisher Indianapolis Star.

The governors of most states have issued proclamations designating September 14 to 20, 1947, as Constitution Week, inviting the people of the various states to observe the week, and particularly the day, September 17th, as the one hundred and sixtieth anniversary

of the signing of the Constitution of the United States of America, with appropriate ceremonies, with study of the fundamental principles of government embodied in the Constitution, and with display of the flag of the United States of America on the anniversary date.

Appropriate exercises are being arranged in all schools. Civic and patriotic societies, luncheon clubs, industrial groups, churches and professional organizations are urged to cooperate in this program of rededication to our fundamental American principles.

The Constitution is a living document. There is no governmental charter in the world which comes as close as the American Constitution to true justice. Justice for the rich and the poor, for the weak and strong, for the evil and the good. The Constitution of the United States belongs to no man. It belongs to all men, to all creeds and all faiths and all races.

YOUR CONSTITUTION . . .

How often do you, as an individual, find occasion for direct reference to the Constitution of the United States? Very seldom.

How often does that document affect your life? Every minute.

To dismiss it casually as a state paper too legalistic for ordinary interest — as so many of us have gotten into the habit of doing — is a direct abnegation of the glories of citizenship in America. Only through a retaining faith in the principles which the Constitution so simply expounds can this nation continue strongly on its path of unity. Only through individual knowledge and appreciation of the founding faiths can this united, liberty-lighted march of 140,000,000 people be guided forward toward in-

POULTRY, EGGS AND CREAM

creased attainments.

The attention Constitution day is receiving throughout the nation is stimulating as a reflection of those sentiments of traditional Americanism which flourish in this typical state. Ordinarily little notice has been taken of the anniversary of the momentous event of Sept. 17, 1787, when the document guaranteeing our liberties was signed.

The basic document had been taken for granted, like the sun and rain. The Bill of Rights guaranteed equal opportunity under the law and maintained free speech and individual enterprise. In their fundamental concepts these were regarded as the North Star, as unvarying as the laws of the Medes and the Persians.

Let us read again the Preamble, "We, the People of the United States, in order to form a more perfect union—," and let us determine to keep alive in our memories the interplay of dramat-

ic events which forged the masterpiece of government.

Let us never become so blase in the satisfaction of our modern conveniences that we will regard the stories of the birth of liberty as school-boy stuff, beneath the glances of sophisticated men. Let us always revere the anniversary date of the Constitution's adoption — September 17 — and determine to renew our appreciation for the noble rules of government which have made all men equal in the chance for honor and happiness.

Rugged Americans, who still respect the wisdom of the founding fathers, face the responsibility of making our citizens more Constitution conscious. The national committee and all those who have assisted in arranging special programs pointing out the bearing of the organic law on individual and national life are rendering an invaluable service to their country.

HESSIAN FLY-FREE DATES STRESSED

The recent survey of wheat fields shows that the Hessian fly is not abundant this year. Prof. J. J. Davis, head of the department of entomology, Purdue University, reports.

In no county is it seriously abundant and in only 10 of the 48 counties surveyed is the fly moderately abundant and all of these are in the northern half of the state. However, Prof. Davis points out, if adherence to the fly-free date is not maintained, we may anticipate a serious recurrence of the Hessian fly and serious losses.

The Hessian fly, which was brought to this country by Hessian soldiers encamped on Long Island during the revolutionary days is prevalent throughout Indiana but because of the rather universal adoption of sowing wheat after the fly-free date, losses during the past 20 years have been significantly low. Agronomists agree that the fly-free date is the best date to sow wheat regardless of the fly.

The average fly-free or fly-safe dates for sowing wheat, were established approximately 20 years ago after a series of date of sowing studies in 10 or 12 points in Indiana, which were continued over a period of more than 10 years. While it is true that the date in a specific county may differ a few days from the standard from year to year, depending largely upon weather conditions, it is not possible to conduct fly emergence records in each county each year, and therefore, the average over a 10-year period has been set as the date which has proved satisfactory.

The earliest fly-free date is September 22 for the northern tier of counties. The dates average one day later for each tier of counties, with September 30 for the center of the state and extending to October 9 for the southern tip of the state.

STORY BEHIND FIRST SHADES GIFT IS TOLD

Indiana Department of Conservation officials today released the story behind the first gift to the fund to "Save the Shades."

Although the campaign to create Indiana's 15th state park in west-central Indiana got underway only last week,

the first donation was made on May 29 when an anonymous Indianapolis woman mailed a \$5.00 bill to Arthur R. Baxter, Indianapolis businessman who forstalled sale of the 1452-acre park

to timber interests by purchasing the area until the state could get a public subscription campaign underway.

In her letter to Mr. Baxter the unknown giver expressed "my very, very deep appreciation of what you have done for Indiana" and enclosed a five-dollar bill to "start the ball rolling."

Relating how she had seen the Shades but once — 15 years ago — she added that "I probably will never see it again but I will never forget the impression it made upon me."

"Those wonderful massive rocks! I just stood there awe-struck, having never seen such majesty before. And I have longed many, many times to go back again to stay long enough to

drink it all in, but that has not been my privilege, inasmuch as I have no automobile and cannot afford to stay overnight."

Winding up her letter with appreciation to Mr. Baxter for making the "Save the Shades" campaign possible by preventing its sale to timber companies, the unknown giver added that:

"Surely there must be thousands of people in Indiana who feel as I do, that the Shades must be saved and converted into a state park for the enjoyment of all the people."

Shades gifts are now being collected by all Indiana banks. Checks may be mailed to "Save the Shades," Indianapolis. All gifts are deductible from income for Federal tax purposes.

EARLY RESPONSE TO SAVE SHADES DRIVE IS FAIR

Early response in the statewide public subscription campaign to "Save the Shades" and develop it as Indiana's 15th state park was listed recently as "only fair."

Indiana Department of Conservation officials, sponsors of the campaign, said early reports indicated a rather slow response on the part of the public but John H. Nigh, Conservation director, expressed the conviction that the \$300,000 goal will be met.

"But," he added, "realization of the goal means that every citizen interested in the continued development of the nation's best-known system of state parks must cooperate."

Gifts are being accepted by all Indiana banks and checks may be mailed to "Save the Shades," Indianapolis, Indiana. All gifts to the campaign are deductible from income for Federal tax purposes.

The Shades, a 1452-acre scenic tract near Crawfordsville, is known throughout the nation. It contains one of the few remaining stands of virgin hardwood trees in the Midwest.

OUR CHURCH DOOR

To all who mourn and need comfort, to all who are tired and need rest, to all who are friendless and want friendship, to all who are lonely and want companionship, to all who are homeless and want sheltering love, to all who pray and to all who do not but ought, to all who sin and need a Saviour, the Mentone Methodist church opens wide its doors and in the name of Jesus the Lord, bids you Welcome.

MORBUS SABBATICUS

(Sunday Sickness)
Morbus Sabbaticus is a disease peculiar to Church membership.
1. The symptoms vary, but it never interferes with the appetite.
2. It never lasts more than twenty-four hours.
3. No physician is ever called.
4. It always proves fatal in the end—to the soul.

CHRIST'S PLAN

True religion, as taught by Jesus, is a system of faith and worship, complete dependence upon God, proper behavior, generosity, and living the Golden Rule. It is necessary that we believe in God and Jesus Christ the Son and obey certain commandments.

When Jesus had finished His work in training His disciples to carry on after His ascension to heaven, He commanded them, among other things, as follows: "Go ye therefore and teach all nations, baptizing them into the name of the Father and of the Son and of the Holy Spirit, teaching them to observe all things whatsoever I have commanded you: and lo, I am with you always, even unto the end of the world." Matt. 28: 19-20.

The Scriptures teach us that a man's salvation comes not by some mysterious work of the Holy Spirit on his heart, but rather, it was necessary for the disciples to teach the people of all nations to do certain things as well as to believe on Jesus. See Heb. 5:9.

God's plan of human redemption required that Christ should die as a sacrifice for all mankind. In so shedding His blood, Christ gave man an opportunity to wash away his sins in the blood of the Lamb. Christ has done His part; man must do his.

WELCOME TO THE CHURCH OF CHRIST

5. It is contagious.

The attack comes on suddenly every Sunday; no symptoms are felt on Saturday night, and the patient awakes feeling fine; eats a hearty breakfast. About nine o'clock the attack comes on and lasts until around noon. In the afternoon the patient is much improved and is able to take a ride and read the Sunday papers. Patient eats hearty supper, but the attack soon comes on again and lasts through the evening. Patient is able to go to work Monday, as usual. Isn't it strange how the aches and pains that keep people from church never keep them from the basketball games or the county fairs?

HOME EC. CLUB MEETS

The Mentone Home Economics Club met at the home of Mrs. Raymond Weirick, Wednesday p. m. with Mrs. Linas Borton as co-hostess. The history of the song of the month was read by Mrs. Emra Anderson. Club song for the month was "Put on Your Old Gray Bonnet" which was sung by all and was followed by repeating the creed.

Business was conducted by Mrs. Linas Borton.
Then was the auction sale of five articles, which were bought by Mrs. Emra Anderson, Mrs. Raymond Weirick, Mrs. Howard Horn, Mrs. George of 50c to Rans, and Mrs. John Laird. Mrs. Wm. Vernet made a gift of 50c to the auction fund.

The mystery package was won by Mrs. George McIntyre.
Twenty-one members responded to roll call by expressing ideas for study for the new year.
One guest was present.

ICE CREAM SUPPER

The Mentone Home Economics Club will entertain their families with an ice cream supper at the home of Mrs. Roy Salmon on Tuesday evening, September 16.

SCHOOL REUNION

The annual reunion of the District No. 7 School of Tippecanoe Township, Marshall County, was held at the Tippecanoe High School on Sunday, September 7.

The oldest teacher and ex-pupil of No. 7 present was Herbert Laird, of Bourbon. About forty persons were present. A delicious dinner was enjoyed at the noon hour.

A program of talks, contests, riddles, etc., was given after the business session.

Those attending from this vicinity were Mr. and Mrs. Isaac Horn, Mrs. Minnie Anderson and Mr. and Mrs. John F. Laird.

The 1948 meeting will be held at the same place on the first Sunday after Labor Day. Every one who at one time or another was a pupil or teacher is urged to attend.

J. F. Laird, President, Mentone, Ind.
Mrs. Theresa Coplen, Secretary, Warsaw, Indiana.

Water Power

Because of its many falls and rapids, Africa has more than one-third of the world's potential water power. But less than one per cent of it has been harnessed because the falls are in regions where it would be almost impossible to develop industries, says the World Book encyclopedia.

Weaving Varies

Weavers of rugs in the orient have quaint customs. In the Kerman district of Persia (Iran) the weavers fringe both ends of their rugs. But in the Sultanabad section, the weavers start a rug with selvage and fringe off only one end when completed.

Weight of Moose

Alaskan moose have been known to weigh as much as 1,700 pounds.

FIELD DAY TO FEATURE SOFT CORN DISCUSSION

Problems of storing and feeding soft corn will receive major attention as a part of the Corn and Soybean Field Day program at the Purdue University Soils and Crops Experimental Field, Friday, Sept. 12, according to R. R. Mulvey, university agronomist, who is in charge.

Hoosier farmers this year are confronted with the latest silking and tasseling corn crop in all their years of farming. At least 60 days are required for most hybrids to mature after silking, and after mid-August, usually 70 or more days are required.

Corn is considered mature when the moisture content of the grain is down 33 percent. After reaching this point of development, it will make no further increase in either yield or feeding value. It still must lose from 10 to 13 percent more moisture for safe cribbing, and usually 20 days of drying weather in the late fall are required for this reduction.

Farmers therefore are faced with high moisture content until very late in the season, and have the problem of storing wet corn safely or using it to the best advantage for feed.

Joining with university agronomists in discussing these problems at the

field day will be Dr. W. M. Beeson, feeding specialist of the animal husbandry department, and Dr. H. J. Barre, head of the agricultural engineering department. While limited supplies of effective corn drying equipment restrict the amount of artificial drying on the farm, numerous safeguards are available to improve the possibilities for storing wet corn.

Dr. Barre will discuss these safeguards and also possibilities or limitations of drying corn with and without heated air. These discussions, along with farm experiences, will be a part of the afternoon program following the forenoon tour of the experimental field. An address will be given by Professor Frank Hall of the university history department on "What's Ahead?"

CONSTITUTION WEEK

Back more than a century and a half ago, a man by the name of George Washington, who later became rather a well-known person in these United States, said, in a talk to the Constitutional Convention in Philadelphia in 1787:

"It is probable that no plan we pro-

pose will be adopted. Perhaps another dreadful conflict is to be sustained. If, to please the people, we offer what we ourselves disapprove, how can we defend our work? Let us raise a standard to which the wise and just can repair. The event is in the hand of God."

Particularly timely is this thought on the eve of the nation-wide observance of the 160th anniversary of the adoption of the Constitution of the United States, being held during the week of September 14-20. That observance is being coordinated throughout the nation by a Constitution Day Committee composed of more than two hundred prominent citizens.

Samuel R. Harrell from the State of Indiana, chairman of the board of trustees of the National Foundation for Education in American Citizenship, is spearheading this year's observance program.

Among nationally known citizens sponsoring the 160th anniversary of the signing of the Constitution are Hon. Herbert Hoover, Admiral Chester W. Nimitz, James A. Farley, Will H. Hayes, Lewis B. Schwellenbach, Mrs. Roscoe E. O'Byrne, Arthur T. Vanderbilt and

Mrs. C. Vaughan Ferguson.

This year's observance of Constitution Day promises to be more widespread, and is of deeper significance, than ever before.

STOP FOR BUSES

With the return of school buses to the highways, numerous instances are being observed of the failure of motorists to stop when approaching from either direction schoolbuses engaged in loading or discharging children, Charles M. Hayes, president of the Chicago Motor Club, stated recently.

Most motorists evidently recognize that they must stop when approaching from the rear of a school bus engaged in loading or discharging children, but fail to recognize that the law in Illinois, Indiana, and a majority of states also requires them to stop when approaching the bus from the opposite direction in the opposing lane of traffic, Mr. Hayes said.

The Motor Club urges motorists to exert especial care to remedy this hazardous violation, particularly when driving in rural districts, where intensified consolidation of schools is producing heavier school bus traffic.

CANNING CORN EASILY AND SUCCESSFULLY

Plan to include canned corn in the home food preservation program says Miss Oberhelman, extension specialist, Purdue University. Can it with care, being sure to use a steam pressure canner, she warns.

Choose corn at just the right stage for eating, tender and fresh. Cut both ends off ears of corn for easy husking. Clean corn, removing any diseased, badly infested, and poorly developed ears.

For canning whole kernel corn cut the corn from the cob about two-thirds the depth of kernel with a sharp knife. Miss Oberhelman recommends driving a nail through cutting board at an angle to hold the cob steady.

To each quart of corn add 1 pint of boiling water. Heat to boiling. Then pack corn loosely to within 1 inch of jar top. Cover with hot cooking liquid. Or, fill to 1 inch of top with mixture of corn and liquid. Corn should move freely in the jar to avoid overpacking and danger of spoilage. Add ½ teaspoon salt to pints; 1 teaspoon to quarts. Adjust jar lids. Process in steam pressure canner at 10 pounds pressure — pint jars, 55 minutes; quarts, 85 minutes.

As soon as jars are removed from canner, complete seals if not the self-sealing type, and cool as quickly as possible.

JOLLY JANES MEET

The Jolly Janes Home Economics Club met Monday night, September 8, at the home of Mrs. Raymond Lewis. The Song of the Month was, "Put on Your Old Gray Bonnet." Instead of a regular lesson there was a discussion by the club led by the president, Mrs. Cliff Breeden, on County Educational and Organizational Goals, and also of all the lessons we have had this year. Seventeen members and one guest responded to roll call with their pet peeve. After the business meeting, delicious home made ice cream and cake were served by the hostess assisted by Mrs. Harold Markley.

FREE AIR

HOWDY FOLKS: Did you ever notice that the folks who are always bent on pleasure are usually the ones who go broke first?

The preacher started it. He wrote on the signboard, "I pray for all." The lawyer followed with, "I plead for all." Underneath, the doctor put, "I prescribe for all." But the plain citizen had the last word. He wrote, "I pay for all."

"Who was the pretty little thing I saw you with last night?"
"Will you promise not to tell my wife?"
"Surely, I promise."
"Well, it was my wife."

But in business you cannot keep secrets. Satisfied customers insist on telling their friends how much better our lubrication service is. We are pretty sure you, too, will be mighty happy once you try it.

GIRLS — HERE THEY ARE!

The books you have been asking for are here. One is by your favorite author, Grace Livingston Hill—"Where Two Ways Meet." Four are those Carolyn Keene Mystery stories you enjoy so much: "Secret in the Old Attic," "The Tolling Bell," "The Quest of the Missing Map," and "The Clue in the Jewel Box." Then, for those of you who are not going to school this year, we have Indiana University's new catalog, "Learn by Mail." Indiana University offers correspondence courses in many subjects and you can earn either high school or college credit. You may have a choice of thirty-four regular business courses with full college credit. You may take courses in Economics, Education, English, languages, History, Home Economics, Journalism, Mathematics, Philosophy or in Physiology. There are also many special non-credit courses for adults and a full high school curriculum. If you are interested in continuing your education at home, come in and get this bulletin and study it carefully.

For you and "Mother" to enjoy together, we have an unusual book called "Where Did Your Garden Grow?" by Jannette Lucas. Reading this book is like making an exciting voyage of discovery. Did you ever stop to think that all the flowers in your garden were once just wild flowers in some part of the world? There are beautiful colored maps illustrating their original habitat and their travels.

We also have new books for your brothers — Zane Grey's "Shadow on the Trail," and two books by Edgar Rice Burroughs. Come in and get acquainted with

YOUR LIBRARY.

CARD OF THANKS

We wish to thank each and everyone for the patronage they have given us.
Margaret and Vinson Goodman

CARD OF THANKS

I want to express my most sincere thanks to my neighbors and friends for their kind services and floral and card offerings during the sickness and death of my dear husband.

Mrs. Maggie Dille

NOTICE

If someone by mistake picked up a tan sport jacket Saturday night in or near the Legion Home, please return it to the custodian, Mr. Ivo Wagner. 1c

Mr. and Mrs. Wayne Thomas and son, Dennis, of South Bend, spent the week-end with relatives here getting acquainted with their new nephew, Michael Kay, in the Robert Whetstone home.

LOCAL NEWS

Mr. Bud Wise visited the horse show at Denver, Indiana, Sunday.

Mr. and Mrs. Val Waggoner, of Leo, were Sunday visitors at the Lantz home.

Mr. and Mrs. Harold Horn accompanied Mr. and Mrs. Everett Beeson to the State Fair on Wednesday.

Mrs. C. Flenar called Saturday afternoon on her daughter, Mrs. Leslie Grubbs, of White City.

The Library Board met Tuesday evening at the library with Mrs. Robert Reed, vice president, presiding.

Mr. H. A. Nottingham has purchased the Claude Gates residence on Franklin Street.

Miss Frances Clark went to Idaville, Indiana, Sunday, where she will teach in the Idaville high school.

Mr. and Mrs. Chas. Eaton attended the Indiana State Fair for their second year this year.

Mr. and Mrs. Ernest Harrold and Mr. and Mrs. Elmer Dickey were at the Indiana State Fair this last week.

Two little sisters, Janet Sue and Judith Ellen Beeson, spent Wednesday with their aunt, Mrs. Raymond Lewis, of Mentone.

County Agent Joe Clark and Assistant County Agent Cliff Breeden attended a corn school at Purdue university Monday.

The week end guests of Miss June Cotey and her parents were Andrew S. Kondrath and Kenneth Kurse of Chicago.

Miss Nina Clay, sister of Mrs. H. A. Nottingham, underwent a second eye operation at the Saint Francis Hospital, Evanston, Illinois, Wednesday morning.

The Mentone School is serving hot lunches to the children this fall. Mrs. Arthur Witham, Mrs. Arlo Friesner and Mrs. Fawley are in charge of the lunches.

The new poultry house on the Manwaring farm is nearing completion and it will be ready for occupancy soon. The building, which is 240 feet in length and 36 feet in width, will house approximately 3,500 fowls.

The War Mothers are planning a special meeting at the School Building Wednesday night. The State President, Mrs. Ethel Bowers, of Elkhart will

be present and special music will be furnished by Mr. and Mrs. Vance Johns.

The Bourbon Tippecanoe River chapter of the Daughters of the American Revolution entertained the Mentone Anthony Nigo chapter at the home of Mrs. Curt Nellans at a potluck supper. The speaker of the evening was Mrs. F. R. Burns of North Manchester, who is State Regent of the D. A. R.

Mentone will be represented in the county golf tournament by Mr. Chester Manwaring who is paired with Mr. Hobart Creighton. The Tippecanoe golf course is holding an all-Kosciusko County men's handicap tournament for the J. O. Zimmer trophy. Play-ing will get underway this week.

Mr. and Mrs. Irvin Nelson and son, Robert, spent the week end in Detroit, Michigan. Miss Katherine Nelson returned with them and will visit her parents until next Monday. Robert will leave Saturday for Northwestern University where he will enter school for his Junior year.

Mrs. Lavina Shinn, Mr. and Mrs. Earl Shinn, Mr. and Mrs. Jack Shinn and Mr. and Mrs. Kenneth Shoemaker spent Sunday at the home of Mr. and Mrs. Robert Blodgett and daughter Suzannah, in Nappanee. Other dinner guests were Mr. and Mrs. Harry Blodgett and Mrs. Ida Clark, also of Nappanee.

Mr. and Mrs. Dewey Whetstone entertained at dinner Sunday the following guests: Mr. and Mrs. Denneth Towns and sons of South Bend; Mr. and Mrs. Chester McIntyre of Hawthorne, California; Mr. and Mrs. James Morehouse of Laporte, Indiana; Mr. and Mrs. Lowell Whetstone and baby; Mr. and Mrs. Willis Cowen and children; Mr. and Mrs. Pat Walsh and family, and Miss Mildred Whetstone.

Mr. Robert Nottingham, who is employed by the Retail Credit Company, is being transferred from the Philadelphia office to Indiana. He will be at the Fort Wayne office for three months and then will be permanently located at Logansport, Indiana. His wife and two children will visit Bob's parents, Mr. and Mrs. H. A. Nottingham, before going to their future home in Logansport.

Allen "Chick" Herendeen, flying operator here, just completed extensive improvements on his field. Ready now for his G.I. program with back-log of 20 to 30 students. Now boasts runways 1,900 and 2,000 feet long. Based on the field are five ships, mostly Aeronca Champions and Chiefs. Neighbors Frank Meredith and Wayne Shunk own one Aeronca each. Pre-medical student Bob Summers is the instructor at "Chicks Field," in-between pil-l-earning.

**GEORGE FRANK GIBBLE
DIED AT NAPPANEE**

George Frank Gibble, 77, died at 2:15 a. m. Thursday at his home in Nappanee. He had been ill for a year and one-half due to stomach ulcers.

Mr. Gibble was born at Hamilton, Ind., Feb. 9, 1870, the son of Mr. and Mrs. Samuel Gibble. Jan. 31, 1898, he was married at Noblesville to Anna Carson.

They moved to Nappanee about 25 years ago.

Surviving relatives include his wife; two sons, Amos, at home, and Harry S. Gibble, of Mentone; two daughters, Mrs. Harvey Flory, of Plymouth, and Mrs. William Kirby, of Noblesville; three grandchildren and three great-grandchildren.

Funeral services were held at the Gibble residence at 2 p. m. Saturday, with Rev. C. S. Overmeyer, pastor of the Grace Evangelical United Brethren church in charge. Burial was in the Stony Point cemetery.

PARENTS OF SON

Mr. and Mrs. Glen Secrist are the parents of a son, born last Friday at the McDonald hospital at Warsaw. The new baby weighed 5 pounds, 14 ounces and has been named Larry Gene.

ENGAGED

The photo above is that of Miss Pat Witham, daughter of Mr. and Mrs. Arthur Witham, senior in the Mentone high school who has announced her engagement to Howard Stutzman, of Etna Green.

MR. HIVELY IMPROVING

Latest word from Benjamin Hively is that he is improving and getting along nicely.

Mr. Hively suffered injuries several weeks ago when an elevator at the Lake City Machine Shop jammed and in the resulting fall, threw him into a 2x4.

Friends may write to Mr. Hively at the Murphy Medical Center, Warsaw.

**MENTONE BOYS PUT ON REAL
SHOW AGAINST WARSAW AA**

What was declared one of the best softball games ever seen in Mentone was played at Veterans' Park Friday evening when the All Stars held the championship Warsaw A. A. team to a 1 to 1 tie for ten innings. Each team was looking for that inevitable "break" that must come sooner or later and it happened to be in Warsaw's favor.

Fritz Wolferman and Brockey, the latter a Tippecanoe boy who has been doing splendid work on the mound at Mentone, hooked up in a pitching duel. Although both hurlers were in constant trouble, they spent a major part of the evening pitching their way out of numerous difficulties. Brockey gave up only six hits, while Wolferman allowed ten safeties.

A return game is scheduled between the two teams at Warsaw on Saturday night, Sept. 20th.

SOFTBALL NEWS

On this Friday evening the Wabash Moose softball team, with Johnny Hipsher as manager and pitcher, will meet the Mentone All Stars.

On Wednesday evening, Sept. 24, the Mentone All Stars will play the Mentone American Legion team.

Everyone is urged to attend these last games and come with a fine donation to show your appreciation and help reduce the deficit for the season.

MENTONE WINS TWO MORE.

The Mentone high school softball team added its second and third victories in league play last week and this. Friday evening they defeated Atwood 10 to 3 and on Tuesday evening they defeated Etna Green 10 to 16.

WINS 4-H AWARD.

Herbert Ummel, senior in Beaver Dam high school. Friday was selected for the annual Litchfield Creamery \$150.00 cash scholarship award by Eric Holmes, assistant state 4-H club leader, it was announced by Cliff Breedren, assistant county agent.

Four-H club achievement scrapbooks and prepared reports of the Kosciusko county contenders for the scholarship were considered by Holmes at Purdue university. Present during the selection were the assistant county agent and Ben Titus and Alfie Edwards, Litchfield field men.

The winner, son of Mrs. Edith Ummel, of near Beaver Dam, plans to enter the Anderson Church of God college next fall. Half of the cash scholarship will be paid at the start of the first semester and the balance at the beginning of the second semester.

Myron R. Metzger, of Sidney, son of Mr. and Mrs. Howard Metzger, was chosen as alternate for the scholarship in event the winner should prove unable to take advantage of it.

Contenders receiving honorable mention were: Philip Beer, Milford; Joan Ummel, Beaver Dam; Barbara Thompson, Warsaw, and Walter Yoder, of Leesburg.

**TO HAVE NEW WARNING
LIGHTS AT RAILROAD CROSSINGS**

It is good news—and a welcome sight—to hear and see that workmen are now busy making installation of modern, up-to-date flasher signals for three crossings along the Nickle Plate railroad in Mentone. The flashers are of the latest design and are being installed in such a manner that they should give years of uninterrupted service.

Lights will be installed at the depot crossing, where highways 19 and 25 cross, and the crossing at the far west edge of the city.

MENTONE LEGION WINS

Thursday night the Mentone American Legion team scored a 12 to 10 victory over the Claypool Feed Store team, Claypool league champions, at the Mentone diamond.

HAS POLIO.

On Saturday, Sept. 7, Rev. Lewis Hohensteel, of Tippecanoe, was taken to the Robert Long hospital in Indianapolis, in the Johns ambulance.

From spinal tests it was found that he was suffering from polio. Fortunately, Rev. Hohensteel has had no paralysis, but will be at the hospital for at least another week.

ESCAPE SERIOUS INJURY

Mr. and Mrs. Alden Jones and Mr. and Mrs. Dale Hawley returned Monday evening after a four-day trip thru Kentucky and a part of the Smoky Mountains.

While returning home over the mountains, the tie-rod broke, causing the car to go out of control, and head for a sheer embankment. Only a sturdy post saved the car and its occupants from serious injury.

A wrecker was called from the nearest town, and the car was towed in. After new parts were installed the group came on home, pretty badly upset by their narrow escape, but, thankful that there had been no tragedy.

**FISH SUPPERS AT McCLURE
LAKE ON OCT. 1 AND 2**

Two fish suppers are scheduled at McClure Lake Conservation Camp on Oct. 1 and 2.

On Wednesday evening the Warsaw Rotary club is entertaining the Mentone Lions Club.

Thursday evening there will be a joint meeting of agricultural teachers, county Conservation Club Councils, game wardens and interested citizens from about eight neighboring counties. Plans will be discussed to help make the McClure lake camp still bigger and better, that it may serve more of the 4-H groups of the area.

NEW SON ARRIVES

A baby boy was born to Rev. and Mrs. Paul Irwin Sunday morning at 12:42 a. m. at the Woodlawn hospital at Rochester.

The new boy, who weighed nine pounds and 10 ounces, has been named John Bruce.

NEW LIBRARY HOURS

Beginning Monday, Sept. 22, the library will be open every afternoon from 12:30 to 4:00 and Saturday evening from 7:00 until 9:00. The first four grades will come to the library with their teachers for library instruction and to get books as follows: The first grade will have a story hour at the library every Monday afternoon.

Next week, Mrs. Isabelle Johns will present the story; the following week, Mrs. Dan Urschel will present a musical story, and the following week Mrs. Grace Lewis will be our story narrator.

On Tuesday afternoons, the second grade will come to the library. On Wednesday, the third grade will be there and on Thursday the fourth grade. Friday from 11:30 to 12:30,

the library will be open so that the fifth and sixth grade pupils and the high school students may get their books.

PSI IOTA XI.

Mrs. Elery Nellans, Crystal lake, was hostess to the members of Beta Epsilon chapter of Psi Iota Xi sorority on Thursday, Sept. 11th.

Mrs. Max Nellans presided at the business meeting. Mrs. Harold Utter gave a financial report of the food stand at the Akron fair.

Delicious refreshments were served.

Mrs. C. J. Riner will be hostess at a party Sept. 25th.

NOTICE

We are leaving Saturday, Sept. 21, for a three weeks' vacation.

DR. E. D. ANDERSON.

ANOTHER ADVERTISING

"BELIEVE-IT-OR-NOT"

Every growing or important business firm sets aside a definite portion of gross income for advertising purposes—as time has proven that the use of good advertising mediums is one of the essentials for a successful business. Advertising is a silent working partner, but there are times when one wonders just how it could work so far away, etc.

Recently Mr. Mahlon Mentzer, representative of a New York egg receiver, received a letter from P. Harchula, Niagara Falls, New York, inquiring about selling his eggs to him, stating that he noticed the advertisement in the Co-Op. "magazine."

Mr. Harchula is not a subscriber, neither do we have any other subscriber in Niagara Falls, but somehow, somehow, he did read a copy of this 1p newspaper.

Kosciusko County Flying Farmers Helped Plan October Picnics for Indiana Members While at Indiana State Fair

Two picnics for Indiana members of the Flying Farmers of Prairie Farmer Land in October were planned at a meeting of members who flew to the Indiana State Fair, Friday, September 5. One will be at Bunker Hill Air Base and the other at Turkey Run State Park. Attending the meeting from Kosciusko County were Mr. and Mrs. Allen Herendeen, Mentone; Mr. and Mrs. Wayne Shunk, Mentone; and Hobart Creighton, Warsaw, who flew to Indianapolis for the closing day of the Fair.

Flights such as these to the State Fair brings up the question, "How soon must farmers have an airport on the State Fairgrounds?" The Indiana Fair Board was concerned with the question last year and tried to purchase land joining the fairgrounds for an airport, but were unsuccessful in closing the deal.

The Kosciusko County flyers were a part of a group of one-hundred Flying Farmers of Prairie Farmer Land from Indiana, Illinois and Ohio, who

flew to the Indiana State Fair, on Friday, September 5. The planes flown by the Flying Farmers were only a part of those flown to Indianapolis by people with the sole purpose of attending the Fair. The Flying Farmers landed at Hoosier Park Airport, where they were welcomed by Bill Renshaw, Indiana editor of Prairie Farmer and executive secretary of the Flying Farmers of Prairie Farmer Land, who arranged the flight with the cooperation of the other Indiana officers. Buses were waiting at the airport to transport them to the fairgrounds immediately after landing.

They made the Prairie Farmer-WLS auditorium in the grandstand their headquarters between sightseeing tours of the Fair. A special stage show starring WLS artists saluting the Flying Farmers at the Fair was presented in the afternoon. Guest speaker was Colonel Clarence F. Cornish, director of the Indiana Department of Aeronautics.

CATERPILLAR "BITE" TREATMENT GIVEN

First reports of "stinging caterpillars" for the season have been received by Purdue University entomologists. The caterpillars which possess hairs causing severe irritation, will continue to be a menace through September, according to J. J. Davis, head of the department of entomology.

Davis explained that these caterpillars do not bite, as commonly reported, but instead possess stinging hairs which are responsible for the irritation. The irritation may be allayed by ammonia or bicarbonate of soda.

The hairs of the caterpillars are very much like those on nettle plants. They are hollow and connected with glands which secrete an irritating fluid. When the caterpillars come in contact with

the skin, the hair tips break off allowing the poisonous secretion to enter the skin.

Two species of caterpillars commonly cause this annoyance. One is known as the saddle back caterpillar because of the saddle-like markings on the back. The other is the Io moth caterpillar which is light green with a narrow pinkish line along each side. Both are covered with spines and are general feeders, occurring most commonly in southern Indiana.

Danger From Snakes

Less than 4 per cent of persons bitten by poisonous snakes in America die from the poison.

CLINTON OR BENTON OATS RECOMMENDED

Clinton and Benton, the two most recently developed oats varieties, have shown the best performance record and the best adaptation for combining, and farmers should use these two varieties extensively for 1948 planting, according to K. E. Beeson, Purdue University extension agronomist.

This recommendation comes as a result of many questions asked county agents and seedsmen regarding the unsatisfactory performance of Tama and Vicland varieties this year. Explaining the cause of disappointing results from these two popular oats varieties, the agronomist points out that farmers have always run the risk of disease and insect infestations. The general use of Tama, Vicland and other oats of the same breeding, all having the Victoria oats for one parent, resulted in widespread development of Victoria leaf blight to which oats of this breeding are susceptible.

Up until the 1946 harvest, Indiana farmers had excellent results with these varieties and were enthusiastic about them. Bumper crops of 1945 and 1946 were evidence of superior performing ability, but at the same time, the blight was getting underway, and this year Victoria leaf blight developed to such an extent that it ruined many fields of Tama and Vicland oats.

Other varieties of oats which are resistant to Victoria leaf blight are Cartier, Marion, and Fulghum. However, Beeson especially recommends the use of Clinton and Benton oats for next year to obtain the most satisfactory all-round performance.

Neighborhood cooperation is essential to the successful control of the Hessian fly. A single field of early sown wheat will often furnish enough flies to infest an entire locality the following spring. September 22 is the first fly-free date for northern Indiana.

"THE GOD OF CREATION" TO BE SHOWN AT TALMA CHURCH

Vivid full-color scenes from astronomy and natural science are featured in "The God of Creation," sound motion picture to be shown at 8:00 p. m. Monday, Sept. 24, at the Talma Christian Congregational church, according to the pastor, Charles Sumey.

Produced in Moody Institute of Science, west coast department of Moody Bible Institute, by Irwin A. Moon, Sc. D., "The God of Creation" is the second in a series of evangelistic films. The first film by Dr. Moon, "They Live Forever," had a large showing in all parts of the country.

In the opening section of "The God of Creation," the audience takes a trip to the stars by means of solar photographs taken through the giant 100-inch telescope of Mt. Wilson Observatory in southern California, and views complex gyrations of our own solar system.

Lapse-time photography is utilized to demonstrate the beauties of natural science. The illusion of flower buds developing into full-blown blossoms in a few seconds is created through this time-compressing photo technique. The metamorphosis of a caterpillar through the various stages from worm to butterfly, and pollination of flowers are seen on the screen in full color.

Believed to be the first of their kind are the natural-color pictures of photosyntheses, the mysterious food-manufacturing process resulting from the action of sunlight on green leaves.

Through photomicrography the audience peers into the microscopic world of a drop of water and observes the complexity of tiny organisms, enlarged more than a million times.

"The God of Creation" will be presented by Rev. R. D. Smith, Moody film representative.

Flushing Hall to Be World Capital

In this low-lying building at Flushing Meadows, New York, the delegates of the 55 Member Countries of the United Nations will once more gather on 16 September for the Second Session of the U.N. General Assembly. Virtually every important problem in the world, including such issues as Palestine and Greece, will be aired.

STUDENTS WORK TO LEARN:

U.N. SERVES AS LABORATORY FOR WORLD AFFAIRS 'INTERNES'

LAKE SUCCESS, New York—Twenty-four student specialists in international affairs this summer converted their "book-learning" into practical experience, with the United Nations as their laboratory.

The group of "internes" in the business of conducting the affairs of the international organization worked at jobs normally filled by U.N. staff members on vacation and pitched in as extra hands in busy sections.

The fifteen men and nine women, all of whom dropped their advanced academic studies for the summer in order to put in a 40-hour week at U.N. Headquarters here, were recommended by nearby colleges. They worked without pay and provided their own subsistence and transportation.

In addition to "earning the ropes" in seven major departments of the U.N. staff, the internes supplemented their program with one-hour lectures three times weekly by high-ranking U.N. officials. The lectures were followed up with a two-hour seminar in which each interne explained his own job to the rest of the group as an impetus to discussion of administrative problems.

The "laboratory" program was set up under the Training Division of the Department of Administrative and Financial Services. U.N. officials who worked on the plans now call the experiment a success and hope that the program may be continued in the future for internes brought from all

over the world.

Among the tasks undertaken by the students were answering correspondence, following through research translation, library work, legal studies, personnel administration, editorial assistance and radio production.

National Income Rises Revealed

LAKE SUCCESS, New York—Sharp increases in total national income for most countries—often reflecting severe inflation—are revealed by the current U.N. Monthly Bulletin of Statistics.

The U.N. Statistic Office points out that for about half of the 22 countries listed the increases are due entirely to increased prices rather than to expanded production of goods and services and that increase in the remaining industries would be much smaller if the effects of rising prices could be

eliminated.

Nevertheless, substantial gains in real national incomes—after allowance for increased prices—were made by a number of countries, notably by the United States and Canada.

The following are the figures in millions of dollars, for these two countries in 1938 and 1946, without taking into account the effects of higher prices:

	1938	1946
United States	67,375	178,204
Canada	3,940	9,212

On the other hand, the adjusted national income of France, reduced to 1938 prices, has shrunk from 343 billion francs in 1938 to 295, in 1946. The Netherlands, though registering an increase of almost three billion guilders between 1938 and 1946, has actually suffered a loss of almost a billion in its real national income when the effects of higher 1946 prices are eliminated. Norway has managed to hold its own, and the United Kingdom has had a real increase of around 300 billion pounds sterling, though this increase is not due to any corresponding rise in production.

Latin American countries have greatly increased their national incomes between 1938 and 1946, but the increase has been largely offset by the sharp rise in prices.

Loan to The Netherlands Seen as Aid to Europe

WASHINGTON—Important aid to the reconstruction of Europe is predicted here by officials of the 44-nation International Bank for Reconstruction and Development as a result of the recently-granted loan of \$195,000,000 to The Netherlands.

The loan, the Bank's second, will be used exclusively for reconstruction work in the Netherlands. Bank officials point out that the loan to The Netherlands, an important nation in world trade, is in line with the policy of making loans that will have a favorable effect, not only on the borrowing country, but on all of the Bank's member countries.

The loan is for a period of 25 years and carries interest at the rate of three-and-one-quarter percent. A loan of \$250,000,000 was made to France in May.

Inclusion of Broken Rice in Food Allocation Urged

WASHINGTON—Because of the severe shortage of rice, even broken rice grains, usually considered inedible, are to be included in export-import allocations worked out by the International Emergency Food Council (IPEC) in an effort to make the best possible use of the world's food-stuffs.

The Council's recommendation states "that no rice is to be regarded as inedible except on the basis of determination in respect of individual lots."

The IPEC has also announced the allocation of 5000 tons of coconut oil to the Philippine Government for dis-

tribution and sale during 1947 to recognized privately-owned charitable organizations carrying out international relief programs involving feeding of groups of civilians.

Charitable organizations, which had difficulty in obtaining this scarce commodity for processing into food products, can make applications to the Philippine Government at Manila for a share of this allocation.

The 23-nation International Emergency Food Council, which carries on the war-time food allocation work of the Combined Food Board, reports the results of its efforts to the Food and Agriculture Organization of the United Nations (FAO), which is at present holding its annual conference at Geneva.

U.N. Review

After an on-the-spot investigation and tours of European displaced persons camps, the United Nations Special Committee on Palestine has reported its findings to the General Assembly in a 70,000-word document which contains both majority and minority proposals.

Seven members of the 11-nation Committee backed a plan of partition for Palestine, which would result in setting up separate and independent Arab and Jewish states with economic unity. The Committee also recommended that 150,000 Jews be admitted to Palestine in two years.

The three-nation minority recommended a federated Palestine, including both Arab and Jewish states. Under the minority plan, as many Jews as could be absorbed would be admitted in three years.

One nation—Australia—did not endorse either plan. However, she joined with the other Committee members in endorsing a series of 11 general recommendations which would pave the way for the termination of the Palestine mandate government.

India has charged that South Africa has taken no action to comply with the General Assembly's resolution last autumn, calling on the South African government to bring the treatment of its Indian minority into conformity with the U.N. Charter. The resolution also recommended that the two governments iron out their differences in negotiations and report back to the Assembly.

The Food and Agriculture Organization of the United Nations (FAO), in a plenary session of its Conference in Geneva, has rejected a proposal to change its rule on its headquarters site. The rule change was sponsored by advocates of Geneva for FAO headquarters.

ANIMAL HEALTH TOPICS

Experts Explain How to Prevent Bloat in Cows

In a seasonal keynote to livestock loss prevention, veterinary authorities called attention this week to the fact that bloat can become a serious problem in cattle and sheep on early fall pastures.

"Methods of handling cows and sheep to prevent bloat are numerous," said the American Veterinary Medical association, "but only a few of these practices have merit."

A good feed of hay before putting the cows out to pasture has been widely recommended, the veterinary group stated, but this method is not dependable unless animals are given access to all the good-quality hay they will consume for a whole night before going on pasture.

Alternating pasture often works well, it was pointed out—in other words, put cows on Sudan grass during the night and legume pasture during the day.

Planting grasses and legumes to-

gether as pastures has not been satisfactory, because cows eat the grasses first and then fill up on the legumes when the grasses are too short. The same objection holds for pastures of adjoining fields of grass and legumes, under a free-choice plan.

Pasturing legumes only after they have reached the blossom stage has been fairly satisfactory, but continuous day and night pasturing on younger legumes has not been successful, popular as the practice is among stockmen. Grain feeding before pasturing has not worked well either because many cows eat more legume pasture after a feed of grain than they would had they not been fed grain.

"It is a good plan to avoid pasturing legumes when they are wet with dew or rain, and especially when wet with frost," the group advised, adding that "there is no scientific basis for feeding minerals to prevent bloat."

Treatment of bloat cases is highly successful in professional hands, the association declared, and the usual

HARLEY REGENOS, Auctioneer.

home treatments—consisting of the insertion of a wooden bit in the mouth or raising the front feet, to promote "belching"—are satisfactory in mild cases, but fail in emergencies. Treatment of severely bloated animals requires surgery, and this should be attempted by inexperienced persons only as a last resort, it was cautioned.

FLIES SPREAD ANTHRAX

Livestock health workers have just come forth with another good reason for keeping DDT sprayers in action around farm premises. Citing results of veterinary research conducted in India, they said that various kinds of flies—including stableflies, houseflies, and blowflies—are capable of transmitting anthrax to farm animals.

Fern Poisoning in Cows

In dry seasons or when pastures are heavily overstocked, dairy cows are likely to eat ferns or brakes after exhausting all of their regular forage, and fatal poisoning may result. The same type of trouble also may occur if hay containing a large amount of ferns is fed.

Usually, cows develop fern poisoning suddenly, being apparently normal at one milking and seriously ill at the next. Poisoned animals commonly stand with the head lowered and with saliva and blood drooling from the mouth and dripping from the nostrils. There is no successful treatment for this type of poisoning and death occurs in one to ten days.

If prompt steps are taken to supply

an abundance of good forage as soon as the first cow shows evidence of this trouble, additional cases can be avoided. A pasture that was once the cause of fern poisoning should be pastured judiciously, especially during this time of the year, when forage is apt to get short and dry.

Mechanical Checkup For Driving Safety

A mechanical checkup of cars after long summer driving was recommended recently by E. L. Harrig, national service manager, Chevrolet Motor Division, as a safety measure with the end of the vacation period and the return of children to schools.

"Most people drive more in the summer, and many add considerable mileage by long vacation trips," said Harrig. "It would certainly be wise for such owners to check their cars now, and be sure they are mechanically safe, particularly with the return of children to school and increased activity on the streets."

Harrig suggested:

1. Close examination of brakes and steering.
2. General engine, chassis and body inspection.

Safety and traffic experts point out more than 28,000,000 children will return to school in September, and emphasize the necessity of extremely careful driving by motorists especially near school buildings.

★ Patronize an Advertiser—It Pays!

HOWDY FOLKS: This is what I'd call a clever borrower. He asks: "Are you using your lawnmower this afternoon?" You answer: "Yes, I'm afraid I am." Then he catches you with this: "Splendid! Then you won't be wanting your tennis racket — mine is broken."

The Bore: "I passed your place yesterday."
The Bored: "Thanks awfully."

"How does the clock go that you won at the fair?"
"Fine—it does an hour in fifty minutes."

We can't speed things up quite that fast—but when you drive in for service we take care of your wants in a jiffy — and we're on the job whenever you need us.

Purdue University agronomists recommend applications of 300 to 350 pounds of 3-12-12 fertilizer for wheat on practically all upland silt or clay loam soils and for sandy loams. If the 3-12-12 cannot be obtained then 2-12-6 is a good substitute for the wheat crop itself. The additional potash is especially important for the clover crops following the small grain.

LIONS TO SPONSOR HALLOWE'EN EVENT

The Mentone Lions Club, at its regular bi-monthly session Wednesday evening, inaugurated plans for a Halloween program at Mentone. Plans are as yet indefinite, but will be announced in the very near future. Elmore Fenstermaker was named chairman for the event.

Much discussion was heard during the business session of the club relative to the price of the meals, annual dues, etc. Balloting revealed the fact that the members looked with disfavor upon the proposals to raise the price of the dinners and to increase the annual dues from \$10 to \$15. They did, however, by a margin of 30 to 16, vote to sell quarterly meal tickets at \$4.50 beginning Jan. 1, 1948. (Members unable to be present can protect their dinner investment by notifying some delegated individuals the day before each club meeting.)

A large turnout was present to join in the merry "aye" and "nay" fest.

Ten Rules of Refrigerator Care

TODAY the importance of good refrigeration in the home is universally realized. Scarcely another appliance contributes so much to the health and happiness of the family as the modern refrigerator, which protects health by protecting food from spoilage and maintaining its enjoyable freshness and flavor. Here are ten rules for caring for your refrigerator so that it will operate with maximum efficiency and continue in service for many years to come.

1. Open refrigerator door only when necessary.
2. Space foods to allow free circulation of air.
3. Defrost regularly and clean often by wiping with a damp cloth. Wash with a weak solution of baking soda.
4. Allow cooked foods to cool before you store them in the refrigerator.
5. Wash and clean vegetables and fruit before storing.
6. Place vegetables and fruits in the hydrator.
7. Store meat, unwrapped, under the freezing unit.
8. Butter and other staples keep best in the middle section of refrigerator.
9. Ice cubes, frozen foods and desserts should be kept in the cold compartment.
10. Do not place so much food in the refrigerator that circulation of air is impossible.

With these few facts in mind you can obtain utmost satisfaction from your refrigerator whether it is old or new. If you happen to live outside the "pipeline" area, you can still enjoy the best of automatic gas refrigeration with liquefied petroleum gas. The silent gas refrigerator is "tops" in reliability. The absence of moving parts eliminates wear due to friction with the result that every gas refrigerator ever made is said to be still giving good service.

Fuel Saving

Tests conducted by the federal government revealed that a house completely insulated with mineral wool reduced the fuel bill by 45 per cent

REX, THE WONDER HORSE

The appearance of Rex, the \$5,000 Playboy Cowpony, at the Mentone Legion show, on October 2, will be a homecoming for Rex since his former owner and trainer, Mr. Harry Vermette lives near Mentone. Mr. Vermette trained Rex from the time he was a yearling colt and taught the horse about 50 of the most difficult tricks being done by any trick horse to date in the United States. Rex does everything from standing on his head to shooting a gun and can be expected to go the limit here at Mentone.

Ced White, who now owns and shows Rex, has performed before al-

most a million horse lovers including some of the biggest shows in the east. Rex and Ced were featured over the famous "Hoosier Hop," the American Broadcasting company show aired on a coast to coast basis. This combination was such a success on this show that they appeared for 5 shows. Last winter they were featured at the Detroit Sportsman show and played for nine days at the Detroit fair grounds.

Rex is "king" of the Lightning Dude Ranch at Bass Lake, Indiana, which Ced operates the year round. Horses and dudes are the main products of the ranch.

Tomato Chutney for Taste Delight

Home-canned tomato chutney is a year-round taste delight which many housewives put up in quantity, often by request! It's delicious with meats, does wonders for meats served cold. This recipe, from the universally used Ball Blue Book on home canning, will please your family:

- 12 ripe tomatoes
- 3 onions
- 3 sweet peppers
- 6 tart apples
- 1 pod hot peppers

- 1 clove garlic
- 1 cup seeded raisins
- 3 cups brown sugar
- 1 tablespoon ginger
- 1 teaspoon ground cinnamon
- 1 teaspoon salt
- 3 cups vinegar

Skin tomatoes and onions, seed peppers, pare and core apples, wash raisins, then run all through food chopper. Combine with other ingredients and cook until thick. Pour into hot jars and seal according to manufacturer's instructions.

Snakes Confused

Poisonous coral snakes frequently are confused with the non-poisonous scarlet snakes and scarlet king snakes.

Age Restrictions

A representative in the United States house must be more than 24 years old and a United States senator must be more than 29 years old.

Speedy Cooker

The pressure saucepan, a small edition of the pressure cooker, has achieved popularity because it cooks speedily

PASTURES REDUCE

MILK DECLINES

Many dairy herds produce 50 per cent more milk during May than the same cows produce during November.

The producing ability of a cow or herd is no higher during one month than it is another, according to G. A. Williams, Purdue University extension dairyman. Wide differences in seasonal production are usually the result of mismanagement and can be largely overcome if proper steps are taken to give each cow an equal chance to convert feed into milk up to the maximum of her inherited capacity.

One of the successful steps in overcoming seasonal declines in milk production is to provide late fall and early spring grazing. An acre of fall rye per cow has no equal in this respect.

Cows freshening during the fall months secure several weeks of excellent grazing from rye. Temperatures are lower and flies are less troublesome than during summer months. There is no need for the severe declines in the production of

cows recently freshened if the feed supply is adequate and proper management is observed.

Williams offers the following desirable herd management practices for fall dairying.

1. Sow one acre of fall rye (Balbo preferred) per cow. An application of 100 to 200 pounds of a commercial fertilizer is often advisable.
2. Give cows a dry period of six to ten weeks.
3. If pastures are retarded by lack of rainfall, feed silage or hay daily.
4. Fresh cows should receive one pound of grain for each three pounds of milk produced for the first 100 days after freshening. Later the amount may be reduced if there is plenty of good legume roughage.
5. Observe correct milking methods, encourage the cow to let down her milk in three to five minutes after the operation is begun.
6. Provide shelter at night when the weather becomes cold and stormy.

Some Good Hunting Rules

About this time of year, many men begin to acquire a great urge to get out and hunt.

We ran across some rules for hunters, as listed by A. O. Haugen, who is the farm game extension specialist with Michigan State College.

Here are the courtesy rules:

1. Always ask a farmer's permission before you hunt on his land.
2. Leave your car in the farmer's yard.
3. Always climb fences at a post.
4. Close gates when you use them, or livestock.
6. Be extremely careful with matches burning tobacco so as not to cause fire.
7. Pay the farmers as much respect

5. Do not shoot near the buildings as you would expect him to respect you and your property.

In addition to Mr. Haugen's rules, it is suggested that the hunter carry staples to staple any loose wire that he may find or cause when crossing a fence. Never cross a fence if a gate is handy. Shooting excites livestock—take care not to crowd them in a corner or to shoot near them or over them.

Grain Storage

Improved, prefabricated grain bins developed through research by the department of agriculture now provide a practical means of long time storage of grain on farms.

.N. Facts and Faces ETHIOPIA

One of the oldest countries in the world, with a royal house which traces its descent from King Solomon and the Queen of Sheba, Ethiopia covers some 350,000 square miles of mountainous north-east Africa, bordering on the Sudan in the West, on British Kenya in the South, and on French, British and formerly Italian Somaliland and Eritrea in the East and North. Her population is more than 12,000,000, many belonging to the Coptic Church, one of the oldest Christian faiths in existence. Addis Ababa is her capital. The country's official language is Amharic (see map). Ethiopia was represented on the first Special Session of the U.N. General Assembly by Ras H. S. Imru. Her flag is green, gold and red, with the country's emblem, the Lion of Judah, in the center.

WORLD'S PROBLEMS FACE U.N. GENERAL ASSEMBLY

FLUSHING MEADOWS, New York—The low-lying, grey United Nations General Assembly Building here will once more become the center of international cooperation when the 55-nation "parliament of the world" opens its second session this week.

The General Assembly, made up of more than 1000 delegates and in which all U.N. Member Nations have an equal voice, is faced with an agenda reflecting virtually every important problem affecting the world. More than 60 separate items are listed for the Assembly's consideration now.

Most dramatic among the points with which the Assembly will deal are the Balkan and Palestine problems, which have been the news for months. The Balkan question was introduced at the request of the United States, which wishes the Assembly to take up "threats to the political independence and territorial integrity of Greece." The Palestine question was submitted by the United Kingdom and will involve the report of the Special Session of the Assembly this spring.

The 70,000-word report of the Palestine Committee includes both a majority and minority report on the eventual governmental and territorial settlement. The majority, consisting of Canada, Czechoslovakia, Guatemala, The Netherlands, Peru, Sweden and Uruguay, recommended a three-part division of Palestine into an Arab State,

a Jewish State and a U.N.-administered City of Jerusalem. The admission of 150,000 Jews in two years was also recommended. The minority, India, Iran and Yugoslavia, recommended that an independent federal state be set up in Palestine and that as many Jews as could be absorbed be admitted to Palestine in three years. Australia did not agree to either proposal.

The two proposals were framed against eleven other general recommendations which were adopted unanimously. Included in the recommendations were agreements that the mandate for Palestine should be terminated, that Palestine should be granted independence after a short transitional period under an authority responsible to U.N., that religious rights should be safeguarded, that urgent measures

be taken for the relief of distressed European Jews and that the area remain economically united.

Less dramatic but involving a vast scope of human activity will be reports submitted to the Assembly by Secretary-General Trygve Lie, by the Economic and Social, Trusteeship and Security Councils and by the many Specialized Agencies affiliated with U.N. Mainly sober and factual, these reports embrace nearly every problem the U.N. has been called upon to consider thus far—from the status of women to the economic recovery of Europe, from freedom of information to international drug traffic.

In the political fields, the Assembly will consider the results of its own recommendations, made last fall, that high-ranking diplomatic officials be withdrawn from Franco Spain and that the Union of South Africa adjust the treatment of its Indian minority to conform to the U.N. Charter.

As the result of Argentinian and Australian proposals, the famous "veto" question—the Charter provision requiring unanimity of the five Permanent Members of the Security Council on any "substantive" measure—will be discussed. Argentina suggested that the United Nations amend its Charter to eliminate the "veto," while Australia has requested a review of action as a result of previous Assembly resolution on the veto.

Among organizational questions are the permanent Headquarters of U.N. and the U.N. budget. The Assembly

will be asked to approve plans for the Headquarters, drawn up by a group of internationally famous architects, and to find ways to finance the projects. The general U.N. organizational budget proposals submitted by the Secretary-General call for appropriations of about \$39,000,000.

Among other important items are applications for membership in the U.N. from two nations—Pakistan and Yemen—which have been recommended by the Security Council, economic reconstruction, aid to children and revision of the draft peace treaty with Italy.

WEEK'S QUOTE:

"The immediate danger for the United Nations is not that it should have grave problems to settle; it is that the world's great problems should be settled outside it."—Henri Laugier, United Nations Assistant Secretary-General, in a recent address.

MAKE \$1,000 GIFT TO SHADES DRIVE

The Indiana Conservation Advisory Committee, governing body of the Conservation clubs of the state, has made a gift of \$1,000 to the campaign to "Save the Shades."

John H. Nigh, director of the Indiana Department of Conservation which is sponsoring the public conscription campaign, announced that the gift represents "more than two-thirds" of the Committee's total reserve fund.

Nigh said he had been informed of the Committee's action by Ross Macy of Fountain City, Advisory Committee head. Macy, in a letter to Nigh, said the Committee decided to make the gift "by unanimous vote" at a meeting held in Tippecanoe River State Park.

M.L. Davis of Franklin, Committee secretary, said he is mailing a letter to more than 900 member clubs advising them of the Committee's action and urging their cooperation in the Shades campaign.

"We are urging every club to make its own donation," Davis said, "Because we feel this campaign is a challenge to the conservation-minded people of Indiana. The gift of the Committee does not in any sense represent the total contribution of the club system. We expect most of the clubs to make individual gifts and the total will be sizeable."

Mr. Nigh said the \$1,000 gift is the largest yet received by the department although several other organizations plan to make similar donations.

HEALTH FACTS FROM YOUR STATE BOARD OF HEALTH

Grade A Milk Ordinance

Milk-borne epidemics cause a loss of hundreds of dollars in communities in Indiana each year; these losses may be controlled by the adoption of a Grade A Milk Ordinance—a step taken by 27 cities in Indiana at an average cost of eight cents per capita per year.

Such diseases as tuberculosis, typhoid fever, scarlet fever, diphtheria, septic sore throat and undulant fever are transmitted through milk. The chances for the spread of these diseases are reduced by the adoption of a Grade A Milk Ordinance.

The Grade A label means that the milk is handled and produced under sanitary conditions. It is properly pas-

teurized—herds are tested—employees examined—samples of milk analyzed—the farms inspected for sanitary conditions.

Approximately one-third of the population of the United States is affected by Grade A Ordinances which are recommended by 40 states and adopted by 2,400 cities and communities in the United States.

SCHOOL CHILDREN TO AID IN "SAVE THE SHADES" DRIVE

Indiana public and parochial school children—three-quarters of a million strong—will participate in the statewide campaign to "Save the Shades", Governor Ralph F. Gates announced today.

Participation, while entirely voluntary on the part of individual students, will be statewide, the Governor said, reaching into almost every classroom throughout Indiana.

Plans for pupil participation in the public schools were worked out by Ben H. Watt, superintendent of public instruction, and the State Board of Education. Participation by parochial schools is being worked out with diocesan superintendents, the Governor said.

The "Save the Shades" campaign, which lasts through Sept. 30, is sponsored by the Indiana Department of Conservation which hopes to develop the historic 1452-acre scenic and recreational area near Crawfordsville as Indiana's 15th state park.

Schools are now being supplied with campaign materials, including the certificate pictured above which will go to each student participating.

The certificate, on which each student's name will be printed by the teacher, bears in its four corners pictures of the Indiana state bird (Cardinal), the blossom of the state tree (tulip poplar), the state flower (zinnia) and a white oak tree. The white oak is official emblem of The Shades campaign since the park contains one of the last remaining major stands of white oak timber in the Midwest.

In a bulletin to all public school superintendents, Mr. Watt characterized the school campaign as "an excellent citizenship project" and pointed out that each pupil gift is "an investment in the future of Indiana."

He added that participation by children in such an effort, "builds up an awareness of citizenship responsibility."

NEW CASTLE

TOWNSHIP NEWS

Mr. and Mrs. Dell Wagoner spent Friday forenoon in Mentone.

Robert A. Calvert has accepted a position at the Lake City Machine Shop in Mentone.

Miss Jean Bowers has been confined to the home of her parents, Mr. and Mrs. Raymond Bowers, on account of illness.

Miss Mitzi Meredith, daughter of Mr. and Mrs. Frank Meredith will be removed to her home sometime this week from the Riley hospital in Indianapolis. Miss Meredith has been suffering from polio. Her condition is very much improved at this time.

Mrs. Charles Good assisted the Green Lunch Room a couple of days last week.

Paul Scott reports that he lost a valuable calf last Friday forenoon when the animal became ill when being turned into a field of alfalfa. The young calf was valued at \$100.

Mr. and Mrs. Ralph Chapman moved Saturday from the Ruth Barr property to their farm home east of this place.

Mr. and Mrs. Dale Chapman of So. Bend, and Mr. and Mrs. Dean Myers of Rochester, called on their parents, Mr. and Mrs. Russell Chapman, Sunday afternoon.

Mrs. Ada Bowman made a business trip to South Bend Monday.

Callers at the home of Mr. and Mrs. Lou Grove Sunday evening were Mr. Archie Grove and Mrs. Orah Byers of South Bend, and Mrs. Charles Good of this place.

Mrs. Ralph Chapman, R. N. at the Woodlawn hospital at Rochester, has resumed her duties after enjoying a week's vacation.

Mr. and Mrs. Harry Wenger and family spent Saturday evening in Rochester.

There were 65 in attendance at the Talma Methodist Church on Sunday, Sept. 14th.

Mr. and Mrs. C. M. Walker and son Lonnie and Bill Kubley spent Sunday in Fort Wayne with relatives.

Joe Good and Mickey Eaton spent Saturday evening in Rochester.

Mr. and Mrs. Johnny Hatfield and daughter Linda of Chicago, spent the week end here the guest of his mother, Mrs. L. W. Hatfield.

Mr. and Mrs. Dave Swihart are spending the week in South Bend with relatives.

Lavoy Montgomery attended the All Star softball game at Mentone on Friday evening.

Bob Kramer spent the week end in Plymouth as the guest of his mother, Mrs. Agnes Kramer.

Sunday callers at the home of Mr. and Mrs. C. J. Good were Mr. and Mrs. Harold Myers and family.

Mr. and Mrs. Russell Chapman assisted their son and daughter-in-law, Mr. and Mrs. Ralph Chapman, move to their new home Saturday.

Archie Grove, of South Bend, was a business visitor here Monday.

Rev. and Mrs. Elmer Jones of Lafayette, called on her sister, Miss Ruth Barr, Monday afternoon.

Mr. and Mrs. Kenneth Little and daughter Beverly, and Mr. and Mrs. Ernest Floor and family of So. Bend, were Sunday dinner guests of Mr. and Mrs. Joe Little.

Rolland and Roberta Calvert are spending the week as guests of Mr. and Mrs. Wilbur Utter and family.

Afternoon callers at the home of Mr. and Mrs. Joe Little were Mr. and Mrs. Claude Senour of South Bend, and Mr. and Mrs. Winifred Warren of Argos.

Roy Dale Calvert is spending the week as the guest of his grandmother, Mrs. Lillie Myers, of near Rochester.

Miss Helen Teeter, of Indianapolis, is the guest of her grandmother, Mrs. L. W. Hatfield.

The last free movie of the season was held here on Monday evening. The merchants are planning on again sponsoring free movies next season.

NEWS IN THE WORLD OF RELIGION

By W. W. REID

The Touro Synagogue, Newport, R. I., the most historic Jewish synagogue in America and one of the oldest religious edifices in the continent, is the first Jewish temple to be dedicated as a national shrine. Almost two hundred years old, the Synagogue is an architectural gem of colonial days. It was built a century after the first fifteen Jewish families arrived in Newport from Spain and Portugal (1658), and was named after their leader, Rabbi Isaac Touro. Members of its congregation were prominent in colonial and Revolutionary enterprises, and George Washington once spoke from its rostrum. As a national shrine it will be under the protection and care of the United States Government.

American church aid has been promised the National Christian Council of India in its efforts to relieve some of the more serious situations growing out of famine in that land described as "generally worse than last year but not as widely publicized." According to advices received by Church World Service, in New York City, from Dr. L. A. Blickenstaff, its representative in Bombay, food and grain stocks are low in Bombay; supplies and rations are very low in the Central Provinces; foodstuffs are "short" in Madras Presidency; distribution of food is handicapped by civil disturbances in the Punjab. The new famine may last into 1948, it is believed, and the American organization is planning to ship to India powdered milk and various cereals to be distributed under the direction of the National Christian Council.

"The continued development of highly scientific weapons of widespread mass destruction and obliteration will never be a way to plan for peace and security," says Dr. Charles F. Boss, Chicago, Ill., secretary of the Peace Commission of the Methodist Church. "These, and the maintenance of universal conscription, will always be a threat to the peace of the world and do actually constitute plans of war-making . . . The United Nations must seek

to bring about a reduction of war-hysteria, both by the adoption of political means of national security, and by the reduction of war-making processes in all nations, doing so by international agreement. There is no other security."

"The church has long proclaimed that if Christianity is honestly believed and fully practiced, it will solve all problems of human maladjustment," says a recent statement of the interdenominational Foreign Missions Conference of North America. "It brings all men into right relationship with the one God and Father of all. In him, they ground their faith in the moral order of the universe. As disciples of Christ, they learn to live together as God's children, using their intelligence and ability in loving cooperation. It is the task of the church not only to make these teachings more effective in the daily life of every Christian and in the church itself, but also to increase the number of Christians, linked in a steadily growing worldwide Christian fellowship. Through foreign missions, the churches of North America carry on this twofold task overseas. In the name of Christ they minister to the whole range of human need, from hunger and disease to man's restlessness until he finds God. The critical needs of mankind the fact that Christians believe that in Christ they have the Way to meet these needs, and the new techniques making possible speedy change, demand that the Christians of the world work harder, faster, and more effectively than ever before. They must embody the love of God in lives of Christian action as well as proclaim him with all the newest techniques for conveying ideas."

Dr. Shui Tsai Hwang, professor of soils at the mission-supported College of Agriculture and Forestry of Nanking University, China, believes he has found a clue to the prevention of soil erosion in the hilly areas of the country—erosion being one of the causes of China's agricultural poverty as well as her devastating floods. Experimenting with land slopes as steep

as twenty percent, he found that broadcasting a cover crop of soybeans on hillside cornfields (rather than planting them inter-rowed) almost completely stopped the loss of soil. Because of the waste of hillside lands and soil, many Chinese farmers use only the lowlands and raise rice. He believes that the right use of strip farming and the use of permanent strips can save the land, and add peas, corn, beans, wheat, and peanuts to the national diet.

A bust of General William Booth, founder of the Salvation Army, was recently presented to the United Nations, at Lake Success, L. I., marking the eighty-second anniversary of the commencement of the Army's educational evangelistic and social welfare work, now organized throughout most of the world. There are today 3,000,000 members under 97 national flags. The first group of Salvation Army officers arrived from England in New York in 1880. Today there are 5,000 officers and 50,000 lay workers in the U.S.A., operating 1,365 "outposts" that minister to several millions.

"What can we expect," asks Dr. Aaron H. Rapkin, rural sociologist and clergyman of Hiawasse College, Tenn., "when the major business of our government seems to be to pay for past wars and make plans for future wars? What can we expect when at least half of our children receive no religious instruction, and only a small percentage of the other half adequate religious instruction in their homes? What can we expect when to a large extent profits come first and personality is given secondary consideration in conducting our business? What can we expect when practically all the knowledge given to our children in the public schools, colleges, and universities is without any reference to God and to what is right and wrong? What can we expect when more than half

the members of the church are only nominally Christian?"

At Gotemba, Japan, and Seoul, Korea, nine American church leaders are attending interdenominational conferences this summer, considering problems of relief, programs of evangelism, and the reestablishment and unification of Christian mission schools in these lands. The delegation from America, sent by the Foreign Missions Conference, is composed of Dr. Thoburn T. Brumbaugh of the Methodist Church; Dr. Herrick B. Young of the Presbyterian Church in the U.S.A.; President John L. Yost of the Lutheran Theological Seminary; Miss Alice M. Billingsley of the Woman's Society of Christian Service, Methodist Church; Miss Ruth Williams, R. N., of the Institute of Ophthalmology, New York; Dr. Elmer A. Friddell of the Northern Baptist Convention; Dr. Peter K. Emmons, Westminster Presbyterian Church, Scranton, Pa.; Mrs. F. G. Brooks, of Mt. Vernon, Iowa, Methodist Church; and the Rev. Henry G. Bovenkerk, New York, secretary and interpreter of the delegation.

Named for Indians

Paraguay's unit of currency, the guarani, is named for a warlike Indian tribe.

Black Gondolas

The great council of Venice passed an edict in 1562 making black the compulsory color of gondolas; before that period they were a variety of colors.

WHAT MUST I DO TO BE SAVED?

This question has troubled a great many people, largely because of unscriptural teaching. Some teachers will say that we are saved by **faith only**; others differ a bit and say that salvation comes by **grace through faith**; still others say that it is only necessary to **surrender our will** to the Lord and let Him have His way. Others say that we are saved by the blood of Christ; that the atoning blood of Jesus is the only power to save sinners.

In a certain sense of the word, **all of the above statements are true**, except that they do not go far enough and their meaning is distorted because they are used in the wrong way. Of course we are "saved by grace through faith," but this means that the Grace of God is sufficient for all, and "through faith" includes a work of faith which people must do in order to qualify for this "Grace" of God. Certain ones will quote, "not of works, lest any man should boast" (Eph. 2:9). This quotation attributes all the power to God, which is right, but it does not preclude the necessity of any work being done on the part of the individual.

(To be continued)

WELCOME TO THE CHURCH OF CHRIST

RALLY DAY SEPTEMBER 28.

Rev. Paul Irwin, pastor of the Mentone Methodist church, announces that Rally Day will be held September 28th. Plan now to attend. Invite your friends and neighbors.

On Rally Day we will have the first meeting of the Young Adult class. This class will be for those between the ages of 18 and 35. This is not to be a

young married people's class, but a young adult class. Some will be married and some not. Someone has said that there are 40 young people who do not go to Sunday school who should be in this class. If you are one of those, we invite you to attend. Your pastor will teach the class until you elect a regular teacher. The idea is not to drain students from any other class or to interrupt any other class. This class can be made up for the greater part, of those who do not attend.

LOCAL NEWS

A marriage license was issued on Saturday to Leo W. Mosier, son of Harry C. Mosier and Barbara Truex, daughter of Mr. and Mrs. A. Truex, of Etna Green.

All graduates and pupils are invited to attend the skating party at the Tunnel of Fun Friday nite at 7:30. Come and bring a guest with you. Parents are welcome.

If rural patrons would like to have books from the library, ask your children to get them for you on their weekly visit to the library, states Mrs. Pearl Lackey, librarian.

Mr. and Mrs. Harold Nelson and son and Mr. and Mrs. Miles Manwaring returned on Monday after spending a couple of weeks in Michigan.

Mr. and Mrs. Don Lyons spent the week end in Mentone at the Robert Reed home. They plan to move into their new home in Warsaw this coming week end.

Tommie Blue, who spent the summer at South Bend working at Notre

Dame, has returned to Mentone where he has employment at the Nellans' Dressing Plant.

Kids, you've all heard of book worms but have you ever heard of Marmaduke? Tune in on Marmaduke's radio program over WOWO after school and learn all about Marmaduke.

Looking for a new and better job? Your library can furnish an abundance of information on a wide field of vocations.

Mr. and Mrs. Frank Meredith and daughter, Marsha, of Burlington, Vt., returned to their home Sunday following a two weeks' visit with their parents, Mr. and Mrs. Del Meredith, and Mr. and Mrs. Waid Arnold, of Warsaw. Mr. Meredith, who is affiliated with the Bell aircraft branch in Burlington, was former Warsaw high school band instructor.

Mr. and Mrs. Forrest Kesler and Mr. and Mrs. Artley Cullum and children returned last Friday from a two weeks trip which took them through the Black Hills, Yellowstone Park and on to Three Forks, Montana, where a few days were spent with relatives. It's nice to travel, but it's even better to be home and learn that newspapers were published and peaches canned without our assistance.

Mrs. Burl Burg was the guest of honor at a birthday surprise dinner Sunday at the home of Mr. and Mrs. Mark Burg. She received many beautiful gifts in honor of the occasion. Those present included Mr. and Mrs. Aca Dirck of Mentone, Mr. and Mrs. John Lackey and daughter of Warsaw; Mr. and Mrs. Richard Burg and family of Etna Green; Mr. and Mrs. Burl Burg, Mr. and Mrs. Rolin Riddle and Mr. and Mrs. Mark Burg of Plymouth.

ENTERTAINS FOR BIRTHDAY

On Tuesday evening Mrs. Kenneth Romine entertained with a chop-suey dinner in honor of the birthday of Mr. Romine.

Guests were Mr. and Mrs. Raymond Lewis and Mr. and Mrs. Wayne Bowser.

Evening callers were Mr. and Mrs. Robert Whetstone.

HELP TO CELEBRATE BIRTHDAY

The children and grandchildren of Nancy Emma Nellans gathered at her home Sunday afternoon to celebrate her 87th birthday, which occurred the following day, Sept. 15th. The afternoon was spent in a social way and refreshments of homemade ice cream

and cake were served the following guests: Mr. and Mrs. H. V. Nellans, Mr. and Mrs. W. C. Nellans, Earl Nellans, Mr. and Mrs. Byron Nellans, Mr. and Mrs. Dale Nellans, Mr. and Mrs. Wayne Nellans and family, Mr. and Mrs. Max Nellans and son, Mr. and Mrs. Frank Nellans and son, Mrs. Bernard Black, Mr. and Mrs. Clyde Berkepile and daughter Ann, Mr. and Mrs. John Bowman and family of So. Bend and the host and hostess, Mr. and Mrs. Francis Kehoe and daughters.

Mrs. Nellans enjoyed the day immensely. Her general health is fairly good. She has recovered from her fall which occurred four months ago, causing a fractured shoulder, and is now able to use her arm again.

In a typical residence, 44.4 per cent of the heat is lost through roof and walls and it is to reduce this loss that both new and old homes are insulated

by **EVERETT MITCHELL**

Farm Commentator, heard Monday through Saturday, 6:15-6:45 a. m. on WMAQ, Chicago, 670 on your dial.

RECENTLY I attended a meeting in Chicago at which Undersecretary of Agriculture N. E. Dodd told a group of agricultural engineers, "I am more concerned about the chances of losing a lot of our corn because of high-moisture content than I am about the excessively short crop."

Since hearing Secretary Dodd's remarks I have been following the corn situation closely, and the picture has not improved. I talked with my friend Frank Zink, a consulting agricultural engineer, after his return from an extensive field trip.

Zink had been working with farmers and farm equipment manufacturers in order to get corn drying equipment into the hands of those who need it as soon as possible. Zink told me that it is most important for farmers to make their needs known immediately because there is just not enough equipment to go around; it's going to be "first come, first served."

He also emphasized the advantages of letting the corn dry in the fields as long as practical and of husking the ears clean to aid in the circulation of air in the crib. With recent experiments in the mow-drying of hay by fan-driven air, many farmers can look forward to being able to utilize this same system to dry corn.

Perhaps you considered this operation too expensive to use for hay or corn alone. However, a slight modification of the design of your mow and crib may enable you to use the mechanical equipment for both jobs—and at a greatly reduced cost.

In any event, unless farmers and manufacturers of drying equipment cooperate and expend every effort to save our corn crop, it means more shortages and higher prices at home, and further suffering for hungry Europeans.

CHAMPION STEER BRINGS \$3.05

Dale Pentecost, 14, Centerville, is shown above (right) with his Aberdeen-Angus steer which was 4-H Club Grand Champion at the recent Indiana State Fair. Sold at the State Fair's annual auction, the steer brought \$3.05 a pound. It meant a \$3,080.50 check to the Pentecost boy for his 1,010-pound animal. Kingan and Company, Indianapolis meat packers, bought the champion for the Hoosier Markets, Anderson. The same buyers also took the 1946 Grand Champion at a price of \$6 a pound; the 1945 price (at the State 4-H Club Fair) was \$3. Also shown with the boy and his champion are Lt. Gov. Dick James (left) and officials of Kingan's and the Hoosier Markets. A total of 248 steers went on the block in the sale, bringing an average of about \$35.50 as compared to the 1946 average of \$36.56.

MRS. ALVA SHUNK DIES IN CHAIR TUESDAY EVENING

Mrs. Alva Shunk, aged 69 years, quietly passed away Tuesday evening while resting in a chair at her home. Death was caused by a heart attack. She suffered a stroke three years ago and had been in poor health since that time.

Mrs. Shunk was born in Marshall county March 20, 1878, the daughter of Wm. and Barbara Grochenhour, and had resided all her life in this immediate vicinity. She was married at Bourbon Dec. 25, 1898 to Alva Shunk, who survives. She was a member of the Baptist church.

Surviving relatives in addition to the husband, are one daughter, Mrs. Ruth Goodrich, Baltimore, Md.; four sons, George of Argos, Paul of Warsaw, Wayne of Mentone and Merle of South Bend; one brother, Ed. Grochenhour of Walkerton; two sisters, Mrs. Grace Singrey of Mishawaka and Mrs. Irene Glingie of Bourbon, and eleven grandchildren. Three children died in infancy.

Funeral services will be held Friday afternoon at two o'clock at the Mentone Baptist church. Rev. E. E. DeWitt, assisted by Rev. Silas Hill, will officiate. Burial will be in the Summit Chapel cemetery. Friends may call at the Johns funeral home until 9:30 Friday morning when the body will be taken to the home.

EVERETT LONG MOVING PRODUCE BUYING STATION

Effective October 1st, the Mentone Produce Company, operated by Everett Long, will be located one block east and one block north of its present location on Main street. Mr. Long has remodeled a 18x30 wooden structure at the rear of his home where he will operate in the future.

Clayton Clutter, who operates a trucking line, will make his headquarters in the building where the produce company has been located the past several years.

HAVE NEW DAUGHTER

Mr. and Mrs. Ervin (Blackie) Wagner are the parents of a nine pound four ounce daughter who was born last Wednesday evening, Sept. 17, at the McDonald hospital. The new baby has been named Nancy Lee.

MITZIE MEREDITH IMPROVING

Friends will be very happy to know that in a telephone conversation with Mrs. Frank Meredith on Tuesday we learned that Mitzi is improving.

Mitzi, who was flown to the Riley hospital at Indianapolis several weeks ago when stricken with polio, is now able to walk around on the floor, and has only a little weakness in the arches of her feet.

We know how grateful the parents are for this nearly complete recovery, as are the many friends.

Mitzi will be in the hospital for a week or so.

HARDWARE MOVES TO NEW LOCATION

I don't know whether anyone really knows why a rabbit travels in a circle, but we do know that if one is chased by dog or man, he will continue to travel a circuitous route and eventually find himself going over the same route again. That is about the same story about Mentone's up-town hardware. Years and years ago there was a hardware in the building two doors west of the post office. This week Byron Peterson has moved his stock of hardware back into the same building and will be open for business again Saturday morning.

TO CELEBRATE GOLDEN WEDDING OCTOBER 5

Mr. and Mrs. Fred Swick will celebrate their 50th wedding anniversary on October 5th, at their home one mile west of Mentone. They will hold open house for their friends and relatives from two to five o'clock.

Mr. and Mrs. Swick have spent practically their entire married life

on the farm where they now reside.

Among those to be present will be the Swick's five daughters and their families: Mr. and Mrs. Adrain Little, Huntington; Mr. and Mrs. Earl Smalley, Warsaw; Mr. and Mrs. Doyle Earwood, Terre Haute; Mr. and Mrs. Hale Herd, Lucerne, and Mr. and Mrs. H. V. Johns, Mentone.

MRS. MARY H. ELLIS EXPIRES NEAR ARGOS

Mrs. Mary H. Ellis, 82, died at 12:45 p. m. Thursday at her home a half mile south of Argos following several months illness. She had been a resident of the Argos community since 1915 coming there from Rochester.

Mary H., daughter of Linus and Margaret Borton, was born Aug. 9, 1865 at Mentone, Ind. She was married to Robert Ellis on Aug. 31, 1884. He died in 1922. Mrs. Ellis was a member of the Argos Church of God.

Survivors are five sons, Elmer, of Hutchinson, Kans.; Linus, of South Whitley; Robert of Culver; Jessie of Logansport; Amafa, of Mishawaka; two daughters, Mrs. Murrie Crowel, of South Bend; Margaret, at home; a sister, Mrs. Amanda Eaton, of Mentone; three half brothers, Ira, Linus, and Austin, all of Mentone; 16 grandchildren and 19 great-grandchildren.

Funeral services were held Sunday at 2:30 p. m. at the Grossman funeral home in Argos. Burial was in the Maple Lawn cemetery there.

NAMED VICE PRESIDENT

Arlo Friesner was one of the vice presidents elected last Wednesday evening at a meeting of the County Firemen's Association.

Officers elected were: Bill Martin, Milford, president; Max Davis, Burket, vice president; Arlo Friesner, Mentone, vice president; S. L. Herman, Syracuse, secretary; Theodore Good, Etna Green, treasurer.

The meeting was held at the fair grounds and was attended by around 80 firemen. Leolin "Bud" Moon, of the State Fire Marshal's office, and Francis Hartman, assistant director of the Indiana Fire-Training Service of Purdue, helped to organize the association.

The first meeting will be held in Mentone on Oct. 16.

CLUB CALENDAR

W. S. C. S. Friday evening, Oct. 3 at 7:30 at the home of Mrs. Miles Manwaring.

Wednesday Evening, Oct. 1, Mentone Lions club fish fry at McClure lake. Recreation activities at 3:30; supper at 6:30.

STATE CHAMP!

Larry Adkins, 11, Martinsville, is Indiana's champion blower of bubble gum bubbles. He won the first statewide contest at the Indiana State Fair, topping thousands of other entrants, blowing a bubble about 18 inches in diameter. Sponsors of the contest were the Indianapolis Times, the BUB Gum Company and the State Fair. Larry won \$100 in cash, plus a bicycle in the daily elimination contests.

HEALTH FACTS FROM YOUR STATE BOARD OF HEALTH

PERSONAL HYGIENE

Now—the first of the school year—is the time to get the jump on lice and itch in the school room. Children infested with either should be sent home before there is an opportunity for spread to other children.

Itch and lice cause much unpleasantness and absenteeism in schools. The best protection against them is cleanliness. However, both are spread by direct contact so children playing together may inadvertently become infested. The cleanliness, which protects the child, must extend from the school to the home. A child can be treated at school and re-infested again and again at home.

The use of soap and hot water will help get rid of lice and the parasite causing itch. Clothes of those under treatment for either infestation, and bedclothes such as pillow cases, comforts, sheets, etc., must be boiled. Woolens can be baked. Heat kills the parasites and prevents their spread. Shampoo the hair and bathe the body

itch, standard anti-itch ointments may cause violent reactions so the family physician should be consulted for treatment.

Free literature on lice and itch are available by writing to the Indiana State Board of Health, 1098 West Michigan Street, Indianapolis 7, Ind. at frequent intervals. In the case of

EXPERIENCE MAY LEAD TO OVERCONFIDENCE

Recognition by motorists that experience behind the wheel does not bring immunity to traffic accidents would help apply the brakes to the inflationary spiral of highway fatalities and injuries, Charles M. Hayes, president of the Chicago Motor Club, said today.

Aver-confident motorists, lulled into a false sense of security by driving experience, may be shocked to learn that 97 percent of all traffic accidents are caused by motor vehicle operators, with more than one year experience, Mr. Hayes said.

Drivers with only three to six months experience, on the other hand, enjoy the safest accident records on the highways, demonstrating the value of a cautious, courteous driving attitude.

Two out of three accidents are caused by mistakes by the driver, a majority occurring while the automobile is traveling at an excessive rate of speed, the motor club executive added. Experienced drivers too often overextend their dependence on mechanical equipment and driving skills, fatally closing the minimum margin of error for driving safety.

DAYLIGHT SAVING TIME TO END THIS WEEK

Summer is nearly gone and the vacation season is about to step aside while winter goes into its usual antics, and Saturday night at the stroke of midnight it will still be only eleven o'clock again. Daylight saving time will end.

Daylight saving time serves a purpose, and there are many who do appreciate it during the summer months. However, the confusion its creates appears to be very unnecessary. Very few of the states use daylight saving time, with many of them having state enacted statutes or resolutions against its use. Indiana, too, usually operates with but a small percentage of its people on the "fast" time.

Additional hours of summer leisure daylight could just as easily be secured by regulating hours of work—and it is very likely that newspapers could find some other source for "space-filling" stories that would contain as much human interest as "fast" time.

DIVORCE GRANTED

A divorce has been granted to R. Franklin Molebash, Mentone carpenter, from Rowena L. Molebash, who lives with her parents, Mr. and Mrs. Walter (Bill) Lackey, Mentone, with the defendant's former name, Rowena L. Lackey, being restored to her.

ENJOY FISHING TRIP

A group of young married people took a week off and went fishing last week in Michigan, around Kalkaska and Traverse City.

The fishing, according to reports, was just fair.

Those taking the trip were: Mr. and Mrs. Wayne Shunk, Mr. and Mrs. Allen Herendeen, Mr. and Mrs. John Allen Teel, Mr. and Mrs. George Craig, Mr. and Mrs. Henry Konnick and Mr. and Mrs. Earl Anderson.

OPENS PLUMBING BUSINESS

The people of Mentone and vicinity will be pleased to learn that Harold Smythe is opening a full time plumbing business. This is a familiar field to Harold, as he and his two brothers were in the plumbing business at Palestine before the war interrupted civilian activities. He served in the army, and, after his discharge, came home, married the former Gertrude McClane, built a neat little home and became a Mentone citizen.

Gas on Stomach

Relieved in 5 minutes or
 double your money back

When excess stomach acid causes painful, suffocating gas, sour stomach and heartburn, doctors usually prescribe the fastest-acting medicines known for symptomatic relief—medicines like those in Bell's Tablets. No laxative. Bell's brings comfort in a jiffy or double your money back on return of bottle to us. 25c at all druggists.

An ad giving details appears elsewhere in the paper.

IN MEMORIAM

In loving memory of Edward Halterman who passed away five years ago September 25.

WIFE, CHILDREN and
 GRANDCHILDREN.

Led Way to Rubber

Micael Faraday, famed for his discoveries which laid the foundations for present methods of electric power generation, also pointed the way to synthetic rubber. The search for a substitute began as early as 1826 when the English physicist, also known as the "Columbus of the electrical age," helped to establish that the chief constituent of natural rubber is a hydrocarbon. Seventy-four years later the first synthetic rubber was produced by a Russian named Kondakoff.

**WANT TO SING IN
"THE MESSIAH"?**

Persons wishing to sing in the Rochester community presentation of the oratorio, "The Messiah," at Christmas time are invited to attend an organizational meeting Thursday evening, Oct. 2, in the Rochester Baptist church.

Mrs. Carson McGuire, who directed 50 voices in the oratorio last year at Rochester, will be in charge again. She has announced the tentative date for the presentation to be Sunday, Dec. 21.

Participants need not be professionals nor need they know the music

in advance, Mrs. McGuire said. Weekly rehearsals will be held in Rochester.

The organizational meeting will begin at 8:30 p. m., Central Standard Time.

Dog Law Violators

Dogs were man's equal in intelligence, according to primitive law, and were held just as responsible as man if they broke a law. If a dog had bitten a person without first barking a warning, the animal was considered to have committed a willful act of violence. If the dog had barked first, then it was deemed the dog had acted in self defense. Such beliefs are still held in certain sections of the world. In Africa, dogs belonging to natives that are caught stealing food are hanged. The animals are left suspended from a tree limb near the village square as an example and warning to other dogs and human tribal members.

Apple of the Earth

To the French, a potato is pomme de terre, which means, literally, "apple of the earth." Long before potatoes were introduced into France, apples were one of that country's most prized fruits. How well the potato's French nickname tells a story can be judged by the fact that one medium-sized spud has about as much food value as one medium-sized apple.

Daily Vitamin Source—Home Canned Tomatoes

—Photo courtesy Ball Bros. Co.

Tomatoes, really a fruit but more often regarded and used as a vegetable, are easy to can at home, and yet few people ever have enough to last through the winter until the next crop comes along. To can, select fresh, firm, sound ripe tomatoes and wash carefully. Scald in small quantities. Using a cheesecloth square to hold the tomatoes and dipping them into hot water is an easy and effective way of scalding.

Skin, pack and process as quickly as possible after scalding. Letting the tomatoes stand after scalding is

likely to cause flat sour. If exposed to air after skinning they also lose food value. Tomatoes are an important source of Vitamin C (ascorbic acid) which is needed in daily diet for good health. Always cut out the hard cores and green spots before canning and avoid canning tomatoes from which decayed spots and fungus growths have been removed.

The Ball Blue Book recipe for Regular Pack directs that the prepared tomatoes be packed solidly into hot jars. Add one teaspoon salt

to each quart. Do not add any liquid. Process 45 minutes in hot water bath. Or, another method given is to boil the prepared tomatoes five minutes, pour into hot jars, add one teaspoon salt to each quart and process 20 minutes in hot water bath.

To can tomatoes whole, prepare them as above, being careful not to cut into the seed pod when removing the core. Pack into hot jars as closely as possible without crushing. Add one teaspoon salt to each quart, and cover with hot tomato juice or puree. Process 35 minutes in hot water bath.

Measures Landing Distance

Automatic electronic instruments, cellometers, accurately and continuously measure the distance from ground to clouds, aiding planes in making landings.

Yankee Doodle Born

It was on the well-curb of Fort Crailo, Rensselaer, N. Y., that Dr. Richard Shuckburg, a British army surgeon, was watching the Colonial troops gather in 1758. Here he whistled the tune and composed the satirical verses of the immortal "Yankee Doodle."

Source of Pectin

Cranberries are one of the richest known sources of pectin, the substance which makes fruits "jell."

K-9 Heroes of the War

Nearly 2,300 members of the K-9 corps were killed in action and hundreds more served with distinction on patrol missions in Italy and the Pacific. During the war, 19,094 dogs were recruited and 10,526 were trained and actually served with troops.

Dog-Coyote Cross

A rare, wolf-like animal in captivity at Southern Normal university, Carbondale, Ill., has been classified as a cross between a German police dog and a coyote.

Our Annual Exports

Last year the United States exported more than two billion dollars' worth of goods to the Latin-American countries, chief of products being wheat, lard, rice and processed milk.

Scouts of the World

To help restore scouting abroad, Boy Scouts of America established the world friendship fund in December, 1944. By the end of 1946, \$115,159.07 had been contributed. Shipments of literature and other items have been sent to the recognized scout officials in 26 countries, for distribution. Books were a major item requested because scouting publications had in most cases been destroyed. Because all scout uniforms and insignia had been lost, an inexpensive membership badge was needed in many countries and more than 150,000 were manufactured and sent.

FIXING UP the HOME

By Diane Greeter

Quick Way to Make Drapes

HERE'S a quick and easy way to put drapes, without brackets of any kind, on that troublesome window that has defied all your plans.

Buy the drapery material as plain yard goods, selecting a pattern that will go well with the rest of your decorative scheme. Purchase sufficient extra material to make two or three large loops, about two to three inches wide and six inches long.

The loops can be shirred, pleated or made plain, as you wish, but they should be padded out with some other material to give them firmness. Small brass or plastic

rings can be obtained at the local ten cent store and sewn near the top of the back of the loop. Ordinary picture hooks can then be placed in the wall or window frame at the corners and center and the loops placed on these hooks.

Then draw the drapery yard goods through the loops and arrange in soft folds at the sides and across the top of the window. The length can be either just below the sill of the window or down to the floor.

The ends of the material should be hemmed. Make the last hem after you have arranged the new drape on the window, to be sure it is the right length.

Don't Tell Congress

Edward, the Black Prince, imposed a tax on every chimney in England. The tax, one florine, was imposed for every hearth in his French dominions. The first statutory enactment in England required a tax of two shillings on every hearth in certain houses to be paid to the king. The tax was called furnace or chimney tax and was abolished in 1689.

Cost of Stopping Train

It costs from 84 cents to \$2.80 for stopping and starting a passenger train, and from \$1 to \$4.80 for stopping and starting a freight train.

PRINTED IN THE MODERN PLANT OF THE COUNTRY PRINT SHOP

75,000 CHANNEL CATFISH

RELEASED BY FISH DIVISION

Release of 75,000 three-inch channel catfish in Hoosier streams and rivers

was announced Wednesday by the Fish and Game Division of the Indiana Department of Conservation.

Harry Young, supervisor of hatcheries and game farms, said the first release of 24,000 cats was made last week in the northern section of the state and that the same number are being released this week in the southern section.

Remainder of the hatch, which totals in excess of 75,000, will be released by the first of November, Young said.

He added that the release is the largest in recent history and followed a highly successful hatching and growing season. Many of the cats are nearly four inches long, he said.

SOFT CORN FOR HOG FEED

Farmers faced with a soft corn crop will find that one of the most effective means of utilizing the crop is feeding it to livestock this fall and winter.

W. M. Beeson, Purdue University animal feeding specialist, advises feeding the soft corn to hogs before spoilage "sets in" next spring. Leaving it in the fields and picking as needed is better management than turning the hogs into the corn which usually results in considerable waste.

Soft corn is most easily utilized by hogs by feeding it as ear corn, Mr. Beeson says. Hogs are a single-stomached animal and are not capable of utilizing effectively feeds that are high in fibre, such as ear corn silage or corn silage. When silage is fed to pigs, the rate of gain is reduced and many times digestive disturbances occur. Therefore, this type of corn can be most effectively fed to cattle rather than hogs.

Beeson pointed out that when soft corn is not damaged by mold or rot, the dry matter is about equal to that of mature corn.

Soft corn, because of the moisture content, does not produce as rapid gains as mature corn. The feeding specialist cited experiments carried on at the South Dakota Experiment Station where the rate of gain of hogs showed that 100 pounds of mature corn was equivalent to approximately 108 pounds of soft ear corn on the same moisture basis.

Hogs being fed on soft ear corn should be given free access to a balanced protein supplement and mineral mixture the same as with mature corn. Breeding hogs should never be forced to eat moldy or rotten corn and if hogs are given a choice, they will refuse the spoiled corn. Beeson said that it is a rather hazardous practice to force breeding gilts and sows to eat moldy corn because moldy feeds cause reproductive troubles during the breeding and pregnancy periods.

BOGGS HONORED AT UNIVERSITY

Shown above is Joe Boggs, son of Mr. and Mrs. Stanley Boggs, of near Mentone, who was chosen as the most improved backfield man in the spring training drills at DePauw University at Greencastle, Indiana. Joe has reported to Coach Mike Snively, new football mentor at DePauw University and will probably fill the vacancy left by Don Galbraith of last year's squad at left halfback. Joe seems to have a habit of gaining recognition because of his athletic ability, and undoubtedly one of the main reasons is that he loves sports of all kinds and he really trains and works to be the best possible. (The picture from which the above printing plate was made is in reverse, due to an error on the part of the photographer that made the print at the university, and Joe was actually holding the trophy in his right hand, and was wearing his wrist watch and ring on his left.)

WANT AN ELK?

The Indiana Department of Conservation appealed to Hoosier communities to come to the aid of the superintendent of Pokagon State Park.

The superintendent, R. L. Riden-

our, has elk trouble.

He also has buffalo and deer trouble.

The animals, which roam a fenced enclosure at the northeastern Indiana park, have multiplied too fast for Pokagon's facilities. There are five surplus elk, two young buffalo and four extra fallow deer.

NEWS?—PHONE 35

WHAT MUST I DO TO BE SAVED?

(Continued from last week)

Jesus said: "If ye love me, ye will keep my commandments." (John 14:15). These commandments would include certain works, for Jesus also said: "Not everyone that saith unto me Lord, Lord, shall enter into the kingdom of heaven, but he that doeth the will of my Father." (Matt. 7:21). Furthermore, the Apostle James said, "Show me thy faith without thy works," and I will show thee my faith by my works." (James 2:18). Again he said that "Faith without works is dead." (James 2:17), and also that "By works a man is justified, and not by faith only." (James 2:24).

None of us would say that we could save ourselves independent of God's grace, or that our good works could possibly merit salvation. "The grace of God which brings salvation" (Titus 2:11), is free to all. In a similar way the sunshine is free to all, but in order to enjoy its benefits we must make the effort to get out of the shadows so that the sunshine can reach us. Likewise we must take the steps necessary to qualify ourselves to receive the grace of God.

When we comply with specific requirements stated in the scriptures, then God, through His grace, forgives us of our sins; we become Christians, we are "added to the church" (Acts 2:47), by the Lord, and we receive "the gift of the Holy Spirit." (Acts 2:38). The Spirit dwells within the Christian's heart and His presence is evidenced by spiritual life and fruit.

STRICTLY BUSINESS

by McFeatters

"My wife didn't get the door open fast enough when I ran for the bus!"

The name of Larry Manwaring was unintentionally omitted last week from the item telling about the return from Michigan of the Miles Manwarings and the Harold Nelsons. Son Larry was along, too.

Mrs. Mary Bidelman returned on Wednesday of last week from a visit with Mr. and Mrs. Bernard Bidelman and other relatives in Elkhart. She also spent a couple of days at Three Rivers, Michigan.

Mrs. Doyle Earwood and daughter, Nancy, have been spending the last two weeks visiting with the former's parents, Mr. and Mrs. Fred Swick. They left Tuesday to go to their new home in Terre Haute where Mr. Earwood is the new minister of the Church of Christ of that city.

Controlling Rail Traffic

The air brake, invented in 1868 by George Westinghouse and adopted in many foreign countries, is still the primary method of controlling rail traffic.

Washingtons of England

The Washington museum, Sulgrave Manor, England, home of the Washington family, contains many mementos of the Father of Our Country.

Indians in America

While the number of Indians in the United States is now given as 333,969, an increase over 1865, it is far below the estimated population of 846,000 in 1492.

Serve as Baby Sitters

Girl Scouts are learning that active citizenship can and does begin at home and can best be expressed through service. Instead of resting on their record of more than 15 million hours of war work, Girl Scouts today are still serving as hospital aides, baby sitters, ranger and farm aides. There are more than 40 different kinds of jobs in Girl Scouting, ranging all the way from sharing a hobby with a single troop, to working with the world-wide movements on international friendship projects.

LOCAL NEWS

Don Herendeen, of Grand Rapids, Michigan, spent last week end with relatives and friends.

Mrs. Emma Underhill was able to be up town Saturday after being quite sick for a number of weeks.

Mr. and Mrs. Ira Johnston, of Fort Wayne, were Sunday guests of Mr. and Mrs. W. W. Whetstone.

Mrs. Edgar Cochran was able to return home Wednesday morning after having eye surgery last week at South Bend.

Mrs. Walter Wilson was brought to her home from the Woodlawn hospital last Thursday in the Johns ambulance.

Mr. and Mrs. George Clark and sons and Mr. and Mrs. Mervin Jones and son enjoyed a picnic dinner Sunday at Buck Lake, near Angola.

Mrs. Walter Fenstermaker and Cara Lynne; Miss Wreatha McFarren, Mr. and Mrs. Wayne Tombaugh and Dickie spent Sunday in Chicago visiting at Brookfield Zoo and several other points of interest.

Bob Herendeen will leave this week for Galesburg, Illinois to enter the Curry School of Aeronautics.

Mrs. Flavia Tinkey was able to be in town Saturday. She was stricken quite suddenly while attending the fair in Warsaw, and has been suffering with a blood clot.

Mr. and Mrs. Walter Sharper, of Columbia City, and Mrs. Jack Kessel of Los Angeles, Cal., were guests of Mr. and Mrs. W. W. Whetstone, Sunday.

Sunday guests at the Chester Manwaring home were Mrs. Ted Dhoore and daughter Elaine, Miss Louise Verplots, and Mrs. Corlys Paulus, all of So. Bend.

Mrs. Hol Slutz and son Hol II, of Huntington, W. Va., and Miss Julia Keiser of Detroit, Michigan, visited one day last week with their cousins, Mrs. Broda Clark and Mr. and Mrs. George Clark and sons.

Mr. and Mrs. C. O. Mollenhour, Mrs. Walter Fenstermaker and Cara Lynne, Mr. and Mrs. Dale Wallace, Jr., and Connie Jo were Tuesday evening dinner guests at the Deed Shirey home, the occasion being to celebrate the second birthday of young Steven Shirey.

SOMETHING FOR EVERYONE.

There are so many very good books being published now and such a variety of books that every person old enough to read can find something to interest him.

For the thoughtful minded, and who isn't these days, we have that much discussed book, "Inside U. S. A.," by John Gunther, one of our foremost political reporters. He has become famous for his two books, "Inside Asia," and "Inside Europe," but most critics consider this book greater than either of the others. It is a comprehensive state-by-state analysis of

facts, forces and personalities that introduces America to Americans.

For the movie fans, we have "The Ghost and Mrs. Muir," by R. A. Dick. Many people have thoroughly enjoyed the movie and many more will get pleasure out of the book. It is something new—something different.

For the girls we have another Carolyn Keene mystery—her latest 1947 story, "The Clue in the Old Album."

For the children we have several new books and for everyone, some new romances and westerns.

The school children are coming to the library each week and are learning about the many different kinds of books; not only story books but books that will help them in their play, in their work and in their studies. Why not ask your children to get one for you while they are here.

MENTONE LIBRARY.

Earth's Surface

The earth has a surface of approximately 200 million square miles, of which about one-third is land and two-thirds water.

HOWDY FOLKS: We just now heard about a man who got a pain in his back as he tuned the radio and said to his wife: "I do believe I'm getting lumbago!" What's the use, you won't understand anything they say."

"Was it hot where you had your vacation this year?"
"Terrible, and no trees! We took turns sitting in each other's shadow!"

He: "Don't you hate people who talk behind your back?"
She: "Yes, especially at the movies."

We don't want you to talk behind our back either. We'd rather you'd come and tell us how we can improve our service. We will do our best to cooperate.

**CO-OP. OIL
STATION**

Filament of Globe

The fine wire, or filament, that glows in the ordinary electric lamp bulb is made of tungsten. It is hard enough to scratch glass and at high temperatures passes directly into vapor without entering the liquid state.

COMPLETING BASEMENT

Workmen have been busy at the Church of Christ during the past few weeks getting the excavating completed prior to putting a basement under the main part of the church. There will be one large room which

will be used as Sunday school class rooms, folding wooden doors being used for partitions.

There is a basement under the east portion of the church building, but the new basement will be of great use in many ways.

Rats Like Carnations

Rats in the Los Angeles area were reported as having turned up their noses at cheese or bacon rind. They were later caught with lures of carnations, gardenias, roses and other flowers. Rodent control crews discovered that the rats had developed a taste for flowers by eating decaying bouquets discarded in business districts.

Taller Young Girls

Girls are likely to be taller than boys between 11 and 13 years because they gain in height at an accelerated rate from 9 to 12, while the boys do so from 11 to 14.

Deficit in Technicians

There is an accumulating deficit of trained research personnel who, but for the war, would have received bachelor's degrees. The number in the United States is 150,000.

Early Vinland Forestry

In the year 1110, or thereabouts, the Viking merchant-trader Thorfin Karlsefin visited Greenland, and hearing the stories of the Vinland forests, decided to carry on. He did not reach Leif's Vinland; he found great forests in "a place of strong tides" farther north, which Vilhjalmur Stefansson thinks may have been Labrador. Thorfin stayed there harvesting timber for three years.

Chemical Plant Food

Use of chemical plant food in the United States probably dates back to 1830, when Chilean nitrate of soda first was imported.

Reduce Grains by 2,4-D

The new chemical, 2,4-D, may have a selective effect in killing weeds in small grains, but if put on at the wrong time, it also may give reductions in the grain yield as well, according to the Wyoming experiment station. They found that 2,4-D spraying of weed-free barley and spring wheat in the "boot stage" significantly depresses yields as compared with untreated plots of these grains. Beneficial effect of 2,4-D on a weedy stand of grain would outweigh its depressing effect on grain yields in most cases. Spraying weedy grain because of weed eradication will result in relatively less reduction in grain yields.

LOVE LAUGHS AT ANDY HARDY

A FAREWELL RECEPTION

Sixteen members of the Friendship class of the Methodist church met with Mrs. Rosa Kinsey, honoring the going away of Mrs. Ringenberg and Mrs. Flo Borton. The main feature of the afternoon was a contest.

A program, "Women of the Bible," was arranged by Mrs. Kinsey. Refreshments of ice cream, cake and grapes were served. The ladies adjourned wishing the honored members much happiness in their new venture.

Mrs. Ringenberg will leave soon after her sale to visit with a sister in Michigan. Mrs. Borton, who has sold her home to Devon Hilschman, will leave for Wabash about the middle of next month.

GETS NEW DUTIES

Ben H. Watt, state superintendent of schools, has announced that Dale Swanson will be director of special education in the state department of public instruction. In other words, he will be general supervisor of classes and schools for handicapped children. This new post will be held by Mr. Swanson in addition to his duties as director of department inspection.

Mr. Swanson is well known in our vicinity, having graduated from Atwood high school in 1922. He is a brother to Doyle Swanson, principal of Atwood high school.

FIRST "STORY HOUR" HELD.

On Monday at one o'clock the 38 pupils of the first grade and their teacher, Mrs. Ilene Fenstermaker, came to the library for a story. (Mrs. Fenstermaker said the children made the trip from school like a group of frisky colts but it wasn't the children who were out of breath.)

Mrs. Vance Johns was the storyteller and held her young audience quietly spell-bound by her realistic recital of "The Poky Little Pup" and "Raggedy Ann Helps Grandpa Hop-pergrass."

The story hour is to be a regular feature on each Monday afternoon for the first grade. On Tuesday the second grade will go; on Wednesday the third grade, and on Thursday the fourth grade.

The library has been re-arranged and the children now have a cheerful corner at the front of the library. The books are being sorted and catalogued by Mrs. Lackey, our librarian.

CARD OF THANKS

I want to extend my thanks and appreciation to the many friends who remembered me with cards and flowers while I was in the hospital.

MRS. WALTER WILSON.

WORK STARTS ON

NEW FACTORY BUILDING

Wednesday saw considerable activity on the old hotel corner as a power shovel, trucks, surveyors and blue-prints mingled to give one the general impression that a slow, sizzling bomb was about to burst. When the smoke

and dust eventually clear we expect to see a fine new factory building across the way — with men and women going to and from work at regular intervals.

Mentone is on the move — and we are grateful that a goodly portion of its citizens have confidence in the future and are not satisfied to just sit still.
